COMMUNISM, UFOLOGY AND THE U.S.A.

The conflict between the Armed Services and the civilian UFO groups throughout the country is a well-known fact to all.

The bone of contention is that UFOlogists charge the Armed Services with suppression of UFO information from the U.S. public. They feel that the public should know all the facts.

The questions which linger in my mind are: SHOULD the public know the facts and are they prepared to ABSORB the facts intelligently, without fear and panic?

Unfortunately CAPRI, following suit with the majority of the other UFO organizations, has in the past attacked the U.S.A.F. with unjustifiable malice and one-sided slander.

Are you shocked to hear me speak disrespectfully of CAPRI? I shall explain!

As you all know, in many of my editorials, I have attacked and ridiculed the Condon Committee, the U.S.A.F. and other various Government Agencies of the U.S. because of their policy to suppress UFO data from the public.

As times change, so do ideas and the trends of thought. As you grow older, you grow wiser. As you grow wiser, you become a good listener. As a good listener you become more receptive to ideas and statements you never were aware of in the past.

You ask: What does all this mean?

Just this -----thanks to the response of a very concerned and outstanding citizen of the U.S. by the name of Mr. Nick (last name withheld) who opened my eyes via suggestive and constructive criticism, I am

(cont. next page)

able to state the following with pride, good conscience and renewed ambitions:

EFFECTIVE IMMEDIATELY _____ CAPRI wishes to retract all statements voiced against the U.S.A.F. and/or any arm of the Government of the U.S.

With all due respect, each and every member of the CAPRI Organization should and must give their utmost cooperation to these people whenever possible and/or necessary.

Henceforth all UFO Reports received and analyzed by CAPRI shall be forwarded to the U.S.A.F.

You ask why?

Namely this: Who is going to chase these strange crafts in our skies? Who is going to track them? Who is going to determine whether they are friend or foe? Who is going to defend our country against the unknown, should the need arise? Who is going to risk their lives? Who is in the position of challenging an unidentified flying object or craft violating the air space of the U.S.A? Who is going to keep this a free nation?

The answer is obvious! The Military Forces of this country are the only people capable of handling such a task. Anyone who is in disagreement with that statement should take a good second look at the situation.

It is now my personal opinion that the role of the civilian UFOlogist is to help our Government in any manner, shape or form in order to solve the UFO mystery _____ not to hinder it. To hinder the situation means the harassment of the U.S. Government. Harassing our government is the principle aim of Communism.

The statement I issued on Form #4 has the unintentional feelings and bylines of Communistic tendencies. THIS WAS NOT MEANT TO BE !!

Again, I must thank Mr. Nick for opening my eyes before it was too late.

EDITORIAL continued from previous page ...

To me, Communism represents every evil that lurks on the face of this earth. My love and devotion to my country makes me feel shameful to whatever I have published against it. Once again, I wish to retract any and all statements issued against any arm of the U. S. Government.

NEW STATEMENT OF POLICY --- EFFECTIVE IMMEDIATELY

Under the directorship of myself, it shall henceforth be the policy and duty of CAPRI to help, serve and advise the Government of the U.S.A. and all affiliated branches of the Government on any and all matters concerning the UFO phenomena. Any data received and analyzed by CAPRI shall be forwarded to proper Government authorities for study and final analysis.

I now strongly feel that it is the duty of every loyal U.S. citizen to follow suit. Let us work with and help the new administration of the U.S. achieve his goals --- namely, peace and harmony throughout the world. And what better place is there to start than right here at home?

Let us all open our eyes, join hands and work together--- as one. Remember --- "United we stand, divided we fall."

How can we hope to achieve any amount of success if all the civilian UFOlogists are fighting the Government; if the Government is quibbling with the scientists; if the scientists are in dispute with the disclosures of the Condon Committee; if the Condon Committee is being slaughtered by the Free Press of this country; etc., etc.

WAKE UP AMERICA!! If ever there was a time needed for unity, it is now.

Just imagine all the fantastic information that could be uncovered if the Government and the UFOlogists could work in harmony; if the press would stop scandalizing the Condon Committee; if scientists could work alongside the politicians;

(cont. next page)

EDITORIAL continued from previous page ...

if for one time we could break down the walls of jealousy
that prevails within the hearts and minds of all mankind.

IF ----- IF ONLY !!! (END)

THE GLEMSER REPORTS

UFO RESEARCHERS COMMENT ON THE 4-D THEORY

by Kurt Glemser

Dr. Meade Layne stated just as there is a spectrum in sound and colour so is there also a spectrum in tangibility. Gray Barker had the following to say in They Knew Too Much About Flying Saucers: "Thus the theory tends to tie in with tales of saucers that disappear, or travel noiselessly through our atmosphere at fantastic speeds which would melt ordinary metal." Bender also seemed to hint very strongly in the above book that saucers come from the 4-D.

James Trevor, author of They Live in the Sky, photographed 4-D entities or structures. He also has a photo of a UFO as it is changing into its physical condition.

George D. Fawcett had this to say, "I have also always felt that our world of reality, is surrounded by an invisible world (not tangible), which from time to time in history was intermingled or crossed and brought about such things as UFO's, ghosts, apparitions, unexplainable happenings, miracles, visions. This theory though unproven, still sounds feasible to me, after over 15 years of hard down-to-earth research, study and investigation."

Robert E. Dickhoff, PhD, author of four UFO books, stated the following, "Yes, we do not own this world all by ourselves, entities from unknown dimensions to us are constantly bumping into us, some of them with malicious intent!"

Other UFO investigators agree that the saucers may be coming from the 4-D.

THE REALITY OF THE FOURTH DIMENSION

by Kurt Glemser

In 1958, Mrs. George Wales watched as her husband vanished in front of her in Brooklyn. Here is her story:

(cont. next page)

"I'd sent him out to climb to the top of a clothesline pole to rescue a shirt that the wind had blown off our washline. Hermann yelled that it was stuck on a rusty nail. As he reached for it, his hand seemed to disappear. Then, before my dumbfounded eyes, he was sucked up and faded altogether. I was too horrified to scream."

Police were notified but they did not believe the story.

On December 24, 1889, Oliver Lerch, 11, had gone to a well to fetch a bucket of water from a well near South Bend, Indiana. His family heard him shout, "Help! Help! They've got me!" His tracks ended abruptly in the deep snow.

A British platoon disappeared in Sudan in 1898. A company of British engineers disappeared in the Khyer Pass in 1898. The track ended abruptly.

It was on September 23, 1980, that David Lang was last seen near Gallatin, Tennessee. Lang was walking towards his wife, children and visitors. Although the field, which was close cropped, was searched, no clue of Lang was found. In April, 1881, the children noticed a stunted yellow grass, fifteen feet in diameter, at the place their father had disappeared. When they called for him his voice of help could be faintly heard. It faded into nothingness.

"Earthman captured. Stand by for blast off."

WHY PLUTO IS DIFFERENT

By Isaac Asimov

How and why is Pluto different from all other planets?

Pluto is noteworthy for being the most distant planet from the sun. (Its average distance is 3.6 billion miles). But then, some planet has to be the most distant, and it just happens to be Pluto.

Yet that is not all. Pluto has certain unusual characteristics that set it apart from the eight other major planets and make it an object of considerable curiosity to astronomers. For instance:

(1) Pluto has the most elliptical orbit of any of the major planets. A perfect circle has an eccentricity of zero and the eccentricity of earth's orbit is only 0.017. The eccentricity of Pluto's orbit, however, is 0.25. Sometimes it is as close as 2.7 billion miles to the sun; sometimes as far as 4.5 billion miles from it. In fact, when Pluto is at its closest to the sun, it is nearer than Neptune, and, for a while, is no longer the farthest planet. Right now, it is moving in closer than Neptune, and will stay closer for about 40 years.

(2) Pluto has the most tilted orbit of any of the major planets. If all the planets were lined up in their orbits on the same side of the sun, they would all be just about one behind the other - all except Pluto. Pluto's orbit is tilted at 17° to ours and it could be far above the general position of the other planets or far below. (That is why it could never hit Neptune when it crossed Neptune's orbit. It would cross it far above.)

(cont. next page)

(3) The eight planets other than Pluto fall into two groups: First, there are the four planets near the sun: Mercury, Venus, Earth and Mars; all are small, dense and have little atmosphere. Then there are the four outer planets: Jupiter, Saturn, Uranus and Neptune - giant planets, with low densities and enormous atmospheres. That leaves Pluto, which is out among the "gas giants," yet is a small dense world like the inner planets. It is definitely out of place.

(4) If we disregard Mercury and Venus, which are so close to the sun that gravitational effects have slowed them down; we can say that all the planets rotate rapidly about their axes. The periods of rotation range from 10 to 25 hours. Yet Pluto has a rotational period of 153 hours - nearly seven days.

Why all these extremes? Is there a reason for Pluto to be so different?

One particularly interesting suggestion has been made. Suppose Pluto wasn't a planet to begin with, but was a satellite of Neptune. Suppose some cosmic catastrophe of some sort had sent it hurtling out of its satellite orbit into an independent planetary one.

If so, the nature of the explosion (if that's what it was) could well have hurled it into a tilted and lopsided orbit; but one that brings it back toward Neptune, from where it had started out.

As a satellite, it would be small and perhaps dense, instead of being a gas giant like the true outer planets. And then, too, it would have rotated about its axis in the same time it took to revolve about Neptune, thanks to Neptune's gravitational pull. (This is true for satellites generally; it is true for our own moon). In that case,

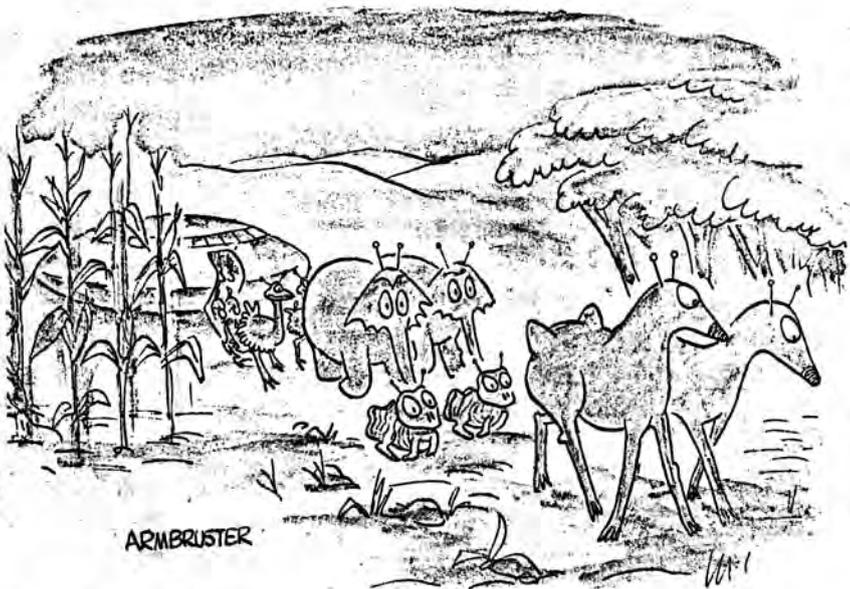

(cont. next page)

WHY PLUTO IS DIFFERENT . . . cont. from previous pge.

Pluto's period of rotation could easily be a week. (Our moon's period of rotation is four weeks.) Naturally, when Pluto was hurled away from Neptune, it would keep its period of rotation and would end with a most peculiar one for a planet.

Unfortunately, though, all this is just speculation. There is no hard and fast evidence that Pluto was ever a satellite of Neptune; and if it was, we don't know what kind of catastrophe could have broken it away.

UFO SIGHTINGS

Natick, Massachusetts

In June of 1967, a 22 year old dental technician, Nancy Sorenson, observed an unusual object hovering over Natick High School at about 10:30 p.m. She gave your editor this exclusive story. . both on tape and on a signed report:

"Between 10:30 and 11:00 p.m. my girlfriend and myself parked our car in the Natick High School parking lot, got out and walked over to the machine to deposit the quarter to turn on the lights in the tennis court. All of a sudden my girlfriend (Faye Burns) yelled, "what's that?" I looked up and over the tennis court, not very high, there was an object which was hovering up and down. We watched it and it kept going up and down, up and down. It didn't go across the sky - it didn't go anywhere. It just kept going up and down. The object was yellowish in color and had blinking green lights in the rear. The object was definitely disc shaped. We watched the object for at least twenty minutes to be sure it wasn't an airplane, helicopter or such. It did not move.

We really got frightened then - we decided that this was it, this was really it. It was definitely a flying saucer. Feeling that we would be pinned in if we stayed any longer, we jumped into our car and backed it up onto the main road and continued observing it for another 10-15 minutes. Suddenly it started to move in the direction of the quartermaster (Army Research Center). We followed the object directly to the quartermaster where it just disappeared."

EDITOR: Was there any noise generating from it?

NANCY: None whatsoever.

ED.: How high was the object?

NANCY: About as high as the Prudential Building, 52 stories.

(cont. next page)

UFO SIGHTINGS . . . (cont. from previous page)

ED.: How large was the object?

NANCY: About the size of a half dollar at arms length. The odd thing that struck me about it was that about five years ago I saw one almost identical to it near the same location. Many other people have also seen it at about that time, too.

ED: Was the object hazy or could you see a definite appearance?

NANCY: We could see that it was definitely a disc, not like a light of any sort. It was shaped exactly like a disc.

ED.: Any distinguishing characteristics like windows, antennas, etc.?

NANCY: No.

The interview was ended at this point. Miss Sorensen then filled out the CAPRI sighting form and turned it over to your editor.

It is important to note that as far as can be determined, the quartermaster is a joint Government-Military Research Center dealing with survival and effectiveness of military troops and astronauts.

It has been concluded through our analysis that this sighting shall be given a rating of Category #2 (see below for explanations of new number rating system for UFO sightings and analysis). We have made this conclusion for the following reasons: (1) excellent description by witness. (2) hovering, wobbling effect (3) disc shaped and (3) lack of sound which are all strong indications of an alien craft. According to the witness, the weather conditions were excellent- clear, cloudless and bright. There seems little chance of error on the reliability of the witness or the des-

UFO SIGHTINGS . . . continued

Kentucky

Persons who live on a farm near Cedar Creek and Louisville reported that they made separate sightings of unidentified lights that looked like port holes or windows hovering or moving over fields. Mrs. Gerald McGill, 25, said that her son, 11, her sister-in-law, 22, and herself saw these lights of an apparent flying object at about 7:00 p.m. on November 3, 1968.

Mrs. McGill said they saw what looked like the light of a big flashlight moving up and down over an open field. As it rotated, the light varied from bright to dim. She said she could not estimate the distance between them and the object. They observed the object for about 15 minutes, then the object moved toward them and appeared to take on a hazy appearance. Becoming startled, they started their car and fled from the object. Further accounts of the descrip-

(cont next page)

UFO SIGHTINGS . . . (cont. from previous page)

tion of the object was that what appeared to be three windows were visible, red blinking lights, and hovering of the object was noted.

Credit: Saucer Magazine, Bellevue, Nebraska

CAPRI Rating - Category #6 for above report

Arnold, Pennsylvania

On September 25, 1968, Mr. Adam Lewandowski, while sitting on the house porch, spotted a yellow saucer-shaped object airborne just south of his home. The time was 8:45 p.m. and the weather was cloudy with no stars visible. The significant factor in this sighting was that there were reference points on the landscape with which the witness could make distance estimations. The object was seen over some hills to the south. These hills are at a distance of two miles. However, even at this distance, no sound was heard. The UFO hovered over the hills for a while then accelerated upwards into the clouds. It did change brightness as it performed this maneuver.

There were no conventional aircraft in the area at the time. The size of the UFO was that in comparison to a nickle held at arms length.

After the object had been gone for about ten minutes, Mr. Lewandowski along with his next door neighbor who had just joined him, saw the object for a second time. This time it was about 50 degrees above the horizon, indicating a low cloud cover and it was moving very rapidly. It remained in view for only 15 seconds before disappearing again. There was no sound heard on the second sighting either.

A.R.S. Rating - #2 (probable)

CAPRI Rating - #3 for previous report

Santiago, Chile

Two UFOs were seen over Santiago, Chile on March 22, 1968 at about 1:10 a.m. on the east side of the city. The sky was cloudy at the time. The objects were said to be as bright as the moon. They were described as being like vertical cigars, gold in color and were observed for about 15 minutes. At 1:25 a.m. they disappeared into space, flying diagonally.

CAPRI Rating - Category #4 . . . for above report

INTRODUCING

The New Secretary International:

CAPRI would like to welcome Miss Barbara Josephs, who is now assuming her position with our Executive Staff, into our organization.

Barb is 25 years old and has had much high level secretarial experience. She is already given the credit for the typing and handling of this new issue of CAPRI NEWS.

Welcome Barbara - - - - we are proud and honored to have you with us.

THE CAPRI REPORTS - PART 2

UFO's and Blackouts

by Kurt Glemser

UFO's have in recent years been connected to the increasing number of power failures or blackouts. Flying saucers have been seen for some time during blackouts or shortly before or after blackouts. In 1965 during the Exeter sightings, saucers were seen tapping power lines. It has been suggested that the saucers use the electricity in their propulsion system. Below are some cases:

December 2 to 3, 1955. Danville, California

A 24-hour blackout was caused by a "low-flying plane." The "plane" cut a 22,000 volt line. Two of the three strands of the power line had snapped.

1957 - Mogi Mirim, Brazil

Three UFOs which were glowing and disc-shaped passed slowly over the town, and as they did so, the power ceased to flow and the lights of the town went out. There was an area of total darkness directly beneath the UFOs paths and a dimming in varying degrees as the distance from the UFOs increased.

August 3, 1958 - Rome, Italy

Rome was blacked out when a luminous and very large UFO maneuvered overhead. When the UFO left, the lights came on.

(cont. next page)

August 17, 1959- Uberlandia, Brazil

Four automatic keys turned themselves off when a saucer passed over the power station at low level. The keys broke the circuit. When the saucer left, the power was restored.

April 18, 1962 - Eureka, Utah

A huge UFO landed beside a power station. The impact of the landing put the station out of operation for an hour.

September 15, 1965 - Cuernavaca, Mexico

Three consecutive power blackouts occurred in the space of one hour. UFOs were reported over the area at that time.

November 9, 1965

A blackout occurred and covered 80,000 square miles in Canada and the United States. Many UFOs were reported. Moments after the blackout Weldon Ross, a pilot, saw a huge fireball in the vicinity of Syracuse, N.Y. A photo of a UFO was taken 20 minutes after the blackout. It was taken from the Time-Life building. Stuart Whitman, an actor, observed two saucers outside his hotel window on the 12th floor. One was orange and the other one was blue. He claims to have spoken to the beings inside the saucers. The blackout was blamed on the Sir Adam Beck plant at Queenston, Ontario.

December 3, 1965 - Southeast USA

The area was visited by UFOs during the blackout.

(cont. next page)

September 7, 1967 - Sharon, Pa.

A UFO was seen over Sharon while the valley was blacked out by a power failure.

February 27-28, 1968 - Worcester-Auburn
Area, Massachusetts

The blackout lasted from 6:50 p.m. to 9:40 a.m. The telephones weren't even operating on the night of the 27th. There was no explanation and the blackout wasn't even mentioned in the newspapers. There was no saucer activity reported but some activity occurred in the Rhode Island—Massachusetts area. (Credit—A. Laprade, Editor: Phenomena Magazine, 48 Great Brook Valley Avenue, Worcester, Mass., 01605).

J. E. Van Ness, a Northwestern Chicago University professor, has found that blackouts in those power pools could be caused by "oscillations or waves in electrical currency." He said the oscillations can be started by any little disturbance.

RUSSIANS WRONG ON VENUS

The surface pressure on Venus is about 75 or 100 times that on earth, or four to five times greater than the pressure reported by Soviet scientists, data from U. S. Mariner V reveals. A pressure 75 times that of the earth's atmosphere is equivalent to that of an ocean depth of 2,550 feet. Researchers at NASA's Jet Propulsion Lab think the Russian spacecraft which reported the lower pressure either landed on a 15-mile-high Venus mountain peak or stopped transmitting before it reached the surface of the planet.
