MISCELLANEOUS RAVINGS:

Well, Billy Meier and his entities from the Pleiades are back in the news. A New York publishing house called The Atlantic Monthly Press is coming out this May with a 50,000 copy first-printing of a book by one Gary Kinder called "Light Years". The publisher's propaganda sheet enthuses: "Meier's evidence has been analyzed by experts and leading scientists - including an American security team headed by a retired U.S. Air Force Colonel and scientists from NASA...." Could this be referring to our old friend, Lt. Col. Wendelle Stevens, now serving a five or six year term in an Arizona state prison??

Where are you, Kal K. Korff of Kalifornia, now that we need you?? Korff wrote a very competent book a few years ago, exposing Meier in great detail. On the strength of this and other ufological feats, Korff rose to an exalted position on the Permanent Organizing Committee of our own National UFO Conference (NUFOC). Now Korff has disappeared, and even his best friends in the Field don't know where to locate him! Is Korff, who has his own publishing company, hiding out from Ufodumb's Dr. Richard Haines, for whom he had contracted to publish a book about the famous Frederick Valentich Case? (See Valentich clipping on P. 2 of this issue.)

Just out is another UFO abduction book, called "Communion", by one Whitley Strieber, who recently appeared on a Miami TV interview show with two of the other alleged abductees. We saw this show, but found it confusing for several reasons. Incidentally, ace investigator Harry Lebelson of Miami has strongly suggested we buy "Communion" and lend it to him, to save himself the cost of this expensive tome!

And from Random House, no less, comes a new book by abduction investigator Budd Hopkins, called "The Intruders". Also, there's "The Zone of Silence" from Avon in paperback, of which we have been supplied a free copy by our friend & non-subscriber Denis Corey of Cowtown (also known as Columbus), Ohio. "Zone" is about an area of Mexico with weird magnetic peculiarities, and we actually intend to read it.

Also just out is an apparent vanity book called "The Six Thousand Year Old Space Suit", about the ancient Dogu statues found in Japan. The author, Vaughn Greene, shows over thirty points of similarity between these statues and modern Apollo space suits. Available for a mere \$6.95 from the author at: 548 Elm Ave., San Bruno, Ca. 94066.

Then there's Kenneth Behrendt's magnum opus, a 150 page, 65,000 word scientific extravaganza called "The Physics of the Paranormal", available from Arcturus Book Service (Box 2213, Scotia, N.Y. 12302) for \$19.80. The author, who is also the editor of AURA & a loyal "Smear" non-subscriber, tells us that this book reaches the conclusion that many paranormal phenomena are genuine but have been little studied due to the short-sight-

edness of the scientific community. He further claims that with only a minimal amount of experimental work, we will soon be able to artificially duplicate these phenomena for the benefit of all mankind. Behrendt's usual specialty is UFOs, but he has now expanded his horizons.

In regard to "Light Years", ParaNet's Jim Speiser has this to say: "I predict that the book, and the Meier case itself, will become a cause celebre, riding as it does on the heels of Shirley MacLaine's 'Out on a Limb'. The attendant publicity will thrust our one-armed farmer further into the public eye, where he most certainly doesn't belong. The subsequent public interment by Klass & Co. will constitute the greatest blow to the UFO subject since the Condon Report". We agree!

Back to Frederick Valentich - this is one of the very few UFO cases that really intrigue us, here at "Smear". Either the man concocted a wild hoax to cover up a voluntary permanent disappearance, or else he really was "zapped". It all reminds us of the long-forgotten disappearance in 1952 of Karl Hunrath and Jack Wilkinson of California, who rented a small plane at a minor Los Angeles airport, in order to supposedly fly to a rendezvous with a flying saucer and thereafter immigrate to Mars. In spite of a thorough FBI investigation, neither man was ever heard from again, nor was the plane ever found! (Shudder, Gasp!)

Our olde friend James ("The Amusing") Randi recently wrote a very interesting letter to psychic researcher Dennis Stillings, a "Smear" non-subscriber and head of the semi-mysterious Archaeus Project. We have obtained a copy of this letter from Secret Sources, and want to share some of its contents with our readers:

Randi begins by saying that the year 1986 has been very kind to him, and lists 12 specifics, of which a few are: His award of \$272,000 tax-free by the MacArthur Foundation, "to continue my work of investigating and exposing fakes, pseudo-scientists, and swindlers"; The fact that Uri Geller has (supposedly) "retreated to England after finding that U.S. scientists are no longer fooled by him"; and the fact that professional psychic researcher Berthold Schwarz has again fallen for "simple conjuring tricks" and thus has made a fool of himself again.

Randi's most serious charge is that one of the alleged instigators of an alleged blackmail scheme against him (several years ago) has been "arrested and convicted as a

7 years on, a family holds a cliffside vigil for lost pilot

By STEPHEN MEESE

THE parents of missing pilot Frederick Valentich still hope they will be reunited with their son.

It's seven years today since Valentich vanished while flying a Cessna plane over Bass Strait.

The 20-year-old pilot disappeared soon after telling air traffic control he was being pursued by a UFO.

His parents and twin sisters, Olivia and Lara, 11, will spend today at Cape Otway contemplating the mysterious disappearance.

Mr Guido Valentich, 53, said he did the annual cliffside vigil, past the isolated Cape Otway lighthouse, as a mark of respect to his son.

"It seems like only yesterday ... We're always hoping something will come up and we'll know what happened," he said yesterday.

"We're still hoping to see Freddy one day."

Mr Valentich, a member of the Victorian UFO Research Society for the past six years, still believes a UFO interfered with his son's flight on October 21, 1978. Every new UFO sighting renews the family's hopes.

"I've never seen a UFO but that doesn't mean I don't believe," he said.

Mr Valentich said he did not think the blue-and-white Cessna flown by his son crashed and sank.

"There would have been debris or a slick of oil. Nothing has been found."

"He was determined to get his commercial pilot's licence - I know he always followed the book.

"I don't think he would have crashed."

The Victorian UFO Research Society's vice-president, Mr Paul Norman, said Frederick Valentich was not the only person to report a strange object over and near Bass Strait on October 21, 1978. "Researchers have found more than 50 reported observations from that area which occurred before, during and after his encounter," he said.

Mr Norman said UFO activity had built up for more than six weeks before Valentich's encounter.

People from unrelated locations up to 300 km apart told similar stories of round objects and silver cigar-shaped UFOs moving at variable speeds with no visible means of propulsion, no wings and no sound, he said.

SUN, Melbourne, Victoria, Australia - Oct. 21, 1985 CR: P. Norman

Tape-recorded telephone tantrum

SHARON TAYLOR was shocked by a long, abusive message on her answering machine in her office at the University of California at San Diego.

After the ranting, the foul-mouthed caller got to the point - he wanted information on a course called Managing Anger.

child molester with a long history of crimes".

Rumor has it that numerous lawsuits are now pending against CSICOP in general and Randi in particular. In general, over-zealous methods and accusations against opponents seems to be the cause. Stay tuned!....

Some few of you may have wondered where we obtained the marvelously satirical UFO item on the back page of the Feb. 10th "Smear". This tract is from "The Remote Control Institute", a branch of something called The Church of the Sub-Genius, which seems to be an Acid-Rock sort of take-off on organized religion. The Church worships an entity called "Bob" Dobbs, who is (or was?) a smiling, clean-cut looking young fellow always pictured smoking a pipe. "Bob", like God, is every-

where. The Sub-Genius literature goes on endlessly, as expressed in the Church newsletter, called "The Stark Fist of Removal", and elsewhere. These ravings are hilarious, at least to us. But the reason we bring this up now is that we were recently invited by another of "Bob's" ministers to a party in Miami, at an art gallery called Wet Paint. The scene was out of the 1960's in many ways, with a rock band attempting to play on the roof. The young people attending were not all aware of "Bob", but seemed for

the most part to be harmless later-day hippies doing their Thing, peacefully & pleasantly.

Unfortunately, a disgruntled group who had caused trouble at a previous party, showed up suddenly with rocks, baseball bats, home-made fire bombs, and some sort of shotgun loaded with blanks. Those of us gathered on the front lawn at the time hurried inside amid the sound of shots, etc.

After these intruders quickly left, the band decided to come down off the roof and set up again inside the gallery; but before they had gotten very far into the first set, the same disgruntled group returned and set the house on fire! Your fearless editor, attempting to help a bucket brigade, got splashed all over with wet paint (get it??) when someone handed him a paint bucket filled with water.

Police and firemen arrived quickly, the band disbanded, and the party was over. No one was hurt, but the evening was washed out.

What a shame! Just like in the 1960's, a few rotten apples sour the cream - or whatever. We don't think "Bob" liked what happened at the Wet Paint that night.

What has all this to do with UFOs? Very little, really.

SubGenious Cult

MAN DROWNS AT LIFEGUARD PARTY

A NEW ORLEANS man drowned during a party for lifeguards celebrating their first drowning-free swimming season in many years.

The victim was 31-year-old Jerome Moody. When the party ended, his body was found on the bottom at the deep end of a pool run by the New Orleans Recreation Department, said Madlyn

Richard, the director.

Moody was not a lifeguard and was attending the party as a guest. He had not been swimming and was fully dressed when his body was found.

Four lifeguards were on duty at the party the evening of July 30, 1985, and more than half of the 200 people there have certificates as lifeguards.

(4)

Again we inform you that the National UFO Conference (NUFOC) will hold its 24th (Count 'Em!) annual convention at the Burbank, California, Hilton Hotel, adjacent to the Burbank Airport, on June 12th-14th of this year. Since our last "Smear", famed author & lecturer Brad Steiger has been added to the list of distinguished speakers. The other speakers include local chairman Bill Moore, Stanton Friedman, Hal Starr, Timothy Good of England, and Dr. Richard Neal, M.D.

Moore can be reached at either of two addresses: 4219 West Olive, #247; Burbank, Ca. 91505. Or - 6335 Whitsett, #17; North Hollywood, Ca. 91606. Write him for details, or phone him at: 818-506-8365.

The National UFO Conference, founded in 1964, has a governing board composed of the following members: Jim Moseley, Chairman (who will attend, as usual); and Bill Moore, Hal Starr, Tom Benson, Ron Schaffner, Ed Biebel, Charles Wilhelm, Tim Beckley, and Kal K. Korff (if we can ever locate him.)

Your humble editor, in order to maintain a balanced mind, will also attend the dreaded CSICOP conference, to be held in Pasadena, California, on April 3rd & 4th. Keynote speaker will be Carl Sagan. James ("The Amusing") Randi and other luminaries of the anti-superstition field will also appear prominently on the program.

The Sunday following our NUFOC convention (i.e., Sun. June 21st), there will be a one-day ufological symposium at a high school auditorium in Greenwich Village, New York City, sponsored by publicist Mike Luckman. The theme is "Forty Years of Government Cover-Up". Speakers will include several ufological experts whose names cannot be released prematurely. For details write to Luckman at: 134 West Houston St., N.Y.C. Phone: 212-460-8626. Our friend Harold Salkin is also involved in this.

Finally, on June 26th-28th, Dr. Bruce Maccabee's Fund for UFO Research will sponsor the annual MUFON convention, at American University in Washington, D.C. Details available from Maximum Leader Walt Andrus of 103 Oldtowne Road, Seguin, Texas 78155.

Thusly, the 40th-anniversary year of Kenneth Arnold's sighting promises to be a banner year for conventions!....

Notorious former UFO researcher Todd Zechel has finally come out with issues #2 and #3 of his peculiar pseudo-Intelligence zine called "For Your Eyes Only". These contain interesting speculations concerning NICAP, the John F. Kennedy assassination, and other matters, but notable for their absence are parts two and three of the promised three-part expose of Phil Klass, begun in issue #1. Was this one too hot to handle???

Zechel "freaked out" when we passed on our copy of #1 to our friend Klass, since we hardly thought we were expected to take the ridiculous title of this magazine seriously. Zechel sent us an angry letter, which we printed at the time, and he refunded the \$3.00 we would have spent for issues #2 and #3. Better would be a refund of the nearly \$2,000 in theft of services, suffered by your editor at Zechel's hands circa 1977, when we made the ghastly mistake of having him as a long-term house guest, at our New Jersey apartment. Zechel phoned friends and informants all over the country for several weeks, till finally the phone bill arrived and he was asked to move on. More on this in future "Smears"!....

Several of our readers have called our attention to a wild contactee tract published by something called the International Space Science Foundation, of Salt Lake City, Utah. For \$20 one can purchase a group of about a dozen startling tapes, including one about an allegedly authentic UFO landing which occurred in Texas in late 1986.

Few people bother to read the disclaimer in tiny print at the end of the tract: "This four-page document contains some information which is fictional dramatization".

All we know is that we sent them our \$20 over two months ago and

(5)

have received nothing as yet. After weeks of intense procrastination, "Smear's" ace investigator in Salt Lake City has recently learned that the street address they give is merely a mail drop. Sounds like a swindle to us, folks!....

As MUFON's Florida State Section Director for Monroe County, your editor has finally come up with something interesting, sort of: On Feb. 28th it was announced in the local paper that divers working for famed treasure hunter Mel Fisher of Key West brought up from the ocean floor a 1940's vintage Avenger class Navy airplane. Fisher believes this may be one of the five Navy Avengers that disappeared on Dec. 5th, 1945, in the most famous of the "Bermuda Triangle" mystery disappearances. A search of 280,000 square miles from the Florida Everglades to the Gulf of Mexico to the Bahamas, at that time, failed to find any trace of the five planes....

According to a UPI dispatch carried in Jan. 16th newspapers, Soviet leader Mikhail Gorbachev, in a major policy speech, made "a remark greeted with laughter and applause. He said Reagan's proposal that the superpowers cooperate to repel a possible attack from extraterrestrials was premature"

More than two years after Gray Barker's death, the niece who is executor of his estate has finally come out with a list of UFO books for sale therefrom. This lady, named Sharon Stump, states that all bids for these books must be received by mid-March. Therefore, any "Smear" non-subscribers interested therein should write her as soon as possible, at: 28 Morris Ave., Richwood, W.Va. 26261.Noted Fortean researcher Loren Coleman has come out with a book more in line with his regular (paid) work, called "Suicide Clusters", published by Faber & Faber, 50 Cross St., Winchester, Maine 01890. Coleman is involved with the Runaway Suicide Prevention Project at the University of Southern Maine....We're sorry that space limitations have prevented us from printing several good letters-to-the-editor that were originally scheduled for this issue - but they will appear next time, if the Space People allow!

ALASKA

FAA offers package on UFO sighting

ANCHORAGE — If you want an inside look at a Japan Air Lines pilot's recent claim that he saw a UFO, the Federal Aviation Administration will send you everything you ever wanted to know about the incident for \$194.30.

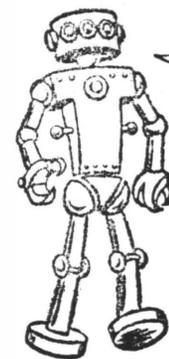

MISSIVES FROM THE MASSES:

DEAN ZEVCHEK of Parma, Ohio (and several others) has/have written us in regard to Bruce Walton's letter in our January 5th "Smear":

"Does Bruce Walton write out of an asylum?! If not, I highly suggest he spend some time at one until his mind is eradicated of his inane belief that 'UFOs are the result of demonic spiritual manifestations.' (He can also keep Keel company!)

"I witnessed my first spacecraft when I was about 8 years old, and have been interested in ufology since then. Is Mr. Walton going to tell me that 8 is the average age at which possession is first attempted on a child? Since that sighting I can conclusively say that I have lived 16 years demon free. (I'm 24.) I even had a couple of other sightings during that time, so is Walton going to tell me that evil spirits will continue to taunt me (in the form of UFOs) until I succumb to their pleas for my soul? Common sense will tell anyone that Bruce's line of thinking is ludicrous!

Mr. Walton also goes on to babble about how 'demons are masquerad-

NOW THAT THE CAT IS OUT OF THE BAG, AND PEOPLE KNOW UFO'S ARE TOOLS OF DEMONS, I CERTAINLY HOPE NO ONE FINDS OUT THAT ROBOTS ARE THEIR MESSENGERS HERE ON EARTH!

ing themselves as space gods.' If the New Agers want to think of extra-terrestrials as gods, then that's their business. They don't need a guy like Bruce inciting trouble by knocking their beliefs; after all, 'many a war was fought over religion.' Being a Catholic, I see nothing at all wrong with my belief that we're not alone in the universe, and I'm sure that somewhere out in deep space, there are beings sharing that same thought. And one day when we visit their worlds and become UFOs to them, I certainly don't think they'll be calling us demons! Even if they do, at least we'll know otherwise."

ANDRON GYMUS writes as follows:

"Hail Supreme Commander!

"A humble item for your exalted attention:Regarding 'logical' (?) comments made by Mr. Bruce 'Born Again' Walton: 'Airing his beliefshis "research" led to the logical conclusion....I rest my case.'

"My comments concerning his 'logically-concluded beliefs' are to thank you, dear editor, for providing much laughter to lighten your otherwise serious efforts. Levity brightens the day, and one can always count on the righteous activities of the Jeezdroids to ensure ample humor! Thanks again!...."

TOM BROWN of BSRF wades in with:

"....This brings us to the controversy I helped stir up by replying to Bruce Walton's letter. I apologize to Bruce for stomping on his belief system. Probably one too many Cash-for-Christ people rang my doorbell that week.

"After a year or so at BSRF, I find that there are people who think that Jesus and his Angels ride around on the UFOs. Others think that the Devil and his nasty cohorts make up the crews. I allow the possibility of both, while believing nothing of the sort. I have found schools of thought which teach of Good-UFOs and Bad-UFOs operating on the inner planes. It is a balanced view that ties in directly with Tibetan Mandala technology and Chinese Ch'an processes of thought. To think of the Chinese masters as 'New Age Devil Worshipers' is like actually believing that fast food is good for you. It simply shows a lack of scope.

"I don't know how Tommy Blann got the idea that I didn't believe in evil forces outside of humanity - both good and evil do; big deal. My point is that Christianity is a life-negating religion. We are (supposedly) born with original sin (sex). The Saviour (for those who need one) was born without this sin (immaculate conception - no sex.) This is an unnatural view which I refuse to accept. Nature is a better guide than mistranslated, distorted texts promoting left-over, middle-ages superstitious hangups!

"While believing that the spiritual aspects of UFO are valid, I also feel that there is sufficient circumstantial evidence that nuts-n-bolts craft exist and are possibly in the possession of our government.

"In response to Christopher Allan's letter: BSRF reported a saucer sighting in San Diego on Oct. 9th, 1946, well before Kenneth Arnold's sighting. BSRF has been at the forefront of Ufology for over 40 years!! We have also promoted the 'infra-red critters' of Trevor Constable - another valid explanation for many sightings.

"You make a great referee, Jim...."

KEN BEHRENDT of AURA writes:

"I am a believer in the Nov. 18th, 1986 Alaskan UFO incident. It must have involved a very large mother ship which released two smaller cylindrical craft to inspect the 747 cargo jet to make sure that it did

(7)

not pose a threat to the much larger and less maneuverable mother ship. If the Japanese pilots had gotten too close to the mother ship, then they might have wound up like Captain Mantell, and all of that nice French wine they were carrying would have made a lot of polar bears very drunk!"

DENNIS STACY of MUFON writes:

"Dear Capt. Moseley:

"I don't know, Jim. Sometimes I wonder about you and your...UFO-phobia. Are we supposed to discount the JAL flight 1628 sighting reported by Captain Kenju Terauchi near Fairbanks, Alaska, on Nov. 17th, 1986 solely because he looks like a (mental) basket case?"

"Come on! You look like a basket case standing next to our current Prez, and so does he, and so probably do I, too, for that matter. But the man flew a Boeing 747 (big jet to you, Jim) all the way from Paris, France ...to Anchorage, Alaska, with a full cargo of wine on board. Hell, the man has a right to be grinning! Unless you want to discount the testimonial pictures of the heads of Sony, Toyota, Honda, Mitsubwhi, et al, as equally crazed crackpots, when the American treasury, not to mention taxpayer, knows better!"

"Let's discount the case, if that's what we're going to do, on the basis of his testimony and what corroborative evidence - if any - surfaces in the future...."

See also Stanton Friedman's ravings on our Coveted Back Page. - Editor.

Genial ROB MACGREGOR of Fort Lauderdale, Florida, writes:

"Did you ever consider the power of the Will to Dis-Believe? Some people think this Will is also a belief system, and equally as strong as the Will to Belief. Maybe it's all a belief system, and what you believe is what you get. If this doesn't fit your belief system, well, throw it away.

"When you met with Reagan, did you discuss funelling arms-to-Iran profits for UFO research (i.e., 'Saucer Smear')? Did you ever consider the Beirut kidnap victims as evidence of alien abductions? Or, are the abductors simply specimens of cryptozoology research?"

Venerable UFO researcher GEORGE EARLEY delights us with:

"....I understand that Todd Zechel claims Phil Klass has gone boating with a member of the KGB. Will Zechel's next revelation be that this was the inspiration for that famous song, 'Red Sails in the Sunset'?....

"Blaine Hamrick's 'mysterious tunnels' connecting all the U. Texas at Arlington buildings sounds rather much like the ones back at my Alma Mater. Those tunnels all ran from the college heating plant, carrying the steam lines that heated each dormitory and classroom building. I suspect the one real mystery here is why Hamrick needs a mystery!..."

Dreaded skeptic JOHN MERRELL, who is being sued by a Florida psychic, writes as follows:

"Interestingly, I cannot recall a major lawsuit coming forth from the UFO community at large. Perhaps this is but another unspoken indication that the 'UFO = ETI' issue is but a matter left best presented amid the pages of 'Saucer Smear', and away from the realities of a legal system that demands payment to examine an issue. Perhaps too, given the virtual non-existence of legal battles between Believers and Skeptics on the UFO = ETI issue, there is a greater degree of comradery and willingness to forgive than on other paranormal matters. Certainly 'Smear' is the unifying squeaky wheel under which every person gets the grease!..."

JTF

Mr. James W. Moseley
POB 1709
Key West, FL 33041 USA

Feb. 14, 1987

Dear Jim:

Rarely has the intellectual bankruptcy of anti-ufology been more clearly demonstrated than with Phil Klass' explanation of the JAL UFO sighting as Jupiter and/or Mars. I spoke with the FAA, have read their report, collected other information and even viewed a slide of how Jupiter and Mars looked the night of the sighting. Some facts ignored by Phil include that the UFO was observed on the aircraft weather radar; That the ground radar observer observed the primary UFO over an extended period of time; that the primary UFO station kept with the 747 through an extended period of time and flight at different altitudes; that the drawings made by the crew immediately upon landing show an object with a large solid angle not a point object. Jupiter and Mars fail all of these tests. In addition the pilot has more than 10,000 hours as a pilot and has been flying polar routes for more than 2 years. To suggest that he is unfamiliar with the planets in skies which are usually quite clear during long winter nights is patently absurd.

Perhaps even more reprehensible is the fact that the pilot speaks rather poor English and is now stationed in Japan. Obviously he is not in a good position to sue Phil for the libelous or slanderous accusations which amount to suggesting total incompetence I would expect that Phil has not talked to the crew with or without an interpreter. It seems strange that Dick Haines a scientist with considerable professional experience concerning perceptual skills spoke to the pilot through an interpreter with a PhD for three hours and came away completely convinced that Jupiter and Mars could not explain the case. It reminds me of Phil's investigation of the Roswell Incident. Despite the fact that Bill Moore and I have talked to 91 persons involved in the case, Phil has talked to none and yet claims he has explained it away!! It is no wonder I was able to note more than 20 mistakes in his treatment in his last book-fantasy. Despite persistent claims on his part that no secrets can be kept from the Woodward-Bernsteins of Washington, DC, Press corps, he has still failed to provide a copy of even one of the more than 150 documents about UFOs that the NSA states it is withholding or even an unexpurgated version of the Top-Secret NSA affidavit to a federal court judge justifying Non-release.

Incidentally the interest in UFOs certainly seems to be very high. I spoke at 7 college campuses in 5 states and provinces in a one week tour. Many overflow and very enthusiastic audiences. Many friendly radio, TV, and newspaper interviews. My documentary movie "UFOs Are Real" has played in several cities (TV) including New York. Videotapes are still available (VHS-or Beta) for only \$40. US for the 93 minute full color Hollywood production. Hopefully all will ignore the last 2 minutes about Billy Meier which I tried to keep from being included.

Also I have been working full time on a study for Environment Canada on the use of electron beams for the treatment of powerplant flue gas to reduce acid rain. And I have started a new company SCAT Science and Technology Inc. to provide a unique Canadian service with regard to monitoring home radon levels. Busy time... regards
