

THE KALAMAZOO FLYING SAUCER STUDY CLUB BULLETIN NO. 14 - DECEMBER 1957

FLYING SAUCERS - THE ADVENT OF LIGHT

By Don Vysocki

(Reprinted from THE VISITOR Oct. - Nov. 1956)

The Flying Saucers and their distinct meaning and effect upon all facets of modern living seem to indicate just that: the advent of light, of knowledge, of "growing up", of intellectual and moral maturity. It is causing people to think where many others efforts have previously failed. The study of Flying Saucers, their physical construction, their propulsion, flight pattern...and their apparent illlusiveness...no matter how seriously acrutinized, analyzed, predicted...does not supply us with answers to the many perplexing questions concerning the purposes of their coming, or explain the mysteries of their origin. Yet, can any thinking man or woman any longer dispute the mass of evidence of their world-wide appearance?

No startling new idea or fact of being can ever be fully comprehended through an emotional, irrational approach. Such an avenue can only lead to frustrating conclusions and end in final disgust when answers come all too slowly, or certain developments carrying a "personal" message fail to appear.

Let's analyze the "will-to-believe" on the part of individuals and groups of individuals in so many parts of the world,—that ready acceptance of the presence of extra-terrestials in our atmosphere... even of contacts with these beings from outer space.

The acceptance of the belief in life existing in other areas of the universe is not an academic question...one to be discussed pro and con like all a part of an oratorical sport. We are confronted with that belief because we have reached that stage of human evolution or progress. Technically, scientifically, we have reached, literally, the "frontiers of space". The age of Marco Polo and Columbus ...the era of the Coniston Wagon and the Wild West has long ended. Man has pushed to the farthest, most remote areas of the globe. He is now turning his eyes to an even greater area of exploration and adventure...outer space. Granted that life, highly evolved life, exists on other planets, other systems, other galaxies, or even higher dimensions of time and space,—a more vital concern for this little planet would seem rather appropriate at this time. We have grown out of the stages of bone-flint weapons and match-stick warfare. Our scientists are dabbling with energies and forces which dazzle the imagination; forces and energies we have not yet applied to moral and civilized control. Where man has leaped to astounding heights of scientific, technological achievements, he has lagged sadly behind in moral, spiritual growth. Would we trust the Australian Aborgines with nuclear wepons? Even the need for weapons and defense introduces an embarrassing question or realization. We have not yet reached the civilized state of trust of our fellow-beings. Why do city dwellers bolt their doors at night, while the farmer and small-town folk sleep contentedly with no apprehension whatsoever with their homes left as open as the wide outdoors? A homely example, but one that aptly measures our degree of development in human trust and honesty. Perverted ideas of human might still persist. We now view the outer universe with the thought of "conquering space". Presupposing that we have been under surveillanve by extra terrestials thru the ages, our progress checked and recorded, their concern over our attempts at space travel at this particular time would be quite natural and their fears quite justified. Our compliance with certain standards of moral law would be in logical demand.

The appearance of Flying Saucers is synonymous with our growth and evolution. Thru the hardknocks of life, thru pain of bitter but enlightening experiences, we are now exposed to illimitable horizons. Philosophy of life is now extending from man's relation to man and the immediate world around him, to man's relation to himself and the universe. What other greater testimonial to the all-governing law of cause and effect, than the coming of the saucers at this particular time in human history?!

We have been grubbing in the sand, while about and beyond us expands a universe teeming with life and wonderment... of poetic heights. We have been restricted to the hard school of experience until that time when we can emerge as sane, rational, feeling creatures of the Creator's university of learning. We are faced with this reviving reality; a re-appraisal of our destiny, of our basic purpose of being, of the very meaning of life and natural progress... of the interdependence of man's actions or behaviour toward man. Physically, the world beyond our island of activity may be but an extension of the world we know. However, coming as a result of this greater exploration, we would gain an expansion of concepts, through such discoveries, -grasp more fully the direction of the spiral of human growth toward its destined fulfillment.

In this sense, the "study" of Flying Saucers is more than a curious diversion, an enigma of flight characteristics, Baffling to all standard ideas of aeronautics and gravitational law. It becomes a study of life itself, of inner reflection, an awakening sign a rallying point for receptive minds toward a higher philosophy of life and a transition to an entirely new era of conscious development. -D.F.

POLICY ON TAPE RECORDERS

Speakers or audience cannot give their best when they know a tape recorder is taking down every word they say and may be used as evidence against them. Portions of tape can be eliminated and only choice words be used to distort and as factual evidence against the speaker. Words once recorded cannot be explained in self defense. You cannot ask questions of a tape recorder for clarification.

The board of directors has decided on a policy of having no tape recorders present in the meeting room except for planned programs especially for recording or for playing. Said recorders when present must be placed in such a position as to be in full view of the speaker and audience so that the tape reels are visible. People of prominence fear being quoted on tape for fear of their positions and status in society. This is not for secretive purposes because you still have the opportunity to be present at the meetings. Of course this does not apply to a public prepared speech with the speakers permission. This policy has been followed by the Michigan Flying Saucer Federation at its board meetings and other clubs with experience.

All are welcome at our meetings who come with an open mind and a willingness to cooperate in the search for truth. Our organization does not require membership nor for a person to sign his name for any purpose at any time excepting to the secretary for the purpose of being placed on the Bulletin mailing list. This list is confidential. It is secretive only in that we respect the individuals preference.

The Kalamazoo Flying Saucer Study Club is a member of the Michigan Flying Saucer Federation. The MFSF does not necessarily or officially endorse the views or policies herein stated.

NEW BOOKS

The following publications are listed here for information only and are not necessarily endorsed by the KFSSC BULLETIN.

FLYING SAUCER PILGRIMAGE, by Bryant & Helen Reeve. Here is the book, containing 304 pages of the complete adventures of Bryant and Helen Reeve in their 23,000 mile trek across North America to visit and try to understand all those famous people who have contacted flying saucers. Sixteen pages of pictures! Meet them all, face to face--Williamson, Bethurum, Adamski, Fry, Angelucci, Leslie, and others. See them in their own homes, herethe intimate details of their experiences, judge for yourself their sincerity.

As a result of their contacts, the authors of this sensational book have, as a natural outgrowth of their personal sources of information and observation, arrived at some startling conclusions, and a startling theory. You will want to know what they think, no matter whether or not it agrees or disagrees with some of the opinions of others. Fully 50% of this book is devoted to a sharp analysis, and the result is a positive conclusion that flying saucers are more than just interplanetary vehicles. WHY are they here? WHO are they? WHAT can we expect from them in the future? Read the Reeves' amazing answers to these questions. AMHERST PRESS, Amherst, Wis. \$3.50

(A book review is planned for our next regular meeting.)

THEY RODE IN SPACE SHIPS, by Gavin Gibbons. Just published in England, this volume is a scientific report and substantiation of the separate (yet amazingly similar) experiences of two Americans who have actually ridden in space ships!

Read for yourself the carefully reported story of rocket scientist Daniel Fry -- who walked out of the research station at White Sands into a ship from another world! Read why technician Fry was selected to be the first to see the astounding scientific features of the iridescent star ship.

Read the incredible scientific data given by Fry by Aylan -- the man from outer space! Then cross-check Fry's account by the independent story of Truman Bethurum's encounter with a 300 foot disc-like space ship -- his fascinating trip into the interior of the great ship and his dramatic meeting with the ship's captain; a young and charming woman!

As you read page after page of these sworn, detailed accounts, a whole new concept of man and the universe will arise before your eyes and at the same time, dozens of scientific concepts at present only partly understood suddenly become crystal clear -- and the real meaning of gravitational force, the 'why' of space curvature, and the real facts about Earth satellites. All these now fall into place in a master scheme of breath-taking scope. THE CITADEL PRESS, Dept. H, 222 4th Ave., New York 3, N. Y. - \$3.50.

TEN YEAR HISTORY of flying saucers, by John McCoy, 16 pages, 10¢. Available at meetings or write UFO, 2233 Cambridge Drive, Kalamazoo.

THE EXPANDING CASE FOR THE UFO, by M. K. Jessup. Mr. Jessup sweeps aside many of the most stubbornly-held tenets of conventional science. The author of the pioneering THE CASE FOR THE UFO and the authoritative UFO ANNUAL draws on a wealth of fresh evidence from the fields of meteorology, archaeology and astronomy to expand his case for the existence of extra-terrestrial "beings!"

Is our moon really a dead planet, devoid of any kind of life? Certainly not, says M. K. Jessup, and he cites observations by skilled astronomers over a period of more than 300 years to prove it.

Has a space satellite already been launched from Mars? Read the startling answer from a man who only a few years ago was ridiculed for talking about the launching of an "earth satellite."

Can the moon be a base for UFO activity? M. K. Jessup offers impressive evidence in the affirmative.

What mysterious force lifted into place the 2,000-ton solid stone roof of the Black Pagoda of India? M. K. Jessup's answer may provide the "missing link" to a final solution of the centuries-old UFO riddle.

THE CASE FOR THE UFO, M. K. Jessup's first book, opened a cosmic Pandora's box! Suddenly we come face to face with an overwhelming mass of observational data pointing to one incontrovertible fact; SPACE LIFE EXISTS. Now in THE EXPANDING CASE FOR THE UFO, Mr. Jessup presents an elaboration and extension of his original findings in a serious challenge to current scientific dogma. - The Citadel Press, Dept. E-11, 222 Fourth Ave., New York 3, N. Y. \$3.50

LIVE THROUGH OR DIE IN THE GREAT FLOOD, by Adam D. Barber. Coming soon, a shift of the axis of the Earth as a result of the gyroscopic action of our solar system. A similar shift, thousands of years ago, caused the ice ages, and the oceans to rush over the land at terrific speed, tearing mountains away and covering tropical forests (which are now our coal fields) with hundreds of feet of earth.

Read and heed the amazing book "THE COMING DISASTER" (60 pages) telling what the flood will be like, about when it will come, the warning to be had, and containing the astronomic, gyroscopic, mathematical and geological proofs, written plainly. These proofs are indisputable and all who have seen mechanical demonstrations leave convinced that the book is correct.

This is not religious prediction, but is purely SCIENTIFIC. However, the Bible predicts it. Isaiah 13:13, "Therefore I shall shake the heavens and the earth shall remove out of her place, 24:20, "The earth shall reel to and fro like a drunkard." See also Amos 8:9; 8:8; Haggai 2:6; Isaiah 10:26; 19:5; 28:17; 44:3; 24:20.

"I freely take an oath that God strike me dead this very moment if there is any substantial error in this book-Adam D. Barber, author.

Read in this book (1) a letter from the Nobel (prize) Foundation referring it to their physics committee; (2) the report of an analytical laboratory confirming it; (3) many newspaper clippings, letter from the Civil Defense Corps of Ohio, letters from astronomers and others pertaining to it; (4) about 25 "run of the mill" fan letters from readers of it; (5) our efforts to date to save civilization through this flood and our latest plans for it, including pressure on Congress to build balloons and boats; (6) our plan to prevent the flood by diverting the axis of the earth with atomic jets.

We need your support and your money to bring this program of saving the world to a successful conclusion.

Eclipses are foretold with accuracy many years in advance. The prediction of the shift is along similar lines, only more complicated. On Dec. 21, 1956 the sun rose in the wrong place, indicating a fore-runner & light shift.

A large company having work on the artificial satellite program bought 50 of these books for their gyro engineering department. The calculations in the book are applicable also to the satellite.

Thousands of copies of the book have been sold and the rate of sales is increasing.

We would be in jail if there was anything wrong with or in error in this book.

Reports are that the south pole is now 600 miles off its nest and that the polar expedition scientists are disagreeing as to the cause. The chief, Dr. Paul Siple has this book and I conferred with him several times about the matter before he left.

Dr. Frampwich-Gospatt, the noted English Scientist writes he has come to the same conclusion as we have about the shift and he is now spreading the word in England.

An astronomer in Georgia has just written us; "Your mathematics intrigues me and I am amazed at many of the relationships you have shown to exist in our solar system. I say again your compilation is the most amazing inter-locking pile of figures I ever saw and I am well acquainted with college mathematics and astronomy." Send remittance to: BARBER SCIENTIFIC FOUNDATION, P.O. Box 3254, Washington 10, D.C., 1 copy \$1.00; 3 copies \$1.50.

SIGHT "FIERY BALL"

Another mysterious object was reportedly sighted last night by two men driving north of St. Joseph on US-31.

Joe Davidson, 493 North State Street, St. Joseph, and his brother Ted, 2216 Crawford Drive, called "The News-Palladium" last night to report they had seen a "fiery ball, about two, feet in diameter, rising up and out of the highway."

Ted Davidson said that at first the ball seemed to be a large ball of snow but, as it got closer, he saw that it had an eerie orange-yellow glow to it.

"I circled it twice to make sure it wasn't headlights," he said. "Then I was it was about two feet across and seemed to be coming right up out of the concrete."

He said he kept driving down US-31 into Benton Harbor and then, on his way back, saw another similar but larger object at another spot on the highway.

Mrs. Lorraine Burks, 493 North State Street, St. Joseph, said she remembered seeing a similar object about 10 years ago while driving toward Euclid Center.

"When those men told me about this object, I knew what they were talking about because I'd seen the same thing in about 1947," she said.

(News-Palladium, Benton Harbor, Michigan Saturday, November 9, '57)

REPORT ON OUR LIBRARY

The following is a list of books in our small, but growing library:

1. THE UFO ANNUAL--M. K. Jessup
2. THE INEXPLICABLE SKY--Arthur Constance
3. FLYING SAUCER, FACT OR FICTION?--Max Miller
4. MY FIRST 10 MILLION SPONSORS--Frank Edwards
5. INSIDE THE SPACE SHIPS--Adamsky
6. ABOARD A FLYING SAUCER--Truman Bethurum

Two of the above have been bought through the general fund, two donated and two loaned. Do you have any old books (new to those who haven't read about flying saucers) that you care to sell, loan or donate (also periodicals). We are badly lacking in this respect and need periodicals for up-to-date news. We do have a few, but not enough, worth listing. Remember, it's your library for you to use. Any help toward making it a better one is welcome.

URGENT

We wish to bring to you a reference Bulletin worthy of your reading time, but your help is urgently needed. Since our appeal for help last month, some volunteers have come forth, however, a more complete staff is still needed. No special talent necessary; just an earnest desire to help is the prime requisite. Call FI4-8679, Editor Bill Maier. Another small item is MONEY. We do not need large sums but a little will go a long way. Any suggestions for raising some will be appreciated.

MAILING LIST TO BE REVISED

With the coming of the new year, we plan to bring the mailing list up to date. If you wish to continue receiving the BULLETIN, please mail the coupon below to the secretary; Rae Simbulan, 2233 Cambridge Drive, Kalamazoo, Mich. or turn it in at the next regular meeting.

We have no membership fees nor dues, consequently our income depends entirely on voluntary contributions. There is no charge for the monthly BULLETIN, but any contribution toward the operating cost will be gratefully accepted. It has been estimated that the minimum annual cost per copy of the BULLETIN is \$1.00.

We hope to hear from all of you, as your name may be taken off the mailing list unless you let us know that you want your monthly copy of the BULLETIN.

Tear off on the line above. Your name and address appears on the reverse side. If you do not wish to clip BULLETIN a separate sheet will do.

If contribution enclosed, please check here.

☐

There is no charge for this bulletin and it is solely supported by voluntary contributions and labor. It is sent for the purpose of notification of the next meeting of the group and for bringing you other notes of new developments which you may wish to use for reference. It is mailed to those who request it within driving distance of Kalamazoo who care to attend our meetings. Those who do not attend meetings or show sufficient interest after several months duration will automatically be dropped from the mailing list.

The Bulletin is not for general, national or international distribution nor intended to compete with existing publications, but rather to supplement and further their cause. When we borrow material from other publications, we acknowledge the source and do so that the reader can refer to that publication for more complete information. However it is sent out on an exchange basis with those publications who so desire. E. W. Maier, Editor
