

WHERE THERE'S FIRE ---

Now that ~~the~~ fire has been built- and going on the theory that where there is smoke, there must be some fire - lets keep it lit ! Form your own letter barrage to your state senators and representatives, demanding that they stop the screcy behind the Air Force on the UFO's.

If we keep the fires kindled - and enough smoke appears - it may flame into action by the constant fanning of all of the researchers in the field.

Saucer researchers are saying that the "out" is to speedily abandon secrecy and announce what is already known, 'that this planet earth is not alone' - wa have visitors from space.

If you are the type of individual who is slow at lighting fires we know just the person to help you do it. His name is Major Wayne S. Aho and we have arranged for hom to visit Kalamazoo for a public lecture with slides , on February 28th. He will also appear on DEEDLINE NEWS, WKZO -T V, 5:45 P.M., Friday, February 28th. Tell your friends & Neighbors.

NOTES

An interesting step in the Air Force treatment is its yarn about investigating thousands of cases and finding only 1.9% of them "unexplainable". This statement is said (by the AF) to be based on an extension of Blue Book Special Report.

Table 1A in that Special Report 14 shows that 19.5% of 3201 cases remain unexplained - ten times the figure the Air Force claims in its "extension and summary" of that same report which leaves the Pentagon hoazers dangling in mid-air on their own percentage points.

Now that automobiles and tractors are suffering from the same form of "hallucinations" as people, new alibis are in order - and no doubt forthcoming.

The government has just the man who can dream it up, Prof. Donald H. Menzel. He is paid \$50.00 a day or more to go around to visit our Senators and Representatives to debunk UFO's.

We've heard that the Air Force has approximately 65,000 photos of UFO's on file. Ever tried to get one ?

News on Rinehold Schmidt, the man who said he boarded a saucer in Kearney, Nebraska, next day was put on a nation- wide T V and radio show, then socked in a mental hospital for two weeks! Then Released ! Doctors saw no reason to keep him- now he's sueing-- Watch for further developements.

Just a reminder; Our regular meetings are held on the fourth Friday of the month, board of directors meetings are held on the Tuesday following a regular meeting unless other- wise arranged.

"Washington Hides The Truth About Flying Saucers
CAN YOU TAKE IT? HERE IT IS !

Uncle Sam KNOWS They Come From OUTER SPACE"

By Bob Lichello

A gigantic cloak of secrecy has been thrown over the universe by the United States Government!

No one must know, no one must be told the frightening truth about flying saucers.

From the Pentagon to the Air Force, the shocking facts are stamped TOP SECRET!

Right now, a Senate Committee possesses confidential documents turned over by a private organization. Although these documents concern the safety of you and your family--the Committee has FAILED TO ACT!

Because its members KNOW what will happen if the public learns the truth!

PANIC!

A CRISIS IN WALL STREET!

AN UPROAR BY ORGANIZED RELIGION!

Everybody knows what happened when one of the foremost authorities on flying saucers attempted to reveal an important piece of information on a national TV program.

HE WAS CUT OFF THE AIR!

For the spine-chilling truth is this:

THE AIR FORCE KNOWS THAT FLYING SAUCERS ARE REAL AND INTER* PLANETARY

"The Air Force has already held secret conferences with high government agencies on the matter. Something is being kept from the public--something the American people have a right to know!

Maj. Keyhoe himself tried to tell them on the Jan. 22 Armstrong Circle Theater program, "UFO: Enigma of the Skies."

Viewers heard him say, "Now I'll tell you something you haven't heard before--" At this point the sound went off.

Protests deluged the CBS network and prompted Robert E. Costello, the show's producer, to say he had ordered Keyhoe's microphone silenced because the Major had departed from his script.

"It was an unfortunate situation," Keyhoe said.

"What was Keyhoe going to say when the boom was lowered? "I was going to say that for the past six months our group has been working with a Senate Committee on the secrecy of Unidentified Flying Objects. I was going to say that if they hold public hearings with the information we have given them, they would prove that these things are real! It will cause a sensation!" "Their reports would cause a furor for a while, and there would be hysteria when the findings were made known. The stock market would take a nose-dive and organized religion might be upset!" "But I don't think the panic will last more than a week. By now we're almost shock-proof."
