Ed) INTERAVIA continues - "The most successful in the field so far reported is work of Townsend Brown, an American who has researched in field for over 30 yrs." - Brown described to LLP a lab "saucer" model that has no moving parts & appears to demonstrate the relationship between electro-dynamics & gravitation.... Yes, science sweeps onward! And the human race knows not whither it is being taken! Those with Vision must come forth! Interpretation of our times is today's basic need!

**TALKING DOLL** On Columbia Rd here in Wash back in 1887 Emile Berliner invented the gramophone which has become our modern disc talking machine. It was Berliner who patented the dog-trademark "His Master's Voice" which has been famous around the world for generations! Berliner took his invention back to his native Germany to market it. They saw in it only a toy - wanted to know if he could make their dolls talk. He declined but some toy-size records were made. (LLP has some of those records & some time ago they were begged for playing on a N.Y. radio network show.)...Now at last is announced the real talking doll, known as "Teacher Doll", 30 " high, contains a tiny record playing device, talks & teaches many valuable things. But the idea was by-passed for nearly 6 decades to make room for one of our biggest (& cheeriest) modern industries! Moral - Don't worry too much about the "Detour" signs along life's highway!

WHISTLING CAMPAIGN The little town of Richland, Kan is cheery! Reason - kids all over town are whistling. Mrs. Georgia Gray (treasurer of U.S. under Truman) lives there, - notices kids don't whistle as they used to & now gives prizes for best whistlers. Judge walks streets incog & listens. Kids are lusty contestants. As New Age hint ILP suggests other towns copy idea. What was the old saying about being able to trust a whistler? Whistle! Hum! Sing! It raises the vibration!

SCIENCE AND ATOMS Science digs in further on the atom - discovers another of its parts, the neutrino - formerly only hypothetical. It causes direct reversal of the radioactive process called beta-decay. The neutrino, smallest particle of matter, reacts only very weakly to it and could travel with speed of light through solid matter, for billions of miles. (Looks as though science is getting close to the recipe for 4-D - Ed.)... And now "U. of Cal establishes the existence of a whole lay-out of anti-matter particles which conceivably could make up a whole universe opposite in nature from the one we know." New particle is companion to anti-proton discovered there last Oct. "Whether such a universe exists somewhere in space is a matter of speculation among scientists."... (Are they "getting warm" to what Spiritualists would call the "Other Side"? Ed... 81-nation Conference called by U.N. on proposed International Atoms for Peace Agency. U.S. offers to share its whole program! -- Still the 81 nations have no ans. for the biggest dilemma in science today - WHAT TO DO WITH ATOMIC WASTE? All know its "burial at sea" etc. but piles up death for the future. Saucer Researcher Van Tassel declares the whole "splitting process" is wrong. Is building laboratories at Yucca Valley, Cal & working toward "light energy" as the "coming source of power." Science may scoff. Then let it tell what IS the ans. to problem of radio-active waste! PSYCHIC ADD-UP - FROM A SOURCE IN WASHINGTON. "You ask about evil rampant in the world? No, earth is neither a 'discard planet' nor is it peopled by 'hybrids' but is going through throes of its own growth & emergence... You are in the 'Space Concept' which began 4 or 5 yrs ago... 'Real saucer landings? 'They're waiting for this atomic thing to settle down for one thing... Landings are def. coming -- real ones! Can't give date but interplanetary relations will be established - not submerging of any of solar race but neighborly relations. Later on saucers will be as common as autos!" (And let's hope saucers' "force-field system" will prevent some of the auto-collision deaths of which 142,000 are expected this yr. This alone should be enough to set everybody saucer-sleuthing. Ed.) "There is an interspace movement. There will be a hook-up of all the planets. This is the great climax toward which we are striving. The whole approach is beneficent! There are many surprises ahead for those 'on the path!'" MAILBAG --- Many writing in re Washington's new NATIONAL INVESTIGATIONS COMMITTEE ON AERIAL PHENOMENA. Many letters from foreign countries. All happy! Say long overdue. ...Letter from Kenneth Arnold, "original saucer sighter", speaks of being in a coming movie "The Flying Saucer Story." (NOTE - Lee Munsick of N.J. Club reports - tells of good sightings. They work at going sighting there... D. Wightman, Ed. URANUS, London (his home is named "Vimana") complains of govt attitude of secrecy - urges combined efforts on part of researchers." ...R.C.H., Honolulu reports on new "Akuaalele Research Group" there & good meetings; (name means "Flying God"; accounts there of saucers 1000 yrs ago... M.C.B. ambitiously asks us how to help through libraries. (What are YOUR ideas? Ed.)... Inter-Galaxy News, Cal. warns re a mag that adv. a "Voodoo Kit", real black magic being pushed. Tells LLP "You are doing a great service to God & man." ...M.H.P. writes "I just couldn't bear to miss a single issue"... From P.G.P. "It gets more newsy with each issue". Saucer author Adamski writes re the new COMMITTEE here. Also commends "Sticker Barrage" Says "I am feeling better than I have for yrs. Tells of fire hazard under which they have on Palomar Mountain. Says correspondence so heavy & postage so high he is writing another book to ans. the questions... E.C. writes from Vienna, "Dear Sir & Brother: An Amer friend sends me The Little Listening Post which I esteem. I find it most wonderful! It gives us in condensed form the news of greatest importance for our daily knowledges. I find the arrangement very precious. The Listening Post satisfies in all directions".....NOTE: We are getting so many requests for back issues (way back) of THE LITTLE LISTENING POST - only a few of which we have been able to supply, that it is being suggested the Volumes be reprinted in Brochure Form. "Tapes speed info."... Caught on radio (via UP) "Space Specialists in Eng. expecting Mars contact soon. Have heart-shaped lapel badges that designate friendliness -- talking about interplanetary govt..... Wash News carried this story, also many other saucer stories including one of steer recently kidnapped by saucer in Idaho.... Keyhoe's recent challenge for "Cong. Investigation" re keeping the facts from the people was given whole page by N.Y. tabloid... Re saucer fans' complaint at Air Force -- remember - THE A.F. IS CHARGED WITH KNOWING WHAT IS IN OUR SKIES - THE A.F. DOESN'T KNOW WHAT IS IN OUR SKIES - THE A.F. DOESN'T WANT TO ADMIT IT -- IT IS JUST THAT SIMPLE.

PROPHECY - Paul Harvey, ABC network, told 9/23 of message published in British paper that on Nov. 7 at 10:30 P.M. a saucer will hover over L.A. Cal. for contacting us. Some radio stations are complying with request for 20 min silence for possible message at that time.... Another prediction concerns the hushed-up Bender who had stated that if Govt didn't make a statement in '53 - then it would 4 yrs later; Gray Barker now observes - that will be the Geophysical Year! (WE WILL SEE WHAT WE SHALL SEE!!! - Ed.)

SAUCER LECTURES Frank Edwards lectured recently in Detroit;;; Phone chat with John Otto in Chicago says he's moving to Cal but will continue public saucer work there.... Van Tassel of "Space Convention" fame, Yucca Valley, Cal writes he's winging by private plane through Oct. across the U.S. & lecturing at many cities - including Wash. & N.Y..... Jessup says U.S. & Eng. are only govts not cooperating openly on saucer research... Van Tassel urges that now while "campaign promises" are being blarneyed around -- for everyone to write to both Ike and Adlai and ask - "What policy do you intend to follow regarding this portentous subject - are you going to tell the people?"

SIGHTINGS -- Many printed reports coming in - also in correspondence - also locally over phone... A.F. & civilians watched strange object over Pasadena for 47 min.... Through binoculars 3 Cal witnesses watched cigar cover 5 degrees of sky - got good photo. 100 others later saw it over another town... In Kalispell, Mont. shining "triangle," also "orange ball" hovered in sky till dawn... Bright light reported for 45 min over Loveland, Colo.... N.Y. Times reported 20 people saw "more than once" a round orange object over Lake Champlain. "It bobbed around in sky with a waving motion. Saucer was bright enough to form a golden hued path on the surface of the lake."

LLP VISITS NICAP On a new shiny brass sign at 1536 Conn Ave. Wash. D.C. are the words NATIONAL INVESTIGATIONS COMMITTEE on AERIAL PHENOMENA - Project Skylight. -- LLP went in! There, a few brave pioneers are working long hrs. lured on by the vision of a New-type Research that will help throw light on some of the strange events around us -- world changes coming too fast to understand, and "capped", literally, by a vast amount of overhead phenomena that often displays intelligent maneuvering - but that MAY be so far beyond our kind of reasoning that we will have to WORK to understand why it is there. -- Project Skylight is going through the familiar pattern of all pioneering! Super-courage is being required. And self-sacrifice. But the work goes ahead. With great care the Board of Governors is being selected - the sub-committee is working on the policy of publications, etc.; gifts of books are coming in for the big new Research Library - and eloquent of the heart-interest that the Project has awakened is a beautiful coffee set on a little table that stands by the fireplace - a gift from one of the new members. --- NICAP's Prospectus, written by Scientist Townsend Brown the Executive Vice-chairman pro tem, has been called "a masterpiece." It represents a "Vision" of unusual proportions adapted to trying to make some advanced and objective interpretations of the unprecedented scene around us.

ODE TO A MOCKING BIRD Two months you've been away tending your young brood -- now you're back, first day of fall, and the air rings with the joy that comes tumbling from your silvery, feathered throat! Your high-voltage harmonies seem to out-reach all other efforts - human or winged - to raise earth's vibration. We glory in the very over-spill of your unearthly ecstasy! Sing on, little "Caruso", sing on!

SHOCKING STATEMENT - A veteran international correspondent at Washington, able to look back on decades of global assignments, has just made the following striking statement to LLP: "Civilization is collapsing. It is due to a breaking up of a sense of moral values. Leadership has fallen down. The two world wars were only symptoms of what has been taking place. Orthodox religion has failed in the way it has been used. We are due for some kind of 'Second Coming', fuller Interpretation, or Great Leadership that can inspire the world! The world is suffering a cosmic sickness!" ----- The same day the radio said "FBI says 14% rise in major crimes in last 6 months. STAR said - "Chief of Army Chaplains warned the Nat. Council of Churches, - 'One out of every 5 boys will probably have a juvenile court record before old enough to enter military'."...SOMETHING IS HAPPENING! ..Is there any connection between all such easily discernible conditions & the purpose of visitations in our skies? Many say - YES. Both are unprecedented!

DISAPPEARING ACT Much mystery about Annalee Skarin (Salt Lake City & L.A. author recent "Ye Are Gods", etc. Claim of "transmutation." "She and husband appear from nowhere" then gone again, asking only "Do not try to follow us". F.B.I. got into act, a correspondent writes us. New concept creeping in re transcending of death in some yet undefined way. Could be quick chg. of consciousness in which atoms of discarded body disintegrate fast enough to be called "Transmutation." Word on more and more tongues. Psychic prediction that time is not distant when "passing" can be at will, also - "Advanced souls will 'come and go'." ...People asking meaning of verse - "And the Last Enemy that shall be overcome is death." ...Group in New Eng. supplies stickers for mail bearing legend - IMMORTALITY NOW ...Along somewhat same line is data recently mailed us on "The Little People of Mt. Shasta" (author not given) who appear and vanish at will. One such objectified - straightened out a fern & muttered a visitor for bruising it! "They talk, say they are related to pre-history, know 4-D laws; Some settled in Ireland, Scotland, etc." (Accounts for persistent stories there? Ed.) Could have some bearing on mystery-physics of saucers!(No clue dare be overlooked.Ed.)

THOUGHTS IN A GARDEN: --- Think of all the happy things -- it's as good as having wings! - So said Peter Pan... Everything in Nature sings - brooks and winds and things with wings ---- So I know I can!

THE LITTLE LISTENING POST is The News In Capsule. Listening for all things on a Far-out Front. MUCH is rolling toward us over an ever-widening Horizon! ...Published every few weeks - when the News "boils over", from Washington, "News Capital of the World." --- THE LITTLE LISTENING POST is the extension - by request - of personal correspondence that has become worldwide....THE LITTLE LISTENING POST has never advertised, -- but it tries to add to its Mailing List the many new names that continue to come in -- asking to be included among the subscribers.
