

PA MUFON NEWSLETTER

March 1, 2008 Vol.1 No.3

The recent sightings in Texas and the general surge of UFO sightings across the country have put MUFON in the spotlight. Reports have doubled in some areas of the country and Field Investigators are busy. MUFON has had 100 new members sign up since the Texas sightings story broke. PA MUFON has had 8 new members enrolled, which brings total membership in the state to approximately 100.

We are still in need of investigators, and those interested in becoming a Field Investigator for MUFON can go to www.mufon.com and click on UFO Hunters logo for the information needed.

John Ventre, State Director for Pennsylvania will be giving a presentation at Westmoreland County Community College on Feb. 27, 2008 at 7:30 PM in the Founders Hall amphitheater. Free to the public.

A UFO – Paranormal Conference will be held by PA MUFON on Oct 25, 2008 . More on the conference as to speakers and times in the next newsletter.

There were 7 sightings reported in the state in February and January reports submitted amounted to 12. There were a total of 19 sightings in PA reported to other

agencies not reported to MUFON. We are working on that issue.

I would like to recognize the efforts of two PA MUFON Field Investigators, Jason Donmoyer and Troy Noll who have most diligently fulfilled any and all asked of them. Their untiring efforts in following thru with investigations assigned to them demonstrates professional expertise and generates substantial results.

We are still asking for assistance from our members to help find a meeting location for the group. We also want to remind everyone we have presentations and speakers available if needed for a group in your areas throughout the state.

Sky Watches and Mock training sessions will begin in April. Dates and site locations, to be announced.

Dates and times for events scheduled in our area have been posted on the Meetings and Events page at www.pamufon.com

Note: To Investigators....If you are assigned a case and won't have the time advise John Ventre and it can be reassigned that is not a problem.

"KEEP YOUR EYES TO THE SKIES"

Thank you for time and dedication:

S.Witkowski , PA Sate Section Director / Field Investigator
