A world at strife, And trust that out of night and death shall rise
The dawn of ampler life;
Rejoice, whatever anguish rend your heart, that God has given you
For priceless dower, To live in these great times and have your part
In Freedom's crowning hour.
That you may tell your sons who see the light high in the heavens --
Their heritage to take ---
"I saw the powers of darkness put to flight,
I SAW THE MORNING BREAK!"

*BRAIN STRETCHER: - A young physicist recently dropped in unexpectedly to the LLP for Tea; briefly summed up is the conversation: "Fission is the action of BREAKING; breaking the magnetic fields of Force creates tremendous energy & can be termed MAGNETIC FISSION. Magnetism is electricity in action; space is the distance between two objects; time the supposed distance between two events; theory of RELATIVITY shows that the constantly changing position of the Galaxies themselves makes it impossible to determining their exact location, AND lays open to question the existence of our everyday REALITIES, here and now. Therefore we can't be sure that anything is what it seems! - Light IS; if light IS, and its existence is simultaneous throughout all creation, then the apparentcy of distance (which is the basic human "reality" is experienced by tuning in mentally to different frequencies.
