Saucer Reports

EDITORIAL by Harry Siebert

THIS editorial is short. This issue of the newsletter is longer than usual. The Photo page won't seem to make much sense at first, but it is depicting the many phases of Saucer Research. I have one thing to ask of you, since all of you are interested in Saucers. Many of you are not members of the greatest organization ever formed for investigation of UFO's. I speak of NICAP. The National Investigations Committee on Aerial Phenomena is having serious financial difficulties. I believe that if NICAP were to go under, so would Saucer Researchers all over the world. I cannot ask you to contribute to an organization if you know little about it, but I can ask you to join it. I did. The address is 1536 Connecticut Avenue, Washington 6, D.C. The dues for one year are \$5.00. Hawk Research Society cannot contribute financial support due to it's own problems, and it's responsibilities to it's members; but if you are not already a member, I strongly suggest that you become one.

I have been searching for someone to take over the editing and publishing of this newsletter. Dr. Milton Kalman has offered his help, and we hope that he will be able to do

this, as we know he would do an excellent job. I will still write a brief column to keep members up-to-date on the H.R.S.'s club activities, and to send out any special bulletins. Further developments may be reported to you via a special bulletin.

— H.

UFO's: TIME MACHINES?

by Mary Christzberg

(I don't know if this will ever be published, but I've figured out a theory about Flying Saucers which no-one else (that I know of) seems to have thought of. Now I wonder if anyone else might share my opinion)

Mary Christzberg, 708 East 8th St., Tifton, Georgia

I've met people with all sorts of ideas pertaining to Flying Saucers. Some think they are ordinary objects such as planes, satellites, birds, meteors, weather balloons, etc. Others maintain they are hallucinations, machines from the earth's interior or from the ocean, craft from Outer Space, the Air Force's Space Ships, or even gelatinous flying creatures capable of changing size and color.

For a long time I've felt that there are many TYPES of Flying Saucers coming from various places; that most of the above mentioned could be partially true. But now I have a new idea as to where at least a small percent of Saucers come from. I believe that SOME Flying Saucers are actually Time Machines containing people from the future. Before you laugh, I feel that my theory explains a few things which haven't been too well explained

by some of the other methods. For example: Why do the Saucers appear and disappear before a person's eyes? If they are Time Machines, they could be appearing from their period of time into ours and disappearing back into their own period.

If some of these so called "Outer Space" people are from the future, this could explain why there are so sure of certain predictions, like stating we won't have a war with Russia. It doesn't seem to me that a person from Outer Space could be so certain of such happenings, but a person from the Future could. If we know much about history ~~such happenings~~ and went back, somehow, to the 16th century, wouldn't we be able to make accurate predictions?

This theory isn't quite as fantastic as it sounds. Take, for instance, some of these "Space People" who claim to be 2 or 3 hundred years old, while looking youthful. Rather than to believe they live so long, it seems more logical to me to presume this: If one of these Space Men claims to be 300 years old, maybe he is WHEN HE IS VISITING OUR PERIOD OF TIME -- 1962. If he lives in the year 2262, and is 20 years old in his own period of time, then came back 300 years to our time -- that would make him 320 years old in 1962, even though he is a young man. Do you understand what I'm trying to say? If this same man traveled back to 1762 he would be 520 years old in that particular era.

Space Ships were also seen in olden days. To me it seems logical that people from the future would want to visit people of all different ages in the past -- from the pre-historic days on up. Wouldn't we do the same if we had a Time Machine?

This theory about Flying Saucers being Time Machines might also help explain why these "Space People" are so extremely advanced. If people of the year 1662 could see us they'd think we are pretty amazing too. It isn't really so strange to think of Time Machines 300 years from now. After all, if someone told a person 300 years ago of our inventions, think how he would react! He would probably think our airplanes are flying, roaring monsters and that our washing machines are workings of the devil. A car or train would be a weird monster to him, and our flash camera a dread weapon. Most likely he would think our television, radios, and record players have miniature people in them and that our electric lights and water faucets are witchcraft. So our so-called ordinary things of life would appear too wild to believe to this person of the past, even more awesome than for us to believe in Time Machines 300 years from now.

This theory could also explain the Air Force secrecy. (Can you imagine some people's reactions if they thought we were being visited by men and women from the future?)

Maybe one reason why no contactee has seen an old Space man or woman is this: couldn't it be that nations of the future use young people to take these trips in time since their nerves, stamina, etc. is better? After all, we use young, strong people for pilots and astronauts -- only people who are in excellent physical and mental condition. Why wouldn't our friends from the Future do the same? I don't believe these people from the Future who have been contacted resemble the so-called average person of their period of time any more than our astronauts resemble the average man on the street at the present time.

I'm not saying that ALL FLYING SAUCERS ARE TIME MACHINES. I still believe there are many types of UFO's coming from different places, but I do believe there is at least a small per cent which may be TIME MACHINES FROM THE FUTURE!

by Mary Chrietzberg

WHAT WERE THEY?

by Victor Shaffer

One evening last week while driving in my car, I spotted two unusual and strange looking ~~unblinking~~ lights in the night sky. One was all yellow but of a brighter

color than any of the stars; the other appeared to be a red colored light with two smaller yellow lights on each side.

I drove off the road and parked my car. After watching these lights in the sky for several moments, one suddenly began to move upward and away from the other, and toward my car, but remaining high in the sky. The other also began moving in my direction and after the other light.

As they came nearere, I saw that the underside of both had several bright lights on them. They were in the form of a cross. They were bright enough to show that each seemed to have wings like an airplane. Both had a loud noise similar to that of a single notor airplane but a stronger, more powerful sound. Neither showed any visible regular aircraft warning lights as a plane usually shows at night. Both were over the front of my car and made a long curve around back and were gone from sight. I last saw them going in a generally East to Northeast direction.

I am inclined to believe that they were not regular aircraft. Both were as large as a passenger airplane. I think they were two UFO's that were waiting notionless in the sky either just watching something or waiting for someone or something in particular. I think I would like to see them again at a closer distance!

By Victor Shaffer April 12, 1962

RESULTS OF BOARD ELECTION

The election of our board of advisors was both a success and a failure, as seven members failed to vote. The majority voted, but we sincerely hope the other seven will next time.

Nominated and accepted on the Board of Advisors were: James W. Moseley, Brinsley Le Poer Trench, and Gray Barker. Ray Palmer has not agreed nor declined being our Chairman of the Board of Advisors.

We are always open for nominations for the Board of Advisors as there may be as many on it as the members wish. Hawk Research Society now has a Board of Advisors 2nd only to NICAP.

— Dave Thomas

PLAN FOR E. S. P. TESTING

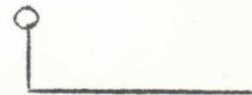

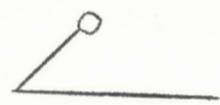

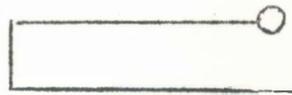

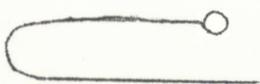

Dr. Milton M. Kalman has an interesting plan for finding the degree of E.S.P. in our group. This involves determining the strength and quality of precognition, mind-reading, telekinesis (mind over matter) and other forms of telepathy. If you are interested in participating in his experiments, write him for details at 6276 Valley Circle Blvd., Canoga Park, California. Dr. Kalman is on our Board of Advisors.

SPECIAL ANNOUNCEMENT

I have selected THE REALITY OF UFO'S by Ed. Babcock, director of NJAAP to be used as an introduction to my book. This will eliminate the need for a cumbersome review of UFO history. Also included in my book will probably be PHYSICAL PROOF OF UFO'S by Allen Greenfield; BACK A BIT IN TIME by Fletcher King; AN OPEN REPLY TO DR. DAVIDSON by Brinsley Le Poer Trench; AN OPEN LETTER TO SAUCER RESEARCHERS by Leon Davidson; MARS AND THE SAUCER CYCLE by Lonzo Dove; A REPORTERS REPORT by Ivan T. Saunderson; and ~~MARS AND THE SAUCER CYCLE~~ SAUCERS AND FACISM by James W. Moseley. Each of these, and many others, have consented to form a 2nd part of my book that will, for the first time, present the true controversy about UFO's. Those of you who have

already read those articles will doubtless enjoy the first half of the book which is truly original, and contains some of the experiences as co-incidental as the occurrence I mentioned in my R.O.A.P. article "Did I meet people from Space?" Some of the book is humorous, some serious, some startling.....all interesting. The book will be finished and prepared for publishing by the end of this summer. I invite anyone who has an interesting article or photo to submit it. Since all articles in mimeographed newsletters or non-copyrighted publications are "Open Letters", I can make no payment. To every contributor will go an autographed copy of the book.

<p>INTERNATIONAL PARANORMAL BULLETIN</p> <p>This magazine is published quarterly by the Netherland Study Group for Ufology. Recommended to serious researchers, this bulletin deals in all forms of UFO and Fortean phenomena. \$1.00 a year. Address: A.F. Van Weiringen, Doox 1524, Amsterdam, Holland. Mr Weiringen also offers some tremendous discounts of occult and UFO books.</p> <p>(Advertisement)</p>		
		
<p><u>ARE UFO MANEUVERS INTELLIGENT?</u></p> <p>by Allen Greenfield, Director of R.O.A.P. and the UFO Information Exchange Alliance. (reprinted from ROAP Bulletin)</p>		 <p>- Warner</p>

The answer to the balloon and natural phenomenon theory on UFO's may lie in the fact that the reported and filmed maneuvers of the UFO's are simply too intelligent-appearing to be such "blind" phenomena as those mentioned above. (not reprinted)

There are seventeen basic maneuvers that have been attributed to the UFO's, six of which appear on this issues cover. (see above right drawings). Do they appear intelligent? If only one such maneuver is noted the intelligence of any of these is debatable. However, in many instances, UFO's have been observed to vary their speed and direction, as an intelligently controlled craft would be expected to do.

Some UFO maneuvers have appeared to be "fantastic" feats of maneuverability, such as a UFO moving at a high speed abruptly making a ninety degree turn. This would seem to indicate not only an intelligent maneuver, but a maneuver initiated by an intelligence of a very high order. In fact, an intelligence of technological superiority to anything on earth.

The meteor explanation seems to be brought into effect in the case of UFO's moving in a straight line at a great speed. However, this is not necessarily proof that such a course would indicate a meteor. It is true in a majority of cases, objects of intense brightness and rapid speed following a straight path would be only a meteor streaking into our atmospheric layer above the earth. But we must be careful not to write off such reports as meteors without first checking the trajectory of the object. If the plane of the object was extremely flat, the object might be a UFO, although it should be noted that it is not entirely impossible for a meteor to travel (or appear to travel) on a flat plane.

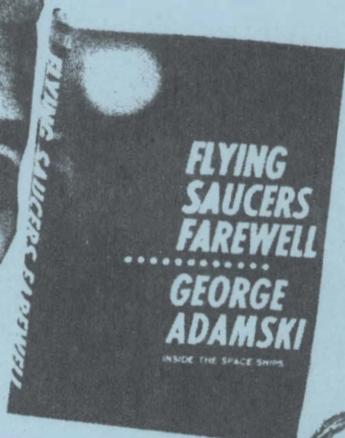

The Maneuvers of the UFO's will probably prove to be a vital part of the proof that the UFO's are intelligently controlled. Careful studies of this subject must be made if we are to capitalize on this point in our fight for recognition of UFO reality.
