BOOK REVIEW:

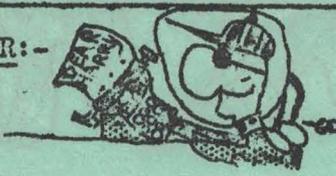

A friend, of mine, Beverley Houle, has just compled a book on a new aspect of religion, titled "Your Own Hind Wheels". This unusual title comes from a tale told by the late orator Rufus Jones. A man, it seems, was traveling through Maine in an old fashioned four wheeled carriage. At one point he stopped and asked a man the following; "I have been driving up this hill for two hours. When doesit end ?". To which the man replied, "Mister, there ain't no hill there. You just lost off your own hind wheels."

And thus, Beverlee's concept is that man has made it overly difficult for himself to understand God. In YOUR OWN HIND WHEELS, she sets down a way we can simplify the complicated thing religion has become, and live comfortably with God and ourselves. Thoughthe writing ks sometimes unprofessional, the basic religious conviction is lucid. The book might easily be used in worship by any of the worlds major religions. Stressing the inherent simplicity in belief in God, Beverlee guides the reader past belief in acceptance and repentance. She insists, logically, that God loves the people on earth as his own children, and that each carries his spirit inside. Acceptance of God as the true father, she says, leads one to accept prayer as merely a means of conversation with him. Though your President is far from religious, I recomend Mrs. Houles book to anyone who is serious about studying new aspects of religion. "Your Own Hind Wheels" is available for \$1.00 a copy, is paper-bound, neatly printed with italics and heads, and may be ordered from Mrs. Houle at Box 3176, Pomona, California. Mention that you read of her book in this magazine. And yes, I have made arrangements to purchase several copies for your convenience in our own library, but this will take some time, so why not order the book from Mrs. Houle now, without delay.

BEVERLEE HOULE.....

LETTERS TO THE EDITOR:-

(Lettersto the Editor, continued.....)

Dear Harry:

The article you wrote and sent me for the UFO SIGHTER so impressed me that I have written an answer to it and included it in the same issue. Watch for it.

Best of everything;
AL GREENFIELD
R.O.A.P.

My chief purpose in writing at this time, however, as I said, is to wish you a Merry,Christmas, and a Happy, New Year. How is your book coming along ?

As Ever;

Fletcher

PS:

Dear Harry:

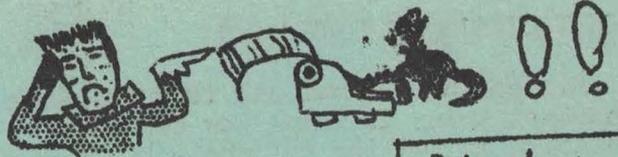

Just a note to wish you a very, very Merry Christmas and a Happy New Year, and to pass on a bit of news. Dave Jones, of Cheltham, Gloucestershire, England, wants me to get as much publicity for this as I can, so, I'm going to tell you, to. Britain has finally come o getting a centrally located bureau to collect, coordinate and investigate any report from any UFO investigative society in the British Isles and this is something we aught to have in the U.S.A. The new organization is the British U.F.O. Association, G.N.P. Stephenson Secretary, 12 Dorset Road, Gheam, Sutton, England.

(I understand there is a little place in Southern California where thereare more reports of UFO landin's, than anywhere else in the U.S. Could you ask your readers about this ?)

ADDRESS ANY LETTERS TO HARRY R. SIEBERT
EDITOR THE HAWK RESEARCHER, DEPARTMENT
C-11 , 1457 KENWOOD DRIVE, POMONA, CALI-
-FORNIA, UNITED STATES OF AMERICA.
IF ANY OPINIONS ARE EXPRESSED HERETHEY
ARE THOSE OF THE WRITER AND ARE NOT TO
BE CONSTRUED AS THOSE OF THE HAWK RE-
SEARCH SOCIETY OR ANY OF ITS STAFF OR
MEMBERS..... I. I.

EDITORIAL

Good Lord ! Satan just won't keep his paws out of anything at all ! For those of you who missed the last issue, Satan is my new black kitten. I've trained him to walk around on the table while I type. No more will I teach ! He sticks his paw into the keys, rakes stencils in patterns like the one on the right of this page, and generally makes me make typing errors, drawing errors, etc. Now he is chewing on the tab bar and there it went ! Well, I'm going to set him down on the floor now and get back to business.

I have set the editorial this issue on the second page because I believe the article on Beverlee Houles book to be more important . I have just a few things to say this issue. One, thanks for all the Christmas cards you sent me. Two, I would like to introduce to you Paul Grace, a friend of mine, who will be helping me with the issues now and then and maybe writing a few articles, as well.

Three, I think the drawings and overall interior of this issue is good. I have had many letters agreeing. What do you think ? Well, Satan is hissing at me from the floor, and wants to come up again. Oops ! There he goes with the tab bar again !

The Mystery of the CONTACTEE! BY REV. FRANK B. STRANGES
(ABRIDGED BY THE EDITOR TO SAVE SPACE) (Credit: R.O.A.P.)

For many years, our skies have been filled with a very strange phenomenon. This phenomenon has been termed "flying saucers", flying objects, UFO's, and a few other choice expressions. Though the Military has violently attempted to deny the existence of these objects, they still seem to make their way mysteriously across the skies. After fifteen years of research in this field, I have come to the conclusion that UFO do in fact exist, and shall continue to exist long after their mission has been revealed. It may interest the readers that reports have come in from all over the world concerning UFO's. Some of them viewed in formation, while others singly. Many men and women of character and renown have gone on record and have made public statements. Among these are: Henry J. Taylor, Capt. Ed Rickenbacker, Lord Dowding, R.A.F., Bob Adickes, Captain T.W.A., and a host of others. While reporting the facts to congregations and lecture audiences across this nation and Canada, I was very interested in learning that the list of men and women who have seen UFO's is getting longer and longer. People from all over the world are interested in the promotion of Truth. It seems that the officials in Washington are afraid we will panic, and are therefore doing our thinking for us. Along with the flying saucer mystery, we are faced with still another mystery. That being the mystery of the contactee. Are they all "nuts" ? Are they all "fortune hunters" Are they all "liars" ? Are they all rank "publicity seekers", or are there a few honest to God men and women who really DID have an experience ???

As we carefully remember that even a "ball" has two sides the outside and the inside, we must not be too hasty in condemning the contactee. In jurisprudence, an attorney is cautioned against "quick action" until he KNOWS all the facts are in.

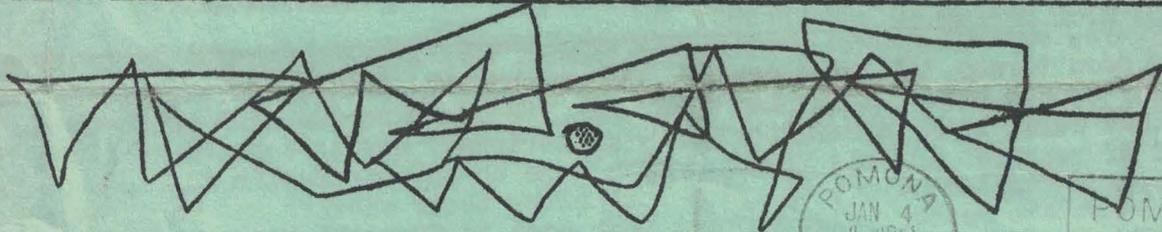

Then.... and only then.... can proper disposition be accomplished. For example, a sailor reported seeing a UFO in a juxtaterrestrial area off the coast of Florida. He stated that this bell-type Ufo rose out of the water to a height of about 1,000 feet, turned, and dove back into the water. Within the following week, several United States planes vanished from sight over that very same area. Those who had been ready to commit the sailor were not just as ready to apologize--tounge in cheek. Someone stated in this publication that no two Contactees were able to agree. Some said the space people were blue, green, small, large, etc. Please bear in mind just what a 'space visitor' would report if he were to land in the Evarghades. He would be in contact with half naked Indians. In the regions of Afrika, & dark skinned man, some 7 feet tall, some 3 feet tall, depending on the region. Maybe on other planets beings differ just as we do as to region. Therefore, it is reasonable to assume that the space people who did contact people

("CONTACTEE'S" CONTINUED...)

of this earth were not all from the same region, possibly not the same planets. The important thing is this: How can a person determine whether or not the individual Contactee is telling the whole truth???? From personal experience, I have noted that Forces come into play to discredit the contactee, before he has a chance to properly defend his experience. I have had Military Men come into our California office who have stood with tears in their eyes... relaying to us the facts behind a personal encounter with a being from another planet. Gryxt, jt (DAMMIT, SATAN! -ED)

Yet, because of the ridicule of the Press and other media of advertising, they keep mum except on rare occasions. In my book MY FRIEND FROM BEYOND EARTH, which has circled the globe and has been printed in several languages, I have carefully but hurriedly put in print what the Military warned me in Washington would cause me to lose my reputation. The experience was one certainly never to be forgotten. He claimed to be from the planet Venus. He looked and acted like a normal human being. As a Minister I thought that to repeat what had happened between a man from space and I would be rejected. And I didn't until they told me not to. In reality, time will tell all things. Truth will win out. No matter who is attempting to "cover-up". The false prophet will fall by the wayside. He will trip over his own lie. The true contactee will be vindicated. To condemn everyone who has ever claimed to be a contactee, will also discourage others who may have had a true contact. There are certainly many people in high places interested in contacts. Several congressmen have already written or wired me on my experience. I have also voluntarily submitted to a lie detector test. It came out positive. Perhaps, at a later date, I will be again permitted to write in this fine magazine dedicated to truth. Please address question to me, c/o Truth, P.O. Box 252, Venice, California. Thank you!
