Initially I had hoped to increase the amount of articles, reports etc, in some future issues of Trans-Ufo. However, due to other commitments, I have not been able to make this issue as such. Also, due to urgent family matters my main Spanish translator has understandably not been able to spare time for translating, I hope to include more Spanish material in the next issue.

I am grateful to Mr. Jean Bastide for sending in material and many thanks to Mr. R.K. Lesniakiewicz for translating the Polish and sending the Hungarian information. I have quite a lot of Polish info which needs translating - if anyone can help!.

(Readers will be familiar at least with the San Carlos De Barliche case)

I am including a copy of an article from 'Peta' magazine and I hope whatever your involvement in ufology, you will act on the information by putting pen to paper. Some of the print may not photocopy very well but enough to give the 'Cruel' picture will.

EF.

All material from Ufo-Aktuell & Ufo-Nyt Translated by: Eileen Fletcher.

AFU Newsletter translations: Anders Liljegren.

Polish material translations: R.K. Lesniakiewicz.

Hungarian information translations: Gabor Tarcali.

Argentina: Copyright: AFP, Agence de Presse.

Opinions expressed in Trans-Ufo are not necessarily those of the editor or editors of the individual publications concerned.

(No material to be used without prior permission: contact editorial address)

2 issues per year. Price per single issue (including postage): UK.£3.00.

Europe: £3.50. Other countries: £4.50. For 2 issues: double single price.

Cheques payable to Eileen Fletcher.

Non-profit making publication.

MYSTERY AT HUNNEBERG

South of Vänern between Vänersborg and Trollhättan, lay the plateaus HALLE and HUNNEBERG. The twin mountains are a good 150 metres high, they are separated by a 500 metre wide split - fracture and their unmistakable silhouettes are seen for miles around over the surrounding flat land. The mountains are famous not least for their great numbers of elks which yearly draw thousands of visitors and tourists.

1988 also placed the mountains into the focus of ufological circles. The 3rd August this year (1988) found an unexplained dead and mutilated elk in Långedalen at - Hunneberg. There began a flow of stories about mysterious flying objects over the mountains with ufo hysteria quickly starting up.

The landscape around Långedalen in the middle of Hunneberg is of great natural beauty and it was here that a walker found a dead young male elk in August of 1988. The

elk lay metres from the road (track) out onto a little mossy swamp. All four legs were for some unfathomable reason broken at the hip-joint and lay straight out from the body with no visible injury on the rest of the body.

Both Halle and Hunneberg are Crown parks and all hunting is forbidden except for the Royal hunt (What an honour for wildlife to be hunted and killed by 'Royals'- not cruel and bloodthirsty when they do it!..EF.) each autumn. Uno Gunnarsson (hunt master) heard about the dead elk and went out to investigate, thinking it would be the work of poachers. But as soon as he caught sight of the body he realised the situation was mysterious.

The dead elk lay in such a way that it looked as if it had fallen from a height. It was not injured: no marks suggesting it had been run-over were found. Disease could definitely be ruled out. The whole thing was a complete mystery and Gunnarsson said later that he had never seen anything like it in his many years of daily visits to the forest and grounds.

IDENTICAL INJURIES

The police in Vanersborg were called in and policeman Lennart Karlsson followed the case up to try and find some leads. The skin around the broken legs was scarred(?) and injuries showed to be identical on all four hip-joints.

"It really seemed as if the elk had been dropped from the air" said Uno Gunnarsson, when interviewed by the media. In his police report, Lennart Karlsson wrote: "The circumstances surrounding the elk's death are strange. It lay on its stomach with all 4 legs stretched out. The animal had not been shot and was not the victim of a traffic accident. The only 'ordinary' thought or explanation left, was that it had died as the result of a storm".

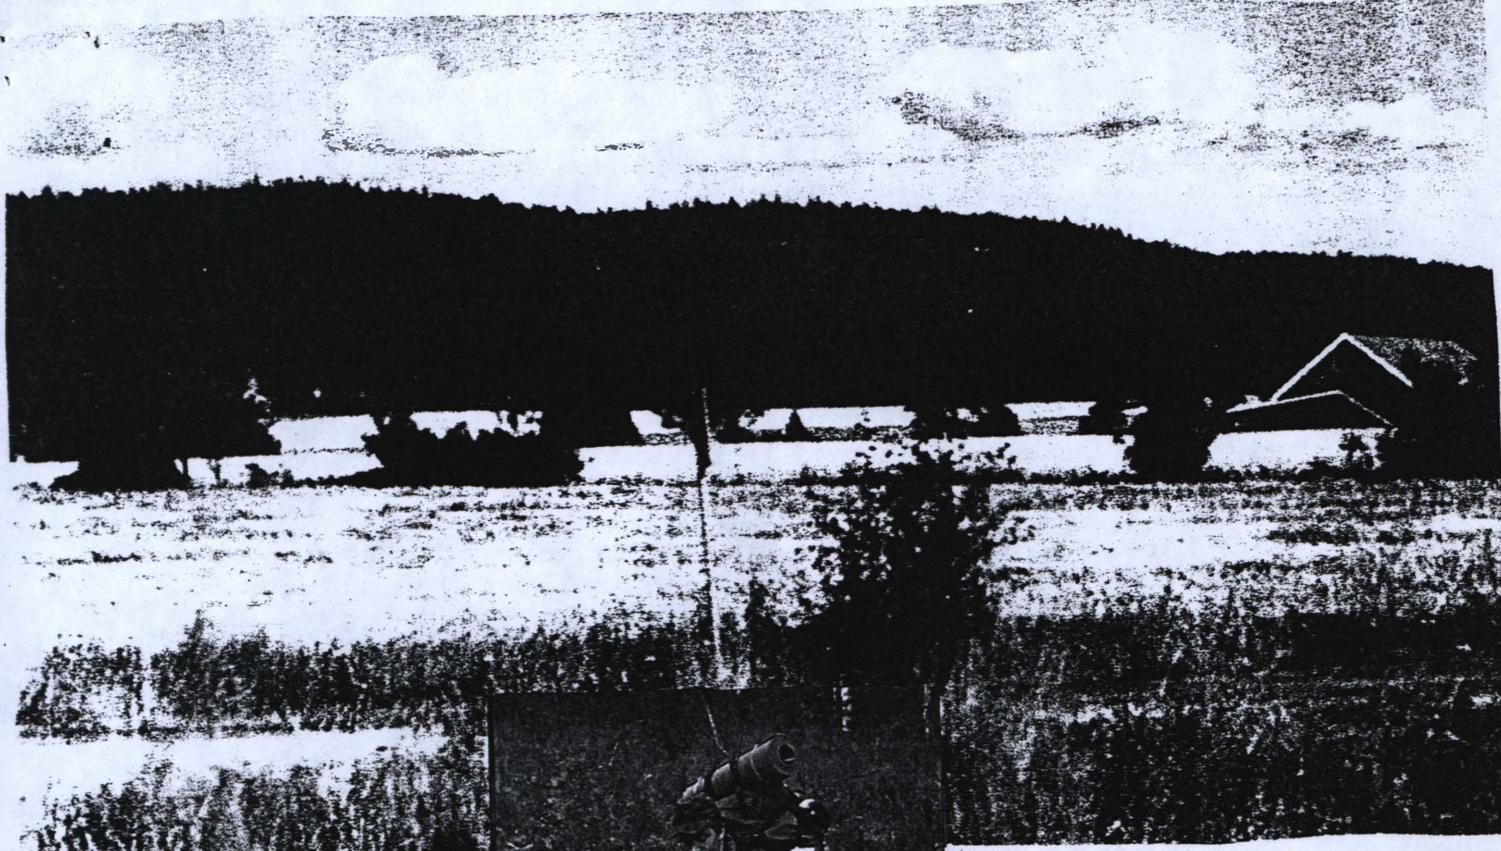

When no reasonable explanation was found, the bones were sent to the veterinary institute of medicine in Uppsala, where the remains of the elk were analysed by Margaret Steen, a scientist who specialises in injuries/death cases amongst elks. Sometimes, x-rays show metal fragments from bullets in the bone but no such trace was found here. A traffic accident could also be ruled out. The road through Langdalen is shut off to traffic and the nearest used road is a good 3kl from where the elk was found. The animal's injuries were such that it could not have walked with them.

Lightening injury was the only natural explanation left but both Steen and the rest of the experts at the institute were unanimous in their verdict, that the injuries were not caused by lightning. According to SMHI there had been no bad weather in the area at that time. One could however, hold fast to the fact that the injuries were not inflicted after the elk's death as haemorrhaging was clearly found in the fractures. In the ground around the elk, no traces were found to explain the mystery.

UNLIKELY INCIDENT

Margaret Steen could not understand what had happened and called the incident "Wholly Improbable". According to Steen, the elk must have been in the place it was found when the four hip-joints suddenly broke in the same place, due to some outside, blunt force. Another expert was consulted but could not give any plausible explanation and the veterinary institute were forced to leave the case unsolved.

The local paper 'ELA' (Elfborgs Lans Allehanda) devoted great space to the mystery and were inundated by readers ringing with different explanations. A theory soon taken up was that the elk had been dropped from a flying saucer!.

May 1989. Only the bones remain. Magnus Andersson visited the place along with the article's author who took the picture.

LIGHTED BURDOCK (TEASEL)

A woman in Vargon, the small community at the foot of the mountain, said that the week before the elk was found, she observed a strange lighted object over Halleberg. The observation was made in the small hours when the woman was awakened by the dogs' unsettled behaviour. She got up and looked out the window. At a low height above the mountain, hung a large lighted object, it was like a gigantic burdock and had spikes around it. The woman dare not relate what she'd seen for fear the neighbours would 'talk'. She wishes to remain anonymous but did confide in her friend Inger Waern in Mariestad, as she knew she was interested in ufos.

Inger Waern who was well known to members of Ufo-watch, in turn contacted Paul Hellberg in Nyhammar, who travelled to Vanersborg to look at the history of the incident. According to Hellberg, the only likely explanation was that the elk had been plucked up by a flying saucer then dumped on the place where it was found. The effect presumably would be of 'floating' and it would be radioactive (? EF).

Uno Gunnarsson and some journalists from ELA went up the mountain to test Hellberg's ufo theory, equipped with amongst other things, a geigercounter. It showed there was considerably higher reading where the elk was found than in the surrounding terrain. Two (!) instead of the normal reading of 5-10 x-rays. A little soil was gathered and laid in a drop of water. It floated and the morning edition of the newspaper was saved.

Overnight, observation reports began to stream in from Vanersborg and Trollhattan. where mysterious light glares were sighted over the mountain, flying fireballs followed vehicles along route 44 and lighted spheres were seen lifting from Vanern and then flying full speed towards Dalslandskusten (coast). There were observations the whole of late summer and autumn and then a great number of lighted objects in different colours over areas south of Vanern, were seen.

Ufo-airspace watch also began evening searches in Hunneberg, amongst other things they flicked torches on and off towards the sky, hoping the saucers would blink back, this was of great delight to the massmedia.

PLANE RECEIVED DISTURBANCE

Ufo observations continued during the autumn months and the beginning of November saw 8 mysterious objects over Hunneberg. The 7th November, duty flight leader at Maloga - Trollhattan/Vanersborg airfield, Berthold Hellstrom, was inundated with phonecalls of observations of different light phenomena over the airfield. One was an object lit with an orange colour and was the size somewhat smaller than the moon. Hellstrom himself observed nothing remarkable but one SF-340 aircraft on its approach, communicated that the aircraft was acting strange and swayed as it neared the runway. Both the aircraft and runways' electronic equipment were later examined but no fault was found which would explain the disturbance. It was easy to establish that a great part of the ufo - phenomena was not like this during the autumn but part were thought to be difficult to explain, amongst them, the 'Burdock' over Hallesberg and some of the observations over Maloga airfield.

POSSIBLE CONNECTION

At the end of September an additional dead elk was found at Hunneberg. It did not lay in the same place with the legs straight out but did not have any visible injuries. The remains were sent to Svelab in Skara but were in such a state of decomposition that a postmortem was not done.

Nothing was found to prove that the mysterious dead elk had any direct connection with the ufo phenomenon in the area and yet we cannot completely exclude such. The vegetation around the place of the discovery withered and died in a circle of about 3 metres dia, after some months. that the grass died under the body is very remarkable. Neighter of the direct surrounding vegetation is pressed down by settling animals and birds. What is remarkable is that to this day 7 years later, nothing other than grass grows in this place. The vegetation elsewhere is of shrubs, willow and birch - metres high.

INCIDENT

Animal mutilations are now a classic ingredient within ufology and well known are the North American cases. However, it is a known fact that many mutilation cases are con-
-trued to have very little substance to them. The Swedish mutilations distance themselves somewhat from the American. For example: The often written about horse injuries with great probability were carried out by a minority group of sexual pscopaths. The Hunne-
-berg case had no simarlarity with the American reported mutilations either. There are however, one and another incidents in Sweden also difficult to explain.

In July 93, one dead and 15 injured sheep were found in Rossmala. Noteable was that all of the injured animals had identical marks high up on the neck.

In October 94, the remains of a dead ewe were found with the genitals taken out, this was outside of Ronneby and in June othis year (95), a mutilated cow was found with the udder scoured out, in Uppsala.

No clear connection is found in these cases to the ufo phenomenon but many people still mistakenly make such a connection. It is of course remarkable that nobody has ever seen or heard anything when mutilations are carried out. In some cases people are found nearby but no witnesses to any classic animal mutilation.

In spite of the popular interpretation about ufo involvement in these incidents the material is so thin that one cannot draw any concrete conclusion about them.

ALTERNATIVE EXPLANATION

The great ufo-wave over Halle and Hunneberg came after the elk was found and the newspapers wrote about the find and Paul Hellberg's theory. The last known observation which unquestionably took place before the elk was found is the "Burdock" over Halleberg. Is it possible that the woman saw a helicopter that night?. Could this be a model theory for an alternative explanation?.

The remaining facts: The only reasonable explanation for the elk's injuries, is that it slipped or was dropped from the air but for what reason and intention would this be done?. The mountain is always well visited especially in the summertime and many visitors stay overnight - both in tents and motorholmes and a helicopter would hardly operate above the area.

(Personally, I would not question as to 'would' military helicopters operate in such an area , I think they would if the 'exercise' was considered important enough. I experienced some strange helicopter or helicopter type craft activity in the 70's, carried out at night, one incident in particular really scared me at the time. Also, the MOD here for one have carried out plenty of experiments using animals involving radioactivity. As to whether the animal in question here was dropped on purpose or by accident, one can only speculate and I don't offer my comments as an explanation for this and other such incidents. The question here is could a helicopter have carried out this exercise without being observed by campers in that area, there does not appear to be any reports of such.....EF)

Could the elk have died at some other place?. It is known that devil worship sects can be found in Vanersborg. According to social cheif Lars-Goran Berg, who investigates destructive sects, there are at least two. It is also known that occult sects on two occassions have held black mass at Hunneberg. Could this explain the elk's death?. Although the elk had suffered broken legs it was not injured or mutilated in any other way. Neither was there any sign of tracks found in the area around the body. Had the death been caused by electrical power? Here is a phenomenon which is uninvestigated and which is not necessarily caused by ball lightning.

The elk stood in great probability with all 4 hooves in the water out on the moss and perhaps it was therefore an extraordinary conductor for spontaneous ball lightning. Maybe the ball lightning caused an explosion in the 'conductor' which contained much

synovial fluid and shot the legs outwards.
Against this theory, is the fact that the animal was not burnt.

The vet and investigators who examined the body said that the lightning strike was wholly unlikely but ball lightning is still one of nature's mysteries, so who knows?.

Whether the elk fell from a helicopter or a ufo or was the victim of ball lightning or satanists, is still a mystery. The ufo phenomenon in the region has ceased but there continues to be sporadic reports of flying objects over both mountain regions. The dead elk and ufo-wave of 1988 has gone down in ufological history as a classic mystery.

The place where the elk was found, as it looks today. With lack of growth other than grass, whilst around it small bushes and other growth flourish to normal height. Photo: Jorgen Bengtsson.

Ufo-Aktuellt No.3.95.

I THOUGHT MY LAST MOMENTS HAD COME

A mysterious object which swayed over a field in Dalarna and a near observation from Hakesta in 1971, are two cases which Agneta Hallden writes about here. In both cases the observers were very scared by the incidents.

Margit Bergkvist, 79, in Ovre Vanbo, last December witnessed something really remarkable outside her home.

By Agneta Hallden.

It was just before nine in the evening when Margit went into the bedroom to switch off the radiator. Through the window, she saw at a distance, a sphere of light which slowly neared above the edge of the forest. She was paralysed and could not take her eyes from the light.

Outside the grounds of Margit's house, lies a field and a little village road. When the light neared the field a couple of hundred metres from the house, it suddenly cast a dark "rope-cord" out. At the same time, a lorry was travelling on the road. Two light beams shone onto the roof(!). "The vehicle" was all over the road, it had difficulty holding it's course. The sphere which was at a low height, continued coming nearer and was almost intensive. Just at the side of it was something which Margit thought was like a large "cloth", changed to a round "cushion" surrounded by a coarse "Ironrailing" (?). On the left side were 4 dark spots with "spikes". "The cushion" was lit with a natural light colour and looked to have a rough linnen structure. It was in fact like the curtains Margit had in her kitchen window.

The "vehicle" had disappeared. Everything was so strange, the worst I have experienced in my whole life. The thick long cushion was fixed skywards. I wondered how long this would all be. At the same moment as the "cushion" disappeared, there appeared a large silver coloured area at the side.

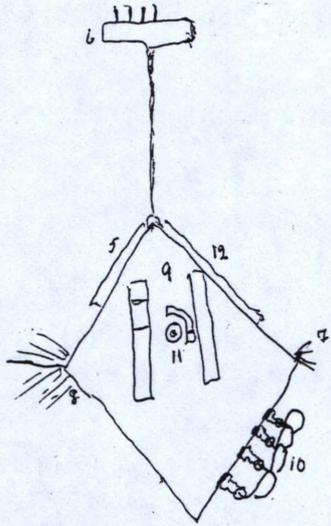

- I had never seen this colour before, said Margit. It was heavenly. I was fascinated. The surface kind of flowed and took the form of a flat diamond. From the top point was a long thin antennae with a rectangular shape at the top. From there were stacked 4 others directed upwards, stuck out. They vibrated.

LIGHT & DARK GLASS FRAGMENTS.

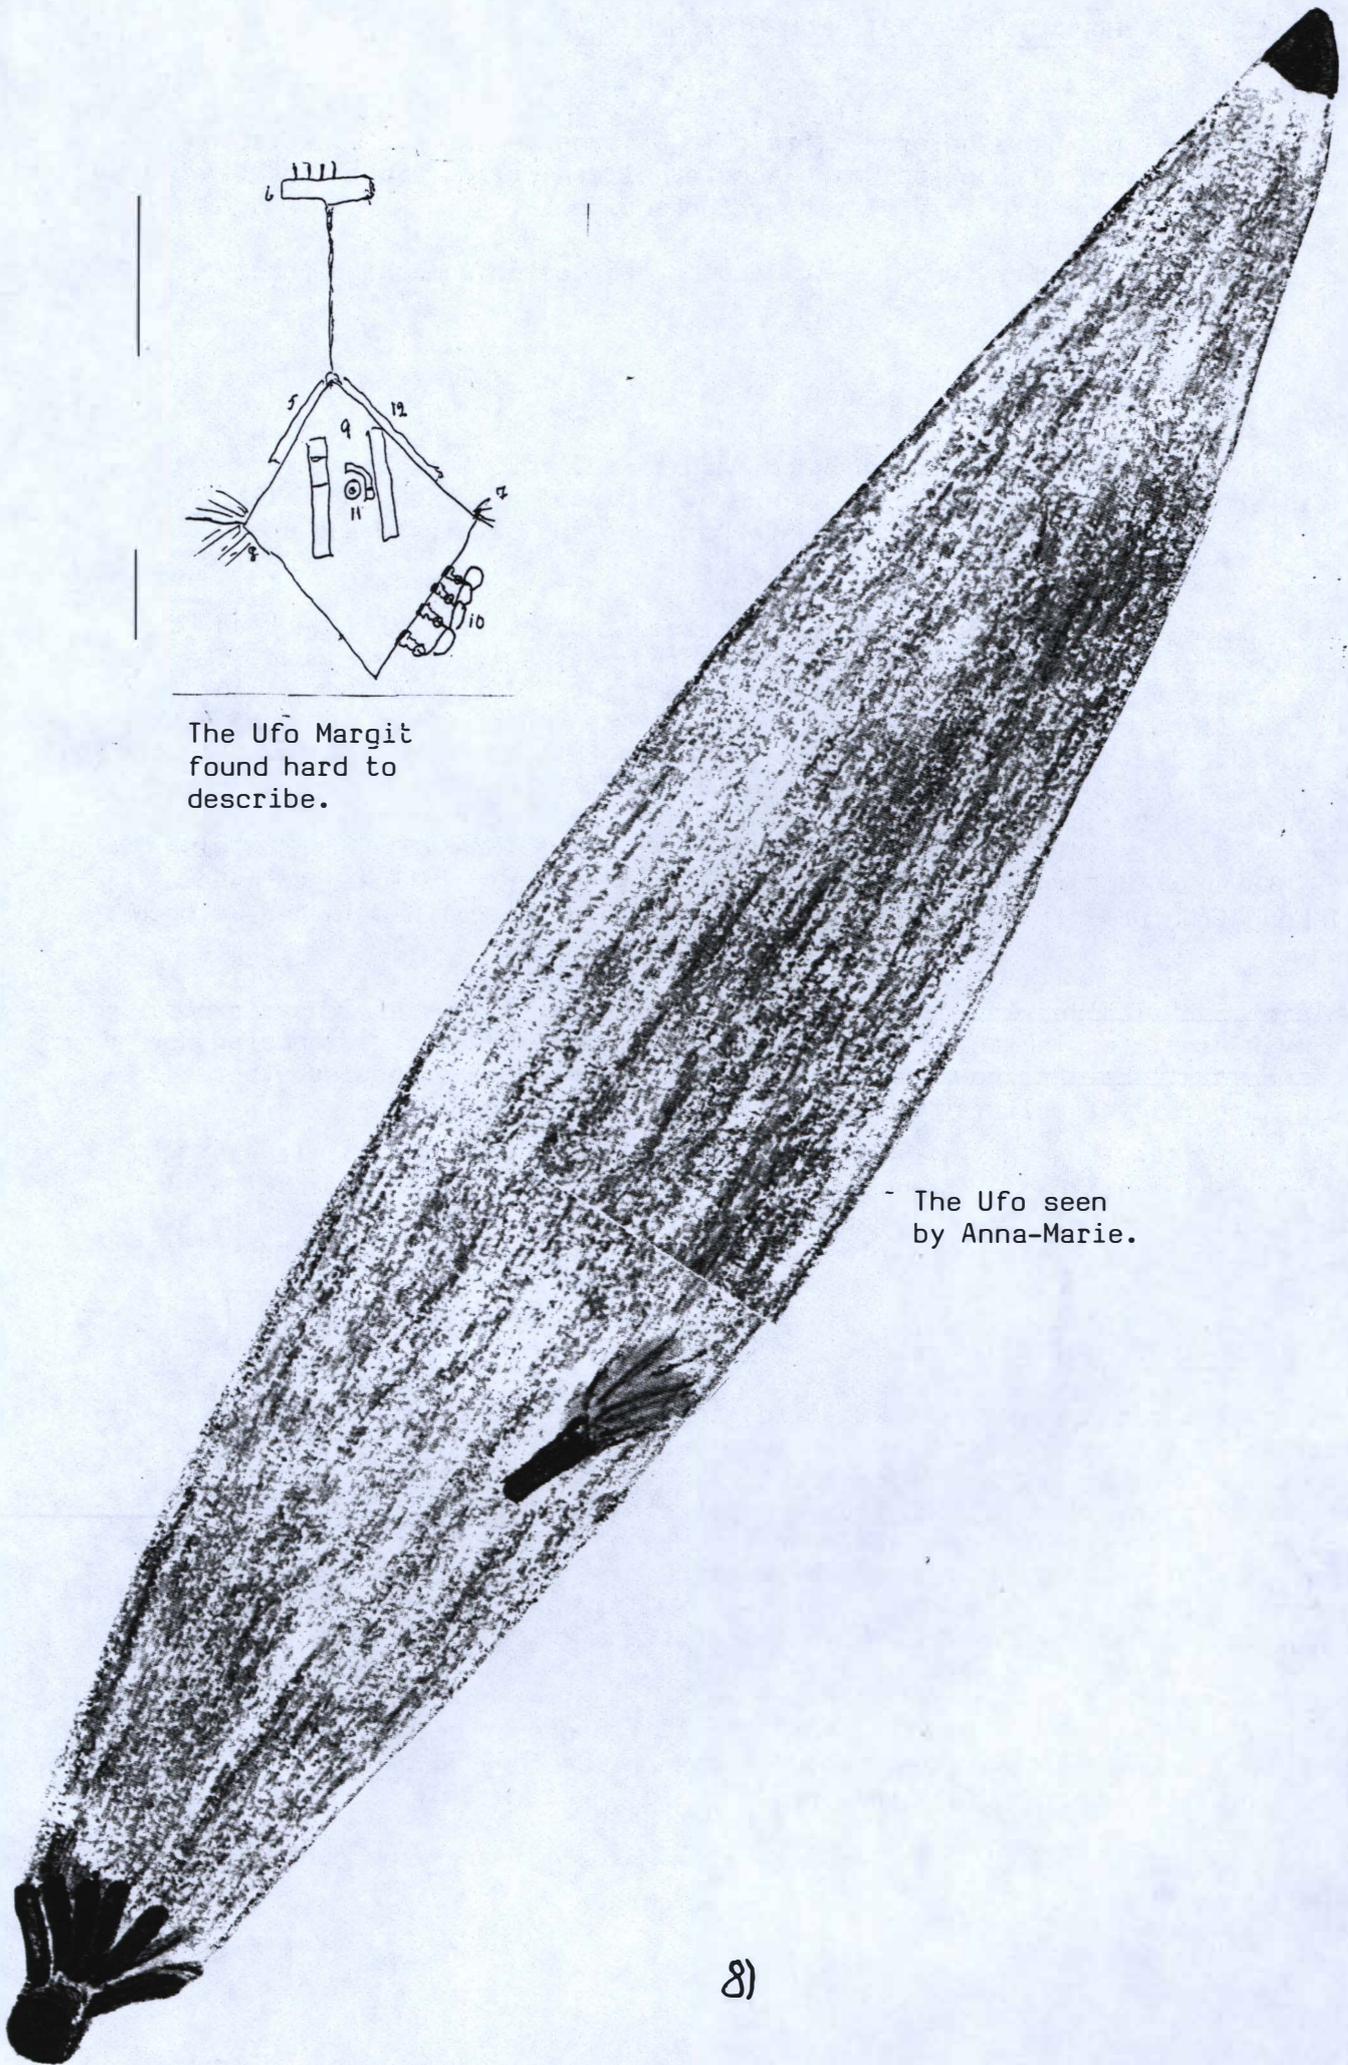

From the left and right spikes stuck out, giving out light and vibrating. In the middle of the object sat 2 very oblong vertical windows. The upper part of these windows moved. It was like a mosaic of light and dark pieces of glass. Like a Kaleidoscope. Each prism falling from one position to another before settling in one place. Between the windows was something round, perhaps an opening or an additional window. On the right underside a stack of 4 parts stuck out like "cotton-reels". On them were vibrating blue-grey "leaves". They moved as if they billowed or surged back and forth like waves on the sea.

As Margit observed them it was as if some kind of rope was on the upper part of the round window. When she looked back again at this it began to get light. She thought she could make out some kind of presence behind the window and felt they were observing, she began to feel this was (or 'it' was) weird.

- Now I'd had enough, said Margit, I drew the curtains and went to phone my son.

The Ufo Margit
found hard to
describe.

The Ufo seen
by Anna-Marie.

They appear to take place in a kind of border between reality and unreality and thereby remind us of paranormal experiences. As in a dream, the significant element can appear in the form of parallel detail in the essential connection (?). The vibrating leaves in this case perhaps being the significant element.

Are we talking of signs of science and symbolism?. In which case, signs of what, science from where?. What was it that Margit - and Sandra saw that dark December afternoon?. It is a mystery.

NEAR CONTACT IN HAKESTA

Mysteries have a tendency to live on in people's minds, as though time itself confronts them (?).

So it was for Ann-Marie Hallin now 74yrs old, who 25 years earlier experienced the following.

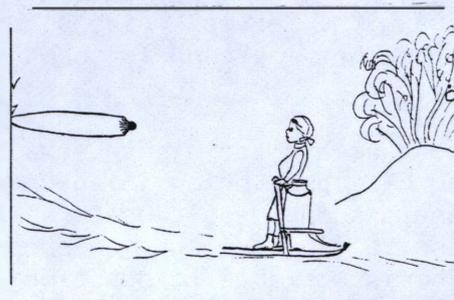

It was a cold moonlight evening, in January or February of 1971. The place was - Hakesta outside Solleftea.

The unknown object which showed itself to Ann-Marie was likened to the begining of Margit's observation, a sphere of light which slowly neared itself to a paralysed spectator.. Ann-Marie came gliding in on a snow-scooter from the barn with a milk pot on the seat. Suddenly the snow was lit-up by a red glare. A red coloured sphere around 20cm in dia, came slowly opposite her at eye-level.

When the sphere was approx 3 metres from her, it stopped dead and changed colour to yellow-green. - Then I thought my last moments had come, said Ann-Marie. I stood paralysed and could not throw myself down as I was certain I Should.

Behind the blinding light she glimpsed an object with a shiny nose, greenish, silver coloured. The part behind the nose had deep grooves, some decimetres long. After it had stood still a short time, the object highered itself approx 2 metres straight up. It stood still again for some seconds, swaying elegantly around Ann-Marie and continued between trees, house and electricity pole towards the forest. When the object was in front AM saw that it was spool-shaped and smooth without any openings, about 3 metres long and 4 decimetres high and "cigar" shaped.

A pipe short like a finger, stuck out at the side. Out of it came a yellow light and a faint hissing sound (see sketch on 2nd side).

When "The cigar" passed a rowan (tree) on the road, the illumination dimmed.

Lena, the sons's wife, answered. Their home was only a few hundred metres from Margit's. Margit related that she'd seen something strange. Lena was busy washing and had not noticed anything, she thought her mother-in-law had seen one of the power station vehicles.

Gudrun Andersson, chairman of Vasterbergslagen's Ufo-Society, quickly took up this point and checked with the power company - Telia, roadworks and SJ/tracks(rail?) asking if any vehicles had been out then. The reply was no.

Some hours earlier that same evening, Sandra Berglund, 15, (Assumed name) together with her mother, observed a strange thing about 3kl from Ovre Vanbo. They had been out on business. At 5pm they were driving back when they saw a bright light which moved slowly across the sky. It stopped above a powerline.

What they saw was an object with a triangular contour, the base towards the ground had 3 lights on it, green, white and red. The object stood and vibrated for 3-5 minutes. Then slowly disappeared away over the edge of the forest.

In the school the next day, Sandra related the incident to the class. Amongst the pupils was Anna, Margit's grand-daughter (Lena's daughter). She in time told them that her grandmother had seen the same object the previous evening. Margit & Sandra discussed it afterwards and wondered if it was the same object they'd seen.

In Sept of the previous year, about 3 months before the above incidents, Margit experienced something strange of a wholly different kind. One finds however a remarkable parallel.

A NIGHT SIGHTING

Margit had spent some time at Ludvika hospital. In the bed next to her lay another woman. One night Margit was awakened at 4am, by a strange continuous noise. It sounded something between a rustling leaves sound and a whirring motor. It was dark. A couple of people were bent over the woman's bed. Margit could make them out as medical personel. It looked as if they were trying to release congestion in the woman's throat.

In the morning, Margit asked her 'neighbour' what had happened during the night. But according to her fellow patient, nothing had happened and nobody had been there. When Margit saw "the leaves" which were attached to the "Cotton-reels" 3 months later, it struck her where she'd seen 'the leaves' earlier - at the hospital in Ludvika!.

Margit is known as a clear sighted and trustworthy person. Yet she has difficulty in describing her observation in an understandable way. In her attempt to illustrate what she'd seen, Margit used familiar objects such as - cushion, cord - rope, cloth-covering, railings, spikes, antennae, cotton-reels and leaves. Margit's problem is she is not able to describe her experience in normal terms. She thought her observation would not find a home withing the accepted reference framework. When a person experiences the unexplained, the brain searches for known things to cope with the information. There are good examples of ufo observations with bizarre ingredients which remind of Margit's.

VOICE AFFECTED

It was obvious that the object had the capacity to manoeuvre between obstacles. When it reached the edge of the forest it elevated itself over the treetops and continued towards Multraberget (mountain), there it disappeared behind the top.

It was then that the paralysis that gripped Ann-Marie slackened. But when she tried to relate the incident to her husband, she could not without the hiccups which lasted for a half hour.

The next day they read in the newspaper about a strange spool-formed craft seen going up the coast towards Hudiksvall. Before this it had been seen by an elderly couple taking their evening stroll at Hallstagatan in Solleftea.

It had also scared a horse at Dannero causing it to rear-up and throw the trainer from the saddle.

- How could the object "know" when it should sink and higher itself, Ann-Marie asked herself. Was it being steered by some being inside?.

Why was I paralysed?.

These are the questions. In all these years since, Ann-Marie has not received any answers to the mystery.

During the beginning of the incident, she did think that maybe she was seeing some kind of military craft.

But when in 1973 she read a book about the ufo-phenomenon, she thought aha!.

- I believe there are other planets outside our field of vision much more advanced, says Ann-Marie.

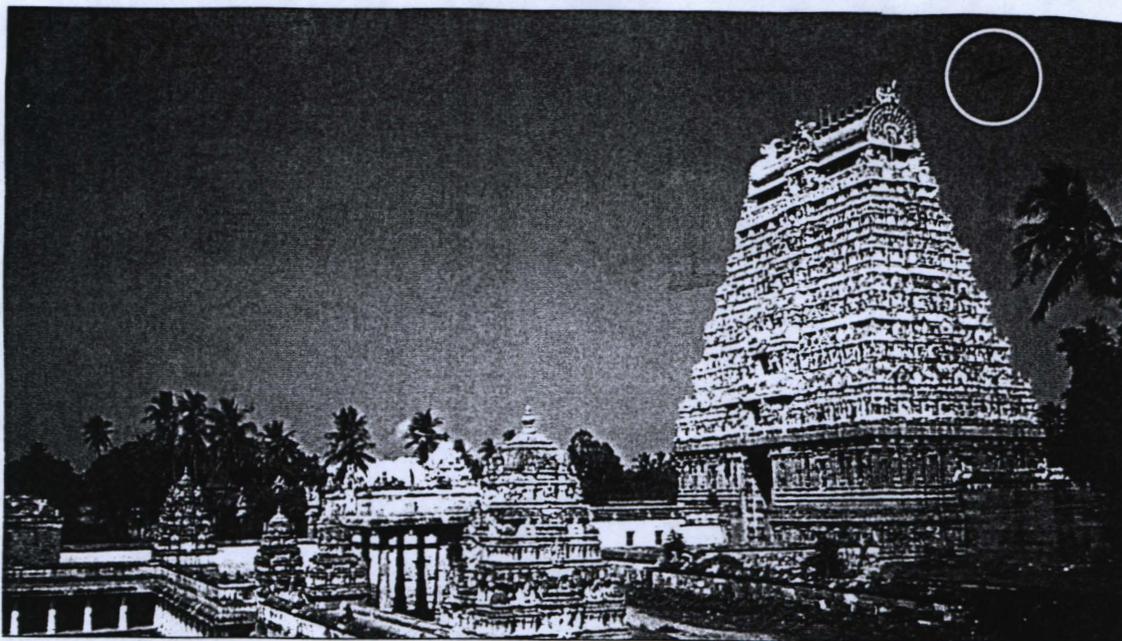

- The ufo I saw could have come from another world.

Ufo-Akt, No.1.96.

IN THE NEXT ISSUE OF AFO-AKTUELLT A "SENSATIONAL DAYLIGHT PHOTO".

I do not know at this time whether the above was taken in Sweden.
If so and/or it has not been well published elsewhere, I will of course
include the article in the next Trans-Ufo.

Belated congratulations to Ufo-Sverige (Ufo-Sweden) whose members celebrated
the organisation's 25th birthday, last year.

This photo was taken by Tora Greve, chairman for Ufo-Malmö in Sweden and shows an unknown object (in the top right) near a temple in Chidambaran, India. He did not see the object when taking the picture. Many members from the group in Malmö, plan to travel to Chidambaran during January of 97, to investigate the phenomenon further.

Ufo-Aktuellt No.96.

Wingless object near Norwegian airplane

At 16.25 hours on July 11, 1995, a Dash-8 passenger plane from the Widerøe company was on route from Fornebu (Oslo) to Brønnøysund when something very strange happened over Steinkjer about 70 kilometres N of Trondheim. The co-pilot caught sight of a flying object that moved to the right of the plane. From his left side of the cockpit the captain only saw a part of what happened:

- First we thought it was another plane but as I bent down to get a better view, I noticed it had neither wings nor tail-fins, says captain Erik P. Risan. It was fine weather and good visibility.

His (anonymous) co-pilot, on the right side of the cockpit, got a better view of the object but does not want to elaborate on the incident:

- I have already told the facts to the radar station in Trondheim. If I wanted this story in the media I would have said so, he stated.

The Widerøe plane was flying at 15.000 feet. The unknown object slowed down and disappeared. In about a minute it was all over. The crew informed the Værnes tower that something was in the air. Sometimes a weather balloon goes astray, but the captain does not want to speculate if this might be the explanation in this case. The military radar at Gråkallen near Trondheim had coverage of the area but caught no return from the unknown object. There were no military planes in the area. The object was considered unidentified by the military forces.

11 year old Roy Arne Hallem witnessed the incident from the porch of his home at Inndalen. The boy told his parents on Tuesday evening before the incident was published the next day.

- The object was polished and almost as large as the airplane. I saw it for maybe a minute before it disappeared straight up at great speed, he said. Three hours later a similar silvery, polished object was spotted by 75 year old Bjarne Lein.

AfU NEWSLETTER (SWEDEN) SEPT 95

Wan't to become an ambassador for Sirius?

The UFO business is full of kooks and conmen. One of them is Anders B. Johansson, a "New Age" Swede who is selling ambassador titles for the Sirius people expected, by Johansson, to land on Earth before the summer of 1996. If you have 5.000 SEK to spare you are guaranteed (?) a post as an ambassador for the invaders -- and you will probably help pay for Johansson's new Macintosh computer and other office equipment... Johansson is selling New Age courses, crystal healing treatments and voyages to Egypt at prices that can only be described as steep.

UFO-Sweden investigated Mr. Johansson's claims and businesses which include almost everything esoteric, from astrology to tarot reading. UFO-Sweden chairman Clas Svahn bluntly consider Johansson's activities as "confidence tricks". The negative publicity from UFO-Sweden resulted in an article in Stockholm's new "Metro" newspaper (distributed free in the subway). Reportedly, this forced Johansson to move his Tri Orion-Sirius Center to less prominent localities.

Johansson lives in Stockholm but is registered as an emigrant for the United States on May 1, 1990. This means he pays no income taxes in Sweden. All income is transferred to him through a tax-exempt foundation.

In 1992, Anders B. Johansson invited American "ufologist" Wendelle Stevens to talk before Swedish audiences. UFO-Sweden has interviewed a woman

↑ AFU NEWSLETTERS MARCH/SEPT 95 →

DEBT REMAINS

On the 11th Sept 1995, 1,500 people gathered on an airfield in the north of Bulgaria, to wait for 8 space-ships which were predicted to be landing. The outerspace visitors would, according to 3 female psychics, not only land but pay of the foreign debt of 15 million kronor.

When no saucer arrived, the psychics blamed a flypast in the area and then the President - Zhelev who refused to attend this historic moment. After a while, police were forced to take the frightened women away from the angry crowd.

Ufo-Akt No.3.95.

who was hypnotically regressed by Stevens. She remembers the hypnosis attempt with fear:

- Wendelle Stevens tried to force me to remember what had happened. It was a most stressful situation and I was frightened. He didn't appear to be a professional, says the woman who as a consolation got money for the taxi home. The woman has a written protocol of the session.

UFO-Sweden continues the investigations of the activities of other new age ufologists. One of them is Rauni-Leena Luukanen-Kilde, a Finnish medical doctor travelling the world-wide new-age/ufology lecture circus, and writing "international bestsellers", promoting her crude philosophy based on the most popular myths in ufology.

Ghost fliers and rockets: Study projects

Jan Wall, an associate professor at the Gothenburg Institute for Language and Folklore Studies, is collecting information on the Swedish/Scandinavian waves of ghost fliers (1930's) and ghost rockets (1946). At his institution he has collected copies of more than 1.000 contemporary written testimonies (mainly reports collected by local policemen) and he has performed some 100 personal interviews. Jan Wall is aiming at a scientific report to be completed within a few years.

Analyzing the cases, Jan Wall has found out that twelve of the very best cases of "ghost fliers" from the 1930's lack substantial evidence.

Wall's project is the last in a number of study projects in this area, but the first by someone with scientific credentials. **Archives for UFO Research** (Anders Liljegren and Clas Svahn) has collected documents, reports and interviews on ghost fliers since 1977 and ghost rockets since 1984. Quite a lot of people have been interviewed, particularly witnesses of the 1946 ghost rockets. An English translation of this resource of information awaits funding. **Sven Wäsström**, a former intelligence officer from Uppsala was planning a book on these phenomena (particularly the ghost flier) some ten years ago, but it seems the project failed. **Göran Jansson**, a TV producer from Uppsala, recently completed a Swedish manuscript on the 1946 wave, based on the War Archives documents, but has failed to find a publisher. **Jan Waernberg**, an aviation historian, has documented the Swedish Air

Force's 1934 "hunt" for the ghost fliers (published by the Swedish Aviation Historical Society). **Ole Jonny Braenne** of Oslo has copied thousands of documents on the ghost fliers from Norwegian archives, a material now on loan to AFU for copying and co-ordination with our Swedish data. One of our ALU employees, **Susanna Lindblad**, is working full-time on the project of creating a report archive of all our ghost flier data and computer coding of same.

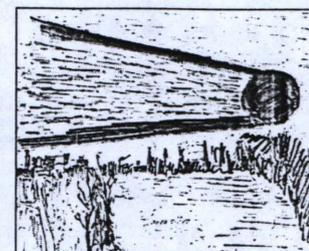

REPORT CENTRE

Observation Date: 8/8/90.

Time: approx 22.00hrs. place: Bromolla.

Arne Svensson and two of his friends were driving on a southerly route towards Bromolla. "All of a sudden I saw 3 intensive white lighted specks. I thought at first it was a rocket - but they stood still on the horizon for some seconds. They formed themselves in a line and were like 3 stars. Then they came slowly towards us. They stood still again for 10-12 secs, thereafter they moved slowly to the west.

Suddenly there appeared a dark red sphere which grew to an enormous size. Then it was like it suddenly grew a long tail to a length of about 100-150metres, approx 30-50metres wide at the back. The outer edge of the tail was dark blue and between it shimmered different colours: green, yellow and reddish, shimmering like the air on a hot summer day. The time from the sphere being sighted to its disappearance at a dizzy speed, was about 5-7 seconds.

The sphere passed over Levra lake and disappeared in the west below the horizon".

Later I heard that a female guest of one of the friends who had been with me in the car, had also seen this phenomenon from the window in Kristianstad". Concluded Arne Svensson.

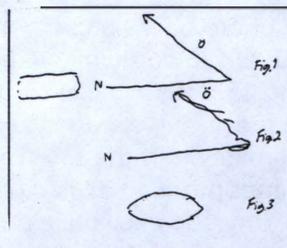

Investigator: Hakan Fenander.

Observation date: Late summer of 1967/1968(?)

Time: 09.00hrs. Place: Between Vrangesholm & Berga, Vastergotland.

Almost 30 years ago, Bertil Petersson was driving along the main road between Falkenberg and Skovde, when the following happened: "When I'd been driving a little way, I saw 2km away a little object lifting. It looked as if it had been stood on the ground. When it lifted there was a powerful smoke trail - from the ground and around the object. I could not see any wings or propellors. The object stopped about 50 metres but no sound was heard. It went to Valtorpshallet towards the north and continued to slowly step whilst it moved in my direction. I stepped out of the car to look closer at the phenomenon. Now it was no more than about 100 metres away from me and I could see its underside. At this moment, the object looked like a saucer. I thought I also saw windows but there was no light inside them. Even though the object was so near, no sound was heard. It was a lovely clear morning but there were 3 clouds in the sky, close together. When the object came up to them, they faded away. This was the strangest of the whole observation.

Inv: Tage Bang.

High-quality investigation of 1946 CEIII case

In February 1995, the most detailed and thorough documentation of a single Scandinavian UFO case ever published arrived at the bookstores. The authors of this outstanding book, "Mötet i gläntan" (Encounter in the glade), are **Clas Svahn** and **Gösta Carlsson**. Clas Svahn - the investigator of the case - is a journalist with Sweden's largest daily morning newspaper, Dagens Nyheter. He is also chairman of UFO-Sweden, a national research group with 2.000 members, as well as vice chairman of Archives for UFO Research (AFU). Co-author Gösta Carlsson - the experimenter - contributes facts and comments on his private encounter story and on his life. The emphasis of the book is on Clas Svahn's down-to-the-smallest-detail inspection of the case. The book is heavily illustrated (some 110 illustrations) and well-referenced (8 pages of tightly spaced source notes and a 14 page chronological bibliography).

Gösta Carlsson is wellknown in Sweden as "the Pollen king" because of his inventions for producing and refining pollen for drugs. His unique ideas in this field, ideas he now openly claims he received from aliens he made contact with in 1946, helped him build local industries that engaged hundreds of people, and to become the millionaire sponsor of a very successful ice-hockey team. Carlsson's May 1946 encounter with a landed discoid "space-ship", and crew, was first published by space journalist Eugen Semitjov in 1971. An early English version of the case, "The Ängelholm landing report", may be found in Flying Saucer Review, volume 17, no. 2 (March-April 1972).

At first glance, Gösta Carlsson does not seem to be the kind of person you easily dispose of as a dreamer, or as a cultist. His background is quite impressive. And Carlsson even claims he owns "the real thing", a mysterious ring and a strange semi-transparent rod, objects he says he picked up in the glade the day after the encounter. Both objects are colour-photographed in the book, mysteriously carried to the doorsteps of Carlsson's south-Swedish home - by a mysterious, unknown courier - especially for the photo occasion, and then (presumably) returned to an unknown laboratory.

The wealthy Gösta Carlsson claims he has had (or is still having) these objects analyzed by laboratories in Germany and the US. The problem is just that he cannot produce satisfactory original documentation of any such scientific analysis. Carlsson has had decades of time - AND the money resources - to produce proof of the uniqueness of these objects in his possession. Why does he hesitate..?

Although intensely interrogated by Svahn at successive meetings during seven years, "the Pollen king", in the end, comes out as a mystic who ought to be the one who could deliver "proof", but who, as is so common among contactees, fail to do so. In his first-and-only close encounter in 1946 and in his

subsequent "dreams" (he claims regular "visits" and talks with the aliens through night-time, dreamlike experiences) the details of his story come very close to contemporary contactees like **George Adamski** and **Helge Lindroos** (a Finnish contactee). Svahn has vacuum-cleaned the literature for comparison data to use in his analysis.

May 1946 saw the onset of the wellknown wave of "ghost rockets", peaking in July and August. In a short chapter on these phenomena Svahn states that only one out of 1.500 "ghost rocket" reports details something similar to the "flying saucer" Gösta Carlsson encountered in the glade. "The question is if the Gösta Carlsson story and the ghost rockets have anything at all in common", writes Svahn.

To promote interest in his alien contact story Gösta Carlsson has built a miniature replica of the "space ship" he saw almost 50 years ago for all to see. The model of concrete, in the glade where it all happened, has become a tourist attraction.

Clas Svahn's investigation balances well between belief and disbelief. In this way the book - and Carlsson's full story - would deserve a much wider international audience. It may well serve as a model for any detailed UFO case investigation.

Anders Liljegren

AFU NEWSLETTER MARCH 95.

(16)

The reporter of this observation (JHT) and his daughter were outside their home in Hostrupskov near Abenra in Denmark. JHT is not certain of the exact date but it would be around the 12th August 95. Both were out to observe shooting stars from the meteor shower Perseus which was at its maximum on the 12th.

The time was between 23.00hrs and 24.00hrs. The sky was starry. In the west they both caught sight of a powerful light which was performing somewhat strangely. At first the light was at an approx height of 30 degrees above the horizon in a northerly direction, with the speed of a satellite. Then the light was still for about 2 minutes, it then lifted to a height of 60-70 degrees above the horizon in 1-2 seconds. Here it stood still about 2 minutes then sloped down to the horizon on a northerly course and disappeared behind surrounding countryside. The reporter cannot give the precise observation time - "many minutes".

The phenomenon was white and estimated by JHT to be about 10 times brighter than a satellite and about 5 times the brightness of a planet. The Phenomenon's unusual pattern of movement excludes an aircraft as explanation and SUFOI considers the phenomenon as unidentified.

VEHICLE STOPPED BY DISC

On the 29th September 1995, a young man was driving south on a country road from Give towards Vejle, Denmark. He had his dog with him.

Around 21.30hrs, the motor suddenly began to jerk, at the same time, the lights went out and the whole instrument panel went completely crazy. - The needles flew backwards and forwards from one end to the other and the windscreen wipers started up. Then the motor stopped and the power went completely. The man sat still in the middle of the dark country road.

Suddenly, a powerful light came on above the car, he opened the door and looked up. To his great surprise, he saw a large disc 12-15 metres in dia with many bright lights in a circle around the bottom. The disc floated silently over the car at an approx height of 3-4 metres!

After a short time the light was weaker and the disc moved forward in front of the car and floated silently away behind some trees close to the road. It was a few minutes before the man managed to calm his dog and himself down. He continued wondering what had happened.

In spite of requests from family and friends, it was many weeks before he contacted SUFOI, where the matter was immediately taken up.

On the 18th November, there was a big article in Vejle Amts Folkblad (newspaper) about the incident. At the same time, a further witness contacted SUFOI.

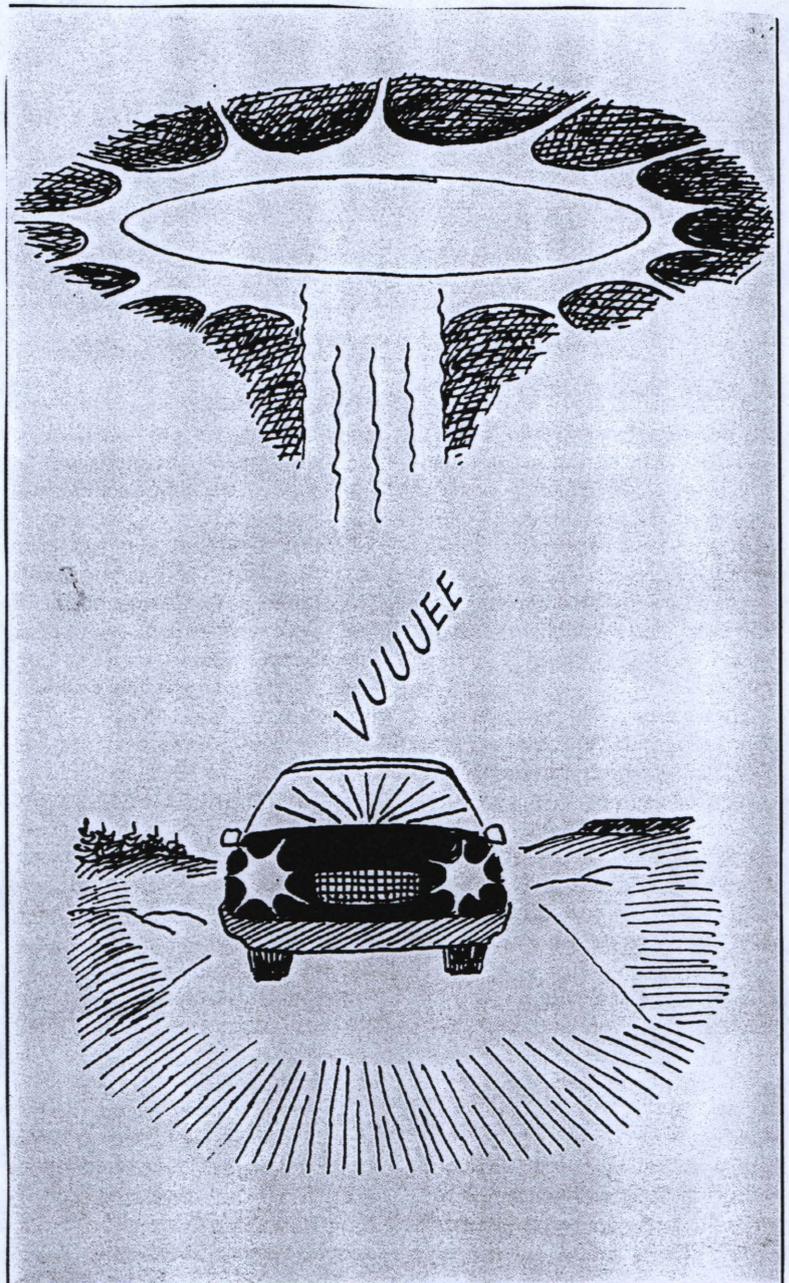

In a period of a few days 7 people rang in. Later Radio Denmark's channel 94 in Vejle broadcast a live interview with SUFOI about the story:

Had anything really happened with the car? How had the dog reacted? Had the ufo been seen since? How long was the sighting and was there witnesses to the car stopping?

SUFOI carried out a thorough examination of the exciting situation.

In the next number of Ufo-Nyt we will give more details about the investigation and replies to the many questions asked on the subject.

Toke Haunstrup & Torben Birkeholm. Ufo-Nyt No.1.1996.

SKorea UFO - UFO formation said to be filmed by South Korean TV cameraman- SEOUL, Oct 17 95 (272 WORDS)

Footage purportedly showing unidentified flying objects (UFOs) in formation was aired on an evening primetime television newscast Monday that rivetted viewers across South Korea.

The film, allegedly taken on September 4 by a local cable television cameraman north of Seoul, showed a clear image of white, luminous saucer-shaped objects flying in formation against a blue sky.

The footage, aired for four minutes and 44 seconds, showed a big brilliant cluster comprising 10 small saucers that flew in parallel, in a vertical formation.

"The flying objects were accidentally taken by my TV camera while I was on a trip to scout out locations," Lee Hee-Hong, 33, a cameraman for Kangwon Cable News, said in a televised interview shown with his film.

Kang said he had been reluctant to publicize the film for fear of ridicule.

MBC television said it was the first UFO film footage taken in South Korea and shown unedited.

Kang said the UFO film was taken in Kapyong, some 50 kilometers (30 miles) northeast of Seoul, the same place where a newspaper photographer allegedly took a picture of what UFO experts described as a typical flying saucer on September 3.

That photograph, taken by Kim Sun-Kyu of the Seoul newspaper Munhwa Ilbo, was selected as one of the nation's best five news pictures for September by an association of South Korean photographers.

In the first week of September, UFOs were witnessed by many people in the area, newspapers said, although scientists remained skeptical about the alleged sightings.

SAfrica UFO - Reports of UFO sightings in Johannesburg suburbs - JOHANNESBURG, Nov 25 93 (189 WORDS)

Residents of Johannesburg's northern suburbs called a local radio talk show Thursday to report an unidentified flying object.

About half a dozen callers from the Rivonia area said it was around 5:00 p.m. (1500 GMT) Thursday when they saw the UFO, emitting "a whooshing sound" as it headed south at the altitude of "a landing aircraft." They described the object variously as "round," "bullet-shaped," or "diamond-shaped," with

"flashing red lights." A spokesman for the private Radio 702 station said Thursday's calls followed a similar one Wednesday from a resident of Kyalami, venue of the Formula-1 South African Grand Prix. The spokesman said most of the callers "sounded like fairly intelligent people." The calls stopped after one listener, who identified himself only as Russell, brought a political dimension to the sightings: The UFO landed in his back yard, he said, little men stepped out and said, "take us to your responsible leader."

"I told them we had no responsible leaders, and they climbed back into their machine and left," Russell reported.

Argentina UFOs - Argentina agog over UFO - SAN CARLOS DE BARILOCHE, Aug 1 95 (228 WORDS)

Argentina was nervously watching the skies Tuesday a day after after an airliner narrowly missed hitting a UFO which darted in its path.

Jorge Polanco was piloting an Aerolinas Argentinas jet headed for this southwest winter resort town at around midnight Monday when he was forced to pull the plane up short to avoid what witnesses described as a "spaceship."

"As I was making the final approach, I suddenly saw in front of the plane a white light which was bearing right down on us really fast before it halted about 100 meters (yards) away," he said.

He said that as he frantically maneuvered his plane, which was carrying 103 passengers, the UFO took a bizarre turn so that it could follow the airliner and flew in tandem with it for about 100 meters (yards).

Air Force Major Jorge Oviedo said he and several others also witnessed the UFO and that there was a simultaneous power outage throughout the entire city.

The pilot said he was forced to pull up when the runway lights went out and that the flying object about the size of a jetliner with two green lights and a flashing orange light, "changed colors," followed him for a little while longer and then took off at "an unnatural speed."

Officials were investigating the sighting.

Argentina UFO - Residents of southern Argentine town report filming a UFO in flight- NEUQUEN, Argentina, Aug 16 95 (301 WORDS)

Residents of the nearby town of Cutral-Co last week filmed a low-flying, saucer-shaped UFO, officials said Wednesday.

Witnesses said that power in the city went out during the incident Friday, and the motors of some vehicles stalled as wind gusts surged and seemed to produce a sort of funnel in which the UFO appeared to float.

Local teacher Luis Luna, who videotaped the event, said "a blackout hit the entire city. Suddenly, we saw a blue light in the sky, really strong, that was approaching.

"I called my kids and my wife to come see and we were really taken aback because we saw the vessel, which stopped three meters (yards) above the ground, and did not move for a few seconds."

Fireman Ismael Pardo, who was with his family when he said he saw the craft and was unable to start car engine, was stunned.

"The flying saucer was about 400 yards away and then suddenly it approached to about 100 meters," he said. "At that moment, I thought it was going to take us away, but it did not move, it just stayed there for about 45 minutes.

"It had a flashing light with a different sort of power, and there were hurricane-force winds in the area and the ground swelled and slanted in the direction of the ship."

On July 31, a commercial airliner, also in southwest Argentina near the Andes mountain range, reported that an apparent UFO had "accompanied" the jet for several minutes. Communications between the plane and the control tower at the airport at which it was to land were cut off briefly.

An Argentine border patrol aircraft also reported seeing that unidentified craft.

UFO OR THE RUSSIAN SPY APPARATUS?
=====

This is a report on the last RV type observation of the UFO over Poland. That event took its place on 26.VIII.1993 at 18:30 HRS nearby the small town of Wasosz Grajewski.

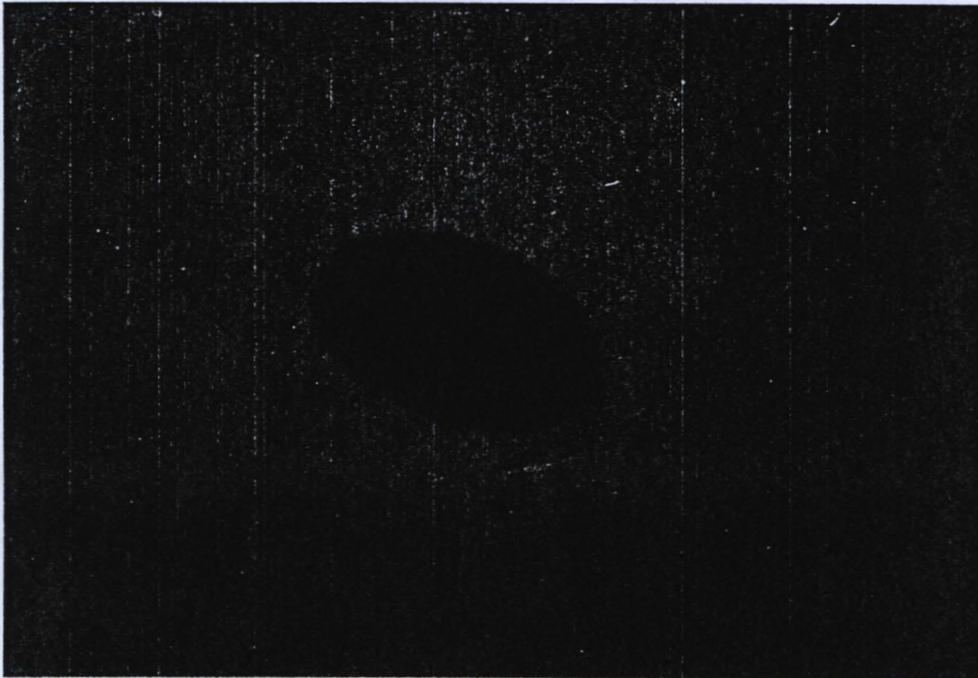

The UFO was seen by 50 y.o. Wroclaw inhabitant Mr. Eugeniusz Fudali, who spent his holiday there. Mr. Fudali is a member of the Polish Astronomy Amateurs Assotiation and Wroclavian Sky Watchers Society (WTON), he is trained sky-watcher and he has not had any troubles with his eyes and ears.

The witness went and saw the old fortifications from the world war two times near Wasosz Grajewski. He photographed them with his ZENIT-type camera, using a 200 ASA film. He went into the depression of the terrain, which was surrounded by a pine forest. Suddenly from behind the forest came one UFO and slowly approached to the witness. Its flight was noiseless and straight in its course. Mr. Fudali took three pictures and the UFO disappeared behind the forest.

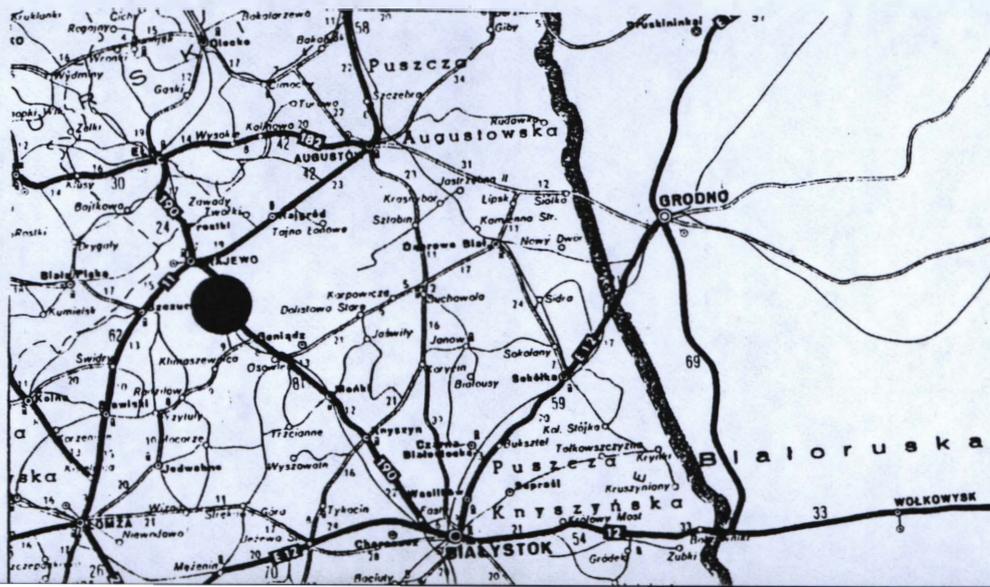

The UFO appeared on the NW-W direction and disappeared on the SE-E. It floated on the 500 m altitude, with a speed of the 50 km/h. The UFO was white-grey in its colour. Its shape was very untypical and the witness thinks that he photographed some military flying apparatus or even spy plane of unknown construction probably made in Russia. However nobody could confirm an existence of such planes.

During my investigation I asked about them experts of the Polish Air Forces - Maj. Jozef M. and the Border Guard Capt. Grzegorz S. (data reserved) who told me that they had not known such planes or intelligence devices. But they were not so sure, because it might be the newest Russian weapon now known as the GLIFTON or

the ELEFTON."It is quite possible that Russians tested their spy-devices over the Polish territory"- they stated.

I must add that the Wasosz Grajewski area lies close to the our eastern border with Byelorussia - c.a. 30 km far from it. Another factor telling in plus the spy-theory is that in 3 weeks later - on 19.IX.1993 - there was a pool to the Polish Sejm (Parlament) and Senat. The "Solidarity" was defeated in that elections by the post-communists. At that time Poland was

strongly penetrated by the Western and Russian special service

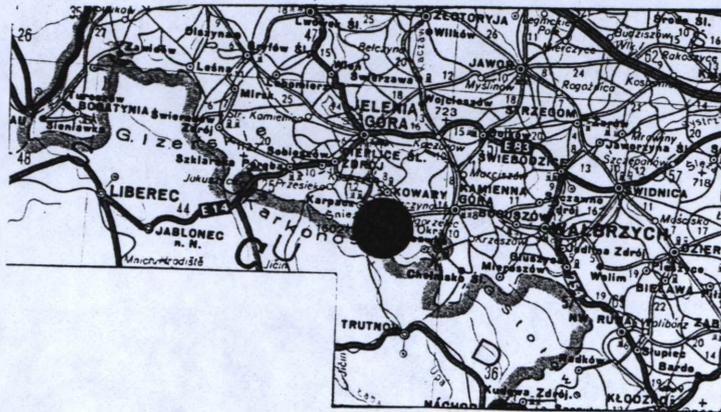

Neither I nor other ufologists in Poland received reports on the UFOs similar to this one. So then I suspect that it could not be the UFO at all but I can not prove it in the 100%...

A place of the incident is marked with a red dot on the map enclosed to this text.

THE CE5 IN THE KARKONOSZE MOUNTAINS

My ufological group - the JORDANOL of Jordanów - registered one CE5 (PSI-CE) on an area of the Karkonosze Mts. in Summer 1993. I gave a lecture for the UFO-watchers and psychotronics of Karpacz at that time. After a meeting two persons called to me with a desire to share with me their experiences with UFOs and others local phenomenas. One of them Ms. Ewa Katarzyna T. (data reserved) passed through the CE5, which quite changed her life.

It occurred in the March 1986, in the evening between 19:40 and 19:50 HRS. Ms. T. went for a walk to the Sowa Dolina valley

three km far from Karpacz. He was there with her boy-friend Mr. Jan W. (data reserved). When they reached a lower part of the valley, they suddenly noticed something odd above them. There was a huge, dark cigar-shaped object with 8 red-white lights. It hovered silently circa 20 m over them. It came from the East and slowly turned to the North and accelerating its speed disappeared above blocks and houses of the town Karpacz.

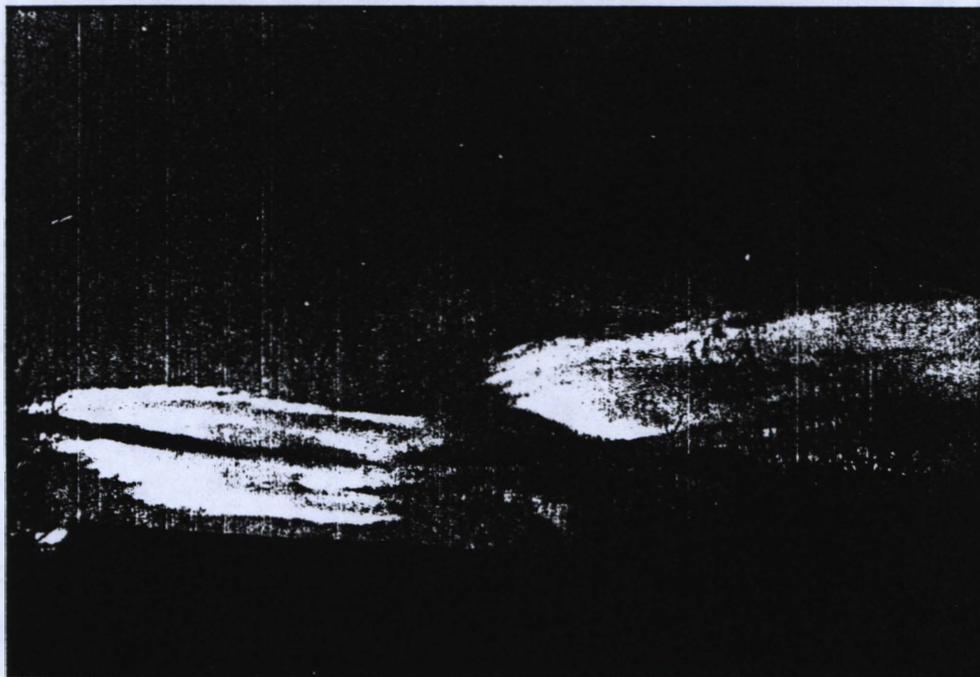

The witnesses backed to their houses without troubles. But Ms. T. started to interest herself in crystals and crystalotherapy. Moreover she dreamed some odd dreams about an interior of our planet. She in her dreams saw a cut Earth with the all geo-

logical profiles, concurrently she heard a strange voice, which inspired her for interesting in the crystalotherapy and crystalomancy. She changed her way of life and made a contact with the "Szaman" New Age magazine, where she has^{published} a lot of articles. Now she states, that the Aliens still keep a mental contact with her.

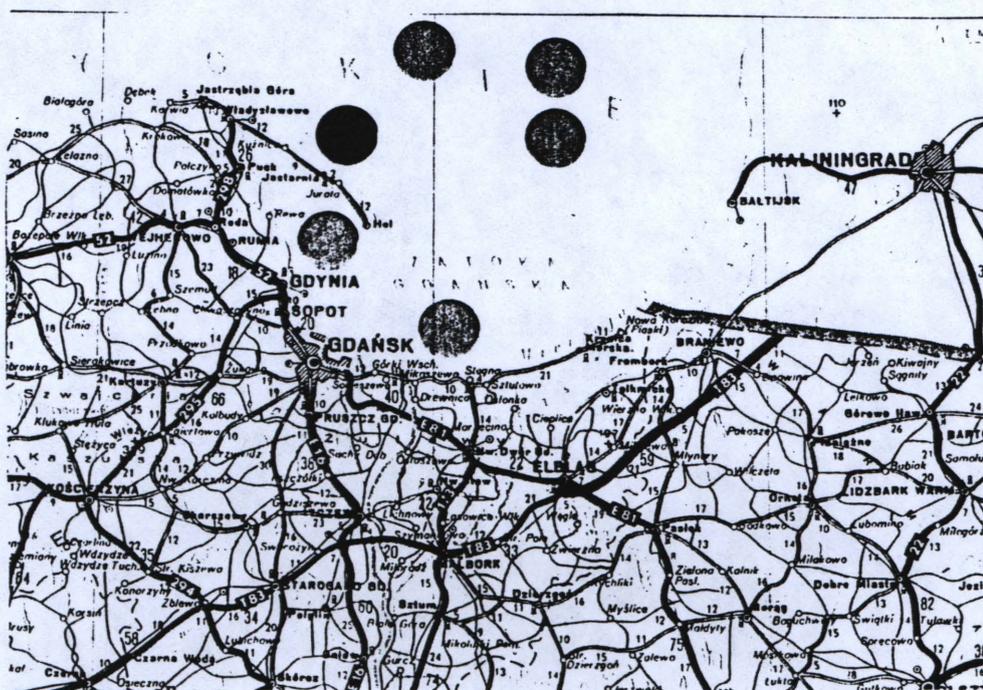

It is worth to add that for 1992 we have received a lot of the UFO-sightings from that area of Karkonosze Mts. and from the both sides of the Polish-Czech border. This problem is worked on by two Polish ufologists: Mr. Jarosław Krzyżanowski of Legnica and Ireneusz Hurij of Wrocław. Perhaps they are going to make the next mountain UFO-research programme like PROJECT PENNINE, PROJECT HESSDALEN or PROJECT TATRA, in the nearest time.

UFO OVER THE ZATOKA GDANSKA BAY

In the December 1991, 49 y.o. inhabitant of the Jordanów town Mrs. Emilia B. (data reserved) with her husband and friend watched the DD-type UFO hovered over the Baltic Sea off the Hel penninsula. They watched it during a half of the hour. The UFO was bright white and seemed to be a triangle shaped cloud, but it was too solid. The witnesses are quite sure that it was not any cloud like Altocumulus lenticularis, see a photo below:

This sighting would not be so strange event, but my mates from the Polish Border Guard: BG Capt. Andrzej B., Maj. Zbigniew K. and Maj. Henryk B. (all data reserved) hardly confirmed that there have been a lot of the UFO-sightings reported by the Border Guard officials and Air Force and Polish Navy officers. The UFO seen by Mrs. B. and her companions is marked with a red dot on a map as below:

With yellow dots I marked two known to us NL-sightings, which occurred in the August 1994 and July 1959. We had also three USO-incidents, especially with the fishboats. the first odd incidents was on 23.VIII.1979, when the fishmans' cutters HEL-125 and HEL-127 were "attacked" by bright BOL shinning with red light. The crews were literally knocked down with energy emitted by the BOL. Famous Polish ufologist of Cracow - Mr. Bronislaw Rzepecki pushed off five theories according to them that BOL was

1. A piece of the satellite;
2. Unilluminated helicopter;
3. Meteorite;
4. The new Soviet psychotronic weapon, and -
5. The UFO.

The first three theories he immediately gave up. They were impossible. The circumstances show that the fourth hypothesis is the

most possible solving of this mystery. The Soviets started the tests with the psi-weapon and probably used that armament against our fishermen... This event was classified as the NOTSUE Idv/CE2 by me.

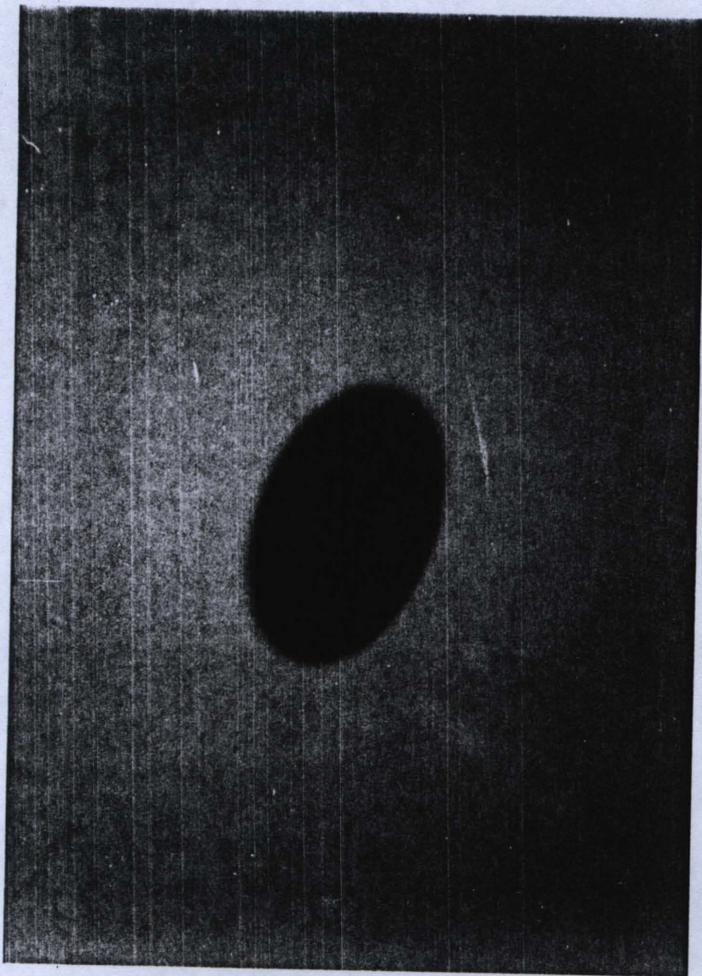

Another strange event took its place on the Zatoka Gdansk area on 4 March 1992, when the cutter HEL-128 was sunken in the odd circumstances. The HEL-128 was probably hit by the Russian submarine, but called 4 anti-submarine warships were not in the area, unable to find anything in the water. If it were the Russian submarine, it'd be detected in water 40 m deep... This event I classified as POSSUB-IIb/CE3.

On 19 February 1994, we registered another case POSSUB-IIb/CE3 with cutters WLA-7 and WLA-17, which nets were dragged and finally cut by unknown submersive object going towards the Russian waters. And like in the last case, 4 warships hunted for the USO a lot of times with zero result... Those events remain those ones, which occurred in the Scandinavian countries in a period of 1981-1990, and perhaps caused by the same forces... Personally I think that 75% of the all strange incidents in the Baltic Sea waters were caused by the Soviet submarines and at least 25% of them by the real USOs.

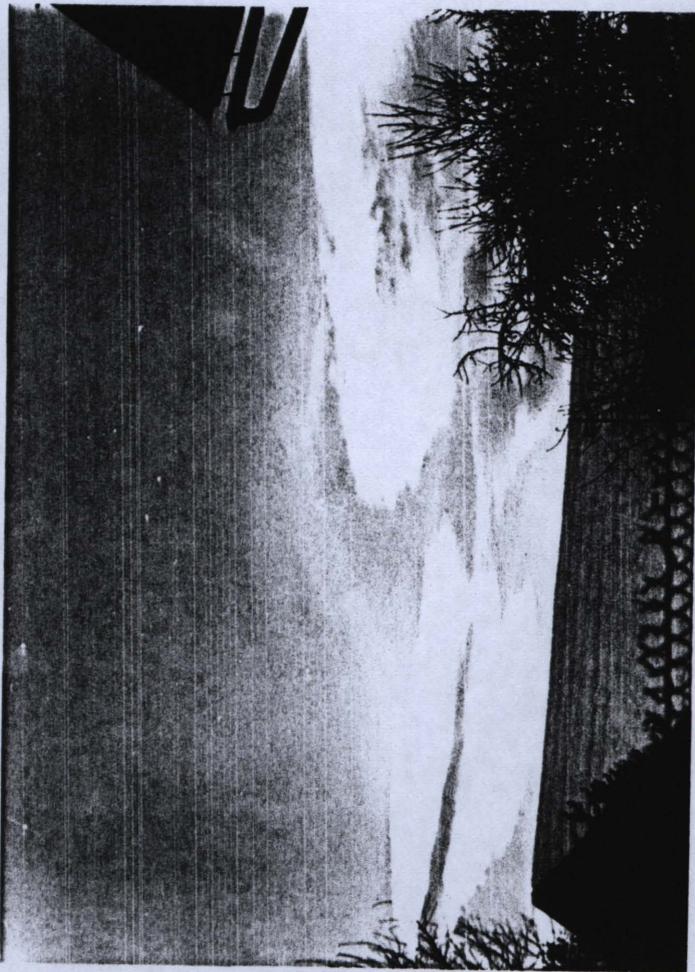

The Polish UFO-cases are not so spectacular like Western ones, but they are also strange and mysterious such like other

by GABOR TARVALI OF THE
HUNGARIAN UFO RESEARCH NETWORK

Chronicle of the extraterrestrial magnesium rod

The most interesting event of the International UFO Congress held in Debrecen (Hungary) on October 1-2, 1994 was the following. A supposedly extraterrestrial object was became public property and presented.

Until now this event is unique in all over the world, because many people could see, touch and perceive physically this object in public.

UFOs and extraterrestrial civilizations exist. These facts have known for those people dealing with UFO-research, we think so. A huge amount of documentation - witnesses, photos, films and secret military reports - is available and can prove the reality of these things. We have to keep our mind supposedly extraterrestrial beings and flying objects have been stored in secret military base in U.S.A. But the people have not yet informed officially about these objects. Only indirect information could reach to the public, because the competent organizations did their best to keep in secret these facts.

There is an appropriate example as follows. Many people got in touch with the crew of UFO in Transsylvania (Rumania) on the summer of 1974. The extraterrestrial beings were human-shaped, tall and long blond-haired. The one of them handed over a little box which contained 64 gold-foils. Unknown writings and various signs were engraving on the foils. A short time after the ill-famed secret service (Securitate) learned this event and confiscated the gold-foils, the witnesses were terrified and imprisoned, and a few of them dead at strange circumstances. And nobody knows what had happened with these foils. Only some drawings were made of writings and signs before confiscation. These drawings exist, but they could not consider as direct proof. But the solving of this message would be very important task for us.

We were waiting for a legal and real proof whose origin, material, quality and specifications are probably extraterrestrial, and come in public. This was happened in the International UFO Congress held in Debrecen. Here 600 people could take part of this sensational event, and the press informed the all country about it.

This object is a rod made of magnesium, its original length is 36 cm. The owner is a 46 year-old man who lives in Debrecen. Unfortunately, the original rod was cut into three, equal length pieces.

Until now Laszlo Bako, the owner was passive party of very strange events several occasions. I give a short report of the three most interesting events, and how he got in touch with magnesium rod. I follow the events in order of importance.

A strange meeting

This story started in Tiszacsege (a village 70 km far from Debrecen) on 1953.

There was an early summer, sunny morning. Laszlo Bako was 5 years old. He was in the fields with his grandparents, they hacked the sugar beets. Laszlo was playing alone at the near railway bed. While playing he felt something strange effects, and then he noticed a little strange "person" coming closer to him. The person was human-like. He had hands, legs and a little bit bigger head. The 5 year-old boy believed the person was a man, it was seemed to him that it was very unusual kind of beings. The whole body of this person was very smooth and grey, and did not wear any clothes. The person was as tall as Laszlo. The person came slowly to him, and stopped about 1 m far from Laszlo. As Laszlo remember they looked each other and he felt a nice, friendly feeling. As if the strange little man smiled.

During this encounter the little man made motions like a paddling child, but it was certain marking time. Laszlo Bako felt the strange man talked kindly, but he did not hear any sound and did not seen any moving of his lips. Laszlo could not be able to explain his feelings. The special meeting held about 1 minute. Then the strange little man turned away and went to the right peddling. After 4-5 m the strange man disappeared. The child made angry, because he could not conceive how this person became invisible. Though Laszlo Bako was a child, he was sure a real man could not be able to disappear in this way. Laszlo was looking for the little man, but he did not find him anywhere.

This was the first event or encounter in the life of Laszlo.

Extraordinary story of a truck

The next event was happened near Debrecen on the road 4 in the middle of May, 1976.

Laszlo was working as a truck driver. Laszlo driven a truck typed ZIL. He and 5 fellow-workers transported slag sand in convoy. Laszlo was the last one in the queue. There was night, some minutes after 2 o'clock. Laszlo felt strange effects, as his truck started to swing to the right and left. He thought this movement lasted for 15-20 seconds, then his truck suddenly lifted up to the air and turned downwards and finally landed on the road. It was unexplainable thing. But there was much more unexplainable how the slag-sand did not spread at all, as if certain unknown power made a different gravitation. Only after the landing the slag-sand sprout in form of symmetrical pyramid. It was not any damage, only the heavy truck pressed the door and it did not open. Laszlo Bako escaped through the window. He looked the truck and could not be able to get explanation. The engine stopped, but the lamps were on. His fellow-workers also stopped. They observed through their rear-view mirrors that Laszlo's truck lamps were lifted up, then changed their positions. They were stressed looking the truck turned downwards. Nobody knew what had happened. They called the service truck of the company (Volan Vallalat) and the police. The truck was turned back and took in tow home. Neither the professional experts, nor the police investigators did not find any explanation for this accident. The official report made by police is kept in secret.

The diverting

The most important event was happened in the middle August, 1974. Laszlo Bako spent his time in the terrace of a little cottage on the skirt of Debrecen. There was 11 o'clock p.m. He was in bed and was hearing radio. Suddenly he was fallen asleep. Some seconds later he was in a bright room. As he remember he sat in an armchair-like furniture. In front of him there was a desk with lengthwise stripes in grayish-white and black. The desk top was slanted to him. (It has to mention a teenage girl from Kiskunfelegyhaza talked about a very similar piece of furniture that she noticed in her diverting. It is impossible that these two persons "dreamed" the same thing. And also it is out of question that these people would have agreed on a course to be followed.) Laszlo sharply remember a being stood in the right to him. This person held a cca. 35-40 cm length rod in his hands. He kept drawing it on the table strips as if he had shown something to Laszlo, during this action the person "talked" to him. At least Laszlo thought it was a speech. He slightly remember the person "said": "We have left the Earth." And the person talked about some kind of distances. According to Laszlo's feelings the person explained something. After it Laszlo felt bad having very unusual feelings and he could not be able to remember.

When he recovered consciousness he was sat in his bed leaning forward and his legs came down to the floor. He felt bad, he was disturbed but same time he was full of very wonderful feelings. He noticed a paper box near to his bed. A strange green light was emitted from the box. A little bit later upon closer view he found a bright rod emitting green light at the ending part. He handled the rod and looked at it. He could found the one explanation which connected to the strange person, because he remembered this rod was in the hands of the strange person. He did not know what to think about this "present". But he was sure very important event had happened and he owned a very important object.

(On the basis of our information similar objects frequently play an important role in story happening in similar circumstances. But this is the only one case when the object remained in the Earth or somebody owns this object.)

After the event Laszlo Bako was ill for some days. He stored the rod in his flat for a short time, then he wanted to hide it. He wrapped it in a cloth, put it into iron tube, he closed the two ends of the tube and dig it in his garden. The rod was under the ground for one year, then he dig it out. He searched a new secret place and he again hid it under the ground. He always watched the secret place. Finally, he dig it out in the spring of 1991.

He dig the rod out when he got in touch with HUFON. He told the whole story to us, but he hesitated to show the rod. At the and he agreed to make a sampling from the rod. Unfortunately, he cut the original rod into three parts and he gave me the middle, simpler part. The two ending parts were shown only in 1992 and 1994, respectively. And after a long pressing he agreed to present the every part of the rod in public, namely it was happened in the International UFO Congress held in Debrecen (Hungary) on October 1-2, 1994.

About the rod

The cylinder-like rod (original length was 36 cm) was cut into three approximately identical parts. Its diameter is 18 mm, its surface is silver grey of a metallic lustre. The rod consists of magnesium.

The two ends of the rod are rounded in relatively rare arched forms with different radius. The surface is not perfectly smooth polished, but similar to so-called sand-sprayed which is characterized with both micro and macro roughnesses.

For technical investigations two, 10 mm in length pieces were cut from the middle part of the rod. On this part the traces of damage, cutting, carving and hewing are shown. Unfortunately, the owner made them due to his curiosity.

The one ending part is similar to the middle part. Its outer end is very special. A slanting frustum of pyramid protrudes and this formation constantly emits green light. Illuminating the rod this light or phosphorescence becomes very stronger and long-lasting. The material of this light-emitter is unknown, it has not yet investigated.

The other ending part is much more interesting. We could acquainted it in September, 1994. Its surface is little bit rougher, gold-colored hemisphere-like "bulgings" were seen on it. These protrudings were fitted in line, but not geometrical accurately. Diameter of these hemispheres is cca. 4 mm. Following the third hemisphere an isosceles triangle can be found supposedly made of some material. The triangle's vertex points towards the third hemisphere as if it was going to make a message. Inside the triangle an oval, slightly corrugated foil was constructed. From depth of this oval foil colored (red, blue, green, all prime colors, but violet also) lights emit constantly.

The hemispheres were put in asymmetrical pattern. it is very curious, as if the pattern would had certain meaning. As if the unknown producer or sender made an effort not to the whole symmetry but the unique form. It might be possible this object had some special function. Unfortunately, the original rod were cut into three parts, this change might be spoiled its original function. But these explanations are only my own hypotheses.

The results of technical investigations on the material mean turning-point in the story. The analyses were performed with sophisticated modern instrument in really accurate way. It was computer-aided analysis by electronics. The measurements were made not officially, so presently this kind of investigations could not be performed in legal way in Hungary. Supposing it were done it would be very expensive for us. So we have not the official version of the report and we could not name the institute where the analyses were done. But we are sure the official investigations also produce the same results.

The results

The material of the rod consists of magnesium. The purity is 100.000 % which is inaccessible in the Earth. According to the specialists the pure magnesium can be produce theoretically, but only in modern laboratory, and very expensive way. There is no reason of this preparation. Magnesium in this purity is not found in the world, the home-made preparation is impossible. As alloy components and chemical material are known in purity of 99.5-99.45%. The composition of the rod is totally unique in the Earth. The investigations were repeated three times, the results were same.

On the basis of the facts detailed above we consider Laszlo Bako owns a such special object whose origin is probably extraterrestrial. After the oncoming official analysis which would give same or similar results this object will be the really single entity which could prove the reality of extraterrestrial origin as well as extraterrestrial beings have been visiting us.
