The Ohio UFO Notebooks – Numbers 26 & 27

I am enclosing with this newsletter, issues 26 and 27 of the *Ohio UFO Notebook (OUFON)* that will help satisfy the 2003/2004 membership promises that we made to the MUFON of Ohio members. If you were previously sent issue 27, then only 26 is enclosed. We had promised the membership 4 newsletters and 1 OUFON over this 12 month period, plus at least 1 state meeting. We held the meeting late last summer. The 2 OUFON's satisfy the Notebook and newsletter promises. Because of a problem with our Secretary position, no newsletters were prepared. We are now in search of a Secretary. The OUFON offer has now been satisfied with this mailing. We look forward to the 2004/2005 year.

Volunteer Secretary/Treasurer Wanted

A person to fill the Executive Council position of Secretary/Treasurer is being sought by MUFON of Ohio. This person will be responsible for keeping our membership list up-to-date, including when a member joined the organization and what that person received over her/his membership year. The person will be responsible for the book keeping function by recording income and out-go from the MUFON of Ohio bank account and reporting this activity in writing at least quarterly. The maintenance of the non-member subscription list for the OUFON, the packaging and mailing of the OUFON, and the mailing of membership renewal and OUFON subscription renewal notices are also part of this person's responsibilities. If two qualified members can be identified, the roles of Secretary and Treasurer can be split in a manner to be defined later, and if deemed desirable, shared with others. These duties will be discussed at the next Executive Council meeting.

This position is considered essential to the continued functioning of the organization.

Contact us at Number 139, 829 Bethel Road, Columbus, Ohio 43214 if you are interested.

Yellowstone Super Volcano Threat

Dr. Bruce Cornet and others are warning that an eruption of a volcano could occur. Volcanologists calculate that in parts of Yellowstone the ground has risen over seventy centimeters this century, and parts of the park are now off limits to tourists. Scientists have revealed that Yellowstone Park has been on a regular eruption cycle of 600,000 years. The last eruption was 640,000 years ago...so the next is overdue. The next eruption could be 2,500 times the size of the 1980 Mount St. Helens eruption. Fish are floating dead in the streams, and the lake is closed. There is a very strong smell of sulfur that is often a sign of the impending eruption of a volcano. Animals are migrating out of the area and new geysers and mud pots are springing up daily. Ground temperature often reaches 200 degrees and earthquakes are occurring regularly. <http://www.solcomhouse.com/yellowstone.htm>

Ohio Flying Triangle Sighting

SEAMAN, ADAMS COUNTY -- Kenny Young was contacted on the Cincinnati UFO Hotline to report a tremendously large object seen around midnight of September 13, 2003. Mandy, a 21-year old along with her mother, her sister and one of her friends saw a huge object off Route 32. They observed a triangular-shaped formation of lights on one large object. The lights flashed in sequence and would simultaneously alternate in color from pinkish-red, blue, white to yellow. There were 4 or 5 lights on the outer edges of the

triangle facing downward that flashed as a row of lights. The flashing effect was vastly different than the twinkling of a star. The colors would change in unison, all red or all yellow, etc., and would flash along the outer edge of the object in a slow sequence at first. Then the flashing sequence escalated in speed after several minutes into the sighting. The UFO was not quite as big as a full moon, and it hovered above Belfast for almost an hour at an elevation less than 45 degrees above the horizon. Mandy's mother, who is skeptical about UFOs, decided to have her report the object because it seemed to be so unusual. Both her sister and her friend are skeptical about UFOs, but could not identify the object. Coyotes were heard howling ridiculously loudly during the sighting, and also the previous evening. Thanks to Kenny Young

Strangely Lighted Field

by Donnie Blessing

MUFON State Section Director for Ohio

I received a report from a 72-year old male from Columbus, Ohio, regarding a very peculiar event he experienced on Sunday morning, December 02, 2003, at 06:40 am while deer hunting. He had just arrived at his deer stand for bow hunting, somewhere east of Columbus, when a nearby 20 or so-acre of field lit up like it was daylight! He stood and watched the light for several minutes, and then he noted two other lights "roaming" around the field!! He assumed that the land owner, a friend of the witness, had illuminated the field with a spot light, but a subsequent query to the landowner by a sheriff deputy ruled that out. Also, the witness checked the perimeter of the field on foot, and then on a 4-wheel vehicle, and he found no traces of footprints or tire tracks.

This gentleman said that as he was in his deer stand suddenly a light shined down on this large field of 20 plus acres of corn stalks. He said the light had a pinkish tone to it. Along with this light were 2 orbs of light the size of baseballs that he first thought were lights from quad runners. However, he was no more than 50 yards away and he soon realized it was not any type of vehicle. There was no sound and nothing attached to these lights. The lights roamed up and down along the perimeter of the field about three feet from the ground and acted as if they were looking for something. All this time the one main bright light still shined on the field. The farmer was not in the light. The event went on for approximately 10 minutes. The orbs moved on out of view and the main light shut off. The farmer said he was not frightened by all this but now he wishes he had looked up at the sky to see where the main light source was coming from.

2004/2005 Membership Interest

If you are interested in continuing your membership in the 2004/2005 year, please let us know and we will be contacting you in the near future. Meetings, newsletters and the OUFON will be part of this membership.

We definitely need your support and your participation if we are to remain a functioning organization. Please stay with us, and take an active interest.

Yes, I want to maintain my membership. Please contact me as soon as the membership process is firmed up for the next year.
