Mr. M. I. B. Birdsall,
67 Lovell Park, Towers,
Leeds LS7 1DR.

Dear Members,

Thankyou for purchasing this booklet, it has been produced for the members and investigators benefit. Many hours of research has been taken to compile the maps and index. The position of the military and coastal installations are for easy reference and we feel will be of great assistance plus time saving as well. We can say quite confidentially that to our knowledge the maps and index are accurate.

Hopefully members will realise that the cost for the booklets comes from our own money. So we regret having to make a charge for the publication. But we believe it to be a very valuable and rich source of information at hand.

If the booklets are a success then hopefully further editions will be printed. These will only be available at Y.U.F.O.S. meetings. The subjects we hope to cover in the future are very varied, and cover most things that one will almost inevitably come across when investigating U.F.O.S. For example here is a small list of just some of the things we have in mind:-

- a) Aircraft recognition, Military and Civil.
- b) Aircraft light sequence.
- c) Maps of the T.V. and radio masts.
- d) Diagrams of the many U.F.O. shapes.
- e) Civil Aviation flights path.
- f) Just how easy it is to mistake an endless list of objects for U.F.O.s.
- g) Diagrams of many weather balloons.
- h) How to recognise satellites and space debris.

To be quite honest the list is endless. The success of this venture rests entirely on the response we get. So if after reading this booklet you are interested in further editions see me or Peter, or ring me on
