ISSUE NO. 14

DATE: Feb. 1991

DIRECTORS MESSAGE:

I am pleased to announce our next NH MUFON meeting will be held at the Manchester public library on March 16, 1991 at 1:00 PM. This is one of the most important state meetings we have ever convened. I urge everyone to attend. We will be discussing the NH MUFON symposium celebrating the thirty year anniversary of the Hill abduction case. We need your help with this exciting project. We will also discuss the recent UFO sightings in Southern New Hampshire (see case log). We may have had a mini UFO flap in Southern New Hampshire and Northern Mass. You won't want to miss the update, so plan to attend and invite a friend.

BOSCAWEN FLYING 'V':

The case log of investigations in the October issue of the MUFON UFO JOURNAL failed to give the complete story of the flying "V" sightings. The following is a brief history of events.

Fri. 19 Jan. 90	Call from Stephen & Linda Hassan (NH MUFON members) alerting us to a formation of low flying lights over Boscawen. No sound. Time 12:00 PM.
Wed. 7 Feb. 90	Call from Hassans. Formation of lights again, this time at 7:00 PM.
Wed. 14 Feb. 90	Call from Hassans. Formation of lights again. Time 6:30 PM. (At this point a pattern of Wed. sightings was noticed).
Wed. 21 Feb. 90	A NH MUFON team on site in Boscawen observed a "V" formation of white lights. A large white light was also observed which emitted a blue beam of light to the ground. A photo was taken.
Wed. 28 Feb. 90	Again a NH MUFON team on site in Boscawen observed a "V" formation of lights. The Boscawen Police Chief also saw formation from the team observation site. Several attempts to photograph the formation failed due to slow speed film.
Wed. 14 Mar. 90	Stephen Hassan successfully recorded formation of lights. (Date ?)
Fri. 16 Mar. 90	Woman in Boscawen video taped formation. Formation did not show well but audio was good.
Wed. 21 Mar. 90	NH MUFON team observed "V" formation. Organized DISRUPTERS in the area harassed our team. Local police were notified.
Wed. 28 Mar. 90	NH MUFON team on site in Boscawen with members of Mass MUFON. Successful photos of the formation were made using a 300 MM lens and ASA 3200 color print film. Time lapse photos revealed two large white lights at the front of the "V" formation with four sets of red and green lights forming the "V" shape. It can be seen, all pairs of lights do not follow the same flight path. We can therefore conclude all lights were not part of one large craft.

Welcome Aboard to all our new NH MUFON members:

Wayne J. Belanger, Nashua
Berry Hill, Portsmouth

James D. O'Connor, Manchester
Patrick E. Malloy, Portsmouth

Kathy L. Fieck, Allentown
Jerry Sands, Goffstown

Peter R. Geremia
Director

SEE YOU IN MANCHESTER

CASE LOG

10 Jan 91 A married couple were driving north on Rt. 95 near the Mass. New Hampshire border. Time was 8:30 or 9:00 PM. The gentleman was driving. In the distance in front of them they noticed what seemed to be three flashing red lights. At first they thought the lights were part of a new radio or TV antenna. As they approached the lights they could see the lights formed a triangle with each light flashing in sequence. It became apparent what they were viewing was not an antenna. The lights were on the bottom of a disc shaped craft hovering over the North bound lane. The disc was motionless at about eighty feet over the road. It was tilted such that they could see a dome on the top as they drove under the UFO. Other cars had stopped or slowed down. One brave driver had parked his car. Put on his emergency flashers and was walking back to get a better view. No reaction was noticed from the car electrical systems. The couple proceeded to a ski resort without further incident.

It should be noted several sightings throughout Southern New Hampshire and Northern Mass. were reported that same night. We have investigators checking them out and will report to you at the Manchester meeting.

31 Jan 91 A woman in Londonderry NH. was awakened at 3:59 AM by a loud noise. She saw a large object (as big as a house) hovering near her home. She described the object as looking like a fluted pie plate (edges of pie plate fluted) with blue, white, and green lights. She also observed a strange red light or red glow. As the object left it made a sound like a helicopter.
