S. P. A. C. E. (Saucer Phenomena and Celestial Enigma)

The Air Force says that it has no **PHYSICAL EVIDENCE** (physical meaning 'something you can touch') that such things even exist. In the words of Capt. Edward J. Ruppelt, retired, who served three years at Wright Field, Dayton, Ohio, as Chief Investigator for Project Bluebook **WHAT CONSTITUTES PROOF??** — Does a UFO have to land at the River Entrance to the Pentagon, near the Joint Chiefs of Staff offices? Or is it proof enough when a ground Radar Station detects a UFO, sends a Jet up to intercept it, the pilot sees it, and locks on with his Radar, only to have the UFO streak away at a phenomenal rate of speed? Which is **PROOF?**

September 1962

Bulletin No. 69

You will find that this issue as well as the August number are later than usual in reaching you. This was due to a much needed vacation on the part of your Editor, as well as vacations on the part of the letter service handling the printing and mailing. Thank you for your patience.

The summer months showed a minor flap of UFO reports which appeared in the newspapers. Of course, due to past ridicule, many sighters are not telling newspapers about their experiences.

And of course many newspapers print up reports in the same vein that they print the efforts of loyal, patriotic citizens to awaken their fellow countrymen to the dangers of the Communist subversion, in our Government and in our schools, and churches.

One can only come to the conclusion that there is a very great parallel between the two, and that there is a conspiracy on the part of certain elements of the press to misinform instead of to inform the public. A mis-guided public, is one that can be easily misled and taken over by a cunning enemy. So don't be fooled by that element of the press and national leadership which tells you that "the anti-communists of the country are a greater threat to America than the Communists are". This is the same element which told us that Mao Tse Tung of China was only an "agrarian reformer", and that Fidel Castro was the "robin-hood of Cuba".

These are also the same element which have ridiculed the UFO reports over the years. Then at the same time to make the issue even more clouded and fuzzy the enemy has infiltrated the UFO publishing field, and have in many bulletins, booklets, and claims, used their alleged contacts to "spread the socialist gospel" of the Communists, Socialists, and the One-Worlders. Of course what they really want

is "One-World" which will be under the domination and sadistic control, of the leaders of the Socialist, One-World movement, the hierarchy of the Communist Criminal Conspiracy, in the Kremlin in Moscow.

For those who are beginners in the UFO investigation field, this may seem well nigh impossible. But to thinking individuals who have made a study of both the UFO situation and the Communist menace, then the pieces of the picture fit clearly into place. Examine, if you cannot accept this, the philosophies of many of the alleged contacts and the philosophies of the Marxian world, and compare.

And don't be fooled into the belief that the UFO element is lily-white because they express a pseudo belief in a Supreme Being, and a semblance of what appears to be religious ideology.

Examine if you will, how far to the left these religious ideas are, when compared to the orthodox beliefs of the past centuries. Remember, it is not the goal of the psychopolitician to take you directly to his goal. The plan is for a constant, continuous bending of ideas and beliefs to "the left", so subtle and smooth that one does not realize that eventually he has progressed so far to the "left" that he has made a 180° turn.

It is to counteract this trend in the UFO field, that your Editor continues to publish this Bulletin. We have been "blasted" in a number of "alleged UFO publications." We have received harsh letters from many on the mailing list who have not made a study of the "Communist Menace", and to be sure we have received congratulations and commendations from those who do recognize the situation for what it is.

To continue we need your support. The best way that you can do this is to give 4-month trial subscriptions to your friends who are interested in the facts of either the UFO

situation, or the life and death struggle for survival against the Communist Conspiracy.

A 4-month subscription is \$1.00, and we thank those of you who have already done this. If you are in a financial position to give a years subscription, it will help even more. Over the almost six years of publication we have constantly lost financially. Due to the very nature of your Editor's livelihood (photography) which takes considerable of his evening hours with appointments, this bulletin must be given to a commercial printer for printing and mailing. Therefore the cost is higher than a "back-porch" mimeograph operation.

However, with a doubling of subscribers, we could get back into the "Black". In the first printing is the major expense. The "swap" bulletins, the letter service charges, etc. If each present subscriber recruited only one more subscriber, and each did this then "no more problems". From experience we know that half ---will do nothing, so those who do, will need to do more.

With your help we will continue the fight to present the UFO news, and at the same time expose the "Conspiracy", and help awaken more Americans, who once awakened, through prayer, knowledge and action, will keep this precious heritage of freedom, for ourselves, and for future generations.

#### "VERY STRANGE OBJECT" SIGHTED IN SKY OVER ANTARCTIC STATION

CHRISTCHURCH, New Zealand, July 11, 1962

(N.Z. Press Association)--A "very strange object was seen over Cape Hallet late on Saturday evening, the New Zealand scientific leader of Hallet Station, Mr. C. B. Taylor said today. He was speaking by radio-telephone.

The object had three yellowish-white lights, the center light being midway between the other two, and much brighter than the others.

The object travelled from southwest to north-east with its highest point in the north-west about 35 degrees from the zenith.

When the object was in the northern sky, it emitted a brilliant flash of white light.

As it neared the horizon, the smaller lights disappeared in the auroral glow.

"It took about three to four minutes to cross the sky, from about 11:10 pm to about 11:13 pm, said Mr. Taylor.

"We have no idea what it could have been - it was too slow for a meteorite, but too fast for a satellite."

A weird, green-lit object was seen by a Stokes Valley couple on Saturday, states a Wellington Press Association message.

A Stokes Valley businessman, Mr. J. W. Skeet was helping his wife hang washing out in the back garden of their section about 6:15 pm when a blue-white shape appeared in the sky.

"Both myself and my wife thought that it was heading due north," Mr. Skeet said.

The object was about as big as an orange, "If you can imagine an orange in the sky flying at fantastic speed," he said.

The overcast sky and dense clouds made the object look fuzzy at the edges.

"Despite this I am pretty sure that it did not have a tail like a comet or a shooting star," he said.

Mr. Skeet described the object as "throwing off pieces" on its rapid journey through the heavens.

"Pieces would shoot off from the parent body and disappear," he said.

"It was like sparks jumping from a hot fire!"

He estimated that the craft continued its steady swift course about 40 degrees above the horizon somewhere over the Wairarapa.

In a telephone conversation tonight from Cape Hallet Mr. Taylor said that in his opinion the object was of "earthly origin."

If the Stokes Valley sighting was of the same object it must have travelled around the world. (The Wanganui Chronicle, Wed., July 11, 1962) (Credit Harold H. Fulton, Manawatu, New Zealand and Mrs. I. E. Epperson, Los Angeles, Calif.)

\* \* \* \* \*

#### CIGARS, DISCS OVER ARGENTINA

A Reuters Dispatch from Buenos Aires, Argentina dated June 18, 1962, reads: "Unidentified Flying Objects - saucer or cigar-shaped - are becoming a common sight for Argentinians. The last of a recent series was reported in Olavarria - a town in the province of Buenos Aires.

Farmer Jose Muro telephoned the local newspaper El Popular reporting the presence of an unusual object which he had spotted with a small telescope.

Reporters, neighbors and photographers went to Muro's home and 20 minutes later the object was still hovering overhead, barely moving.

Witnesses claimed that shortly afterward it vanished upwards, only to reappear closer than ever several minutes later. The color of its light appeared to change from red to blue, from blue to green and again to red. Other residents in Olavarria claimed to have seen similar objects.

Buenos Aires press dispatches say a confidential report to the authorities compiled by officers of the naval base of Puerto Belgrano, at the southern tip of the province of Buenos Aires, confirmed the presence of unidentified objects in the skies over Argentina. The officers cross-examined scores of witnesses, particularly those who reported unusual activity of flying objects during the night of May 14 in the neighborhood of the base. (Credit Coral Lorenzen, A.P.R.O. Bulletin, 4145 E. Desert Place, Tuscon, Arizona).

\* \* \* \* \*

#### FLASHING LIGHTS SEEN IN COLORADO

WHEAT RIDGE, Colorado, June 26, 1962

First sighted by Philip Nichols, the object was seen in the East-southeast about 25 degrees above the horizon at 1 A.M. MST on 26 June 1962 from the 7000 block of W. 48th Ave. Philip called his brother Ross, who arrived in time to see the object, after arriving at an overhead position, turn in a tight curve and fly toward the south. When it turned it did not tilt or bank, and proceeded to disappear at about 30 degrees from the horizon.

To the naked eye the object appeared to be a white light about the size and brightness of Jupiter. Through 8 power binoculars it appeared the size of a penny held at arm's length. Through the binoculars three white lights, spaced like the points of an equilateral triangle could be seen. In the center of the triangular formation of lights was a smaller, flashing red light. The bottom of the triangle was faintly illuminated. It flew with one light leading, point first.

Duration of the sighting was about 8 minutes, there was no sound and observers said it was impossible to judge the size of the object or its speed.

Both Philip and Ross observed the object through the binoculars while it was close enough for them to study it. They both decided that it could not be any plane that flies, as there were no wingtip lights and no sound, and the object did not bank at the turn. Mr. and Mrs. Nichols, their parents, can attest to the white light visible to the naked eye, and to a flashing red light but by the time they saw the object, it was too far

away to be seen clearly.

Ross Nichols was employed (outdoors) at Stapleton Airfield at Denver for six months. Both Ross and Philip Nichols worked as helicopter mechanics on the flight line at Fort Ord, California, during basic training. Both have watched planes, both military and civilian through binoculars for years. Most of the planes in this area come and go from the west in full view of their home. Mr. and Mrs. Nichols are members of the Denver Astronomical Society and are familiar with astronomical phenomena.

It might be added that the Martin Missile plant at Littleton, Colorado, is south of Wheat Ridge, as are Colorado Springs and NORAD. (Credit Coral Lorenzen, A.P.R.O., Tuscon, Arizona).

\* \* \* \* \*

#### BIG, SPONGE-LIKE LAKE CREATURES

STILL UNIDENTIFIED

ST. WILLIAMS, Ont. (CP) - An official of the lands and forests department arrived here Thursday to investigate a series of curious aquatic creatures found floating recently near the shores of Lake Erie at Long Point Bay.

J. W. Anderson said he plans to take a portion of one of the creatures away with him to discover what they are.

Another department worker, district forester J. K. Reynolds of Aylmer, suggested the creatures are fresh-water sponges, but Herbert Lipsit, who operates a nearby marina, says he has never seen anything like them in more than 40 years.

Mr. Reynolds said Thursday fresh-water sponges are prevalent throughout the Great Lakes, although the ones found here are unusually large. The sponges normally run to four inches in diameter, but the creatures found here are up to two feet across.

The creatures are brown with mottled grey markings and float on edge, with only the rim breaking the surface. If disturbed, they sink. If caught in nets, a specimen is diced through the net by its own weight. The inside is grey jelly-like substance.

If kept out of water for any length of time they dry out and become a flat, rumpled grey-brown with leather-like skin which is surprisingly tough. (THE RECORDER AND TIMES, Brockville, Ontario, Aug. 31, 1962 -- Credit Gene Duplantier, SAUCERS, SPACE & SCIENCE).

\* \* \* \* \*

The following reports were made to our correspondent in Los Angeles, Mrs. I. E. Epperson. The letter speaks for itself:

Dear Mrs. Epperson:

As I promised you on the phone, I am sending you the two reports on UFO's. As you said, I think this is very significant because, by adding these two to the number already seen in Argentina, we have a new UFO "flap". I am writing to some friends back home asking them to do their best to get all the clippings on UFO's sightings from January '62 on. I am sure I will get some of them.

From Jujuy, a friend of mine wrote me about the following case; however, he does not mention the date, but I imagine it was recently. A friend of his, Mr. Echenique, and four other people happened to be witnesses to the landing of a saucer at approximately 300 yards from where they were. They were traveling in a pick-up truck bound for a town in the province of Jujuy, and as they ran out of gas they were forced to pull up along the road and stay there till some help would arrive. It was 4 A.M. and was drizzling. Suddenly, says Echenique, they saw a bright light coming up the road ahead in their direction. At first they thought it was another vehicle; but when the light was at about 200 yards from them it veered off the road, shot up, and lit up the place as if it was daylight time. Then it landed; the object was round in shape, very luminous, and blinked its lights on and off several times. Then it remained on the ground for about an hour. After that, it took off and disappeared in the distance very swiftly. During the whole time Echenique and his companions just watched because none of them did dare go near the round saucer. This story was told to my friend 26 days after it had occurred. Unfortunately, he doesn't give any more information as to the date, actual size and shape of the craft, etc. I have already written him asking for additional details, so I hope he will be able to furnish them.

The next case appeared in a Spanish paper published here in Los Angeles.

LA OPINION, August 4. Entre Rios Province, Argentina. From a flying saucer which landed on a road in Parana came out some beings over 6 feet tall, fair-haired, and with eyes larger than humans'.

The foregoing was stated by Dr. Gazua, resident of the city of Parana, who was traveling with his wife in their car to Goya City.

He claimed that while driving along a road he spotted a very luminous object about 10 yards away from his car. Then from the object came out some beings who began signaling him to stop. The astonished physician came

soon out of his bewilderment and sped off, leaving rapidly the place of the encounter.

His wife had an acute nervous shock, but shortly after was feeling well again.

A truck driver who was also traveling along the same road, and who remained unidentified, claimed that he saw three beings whose shape he could not tell.

I hope this will be of interest to you.

Cordially,

Bernardo Passion

Los Angeles, Aug. 8, 1962

\* \* \* \* \*

Seattle, Washington, seems to have had more than its share of the unusual from the following reports from the Washington State NICAP Subcommittee, 11323 14th Avenue, NE, Seattle 55, Washington:

Seattle, Washington - 19 July 1962 - Report to Subcommittee-The "Echo" satellite was due over Seattle, going W-E at 11:14 P.M. Echo was in plain view, and at 11:15 or a little after, another brilliant white light was sighted heading E-W at the same, or slightly faster, speed of Echo. When it appeared the two objects were about to collide overhead, the one, (assumed to have been Echo) veered slightly N. as though to avert collision. Then, the light heading to the West faded out of sight, as the Echo resumed its W-E course.

Seattle, Washington - 20 July 1962 - Report to Subcommittee - 10:29 P.M. (PDT) White light size of Echo in sky moving rapidly West to East. Crossed sky, 90 degrees of horizon in 11 minutes. Observed through a telescope and naked eye. Echo due W-E at 11 P.M. plus, came on schedule.

Longview, Washington-Daily News - 23 July 1962 - FIREBALL SEEN - A fireball, apparently many times larger than usual, was seen by scores of parents and Little Leaguers on Sunday at 5 P.M. The Fireball, or more scientifically, a meteor, cut a north by northeast path across the sky above Tam O'Shanter Park.

Kirkland, Washington - 24 July 1962 - Report to Subcommittee - Between 10:30 and 11 P.M. - A white, steady, light with a reddish green cast to it, was reported to have been slowly moving from E to S, then hovered momentarily, then shot off at high speed to the North. The light, reportedly the size of a pea held at arm's length, was sighted by an entire family and their friends from their yard in Kirkland, a northeastern suburb of Seattle.

Seattle, Washington - 25 July 1962 - Report to Subcommittee - 10:05 P.M. - In E sky

traveling from NE to SE. One white light, went across center 1/3 of sky at high speed, then faded out. Similar light sighted at 10:17 P.M. in N-NE sky headed from NW-SE. White light, high speed, in view about 12 seconds. Then at 10:58 P.M. a fast - split-second arc, or streak of white, luminous, appearing in NE sky traveling SW-NE. Three times the width of jet vapor trail. Clear sky-no jets in sight. Made an arc. At 11:45 P.M. a "dim star" was reported seen. It was reported to be very fast and seen in the S sky traveling E to W. "Shooting star", but in straight line across the sky.

Seattle, Washington - 27 July 1962 - Report to Subcommittee - Orange fireball reported to have hovered momentarily over Renton, Washington (Boeing Airplane Co. has Renton plant). Renton is a southeastern suburb of Seattle. Object reported to have hovered briefly then shot off into the sky. Report via radio station KVI, Seattle. Seen shortly after 9 P.M. No further details available.

Portland, Oregon - Associated Press Release - 31 July 1962 - What appeared to be 2 fast-moving satellites were seen just ahead of America's Echo One satellite as it passed over the Pacific Northwest last night. A Portland Television station switchboard was jammed with calls and reports of the sighting also were recorded at Tacoma, Washington, and Salem, Oregon. Several persons said the objects were not as bright as Echo I but were moving much faster. Echo appeared as scheduled in Northwest skies last night at 9:18. It is scheduled to pass overhead again tonight, this time at 8:27 P.M. - (Note: on the original AP release, which was shown to us, it was headed in parentheses "(UFO)").

31 July 1962 - Associated Press release, as used on Seattle newscasts - A spokesman for the National Aeronautics and Space Administration has commented on reports of Oregon and Washington residents about appeared to be 2 fast moving satellites. They were seen passing just ahead of America's Echo satellite and in the same orbit. A spokesman for the Space Agency said Echo is the only satellite the US has that can be seen. He also said he was not aware of the Russians having any. He is inclined to believe that Pacific Northwest residents may have seen private airplanes in the sky at the time of Echo's pass last night. (Note: OH BROTHER! JL)

\* \* \* \* \*

Seattle, Washington - 31 July 1962 - A slow moving, brilliant green ball of fire, traveling S-N, passed below tree-top level over the North End of Seattle tonight at 10:47 P.M. The glowing mass, silent, was the size of a basketball held at arm's length, and was seen by hundreds of witnesses in this area. Upon further investigation of the sighting it was found that the same or similar object was reported at 9:47 Portland, Oregon, time headed S-N. Said a spokesman at the City Desk of the Portland Oregonian, newspaper, it appeared to be a brilliant green streak in the sky at exceptionally low altitude, and appeared to have exploded over Portland, although no sound was heard. KING, a radio station in Seattle, told NICAP member that a call from their sister station in Portland, Oregon, KGW, inquiring about whether the object was seen in Seattle, came in on the switchboard at the same time the local Seattle calls were coming in to report the sighting. Therefore, the sighting would appear to be almost simultaneous. Further calls to Seattle radio and TV stations revealed that an anonymous caller from Richmond Beach, Washington, (a suburb to the NW of Seattle) reported their "house shook", but no further details were available, thereby rendering the report unconfirmed.

\* \* \* \* \*

Seattle, Washington - Post Intelligencer - 2 August 1962 - BRILLIANT OBJECT WHICH FLASHED ACROSS SKY BELIEVED A FIREBALL - The brilliant blue-white object that flashed across the Seattle sky about 10:45 o'clock Tuesday (7/31) night was a fireball in the opinion of Mrs. Bror Grondal, Seattle astronomer. "I didn't see it," she said yesterday, "but I heard about it from numerous sources and in view of its movement, color and apparent size, it could scarcely have been anything else." Shortly after the flaming object passed from the southeast to the northwest, the barometric pressure jugged upward slightly on the microbarograph at the Weather Bureau's forecasting center at Seattle-Tacoma International Airport. It rose momentarily between 0.02 and 0.03 of an inch, then dropped again. Similar slight momentary rises were reported in the barometric pressure at Toledo, Washington, and North Bend Oregon. The microbarograph is an instrument which makes a permanent record of the pressure on paper with ink.

\* \* \* \* \*

Portland, Oregon - Oregon Journal - 2 August 1962 - Town Topics - BIG ROMAN CANDLE - by Martin Clark - One of the few Portlanders

having a good look at the unidentified object sighted Tuesday night was attorney Millen F. Kneeland, of 6311 SW Brugger St. "It was not completely dark at the time, about 9:45 P.M.," said Kneeland. "I happened to be looking out the window when this green and white object streaked across the sky in what appeared to be a northeasterly direction. Never saw anything like it. Looked like a big Roman candle, or a big, flat bottle, the big end going first. The tail was as long as the body of the thing, and it was spitting sparks all the way across the sky." "Certainly," said Kneeland, "it was larger than any falling star I've ever seen, and traveled several times as fast as any plane I've ever seen flying over Portland." And what were Kneeland's conclusions? "I haven't the vaguest idea, any more than anyone else. However it did appear to be on approximately the same course Soviet Sputnik I traveled. It described an arc of about 50 degrees and disappeared over the Council Crest hill. The trajectory was very steep. It might have been a satellite burning up in the atmosphere."

\* \* \* \* \*

Grants Pass, Oregon - Courier - 2 August 1962 - STRANGE OBJECTS IN SKY INTRIGUE GP SKY WATCHERS - By Harvey Dickey, President of Rogue Valley Astronomers - Recent news reports of strange activities in the night skies of Oregon and Grants Pass have occasioned many inquiries of their possible source. One of the major sights in the past few weeks has been the passage of the US balloon satellite, Echo I. It moves comparatively slow and many people have difficulty distinguishing it from a bright star. Other objects, apparently unannounced by space authorities, also have been seen. Members of Rogue Valley Astronomers, at their regular meeting on June 29, observed Echo I appear over Pickett Peak south of Grants Pass and pass in a northeasterly direction until it disappeared behind Mt. Baldy. This event occurred at approximately 9 P.M. After 25 minutes, one of the members exclaimed over what appeared to be a "slow" meteor traveling east. The "meteor" was not consumed in the atmosphere but moved at a smooth pace increasing and decreasing in brightness. The apparent speed of this object was noticeably greater than that of Echo I, and at times of peak brilliance, was thought equal to Echo. Tuesday, July 31, Echo was observed in the western sky at 8:23 P.M. moving slightly south

of east and disappeared over Mt. Baldy at 8:36, being visible for 13 minutes. There were no other objects seen accompanying Echo, but at 10:10 P.M. one was seen near the meridian, fainter than Echo, moving in a north-easterly direction. This object was not as brilliant as Echo, and increased and decreased in brightness as much as Sputnik I. It appeared to move across the sky with appreciably greater speed than Echo. Satellite passages of June 29 and July 31 were observed with a  $4\frac{1}{4}$ -inch telescope. July 31 was the peak of the Delta Aquarid meteor shower with about 20 meteors per hour to be seen. In August, from the 12th to the 15th, the Perseid meteor shower will take place with up to 50 meteors per hour expected. This announcement is intended to warn persons suddenly taking an interest in the night sky that brilliant flashing objects traveling at high speed might well not be space craft or satellites. Aug. 1, Echo appeared in the west at 9:46. Most of the passage was observed with a  $4\frac{1}{4}$  inch telescope. No other objects were observed. (Credit for the research on all of the foregoing reports from the Washington State area goes to the NICAP Subcommittee, Seattle, Washington, 11323 14th Avenue, NE, Seattle, 55, Washington.

\* \* \* \* \*

#### RADIOACTIVE ISLAND IN THE PACIFIC POSES MYSTERY FOR ATOM SCIENCE

Nuclear Expert to Study How Population Has Adapted to Its Environment.

AUCKLAND, N.Z. Aug. 18 (Canadian Press) - A new chapter is opening in attempts to solve the mystery of the high radioactivity of Niue Island, in the South Pacific.

It was found last year that the soil in parts of this isolated tropical island is 100 times more radioactive than normal. The bodies of Niue Islanders are ten times more radioactive than those of most people.

Yet physicians say that the islanders are among the most healthy in the Pacific.

This situation has raised suggestions that the way the Niueans have developed in their environment might point to future courses for mankind. It might be possible to find what promotes immunity to high doses of radioactivity, or whether any unusual traits have appeared among the islanders.

The matter has been under study for more than a year, but so far scientists are not prepared to give conclusions. Meanwhile Sir Ernest Marsden, a leading New Zealand nuclear scientist, has sailed for Niue to

continue research into soils and foodstuffs and their effects on the islanders.

"The natural radiation on Niue is the highest in the world," Sir Ernest says.

"Since the native population is only about 5,000, we have the chance to study a relatively small, self-contained group which has been exposed to high radiation for many generations."

Sir Ernest also wants to discover the cause of the radioactivity on Niue. One strange feature is that there is no thorium on the island. Elsewhere, this is a major cause of radioactive phenomena.

One theory was that radioactivity was blown ashore in foam or plankton. Sir Ernest has tests made and it was discovered that the plankton was extremely radioactive. But, as a check, he had tests made on plankton collected in other parts of the world, and this proved highly radioactive also. (New York TIMES, Sunday, August 19, 1962 -- Credit Gladys Fusaro, Huntington, Long Island) Ed. Note---This is the island that we have mentioned some months ago, that proves to the world that the "Radioactivity" from nuclear tests, is 1% danger and 99% propaganda.

It is being used as a Soviet tool in the psychological warfare, and of course, the most and best use of it for the Soviets, is the dupes, and the fools right here in the U.S.A., in Britain, and other parts of the world, mainly from non-communists who are doing the communists' work for them, by demonstrating, picketing, etc. whenever the U.S. does any testing. Of course they are not nearly so vocal, when their "pals" the Russians test a few 50 megaton devices.

The Russians use their rubles (and many of your dollars -- foreign aid to Poland, Albania, Yugoslavia, etc.) to test their bombs and "rattle" their hardware, but, citizen "Ivan" gets only a pittance for his "slave labor", as the following report illustrates:

-----  
A speaker behind the iron curtain in a recently enslaved country was explaining the difference between living standards before and after Communism. Pointing at one of the workers, he asked:

"How many shirts did you have before our glorious liberation?"

"Two, comrade speaker."

"And how many have you now?"

"Only one."

The speaker was jolted but not outdone.

"Of course," he said trying to save the

situation, "the present shirt is of much better quality and longer lasting. Of what material is it made?"

"From the remnants of my two old shirts."

-----  
Of course this did not happen, or the "insolent" slave would have been sent "to the wall", for his audacity in ridiculing his "liberation".

Nor did the following happen, but it is told by Father Dunker, who was a missionary in China, saw the Communist take-over there, and served several years in prison for the heinous crime of owning a short wave radio sending set, with which he sent espionage messages back to the United States. (The short wave set was nothing more than a portable typewriter---but he was guilty---he had the typewriter, didn't he?)

\* \* \* \* \*

#### SOVIET GOALS

The Commissar marched into a school room in a Russian village, and interrogated a number of students. In the fifth grade class room he asked the following question of a bright looking student---

"Who is your mother?"

"The Communist Party", answered the student.

"Why?" asked the Commissar.

"She feeds me and clothes me", answered the student.

"And who is your father?"

"Nikita Khrushchev."

"Why?" asked the Commissar.

"He is our great illustrious leader, our hero, and knows what is best for us."

"What do you want to be when you grow up?"

"A scientist."

The Commissar went to the next child, asked the same general questions and received the same general answers. Except the second child wanted to be an astronaut.

To the third child he asked the same questions.

"Who is your mother?"

"The Communist Party."

"Why?"

"She feeds me and clothes me."

"Who is your father?"

"Comrade Khrushchev."

"Why?"

"He is our great illustrious leader, our hero, and knows what is best for us."

"What do you want to be when you grow up?" asked the Commissar.

"AN ORPHAN," replied the student.

A TRUE U.S. HERO

I would respectfully like to suggest that Americans write their congressmen asking that the body of Matt Cvetic, former FBI counterspy and courageous fighter against communism, be reinterred at Arlington National Cemetery.

Matt Cvetic's life work of patriotism to the United States was of such heroic proportions that surely he deserves to be buried alongside other great heroes of our country.

My father once told me that living for a cause is much harder than dying for one. Matt Cvetic chose the hardest way to live for the cause of freedom, dedicating over 20 years of his life to this fight, forfeiting home and comfort and safety. Such a man deserves a real tribute from his countrymen.

Stephanie Cooper Shulinger,  
Palos Verdes Peninsula

Los Angeles HERALD-EXAMINER, August 7,  
1962.

LUNAR EXPERT BELIEVES WATER IS ON MOON

By Robert Goldenstein

CLEVELAND - AP - The possibility that the moon may have an abundant water supply - including geysers and subsurface glaciers - was suggested by Dr. Zdenek Kopal, internationally known lunar expert.

The British astrophysicist said the moon's water supply may be so great that if squeezed out it could cover the lunar globe's surface to a uniform depth of 984 feet.

He told space scientists attending a lunar missions meeting of the American Rocket Society yesterday that his conclusions were reached deductively, based on known facts about the composition and behavior of celestial bodies.

Water is composed of hydrogen and oxygen and a lunar water supply would greatly simplify the supply problem of setting up a self sufficient moon base with its own air supply.

In adding his support to those in the controversy who believe water is present on the moon, Kopal said there is a possibility earth's smaller companion may have a permafrost several hundred feet deep.

Ice close to the lunar surface, he continued, could form glaciers covered by dust and debris. He contended such glaciers could take the form of domes or minor bulges numerous astronomers have observed in certain regions of the moon.

Kopal agrees with the widely accepted theory that the moon was formed by an accumulation of tiny particles of cold matter in space drawn together by the mutual pull of gravity. He contends further: These particles contained volatile compounds, including water, locked within their crystal structure. A relatively high proportion of water has been found in stony meteorites. When the moon was formed, spontaneous disintegration of the radioactive elements present heated its internal temperature until its interior glowed "much like the inside of a terrestrial blast furnace". This heat broke the solid state bonds holding the water in crystals and liberated it as superheated steam,
