## MANKIND IN CONFLICT

**“In our universe there are infinite perceptions of reality,  
Yet man is capable of understanding only one.**

**If he is to endure, he must learn to expand his acceptance of this simple universal truth,  
Only then will he be able to fully comprehend our purpose in his creation.”**

*The Visitors. June 1994 (With thanks to Peter Gregory)*

It appears that time and time again, the ‘Aliens’ have tried to guide us on the path of peaceful co-existence and understanding with our fellow-man. The above message, given to Psychic Peter Gregory some years ago is an indication of man’s failure to understand the involvement of the ‘Aliens’ in our existence.

The question is often asked “Why don’t ‘they’ contact us?” Few people fail to appreciate that ‘they’ have contacted us on many occasions. Their reluctance to ‘Land on the Whitehouse Lawn’ is because they would probably receive a hail of lead as a first greeting!

The present inter-religious conflicts throughout the world seem endless and yet over the years we have been warned by the ‘Aliens’ of our failure to appreciate that there is only one Supreme Intelligence (‘God’) throughout the universe.

We (*on Earth*) have many religions that seem intent on proving that their ‘God’ is the right one. The solution it seems, is for some religions to do their utmost to annihilate anyone who does not agree with their particular belief system.

Take a moment to read and digest the following extract from an ‘automatic writing’ message written by contactee Dave McMurray on the 15th September 1985, shortly after a close encounter with an alien craft.

**“We have been watching Earth since 12 B.C.– mans development up to the early 19th century almost nil. Key people were located on Earth, early 1900’s.”**

**“Development up to date increasing by 50%”.**

**“(Mankind is) Warlike which will not be tolerated - Still divided on the idea of one Supreme Ruler.” (God?)**

**“Will continue to watch and instruct key people on the rate of advancement. Recommend that the advancement be reassessed due to the nature of the planet and that they are allowed to continue at the 50% rate rather than to give them full co-operation.”**

We still have a long way to go before mankind realises that we are all one family on Earth and that the way we are behaving at present will probably seal the fate of future generations.

Meanwhile, there have been more discoveries on Mars that indicate an intelligent life has existed there in the past and for all we know, may still be alive and well and living underground? (see page 13).

Alternatively, we need only look around to see where the Martians finally landed!

## A Report From Margaret Fry on Triangular UFO's

I have been investigating UFOS since 1965, that is 40 years, and although I have literally interviewed 1 to 2,000 people in that time, reports of triangular UFOS have been few and far between. Most of what I have got though, excludes any possibility of them being the American Stealth bomber, which according to sceptics seems to have been seen here, there and everywhere before it got off the drawing boards.

J. Linch worked at Collington Mansions Post Office at Bexhill-on-Sea, the Summer of 1973 5.30 p.m. she was leaving work, when she saw to her surprise a silent triangular disc shaped object hovering about 30 yards above her. It being so low looked huge and well below the clouds. It had a red and green light at the corners and at the top a white light. These were going on and off for about 10 minutes. She looked around to share this experience, but no one was about, although later some of her colleagues said they had seen this and were mocked. She said it was gone in less than a second.

As long time Ufologists will know, I was based in Bexleyheath, Kent and investigated reports in London and the Southern counties from 1965 to 1983. I think the first such F.T report I had from my area, was on the 2nd September 1978 a flap year in North Kent. Mr and Mrs Taylor, their children Christopher 11 yrs. and Angela 7 years asked me in great excitement to go over to their house. I was pretty well know there and the Police often rang immediately they were given a UFO report, so my husband and I went, to join them. Within a short time of the occurrence. All the neighbours came out from their houses on that road in Bamehurst. All were telling me of the small dark metallic object flying 200ft over their front gardens. This triangle was pulling slowly like a kite does in strong wind. It had green, I white, red and amber lights in it. These lights defused no light, but there was aglow in front and the back of the object which was 25ft approx. and left a large vapour trail. What impressed them most was that it had no depth, which puzzled the neighbours both sides of the road.

So let me jump in time to a similar report early. It happened in the evening of 12th January 1990 8.45 pm. this took place in North Wales by Bala Lake. David Heddwyn Jones is a Chiropodist and was returning home from work on the Rhydmain/Dolgellau road leading to Bala, when he saw a small triangular craft hovering about 15 feet off the sheep field, by the road side. He stopped the car and walked to the grass verge, there was four feet fencing to prevent the sheep from straying, but he was only a few feet from the Craft and walked about to try and see what it looked like at the back, as it appeared to have no depth at all. It was about 30ft at the base where 'a white line of fluorescent like light was across the base'. Also small green lights above this and at the sides. It was metallic grey, quite still and soundless. This road runs through a valley, it was a very light evening so Farmers in houses in the hills around, were watching this Object which they saw come down to the field. When it started to move horizontally. 'it did so as though it was riding waves, and went quite slowly'.

John Hughes a WFIU member from Caernarfon was working with another man on the sea front at Tresor, (not far from Bangor) when they saw a small triangular object come from inland pass quite close by them, not far off the ground, to over the sea. It was grey/black metallic, making no sound but it 'did pull along as a kite does in the wind' it was only about 23 ft across the base they said. This was in the afternoon on the 5th July 1996.

Sunday the 9th February 1986 approx. 5p.m. to 5.30 p.m This young couple T.Kovacs from Rhyl and her boy-friend R.Gronow from Llandudno were returning home on the M6, with T.K's small child on the back seat of the car. It had snowed heavily and the whole countryside was white. So this in contrast was startling, they saw this flaming red/orange triangular Object flying slowly over fields alongside the motorway, with red flames fanning out behind it. It eventually went slowly down on to a field, where it then vanished, but the fan shaped flame stayed distinctly visible in the dull white sky, for mile upon mile, they could see it in the distance. It had been dull daylight all day with no sun visible.

11.50 p.m. 27.2.1986 Taxi Driver Mr. Jones spotted a triangular craft at very low altitude when crossing over the Aston by-Pass at Queensferry. N. Wales

11.20 p.m. 5th March 1986 Flint, N. Wales Taxi-driver Keith Bailey whilst driving along Coed-onn-Lane, Flint observed 6 large oval lights -green,white,green,white with a darker triangular area below. It was stationary in the sky, but the lights flashed green and white alternately

8.40 p.m. 5th March 1986 -Taxi-driver Frances Martin saw a spectacular array of lights fairly low over the River Dee, near Shotton. N. Wales Sketch sent but no other detail.

23rd August 19869.30 am to 10 am. Miss R. Griffiths a librarian, was at Mold and taking her dog for a walk on this bright sunny morning, a clear blue sky, when she saw a metallic silver triangular Cone quite low down. It was in the one spot, but revolved and sent out long flashes of white, then blue/green beams like laser beams. It was tilted to a side. Two young boys passed and she pointed this out to them. They would not look up, but looked at her as though she was nuts, and then walked on. It was extra warm and sunny that day and this Lady was a very observant and good witness. During the time, a small aeroplane passed quite low o-over the Object. It was still revolving as it went off, not terribly fast in the direction of Loggerheads near Ruthin. She could see it for quite awhile in the distance, although it had not been a large craft.

12th May 1994 12 midnight or so. Denbigh, N. Wales

A friend from Scotland was visiting Alison, they had a late meal and were in the Kitchen chatting and washing up, there was a wide window above the sink. They both gasped as the entire kitchen window area was filled with the sight of a fleet of triangular UFOS

over the wooded area of the hills above the Industrial Estate below them. Alison's house being on a hill slope, they were looking downwards. The Objects were hovering just above or on the tree tops and were white, they tried to count them, about 18 they thought. An invisible line seemed to go across them dimming them as it went, as it got to the last one the Objects would vanish, then reappear in the same spot. After 20 minutes of intently watching this performance, Alison ran to call her friend and neighbour Rhian, who ran back with her, her Scottish friend stayed by the window watching, but the Objects disappeared as they returned.

It should be explained that as they were on a hill, the gardens were lower than the bungalows with high fencing, from the garden they could not see the hilly area or Industrial Estate below. So that these Objects were really very low to the ground. I went to Denbigh the following morning and spoke to Alison's neighbours one of whom said he saw this, also a Security Guard, at the Industrial Estate below. He said a number of people had reported this to him when it was happening. I put a lot of effort into this Investigation and it was frustrating, as although a number of people on that estate did see this, they were not willing to talk to me and the Security Guard said he would lose his job if I publicized it.

On the night of 31st July 1994 Robert Chatterton and Virag, his Yugoslav girl-friend, were invited to a teen-agers party at Western Heights near isolated Army Barracks in Dover, Kent. This is a favourite spot for picnics, and these youngsters had food, coke and soft drinks. They were enjoying themselves. Robert and Virag were 19 years of age and Art Students. At first they saw what looked like a window in the dark sky above them, they saw three blue balls in a triangular shape go into this 'window'. Then a strange looking cone, also triangular at the top part, was seen going in an up and down flight (illustration enclosed). A third Oval with a dark centre went in a wavy line across the sky. They tried to point out all this activity above them to the other youngsters, who were sitting on the grass a bit apart from them, but they appeared not to notice. At any rate they paid no attention.

Robert is the son of Dave and Rose Chatterton one time Essex UFO researchers, who were friends of mine, so I had known him from infancy. Dave had a very weird experience in Yorkshire with UFOS in his youth. Rose was working as a nurse in Dartford Heath Hospital in 1978 when she had UFOS follow her on her bicycle for many weeks during an intense wave of UFO activity in North Kent that year. So do these Aliens tab certain families? I have come across so many reports of this over the years, that I believe they do.

On the 11th October 1994 6 pm. a Tuesday, the Witness working in a computer firm, was returning home after work at Denbigh. A low flying triangular Object with lights inside the pointed part of it, came from over the Colmendy Estate and passed over the road at a height at which it barely skimmed the roof of the Shell Garage, at the base of the main " Denbigh hill road." So he was in no doubt that it was 75 ft across the base, he estimated, as he was at that point almost level with the garage in his car. It was then lost to his view in that area of built up houses.

On the 25th June 1996 10.33 p.m. A country lane in Tremerichon from St. Asaph, North Wales. The witnesses, an aunt and her niece 18 years old, whom I interviewed more than once. This again being one of those families who are singled out over a period of years for UFO experiences. Grandparents, Uncles, aunts, nephews and nieces. I talked to some of them, who had some very close encounters over the years.

This Lady only did not want their names given, as they lived in a tied house which went with their jobs to a large estate and were afraid they would be sacked and without a home, if their employers in the Manor house knew.

They were returning home and had to pass a large farm along this lane, when they were watching a small craft descending from the hills in the distance to the farmer's field along side which had electric pylons in it. It then stopped between them. The farm is called Hafod-y-Coed and it is bordered by 4ft approx. hawthorn hedging, with 4 farm gates at intervals. They stopped the car at the first gate and watched this small object hover about 20 ft off the ground in the cow field between the pylons. It was about 25ft at the base, jet black with a brilliant white light in one corner, it was slightly tilted forward and they could see what looked like car spoilers hanging on the underside. As one side of the craft was in darkness, they thought it was pyramid shaped. They then drove on to Gate 2, watching it over the hedge all the time. They stopped again getting out of the car. Between Gate 3 and 4 was the large farm house, extensive barns, cattle sheds etc. the object barely skimmed these and stopped with them at Gate 4. Then it passed barely skimming their car, this totally unnerved them. They then noticed two cars, one a mustard colour, also stationary and the occupants watching from the other side of the road. They swerved past them and drove erratically fast home. On reaching the Aunt's house, the Object now passed directly over her house, but from that angle looked oval shaped. They assumed the car passengers had called the police, as a noisy police helicopter followed shortly after., and it continued to circle over the area.

Two years previously this Lady's 14 yrs. old son and his friend from next door the same age, were cycling along the Bodfari road, below the T.V. mast receiver. The spot where I have received continual UFO reports over the years. A large triangle shaped craft came down and positioned across the road, a few feet off the ground. It spanned the whole road, and small blue lights kept sparking down the left side of it. The boys got off their bikes and were petrified. They eventually got home very shaken. Regretfully I have lost this report so am unable to give exact details. I have been searching the overflow of files in my garage for it and hopefully if I locate it, I will send the report later.

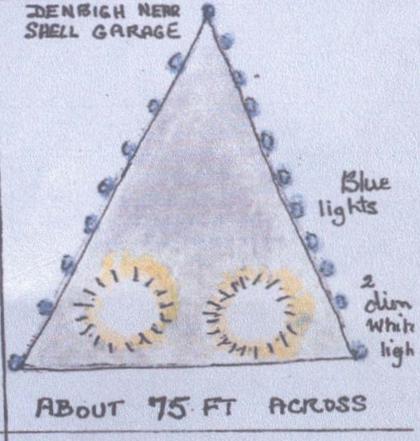

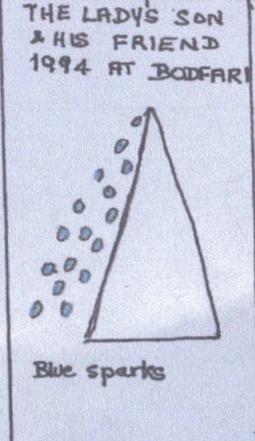

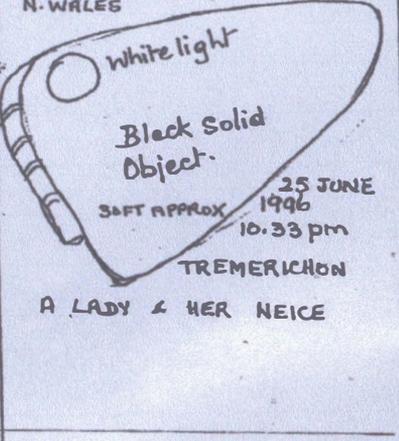

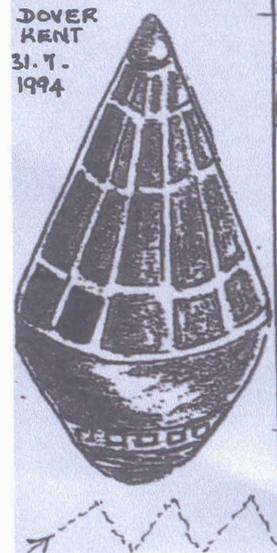

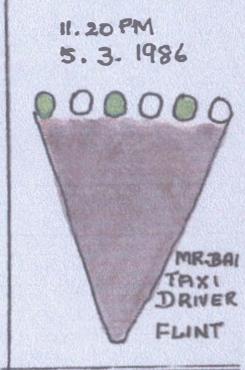

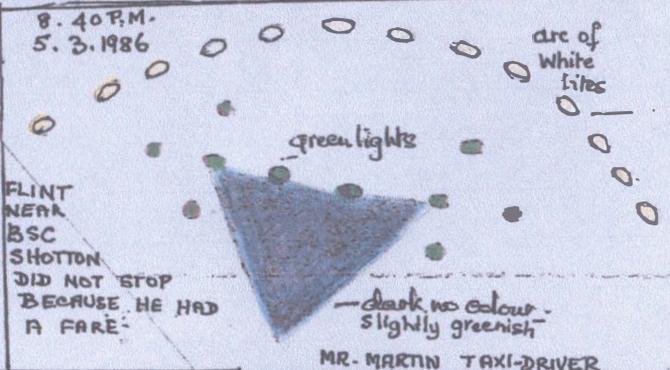

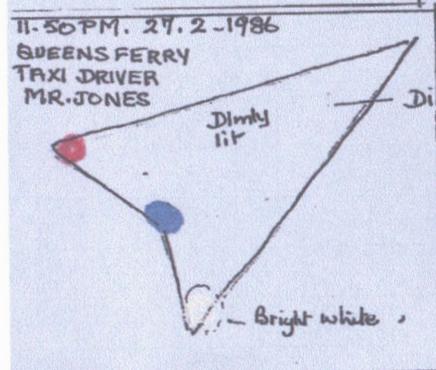

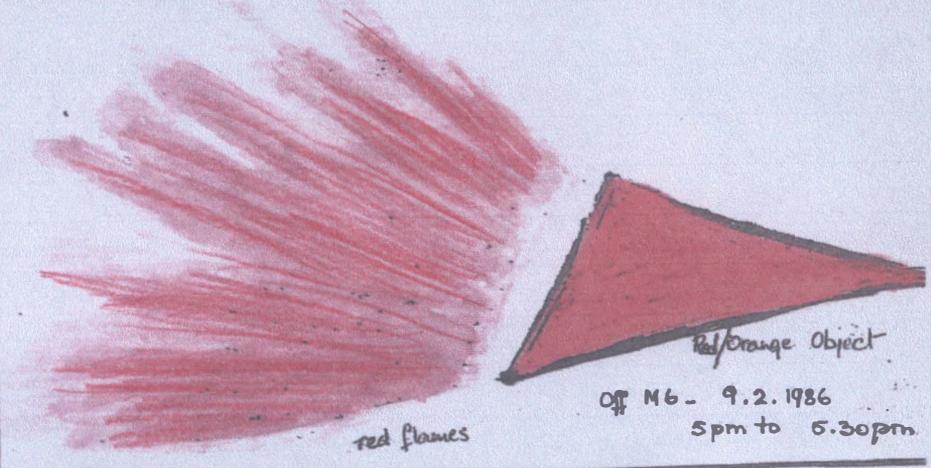

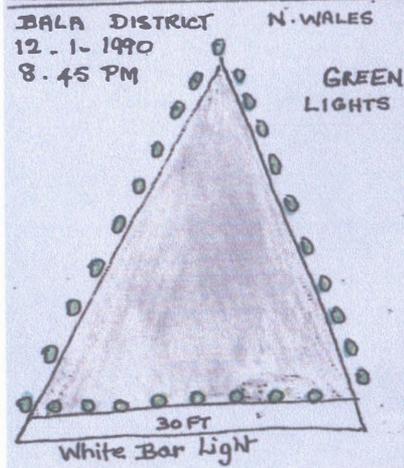

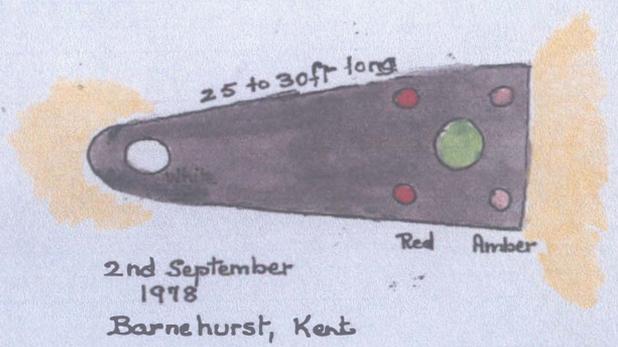

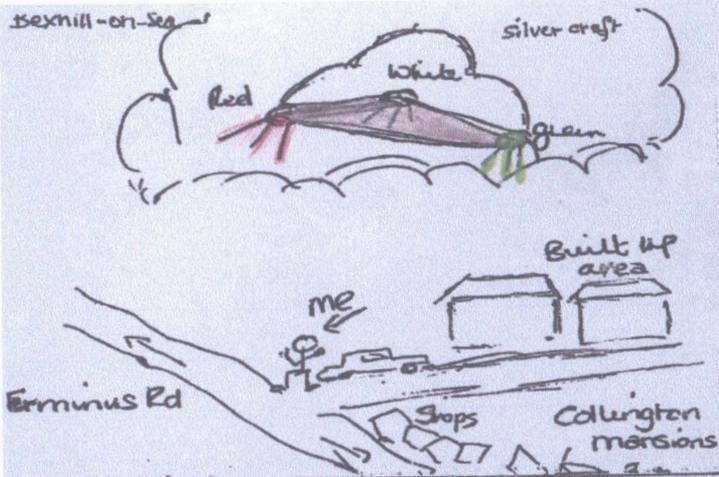

5th July 1996 7.30 p.m above Eglwysbach in the Conwy valley, Gwynedd Mr. Aled Hughes, from the Isle of Anglesey, a painter and decorator. He was visiting his in-laws, when he saw a grey triangle above Eglwysbach, their village. It had a big circle in it and a smaller one lower down. He phoned me straight away as the people in the Village knew of me and told him to.

Between the 18th and 20th August 1999, Steven B. ...a T. V. Video Producer was packing up for the night at his Studio, his photographer was with him, they had been working late to about 11 p.m. As they bolted the door and stood by the front step, it was a dry, clear starry night. Then they thought lightening was going around the mountains. They are on a mountain and the whole of the Conway valley is a panoramic view below Steven's property, a truly beautiful spot. Walking to his car they saw a huge flash above the Studio

building, then bright light flooded down on them., then it moved and flashed again, 3 times. Then they saw a light half the size of the Moon above them, it moved upwards and down. It was about 2,000ft above their heads, a large white ball which then went into a triangular form. It went round and round above the Studio, and fairly low, with lights revolving, it was making peculiar sounds, like humming music, before it moved off and went over the valley below. This experience has profoundly changed this man.

This is the last report I have received of a triangular shape: I have only once seen an enormous transparent triangular shape in the sky. It was at just about low cloud level. I enclose a drawing I did of it. I worked in Oxford Circus in the summer of 1972, and was walking down Regent Street after work, about 5.10 pm. It must have been at least 200 ft at the base, I could see the clouds scudding behind it. It looked like solid Perspex, nothing in it. I did stop passers by and they all stopped to look. It was a bright sunny day, with only a few clouds here and there. As I went down Regent Street, I kept looking back until I got to Piccadilly Circus. It never moved. I was walking on to Charing Cross and lost sight of it. Was it a craft? Possibly not as I did not see it fly. Was it a very rare form of natural phenomena? I have no idea. I have seen UFOS over 55 occasions, mostly in broad daylight and all well defined shapes. Some so weird I have never seen them mentioned anywhere else; and I have to say a lot more interesting than this. And I am convinced those were Alien Space craft, with few exceptions I saw all these with other people. Relatives, friends, neighbours and strangers. To be honest as a Researcher, FT's only interest me when they are really close encounters of them, as some of these have been, then no one can possibly say they are a Stealth bomber!

Margaret Fry Co-founder of the WFIU (1993) & Founder Member of Contact International UK, Oxford (1967)

Th. L. Joy November 2005.

## AN 'FT' SIGHTING IN 1973

A report from Andrew Badham (PRA)

Here are the details of my letter to Rhoose (Cardiff) Airport sent early March 1973 providing details of two triangular UFO sightings over Newbridge, South Wales, 12th and 22nd February 1973

*(Copied from Andrews letter to the Ministry of Defence)*

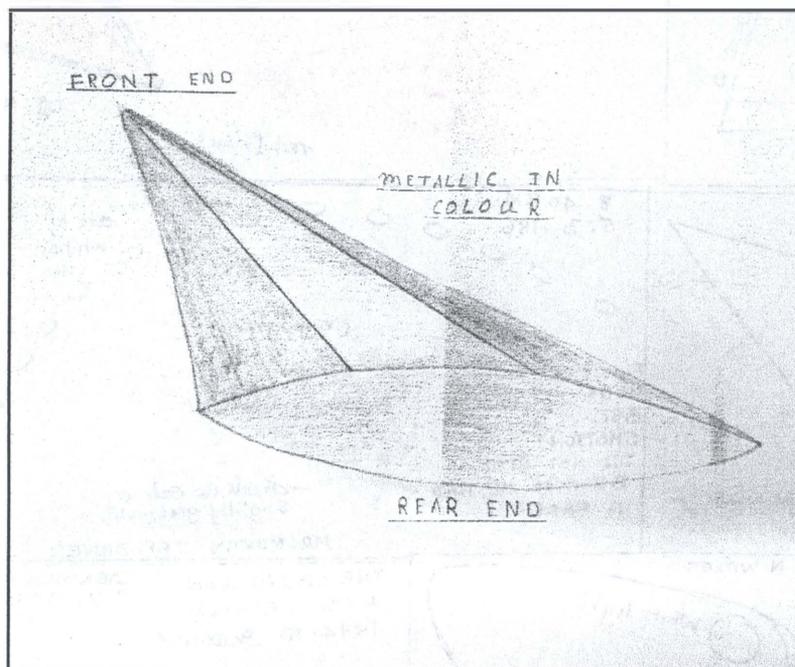

On February 12th (1973) at 1.15pm, some friends of mine and myself saw a peculiarly shaped object flying in a Northerly direction over Newbridge (Monmouth).

It was a large triangular shaped object with an elliptical rear end (see sketch). It was metallic in colour but was giving off no audible sound.

At first we thought it was a Vulcan (Delta Jet Bomber), but as we watched it fly overhead we could see it was the wrong size to be one.

Once again ten days later, we saw the UFO, if I may call it that, again at 12.45pm, Thursday 22nd of February (1973). We saw it travelling in a Southerly direction and we saw the UFO pass underneath a large four engined jet airliner which was travelling Westwards on flight path 'Green 1'.

The object passed under the jet and appeared to be about the size of the tail section. So it could not have been a Vulcan. Also, it could not have been a weather balloon, as on the two occasions, it was travelling against the wind. *(End of letter to M.O.D.)*

Andrew Comments:

"Prior to me sending my report to Cardiff Airport I had originally asked them for information on an 'unknown aircraft' that I had seen on the 14th and 22nd February 1973, and they had replied, providing a list of overflights which were definitely not the UFO."

"The 'FT' itself was silver metallic and reflected the sunshine. It was slow moving, no sound that we could hear, below the Civil jet traffic on Airway Green 1 (as it was), so below 30,000ft, had no contrail. The object seen on both days was definitely the same thing."

"I was just approaching my 15th birthday at the time, I was fanatical about aircraft (still am), was a member of the Air Training Corps aircraft recognition team and this object was not any aircraft I had seen at the time or since. It was a very beautiful craft, no obvious engines, no tail plane, just a pure aerodynamic shape."

UNIDENTIFIED FLYING OBJECTS

You may be interested in the attached letter received here today. In view of the date of the incident and of the letter itself normal reporting procedure has not been adopted. I have had no reports of anything unusual seen on our Radar.

In his first paragraph Mr Radham refers to information I had given him about aircraft in response to an earlier letter of his in which he had not mentioned UFOs.

G JONES  
CAA Chief Officer

see E 86

Andrew Comments:

"Item 86 (over page) is a standard letter with just the first paragraph changed for personal use. I saw many similar letters from the MOD to individuals (at the National Archives) with the same wording. I note with interest para 2 that says due to the lapse of time (3 weeks from the first sighting to CAA being told.) The Cardiff note also says they did check their radar recordings—so they did investigate!"

"I am also intrigued by the wording of the CAA letter in their first para - maybe I'm reading more into this than I should."

OVNI Editor Comments:

The release of Government files under the 'Freedom of Information Act' has been most welcome and several researchers have been pouring over past records to discover what they can about early UFO reports.

While no doubt there is a wealth of retrospective information available, I feel that in many instances civilian UFO groups similar to ourselves, probably have as much information on UFO activity as the MOD, if not more!

It is not surprising that the MOD's reply to UFO reports received from the public takes the format of a standard letter with a standard analysis of the reports. One could hardly expect them to claim to have identified a craft from outside of our Solar System or from another dimension. Information on the reclamation of crashed UFO craft is hardly likely to be made available to the public...but we know it is there!

In spite of everything, the 'Military' will only let you know as much as they want you to know!

AF/7464/72/S45(Air)

14 March 1973

Dear Mr Badham

I am writing to thank you for your letter (undated) which was received by the National Air Traffic Services at Glamorgan (Rhoose) Airport on 7 March 1973. Your letter has been passed to this branch of the Ministry of Defence because we deal with reports of unidentified flying objects observed within the United Kingdom airspace, and you mention in your letter that you witnessed a UFO over Newbridge at 1.15 pm on 12 February and again ten days later.

I am afraid that after this lapse of time any investigation into these particular incidents would hardly be worthwhile. However, perhaps I may take this opportunity of explaining the Ministry's attitude in general towards reports of unidentified flying objects.

The Ministry of Defence investigates reports of unidentified flying objects because of their possible air defence implications. Reports are received from various sources, eg, members of the public, the police, Service units, etc.

Unidentified flying objects reports are examined in the Ministry of Defence by experienced staff. They do this with open minds. They have access to all information available to the Ministry of Defence. They call on the full scientific and professional resources of the Ministry of Defence and may call in expert advice as necessary from other Government and non-Government bodies.

The great majority of UFO reports turn out to have simple explanations and we have found no evidence that they represent an air defence threat to the United Kingdom. I think you may be interested to read the enclosed analysis of the UFO reports we have received since 1959. You will see that the incidents which give rise to UFO reports are varied. The most common single source is aircraft, especially aircraft seen from an unusual angle. Satellites and "space junk" reports come second. Balloons and various meteorological and natural phenomena account for a substantial number of reports and some reports originate from unusual sighting of celestial objects. With regard to the last category, the planet Venus and the star Sirius predominate. Finally there is a range of miscellaneous sightings, covering a wide variety of events, including hoaxes.

There remains a relatively small number of reports which, on the information given, we are unable definitely to explain. However there is nothing about them to suggest that they originate in a way different in kind from the reports which are explained.

Yours faithfully

H E MACKAY

14/3/1973

End of report. \*(Andrew Badham is a Senior Executive at one of the UK's major airports, a specialist in airport safety and has also spent a number of years as an Air Traffic Controller.)

## The Smell of Moondust 01.30.2006

Science@NASA's Apollo Chronicles.

**January 30, 2006:** Moondust. "I wish I could send you some," says Apollo 17 astronaut Gene Cernan. Just a thimbleful scooped fresh off the lunar surface. "It's amazing stuff." Feel it—it's soft like snow, yet strangely abrasive. Taste it—"not half bad," according to Apollo 16 astronaut John Young. Sniff it—"it smells like spent gunpowder," says Cernan.

How do you *sniff* moondust? Every Apollo astronaut did it. They couldn't touch their noses to the lunar surface. But, after every moonwalk (or "EVA"), they would tramp the stuff back inside the lander. Moondust was incredibly clingy, sticking to boots, gloves and other exposed surfaces. No matter how hard they tried to brush their suits before re-entering the cabin, some dust (and sometimes a lot of dust) made its way inside. Once their helmets and gloves were off, the astronauts could feel, smell and even taste the moon.

At the end of a long day on the moon, Apollo 17 astronaut Gene Cernan rests inside the lunar module Challenger. Note the smudges of dust on his longjohns and forehead. Photo credit: Jack Schmitt.

The experience gave Apollo 17 astronaut Jack Schmitt history's first recorded case of extraterrestrial hay fever. "It's come on pretty fast," he radioed Houston with a congested voice. Years later he recalls, "When I took my helmet off after the first EVA, I had a significant reaction to the dust. My turbinates (cartilage plates in the walls of the nasal chambers) became swollen."

Hours later, the sensation faded. "It was there again after the second and third EVAs, but at much lower levels. I think I was developing some immunity to it."

Other astronauts didn't get the hay fever. Or, at least, "they didn't admit it," laughs Schmitt. "Pilots think if they confess their symptoms, they'll be grounded." Unlike the other astronauts, Schmitt didn't have a test pilot background. He was a geologist and readily admitted to sniffles. Schmitt says he has sensitive turbinates: "The petrochemicals in Houston used to drive me crazy, and I have to watch out for cigarette smoke." That's why, he believes, other astronauts reacted much less than he did. But they did react: "It is really a strong smell," radioed Apollo 16 pilot Charlie Duke. "It has that taste -- to me, [of] gunpowder -- and the smell of gunpowder, too." On the next mission, Apollo 17, Gene Cernan remarked, "smells like someone just fired a carbine in here."

Aren't spacesuits supposed to be white? This one, worn by Apollo 17 Astronaut Jack Schmitt is covered in moondust

## US serial number gives clue to mystery of the alien in the attic

Patrick Barkham Monday February 6, 2006 Guardian Newspaper

When Barney Broom began renovating his cottage he did not expect to be confronted by a pair of black eyes staring from a cloudy jar.

But the mysterious discovery of an alien in his attic has spooked the 54-year-old screenwriter and bewildered extraterrestrial experts, who yesterday suggested the US military could be involved.

The delicate 30cm (12 inch) figure of a baby alien is stored in a pungent liquid and has a US serial number painted on its four-toed foot.

Possibly sculpted from a clay-like substance and painted grey, the model closely resembles the aliens depicted in a hoax film of an autopsy of the infamous "Roswell incident".

Curiously, the alien was discovered stored in an old toffee jar wrapped in a copy of the **Daily Mirror** dating from **October 1947**. In July of that year, officials at the American air base of Roswell reported and then denied finding the remains of a flying saucer. The Roswell incident sparked a popular fascination with UFOs and led the US air force to collect data on sightings.

One theory is that the alien was left in the loft by a US serviceman working at a nearby US air base. Mr Broom's two-bedroom cottage at Gunthorpe, north Norfolk, which he bought eight months ago, is 45 miles from two large US air bases at RAF Lakenheath and RAF Mildenhall. Many US servicemen and women live and work in the region.

Mr Broom told the Guardian he was "a bit spooked" by the discovery but said he was not yet living in fear of being beamed up by aliens.

"It was stuffed in the corner of the loft with other old newspapers. Before me, an old spinster lived in the house. I don't think anybody had been up there for years.

I haven't got three heads and I'm not the sort of eccentric lunatic to think it's an alien but it's a funny thing to find in your loft."

Mr Broom reported his finding to the Sci Fi Channel, who called in Professor Adam Roberts, an expert in science fiction literature, to examine the creature.

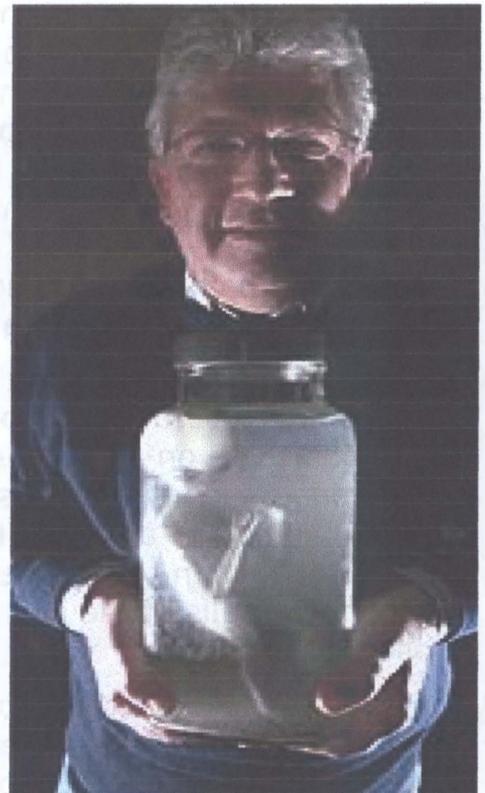

"The easy thing to do is dismiss it all and say it's a hoax. It may be or may not be," said Prof Roberts. "The fact that it was found near a US air base suggests there may be a military component to it."

A spokeswoman for the US air force said it had never made such models of an alien, the figure was not government property and the serial number could mean it had been catalogued by a museum.

"It's a hoax," the spokeswoman said.

Prof Roberts admitted it could be a film prop dating from the 1960s, but said he was not surprised at US denials: "That is the US air force line. They deny these alien encounters. It is quite possible they concoct stories to cover up for more nefarious activities."

The Sci Fi Channel will this week broadcast live footage of the alien on its website. After further tests, Mr Broom will put it on his mantelpiece.

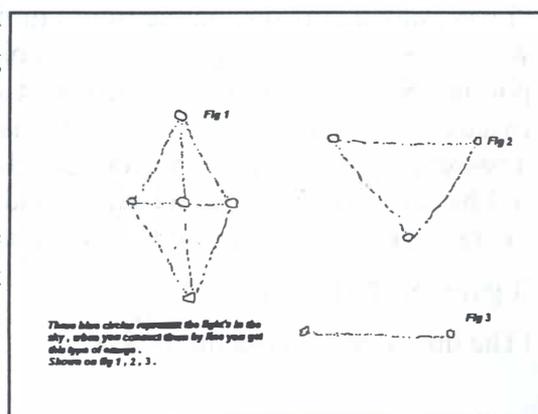

## A POLISH WITNESSES SIGHTING IN THE USA.

Sent to the PRA from 'Daniel' in Poland by e-mail.

Thank you for responding to my e-mail , I will tell you how I have experienced seeing a UFO. I used to live in California but now I live in Poland. When I lived in the USA, one night in California me and my wife went to " Foot-Hill Park" , near San Jose, California. That night we were in the park and we were inside the car where we had a good view from the hill.

We sat chatting, the night was full of stars, when suddenly we saw a UFO hovering over the top of the forest. Then we saw a laser comes out from the ship, directed to the ground, like it was getting some natural resources from our earth or soil. I said to my wife, "Oh my God, I can't believe what I am seeing." We began to panic in the car and we decided to turn the car and escape from the scene, as we were scared that something might happen. I looked in side mirrors if something was following us, then we went home. We got home safely, but we could not believe what we had seen. From that they I began to watch the sky to see anything suspicious , or if anything was following me or my wife and I began to study the sky very closely.

Ever since, I have watched the sky very closely and I have discovered that from that night in the park, they are following me wherever I move. I can identify shapes in the sky and lights that look like the stars but they are not stars and when you connect them, the shape looks like a triangle (see drawing). I can prove that where I live, I see it every night .

When I got divorced I came back to my country Poland. When I came here I started a new life, a new beginning and new work. I got married and have a daughter. When I came here to my country , I kept looking in the sky and I can tell you today that extraterrestrial beings do exist and they live in our Universe .

When I look in the sky I can see the shape of odd lights that look like stars. I have bought binoculars so that when I look in the sky with my binoculars at the light, I see that the light moves. It does it stay in one place like a regular star in the sky. I am very positive that it's a UFO hiding and invisible in the sky.

They (*the extraterrestrials*) are very smart and must have complicated technology that we cannot understand. Many people look and observe the sky and don't see what is happening in our skies .We are not alone, they are here .

I can prove that, I have a digital camera and I will take a picture and I will send it to you. It's best to see the sky when the sky is clear in the night and you can see everything in every detail. Right now here in Poland it is winter, the night skies are mostly full with of clouds and it's hard to see anything. I am waiting to for a clear night sky, so I can take pictures and send them to you\*. You have made a proposition to write my story in the OVNI magazine, if you would write my story, then the world would hear about it, especially the Polish government, then I would have problems. Also with Media where ever I would go it would follow me. (*Daniel would not reveal his full name and address*). Believe me, in the world there are top secrets that only some President's and Governments know about and they have a top secret policy, to keep it away from the public.

Here in Poland there are UFO research groups but they don't have the technology to study the subject.

\* *Daniel did send us several photographs, but the only thing visible was a black sky. His camera was unable to pick up a clear image. Ed.*

## FILEY, YORKSHIRE INCIDENT: 24th January 06.

A Report By Russell Kellett

I had been putting out the bins outside in my court yard; I turned around to making my way back inside, when I notice a silver object with a yellow tint, this must have been back end of a craft with an odd yellowish vapor trail. The object had now disappeared behind my house. I carried on my way back inside meaning to come back out to have a closer look at the object, but one thing led to another and by the time I remembered the object had long gone. I was sat watching TV when there was a knock at the door I opened the door there was a man with a dog.

The chap told me he was looking for Russ Kellett; I told him that was Russ. He told me that he had told a friend that he had just seen a UFO, and he could not believe it. His friend told him he should talk to me, as I was a UFO investigator who lived in Filey. I knew his friend so I told him that I would take down the details of his sighting, this is what he told me.

“I was walking my dog on the front I turned around that’s when I saw the object it was like a cylinder with a round end or a cigar even. The object itself was florescent Yellow It was very bright; it left a vapor trail horizontal behind it. The object its self was moving horizontal and the vapor trail was about twice as long as the object .it was a bit hard to say just how big the object was, but I think it was as big as a passenger plane. The object was just gliding, there was know sound. There seemed to be a flame behind it. I have been on all types of aircraft and what I saw was not an airplane. I was so surprised my mind was racing, I thought it’s a plane on fire. I put my spectacles on then I could see it was not a plane.

It gave me the heebie-jeebies!”

(The investigation continues). R.K.

## UFO OVER NOTTINGHAM?

This excellent night time photograph was sent in to us by UFO researcher Jim Rayner of Nottingham.

No, it is not a UFO, but a police helicopter shining its searchlight on an incident in the city.

A good example of what could be mis-identified as a UFO at a distance.

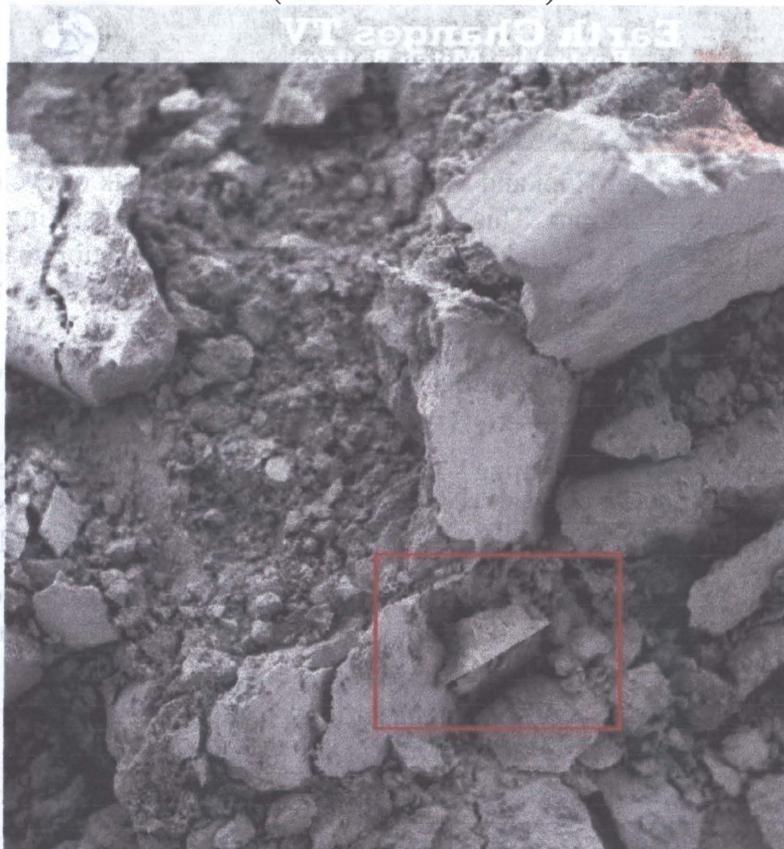

## Mars Artificial Substances (From the Filers Files)

Photos courtesy of NASA/JPL.

These Files assume that extraterrestrial intelligent life not only exists, but my hypothesis is that of the over one hundred UFOs reported each week, many represent alien craft. I assume that there is life in the universe and each week we attempt to show evidence of life in space using NASA/JPL data.

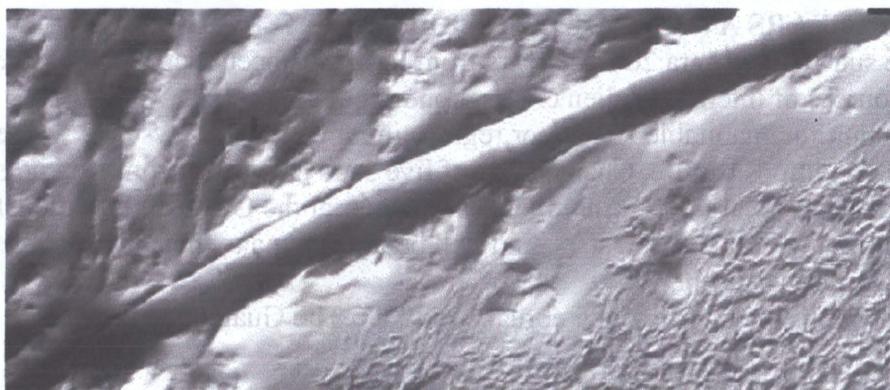

There is evidence that the history of the human race has been modified by the intervention of extraterrestrials. The ancient wonders found on Earth seem unlikely to be constructed by ancient man without help and closely match those found on Mars. It appears that life has developed on other planets.

Harold Carver writes, "I found what appears to be artificial substances on Mars taken by the Rovers. I have enclosed them inside the red boxes. One looks like a wafer or chip, and the other looks like a piece of pottery."

### Mars – Giant Tube System Infers Life

MUFON Director John Schuessler Director sent this photo that appears to show a tube system on Mars.

Mars Investigator Joseph P. Skipper who has been studying the tubes writes, "Make no mistake about it, the one thing that is pretty clear is that these are the real giant tube systems on Mars, at least the ones we can see on the Martian surface, and they represent the activity of life of some kind on Mars." Many of the tubes are covered with massive amounts of fill forming great interconnected natural appearing ridge systems. In other words, not so much buried as laid out on the surface and covered.

A Soviet scientist who defected to the West claims that photographs taken by an orbiting satellite clearly show the ruined temples of a civilization—on the planet Mars!

The 58-year-old scientist was a high-echelon member of an elite team that has worked on Vostok I and carried Yuri A. Gagarin the first man in space. He reports in 1982, a Soviet satellite reached Mars and beamed back photographs of a large city. (*Ref. Filers Files*).

## TALE ENDERS

Your # 1 Source for  
**EARTH SCIENCE NEWS**  
 Breaking News | World News | Biology News

**(Extract)** Our Hopi and Mayan elders “always” speak of cycles. In fact, this is why they are so accurate in their predictions. This is also why what we see transpiring today was always to be. Why? Because it always “was”. **Global warming is a myth**, a fabrication made up by special interest groups who need funding. In order to get funding you need to have a cause. So they made one up, beginning in 1988 when James Hansen made up the name “global warming”.

So is there really a warming of the planet and then a cooling? Well of course. **There always has been and will be to come.**

Are the oceans warming? Yes, they always have. Are the oceans cooling? Yes, they always have. Will our climate change? Yes, it always has. Will continent costal areas become submerged? Yes, they always have. Will Islands or land become visible? Yes, they always have.

The Mayan calendar is in part a mathematical summary. It is reliable, predicable, and accurate. Why? Because it is based on known cycles brought forth over the centuries.

#### **GREENLAND ICE LOSS DOUBLES IN PAST DECADE, NASA SAYS**

The loss of ice from Greenland doubled between 1996 and 2005, as its glaciers flowed faster into the ocean in response to a generally warmer climate, according to a NASA/University of Kansas study being published Friday.

**WELCOME TO ‘UFO DATA’**, a new UFO magazine (A5) produced by Russel Callaghan. (It also includes a free UFO documentary CD). Not as ‘glossy’ as the original ‘UFO Magazine’ but well worth a look. Issue 2 goes on sale March 2nd. At £2.95 from UFO DATA, PO BOX 280, LEEDS, LS26 1AN.

**NIGHT TIME SURVEILLANCE** over Derby is now operating again after a few initial setbacks. A new night vision/infra-red camera is now facing skywards on a night time vigil and recording all unusual events. Thanks to the efforts of PRA member Paul Usher.

#### **STAR 26 LIGHT YEARS AWAY COULD HARBOUR ALIEN LIFE**

A yellow-orange sun called Chara 26 light years from Earth has been identified by scientists as one of the most likely sources of intelligent alien civilisation in the universe.

After a two year hunt for “habitable zones”, or regions in far away solar systems where planets would enjoy the perfect conditions for life, Chara is one of five stars named as promising hotspots for life.

The list was produced by Margaret Turnbull, an astronomer at the Carnegie Institute of Washington, after trawling information on 120,000 stars, and will be used to make the hunt for signs of extraterrestrial life more efficient.

#### **NEXT PRA MEETING**

All meetings through 2006 will take place at the Royal British Legion, Allenton, Derby, commencing 8pm. generally on the last Tuesday of the month. **Except in October** when the meeting will be on **Tues. 24th**, (Halloween is on the 31st). & **November’s** will be on **Tues. 21st**. (No meeting in December.)

**March 28th** : Video presentation: Peter Jennings Reporting (USA) ‘UFO’s-Seeing Is Believing’

**Plus free UFO book raffle,**

Non-members welcome (£1 on the night)
