S. P. A. C. E. (Saucer Phenomena and Celestial Enigma)

The Air Force says that it has no **PHYSICAL EVIDENCE** (physical meaning 'something you can touch') that such things even exist. In the words of Capt. Edward J. Ruppelt, retired, who served three years at Wright Field, Dayton, Ohio, as Chief Investigator for Project Bluebook **WHAT CONSTITUTES PROOF??**—Does a UFO have to land at the River Entrance to the Pentagon, near the Joint Chiefs of Staff offices? Or is it proof enough when a ground Radar Station detects a UFO, sends a Jet up to intercept it, the pilot sees it, and locks on with his Radar, only to have the UFO streak away at a phenomenal rate of speed? Which is **PROOF?**

May 1962

Bulletin No. 65

X15 FILM SHOWS MYSTERY OBJECTS Pilot, Astronauts say they saw 'Flying Discs'.

SEATTLE, May 11 (AP) - Famed test pilot Joe Walker says films taken during his recent flight in the rocket-powered X15 experimental plane to a record height of 246,700 feet showed five or six mysterious objects.

It was the third report of unexplained objects at high altitudes. American Astronaut John H. Glenn and Russian Cosmonaut Gherman Titov reported sighting strange objects during orbital flights around the earth.

Walker, a pilot for the National Aeronautics and Space Administration, made the disclosure at the National Conference on Peaceful Uses of Space yesterday. He was one of an eight-man panel of American space explorers discussing experimental flights. Glenn also was on the panel.

SIGHTED VERY HIGH

Walker said the film was from a camera mounted on the fuselage of the X15 and pointed toward the rear. He said the objects appeared as the plane arced over the top of its flight and headed for earth.

"I don't feel like speculating about the nature of these objects", Walker said. "All I know is what appeared on the film in later study. I saw nothing myself during the flight of this nature.

"From what we can tell, they seemed to be disc-shaped, or perhaps even cylindrical. But it's impossible to estimate their size or their distance from the camera."

Glenn who reported seeing firefly-like objects during his three orbits, was questioned about reports that they might have been condensed crystals of water vapor from his capsule - snowflakes.

"I don't feel they were snowflakes, or paint peeling off the outside of the capsule",

he replied. "I don't feel they originated from the capsule at all, because some of them were coming toward me."

He said the objects were "about the size of a firefly and about the same color, a greenish-yellow. There seemed to be a great number of them, about 8 to 10 feet apart traveling somewhere to five miles an hour either faster or slower than the capsule."

Titov has said he noticed something like fireflies during his 17 orbits. He said he saw them first from the booster and then from the retro rockets. (Los Angeles HERALD-EXAMINER, Friday, May 11, 1962, Credit L. Johnson, Kathryn Diehl, Ethel Kulp and Gladys Fusaro.)

- - - - -

Now of course, what good is a mystery without an "explanation".

Now, where was it that we read that the "skin temperature" of the ship was somewhere in the 600 degree range on these flights?

Oh, well, anyway it was ICE!

- - - - -

'SPOTS' ON X-15's RECORD TRIP TERMED ICE FLAKES

EDWARDS AIR FORCE BASE, Calif. (UPI) - The "mysterious objects" filmed by the X-15 rocket plane on its world record altitude flight two weeks ago were actually flakes of ice.

Engineers for the NASA, after studying films taken on the flight to 46.7 miles high, concluded the "spots" were from ice flakes off the aircraft's fuel tanks and caused by liquid oxygen.

Joe Walker piloted the X-15 April 30 to the highest man ever has flown in a winged aircraft. He disclosed filming of the "unidentified objects" during a space flight panel at the 2nd annual conference on peaceful uses of space in Seattle, Wash. Walker himself did not see the object in his

flight to 246,700 feet.

"The original film which revealed the objects came from the camera mounted on the aircraft's tail," a NASA announcement said.

"However, additional film from a camera located between the X-15's instrument bay showed ice breaking off the plane." (Buffalo COURIER-EXPRESS, N.Y., May 16, 1962, Credit Gladys Fusaro, Huntington, N.Y.)

MYSTERIOUS OBJECT SETS TRUCK ON FIRE

BOIESTOWN (Special)-- A mysterious object, which lit up the sky over a wide area of the province Wednesday night, is believed to have fallen on the Wendell McFadgen mill yard property near here.

The object apparently set fire to a truck parked in the yard, which is three miles above Hayesville, York County, on the McBean Brook. The fire was put out by use of mud.

The object, which has still not been identified, is described as having been very hot and looking in its final form as something like jelly.

Forestry service personnel attempted to get into the area to investigate but the road so far has been too muddy. (THE DAILY GLEANER, Fredericton, N.B., April 6, 1962, Credit Gene Duplantier, SPACE, SAUCERS & SCIENCE, 125 Woodycrest Ave., Toronto 6, Ontario, Canada.)

* * *

"BALL OF FIRE" SPOTTED AGAIN

PORT ARTHUR (CP)-- The appearance of a mysterious "ball of fire" was reported over the Lakehead Thursday night.

Mark Sauerbrei, Ontario department of lands and forests fire protection supervisor said he saw a "bright, falling light" in the southwest sky at 10:30 pm. His description coincides with similar sightings of a mysterious light in New Brunswick Wednesday.

He described the object as larger than a falling star (meteorite) with a bright intense yellow glare. (THE SARNIA OBSERVER, April 7, 1962, Credit Gene Duplantier.)

* * *

Item following a general report of the winter activities of the ice-cutter (Coast Guard) Ojibwa:

LAKE LIGHTS ARE MYSTERY

In reviewing the Ojibwa's annual battle with Lake Erie ice yesterday, Chief Warrant Officer Kenneth N. Black told of the ship's strange encounter with mysterious "unidentified flashing light."

Black said the lights were sighted off

Erie, Pa., last March 17. The Ojibwa wintered in Erie. He said the lights were seen by several persons including the ship's crewmen.

The ship got underway and crunched through very heavy ice all the way to the Canadian shore. "The closer we moved toward them, the further away they seemed to be," Black said.

He said he believes the lights were the result of unusual atmospheric conditions causing lights to be refracted on the lake. (Buffalo COURIER-EXPRESS, N.Y., May 2, 1962, Credit Gladys Fusaro, Huntington, N.Y.)

EDITOR'S NOTE: We must apologize as is our custom, twice yearly to explain the reason for your receiving this bulletin late. In the business in which your Editor is engaged, we have what is known as the "seasonal rush". This occurs in November and December, and again in May and June of each year. During these times it is physically impossible to maintain schedule. Many of you who have been with us over the years realize this and have been understanding about it. This explanation is only for those new subscribers, who may feel that something has happened, or that they have been forgotten. Tain't so! Thanks.

* * *

There has been much speculation concerning the Tasmania mystery that has since been explained as "whale blubber", as well as many other "oddball" specimens which are discovered from time to time, so we present this "theory" from a UFO fan. Not that we are prepared to accept it, but we do find it of considerable interest. (Editor)

Dear Editor:

You will find in the following paragraphs the mention of a few recent developments, discoveries and consequent suggestions, which, I humbly believe, will push forward the science of ufology.

As far as I know, these suggestions have not yet been published. You may do so if you wish.

As is well known by now, cryobiologists are able to take living red corpuscles at room temperature, plunge them into a medium at 345 degrees below zero Fahrenheit and then resuscitate them, provided they thaw them out as fast. They have run similarly successful experiments with spermatozoa and even fertilized rabbit-ova. They are progressively succeeding with more and more complicated

organisms in lower and lower temperatures.

These truly scientific developments, plus the recent discovery of live monsters, which expert taxonomers cannot fit into the animal kingdom of this our geological era, lead me to believe that God, through His laws of nature, has deep-frozen eons ago many and various organisms, which, given the proper circumstances, thaw out and revive.

To corroborate this view, let me give a few recent examples: The Associated Press reported that at the beginning of March 1962 a 20-foot, 7-ton monster was washed up on one of the beaches of Tasmania. The Australian scientists were, and perhaps still are, baffled as to its origin, relationship and identity. I don't think I am guessing too wildly when I say that NORMALLY there should be others like that, at least in that area: brothers, sisters, cousins, in-laws and other relatives. Now, if there were or there are others in the expected numbers, it seems to me they would have been seen. Considering the huge size of this animal; the increasingly great number of humans plowing on, under or above the oceanic surface, or living, working and playing on or near the beaches, I feel that someone, somewhere, sometime or other would have come in contact with this beast's relatives through his eyes, or nose, camera, binoculars, etc.

I submit that none as far as we know were contacted, because there weren't anymore, at least not many of them. How do I explain this solitary specimen? He and many others like him, thousands, perhaps millions of years ago, suddenly deep-froze in a cake of ice because of some cataclysmic change, like for instance a sudden change of direction in the earth's axis. This prehistoric animal supposedly remained there for ages entombed in ice which recently detached itself and floated away as an iceberg. Then 'accidentally' it drifted right over a sub-oceanic volcanic eruption, which had enough heat to thaw out almost instantaneously 'casket' and 'cadaver', melting away the one and resuscitating the other.

Another recent and as fantastic riparian event in the same general area may help to explain this one or vice versa: A few days before and up to December 21, 1961, along a 200-mile Australian coastline, "millions of fish" of many kinds, some weighing up to 20 pounds, swam with their heads above water and hurled themselves on the beach. The experts, one of them with 40-years experience

in that field, said they had never seen anything like that and that they had no satisfactory explanation.

I suggest that one or perhaps a school of these recently de-iced prince of the oceans, charged at them with a prehistoric weapon, say an electromagnetic ray, against which modern fish have no defense, having survived in their evolutionary struggle against enemies with different weapons. Probably this 'beam' although not lethal in itself, disrupted the fishes' 'radar system' and caused them to panic.

Further support for my hypothesis that prehistoric animals, having been in suspended animation for ages, are now actively living again, will be found soon, I hope and pray, by polar explorers, who will apply the above mentioned principles of cryobiology when they thaw out frozen organisms. Every ufologist now knows that around 1954 scientists in Paris ate mammoth steak from an animal which had been encased in ice for thousands of years. Since these pachyderms were tropical and since the fodder found in their mouths and stomachs was yet unaffected by the digestive enzymes, it is logically assumed that some very SUDDEN cataclysmic upheaval froze them there on the spot with lightning speed while entombing them in freezing water. I suggest that this cold was so fast, so all-embracing and so intense that it didn't remove life, but just arrested it; and that careful cryobiologists would have resuscitated them by applying very intense and all-covering heat such as would be found in a bath of water saturated with various dissolved minerals and boiling under fabulous pressure, such, as I presume, is found naturally between a tall column of ocean water and the gurgitating 'mouth' of a violently active suboceanic volcano. The resultant turbulence, caused by the great disequilibrium of the various forces at work, would be just the thing required for the proper application and distribution of heat.

Not only a quick freeze-thaw, but also dehydration, implantation of certain chemicals will cause in varying degrees of success a dormancy-resuscitation phenomenon.

Therefore I expect that some day, perhaps when the Egyptian pyramids are 'dismantled' prior to the planned flooding of the area, the scientists will resuscitate (which is not resurrect) prehistorically 'embalmed' or 'fossilized' human 'corpses', who will continue to live, and after learning one of our

languages, will tell us about 'the good OLD days' and perhaps something 'out of this world.' God grant it.

Some of us believe that since some monsters do not seem to fit in our animal kingdom, they must have been brought here from other worlds by the ufonauts. I, for one, am changing somewhat my flexible views on that in favor of the above theory, which, I believe accounts for at least some of the monsters. Along that line, I expect that soon someone will run across the corpse of a huge and unidentified TERRESTRIAL animal floating in the ocean or washed on the beach. Maybe the 7-ton beast mentioned above is one of them, for, Australian scientist, Bruce Mollison who couldn't identify it said it was "neither FISH nor fowl". (Emphasis mine) Chances are he (the monster) is not an aquatic animal. Then how did he get there? He floated in an iceberg, I suppose; then thawed out. But he was too far from shore. So he drowned.

Yours truly,
Rev. Guy J. Cyr, S.M.

* * *

Your Editor continues to take a verbal shellacking from the "unholy three" of UFO-ogy. Every Pro-American article used in this publication is an opportunity for these "three" (I wonder if they dress in black--- Gray Barker?), to take up the battle cry of "FASCIST"!

Now Curtis Fuller joins the cry -- Curtis Fuller is Editor of Fate Magazine in case you did not know. He joined the "pack" in the form of a letter to the Editor in Jim Moseley's SAUCER NEWS. He congratulated Moseley on his article "SAUCERS AND FASCISM", in which Moseley refers to all determined Anti-Communists as Fascists.

Just like the baseball trio -- Tinkers to Evers to Chance -- only here it is Moseley to Crabb to Fuller.

This Editor's greatest disappointment was in seeing Desmond Leslie get into the act. We quote a few choice sentences from his letter:

"Congratulations on coming out against the resurgence of Fascism in America --- a far greater danger than the popular bogeyman, Communism.

"I have sadly and for a long time prophesied that if the present trend continues, we shall see America becoming more and more totalitarian, while Russia becomes more liberal. Within twenty years we can expect to

see men fleeing to freedom from the West to the East." (Unquote Desmond Leslie, co-author of Flying Saucers Have Landed.)

- - - - -

Isn't it strange that Fascism is a greater threat than Communism to Mr. Leslie. Especially in light of the fact that Fascism has been dead all these 17 years, and Communism continues to gobble up and enslave peoples over the past 17 years at the rate of 7000 slaves per hour?

And the slight revival of Fascism in the form of Lincoln Rockwell would never get anywhere. Peoples do not fall for the same trap twice!

But a wiley enemy, could and would set up this decoy (Fascism) to scream about, and give the intended victims of their own oppression something to worry about, and keep them preoccupied with, while they slip their own noose over the unsuspecting heads.

But I will leave this for one far more capable than I to explain, in an excellent article entitled "EXTREMISTS".

This man is Matt Cvetic, a former Counter-spy for the FBI for 9 years.

EXTREMISTS!

During the past few months, this country has been deluged by a barrage of planned and vicious propaganda attacks against the patriotic Americans who are actively fighting the Communist threat.

This smear campaign, directed by an assortment of Communists, professional liberals and self-serving political opportunists, is resorting to derisive and venomous language in accusing patriotic individuals and groups. Names such as right-wing extremists, fascists, and Klanners are being tossed around quite loosely by these smear artists. The name callers stem from Gus Hall, the convicted Communist, down to Drew Pearson, the columnist, who is known to play very loosely, at times with the truth. Regrettably, even our President lowered the dignity of his Office by getting into the act.

In most instances, political opportunists, who have joined the ranks of name-callers, did so to create a smoke screen to cover some of their own political failings.

This loud barrage is by no means the spontaneous wail the Communists, fellow travellers and their dupes would have you believe. The "shouting" campaign, which has been joined by a large section of our press, radio and television, was actually organized in the Kremlin;

then funneled down through usual Communist channels into every nook and corner of the United States. This "Call of the Kremlin" has been so successful, that many non-Communists are actually out-shouting the Reds in the name-calling department. It is no wonder that Khrushchev and his band of cut-throats are laughing with glee.

There is a very practical reason why the Communists launched the bitter campaign against the American patriotic groups. The past 28 years of appeasement by our Government leaders, culminated by the loss of Cuba to the Communists--only ninety miles from our shores, has awakened many Americans to the fact that the Red danger is getting uncomfortably close.

The fact that we have been losing ground to the International Communists with our "policy of appeasement" is of concern to many Americans. They realize that we must take a firm stand against International Communism or face destruction. It is these patriotic forces who pose the real threat to the Communists. The Red conspirators and their sympathetic allies cannot stand exposure. It is for this reason that patriotic forces are being so viciously maligned.

Long ago, as I mention on Page 55 of "THE BIG DECISION", Lenin, one of the founders of murderous Communism said: "Destroying all opposition by invective, slander, smear and blackmail is one of the techniques of Communism." To watch some American politicians, editors, and self-styled liberals ape the Reds in this libelous technique, is indeed shameful.

Recently in Los Angeles County, a series of nuisance bombs were exploded in front of Community Party Headquarters, a United Nations organization office, and the homes of two liberal ministers. Overnight the cry went up from Communist and other sources: "It's those right-wing extremists--they planted those bombs."

Despite the fact, that up to this writing no one has been apprehended by the law, the two ministers who were the victims of the "bomb" incidents, spent 25 minutes of valuable television time blaming the bombings on "the right-wing extremists." Marsha Hunt, a Hollywood actress of some dimension, joined in the snide accusations. Possibly, these accusers never heard of the Bible's reference to "rash judgment."

The Hollywood-Citizens News, usually a

fine paper, now under new management, editorialized the bombings with these words, quote their editorial of February 7, 1962;--

"formerly the violence connected with extremism usually came from the left. Now the right is getting into the despicable act." Drew Pearson devoted an entire column blaming "those right-wing extremists." All these accusations from so-called reliable people and sources, despite the fact, and I repeat, that up to this writing, no police authority has apprehended even a shadow of a suspect.

It may be worthwhile to explain for the benefit of the self-styled liberal block in this country, that one of the techniques of the Red conspirators is to go in for just such skullduggery, to wit: Toss a bomb in front of someone's door; distribute some anti-Catholic, anti-Negro or anti-Jewish leaflets in the neighborhood, and presto -- "THE FASCISTS ARE AT IT AGAIN."

Several years ago in Louisville, Kentucky, a bomb was planted under the trailer home of a negro family. The bombing was followed by a planned propaganda barrage, blaming "those fascists." The professional liberals, egged on by the Reds, had their days of name-calling. Finally the real culprits were apprehended. Lo and behold, they turned out to be two notorious Communist agents, who were convicted and sentenced to a long term in the penitentiary. Unfortunately, the United States Supreme Court, which ruled that it is illegal for a State to defend itself against sedition, saw to it that these Reds did not have to serve out their sentences.

Another such incident occurred while I was posing as a Communist for the F.B.I. The Communists organized a riot against one of their own meetings. Several people, including some Party members were hurt in the ensuing embroglio. The next morning the Communists and their stupid allies blamed it on, you guessed it, "those fascist Pittsburgh police."

Many of us who have been the targets for the vicious slander, name-calling and intimidation, because we are in the fight to preserve our Republic and our Freedom, have no intention of letting an assortment of Red agents, self-appointed liberals and political hacks dissuade us from our work.

We can best answer all the character assassins by expanding our activities; organizing more study groups; opening more patriotic bookstores and information centers; utilizing the press, radio and television to

reach millions of un-informed Americans with the Truth about the Communist threat. Let us not waste our valuable time answering the name-callers and character assassins. Let us instead re-double our efforts to bring the message of FREEDOM to our neighbors, our fellow-workers, and most of all, our students. (Matt Cvetic -- 9 years a Communist for the FBI.)

- - - - -

Ed. Note - One thing we can be sure of - Matt Cvetic has had enough experience to tell the "Bad Guys" from the "Good Guys", and now you know why some folks continue to scream "FASCISTS" at the top of their voices.

We continue to get the mail, and we continue to get cancellations from those who do not want to see any "Pro-American" articles in S.P.A.C.E.

And then we get the encouraging ones, like the following letter from V.D.S., of Columbia Cross Roads, Pa.

Dear Mr. Gariety:

I would like to tell you that I think that you are doing an excellent job of publishing your publication.

I hope that you will continue to use the current format, including the pro-American articles regardless of what others may say against you.

Also, you have new and exclusive material that others do not have as soon. This is good. I wish more publications of this type had more real news rather than a lot of reprinted material.

In short, I am real pleased and hope you keep up the good work.

Yours very truly,
V.D.S.
Columbia Cross Rds.,
Pennsylvania

- - - - -

This type of support we appreciate and need. Also we need more financial support to continue to this effort. The ones who have shouted "Fascist" and cancelled, and those who naively want only space news, and ignore the "noose" being slipped over their heads, and they too, either cancel or do not renew have hurt.

If you feel that this effort should continue, and that we should publish the space news along with exposing the Communist Criminal Conspiracy, you can do this with \$1.00 -- 4-month Gift subscription to your friends and relatives. In this manner

you can awaken them to two problems at the same time.

Follow the following form in sending in your names, and include \$1.00 for each name:

- - - - -

Please send a 4 month trial subscription to S.P.A.C.E. to the following:

FIREBALL LIGHTS WEST;
UTAH'S HILLS SEARCHED

EUREKA, Utah, April 19 (UPI) - A giant ball of fire, which lighted the ground below as though it were a flare, was seen from California to Kansas last night. It was thought to have exploded or hit the ground somewhere in central Utah.

Today sheepherders in the hills south of here were questioned by Air Force police officers from nearby Hill Air Force Base at Ogden, Utah, and by a deputy sheriff and three civilian volunteers.

Some residents of Eureka said they believed the object had exploded about ten miles

from town. There were conflicting reports on its size, color and trajectory. Dr. Robert Kadash, Associate Professor of Physics at the University of Utah, said it had probably been a bolide, a type of exploding meteor.

Sightings were reported in Nevada, Oregon, Montana, Idaho, Arizona, New Mexico, Wyoming, Kansas and California, in addition to Utah. (NEW YORK TIMES, Friday, April 20, 1962, Credit Gladys Fusaro, Huntington, N.Y.)

- - - - -

Ed. Note: Why do Air Force Officers bother to question shearers about "meteorites"? ????????"

CROSS SEEN BY NIGHT NURSES BEHIND
GOOD FRIDAY MOON

A group of nurses at St. Mary's Hospital, London, reported seeing an object resembling the formation of a cross shining behind a bright, full moon about 5 am. yesterday.

"Oh, yes, it was quite definite", said night nursing supervisor, Mrs. Rita Gooding. "I've never seen anything like it before."

Mrs. Gooding said she happened to look out of a fourth floor window "and there it was."

Mrs. George Nangle, private duty nurse on the second floor said: "I thought I was seeing things at first, but there it was. It was so beautiful."

Mrs. Gooding said the formation lasted for 15 to 20 minutes from the time she first saw it.

She said the four ends of a cross could be seen behind the moon.

"Being Good Friday and everything," said Mrs. Nangle, "it struck a note."

Mrs. S. J. Mullin, another private duty nurse, said: "Oh, yes, it was quite distinctive. It was so plain and so clearly defined."

Asked to comment, Dr. William H. Wehlau, astronomer at the University of Western Ontario, said there are many atmospheric effects that might account for the pattern behind the moon. He said various kinds of phenomena are classified at the university. These classifications would not be checked until he returns to the university. He could offer no immediate explanation.

An official of the department of transport, on duty at the control tower, London Airport, said a cross will be seen on a bright moonlit night if a person looks through a window which has a screen either

in front or behind it. "I've seen many crosses this way."

However, Mrs. Nangle said she thought at the time a screen might have an effect, so she looked through a window that had no screen.

"And there it was again. It was there all right."

Mrs. Gooding said other private duty nurses who saw the formation were Mrs. Sue Hyman, Mrs. Margaret Vaucrossan and Mrs. Hattie Hall.

Mrs. Nangle reported the phenomenon to John Dickins on CFPL's 'Open Line.'

An unidentified woman, who was feeding kittens through an eye-dropper at 5 am, told CFPL she went outside her northend house and saw the formation the same time the staff members at St. Mary's Hospital were looking. (London FREE PRESS, Ontario Canada, Saturday April 21, 1962, Credit Marge Chalmers, Ontario, Canada.)

TWINS FOLLOW SAME PATH TO THE VERY END

MORGANTON, N.C., April 13 (AP) - As twins, Bobbie Jena and Betty Joe Eller followed the same path.

They held the same sort of jobs, in a cigarette factory.

They had the same emotional trouble, which led to their joint admission to the state mental hospital last year and their return to the hospital this month.

Thursday, the path ended. Hospital attendants found the 31-year-old patients dead in their beds in separate wards in the hospital. No bruises or marks of violence were on either body.

The Burke County coroner, Dr. John C. Reece, said there was no "demonstrable anatomical cause of death." He said both women received about the same hospital treatment, involving what he called proved established medicines, and that he will try to determine if the medicines produced some unexpected reactions. (Buffalo EVENING NEWS, N.Y., Friday, April 13, 1962, Credit Gladys Fusaro, Huntington, N.Y.)

COW-DEER IS ENIGMA TO EXPERTS

REGINA, Sask. Can. (CP) - Tests were continuing Tuesday to determine the genus of an animal delivered to the Saskatchewan Wheat Pool livestock yards.

The animal, brought to the yards Monday by Ed Senft of Dubuc, Sask., shows characteristics of both a cow and a deer, a cross described as impossible by Ernie Paynter,

William E. Daniel

director of the provincial wild life branch.

"It's impossible, but it sure looks like it", he said. Senft could offer no clues.

A blood sample tested at the Royal Canadian Mounted Police laboratory showed the animal to be pure bovine, but Paynter said experts are not yet convinced.

The animal has a long, thin forehead and nose, the loose knobs of horns and a V-shaped forehead that is uncharacteristic of the bovine family. Paynter and John Graham, manager of the livestock yards, said the leg shapes are more like those of a deer than of a cow.

Paynter said the 3-year-old animal has dropped its horns each January, the time deer normally lose their antlers. The 730-pound animal was purchased by the Wheat Pool livestock division to prevent its slaughter until more could be learned of its genus. (Buffalo COURIER-EXPRESS, N.Y., May 16, 1962 Credit Gladys Fusaro, Huntington, N.Y.)

METEOR & UFO SIGHTING

Witness: Dorothy Lefler, 4668 N. Edgewood Ave., Cincinnati 32, Ohio (for meteor only); for UFO: Dorothy Lefler and mother, same address. Time: 8:50 pm for meteor; 8:56-7 for UFO. Weather clear, bright stars, apparent no haze.

I had finished painting and wandered out into backyard, and took a gander up, hoping as usual. I was facing east when something caught my eye. I turned in time to see instantaneously a very bright white meteor, with tail and "crumbling" sides, arcing down in northern sky, turning NE to W. This was

quite a normal meteor, at about 45-50° alt.

Called mother to door to tell her what had seen, gabbed a bit, went in and came back out, wandered around in back and then out to front, which faces west. Staring around, noticed what seemed to be variable star that appeared to be really "wandering" around. Stared hard at it, and it did seem to be moving - had guide lines of telephone wires, trees and telephone pole. Again called to mother as I wanted her to see this variable star, and was just explaining how such an illusion is caused by atmospheric refraction, etc. when realized that it really had moved because had crossed telephone wires. When first sighted was in WNW, and traveled straight across Northern sky, heading NNE. We both observed it for approx. 5 minutes. It appeared to bob only slightly, but no doubt this was due to atmospheric refraction. I would estimate it traveled approximately 160 degrees of arc during this time, at 60° alt. We both felt it was very high, perhaps out of the atmosphere, but there was no way to estimate either size or distance, other than fact that it moved. No sound. No tail. Was same apparent size as average star. Binoculars did not resolve the object. (Credit Dorothy Lefler, Cincinnati, Ohio, April 24, 1962)

* * *

SNOWMAN IS A HOAX, HILLARY SAYS -- The conqueror of Mt. Everest had a word or two to say here about the yeti, or abominable snowman. "It's a hoax, a myth", said Sir Edmund Hillary. Buffalo COURIER-EXPRESS, N.Y., Monday, March 26, 1962, page 4.
