

THIS IS A MAGAZINE THAT WILL EXPLAIN THE MECHANICAL COMPOSITION OF THE UFOs, INCLUDING SAUCER NUTS (OF WHICH THERE ARE MANY); SAUCER BOLTS; AND - OF COURSE -

# SAUCER SCREWS

OFFICIAL PUBLICATION OF THE SAUCER AND UNEXPLAINED CELESTIAL EVENTS RESEARCH SOCIETY

MAILING ADDRESS: P.O. BOX 163, FORT LEE, N.J. 07024

EDITOR:

James W. Moseley

NON-SCHEDULED NEWSLETTER - Vol. 23, No. 27

October 15th, 1976

NOTES OF VARIOUS SORTS: Our good friend Bob Easley of Defiance, Ohio, is disappointed that we haven't been mentioning him in these newsletters. Now we have.....

The venerable Laura Mundo is again putting out her (free) UFO bulletin, from 140 Cherry Valley Drive, Apt. D-13, Inkster, Michigan 48141. Laura is a pro-contactee lady of good will, whose writings we have always enjoyed but never understood. Recently she had a Big Falling Out with one of her co-workers, Connie Grzych, and as usual she published the gory details. Now Connie has sent us a form letter giving her side of the dispute. It sounds like the ole N.P. of B. to us. (Laura's fans know that means "Negative Polarity of Being," whatever that means.) If you want Connie's version of the Argument, write her at: 23084 Brookforest, Novi, Michigan 48050.....

Regarding the recent photographs made from the surface of Mars, a New York Daily News columnist has suggested that the rocks seen in these pictures are actually living Martians. They are not recognized as such, he says, "because they move extremely slowly." This thought occurred quite awhile ago to us, also, but we unfortunately allowed the News to scoop "Saucer Screws" this time.....The above theory is (we hope you realize) facetious; but we do want to add that our item in our last issue ("Saucer Ooze") about apparent contour plowing on Mars, was taken from a serious news story, and is not facetious. Jim Oberg, in the last paragraph of his letter on Page 3, seems to think we made this story up from our overly-fertile imagination.....

The latest issue of the "Eden Bulletin" (Box 34, Careywood, Idaho 83809) has some interesting material. Apparently the editor, Jerome Eden, is a hard-core follower of Wilhelm Reich, the controversial scientist who died several years ago. In his attempts to uphold Reich's theories, Eden has clashed over the years with many of the leading ufologists of our era, as well as some obscure ones. About former NICAP luminary Richard Hall, Eden writes: "Hall is an emotional pest who is no more motivated by the desire to seek Truth than a rattlesnake is motivated by love when he sees a mouse." We don't claim to know much about Reich or Eden, but anyone who has an opinion like that about Richard Hall can't be all bad!.....

Our former associate Allen Greenfield has recently moved to: 1399 de Beers Drive, #6; Tampa, Florida 33612. The new address is given twelve times on Page 11 of the latest issue of his "Ufology Notebook," which as usual has comments about your "Saucer Screws" editor which we won't bother to comment on. Greenfield has also started a new organization, called The Hermetic Order of the Earth Goddess, which he calls the "working arm" of the Hermetic Educational Institute (same address.) Flipsville, here we come!.....

## Letters to the Perpetrator:

Ted Zilch, famous UFO and assassination researcher, writes: "Loved your latest zine, 'Saucer Ooze.' I especially liked the Ted Zilch segment. Hope to see more from Zilch in your next issues; the guy really knows what he's talking about.

"The Robert Dickhoff photo was put through the Ground Saucer Watch computer photo-analysis program (in which the photo is projected on a TV screen, and the image manipulated in various ways.) The results were startling! This photo is the first recorded case of an intelligently controlled thumbprint! Not surprisingly, the flying thumbprint was in front (on top) of the cloud, not behind it. Analysis also indicated that this UFTP (unidentified flying thumbprint) was hovering, or standing still, as opposed to moving rapidly. Too bad Dickhoff gave his photo away; it's probably worth millions. Had

Ground Saucer Watch not been able to obtain a free copy to analyze, I'm sure Bill Spaulding would have written Dickhoff a blank check, just to get a crack at first analysis rights. It just goes to show you that altruism never pays."

Robert Dickhoff writes: "Something good has come out, me stopping corresponding with this dingeling Fox who never ever mentioned you in all these years for fear of me taking up with you, which, as it becomes quite clear, would have been the right way all along! 'Saucer Ooze' proves that I could have had better publicity from you and not this snapping at me attitude, from dingeling 'F'. But do please mention futurewise that I am a lama and not a llama! I simply do not relate to this Peruvian mountain goat, the llama! (Fox must be laughing himself to death - I hope.) ....."

We have met many llamas in the mountains of Peru, but we have never met lama Dickhoff, although he lives right across the Hudson River from us. Our apologies for the confusion. - Editor.

Lucius Farish writes: "I would tend to agree with 'Ted Zilch' about CIA involvement in the UFO subject, although we must not forget the Defense Intelligence Agency (DIA), National Security Agency (NSA), National Reconnaissance Office (NRO), and who knows how many other intelligence agencies. With all these fingers in the UFO pie, our chances of getting anything more than a few crumbs are slim indeed - or so it seems to me. I'd also go along with the idea of CIA involvement in the JFK assassination. That seems to be pretty well established; to my satisfaction, at least. So, since we share interests and views, I'll look forward to more information from 'Zilch.'

"Brief book notes: Jacobs' 'The UFO Controversy in America' and Klass' 'UFOs Explained' are both out in paperback editions. Leonard's 'Somebody Else is on the Moon' is set for October release by McKay, and Steiger's 'Gods of Aquarius' is coming out from Harcourt Brace Jovanovich in November."

UFO researcher Steve Barnett writes: "I'm looking forward with great anxiety to the next issue of your newsletter. It's the most entertaining, ill-advised, and utterly fabulous thing to come out of the UFO field in a long time....."

Steven Elliott writes: "Thanks very much for the September 20th issue of 'Saucer Ooze.' (Shudder!)

"Glad you noticed your rather high popularity rating among 'Unknown Worlds' readers. Hope it didn't prove too much of an emotional shock to be rated lower than Gray Barker.

"As always, your 'notes' and letters were very enjoyable, informative, edifying, and ridiculous. I liked Zilch better when he was researching Grecian Formula 16.....

"I look forward to printing your reply to Barker's charges in our next issue. Also to be published is further material from Barker supporting the 'Military Moseley' viewpoint.

"Again, thanks for the newsletter, and keep up the good work."

Curt Sutherly writes: "I have, in my files, a reference to a rather droll-sounding publication entitled 'Saucer Ooze.' This sounds kind of like a refugee from an old Steve McQueen movie entitled 'The Blob.' Could there be a connection? The big question in my mind is: How long will you and your staff (John Keel and Gene Steinberg) be able to continue varying the title of this rag to the point of originality???? Surely you realize that a limit will be found as to the number of 'Saucer whatever's' you can put forth (hopefully before too much longer!) I only hope I live to see the day (so I can celebrate with a bottle of Annie Greensprings.)

"I noticed in 'Saucer Ooze' that once again you peddle egotism as a marketable item, having dared to compare yourself with such notables as Steve Elliott, Al Greenfield, and Gray Baker - er - Barker. Elliott, if you are out there somewhere, listen closely: James (Fort Lee) Moseley does not hold a candle, or even two, to you in popularity. In fact, the last time Moseley tried to hold a candle, he burned his fingers....."

Our Feature Letter for this issue is printed on the next page. The author is Mr. Jim Oberg, who is an ardent anti-ufologist, as his text somewhat clearly indicates.

CRACKPOT

NOTE TO NEXT ISSUE OF 'SAUCER REFUSE':

(Tell Ted Zilch to do his homework on Oswald and bother other gullible people about it. There isn't room on four pages to get sidetracked.)

As a self-styled gadfly, thorn under the saddle and general pain in the ass, I wish to warn UFO buffs that I believe and will prove the following assertions:

- LONG DELAYED ECHOES are proof of nothing but a distortion by partisans.
- despite the published "documentation", astronauts in space have never seen anything worth calling a classical UFO. Evidence available but deliberately ignored by pro-UFO researchers like Fawcett, Hewes, G. Henderson, Sandler, etc proves this - even though it is withheld from the public by pro-UFO media.
- The 'ISIRIUS' mystery is mysterious but not serious.
- despite the published "documentation" the Tunguska explosion in 1908 was a natural event. The latest sensationalism of the occurrence (the fire came by) is a biased and counterfeit attempt to mislead curious readers, based on the fantasies of Kazantsev and Zigel. No UFO exploded. No nuclear explosion happened.

- despite the published "documentation", all the automatic sky photo surveys like the Baker Nunn cameras and the Prairie Meteor Network were indeed checked for anomalies - and no evidence for UFOs was found. The photos are still available for research; UFO scientists hint that the evidence is there but do not bother to go look for it. It is not there and never was.

- Immanuel Velikovsky is in chaos, and is in collision with worlds of reality. My evidence is being published in 'OFFICIAL UFO', 'Search', 'Analog', and elsewhere. Anyone who thinks he has new evidence or can refute my arguments is urged to try: Jim Oberg, Rt 2 Box 1813, Dickinson, Tx. PS John Keel has always written me polite letters. Is something wrong with me? - and Stan Friedman

- stories that the 'Bermuda Triangle' interferes with space satellites, or that a mystery zone in space (the 'Great Galactic Ghoul') knocks out Mars-bound rockets, are fairy tales fit for the gullible and the feeble-minded.

- stories about pyramids, letter B's, Midas mufflers, great stone faces, and contour plowing on Mars are entertaining and titillating, as long as all the facts are not reported (pointed dig at editor). Mars is fascinating enough without such manufactured mysteries, guys!

- Ray Stanford's new impressive-looking book on the Socorro UFO case is a nice anthology of fantasies and paranoia. My resemblance between it and reality is purely coincidental. Sorry, Ray, I love your 'UFO Trap', but the book is a bummer...
