THE 281 REPORT

UNIDENTIFIED FLYING OBJECTS

7.7 p.m.

The Earl of CLANCARTY rose to call attention to the increasing number of sightings and landings on a world-wide scale of unidentified flying objects (UFOs), and to the need for an intra-governmental study of UFOs; and to move for Papers. The noble Earl said: It is with much pleasure that I introduce this debate this evening about unidentified flying objects—known more briefly as UFOs and sometimes as flying saucers. I understand that this is the first time the subject of UFOs has been debated in your Lordships' House, so that this is indeed a unique occasion. Before proceeding further I think I should declare an interest, in that I have written a number of books about UFOs. I am grateful to those noble Lords who are going to follow me in this debate and I am sure that it will be a most stimulating discussion.

Canada & Mexico= \$15.00 per year
ALL other countries= \$17.00 per year
SUBSCRIPTION ONLY (12 issues)= \$12.00 per year

This writer, as the SBI itself, has become known for its style of writing. I truly thank one and all for your recent letters of appraisals and similar opinions.

However, I cannot accept sole credit for our idealistic comments, suggestions or beliefs. Our SBI "Step-by-Step" Field Investigating Manual contains a

chapter of our organizational Constitution & By-Laws which spells out, in plain English, our functions and goals. The contents clearly indicate that the SBI's intentions have always been to fight for truth, justice and the American way, even though we are not acting as "supermen". The SBI Report, as well as ever writer, is only doing his/her job in relating the true facts on UFO's, UFOlogists, UFO organizations and/or related UFO events.

We will not stand idle as these propagandist, supposidly on our side, reap the rewards or capitol gains from UFOlogy. It is not our function or goal to either degrade or slander the name of any one individual or organization. However, from time to time we will preach the truth to our readers and put things in their proper perspective; which is this month's aim.

In January of 1979 a new and interesting UFO document made its debut. Naturally, the SBI got its hands on a copy, analyzed its contents, and currently reproduced it in quantity for sale to our membership. Believe-it-or not, no one purchased this exclusive document from us. Still all well and good, since there are only three(3) copies of this document within the U.S., making it therefore--a Collector's Item.

Somehow, possibly through unorthodox means (the SBI is investigating the matter at present), a copy of this document has made its way to several other UFOlogists. Don't get us wrong--there is nothing malevolent about this! But, sometimes even well-known UFO organizations are misinformed as to how and where the document originated. Therefore, it is this writer's duty to explain.

The document which is entitled, Parliamentary Debates--HOUSE of LORDS--Official Report (Hansard, Vol.397, No.23, Jan. 18, 1979), originates from England. A copy of this 20 page document referring to the question, UFO's?, was the entire discussion of the debates in which every member was awarded their opinion. This word-for-word transcription was mailed to the home/office of one of our consultants, Maj. (Ret) Coleman Vonkeviczky, M.M.S.E. In turn, Coleman generously sent a copy of this explosive document to our Headquarters. Another copy was issued to a representative of a foreign country in order to be published in that country's language. In between its issuance and publication, the document made appearances at several UFO organizations. As stated previously, this is good but, let's not forget where the document

initially originated, to whom it was received by first and how it made its way to these organizations in the first place.

Therefore, we at the SBI congratulate Major VonKeviczky for giving us the opportunity to acquire this excellent UFO document. Furthermore, a detailed transcript of the debates will follow in von Keviczky's feature article, "CONFIDENTIAL".

#

Over the years we have heard of countless numbers of UFO documentation which has either been suppressed or totally covered-up. In light of several recent events, it seems to this writer, the old stereo-typed cover-up can no longer remain covered. Each day more and more evidence/documents are obtained indicating the existence of UFO's & acknowledgement of the condition by many governmental agencies. I have noticed several articles in national newspapers referring to UFO's. One such paper is the New York Times, which almost never talks of UFO's, ran an article from the U.S.S.R. Russia it seems is not on the side of the U.S.A. when it comes to UFO's. Many interesting facts are presented in the article and it has been reproduced for your reading pleasure and education. (see: following page)

Along the same lines, I have also noticed several articles that refer to alien beings making contact with our people very soon. These articles are also reproduced in order to show that our once skeptical, scientific minds are waking up to reality. Now they are changing their tune in favor of 20th century thinking. Unfortunately, their scientific brains are very slow operating and we must pay the price of waiting for them to discover what we have known all the long.

Space aliens 'scared of us'

ALIENS from outer space are frightened of landing on earth because of the world's nuclear weapons, claims the New Age Foundation, a group devoted to encouraging space aliens to land here.

Wayne Aho, the leader of the foundation, which has built a landing strip for alien spacecraft at its headquarters near Mount Rainier National Park, Wash., says: "They are afraid of us. They know about the earth's great stock of nuclear weapons."

So the group is now building a signal tower to calm the aliens' fears. When finished, members plan to gather around the tower and send friendly thoughts skyward. Aho says that by getting friendly with aliens we could learn their energy secrets and not have to wait in gas station lines.

'ALIENS WILL CALL US SOON'

THERE is a good chance scientists will make radio contact with alien beings within the next 10 years, predicts a top space expert.

"Detector techniques are getting so powerful that we will be able to do much better in our search for other planets and other life," Dr. Philip Morrison told GLOBE this week.

"My view is that when we look at the right place with the right receiver on the right frequency we will get an unmistakable signal."

"We anticipate that the signal will be full of interesting information."

"Some repetitive signal followed by identification like 'Hello, this is Radio Interstellar. Please listen to the following frequency.'"

This will be followed by better communications, says Morrison, an astronomer with the Massachusetts Institute of Technology.

"We won't be able to read the first messages," he said. "But then we'll learn the language."

Outer-Space Beings Will Contact Us Within 40 Years, Says NASA Physicist

Superintelligent alien beings will contact us within the next 40 years — and guide the earth into the galactic community, declares a renowned physicist.

And, says Dr. Robert Jastrow, director of NASA's Goddard Institute for Space Studies in New York City, because of their tremendously advanced evolution these creatures won't resemble humans. "They

may be black boxes filled with electronics or they may be rivers of electricity with very little bodily form. It depends on how many billions of years beyond us these beings are," he said.

Dr. Jastrow, who is also an author and professor of earth science at Dartmouth College, said he believes that "other life" exists elsewhere in the cosmos.

As for contacting these other beings, he said that since we began broadcasting with radio

and TV, high intensity signals have been moving into space at the speed of light.

These signals have already swept past about 100 stars, some of which may be sustaining life, he said.

"Word has reached these distant beings that there is something going on here," Dr. Jastrow asserted.

After deciphering the broadcasts from earth, he continued, "I am pretty sure these advanced forms of life will be interested in contacting their

brethren in the community that makes up our galaxy.

"It will take 20, or 30, or 40 years for their reply to reach us. That means, within the lifetime of most of us, we may expect to hear something."

Dr. Jastrow dismissed as "really nonsensical" the science fiction idea of the existence of alien beings with warlike intentions.

Dr. Jastrow believes the space beings will welcome the fresh ideas of earthlings, since

our planet is much younger than the rest of the galaxy.

The alien creatures will be so advanced, Dr. Jastrow predicted, that "their command of natural forces and communication would be far beyond our comprehension."

Armed with these tools, Dr. Jastrow maintained, "they would give us subtle guidance on our morality and behavior so as to prepare us for crossing the threshold and entering the galactic community."

NASA plans to pick up alien signals from space

THE National Aeronautic and Space Administration is quietly examining a plan to build special microwave radio receivers to pick up signals from outer space.

NASA astronomer Dr. John Billingham is spearheading the program, which is based on the possibility that an alien civilization may have been sending messages to Earth either intentionally or accidentally for countless years.

Dr. Billingham says the narrow channel of microwave signals is the only effective way of sending messages through the vast distances involved in space.

"Every day the world sends out

microwave messages accidentally," he says. "Radio activity here is high and some of it always escapes into space traveling randomly.

"The same could be happening on some other planet. If their wastage is being transmitted through space the way ours is, then we should be able to pick it up with these receivers."

The NASA plan is still in its development phase, but it is being regarded as a serious endeavor by those involved.

The project has received little

publicity for fear that it might be interpreted as some kind of official sanctioning of UFOs or Close Encounter theories.

But Dr. Billingham says: "With what we now know, it would seem to be against the law of averages that life has NOT formed somewhere.

"Their development may be a million years ahead of ours, or a million years behind—there's no way of knowing.

"If they are an advanced civilization, it's possible they have been trying to contact us for years.

"One thing is certain—if we don't set up our receivers and listen, we won't hear them."

Russians Seem United in Devotion to Flying Saucer Cult

By CRAIG R. WHITNEY

Special to The New York Times

MOSCOW, July 30—In this society of Scientific Socialism, there are some people who believe in Communism but not in God. There are others who believe in God but not in Communism. But all of them seem to believe in flying saucers.

Soviet science has put more men into space than United States technology has, but it has been unable to stamp out the advanced art form of the Russian rumor. Though two Soviet astronauts are even now circling the earth in man's longest space research mission, their countrymen persist in believing that they may be menaced or visited up there by beings from outer space.

"Why has the United States never published the whole story of the landing on the moon?" the director of one of Moscow's most serious and respected cultural institutions asked an American friend recently.

What whole story? the American innocently asked.

'Why Was the News Suppressed?'

"The flying saucers that landed next to Apollo 11 on the moon," the Russian replied with assurance. "Your astronauts took pictures of them, the saucers photographed the Apollo craft. Why was the news suppressed?"

Suppression of news is also an advanced art the Soviet Union, so it is easy for flying-saucer believers to be confident that official denials mean nothing. Besides, a student who was also in on the Apollo secret said, one of the astronauts later suffered mental depression, probably because of the trauma of the saucer incident.

Col. Edwin E. Aldrin Jr., who followed Neil Armstrong's first steps on the moon on July 20, 1969, did have mental health problems after the Apollo mission, but he saw no flying saucers. Russians greet this sort of assertion from their American friends with knowing, unbelieving smiles.

A Counterpart of Samizdat

Pictures of flying saucer apparitions over Soviet territory circulate among the intelligentsia the way underground literature circulates among dissidents.

"It's only logical that intelligent beings from other worlds are trying to make contact with us," said a leading poet not long ago. He pulled out two snapshots of vaguely saucer-shaped objects that were said to have appeared last August over Petrozavodsk in north European Russia.

Another writer says he was visited by extraterrestrial beings at his home in the forest. But he says he took them

seriously. As a token of their good faith, he adds, they gave him a mathematical formula that they said unlocked the secret of space flight by tapping the energy from stellar light. The writer says he himself did not understand the formula but he gave it to scientists who examined it and pronounced it genuine.

Evidence of a Crisis of Faith

Some critics of Soviet society who do not believe in flying saucers say such rumors spring from a crisis of faith in the official Communist ideology. Having no belief left, the critics say, people turn instead to superstition, prejudice and nationalistic feeling.

A musician says he was on a night flight to eastern Siberia recently when

he looked out the window and saw three bright lights — flying saucers — hovering just beyond the wingtip.

"I woke up the people in front of me, and they looked out and saw it, too," he said. "I was so fascinated I just watched for half an hour. But when I looked up again, everybody else in the plane had gone back to sleep."

He was disappointed. But for most Russians, being shown that you can believe in flying saucers is about as routine and unsurprising as being shown that you cannot believe what you read in Pravda every day. Everybody knows it, so why be surprised?

Russia Orders UFO Alert

In the first UFO alert ever ordered by a government, top Russian scientists have urgently asked citizens to report sightings directly to their country's official Soviet Academy of Sciences.

"This is the first open admission by our prestigious academy that secret UFO research is being conducted on its level," prominent Soviet UFO expert and geologist Prof. Aleksei Zolotov told The ENQUIRER in an exclusive interview.

By HENRY GRIS

"The academy is calling for help. The matter must be urgent."

The high-level Soviet action was triggered by spectacular clusters of sightings over the city of Petrozavodsk — sightings which have led at least one startled scientist to conclude that the aliens will contact humans very soon.

So important was the public appeal for information that the scientists chose the Jan. 21, 1979, supplement of Izvestia, the powerful, official government newspaper, to announce:

"The Academy of Sciences herewith requests citizens who have observed unusual events in the sky to report their

sightings with as many details and measurements as possible."

Soviet space lecturer and author Aleksandr Kazantsev revealed: "Exciting new information has been seeping through from Petrozavodsk concerning a spaceship that visited the area recently. Something major is going on."

The first mind-boggling Petrozavodsk encounter began on Sept. 20, 1977. As reported exclusively in The ENQUIRER, it was the first UFO ever to inflict damage on a city as it beamed down streams of light that made holes in windowpanes and paving stones.

There have been frequent UFO sightings in the area since then. And just recently came the most spectacular of all.

Soviet newsmen Nikolai Milov, in Petrozavodsk, told The ENQUIRER: "The UFO hung in the night sky for at least two hours. At an altitude of 60 miles, it seemed to be more than a half mile in diameter.

"It was irregular in shape, jagged, grotesque, with many protrusions of various sizes. Some looked like poles; others like disks on a stem. The body flickered with red and yellow lights.

"It was also the center of great activity as much smaller bodies appeared to dart away from it, while others seemed to approach and disappear into immense portholes."

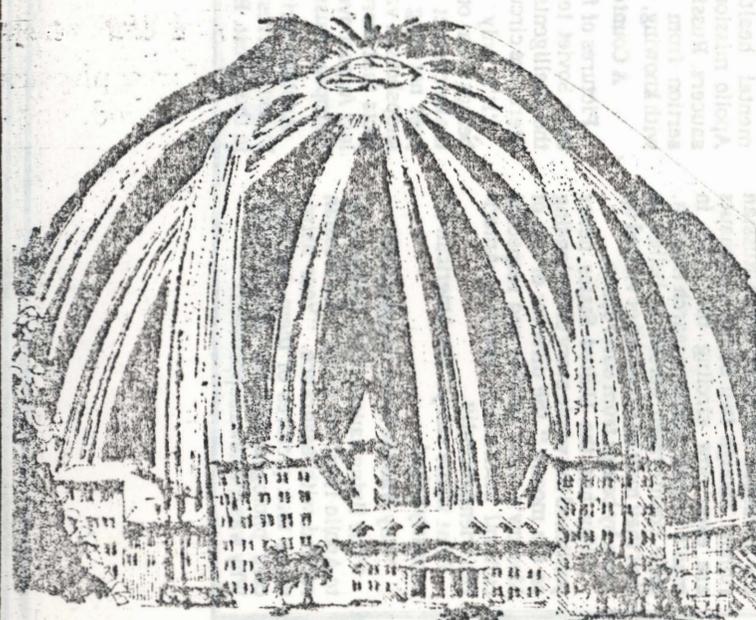

"In my view, it was indeed a mother ship from outer space," declared Soviet physicist Dr. Vladimir Azhazha.

"Its appearance seems to indicate that an extraterrestrial civilization is in the final stage prior to direct communication with earth."

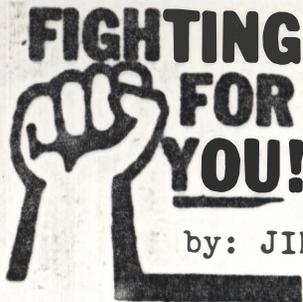

Added UFO expert Zolotov: "I do not exclude a first major landing from space in the Petrozavodsk area in 1979."

First UFO to Inflict Damage On a City

JELLYFISH-SHAPED UFO: Artist's impression — based on eyewitnesses' drawings — shows streams of light that made holes in windowpanes and paving stones.

by: JIM FELLOW

In past issues of the SBI Report, primarily issues # 1, 2, & 3, alot of statements are made about future goals of the organization and about new usages of equipment to better this Report. It may have sounded like propoganda but, we're happy to report many of these statements have come true or presently on the drawing board.

For example, we exclaimed we were planning new methods to make the SBI Report more attractive, comprehensive and legible. As you can plainly see from issue # 4 and this issue, we have come far from our very first publication. By the use of a Xerox 5400 Copier/Duplicator we are able to reproduce each month's issue of the Report more clearly/legibly than before. By the use of Staff Artists we have reproduced the Report more attractively and made it more interesting. By usage of many Staff Writers we have reproduced the Report more comprehensively. All these usages have made our reproduction time less consuming, thereby affording us the time to add, delete and edit the entire Report before final printing. Of course, we at the top, are never satisfied and constantly trying to think of new ways of improvement. One of these new ways is to have photographs.(in which we have hundreds) to be improvised into each issue. This half-tone method would no doubt require the services of a printer, which we are presently considering.

Next, we mentioned advertising many times over in our past issues. Lettering, sketches, lay-out and camera-ready prints are currently in the process of being prepared. Once this is accomplished, our Ads will be appearing in major UFO magazines across the world. In retrospect, radio and T.V. which is the most recognized form of advertismint is on the drawing board. This writer is currently negotiating for the SBI's own radio program in New Jersey and will keep you posted on future progression. Luis Molina, our new Director of Public Relations (see: SPOTLIGHT), is arranging several appearences of cable, public and regular T.V. shows in order to introduce the public to our organization. Subsequently, Luis is going to set-up lecture dates for Pete and I in the coming months at colleges where he is affiliated.

In order to educate and alert the naive public on the true facts about UFO's, Luis is planning a full-length documentary on UFOlogy. The documentary would be comprised of our lectures which makes great usage of sound effects, lights and music. The film, which hopefully will be aired on T.V., will be the first of its kind ever produced. Also along these lines, we have the honor and privilege of being the only UFO organization asked to attend the up-coming New York Coliseum Science Festival. The five day engagement should produce alot of new members and public awareness of our existence and function.

The SBI has once again been honored by the New Jersey Telephone Company. In its current edition and future editions of their telephone directories, the SBI's own Headquarters telephone number has been added to the inside front page

under important telephone numbers. Our telephone number appears after Police Control, Fire Control, Medical Control and Poison Control. It is listed under the category of UFO Control and its entire emergency controls numbers are presented in a peel-off sticker which is then adhered to the home telephone in the event they are needed. This too is a first for any UFO organization and we are working to have the control number appear in all the telephone directories in New Jersey and New York.

In our past issues we also make mention of a special Auto ID Plates (while on assignments). These auto ID plates are presently being reproduced by a printer. When they are completed they will be issued to all our Investigators and above at no charge. By the same token, we spoke of special authorized permission for the usage of red flashing lights or beacons while responding to the scenes of important UFO cases (landings/abductions). We have been turned down, which we expected, in using any red flashing/revolving lights in our transportation vehicles. However, city administrators are considering the usage of blue flashing/revolving lights (or amber). We feel this resolution will pass, but the red tape involved is incredible--so, be patient!

We've made mention of the fact that all SBI forms were originally prepared on a "shoe-string" type budget. Now that the organization has more funds, we are applying some of that money to print "NEW FORMS". Completed already are the Investigators Research Information Reports and will be mailed out to Investigators very shortly. Still at the printers are: new Introduction Forms, New Membership Enrollment Cards, etc. Once they are completed, they too will be distributed to the Investigating body.

Another statement made by us was in the form of Pete and I writing for major magazines. It comes with great pleasure to say, "this feat has been over-come." I personally am writing monthly feature articles for a new publication called, Central Jersey. The magazine can best be described as an "OMNI-type" and will feature color pages each month on different subjects of interest to the public. Each month the magazine will contain a UFO feature article which shall represent past SBI documented cases. Pete has written a feature story that is currently being reviewed by several major UFO publications (the better ones) and it is confident it will be published. So, if you are a Jersey resident--look for the first issue of Central Jersey on your news stands in Sept/Oct. If you don't live in New Jersey--we will print the details in a future issue of the Report on how and where to write and how much subscription to the magazine will cost. As for Pete's story--as soon as we learn who is going to publish the story we will inform our readers.

Still yet, another future goal of the SBI was to establish some sort of response team which is able to be mobilized within 24 hour notice and fly to any part of the United States to investigate important UFO cases. This goal is now a reality! We have put together a five man "Re-act Team" (which is capable of being increased to 10 men) who are all specialists in certain fields. With the compliments of an experienced pilot, supplied by Luis Molina, the "team" will be flown to any portion of the U.S. on a Cessna aircraft.

The fact remains that the SBI, very slowly, is acquiring

all the necessities of becoming-----"the best organized UFO research organizations of all time." Like building a house, we began to pour our foundation with a small crew. The framework was constructed by specialists in many fields. And the completed design was prepared by acquiring the use of professionals. Finally, the presentation to the public is coordinated by use of every available source in the media, radio, T.V., advertising and literary. By employment of all these aspects, our home (the SBI) becomes the only one of its kind around and hopefully, in demand by the public. Presently, we are decorating (supervising/co-ordinating/restructuring) our newly constructed organization to our members taste (needs/functions/goals). In any remodeling job, there is bound to be dirt, bruises, injuries and errors. However, the finally over-all remodeling is sure to win public praise and a sense of security and accomplishment self-satisfaction from its occupants (members).

Try never to forget we are "fighting for you" all the time. We have come a long way and will go even further in the future. It is a must to keep our patience, dedication, loyalty, self-confidence and self-control even during hard times and we will succeed.

A SPECIAL REPORT

A CLOSE ENCOUNTER IN MAPLEWOOD

by Jim Fallow

On July 14, 1979, I recieved a letter from a woman in the Essex County Community of Maplewood, N.J. In the letter she stated that her son and a friend of her son had viewed a very unusual object at a fairly close distance. The sketches provided in the letter led us to assume correctly that's what this lady was writing about was a Close Encounter of the Second Kind. Upon reading the letter in more detail-----we were dishearten to find that the occurance happened on June the 9th making it over a month old. Although the story in this month's Special Report will be interesting, it will by no means be of any scientific consequence because of a time involved in the initial sighting and the subsequent investigation. It will be an excellent case study for our Chief Investigators and Investigators and how not to wait to investigate a U.F.O. report, no matter how minor it appears on the surface. One of the cardinal rules of Ufology and of the S.B.I. was broken in this case, and that rule is to be on the scene within 24 hours of a U.F.O. sighting/encounter. The reasons are obvious! Any physical evidence that might have turned up in this case was negated because of the time involved in getting there. This might have been an excellent opportunity, any and all physical evidence, to be properly analyzed in the laboratory.

As for the case itself our two principle witnesses, Mike Fanney age 12, and Gregg Micetan age 11, were playing ball on June the 9th in a vacant warehouse lot located on Bennett Street in Maplewood. It was the Fanney boy who first noticed the object as it appeared to come out of the clouds. Having drawn the attention of Gregg, the two boys watched in awe as the U.F.O. appeared to descend almost touching the roof of the warehouse (this warehouse was not in use at the time of the encounter but has since been refurbished and is being used as a candy distribution center). Both boys stood motionless as the object almost touched the roof of the warehouse sending debris and small gravel from the flat roof scattering in all directions. Nearby trees were also noticed to have moved violently back and forth as the object neared them. Under examination and cross examination, both boys stuck fast to their story, that the object had indeed come close enough to the roof to blow off debris and gravel as well as the object sending down what appeared to be landing gear, or as Mike Fanney had described, "small balls or semi-circles" coming out from the corners of the objects. Although neither of the boys are avid readers into U.F.O.s or any U.F.O. Literature, the craft they described in their encounter was similar to an Adamski type craft, in that the balls or semi-circular spheres on the bottom of the craft were apparent and obvious. The witnesses further related that as the craft

descended to the roof, it stopped momentarily hovering above the roof. At this point the boys didn't know whether to run or stay to watch the incident. They decided to stay and as if some type of intelligence was inside the craft, the object took off directly vertical never touching the roof. It was at this point that the two boys became frightened and ran head long for home. During the interrogation of the two boys, it became apparent very early in the conversation that they were both still frightened and nervous. Since this encounter both boys have refused to go down to the scene by themselves at night.

For the record, it appears no time loss has occurred to either boy, as well as any E.M.E. effects on the lads. Neither Mike Fannee nor Gregg Micetan are suffering from headaches, nausea, dizziness, earaches, or anything associated with a Close Encounter. It is still apparent that the boys saw something that was not conventional to them and did frighten them.

Both Pete Mazzola and myself have discussed this case many times since it happened, and are both convinced that we may have had a piece of the U.F.O. puzzle within our grasp and it slipped through our fingers. As long as there are such things as UFO's, there will be reports of Close Encounters. The International Directors of this Organization believe that if this mystery is ever to be broken, it will start with the Close Encounters and all evidence that can be accumulated in such reports. We can not stress enough how important it is to be on the scene within twenty-four hours of any solid U.F.O. report.

** Last names of witnesses are pseudonyms. The real last names are on file at SBI Headquarters.

UFO

UPDATE

INTERCONTINENTAL U. F. O. RESEARCH AND ANALYTIC NETWORK

■ A Poor Presentation before the United Nations

United Nations General Assembly December 1, 1978 meeting approved without vote the Special Political Committee recommendation which rejected Grenada's proposed Three Members UN-UFO Committee (Hynek-Vallee-?) and instead accepted a draft decision which sounded:

"3. The General Assembly requests the Secretary-General to transmit the statements of the delegation of Grenada and the relevant documentation (ICUFON Memorandum) to the Committee on the Peaceful Uses of Outer Space, so that it may consider them at its session in 1979."

Authority of the United Nations informed ICUFON that former Prime Minister Gairy's sponsored scientific presentation to prove the UFOs existence was so poor without any convincing power to the nations' representatives that the Committee did not grant any priority to place on the agenda of its recent session from June 18 to July 6, 1979, in spite of the General Assembly recommendation. Regarding ICUFON's MEMORANDUM - he remarked - that its governmental documentation, against they were "declassified" - as discussion subject remained as confidential.

■ "FLYING SAUCER CULT" - says The New York Times.

The New York Times as usual tried to be always the "favoured son" of the government and the NASA, in debunking UFO evidences and discrediting the non-governmental UFO research. Recently "discovered" that USSR seems to be united in devotion to "Flying Saucer Cult".

The new "UFO expert" columnist motivated with the Petrozavodsk case on Sept 20, 1977, and obviously didn't attention that its official photograph was published one year later in the Pravda on Sept. 23, 1978, and after competent governmental investigation. The "well informed UFO Buff" had no idea at all that the USSR's cult leader is the frightful Soviet Air Force General Profiry Anatol STOLJAROV, who became appointed still in 1967, by their Joint Chiefs of Staff.

■ Straight Question to the U.S. Air Force?

From the year of 1970 the U.S. Air Force informs the public that with the termination of Project Blue Book, the AF regulation establishing and controlling the program for investigating and analyzing UFOs was rescinded.

Whereas, - a declassified US AF Air Staff Summary dated on 20 Oct. 1969 definitely states:

" Reports of UFOs which could affect national security would continue to

be handled through the standard Air Force procedure designed for this purpose."

If anyone would not be satisfied with the date(1969) should consult with the NASA Information Sheet issued on February 1, 1978, which sounds as follows:

"Reports of unidentified objects entering United States air space are of interest to the military as a regular part of defense surveillance".

"According to the international law and order, UFOs are illegal intruders in the Earth's airspace and violating the nations territorial sovereignty.(It is long time overdue for investigation and immediate action of the U.N. Security Council.)

The UFO forces as have been verified - are equipped with dangerous arms, and carrying out forced strategical reconnaissance activity over all the nations "off limits" aerial zones, military establishments as has been also admitted by the Pentagon in USA.

Their assignment over decades is unknown before the nations governments, including their home base and origin which are unidentifiable upon our celestial body.

When this activity was qualified by the world one of the greatest military superpower as "VISITATION" which doesn't create any prospective danger to the national/international security - then I start to understand for what reason is the insane military arms race with the USSR? - To maintain with them the global peace. Consequently a World War or War in Space with billion of innocent victims upon the ruins of our civilization will be within this task only a trifle unexpected coincidence," - stated Major (Ret.) Colman S. VonKeviczky the noted international military scientist and director of ICUFON.

■ Dr. J. Allen Hynek means "INTERNATIONAL"

British UFO Research Organization (BUFORA) between August 26-27, 1979, held its first London International UFO Congress.

The only nominated "international" guest speaker was Dr. J. Allen Hynek. No other name was mentioned even the British Earl of CLANCARTY who launched the first UFO debate at the HOUSE OF LORDS and is a known pioneer in UFO research as Brinsley Le Poer Trench.

Does already Dr Hynek represent the whole world - that his name as guest speaker is a pledge to declare a congress as international?

■ 12th International UFO Congress in Europe

The German UFO Research Organization (DUIST e.V.) announced its 12th international UFO congress in MAINZ, West Germany. The featured speaker is the noted Skandinavian UFO pioneer AF Major Ret. Hans C. PETERSEN. France, Spain, Portugal, Italy, Denmark, Norway, Sweden, Finnland, Holland, Luxenbourg, Yugoslavia announced their participation.

Karl L. VEIT, the President of the DUIST e.V. had organized 11 UFO International Congresses. The most famous amongst them the 7th, presided by Prof. Hermann OBERTH the "father of space travel and rocketry", featured speaker, Maj.Ret. VonKeviczky, chaired by Karl L. Veit. The MAINZ UFO RESOLUTION as result of this congress, participated by 24 nations, laid the foundation of the coordinated international

3

UFO research of the nations in relation with the United Nations Organization.(1967)

■ Former Prime Minister Gairy hunted by the F.B.I.

Sir Eric M. Gairy recently trying to recruit mercenary forces amongst the Cuban right-wing exile in California.

His headquarters in San Diego, Calif. is hunted by the FBI to produce violation of the US Neutrality Act that bars anyone in USA conspiring to overthrow other government in force. Since his fiasco before the United Nations with the Hynek-Vallee parapsychological team, seems the UFO forces abandoned to assist him to regain his Grenadan "Kingdom".

■ "Colman" and the F.B.I. or the SBI and the FBI

The SBI(Scientific Bureau of Investigation) recently discovered amongst the FBI(Federal Bureau of Investigation) declassified UFO documentation a "criminal indictment" against COLMAN (Maj.Ret. C.S.VonKeviczky), who in February 1966, encouraged to present a Memorandum to his Secretary General U THANT, which referred the UFO's global operations' international control, to STOP any hostile or armed confrontation,- and seek contact and communication with the UFO forces.

GRAPEVINE

by MARTY CANNON

DATELINE: San Diego, California---Former Prime Minister of Grenada, Sir Eric Gairy, has gone a long way since his first speech to the U.N. General Assembly in October 1978. The ex-mystic leader of the small country proposed to the U.N. to investigate UFO's on a world-wide scale using U.N. funds. Besides making a fool of himself before the eyes of 133 nations, many UFOlogists and the media, it is believed the C.I.A. may have used measurers to have his opposers regain control over the country. At present, the former leader is pumping **gas** at a filling station. Instead of giving out "green stamps" to customers, Gairy recites his famous speech of "butterflies & flowers". It is this writer's opinion the one-time Grenadan leader should not be filling the tanks of the autos with gasoline, rather with HOT AIR!

DATELINE: New York City, New York---One of former Prime Minister Sir Eric Gairy's second-in-command leaders is currently employed by a New York Life Insurance Company. As to a recent article from the N.Y. Daily News, it is this writer's suggestion he purchase a policy for himself and sell Gairy one too!

Session 29

Propulsion Concepts for Galactic Spacecraft

79-1352

Hydromagnetic/UFO Propulsion Research

A. Holt, NASA Johnson Space Center, Houston, Texas

Grenada guards its skies

St. George's, Grenada (AP)—Fear that ousted Prime Minister Eric Gairy is planning a return has prompted Grenada's new government to issue an order to shoot down any plane using the island's air space at night without permission.

Acting Prime Minister Bernard Coard announced the order in a radio address to the eastern Caribbean island's 110,000 residents. A week ago, the government issued a military alert when suspicious boat movement was reported near the island.

The concern of the revolutionary government, which overthrew Gairy in a bloodless coup March 13, is that the former prime minister may be gathering mercenaries in the United States. Grenada gained independence from Britain in 1974.

DATELINE: North Atlantic Defense System, Colorado---It is believed the SBI is trying to confirm reports of UFO's disrupting vital defense coverage from our NORAD base. It is also rumored, Bob Pratt, reporter for the National Enquirer is presently on the scene to try and determine what transpired and if anyone will talk.

DATELINE: Las Vegas, Nevada---It was noted in the May 1979 issue of Astronautics & Aeronautics (Vol.17, No.5), that the 15th Joint Propulsion Conference was being given. It was noted from the agenda, Session #29 entitled Propulsion Concepts for Galactic Spacecraft, one of their guest speakers was A. Holt, NASA Johnson Space Center. His speech was entitled, Hydromagnetic/UFO Propulsion Research. A copy of this transcribed speech in being asked for by the SBI. I wonder what NASA can speak about UFO propulsion systems?

Reader Feedback

by THOMAS HERBERG

AUGUST 1, 1979.

Lewistown, New York: A Westchester Parkway Police Officer, on duty during the "grave yard shift" (midnight to 8A.M.), observed a large glowing object in the sky at 2:10 A.M. The object, described as bigger than a jumbo-jet, hovered near Pound Ridge Reservoir for several minutes and then performed feats of aerobatic maneuvers for several more minutes. The brilliantly glowing white object zig-zagged, made 90 degree right angle turns and flew at fantastic speeds. The officer (name confidential) stated, "the object had three or four bright white lights which made it impossible to determine its true shape." Finally, after 5-6 minutes of observation the UFO flew out of sight at tremendous speed over some mountain peaks.

(COURTESY OF SBI FILES)

JULY 15, 1979.

Libson, Portugal: A glowing object, giving off a very intense blue light, was seen moving across the capitol city at dawn one Sunday. The light was so bright that according to witnesses, "it looked like daylight at around 12 noon." The phenomenal event basically took place in the area of Portela (Libson Airport). The UFO was sighted by many employees working at the time, the flight crew of a T.A.P. airplane (Portugese Airways) taking off from the runway, and by many other crews of planes either landing or taking off. Other witnesses, in vehicles at the time the UFO passed over them, state, "they felt a slight loss of engine power, as if the engine were going to stop."

(COURTESY OF HARRY JAY/SBI TRANSLATOR)

APRIL 19, 1979.

Fort Worth, Texas: Don Maunder, a flight instructor at Meacham Field, was flying about 3000 feet with an instrument pilot under the hood, recently, when he saw a large silver-colored object, almost on a collision course, fly by, underneath the plane. Very clearly on top of the object were the initials USA. He had never seen anything like it before, except in newspapers and magazines. It was flying very fast very low and clearly was a UFO. Once about 9:30 P.M., at Meacham, three young men waiting for a plane to come in, were watching over Carswell AFB, when three lightly colored orange objects, in a pyramid formation were spotted. They watched for 5 minutes, when suddenly they realized no one had a camera.

(COURTESY OF JOHN F. SCHUESSLER-Cross Country News)

MAY 2, 1979.

Manila, Philippines: Military authorities were investigating a reported landing of multi-colored UFO's in a central Philippine village, the official Philippine News Agency said. The agency said Col. Paterno Lomongo, constabulary provincial commander, was told by local police that on April 19 they saw a "mother ship which later spewed out smaller UFO's" over the town of Tahsay in Negros Occidental province nearly 300 miles south of Manila. The "mother ship" reported by the witnesses, led the smaller UFO's into a "V" formation flying toward a mountain and eventually landing in a valley. The objects were also seen by motorists and residents of the provincial capitol of Bacolod and nearby towns, PNA said. It was the first reported landing of UFO's in the Philippines, although many have been reported flying.

(COURTESY OF JOHN F. SCHUESSLER-Houston Chronicle)

MAY 21, 1979.

Davao, Philippines: An American scientist said he and 600 villagers saw an UFO that was emitting flashes of light over the Philippines' highest peak and near their huts. Ron Kruppa, told Davao officials he saw a round, ballon-like object moving over Mount Apo, at the edge of Davao, 600 miles south of Manila. There have been hundreds of reports of UFO since April and military authorities are investigating them. The UFO appeared at 3 A.M. and was viewed for 20 minutes. The village is at the bottom of 10,311 foot mountain where the scientist has been living for 2 years. The object was also noticed by the villagers to give-off a strobe-like effect similar to one produced by a camera. They all observed objects moving inside the UFO before it allegedly landed behind a cluster of trees. After 20 minutes the UFO ascended and disappeared into the sky.

(COURTESY OF JOHN F. SCHUESSLER-Arkansas Gazette)

MAY 28, 1979.

Manila, Philippines: A disc-shaped object with flashing lights sailed over a main island of Luzon. The Daily Bulletin newspaper said residents of Legazpi in Albany province, 220 miles southeast of Manila rushed out of their homes to view the UFO and were "entranced" at the colors it emitted before it disappeared over the eastern horizon. It was the second UFO seen over the Philippines in a week.

(COURTESY OF JOHN F. SCHUESSLER- Houston Post)

DECEMBER 21, 1979.

London Mills, Illinois: Rhonda Brashear, of London Mills and Paula Helle, of RR # 2/Ellisville observed a tubular UFO on Rts. 116 & 97, at about 7 P.M. The UFO hovered and circled their car and was close enough to their car that they could have almost have touched it. It then took off to the east after circling the car once at a fantastic speed but with no noise at all. The UFO was said to be almost the size of a private plane and was comprised of two parallel tubes and one perpendicular tube with no windows that they could see.

(COURTESY OF JOHN F. SCHUESSLER-London Times(Ill.))

APRIL 6, 1979.

U.S.S.R.: Russia has become the first country to order an official UFO alert. People have been asked to report any sightings directly to the Soviet Academy of Science. A leading soviet scientist said, "this is the first admission by the academy that secret UFO research is being conducted on this level. The academy is calling for help. The matter must be urgent." The high-level Soviet action was set-off by spectacular sightings over the city of Petrozavodsk--sightings which have led scientists to believe that space creatures will contact humans soon. A leading Soviet lecturer stated, "excellent new data has seeping through from Petrozavodsk concerning a spaceship that visited the area recently." (Sept/77). The UFO was reported to have beamed down light that made holes in the paving stones. New sightings are said to occur frequently in that area since then. (See: The National Enquirer headline feature story on this encounter)

John F. Schuessler, to those who do not already know, is UFO propulsion expert for the UFO organization called, MUFON (Mutual UFO Network). We at the SBI Staff thank John for all the recent news clippings mailed to our Headquarters. John, who has researched UFO's for many years, and some of his colleagues are aiding SBI directors whenever possible and vice-a-versa. It is indeed an honor to have Mr. Schuessler take time-out from his important duties and correspond with us. John Schuessler can only be described as "an asset to UFOlogy."

by DOROTHY SOULTANOKIS

Some of our readers may have noticed by now (Staff Page), that we have a new Director of Public Relations. It appears after 4½ months of holding this same position, Joan Studer (former Director) was asked to resign by the International Directors. Pete and Jim are very lenient in their ways and do give a person enough rope to hang themselves. After many months of promises, the former Director failed to produce even one lecture, one new member from her own doing, or one new type of promotional idea. Seeing the SBI's public image in danger--the International Directors took action and appointed Luis Molina to the post.

Mr. Molina, who is 30 years old, lives in New Jersey. His qualifications and experiences are highly visible and noted. They range from: Assistant to the Dean at Livingston State College; Adjunct Professor at Jersey City State College; Research co-ordinator at Rutgers University; Planning Intern for N.J. State Dept. of Community Affairs in Trenton; Research & Writting Grantee in New Brunswick; Planning Intern for Union County Planning Board in Elizabeth.

Luis holds residency for his artistry in eight (8) private schools for his Video, photographic and film animation experiences. Besides this, in the fields of art, media and communications the following are noted: Audio Lab Assistant at Rutgers University; Communications Adjunct Professor of Visual Arts at Mercer County Community College; Producer/Director of Film at Rutgers University; Consultant to N.J. Public T.V.; Chairperson/Workshop Co-ordinator of Film & Video at Middlesex County Cultural & Heritage Commission; Guest lecturer of Film & Video at Hamilton Township Board of Education; Workshop Co-ordinator of Film & Video at Burlington County College; and Co-ordinator/Producer/Director of Film & Video in his own private business of making documentary films.

Molina's seminars, lectures and former film productions and publications speak for themselves. For example, he has produced/directed nearly 20 documentaries which have won him numerous awards and apprasials. His skills in video production, filmmaking, darkroom techniques, photography, researching, planning, coordinating and college instructing makes him worthy of his new title.

Pete and Jim feel confident Luis Molina's promises of making a documentary on UFO's based on their lectures, analyzing photographs, video recording UFO movie film footages, acquiring future lectures in behalf of the SBI, obtaining new membership/consultants in influential positions, writting & obtaining grants from private and institutionalized foundations for UFO research, and giving of his time in order to help find a solution to the UFO phenomena---are all meant with sincerity and truthfulness and will all come about due to his actions.

Furthermore, Luis is a team member of the SBI's newly instituted "Re-act Team". He has already obtained the free usage of a pilot's Cessna in order to transport the "team" to any part of the U.S. in the event a UFO investigation is necessary. Pete, Jim and

Luis have found their friendship and compatability overwhelming due to their similarities in: age group, knowledge of the UFO phenomena, goals for the SBI, and personalities. We at the SBI staff feel this is the best thing that has ever happened for the organization since its incorporation. We certainly welcome Luis Molina's experience and assistance to the SBI.

#

Occasionally, even I make mistakes!!! Watching the dynamic-duo (Pete & Jim) from behind-the-scenes, fighting for truth and unsuppression of UFO data, taking on top-notch UFOlogists who are mostly the biggest "con artists" around, editing/publishing this Report, inventing and trying new "unheard of" techniques, and coordinating every phase of operation within the SBI and their own personal lives---leaves me in stupor. The events which take place at our Headquarters never ceases to amaze me and thereby, causes me to sometimes err. For this I apologize and rectify the matter here and now.

While writting this column each month, I failed to give credit where credit is due and recognize special persons within our organization. First, we will not welcome one of our Consultant's to the SBI because he has been with us since its beginning. However, I will try to explain something about him and the important role he plays for the SBI's future.

Arthur George Blackwell accepted Consultantship into the SBI during its very first month of existence. The field of specialty was in Aeronautics. The reasoning behind this can be seen in Mr. Blackwell's resume: 30 + years active duty for the U.S. Air Force; knowledge of aircrafts and their capabilities; access to psychological stress equipment and/or information; access to consultants for advice in radar, aerial photography; and friends who are pilots, aircraft mechanics or technicians.

At present, Arthur is an Air Technician within a department of the government which MUST remain CONFIDENTIAL. But rest assured, the position is by far the most significant in "feeding back" data to the SBI on UFO's causing concern, danger, or if a vital encounter is being suppressed by our government. Mr. Blackwell is one of the many Consultants who are in key positions to inform the SBI events which our government may forget to tell us (the public). Arthur, as many of our other consultants, members and staff, has served the Armed Forces during a time of need--during WAR. He and others have done so understanding they have fought to keep America free and democratic. In essence, this free and democratic society has the right and priviledge to know what may or may not cause them concern, as to draw their own opinions and conclusions. If this Constitutional Right is violated, than millions of Americans have died or served for nothing---all was in vain!

That which may sound like treason is not! The SBI only feels an obligation to inform the American public to the true facts about UFO's under the provisions of the Freedom of Information Act and the Freedom of Speech Amendment. If, in the event any vital data on a national security level reaches its way to SBI Headquarters, the SBI International Directors have sworn to the Staff they will not

pass on the information to the public. If the data might endanger our military strategies, the International Directors consider themselves Americans first and UFOlogists secondly.

Nevertheless, we appreciate Arthur Blackwell's support in our battle to solve the UFO phenomena and inform the public. We also salute his courage to have his name mentioned in our Report, yet, respect his wishes of confidentiality in an area which may bring him reprisals.

#

Next, I will give acknowledgment where credit is due! As you may or may not know, the SBI acquired the assistance of a sculptress to recreate the likeness of the most predominantly seen alien being. Type # 1, as you recall, is 3½-4½ feet tall; has a large elongated head; has wide-oval slanted eyes with no-pupils; two small holes in the face representing a nose (nostrils); has a small "pencil-like" lips representing a mouth; either two very small ears which are attached evenly to the sides of the head or none at all; has three fingers and a thumb or four digits on its hands; has very long arms extending to its knees; is short legged; has a "chalk-white" or grayish skin tone; speaks by means of telepathy; usually wears tight-fitting or one-piece clothing which covers its body from neck to feet; and finally, they all look alike (possibly clones), (see: SBI Report, Vol. 1, No.1, April 1979--"The Year of the UFO")

From many tedious and long hours of research and applying to scale, Marilyn Holland reproduced a beautiful image of the alien in bust form. The bust shows off Marilyn's talents which she received in college. She attended Queens College after graduating from Fashion Institute of Technology (N.Y.) and received a Bachelor of Arts in 1967. Applying her degree in a secondary school as a teacher, she continued her college credits at Jersey State College whereby she earned a Masters Degree in Art. Marilyn's talents in ceramics, sculpturing and portraits have won her recognition enough to present her works in many art galleries. At the present, she is currently engaged in a "one-person show" for such an art gallery where she proudly has her works of art on display. Marilyn, who is married, has four children and deserves praise not only for the bust she made but, for taking care of and raising four children.

Needless to say, what good is a head without a body! So, a body for the alien bust is being put together from a child's mannequin (less the head) and filled with sand. The head is going to be attached to the body by inserting a steel rod that will join both in place. When the process is completed, the true-to-life alien will be clothed according to many descriptions from documented cases. "OSCAR", as the being has become known, will make its grand debut at the New York Coliseum's Science Festival (Sept. 26-30) where the SBI will have a booth. The booth will enable the public to buy UFO documents, sign our Petition to the White House, enroll as members or subscribers, or meet one of the SBI's abductee witnesses (Marc Brinkerhoff) who will be selling his fantastic art works in the form of art reprints, UFO buttons, and coloring books.

Oscar, which has received its own notoreity from the public and media already, will be "the 1st of its kind in the world" to represent and show the public/media what we are dealing with. If it

were not for Marilyn Holland's great talent, this would never have come to be. I personally have seen the alien bust several times and the recreation scares me to death!!! This is how well Marilyn has captured the being's likeness.

#

EVERYONE in the New York area between September 26 through September 30 is invited to attend the Science Festival at the New York Coliseum to meet: OSCAR, Pete, Jim and Marc, and a host of other members of the SBI. Bring your family, relatives and friends--
"it will be an experience you will never forget."
