U.S.A.

SIGHTING REPORTS

in AKRON area only

May 15-9:20 P M-Barberton... young man--on way home observed---a good-cherry-red UFO. Watched it ten minutes, as driving from Coventry to Barberton. Arriving home, object was still visible from yard, directly in the west. Called 2 neighbors to witness sighting. Object just ambled around, then slowly moved, about a dime at arms length, going north. Would blink sometimes, or rather pulsate. No sound, Phone service was knocked out during this viewing, but resumed after UFO had passed over. Name withheld

September 1st..9:30 - 45 P M..Northampton..Bill Teagle ...beams of verticla light about six inches in diameter observed in vacant field to north and in own front yard, and front yard of neighbor to east. Beams did not remain stationary, but descended and vanished rythmically...swiftly and silently...a feeling of countless beams all at one time.

September 1st. 9:00 P M, Northampton..Mrs John Pinter, Northampton Rd..

at 12 o'clock high, observed a right white object weaving thru clouds. First it was stationary, then went west, then south, then continued to weave in and out of stars disappearing and reappearing. Seen thru glasses..no blinking, red or green lights noted just a steady glowing white object. Finally just vanished at southern end of horizon. Compared with other stars..as to brightness and size, about the same in size and brilliance as the next to largest evening star.

September 5th..10:40 P M ..Ascot Theatre, Northampton ..Carol Teagle and Steve Randolph both of Steeles Corners Rd, observed during intermission in Ascot Outdoor Theatre, a diamond shaped colored object fall from just above screen top, across screen, to treetop level, then seem to explode into three smaller balls of light. Object was about 1/3 size of thumbnail held at arms length.

September 7, 7:40 P M, Canal Fulton ..Nola Ramsey was called outside by neighbor who observed a silvery gourd shaped object in sky, going faster than jet, travelling from NW to east, When Mrs Ramsey and her husband arrived, the object had diminished in size, but was still visible. As it continued eastward, became more like a circle than gourd shaped. Viewers estimated object was about 2 1/2 feet in length, ver high, very

September 26-70...8:50 P.M. West Hill Dollie Hansen, along with her son and daughter observed a bright orange colored ball of light about the size of a pea or bean held at arms length, streak across the sky in a northerly direction. No sound.

September 26-70...9:20 P.M. Streetsborough Mel Medley and neighbors living in her apartment just outside Rt 14, outside Streetsborough proper, near the sand pits, observed 2 huge white lights and a red light hovering over the sandpits. Watched it for nearly five minutes, sounded like a light airplane, but hovered like a helicopter. Finally felt they should walk down and see..instant they began to move toward it, it rose, and took off directly over the apartments. They could observe no size or shape..but they felt definitely it was no ordinary aircraft. It proceeded in the direction of Shalersville at tree-top level...for some time, then simply vanished. Lake Tiffin and Lake Rockwell are not too far removed from the sandpits..which is rather interesting...

September 25...11:00 P.M. Northampton...several persons reported observing a starlike object about the brilliance of the evening star blink on and off intermittantly in the mid-east southerly section of the sky. It was NOT a plane, and assuredly it did not seem to be a star either. At first they thought it might be a fire-fly, but on checkin they noted no other fireflys present ... and besides the object was stationary for some time...

September 29...3:00 P.M. Canal Fulton...Mola Ramsey...observed in the sky a beautiful star..wether shaped by jet contrails or not, she did not know. But she said she had been outside most of the day and had not observed many jets overhead, yet this star just suddenly appeared there. (picture included) It is interesting to note that those who have eyes to SEE will SEE signs in the sky...in any age. The star is intriguing because it denotes the number five in mystical terms...and of course the Christ...and also...a state of importance. So....

September 14th...10:50 P.M. Tallmadge...Fred Hartline and friend observed for some time a medium bright star, directly overhead, slightly to the west, as it altered in color and seemed to weave in and out of other stars. Finally moved to the southwest. This star was also in view by several persons at Northampton who also verified that it move sometimes rather slowly, sometimes faster and did NOT move in a steady direct course, like a satellite...nor the slightly staggered course they at times take. Was seen to take

several sharp turns, -at right-angle degrees to the north and then directly to the south again. ..then move back into line with the other star and begin its weaving again.

September 19...9:30 P.M. Barberton, Ohio ..Shirley Cradlebaugh of Westwood, Akron, saw a big, bright red light circling drag, -strip-where her husband was racing. No noise was heard, it did blink on and off, but resembled no airplane...about the size of a large orange.

September 22...10:30 P.M. West Hill Shirley Cradlebaugh observed a bright red light about the size of a fifty-cent piece held at arms length, travelling across sky west to east, no sound was heard. Also seen by various neighbors.

September 10th...9:30 P.M. Kenmore area...Ann Zoltai ..noted an exceptionally brilliant, light, seeming sailing in a lazy eight pattern. It was a clear night, moon out, very few clouds, there were numerous other bright red blinking lights which she felt certain belonged to planes in the area. Both she and husband watched, both felt the movements of the exceptionally bright red one were far too smooth and fast...and perfect to be an airplane. Finally it went directly northeast and moved away into the distance.

September 30th...10:30 P.M. Kenmore...near the car barns, Betty Fern noted a brilliant white light, easily as large as an orange held at arms length, which would dim, fade out, grow smaller and larger as she watched it..for approximately a half hour. An airplane passed overhead and as it did so, the light blinked out, then returned and began to move slowly away to the southeast.

October 4...Streetsborough...9:10 P.M. Mel and Gary Medley observed from their drive a brilliant white star-like object hovering just above the sandpits, near Rt 14, which would grow brighter, dimmer, larger and smaller..was definitely NOY a star and did not think it resembled any actions of airplanes which go over this area quite frequently. When Mr Medley walked toward the sand-pits, to see if he could discern anything more clearly, the thing would go out, then reappear, when he would come back toward the car, Mrs Medley has complained in the last few days of things seeming to disappear and then reappear in her apartment...???

October 4th 9 P.M. Big Falls Ave, Akron ..Darlene and Diane Bachman, on their way to the Lawson store, observed a huge brilliant light in the sky, motionless. shapped some-

thing like an arrow, but yet with a round circular center which was white. A reddish color above it would blink a very slowly, followed by a slow blinking blue light which was on the bottom. There WAS a noise with it...a soft sound, but not like any airplane would make. She was not certain about the arrow part, but she said something in the center of the circular white part seemed at times to resemble an arrow ...or large spear.

October 4th, 8:30 P.M., Riverview Rd ..Dollie Hansen and family just coming out of Star Market saw a huge perfectly round, dime sized object sitting motionless in the sky. They observed it for fifteen minutes. It was to the northeast..they estimated it was probably somewhere between Northampton and Rt. 8. It had four points on it...like a disk with four points in the places of the four compass points...(or the quarter marks on a clock face ///???) and a red glow that seemed to flow around the object in a circular motion. Immediately after arriving home, Mrs Hansen initiated a call, and twice while the other party was talking the phone was disconnected. The other party hung up and tried several times again, from their location...the same results. Both parties said there was a sound similar to the clicking a tape makes as it goes thru the recorder..very soft but a steady and definite ticking sound. Later on during the evening, Mrs Hansen had intense interference on her phone, to the extent that she had to curtail all phone calls

NOW...at 5:30 A.M. October 5th, people from all over the eastern seaboard and in many states east of the Mississippi, saw a huge cloud of red and greenish vapor that grew to ten times its original size within seconds, seemed to be heading westward at great speed, and had AN ARROW IN THE CENTER. The government released a report that they had made a barium tests at Wallops Island and this accounted for the unusual display that everyone saw. We are not arguing that point, but we would like to know why the girls saw an object with an arrow in it, very similar to the one reported with the barium display, nearly eight hours previously ????? We asked why the arrow was observed if it was merely a barium cloud...and no one was able to come up with any answer..they said it must have been an optical illusion...could be....

Special Section

We have saved the September 21st sightings for this page for a very special reason... just two months ago... on July 21st, there was a report of a clock-faced object by a Guyahoga Falls woman... and this sighting report has stirred up considerably comment among Indians, one of whom, Chief Lightfoot Talking Eagle did answer my inquiry as to the importance of this incident to Indian legend, and we reprint it here... and then we will go on to the September 21st sightings...

"The four faces of the clock message was given to us by a spirit many years ago, then more recently, and again several months ago, without explanation as to its meaning. The messenger of the Great Spirit merely said 'Keep watch for the Four Faces of the Clock. That will be the time.'

The numbers on the face of the clock seen by the woman you mentioned were 12-6-3-9. According to the common calendar it would be the twelfth month, sixth day, but what does the 3 and the 9 connote? Could it be according to the Moon Calendar, of my Ancients ?? Twelveth Moon, sixth Sun, third Hour, ninth Year ??? This year until February 5th, 1971. Translated to common calendar, January 2, 1971. Approximately 10:30 A.M. EST.

We also follow another calendar, the Calendar of the Spirit Universe. New Years Day according to this ancient Calendar begins on Sunrise on February 5, 1971, That will be the beginning of the year ten. That calendar would throw an entirely different light on the interpretation of the time meant by the four times shown on the clock face. We are now according to my Ancients, in the 41st year of the one thousand and first cycle of the Calendar of Time Eternal. One thousand years, according to the Great Timekeeper have passed. We are entering the tenth year of the second thousand years, bearing in mind that a thousand years are but a day and a day as a thousand years. "

For those who would like to correspond with this really magnificent Chief...and he knows a lot...his address is...

Chief Talking Eagle
526 West Spruce Street

Mahonoy City, Penna

PEAR
SHAPED

SILVERY
SILENT

RAPID, STEADY PACE
APPO. SIZE IN SKY

September 7th, 7:40 P M, Canal Fulton...neighbors of Nola Ramsey observed

and then called the Ramsey's, a silvery gourd shaped object in sky, going

faster than any jet, travelling from NW-east. As it continued eastward, it

became more of a circle than pear-shaped, a gourd looking, was estimated

to have been about 2 1/2 feet in length, very high, going very fast,

leaving no con trail and with no sound.

September, 21-70 6 P.M., Akron ... Irene and Joe Bralik, on way to Garfield High noted in the sky, which at that time was a clear, beautiful blue, a sort of fuzzy writing that made the number ten. 10 with a crescent or sliver of a moon directly over the zero. This was extremely interesting to us, because ever seven years ago we were told to pay heed to the number ten and when it came up... to bear in mind that some mighty important things were about to happen... everywhere.

Numbers in the sky are not unusual for this area..and we suspect that they are not really unusual for other areas, either...Perhaps it would be wise to keep an eye on the sky, for we get many reports similar to the one above, except the figures are different. As yet, we have not the slightest idea of what these various figures pertain to...but if we keep recording them, and listen, and watch, a pattern will emerge shortly...and then we should be on our way to discovering its meaning. ALL reports are important... no matter how insignificant they may seem to YOU...each one helps to fill in the bare spots and to round out the picture...without them..it is incomplete..so no matter... let us have them.

September 21...8:00 P M..Goodyear Hts....Arlene Kidd observed two objects, about as large as a bushel basket in the sky, with what appeared to be an X inside of a circle, ringed round with little lights, stationary, to the east.

September 21...9:20 P M Kent Ohio ...Edith and Norman Johnson observed as they drove along Water Street, (main street) in Kent three objects, at first only one, a bright red light, pulsating, which at first they thought to be an airplane, then as it grew in size, decided it could not be, and as it came closer, saw a ring of vari-colored lights in which the red pulsating light seemed to be suspended. The lights were going around, ferris wheel fashion. Suddenly, without any previous indication of their presence, two more appeared. No sound was noted, they were all quite large and discernible. They moved off to the east and southerly direction.

September 21...9:30 P M. Northampton...Carol Teagle..observed a sea-green light about as large as a baseball descend in an arc earthward directly outside her bedroom window to the southeast. As it reached mid-way in front of a tree, it seemed to explode in many little fragments like fireworks displays...with a brilliant white center still edged in seagreen.

September 21, 9:10 P.M. Stow area . . . unidentified man observed as he drove down N
Riverview Rd, what seemed to be two red fireballs, or meteors zooming down from south-
east, then suddenly they stopped in mid-air, became stationary, but grew in size, until
they assumed the shape of a disk or elongated oval, but still brilliant red. With what
seemed to be a disconnected circular ring about them. As the object drew closer, it
seemed to him that the ring was very definitely a platform of some type, solid . . .
and reflecting the reddish glow of the brilliant red light within its orb. Within the
center of the ring, and revolving around within it, were a row of vari-colored lights . . .
every color imaginable. The ring seemed to be part of the UFO but not connected TO it.
He thought of many things to do as to getting someone there, calling, but now that
his mind was thinking, he could not co-ordinate his body to respond, until just as
suddenly as they appeared, they were gone and he did not know where they went,

On*the*Road*****

by Phillip Waterhouse

I'm sure that all of you serious 'UFO' nuts have experienced the same screw-ball that
I AM at the moment. I mean the nice guy that is trying to help in every way by making
you tons of fake material. You tell him that all you want is the real Mc-Coy. But try
as you will, you can't shake him. No matter how much you try, they'll always have a
complete screw-ball planted in the crowd to throw everybody off the track.

Take some good advice . . . 1 Don't let him bother you

2. Don't let him show those phone Photos to anyone

3. Scream, yell, hit, break, do anything to stop him . . .

(within limits, that is)

People like that are a pain to all of us. The believers and the non-believers. Most
of the time they are harmless. So harmless I'm sure you can look in any UFO magazine
and find at least one article devoted to him.

As yet I haven't decided what my next article will be entitled. I guess time
will tell . . . how about you ???

August 9...5:30 P. M. Berlin Dam...courtesy of FBI . Between 5:30 and 6 P M Mrs Betty Brown and son, Tim, 17, driving on SR 224, noticed that traffic was heavy and that some cars were pulling over at intersection of 225 and 224, looking upward, some with binoculars, and others with cameras. An object, round, silvery on top, and dark on bottom of area, going from " to E, fairly horizontal estimated speed about 20 mph, seeming to rotate counter-clockwise. Size estimated to be around 10' - 12' No appendages, no sound, no con trail, no lights. Object suddenly moved, changed direction and seemed to be coming toward them and descending at the same time. Object appeared to lose size as it fell behind tree line near dam. It was not seen again.

Interesting note.....some months ago, Art and LaVerne Davis were spending a good amount of time in the Berlin Dam area and LaVerne stated then that she felt some rather extraordinary sighting reports would be forthcoming in th not too distant future in that area.

August 21...5 P M..Dresden, Ohio .. rocket shaped UFO sighted, going very fast, in northerly direction. No con trail, no sound. Leita Kuhn submitted report

August 25th..9:30 P M..Killian Rd ..6 bright objects viewed, very dim at first, just above house, in perfect line, travelling slowly SE, then made a sharp turn and moved to the west.Observed for possibly fifteen to twenty minutes. During evening it was estimated fifteen similar objects were sighted. No sound was heard and observers felt they were definitely NOT aircraft...as they are familiar with aircraft lighting effects. Roger Rafferty family of Killian Rd made observation.

August 26th...9 P M...Cuyahoga Falls ...beam of light observed descending near observer containing what appeared to be a person, in a robe, about four feet tall..viewer did not stay to observe any longer, beam estimated to have been about four feet in diameter.

August 30th..10 P M..Northampton ...Nage green fireball, size of a basket ball, seen by Dollie Hansen, hurtling across sky from NW to SE, no sound,.."fantastically beautiful commented Dollie. West Akron reports also...and Bath...all thought it extremely beautiful.

August 30th..10:00 P M..Northampton ...another beam of light...again with a figure about four feet tall, apparently robed, or at least in a white gown or something

TUES. SEPT 29, 1970

about 2:30 P.M. - Sky beautiful blue
White cloud formation, very large,
off center toward S.E. - Star formation,
MAINTAINED SHAPE for quite some time.

similar. Came down--directly behind individual, in a rather wooded area; no sound, only a sort of eerie feeling; Observer walked faster, looked away, but then looked back, both beam and figure had disappeared.

August 31st. 9:00 P M. Northampton ...several youngsters reported in vicinity of Steeles Comers Rd, two fireballs the size of basketballs, about ten feet off the ground, one going north to south, another going south to north, no sound, great speed.

8*****

' You may be interested in the amount of saucer activity still going on in Prescott Arizona. It is indeed a 'flap'..Hundreds of sightings by hundreds of sighters !! If you would like to look more into it, you can send 50¢ to Prescott Courier, Prescott, Arizona, asking for the editions of August 9th, 10th, 18th, and 21st. The 'flap' included a gigantic Mother Ship which reportedly landed right in the middle of the Hopi Indian Reservation. Also, the craft are reportedly from Venus, their mission..to fulfill the Hopi Indian prophecies of great sorrow and desanuction of the peoples of the Earth in form of destructive earthquakes, fires and waters coming sooner than we think.'

excerpt from a letter by Ralph Phillips ...

you might all send for your copies of the newspaper...it is extremely interesting.!

*****8

A recent revelation of increased risk of lung cancer and leukemia ... of Colorado in homes constancted on radioactive ground fill and also the release of info that a 250 square mile tract in the AEC Nevada test site is contaminated by a radio active element, plutonium, that can be expected to linger around for 24,000 years or more. The whole area is now fenced off with warning signs here and there.The AEC also admitted that one out of every 12 bombs leaked deadly radiation into the atmosphere.The contaminated zone is only a result of tests between 1945 and 1958 ...' excerpted from a letter from Ralph Phillips. Members living in these areas..check and let us know what YOU know concerning these statements...we ARE interested: !!

Sighting Reports from Members

'In early June of this year, my best friend who is also a flying saucer enthusiast, saw a UFO while on his way to Boston, Mass, on a bus. The UFO appeared to be about 150 feet long, and 30 feet high or deep. It was about 1/4 mile long, and at an altitude of about 500 feet., parrelling the highway, moving at about the same speed of the bus. The saucer paced the bus for about 15 seconds, then shot up and out of sight. Looked something like this.....

Lewis Brackett, USCG

August 26th, Jacks Lake, Canada about 10 P M. bright star-like object observed in sky, then lights appeared in shape of a boomerang, orange light at first, then red, seconds later was gone. No noise observed, but a message seemed to be impressed within the sightee's mind.. 'Y ou earthlings listen..The time has come for your forefathers to hasten to change his ancestry. Our contactees on your star, Tera..we shall stay at our stations, but our representatives among you shall come forth and bring about great alterations in your ways of life'

September 2..8 P M, Los Angeles...two observers saw in the sky a maze type phenomena, something like a pretzell, but colored white, blue, red and green, in contrail tyype substance, each one a different color. This was seen as far south as 125Miles, as reported in the mass media, in San Diego. The same night, a man observed in the San Fernado Valley, at about 8 P M, a large cigar shaped object cutting across the sky with a huge red flame emitted from its end .

submitted by Ralph Phillips, of Los Angeles.

Our International Chairman, Brinsley Le Poer Trench, tells us that Hyerdahl, the Norwegian explorer and author of 'Kontiki' fame when attempting crossing the Atlantic in his papryus boat, the Ra 2, near the end of his voyage, in the Carribean Sea, saw a UFO for ten minutes. This was witnessed by a U N survey ship, in close vicinity, fisherman at sea, and hundreds of people on the islands..a very well attested to sighting. How is it then that we have heard nothing of it...or any slight reference to it ???This, then, apparently, is not news...or at least not earth-shaking enuff to warrant a few lines.

CB'ers.....

ALERT....

ATTENTION... All CB'ers which are also UFOlogists and hold and FCC authorized Class 'D' license for operation in the 11 meter band on the frequency of 26.96-27.23 Mc/s within the continental United States. All CB'ers in the many other countries that this will reach... please take note

This is a first attempt, by my person, to organize some of the many CB type Good-Guys into one large CB net for the express purpose of doing something about these so-called UFO's which seem to be thicker than the hair on a cat's back (despite the Condon report)

Now to see just what is what about this UFO deal, we will have to go any or way around and the best way I know of, (and the fastest) is by the Air-waves. Though you CB guys and gals might find it a might crowded at times, just keep the Hammer down, for there will be an ear that will hear your call and Break your Station.

The thing is though, we will be working the air with that handicap of the 150 mile radius, and limit, station-to-station, I have found nothing in the FCC R&R Part 95, which states that we can't form a coast-to-coast relay to get the sightings reports to a control point or station. And in that case, here goes the deal for what it is worth, (which I hope is plenty!)

As no one has as yet stepped in to take over the job as control for the US area, I would be glad to inform the reader the job is now filled and activated, as of now!

To give the reader a short run-down on my person so that you may know to whom you speak or copy, I have had 30 years service in the military, am now retired, and have been electronically oriented for the last ten years, and earn an extra bread and butter check each week from that line or work. I have been in the UFOlogy Bag hangup for a total of 25 years, in which time I have been able to learn a little bit of what goes on up there in the Wild Blue (or is it black ?) Anyway, there are, as you may have already learned, quite a few different types of so-called UFO's moving about in the Wild Blue Yonder. To subtype a few like the little round ones, the large round ones,

the round ones with the hole in the center, the gas tupe, the hot air type, the two-
soup-plates-together type, the cigar-shaped type, the hover type, the fast type, here it
comes, there it goes, the 'Gee-Whiz' type. Then there is the kind that makes the Air Force
reader scopes tell lies.

Let's forget these types for now, and go on to the real-thing type of vehicle which is
not a UFO, flying saucer, or such. The real name is just plain Skycraft, though the
correct name is SkyPreu, meaning they are net airborne, or held in the air on a layer of
air. They come in two sizes, The small size is 36 feet and has a 3 man crew, The larger
is 84 feet and has a crew of 13 men, one of which is the Head man. Larger than this is
the Command Skycraft, or Command Carrier, which is that cigar-shaped vehicle sometimes
seen (but not often) and has a crew of 72 mixed tupe people, like us. All 3 types
have the so-named Socorro insignia on both the upper and lower hulls and on both sides
of the carrier. It is made of black metal and is embedded in the metal, not painted on in
red.

The small Skycraft can move from a hover to an air-ground speed of 12,300 MPH in a matter
of seconds, and the 84 foot craft can do the same thing and reach a speed of 18,500 MPH
in those same seconds, as can the Carrier Skycraft. The small Skycraft is a short haul
vehicle only, and stays around patrolling our skies. The 84 foot job can and does go
on out into outer space for any checking up on any foreign vehicles out there and can do
it better than 60,000 MPH if need be. Here and now, I must say that there are some of you
readers who may not buy this fore-going, but I know of a few astronaut-type people who
would if they could, or could i they would...How about it NASA, do you read me????

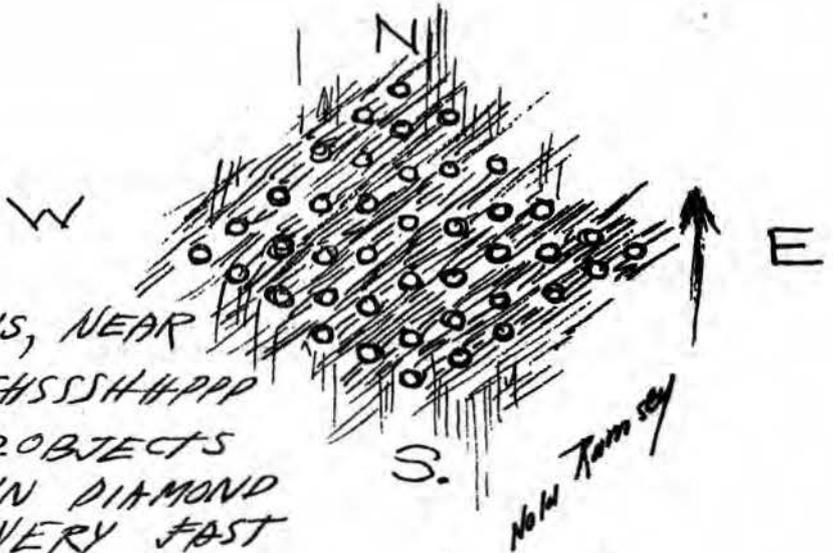

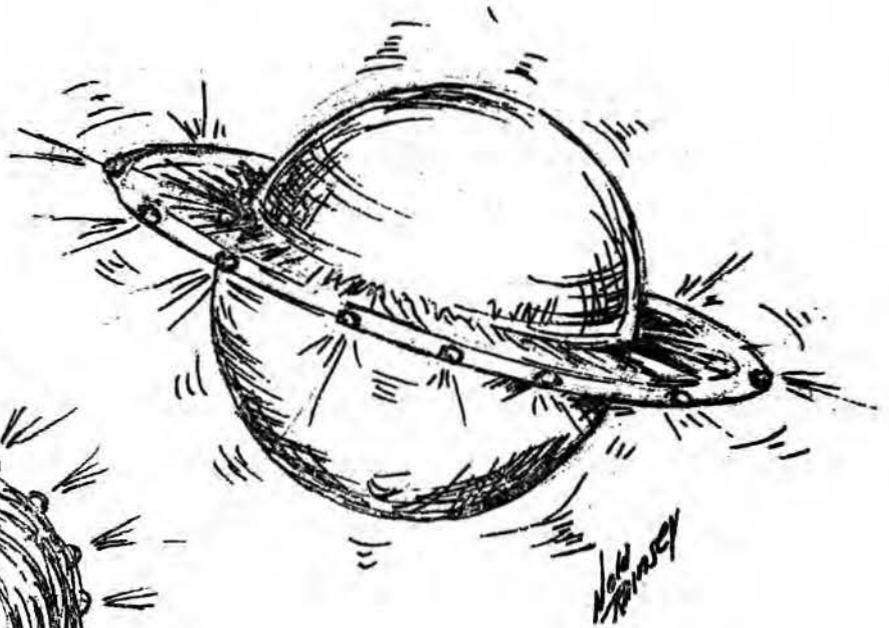

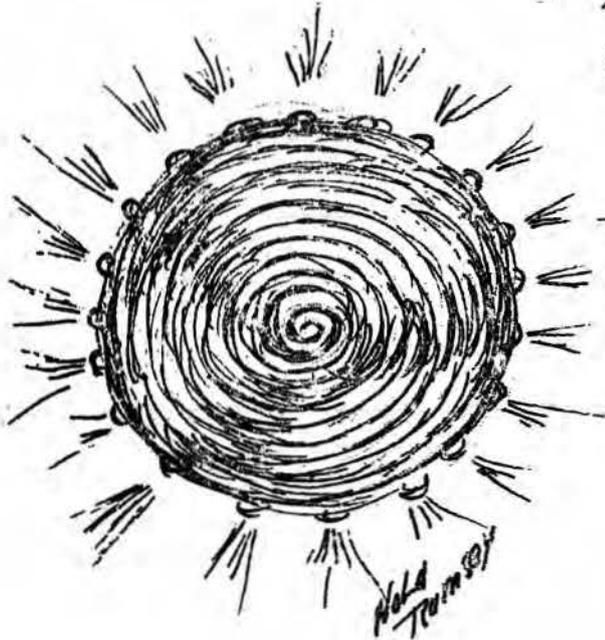

Oh yes, while I am at it, yes I did get to see that seek and destroy operation over
the Mission Control Center, Houston, Texas. That was one beautiful bit of live TV
coverage if i ever saw one. That was just the little ole Sky Patrol in their little
ole Skycraft doing their ghing. That is what they are here for, which is their bag, so
don't knock it. Just be glad that we have those people over head and on the ground wait-
ing for the call to go do the job for us, being as we aren't up to it yet ourselves
And please note that ne spare parts come to Earth. NEAT : Muh? And here I believe it
is necessary to explain to the reader what is in this deal. We have the Good Guys and
the Bad Guys. The Good Guys in a Skycraft, go after and get the Bad Guys, who use a

vehicle-shaped-like-an-elm-timber top, which is spun with a string. It is triangle-shaped and moves with the point down when near Earth, but at higher elevations it moves forward with the larger, or top end, tilted in the direction of flight. They may be found anywhere, and have been sighted all over the western states at one time or another. The things that crew that vehicle are just that--they are named Things and are First Cousins to the I'haus, which are to be found here in North America and elsewhere and are harmless to both man and beast, we have given them many names..Yeti, Sasquatch, Big-Foot, Smelly etc, but let's leave their abode alone and let them enjoy their peace and quiet while we enjoy our own.

As for that First Cousin, he is something else again, and is the one that we will have deal with from here on out. He is both a body-snatcher and a brain picker, if he gets the chance to do either. So here is where you CN UFOlogist come into the picture and get a little bit of the action. But first, let me say that the Good Guys identify themselves by flashing a series of colored light beams from the rear of their Skycraft. The colors as sent are red-green-maroon, or it will be red-green-white, and either way it is OK for they are using our IIA Color Code for ID, which as road means their Number is 257 or 259 of the Sky Patrol, They will not use the color purple as that is a royal color so they use maroon in its place which means the purple number. OK ?

The name for the Air of the Bad Guys will be DX, like distance unknown, but in this case, will mean DRUX vehicle has been sighted on or near the Earth. Give 20 for the nearest city or town, then the direction by a magnetic azimuth and distance, Aim your beam for the south-west corner mark of the US and request that your message be relayed to this station. The Code Handle here will be 'Control Maroon' and the Call Sign is KBV 1583. King-Baker-Victor-1583. Make the QSL on channel 11, or the frequency of 27.085 and if the traffic is too heavy on this end, I may switch you to a clear channel. Will stand by and monitor 11 for any and all reports on the DX from 1600 hrs, PST week days till ??? On week-ends will be monitoring from the early hrs of 0400 till I think any and all calls for that date are in.

And I might add that at this time, do not, I repeat: DO NOT call in a report of our disc shaped or cigar-shaped Skycraft of the Sky Patrol. As you may have guessed by

OCT. 2 - 11:30 P.M.

LOS ANGELES-VAN NUYS, NEAR AIRPORT. NOISE LIKE SHSHSSHHPPP ABOUT 40 SMALL LIGHTED OBJECTS HIGH IN AIR, FLYING IN DIAMOND FORMATION - TRAVELING VERY FAST ALMOST LIKE BLURS, SOUTH TO NORTH, WOULD VANISH THEN APPEAR AGAIN SOUTH TO NORTH, LIKE MAKING A CIRCLE.

Mrs. D. K. Jones - apt # 68
 6710 Weyburnhurst Ave
 Van Nuys, Calif. 91406

now, --they are our police of the sky. and are of the highest order of same. Officer L Zamorro of Secorro, N-H take note... Any other police- gus might sight the Skycraft Patro and arent too winded to talk, may call the craft on your radio, but 15 seconds are required before a reply can be given to your call. Wait for it, as it will be well worth the time. To any pilots in the group, both military and divilian, you may call them on your radie also. The frequency is 6.6 or 2.59 but observe the 15 second delay. Also for the guys in the group that make like birds, I warn you all here and now, don't ever attempt to pass between any Skycraft and the ground, of you will become unglued at the seams. Get what I mean? Ok

Now, for all those CB UFOlogist who may have wanted to form the CB net,, you now have it. So dust off the Hammer and make use of it. 73's to all and 39's am going 10-7. but will remain 10-8 on the air-waves.

Off and Clear
