NH MUFON NEWSLETTER MARCH 1994

Directors Message

Those who attended the last State Meeting were treated to a surprise visit by **Colin Andrews**. Colin gave us a briefing on the disastrous UN lecture he presented. Just about everything that could possibly be done to disrupt and sabotage the event was done. Last minute changes were made by UN officials such as not letting the native American speak, changing the meeting room from the UN building to an annex building across the street and not telling the guests, faulty audio visual equipment, and stating to Colin he should not make any political statements. I thought the UN was a political organization. Bottom line is, not much good was accomplished by Colin's Lecture.

I received several phone calls from irate NH Mufon members asking why NH Mufon was not included in the Mufon Journal as one of the more active states as far as membership in the national organization is concerned. When I received the journal and saw we were not mentioned I grabbed my trusty calculator and ran some numbers and guess what. **We are number one.** Well, I grabbed the phone and called Walter Andrus Jr. our Director in Texas and asked what happened. The next Journal will proclaim NH Mufon as having the **best** record of membership when compared to

State population. This is due to **your** efforts of promoting our organization and our September conferences. A big **thanks** to you all.

Crop Circle Hoax

John Macnish has published a new book "Crop Circle Apocalypse". This book claims the entire crop circle subject is a hoax and backs up that statement with substantial proof. Colin Andrews spent many hours with Mr. Macnish and is convinced much of what is proclaimed is **true**. As Colin explains "**Now The Work Really Begins**". Colin is totally convinced there is a real and important phenomenon and we must now separate the hoaxes from the real patterns and try to answer the many questions this revelation generates. I am looking forward to hearing what Colin has found when he presents his **findings** at our **September 11th Conference** at the Yokens Convention Center. Needless to say this has crop circle researchers in a spin.

News around the Network

Congratulations to **David F. Webb** on being elected as the Eastern Regional Director for Mufon. Dave is a long time researcher and will be an important part of our organization. To that end I have presented a proposal to Dave which I believe will help us get **current sighting in-**

formation to our members. At the request of several NH Mufon members for more timely sighting information, a plan was devised where basic sighting information from the Eastern region will be funneled to a single source (NH Mufon). This source will collate the data and send a monthly report to all State Directors in our region. This will make sighting data for the entire region only about two months old. It will then be up to the State Directors to disseminate the data to their organizations. The sighting data to be collected will be very basic such as Date, Time, Place, Duration and a very brief description. I will keep you posted on our progress.

NH Mufon Events

A **State Meeting** will be held at the Manchester Public library on **April 2, 1994** starting at 1:00PM sharp. We are pleased to have Mr. Joe Nyman a long time abduction researcher with MA Mufon as a speaker. We will have a copy of the now famous **Fire Officers Guide to Disaster Control** manual with the UFO section every one is talking about. We will also show the **WLVI** news broadcast of reporter Jim Smith at the non-existent Groom Lake government air base. What makes this video interesting is that witnesses

may be seeing the same craft in Colebrook, NH. Our Coos county researchers reported sightings of what looks like the same craft. Popular Science magazine for March did a great story on Groom Lake and another land grab by our government. It should be a terrific meeting so **plan to come and invite a friend.** All are welcome.

Ken Foster our Rockingham County Section Director and his group arranged for and coordinated a free slide presentation at the Salem NH library. We had about thirty people in attendance and a good time was had by all. **Bob Heslop** our State Section Director for Merrimack and Sullivan Counties arranged for a free slide lecture at the Warner Men's Club. We had about forty people present and again a good time was had by all.

Jim Calvin our Section Director for Grafton County is arranging for a lecture at Plymouth State College. We expect to have 200 in attendance. Local townspeople as well as students are welcome.

Sandra Black our State Section director for Coos County has arranged for a series of slide presentations to be presented this spring (after the snow is gone). **Walter Friesendorf** our ASD and Section Director for Cheshire and Hillsborough Counties is scheduled to present a slide lecture to the Dublin School, a private school in Dublin NH.

Pete Geremia SD will present a slide lecture at the Epping library on March 25, 1994. Our **free lectures** are a great way to introduce the public to our organization. It is also a fantastic fund raiser for

your local civic organizations so get the word out and see if **YOU** can help spread the word. We have available information posters for your use. The posters give our mailing address for information on free lectures. Drop us a line at the P.O. Box and I will send you as many as you need.

I would like to take this opportunity to **thank our Section Directors** for doing a great job of promoting our organization. **Many thanks to all !**

A New Service to Mufon members has been announced by Shirley Coyne, Michigan State Director of investigator training. **Weather Study** Information will be available free of charge from Val/Louise Rose, investigators for Michigan Mufon. Please write to our P.O. Box for the form required to get the weather data.

The Billy Meier case is in the news again. Bad news for those who believe his story. Underground Video did a six month in-depth study using the latest technical equipment and found the entire case to be **BOGUS**. The company (Underground Video) now states any previous representations of authenticity in their catalog are to be ignored. They also stated their findings will be presented to the attorney General of the State of California to see if a **consumer fraud** case can be instituted against the Meier cult in Switzerland. Anyone who previously purchased any part of the Beamship Trilogy may write to Underground Video and be included in a **Federal Class Action Suit**. Look for

a new video "The Billy Meier Hoax" for \$39.95. Can you believe it. At the state meeting I will relate an event I was involved in when the whole Billy Meier thing got started. **News Articles** you send in are most welcome.

Keep them coming in and thanks.

Welcome Aboard new members

Jill Gadwah, Colebrook
Terri Jones, Jefferson
Barry McKay, Somersworth
Debra Anne Mix, Sanbornville
Johanne St. Pierre, Colebrook
Greg Raymond, Nottingham
Michael Yurgeles, Dublin
Bill W. Zechel, Rye

Congratulations

Kathleen Marden has passed the Field Investigators Exam and is now a Field Investigator.

Missing Crop Circle in NH ?

We were informed there was a crop circle someplace here in New Hampshire last year. Do you know anything about it? If you do please let us know the details. It may have been written up in a local paper. Please write to our P.O. Box with info.

Two New Books just out are interesting reading to say the least. A new release from **Leonard H. Stringfield** Feb, 1994 Status Report VII. **UFO Crash/Retrievals: "Search for Proof in A Hall of Mirrors"**. Len's books are always good reading. This one I think is the best. The other book on crop circles is by **John Macnish** called **Cropcircle Apocalypse**. It shows how Doug and Dave did their thing and lots more. Must reading for circle researchers. I will have both at our April 2nd meeting.

Case Log:

On Mar. 3, 1992 in Warner NH a woman was driving her ten year old son home and observed many lights moving from the East toward the West. The lights were in the shape of a **triangle** slowly moving at a low altitude and making a whirring sound. They got out of the car and stood in a field as it moved overhead and out of sight. It was described as having 9-12 main white lights forming three triangles which formed a large triangle. Many other white lights formed the rest of the triangle shape.

On Aug. 5, 1993 in Alexandria NH a woman went to a window to pull a window shade down and observed three objects in the South Western sky. She went outside with a pair of binoculars. She saw one **large triangle** and two smaller triangles. The smaller triangles were a formation of white flashing lights and appeared to float up and down independently. The large triangle had a solid purplish color that appeared like a glow of a TV screen. Small green, red, and orange colored lights surrounded the perimeter of the triangle and seemed to **flash sequentially** in a clockwise direction. No sound was heard. She viewed the objects for 45 minutes and then went to bed with the lights still in the SW sky.

On Nov. 19, 1993 a woman was driving home in Hudson with her infant son. At about 10:30 PM she noticed fast moving lights flying low and appearing to be a plane heading for a crash. She lost sight of it and heard no crashing sound. A few minutes later at a stop sign she noticed the same configuration

of lights hovering right in front of her. She observed four red lights above two green lights with two vertical dull white lights. She became **very** upset and drove home avoiding the object. What makes this case interesting is we have other cases of this same light configuration.

On Nov. 16, 1992 a woman was driving on I-89 near exit 14 and 15. She saw a **white light with a green tail** go from horizon to horizon. This was most likely a meteor however during the interview the investigator through excellent questioning found what can only be described as a **missing time** experience. During the summer of 1989 she went with her boyfriend, now husband to a party. It was one of their first dates. After being at the party for a while for some reason they decided to go home. On the way home they pulled off the main road to go to the bathroom. They woke up one and a half hours later with no memory of what happened and the motor running. They then decided to go back to the party but when they arrived everyone was gone. Later they discovered the route they used to drive home was not the direct way to go. They have no idea why they left the party or why they decided to go back. They do not wish to explore this further at this time. This case sounds similar to the **John Salter** case we will hear during our September 11th Conference at the Yokens Convention Center.

On Nov. 20, 1992 at 1900 Hrs. a woman was driving from New London NH to her home in Andover NH. She observed a **triangle** set of red lights moving parallel to her car. She didn't want to take her eyes off the object afraid it would disappear from

view. As she watched, it suddenly **vanished**. The size of the individual lights were described as the size of a normal stop light.

On Feb. 25, 1993 two people had three sightings during the same time frame. One witness is **very reluctant** to report the incidents and was almost forced to make the report by her male friend. The woman was attaching her dog to the outside run line and observed a very large **bright red light** in the Andover NH sky. It made no noise and the dog **started barking** and was very upset. She observed two smaller white lights at the wing tip of a boomerang shaped object. The **large red light** was in the center of the craft. She was unable to see the rear of the craft. It passed out of sight behind trees. **Later that night** she was called by her male friend who just saw a bright red light on a boomerang shaped craft. The surface was shiny and reflective. It moved slowly as it passed out of view. He asked her to go out and see if she could see it as it was heading in her direction from Concord to Andover. She did, and on Rt 11 heading toward Franklin she saw a triangle set of red lights. She stopped and got out of her car and was able to make out several layers of structure before it moved out of sight. After it passed she heard a high pitched whine.

On Feb. 2 or 3, 1994 a man was working in his workshop in Errol NH when he heard a loud strange noise coming from outside. The temperature was minus twenty-five degrees F. The witness a licensed pilot stepped outside and heard a high pitched, whining, and oscillating sound directly overhead. He walked to a clearing near his home and observed what he believes was the bottom of a craft as it slowly moved over his home and out of sight. He observed 12-15 randomly spaced clear white lights. There was one large red beacon centrally located casting off light as it spun. He was unable to see a definite outline of the craft. He observed the bottom was not smooth as a plane, but rather uneven. The size was estimated at 80 to 100 feet long and 60 to 70 feet wide. The speed was estimated at about 75 knots at an elevation of 600 feet. The WLVI video we will show at the State meeting in Manchester shows a similar craft.

On Dec. 16, 1993 at 1930 Hrs. a woman just finished watching a TV show and looked out the window of her Colebrook home. She saw in the sky what looked like Christmas lights. At first she thought it was a plane but because it was hovering she thought it was a helicopter. She looked through binoculars and observed a mass of bright multi-colored lights randomly flashing. At one point she saw two arm-type appendages extend from one area of the object. Each arm had whitish yellow lights on it. They remained extended for about 15 minutes and then disappeared. She observed the lights for

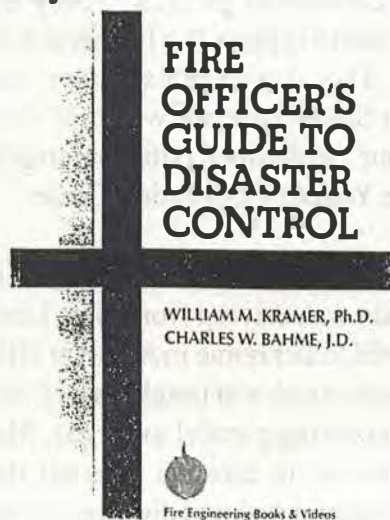

about three hours. She called her son who accused her of drinking. She then called her neighbor but by then it had risen to a high elevation and the neighbor refused to say she saw anything.

On Jan. 28, 1994 at 0820 Hrs. in Lancaster NH a woman was driving southwest on Page Hill Rd. She observed something reflecting the sunlight in the sky. At first she thought it was an airplane. She stopped to watch it more closely and realized it was not a plane. She felt strange as it was very bright and much larger than anything she had ever seen before. It was described as a **diamond** on it's side with the ends blunted off. It then started shrinking, paused and then **vanished**.

Other News

Video Tape of the 1993 NH Mufon Conference is now available in excerpt form from Heirloom Productions. Heirloom will **donate** \$5.00 from the sale of each tape to NH Mufon.

Mr. Bill Zechel a brand new NH Mufon member has **donated** the use of a commercial grade **coping machine** to NH Mufon. This will greatly reduce our coping costs. **Many thanks Bill.**
