MUFON NYC has two main goals:

1). To investigate and research UFO and related phenomena, in an objective search for truth, as a collective body;

2). To disseminate our findings to interested members.

Along the way, we may aid in personal searches for objective and subjective truths.

We don't promise to deliver **ultimate** objective truth. We know that "things" (UFO phenomena) are happening which we probably can't understand in our lifetimes, but we're going to try. From small bits of information here and there, a few people with insight **may** be able to figure out what **some** of these things mean. Through this newsletter we will present what findings we make locally, as well as post notices of informative UFO-related events.

To the true alchemists of the middle ages, the search for the Philosopher's Stone was a spiritual quest, not a material one. Most alchemists labored in obscurity, estranged by proper society.

Just so is our search for truth in the UFO mystery. The core members of our local group are united in a search for truth, **for truth's sake**. They invest large amounts of time, with little recognition, for **no** material gain. Without them, **MUFON NYC** would be only what it "was" seven years ago. (Some of these members you will come to know in future newsletters.)

Despite the contempt alchemy was held in, eventually chemistry and other branches of the sciences emerged from it. In like manner we predict that a thorough critical analysis of the UFO phenomenon will, if carried through, lead to important advances in science, psychology, and sociology.

Does this sound pretentious? Perhaps it is, but if we achieve only a few of the goals we have set for ourselves, we will feel honored to have accomplished **something!**

Without further ado, I welcome you to our first newsletter and leave you in the capable hands of two men I've come to respect and trust: Sal and Jack!

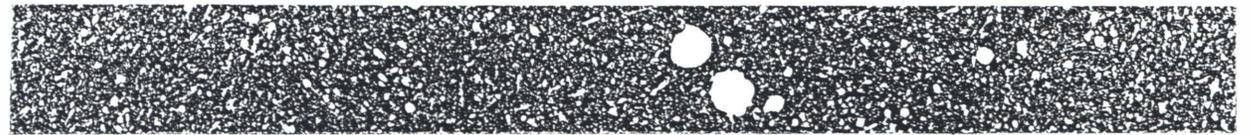

Peace and Truth,

Phil Lord

Director of **MUFON NYC**

MUFON NYC HOLDS FIRST UFO SYMPOSIUM FIRST INDEPENDENTLY CORROBORATED ABDUCTION REVEALED

Best-selling author **Budd Hopkins**, journalists **J. Antonio Huneus** and **Eugenia Macer-Story**, MUFON State Section Director **Gary Levine**, Military scientist **Colman von Keviczky**, and **Jean Mundy**, a psychologist specializing in hypnotic regressions, were guest speakers at MUFON NYC's first UFO symposium, held November 23, 1991.

MUFON NYC was formed in May, 1991, to discuss, investigate, and contribute to the eventual resolution of the mystery of UFO's and associated phenomena.

Opening speaker **Budd Hopkins** told a symposium audience of about 75 that he was now in possession of "the most important abduction case ever," one with witnesses who, from a distance, had *observed* an abduction. He said that it was the first time that someone had come forward to actually *corroborate* an abduction claim.

Mr. Hopkins also discussed a forthcoming, privately-funded Roper Poll that would query households regarding unusual experiences. Questions will include: "Have you ever seen a ghost?"; "Have you ever left your body?"; "Have you ever seen a UFO?"; "Have you ever lost an hour or more and found puzzling scars on your person?" (Flash!...*INTRUDERS*, a two-part drama, will air on CBS-TV in May.)

Deftly fielding a variety of questions from an enthusiastic audience, **Mr. Hopkins** averred that "The government can't keep a lid on this any longer!" He said that he alone had so much abduction evidence that, "within a year or two," the government would "have to tell the truth." He assured the audience that UFO investigators as well as those attending UFO symposia were on the "cutting edge" of UFO/abductee knowledge, and expressed regret regarding the degree of in-fighting plaguing Ufology.

One of the more lively question and answer segments occurred when **Mr. Hopkins** was asked to answer **Jacques Vallee's** as-

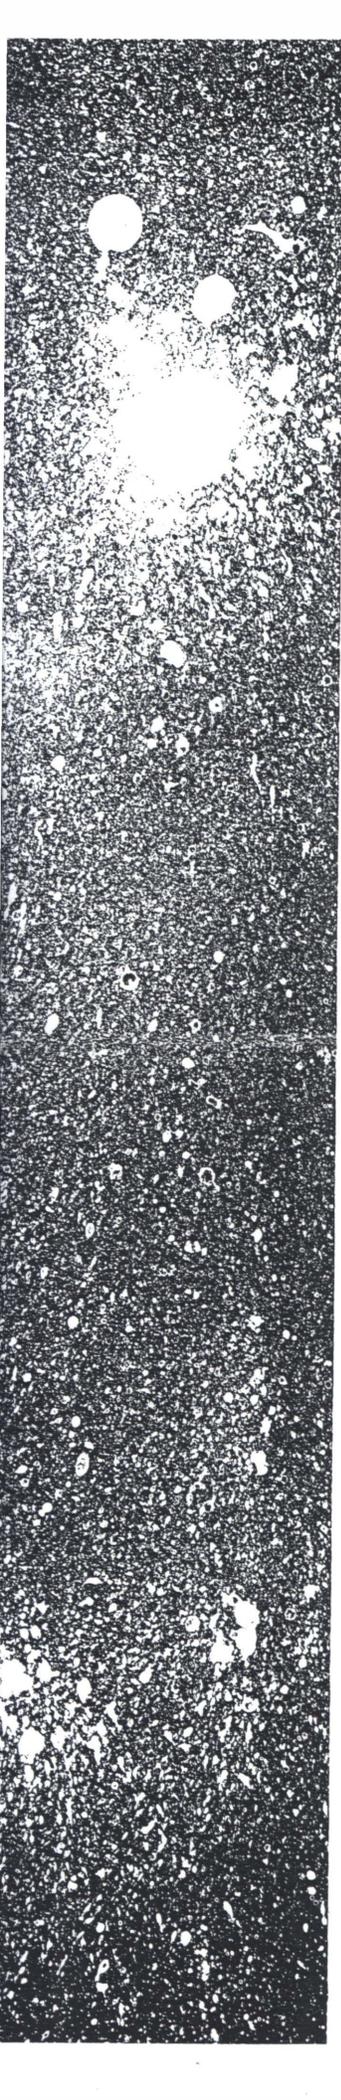

sertion, in his book, *REVELATIONS*, that **Hopkins** and others were "too literal" in their interpretation of statements made under hypnosis, and that "biological" explanations of UFO entity's goals were "ludicrous." **Mr. Hopkins** replied that **Mr. Vallee** apparently knew nothing of hypnosis, and that his recent declaration that **Hopkins** and others should not be allowed to hypnotize abductees, was contrary to the spirit of free scientific inquiry.

When someone in the audience suggested that more cooperation and less contentiousness would be needed to solve the UFO/abductee mystery, **Mr. Hopkins** said that he was certainly willing to cooperate, and that he had even invited **Mr. Vallee** to visit him whenever he was in New York.

International journalist **J. Antonio Huneus** provided a slide-show update on the UFO situation in Japan and the Soviet Union. He showed fascinating, unpublished photographs from various areas of Japan and the USSR, as well as drawings made by Russian and Japanese children, of both purported UFO's and entities. **Mr. Huneus** noted that Soviet magazines, once heavily censored, were now freely and openly discussing the UFO phenomenon.

Asked whether the mystery of the so-called "Face" photographed on the planet Mars had yet been solved, **Mr. Huneus** said, "No!" but predicted that the next Mars Probe, due in a few years, would certainly reveal whether it was a "construction" or just an epiphenomenon of light and shadow.

Journalist **Eugenia Macer-Story** presented an original analysis of the all-too-common habit that experienced researchers and laypeople alike have of bringing personal and collective mythologies and belief systems to the UFO phenomenon. Discussing the infamous Area 51 and showing photos taken by a Japanese photographer of various lights and associated phenomena over Groom Lake, **Ms. Macer-Story** said

that people often see what they are prepared to see. Citing the sky show seen over **Fatima, Portugal**, many years ago as a prime example, she explained that while many religious people saw religious symbols, others with a more secular belief system just saw lights.

Speaking "strictly as a reporter," Ms. **Macer-Story** concluded, "there's a mythology that attaches to sightings over Area 51. But there is no corroborative evidence as to what those lights are."

Jean Mundy, a psychologist who has worked with **Budd Hopkins** on abduction cases, was another of **MUFON NYC's** guest speakers. She explained that, apart from its revelatory potential, hypnosis was of significant value to the mental health of the abductee. She said that an abduction experience is an alienating one, given the fact that few if any will believe you. But by delivering hypnotic suggestions to the abductee's unconscious mind, she explained, feelings of alienation and fear could be dissolved.

Asked whether there was a "common thread" running throughout abductee hypnotic responses, Ms. Mundy replied, "Yes! ...Fear!"

Military scientist **Colman von Keviczky** reported on what he claimed was an ongoing government disinformation campaign. **Mr. von Keviczky** charged that mounting evidence proves **Star Wars Technology** was not developed to protect against the **USSR** or any other potential earthly enemy. Rather, he insisted, it had been and continued to be developed to both attack and repel aliens.

Reading from a variety of sources and notes, **Mr. von Keviczky** exhorted the UFO community to change the U.S. Government's irrational response to an alien presence whose reality, he claimed, it was determined to deny. He challenged the audience to overcome governmental disinformation and to lobby against **Star Wars** development so that interplanetary and global devastation might be avoided.

State Section Director **Gary Levine** provided an update on UFO sightings in upstate New York. **Mr. Levine** disclosed that, during the past year, at least 12 sightings had been made of UFOs going in and coming out of water, and hovering in the vicinity of local prisons.

Closing comments were made by **Phil Lord**, Director of **MUFON NYC**. He advised that, since many had been turned away, the next symposium will be held at the **AFS Studios** at 313 E. 43rd, a much larger space holding about 200 people. The symposium, whose guest speakers will again include **Budd Hopkins**, will run from 10 a.m. to 6 p.m..

Additional speakers for the April 4th symposium, as well as another symposium slated for May 30th, will be announced.

THE PROBLEM IS US

By Jack Greenfield

That UFOs must or must not be real, or extraterrestrial, or benevolent, is a posture too many of us affect to protect our too-fragile egos. And yet, other "mysteries" no doubt have the same effect on those who are emotionally drawn to the unknown and unknowable as do UFOs.

No one approaches UFOs, or any religious or scientific conundrum, innocent of presuppositions. Moreover, it's only human to hunger for answers that suit our psychological needs. Given those factors, will it be possible for us to resolve this mystery? Or, does the apparent inability of even the "best and brightest" to see this phenomenon objectively preclude a satisfactory resolution?

Belief systems can have no place in the investigation of UFOs; not unless we only want answers that agree with our particular bias. Ufology already has an abundance of built-in belief systems. There's the belief system of the percipient or contactee; the belief system of the official body to whom the report is made; the

belief system of the scientific gurus who determine the validity of a UFO report. Starting a search for a solution to a riddle with the solution, takes us down a circular road that returns us, safe and sound, to our cherished belief systems. Only if we begin by saying "I don't know...let's find out!..." is the spirit of honest inquiry possible.

Looking at this phenomenon as it has evolved over the last 45 years, one is reminded of its perhaps only truism: those who are certain that UFOs are only what *they* say they are, are not ready for the kind of discourse the subject so desperately needs. But how about those of us who admit our emotional, psychological and intellectual limitations; who respect evidence, even if it doesn't fulfill our expectations. Can we, "The Willing," make our way through this jungle of mostly man-made illusions that are no doubt masking the truth?

I like to think that we can. But we must summon the necessary innocence; unlock the ability to just "look and see" what's actually there; approach the problem anew, with fresh eyes, minds and hearts.

For example, what if...just what if the sight, experience or actual fact of the UFO phenomenon is a means by which *Nature* transports us to the next evolutionary port of call? If you recall the large, gray, rectangular object in the movie "2001" that evolved those Chimps into the chumps we all know and love, you'll know what I mean. Ooops...sorry...the last thing UFOdom needs is yet another theory.

Tell you what. How about a belated New Year's resolution to try our damndest to never again assume anything about the nature of UFOs. I for one resolve to be as objective as possible, regardless of the consequences. I also resolve to respect the other person's opinion, even if it doesn't conform to mine. It's a tall order, but I'm going to try a hell of a lot harder than I have.

How about you, Carl Sagan? And you, Isaac Asimov? And you, Bruce Maccabee? And you,

Budd Hopkins? And you, Jacques Vallee? And you, Phil Klass? And you, Jerome Clark? And all of the UFO magazine editors, luminaries and hard-science experts? Will you join me?

And, most of all, you, Dear Reader? May I also have the pleasure of your esteemed company on this grand and glorious cosmic adventure?

MUFON NYC : YOU AND US

By Sal Amendola

New York City MUFON is uncommonly blessed. Its active members come to the group with a remarkable array of talents, skills, heritages, and available resources. And no two of us fit a mold. Included in the group are writers; artists; journalists; a pilot / paramedic / video technician who has very generously placed all of his resources at our disposal (*including* his plane!); a former private investigator (you would guess wrong who this one is); one who has very generously put her Manhattan office conference room and office machines at our disposal for meetings; a scientist or two.... Among us are bitingly cynical skeptics, and "true-believers"; "Nuts 'n' bolts" proponents and "New-agers".... Virtually all of us claim sightings. A few of us are "Abductees". One or two of us are able questioners, a couple or so of us are compassionate listeners. There are the political and the apolitical. There are a couple of Italians, a Chilean, a Spaniard, a Japanese. At least one of us is of French ancestry. Jews, Christians, Atheists. Within context of the usual restraints (the need to earn a living, personal-life complications, etc.), we are as dedicated a bunch as you're likely to find in *any* group. And we're growing. We're actually growing. All this under the quiet, tactful, truly capable directorship of a tall, thin, bespectacled, long-haired, affable young gentleman named David P. Lord (Phil). And all of this with the available resources and blessings of N.Y. State Director Gary Levine, and Interna-

tional Director Walter Andrus. The one thing we all seem to have in common is a need to "know" something of a thing called "Truth".

Clearly, you're going to see a lot of different viewpoints in this Newsletter. Chances are high that no two of us will agree with a lot of what we'll be printing. But -- at least on an intellectual level -- we all agree that we don't know from where that aforementioned "Truth" will come. So except for profanity and slander nothing will be censored. Nothing. And we may even occasionally bend the rule against "profanity". Ultimately, we'll remember the wonderful caution of a good friend and colleague, John White: "We can disagree without being disagreeable".

Your letters, articles -- submissions of any kind -- are welcome, under the same guidelines, plus the following: We will withhold your identity if you wish, but please include your full name, address and phone number, for editorial purposes. We will not be inclined to publish anything that arrives anonymously. Copyright will always belong to the writer[s] of the article or to the artist[s]. Original artwork will always be returned to the artist[s].

We're all individuals -- you and us -- but we're all human mortals with a common goal. Our "Mission" is a deadly serious one, but we hope to tackle it with a sense of humor and camaraderie. With your help, we'll do well.

JACQUES VALLEE SPEAKS...AGAIN!

Jacques Vallee, a computer scientist and author of many books on the UFO phenomenon including *DIMENSIONS*, *CONFRONTATIONS*, and *REVELATIONS*, recently discussed UFOs and associated phenomena with the magazine, *Magical Blend*.

On The State Of Ufology

Noting that there is "an alarming level

of insanity in the field" of UFO investigation, Vallee says that his colleagues in science and technology insist that UFOs are just "a lot of garbage." He says that a UFO sighting can't be investigated today without at least considering the "possibility of a hoax... not on the part of the witness...but...somebody else, like the military."

On Crop Circles

Vallee says that his friends have looked at samples under a microscope and observed exploded nodes. "Initially," he explains, "my friends thought it was infrared energy. Now, it looks like microwave energy." His friends further speculate that someone has been testing a microwave weapon, perhaps a Star Wars device designed to "zap electronics on board a satellite." Vallee notes that, in this way, you can "change each stalk of corn into a microwave antenna" and "check the precision of the beam with exquisite resolution." He goes on to suggest that crop circles are getting better and better because the beam is getting "finer and finer." He suspects the entire phenomenon is probably a brilliant physical and sociological experiment utilizing New Age belief and an obsession with extraterrestrials as a means of camouflaging a government/military high-tech experiment.

On UFO Investigation In General

Vallee quotes an old friend who once advised: "Consider everything and believe nothing." He feels that when a sighting or group of sightings, such as Gulf Breeze, gain excessive publicity, or when a sighting occurs near a military base, there may be no way of determining what actually happened. He invites the reader to "Suppose...military experts have come to the conclusion that there really is a UFO phenomenon and they want to keep the field to themselves. The best way to achieve that is to send everybody else on a wild goose chase for short gray aliens under New Mexico, since nobody else could check it anyway, and discredit the people who are doing this kind of research on an independent basis."

Continued

On Abductions

Vallee believes that, though most abduction experiences are probably legitimate, abduction research relies too much on "amateurish use of hypnosis." Vallee feels that hypnosis is "irresponsible, unethical and unscientific," and insists that, "If and when we get the attention of the scientific community, they will ...look at the methodology that has been used and throw the whole thing out the window as garbage." He says that most of those who hypnotize contactees don't bother to "find out what other kinds of crisis may be going on in their lives" He worries that genuine UFO abduction cases are being mixed in with assorted childhood or adult trauma. "To simply hypnotize people and assume...you are going to get...ultimate truth about UFOs," Vallee observes, "is absurd."

On Encounters

Vallee speculates that we may be dealing with a non-human intelligence. He suggests that UFO experiences may offer clues to other paranormal phenomena that enable us to test "advanced theories of reality." Speaking of past history, he reminds us that "In the Middle Ages, people confronted with alien beings...

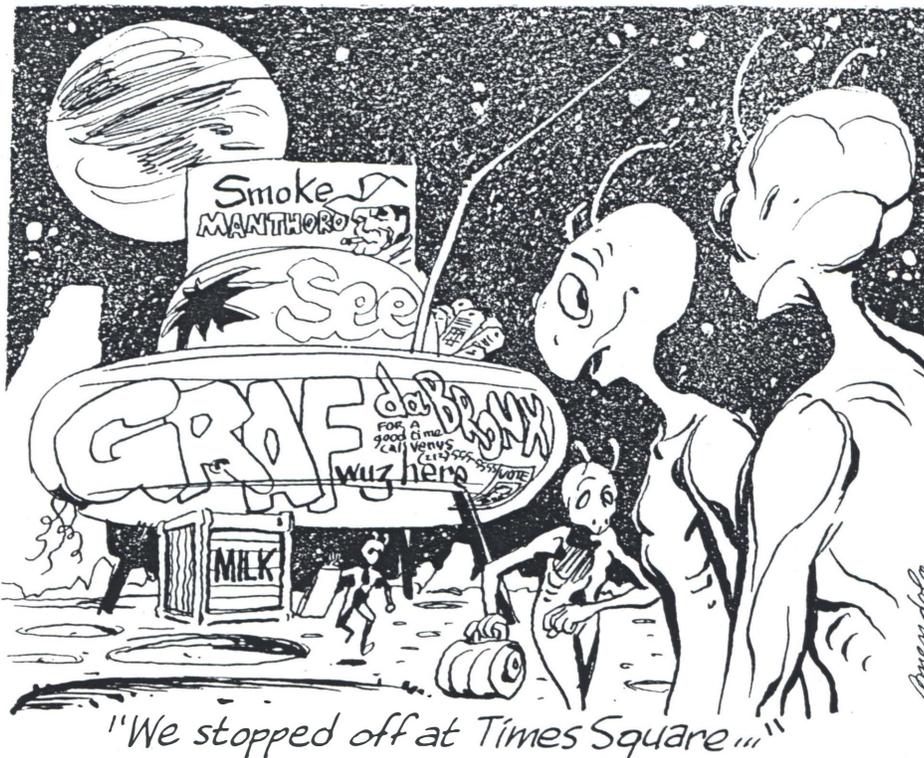

thought of them as angels and demons, or elves...fairies and leprechauns." Comparing the past with present-day encounters with aliens, he observes that "It's natural for us...to think of them as space visitors."

On Things To Come

Vallee says that when we discover the truth about the UFO phenomenon, it will "change everything." In fact, he predicts, "It's going to be a revolution."

The full interview is found in the April Issue of *Magical Blend*."

In Jacques Vallee's book, *UFO CHRONICLES OF THE SOVIET UNION: A COSMIC SAMIZDAT*, he reports on his 1990 trip to the Soviet Union to investigate a wave of sightings. Vallee met with Russian engineers and physicists who thoroughly researched Voronezh, the site of many UFO sightings. Though the sightings were ridiculed by many in the Western press, Vallee's research led him to believe they were "very solid." In fact, one sighting involved more than 500 people who witnessed an object flying at rooftop level near some apartment buildings in Voronezh.

COMING EVENTS :

Our listings do not, necessarily, imply our endorsement.

NEW JERSEY CONGRESS

Pat Marcattilio's "Third Great UFO / ET / Humanoids / Visitors / Aliens & Abductions Congress"; March 20-22, 1992; Days Inn, Rt. 206, Exit 7, N.J. Turnpike, Bordentown, N.J. Friday night welcoming party, \$20.00; Angeloni's Cedar Gardens Banquet Hall, 661 Rt. 33, Hamilton Square, Trenton. Conference Day Rate: \$60.00. Per-lecture rate: \$20.00. Full Saturday-Sunday rate: \$90.00 UNTIL March 10th. Thereafter, \$100.00. For guest list or more information, call Pat at:

(609) 888-1358, between 11am to 2pm.

OZARK CONFERENCE

April 3-5, 1992, Inn of the Ozarks, Eureka Springs, AR. Special room rates, (501)253-9768. Speaking guests include: Linda Moulton Howe, John Altschuler, George Wingfield, Norman Oliver, Forest Crawford, Jorge Martin, John Salter, Steven Greer, Antonio Humeus. Conference rates \$35.00 UNTIL March 30. For more information: (501)354-2558.

Route 1, Box 220 Plumerville, AR 72127.

MUFON NYC CONFERENCE II

April 4, 1992, 10 a.m.-6 p.m. AFS (American Friends Society), 313 E. 43rd St., N.Y.C. \$10.00 for Card-carrying MUFON members, senior citizens and students. \$12.00 for ~~NON~~ members. Guests include Don Berliner and Budd Hopkins.

MUFON NYC MEETINGS:

MUFON MEMBERS who actively participate or otherwise contribute time and talent to the workings of the NYC group make a voluntary contribution of \$3.00 at each meeting they attend. They will receive free issues of the newsletter, and as "complete" an access to all "inside" MUFON NYC information as their personal level of participation allows them. One exception *might* be the names of our case study clients. These will be as restricted as each individual person requires, even from active members not assigned to the case. In theoretically extreme cases, we will not even keep a written or elec-

tronically recorded note of anything related to the individual's identity. *Essentially*, however, except for this issue of PRIVACY, we would be inclined to withhold *nothing* from anyone who wishes to have information. This *includes* the Media, Government agencies — anyone. You can grope our garbage if you like, but all ya really gotta do is *ask*. Anyway, ... we will accept any donation offered. So far, no money has been spent unwisely. We plan to continue our sage and frugal investments.

SUBSCRIPTIONS :

Our plan is to offer at least four issues of the MUFON NYC NEWSLETTER per year. Each issue will contain no less than eight pages of information. We will expand the number of pages per issue, and the number of issues per year, as circumstances warrant. Cost of yearly subscription (no less than 8 pages, 4 issues) is \$8.00 for non-members, \$6.00 for MUFON NYC members. Check or money order, PAYABLE TO: Jack Greenfield; MAILED TO: Sal Amendola, MUFON NYC P.O. Box 1072 Brooklyn, N.Y. 11219 USA.

LETTERS/SUBMISSIONS :

To Jack Greenfield, P.O.Box 323 New York, NY 10024-0323

We hope you appreciate our efforts, and choose to support us with your membership, subscription, time, talent, and/or feedback.

CONFERENCE I VIDEOS:

Professionally-edited videos of our first conference are available for MUFON members @ \$25.00. \$30.00 for non-members. See NEWSLETTER insert.

NEXT ISSUE...

Commentary by J. Antonio Humeus, international UFO journalist. Greenfield review of Vallee's *UFO CHRONICLES OF THE SOVIET UNION*. Amendola report on one apparent multiple-landing site and possible abduction in Brooklyn. Report on April 4th CONFERENCE II. UFO cartoons. Media reports. PLUS!

IN COMING ISSUES OF THIS NEWSLETTER....

- Update on UFO sightings around the world!
- Commentary by J. Antonio Huneeus, International UFO expert!
- Review of Jacques Vallee's latest book, UFO CHRONICLES OF THE SOVIET UNION!
- Complete coverage of MUFON NYC's second & third symposiums, including what the guest speakers said!
- UFO cartoons!
- UFO tidbits from national magazines!
- UFO-related TV and radio events!
- Your letters!
- And much, much more!...

Subscribe Today, And Keep In Touch With The Mystery Of Our Time!

SUBSCRIPTION FORM

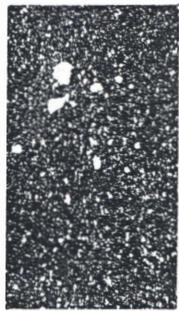

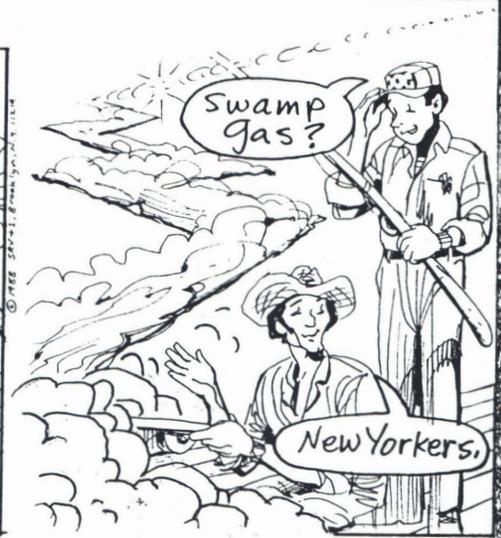

Yes! I'm interested in UFO's, crop circles, abductions and associated phenomena. I enclose the following information and check:

- Members of MUFON (4 issues): \$6.00
- Non-members of MUFON (4 issues): \$8.00
- Foreign subscription (4 issues): \$12.00
