

FOR RELEASE 2/14/63VOLUME 8NUMBER 1

EDITORIAL # 5

THE HAWK
RESEARCH
SOCIETY

99 MAR 1963

By Harry Siebert, President

The Hawk Research Society is an organization dedicated to the "unusual". We are interested in everything from flying saucers to science fiction. We are very much behind UFO group unity, but we are unable to afford a great many of the things some other groups have.

We were formed in September, 1961, after our President and Vice President, Harry R. Siebert and Steven R. Warner, interviewed George Adamski. At that time we considered Adamski completely unimpeachable, and, until James W. Moseley sent us a SAUCER NEWS issue exposing the contactee, followed this belief by considering ourselves the "George Adamski Society".

Before entering the unusual, we studied medicine, solar power, chemistry, etc., but then, that can hardly be considered a record of UFO research.

We have carried articles by such greats as BRINSLEY LE POER TRENCH, JAMES W. MOSELEY, RAY PALMER, GRAY BARKER, GEORGE FAWCETT, C.A. HONEY, AL GREENFIELD, and many, many others.

A feature we hope to come up with soon is CONTROVERSY, and it will concern the friction between groups and people, and offer them space to iron their differences out. The first of these articles is intended to be MOSELEY vs. BARKER.

Anyone interested in corresponding with us may write: Harry R. Siebert, 1457 Kenwood Drive, Pomona, California. I am also an amateur novelist and write science fiction for magazines such as WOLFBANE and REALM OF FANTASY.

SPECIAL ANNOUNCEMENTS

With the UUA now in full swing, plans were made in the newspaper committee to issue a bi-monthly publication. Al Greenfield (newspaper committee chairman) took a poll in the newspaper committee, and the results were that the members voted for a monthly publication. As co-founder of the Alliance, I have pledged my assistance to handle the job of getting out the UUA's proposed magazine, "The UFO Informer", which will run about 4-6 pages, depending on the amount of news, articles, etc. received. With this in mind, Al Greenfield has appointed me Editor, Publisher and Distributor for this official UUA magazine. The "UFO Informer" will be released on the 25th of each month and I ask that you send in your reports, articles, or whatever news items you have pertaining to the UFO field, c/o my address, 15 Tyndall Road, Kendall Park, New Jersey. All materials must reach my residence by the 25th of each month, or else it will be held over until the next issue. We must get one thing straight here and now. That is that the "UFO Informer" will contain all information received from the sub-divisions of the Alliance and NARL, and that the size of our magazine will depend on your cooperation in this matter. It is true, also, that some of you have never heard from me before, but this matter has been taken care of. You shall hear from me very shortly. The UUA will show its unity through our magazine. I sincerely hope you will aid us in this task.

Sincerely,
Ed Babcock Jr., Director N.J.A.A.P.

Look-See welcomes "Space Review", Susanne R. Stebbing, Editor to the UUA.
