Digest

An illustration of three spacecraft in space. The largest spacecraft is in the foreground, with a smaller one above it and another even smaller one further away. They are all moving from left to right, leaving long, white, brush-like trails behind them. The background is a dark blue/black space filled with small white stars and a crescent moon.

*Theories of
Electrical Flight*

published by the PACIFIC LEMURIAN SOCIETY

W. Gordon Allen

W. Gordon Allen became interested in the fantastic story of MU while a Naval Radar officer in the Pacific in the second World War. Allen saw many remains of the ancient civilization in the different island areas. In editing the SPACE CRAFT DIGEST he uses the approach of his background of engineering (he graduated in electrical engineering with additional work at Princeton and MIT).

He is now in the radio business in the Pacific Northwest and has built some eight commercial broadcast stations.

In founding the LEMURIAN SOCIETY he hopes to unravel the mysteries of the ancient civilization and to complete work on an observatory and astrophysical center through increased membership in the society.

Members already are scattered over the world and the size of the SPACE CRAFT DIGEST is to be increased next issue.

EDITORIAL

The SPACE-CRAFT DIGEST promotes the editorial conception that pure electrical flight in space is possible and that now the U.S. is on the wrong road in attempting Moon or Mars flight with rockets dragging tank cars full of fuel with them in space flight.

In the near future, someone on this planet is going to streak ahead a thousand years with one brilliant flash of discovery of fundamental universal principles. If this is not a citizen of the U.S. we may find our whole western civilization in jeopardy. The group that makes this discovery can do with the planet as it may wish.

Further, there is the question of why great civilizations in the past disappeared from the face of the earth. Today we are not immune to such a fate. It bears us well to study every item of knowledge about these peoples and profit from their demise. LEMURIA . . . MU . . . the motherland was one such continent. That is why the PACIFIC LEMURIAN SOCIETY carries on the work of re-discovery and tabulation of this lost knowledge.

Also, it is felt that those who can conceive of the real connection between the esoteric and physical schools of thought have a duty to explain the correlation to those who do not yet conceive that in the cosmos all is interconnected into one great universe of knowledge and motion.

The PACIFIC LEMURIAN SOCIETY headquarters is in Salem, Ore., USA, the still existing eastern boundary of the ancient lost continent of MU. The Society hopes in the near future to begin construction of the LEMURIAN ASTROPHYSICAL CENTER and is now soliciting subscriptions from those who will wish to be members of an esoteric and scientific group that is to be independent of the world's dogmas . . . as much as it is possible to be.

Bulletin

San Antonio, Texas 18 Feb. INS The air force chief of staff of space medicine says many more tests will be necessary to prove conclusively the hypothesis that man is capable of space flight.

But Lt. Col. George R Steinkamp of the Randolph Field school of aviation medicine, director of the space experiment with airman Donald Farrel, says that the barrier to space flight belongs to the engineers.

COMMENT BY ED " the much publicized trip to the moon by the airman was nothing more than a stunt, in our opinion. The gravity problem was not encountered, nor was that of high accelerations. The USSR was certainly not fooled---only the nation's news editors who hung on every respiration as if it were REALLY A TRIP TO THE MOON.

IN CAMBRIDGE, MASS. THE US NAVY is immersing mice in a liquid and has found that a mouse wrapped in a liquid space-suit with stood over 1500 G's for about a minute "still the same old track, however, no matter how you wrap the animal gelatin-mass it still may be smashed by gravity so let's spend more of our money looking for a real gravitic understanding Ed."

Los Angeles . . 17 Feb. INS PLANS ARE ON THE DRAWING BOARD TODAY FOR A NUCLEAR ROCKET WHICH WILL POSSIBLY CARRY THE FIRST MAN INTO OUTER SPACE. THE AIR FORCE AND NORTH AMERICAN AVIATION'S ROCKETDYN DIVISION HAVE ANNOUNCED THAT SUCH A ROCKET IS UNDER DEVELOPMENT HERE. ALTHO THE PROJECT IS STILL IN THE RESEARCH STAGE IT IS A DEVELOPMENT THAT WILL ONE DAY BE A REALITY A ROCKETDYN SPOKESMAN SAID.

Buenos Aires, Argentina . . . COMISION OBSERVAT' DORA DE OBJETOS VOLADORES NO INDENTIFICADOS Casilla de Correo 2560 . . . publishes an eight page mimeographed bulletin for 1957 giving a chronology of UFO sitings over Argentina last year. The publication is in Spanish, but is not too difficult to translate 24 excellent reports thru the year are logged such as that of Dr. Juan A Siffredi at 1800 hours in the plaza of the federal capital he saw an oval object of an aluminum color at about 2,000 meters. There were also 6 or 7 other objects of the same brilliant metal. The objects hovered over the plaza " Most of the sightings are quoting professional men such as Doctors and other citizens of professional responsibility. The objects are of most of the familiar types found in the UFO literature.

FLYING SAUCER REVIEW excellent publication . . . (English) can be obtained from Allen's Book Shelf 11056 Sierra Avenue, Fontana, California. Six issues \$3.75 "promises in the Mar-April issue to have an article from a man in Warwickshire who has 'talked to A MAN FROM ANOTHER WORLD' HERT'S, ENGLAND, in the same publication said that school children saw a glittering silver disc (and-or) ball of fire hovering in the sky at mid-day in December (9th) 1957.

CONFIDENTIAL BULLETIN —
to: SPACE-CRAFT DIGEST

March 5, 1958

Dear Member: (by Major Donald E. Keyhoe)

Since the Armstrong TV show, when I was cut off the air, there have been important developments affecting you as a NICAP member. First, you should know that there was AF pressure during the Armstrong rehearsals which caused censorship of my script. The section deleted listed four AF documents never officially released but which had been confirmed by Capt. E. J. Ruppelt, former chief of Project Blue Book, and another former Project officer. These were:

1. A September 1947 ATIC conclusion that the flying saucers were real.
2. A 1948 top secret ATIC conclusion that the UFOs were spaceships.
3. An AF Intelligence analysis of UFO maneuvers, with the same conclusion.
4. A secret report by a scientists' panel at the Pentagon in January 1953 which urged
 - a) that the AF quadruple its UFO project, and
 - b) that they give the American people all UFO information, including AF conclusions.

According to an Armstrong official, the AF officer on the show warned them the AF would immediately deny the documents' existence if I were permitted to name them. This would also include denouncing the quoted source—their former Project chief—though his book with these items was cleared by AF Security and Review. This threat, which appears to be censorship by intimidation, caused my statement to be cut out. Though Armstrong producers tried to be impartial, AF insistence on most of the program time forced me to delete many vital items including: Official orders which silence armed forces personnel, and an AF letter to NICAP by Maj. Gen. Joe Kelly, Director of Legislative Liaison, USAF, refusing to release UFO reports and admitting they are classified "for official use only."

Because of this pressure, I tried to ad-lib the following statement on the Armstrong program: "In the last six months, we (NICAP) have been working with a Senate committee investigating official secrecy on UFOs. If open hearings are held, I feel it will prove beyond doubt that the flying saucers are real machines under intelligent control."

Though this had been discussed with a sponsor's representative, who reacted favorably, the producer later told me that since he was not informed he had to cut me off, under CBS rules. However, this does not alter the fact of Air Force censorship before the show.

Since then, there have been intensified attacks on NICAP and its Director. I hope to cover the items omitted on the Armstrong show on next Saturday, March 8, when I am scheduled to be interviewed by Mike Wallace of the ABC network at 10 pm EST; also when I appear on the "Long John" program on Station WOR after midnight following the Mike Wallace show. I hope to offset one serious effect of the Armstrong show.

A privately supported fact finding body serving the national public interest

The Truth of the U.S. Missiles Failure - - -

The German V-2 could have put a "moon" into Orbit in 1943!
Quoting Dr. I.M. Levitt -- director Fels Planetarium.

During the nationwide jubilation that followed the successful launching of America's Explorer satellite a fascinating story was overlooked...the TRUT
Hardly anyone realized the army scientists made desperate by the failure of the Navy's Vanguard rocket' decided figuratively to go primitive and blast a satellite into orbit by hook or crook.

The scientists called it the "quick and dirty" system. The launching also pointed up the difference between the Jupiter C and the Vanguard. They decided to fire a rocket using EXPLOSIVES which is like propelling an auto by exploding dynamite charges just back of the rear wheels.

HERE IS THE STORY OF THE HODGEPODGE.....The Redstone is just a souped-up version of the German V-2 (15 years old in development) which develops 78'000 pounds of thrust compared to the V-2's 56,000 lbs. But it had a thoroughly reliable guidance system. (good enough to be hitting a certain section of London regularly in the second world war).

ON TOP OF THIS V-2 was piled three more rocket systems which were of the solid fuel type. ELEVEN WAC Sergeants were mounted in a circle as the next stage. This "stalk" was followed by three more mounted as the next stage. ON TOP a single rocket to "set" the 30 pound payload into orbit (18'000 mph). It takes 2200 pounds of fuel and hardware per payload of satellite! *****end of quote.

DEMOS WATCH G.O.P.....(From Democratic Digest)... "Well, almost before the reluctant American Satellite made its first reluctant turn around the earth, Republican Congressmen began popping up on TV stations all across the country with films explaining the new scientific achievement. Of course, just to sure they could get on TV in time to take advantage of the excitement caused by our first satellite, the films were made in advance. This resulted in one little flaw. The films were about the WRONG satellite? While our explorer was circling overhead, the GOP congressmen were basking in their self-styled limelight with a film about the still grounded Vanguard! NEWSWEEK... said...as it corrected the GOP. The film said 20" in diameter (actually it is 80" long)...further...the film said it was a three stage rocket (it was a four stage)it said the first stage shot the rocket 35 miles (actually 60 miles) ...now from the Demo. Digest " We can say from long experience that it was nothing for the Republicans to tell 20 million people how they launched the Vanguard while it was still on the ground at Cape Canaveral! "

Salem, Oregon....March 5, 1958.... Mrs. Elinor Prink, 4347 Macleay Rd. reports seeing a fiery blue streak trailed by a flashing red area about the size of a red large star traveling East at terrific speed at 11:45 PM..... Must have been a jet plane because UFO's do not exist says the USAF.

Space Craft Bulletins -----from around the planet.

UFO INVESTIGATOR ---1536 Connecticut avenue--Washington, D.C. states that Maj. Gen. J.W. Kelly of the USAF admits that the AIR FORCES are intentionally deceiving the American Public.

OCTOBER 6th 1957, TOLEDO, OREGON, Rufus B. Wood, (excerpt from letter) "...two nights ago Newport(Ore.)people reported seeing about 20 flying objects make a complete turn over the city at about 10:30PM. a large object with fire all over it came down out of the clouds made a turn and flew up the coast."

NEWSWEEK....In the second report of their continuing study of man's exposure to radiation and especially radio-active Strontium 90 the deadly debris of H-bomb fallout. Three Columbia University scientists J. Laurence Kulp, Walter Eckelman, and Arthur R. Schulert---have analyzed over a 1,000 cadaver bone samples collected from over six continents the last five years and in the current issue of SCIENCE they draw some disturbing conclusions:

THE BODY'S LEVEL OF "STRONTIUM 90" A SUBSTANCE WHICH IS SOAKED UP BY BONE CALCIUM AND RESULTS IN BONE CANCER HAS RISEN 33% IN THE LAST YEAR!

KITCHENER ONTARIO, PO, BOX 21.....Homer Schafer...."...on June 7, 1957, about 11:45 PM I observed the gigantic BRIDGE ON THE MOON thru my 6" reflector telescope....."Letter 1 Feb. 1958

SEATTLE POST INTELLIGENCE...11 February 1958....Columnist Frank Lynch.."...Shortly after Sputnik blazed across the sky there was a package in our mailbox. It was post-marked from Everett, and there was no other clue to the identity of the sender. THERE WERE FOUR PHOTOS IN THE PACKAGE THE FIRST WAS SAID TO BE A VIEW OF THE MOON FROM 120,000 miles, the second a snap of the moon from 50,000 miles. THE THIRD WAS A VIEW FROM JUST 10,000 MILES OUT----THE FOURTH BORE THIS CAPTION "...CLOSE UP OF PLANT LIFE ON THE MOON"... The photog went on to point out that in each of the photos the outer air was dotted by flying saucers.. "he goes on to ask....."is there a flying saucer in Everett or vicinity?

SEAFORD, NEW YORK, Feb 21, 1958.....Mysterious antics of bottles and other objects finally proved to be too much today for the James Herrmann family. They quit their home to live with relatives.

A flying sugar bowl and a leaping inkwell last night served as the final straws to the nerve wracked mother and father of two children 12 and 13. For 18 days the family has been plagued by such things as: a bottle of bleaching liquid blew its scre top: a porcelain figurine danced off the table; A bowl of sugar flew off the table and made a dent a fifth of an inch thick in the wood of the floor.".....POLTERGEISTS AT WORK?.....certainly a highly concentrated force field of some psychic nature seems to be responsible for this type of phenomena that science cannot yet understand or explain, BUT never-the-less these things happen and certainly are from beyond our present state of knowledge, but they do give us a hint of other force fields beyond our senses, do they not?(Ed)

The Real Truth Behind the U.S.A.-U.S.S.R. Frantic Race to the Moon

Those who are careful students of what astronomers have really seen near the moon, as well as other students of Metaphysics and other simply careful observers have almost all come to the conclusion that over the years there has been a lot of traffic in the vicinity of the Moon. Even though "authorities" have taught for hundreds of years that Luna is a very dead planetoid (in the earth-moon binary system) these phenomena keep on happening and with modern methods of communication, even the dogmatists cannot succeed in keeping these stories out of the public fund of knowledge.

BULLETIN...

Any hour now the US. or USSR may send a reaction-powered vehicle to the moon. This is an easier "shot" than the perfect timing required to "set" a satellite in an orbit BUT REMEMBER....that it is a projectile, not a space-craft and that the earth-moon is a single unit binary system. No matter how wonderful our publicity makes it look, it will not be space flight but just a crude, small projectile which has broken free of the earth's "gravity" field. Do not be taken in by the publicity. Man has still much to learn about the fundamentals of the cosmos... (Ed.)

The year of 1957 found these interesting Lunar Traffic Items:

STOCKHOLM, Sweden - 31 December, '57 ... A report by a Swedish officer of a shining object traveling on a spiral course toward the Moon was under examination at Sweden's

defense headquarters Monday. The best guess so far seems to be that it might have something to do with the USSR satellite or middle experiment, a staff officer said.

"We know that it is no airplane, nor any meteorological balloon," he said. "And the Stockholm Observatory has told us that it is no meteor?"

He said the observation was made Sunday by a Swedish army captain at Kortedala, near Goteborg, on the Swedish west coast.

"The captain reported he watched the object through his field glasses for 20 minutes."

"We are taking this report seriously since it came from a competent observer. All details are being forwarded to the FOA (scientific research institute of Sweden's armed forces).

"The captain described the object as a FLATTENED SPHERE circling moonwards."

"Its sides were somewhat elongated and there was a flickering glow as if from burning exhaust gases from one side."

The Swedish defense staff spokesman said the captain had not been able to estimate the altitude but had reported the "object moved one degree a second on the scale of his field glasses."

From his position at Kortedala the captain saw the object in a S.S.W. direction.

The object was certainly not possibly Sputnik, as it is outside all possible schedules; the spokesman concluded.

So ends this Swedish army report of what most open-minded observers would say is an amazing UFO report.

In the November, 1957 issue of SKY AND TELESCOPE, published in conjunction with the activities of the Harvard Observatory is this report:

Bright Spots in Herodotus

"Sketches made on several nights indicate that no fewer than 26 craterlets of bright spots were drawn. For one brief instant of perfect seeing the dark velvety floor of Plato appeared to be covered with still other minute spots!

In the July issue of the same astronomical publication James C. Bartlett saw three bright spots in the Lunar crater HERODOTUS. Earlier observers had not seen these spots.

In the U.S. there are several observatories with Lunar Viewing contracts. SPACE CRAFT DIGEST has found that these "secret" archives have kept from the public the amazing truth that high officials in the U.S. and the USSR cannot rest until they know the real secrets of space travel, for the nation that has this great secret will rule this planet! .. THAT'S THE REAL SECRET BEHIND THE USSR-USA FRANTIC RACE TO THE MOON. ROCKETS ARE ALREADY OBSOLETE AND ALL WORLD PROPULSION EXPERTS KNOW IT :

Open Pit Mine?

Under a sketch of the Lunar crater Plato (see also illustration of HERODOTUS) Patrick McIntosh of RR 2, Box 231 of Robinson, Ill. writes:

"Jackson T. Carle's article THE THREE RIDDLES OF PLATO in the April, 1955 (S and T) encouraged me to begin the observations of the details on the floor of this crater, using an 8 in. f 7.5 reflector

The small moon "spirit" observed in the Astral travels of Immanuel Swedenborg of the 1700's perfectly describes the crewman of a flying saucer or UFO which crash-landed near Mexico City in January, 1952 and is shown above as a corpse on display between two German biochemists. It shows also his approximate size. This is stamped "secret" in the U.S. but the picture was obtained from West Germany. Is this the type of being which might be living IN the Moon? Certainly there is a great deal of activity in certain craters of the Moon which shows up to close Lunar observers.

YET these sightings are in no way different than what has been seen on the moon for a long, long time - in fact, for.....

For the last hundred years and more responsible observers from various national observatories over the world as well as competent amateurs have seen any number of indications that the nearest neighbor in the universe to the earth, the moon, has plenty of activity.

This activity varies from bright lights, thru various colored lights, to white and jet black spots. Peculiar reticulations are seen not only by amateurs, but also they are shown with clarity by the 200 inch telescope of Mt. Palomar. These moon pictures that take the observer to within 25 miles of the moon clearly show that something is making deep trails in the moon dust outside of the craters. Objects are seen to be moving across the moon and some 1600 or more instances of lights near the surface of the moon have been recorded. Many of the objects crossing the moon are seen to cast shadows. Lights from the dark portion of the moon have often been seen.

The very strong indications are that all of the Lunar traffic here recorded means nothing less than the amazing possibility that other entities might well have been using Luna as an earth-orbit space station long before man struggled into his own atmosphere via the airplane. Countless reference to flying saucer, UFO's or spacemen appear all thru written history from the time of Amenhotep III in 1500 B.C. These might well have been, and could be now, based in the moon. They might well be from Mars or Venus. Mars has two small satellites of its own 9 and 11 miles in diameter. Mars seems to have "answered" the moon lights with light signals of its own.

BODIES CROSSING THE MOON

SCIENCE July 31, 1896. Mr. W. R. Brooks, director of the Smith Observatory, saw a dark round object pass slowly across the moon in a horizontal direction; apparent diameter 1/30th that of the moon's; crossed the disc in three or four seconds.

Dr. F. B. Harris (POPULAR ASTRONOMY 20-398) Jan. 27, 1912. Saw upon a moon an intensely black object estimated to be 250 miles long and 50 miles wide.

(L'Anne Scientific 1860-25). Vast numbers of bodies were seen by M. Lamey to cross the moon. Issue (1874-62) Messier reports an immense number of black spherical bodies.

POPULAR SCIENCE 34-158. Serviss tells of a shadow that Schroeter saw in 1788 in the Lunar Alps. First he saw a light, but then when this region was illuminated he saw a round shadow where the light had been and "that he saw a luminous object near the moon: that that part of the moon became illuminated and the object was lost to view; but then its shadow underneath was seen!"

MONTHLY NOTICES OF THE ROYAL ASTRONOMICAL SOCIETY (8-132) — "Remarkable appearances during the total eclipse of the moon on 19 March, 1848). At the time of the predicted total eclipse that the moon shown with about three times the mean intensity of the eclipsed lunar disc . . . rather tinged with red and being as perfect with light as if there were not an eclipse at all."

POPULAR ASTRONOMY—Prof. Swift of Mattoon, Illinois, during an eclipse of the sun on August 7, 1869; objects moving in two directions across the moon and each moving in parallel lines.

ASTRONOMICAL REGISTER—23-205. Prof. Schafarik of Prague writes that on April 24, 1874, he saw an object of such peculiar size that "I do not know what to make of it" . . . slowly traversing the disc of the

How the Saucers Fly -----

To understand how the UFO is propelled one must discard the conventional conception of the atom composed of a central proton around which revolve electrons in the manner of the planets of the solar system.

Substitute the thought that Isaac Newton was right when he stated "space is absolute" and that all throughout the universe is an all pervading ether -- or fields -- or field situation. Then "something" in "some" manner is able to seize a bit of this space or ether and whirl it in the manner shown in the illustration of the vortex atom. The NUTRINO will be just one of the uncharged doughnut shapes whirling in the vortex motion. TWO will produce the fundamental form of the primary ether pump which assumes a charge and acts as the fundamental of the atom.

The NUTRINO is not affected by "gravity" or charge and can penetrate the most dense substances with ease. When a charge is added it responds to both the electrostatic and the electromagnetic fields. BUT the gravitational field does not have any effect at the atomic level. This would seem to indicate that when this little "ETHER PUMP" of a vortex atom is in action that the effect of gravity is negated by the difference of "ether pressure" at the two sides of the whirling vortex.

The TRENT UFO (see diagram) is considered by the author to be one of the most significant UFO pictures in existence. Farmer TRENT on the Oregon coast snapped two UFO pictures in 1950. The pictures are some of the best saucer photographs ever taken and are genuine, beyond a doubt. The author has seen the remainder

of the roll of film taken at a family picnic near McMinnville, Oregon. They are just ordinary family pictures such as anyone would snap on such an outing. Trent looked up and saw the UFO about two hundred feet away and snapped the picture which the artist used in the drawing. The photo appeared in LIFE magazine, but the U.S. Air Force or some other agency would not return the negative. Trent's photo cannot seem to be satisfactorily copied as there seems to be a slight difference in density between the UFO and its surroundings. But the author feels that this is due to the radiations which would be coming from such a highly charged body. After about 20 seconds, the very material UFO zipped off at high speed.

A close examination of the UFO photo shows that there are two rolls around the side which contain the acceleration chambers. These are also shown in the diagram under the VORTEX ATOM. The particles in the chambers are accelerated at a very high speed (even beyond the speed of light) and the UFO may dematerialize to ordinary vision, BUT appears at night as a very bright light of various colors, as the speed of the particles in the chamber is increased with an increase in acceleration. The lighted or glowing hull thus is seen to move through the visible spectrum from the red through the violet range and then to "disappear" from sight. In daylight, the UFO appears, disappears, and reappears as a silvery object.

BUT the fundamental "secret" of the saucers, electrical space flight and the UFO is the ETHER PUMP conception

which does away with the conventional atom and substitutes a SPACE VORTEX atom which is in itself an ETHER PUMP.

The construction of the earth space vehicle then rests on the engineering problem of a power source for the maintenance of the particle (and wave) stream in the acceleration chambers of the space travel pod.

For those who would be interested in the understanding of the complete ETHER VORTEX conception of the universe's building blocks, the KRAFFT ETHER VORTEX THEORY explains this idea of the fundamentals of the cosmos.

Western science and USSR projects are vying with each other in building various plasma accelerations. The U. S. Atomic Energy commission and the Princeton SHERWOOD Project plus the British at Harwell are examples of attempts to produce some kind of thermal hydrogen reaction.

The BRITISH Z E T A (Zero Energy Thermonuclear Assembly) is trying to generate some fantastic heats by "pulsing" a stream of neutrons (particles) and leaving it to the magnetic "pinch effect" to squeeze this particle stream into a heat pulse of some 5 million C°. There is some element of success attached to these projects.

The ZETA "doughnut" is also diagramed for comparison and when the three fundamental theories from the NUTRINO doughnut to the UFO photograph showing acceleration chambers to the British ZETA, it can be seen that we are mighty close to the most fantastic "BREAKTHROUGH" of all recorded time -- true and pure electrical space flight, un-

*Ed. Note: The "hum" of a UFO as reported can well be the pulsing of the particles in the acceleration chamber at an audio frequency as the UFO hovers.

fettered by tankcars full of fuel in the crude rocket projects on which we now spend so much money, with so many failures.

If the ZETA were to be unchained and mounted in the manner of an ether pump we would hazard the speculation that it would be pretty hard to tie the laboratory down. Weight would not particularly be a problem, since the ether differential would cause this force field to work with the space machine and not hold it down.

SECONDLY...the problem is to provide power for our projected UFO-type-spacecraft. The drain on the conventional power system to provide a pulse current of 200,000 amperes is quite a jolt.

The "secret" of this is to use a resonated feedback system to use part of the pinch stream of neutrons to feed-back and through resonance, lift the space-craft mostly by its own bootstraps. The reaction can be started by just a bit of radioactive material and through resonance, the velocity of the particles in the acceleration chambers built up to the point of the speed of light or to whatever speed pure radiation is obtained.

THUS the claim of the unit on conventional power could be eliminated. In the ZETA project and in the other projects the blasts of power fed into the machines are most wasteful. The next SECRET of the ZETA and SHERWOOD Project scientists to "discover" will be how to sustain their reactions through this type of resonance design. They can then lighten their equipment and through use of resonance multiplication of energy fed back into the circuit they can sustain the reaction.

RESONANCE... it must be remembered... is used already

in radio engineering and is in reality the pulling of this energy from the space, or ether, of the universe. The great I^2R power fed into these great atom smashers is NOT the power used to achieve results, at all. The phenomenon used is the vertical vector of I^2R known as the imaginary number (Operator J). It is interesting to note that in the Einstein equation the imaginary number $(-1)^2$ (square root of a minus one) is used for "time". This little mathematical trick is used to convert multi-dimensional mathematics to the conventional level.

BUT the phenomenon of resonance, once it is understood by Western researchers, will do away with the inefficient use of great coils of magnetic wires to get effects that at the moment the gopers at Harwell and Princeton cannot even explain by any conventional theory.

Let's just examine for a nonce whether our statements are too hard on the billion-dollar projects. TIME says: "The most impressive U.S. thermonuclear work was done at the Los Alamos scientific laboratory with a machine called a PERHAPSatron (perhaps we may get something for the next billion?) Its doughnut is made of glass surrounded by copper as big as a scooter tire, with its minor diameter about 2 inches, compared to ZETA's 39 inches. The temperature of its pinch is greater than ZETA's (about 6,000,000°C) BUT THE PINCH LASTS ONLY A FEW MILLIONTHS OF A SECOND, about one thousandth as long as ZETA's. Other thermonuclear machines at Los Alamos use short, straight tubes through which heavy currents are forced to flow and to pinch particles. All machines give off abundant neutrons.

The big question is whether these neutrons really come

from the fusion of deuterium into Helium 3. Powerful electrical discharges give "false neutrons" (Nutrinos?-- Ed.) formed in other less important ways, but Sir J. Cockcroft is convinced at least 90 percent that some of ZETA's neutrons come from their project's goal of thermonuclear reaction. Dr. Thoneman of Harwell does not want to commit himself. U.S. scientists are not sure either. Sir John Cockcroft says the trail may take ten or fifty years.

That's what the best rational thinkers have to say about the wave-particle paradox. It is our suggestion that a little more original thought be done along the lines of the ETHER PUMP theory of matter and a change of fundamentals to really understand what goes on in these great force field machines. After all, someone already has some UFO's in our atmosphere, so Harwell and Princeton are not the last word in the cosmos.

It is certain that the present dogmatism is going to cost the public nothing but more billions. Correct use of resonance and realistic understanding of matter's fundamentals can put these projects on the track of real space-flight and unlimited energy.

SHELL MATERIEL --- is of course the other part of the "secret" of pure electrical flight. In about 1926 a study was carried on in a small Ohio university's physics department. It showed that a charged condenser tended to move to the positively charged plate. This has been known for some time and is the second "proof" that in the electrical fields of the universe a highly charged body can indeed lift itself "by its own bootstraps". With the two doughnut-shaped acce-

TRENT UFO...artist sketch from actual photograph.... this is one of the most significant UFO photographs in existence as it shows the two circular acceleration chambers which are used to obtain the "ETHER PUMP" type of gravitic device which is so necessary to true electrical flight rather than the reaction motor of the rocketeers.

leration chamber construction and the correct outer shell material, it can be seen how a UFO is ready for space flight. The ZETA type acceleration chamber (2) with the correct shell material is ready for this type of flight. However, the principle of resonance must be used to cut the prohibitive power consumption of this Harwell design.

GRAVITY... seems to be just a special case of proton attraction and not the fundamental field that Einstein assumed. A whirling body will cause the ETHER SINK FIELD of its outer surface to have a difference of ether (or spatial) pressure. This is

demonstrated by the erratic and, to date, unexplainable deflections of the Sputnik orbit. Close to the earth the Sputnik keeps hitting the slight difference in pressure which causes the slight gravitational deflections and orbital variations detected and heretofore unexplained.

Western science already knows the fundamentals of space flight by electrical means, but the interpretation of the fundamentals is so steeped in out-of-date dogma that the world will have to turn many more times before the space projects are back on the right track.

BUT (not being dogmatic) This is how saucers fly .

Box 687
Annandale, Va.

VORTEX THEORY
price \$2.00

More Ether Vortex atoms showing how more complicated proton groups are built to form more complicated structures.

The fundamental vortex concept overcomes many many errors in concept in the conventional atomic theory which undermines our whole structure in physical science---but the dogmatists go stubbornly on.

Figure 1.

The neutron and the hydrogen atom--two electrically neutral particles of mass 1, but with entirely different properties and incapable of being converted into each other. If any explanation for this were possible under the nuclear theory, then it would have been found long ago. As the diagrams clearly show, the vortex theory has the explanation ready.

In the days of hydrogen bombs, can we afford to be disinterested in the structure of the neutron?

Atoms with periferal hydrogen groups which provide valence bonds. The chemical valence of an element is not always equal to the number of hydrogen groups because valence bonds may be branched or may be joined to other bonds in the same atom. Each hydrogen group adds 1 to the atomic number.

Since these atoms have an abundance of hydrogen groups by which they can become anchored to one another, they will resist fusion up to relatively high temperatures.

Unlike the inert gases, these atoms liberate free electrons and will therefore be conductors of electricity.

"CHAMBERS"

BRITAIN'S ZETA

A New Vista of the Entirety

w. gordon allen

In December 1956 the BELL AIRCRAFT Co. published their bulletin #98-001. Its title was ORGANIZATIONS AND VISTAS OF THE ENTIRETY.

Dr. I Browning drew the final table of his conception of the ENTIRETY as shown in fig.6.

BELL AIRCRAFT is a large defense contractor and manufacturer of airframes who would like to propel one of these airframes at least to the moon and in that way insure its future in the "spaceframe" manufacturing business.

The offering of the SYSTASIS (study figure 6 closely) at first inspection seems to be a very fine compilation of the fields of organized learning and the progression of the universe as our Western Science believes it to exist as of this mid-20th century.

Western man brags that he is on the edge of the "space age" even though he is already on a space vehicle--the earth. Another direction that scientific dogma has taken is that our poor knowledge of science has cataloged a few facts but as shown in the "Heisenberg principle" of UNCERTAINTY we are having to admit that "facts" are never consistently taken to a conclusion and finalized. It indicates that scientific facts themselves are certainly NOT a "stable table" to operate our certainty of reality from.

An examination of the output of the BELL Research department which we quote should then be examined in this light.

It is our purpose to point out that Dr. Browning has done very well in his tabulation of the fields of learning that we have recognized in our highly departmentalized universities. These are the fields of knowledge that doctorates are given in and which are our Western scientific specialties.

But the U.S. finds that though we have the tens of thousands of specialists we do not have the necessary all-encompassing minds capable of administering these specialists. It has become a case of the blind leading the blind ---as each specialty views its limited conception of the entirety thru its own narrow slit.

The university training of the rational mind has bogged down because it seems not to yet comprehend just what the human mind itself is---and just exactly how it functions. The highly specialized mind pumped full of "facts" that are not facts--but UNCERTAINTIES-- is just a memory machine

NOT a THINKING MIND!

Particular issue is taken with the right side of the BELL diagram that is fig.6....which tabulates from:

MOLECULE

to SIMPLE MACHINE

to COMPLEX MACHINE

to AUTOMATIC MACHINE

to CONTROL MACHINE

This is where the effort of the BELL offering seems to fall short in its attempted portrayal of the ENTIRETY--THE UNIVERSE!

THE MACHINE---control machines, memory machine (human or electronic) or whatever certainly seem out of place in any fundamental scheme of the universe. Man-made machines have no more place in the fundamental cosmos than do insect machines (trap door of a spider) or animal machine etc.

THE MIND -- should certainly be substituted in this fundamental and primary conceptive effort, we believe. It is the BRAIN that is the many-

leveled mind receiver. NOT only the human brain, but also the brain of the higher animals. Human brains have abilities that some animals do not and vice-versa. The many-leveled mind may be capable of fantastic development as a receiver of truth.

WE OFFER....in this scheme a different progression than does BELL.

A MENTAL ENTIRETY (probably in its own force field)

SINGLE NERVE CELL

to INSTINCT CONTROLLED GANGLIA

to RATIONAL SCIENTIFIC MIND

to COSMIC MIND (receiver of fundamental truths)

This obviously leaves room for progression to higher mental understandings which now lie dormant in the man-animal brain.

We must continually remember that it is our bodily chemical factory that provides the electrical energy that runs our nerve cells and the "LIVING RECEIVER" that is our animal-brain. It could well be that a so-called thinking entity could exist in the cosmos under ANY condition that could supply this electrical energy and not necessarily need a "body" to supply its "mind" with chemically generated electrical energy.

So, let's eliminate machines completely from any concept of the ENTIRETY. The mind-receiver of the fundamental truths of the correct conceptions of the cosmos is certainly then to be substituted for MACHINES in any conception of the ENTIRETY.... if one doesn't work for a company that is in the machine manufacturing business.

FURTHER ..another important portion of the concept omitted by BELL is the truth of constant movement. EVERYTHING in the universe is moving. BELL uses the "link" of the molecule in the central portion of Fig.6. This perhaps should be the NEURINO (simplified to NUTRINO) the whirling doughnut shaped vortex of pure spacial electricity which composes every material existence that we know. THE NUTRINO is the elemental building block of the cosmos. All of our highly classified "pinched plasma" research will one day show this and many of the "mysteries" of the sub-atom will then be solved. We'll find that at that time we'll achieve the "breakthru" that will enable space ships to drive up to and beyond the speed of light.

(Explained in How the Saucers Fly). Now it must be noted that each neutrino particle (as built from the neutrino vortex fundamental proton) must exist in a continuum of fields. Einstein tried to have a fundamental three field continuum of electromagnetic, electrostatic and gravitic (gravity). His error was in the assumption that "gravity" was a fundamental field. He made a further error when he restricted his "Unified Field" theory to three---what of the LIFE forces that exist---and the MENTAL ACTIVITIES that exist? Even in the cold world of science it must be apparent that there are biological entities with brainboxes inhabiting the planet. Or would the scientists of the West ignore their own existence to promote their own narrowness?

GALLILEO was most observant when he said..." man is poorly equipped by his senses to guess the secrets of the universe".

WHAT OF LIFE FORCE? ...If our Western scientific "facts" are correct then intelligent life does not exist---i.e. such as the machines of BELL.

THE ODIC field as promulgated by Reichenback and others is most fundamental as well as an INTELLIGENCE or "I" field. Simplified--- here's the conception:

Illustrating bonding of the different states of matter from radiation thru the states of fundamental hydrogen protons thru to spacial galaxis

POSITIVE INFINITY
 region of field collapse or renewal by a method yet unknown

(fundamental of ALL material existence)
 "I" FIELD may well be universally fundamental and would then permeate the ENTIRETY to make the 'whole' a FOUR FIELD CONTINUUM under constant movement thru an "N" number of dimensions and states of reality from waves thru to universes.

Physicist Believes Universe Probably Has Doughnut Shape

Our universe is most likely shaped like a doughnut reports Dr. Winston H. Bostick of the Steven's Inst. of Technology at Hoboken, N.J.... "and quite possibly there are at least several universes rather than just the one in which we live....."

The doughnut shape could be expected because of the way hydrogen gas behaves. All the billions of stars in the universe make up only about one thousandth (or less) of the total material. The rest is the fundamental of the universe -- the hydrogen atom (gas). All of this gas is charged (ions) thru the far reaches of interstellar space.

Such gas seems to have an uncanny knack for generating its own magnetic fields and under this influence we have the doughnut or ring shape, Dr. B continues.

Dr. Bostick has proven this in his own laboratory by build in galaxies in a test tube ... these photograph and look to the eye just the same as do the photographs of galaxies in outer space taken thru our largest telescopes. Some of the shapes took the form of spiral galaxies like our own milky way when the hydrogen ions in the laboratory were exposed to a magnetic field and properly charged. Galaxies are familie of billions of stars. A doughnut shaped universe might well have a companion or twin, he said, one universe could have a right-handed spin and another opposite spin to balance this out.

One theory is that the universe is being continually created with new basic atomic material being created out of energy (radiation into the fundamental hydrogen proton) and by this process there could be several universes.

We humans are ourselves literally made of stardust, he continues, and are kind of a cosmic collectors item. The sun is much over 90% hydrogen but our bodies contain other trace minerals...but all of these minerals are of course made by various combinations of the hydrogen fundamental. (See the Kraff ETHOR VORTEX explanation)

The editor believes that Dr. Bostick is as close to a really new fundamental physical conception as is any Dr. of physics in the world. The doughnut shape of the universe is also the shape of the fundamental building unit of the universe the NUTRINO. Also, Dr. Bostick, is bordering close upon the possibility of other universes at differing energy levels interlacing each other. Our poor senses are not yet able to conceive of the infinite possibilities and realities of the oosmos but at least as our human mind evolves we can build our conceptions. Dr. B's test tube galaxies are formed under the right magnetic field conditions and with the glow of an electrostatic charge. Two of the same fundamental field conditions exist right to the end of the universe--and the beginning. See also (A NEW VISTA OF THE ENTIRETY)30.....

Meade Layne's ROUND ROBIN and CLIPS AND QUOTES tell a great deal about the possibility of other energy level situations that should not be ignored by any serious investigator.

We recommend his work very highly.....ed.

De La Warr's "THOUGHT RESONATOR"a clue to a new force field?

De La Warr is a graduate civil engineer but since 1942 he has with his wife , been developing the "Odic" or "life-force" field evidences mentioned by Reichenbach thru research in his laboratory at Oxford, England .

De La Warr follows a long line of those who felt that the theory of mitogenic radiation (Columbia U.) (Abrams, Dr. Ruth Drown and others) was a fundamental force field of the cosmos. The theory stated simply is that each living cell vibrates just a tiny radio transmitter---but only on one frequency at a time--but thru the whole electromagnetic spectrum. Also, the intensity of the radiation reveals the state of health of the cell!

The whole human and animal nervous system is just activated by the chemical battery of the body and the blood is the carrier of the vital chemical energy. The TWO HUNDRED QUINTILLION cells in the body are like little units of a giant battery which emit frequencies that are detectable and which indicate the strength (health) of the cell thru the intensity of its radiation. Under this principle the health of the blood then, is MOST VITAL.

In the view of De La Warr the whole cosmos is knit together by a UNIVERSAL PLEXUS OF COSMIC RAYS (force field) and all forms of material from solid rock to the rarest gas is just varying degrees of denseness of this matter. Or, as Einstein has said "something material is just "frozen matter". De La Warr first found that sonic vibrations and magnetic orientation made startling differences in the rate of growth of plants. He reasoned ("like Tesla) that in the correct magnetic field

orientation and with the correct (resonant) frequency he could stimulate the life processes of plants. He then tried to transfer his theory to the more complicated animal world. Finally, of course, to the area of the human mind.

Could actual thought photographs be made? Could disease be diagnosed by tuning into the resonant frequencies emitted by the radiating cells of the diseased organ? IT COULD!

By the use of a sensitive operator, a blood or spfium specimen correctly oriented in a magnetic field, resonant cavity (tuned by a series of tuning stubs) the laboratory was able to tune to a specific disease frequency. This was done by tabulating over 4,000 rates of radiations of bacteria from the pure cultures supplied the laboratory by a friendly bacteriologist.

The machine was then tested in various hospitals and the diagnosis checked and time after time the De La Warr machine came thru with the confirmed correct diagnosis.

Actual "thought resonance" was obtained and excellent photographs were made. (See foto of diseased tibial artery) This brought about the fantastic principle that to THINK of an object is to tune to that object. In the person's mind! This is the resonance that is necessary. These diagnoses were made from samples submitted from all over the world.

Distance is no barrier to thought! It is not the purpose of the SPACE-CRAFT DIGEST to go into the science of Radionics, but rather, it is our purpose just to point out that such a science is in its amazing infancy and that we use it to provide support to our contention in the presentation of our NEW VISTA OF THE ENTIRETY of the existance of another field of force and that this is the "O" field of the cosmos. There is doubtless an "I" (intelligence) field also which operates at extremely high frequencies.

One of the buildings of the De La Warr Laboratory--Oxford, England

THOUGHT PHOTO from the De La Warr Laboratory at Oxford, England

GEORGE De La WARR

(above) "THOUGHT PHOTOGRAPH" of a diseased tibial artery taken in a typical diagnosis of a development of a disease thru resonance with operator's mind (plus the cavity resonator tuning) with the blood specimen of the patient. The white (intense area) is the evidence of the strong radiation of the disease bacteria radiating at their characteristic frequency. The tuning stubs of the De La Warr resonator are set for this specific frequency and then by resonance by the operator's mind to the 'thought' of the tibial artery this picture is obtained.

MIND AND MATTER is the quarterly journal which provides some of the funds for this amazing research and SPACE-CRAFT DIGEST recommends a subscription to members of the Lemurian Society. The Fee is \$4.50 per year and the address is De La Warr Laboratories, Raleigh Park Road., Oxford, England.

The combination of the 'O' field and the 'I' field along with the more widely used electrostatic and electromagnetic seem to be also a necessity for the understanding of the UFO. The suspension of "gravity" ...thought control.... the level (or multi levels) of the possible existence of life and the materiality of the cosmos are all important...for the UFO touches all fields of human knowledge.

Karmology - movement thru
by W.W.Wood TIME!
Tacoma, Wash.

The secrets of the Pineal have long fascinated students and its control of mental functions is most revealing.

Great doctors of the past and even today have tried to isolate the secretion of this gland. The animal glands used were from dead animals. It follows that an extract from a source like this could not really be a true reflection of the "magic" of this action on the human mental processes. The effect of a DEAD extract on a living brain may by its very lifeless nature preclude any real stimulation of the human mind. According to Carey P. Mc Cord, M.D. the author of Endocrinology and Metabolism about 3200 dead sheep are needed to get about 2 oz. of the Pineal extract. Many experimenters have used a similar product and the results are contradictory. The only stable conclusion seems to be that the extract stimulates genital growth of males more than that of females.

But, it has been postulated that the brain may not be the seat of thinking but may just be a "receiver" thru which certain mental processes are initiated. The yogi's "third eye" is thought to be the pineal. It may well be then that the thinking process is conducted in the aura or ODIC force field surrounding the body. Thought is brought in thru pyramid cells located in an area just below the gray matter in the brain which are able to detect "thought" and that an essential in this process is copper and other trace element oxides. These along with the pineal secretions (not existant in dead animals) REACT TO TUNE sections of the brain in these pyramid cells so that under NORMAL conditioning thinking processes are limited to rational levels.

BUT--what of the known ability of human perceptions to operate on other psychic and intuitive levels?

If and when the pineal gland is caused to reduce the controlling material by a condition of only slight pressure on the outside of the head at two nerve points, one directly over the olfactory bulb and the other at the central area of the "H" suture, a reaction results that causes this Pineal control to be lessened to a degree that the NORMAL LEVEL OF CONSCIOUSNESS IS BROADENED to encompass the realm of the subconscious!!! More than a hundred cases of this condition have been observed or controlled by the writer while under the tutelage of Dr. Strath-Gordon and since his death.

The procedure for this observation of the action of the Pineal in a "live" human body was brought to this country after long years of study under the training of JAYNE practitioners in India. Dr. Strath Gordon graduated from one of Europe's best known medical schools (Edinburgh) before he studied for some six years in the esoteric schools of the East.

Thru this method of Pineal control, many people experienced memory from the "other" conscious realms of the mind while still in the conscious state. This is called in the East the study of KARMOSIS. The person remembers not only his present rational life, but also incidents that have been known to have happened in former lives. Languages formerly spoken are recalled. Under the practice of KARMOSIS the person lives in both the present and the "other" period. The most amazing characteristic of KARMOSIS is that the person may also go into the future and predict future events that have their pre-conditions known to the person under treatment!

The Principle of Uncertainty

(or) Is "Reality" an Illusion?

The Jan. 1958 Edition of the SCIENTIFIC AMERICAN contains an article which we should like to digest (with comment) which has profound relation to the subject of reality and the UFO.

Materialists and Metaphysicists have long debated the subject of a conception' of reality. The question of whether UFO's are 'fireballs' or saucers seemingly under intelligent control is a problem in "reality". Are these "real" or just vapor clouds with a very high electrical charge? May they just be ignored as "unreal" phenomena? The military seems to seek the latter refuge every time UFO's are sighted. It is not too important WHY such a refuge is sought by minds in responsible positions. Never-the-less such a haven is used each time they cannot explain fundamental "truths" of the universe. Yet, as these minds spend billions of dollars of tax money immediately the question is raised as to their competency to spend this money.

Following is a digest of the problem if REALITY and the PRINCIPLE of UNCERTAINTY as seen by George Gamow:

It may seem a paradox (he says) that one of the cornerstones of modern physics is something called the PRINCIPLE OF UNCERTAINTY. The idea of indeterminacy as a RULE of science does certainly disturb many 20th century philosophers. But the uncertainty principle has proved a powerful answer so far, the most fruitful--to important questions in present day physics.

At the break of the 20th Century a fundamental revolution occurred in physics. (just as it has done recently in the middle of the century with the re-discovery of the UFO phenomena--ed.) Men, at that time, suddenly discovered that of the classical laws, one, (Newton's compilations) of mechanics and energy did not work very well, either for the atom or the universe. Einstein took another look at the cosmos, time, and 'motion'---while the explorers of the atom produced the quantum theory. These new ideas (in the early 1900's) were so strange that they contradicted common sense!

Just as the earlier notion that the earth was round was against common sense, because any one could plainly SEE it was FLAT!

In the atomic realm, two discoveries especially confounded common sense and common experience. One was the behavior of light. As the result of the work of Max Planck, Einstein, and others it was developed that light seemed to be made up of packets of pure energy--PHOTONS. The energy of these photons varied with the frequency (proportional to wavelength) and is equal to the frequency (ν) times Planck's constant (h) giving the energy contained in a "photon" of light.

Matter emitted and absorbed light only in certain definite quanta (PHOTONS) and because even dim light contained billions of photons we cannot well detect these packets of "graininess". BUT Einstein and Compton did a fine job with their contributions.... "COMPTON EFFECT" was one such (the change in frequency of X-rays when they lose energy in collisions with electrons).

This was awkward, for these researchers had just illustrated that light behaved BOTH as waves and as material particles!

This was not supposed to be, for particles can be measured with a three dimensional ruler of length, width, and depth while "waves of energy" are not three dimensional in nature--not REAL by the materialist standard. The tough mental problem was to accept that here was a phenomena in the universe that behaved both in a real and unreal manner--both as a beam of radiation and as a material particle! Waves to particles to waves...

So, with continued argument and more research the distinction between waves and particles had all but vanished. Light waves behaved in the manner of the "real" and material...or like unreal "waves---common sense reeled.

In the good old classical physics such a paradox could not exist. It was Heisenberg and his principle of UNCERTAINTY who laid down the idea that FACTS ARE NEVER STABLE.

Now, we leave our paraphrase of the SCIENTIFIC AMERICAN and proceed with our own comments as "ye ed."

"....it seems that when driven into a corner the materialists who are mere statisticians had to come up with some "principle" which would explain the phenomena that appeared and disappeared (dematerialized) into light and then back again into "real" particles. A great physicist gave a name to this bastard child, but did he solve the problem?

It is interesting to observe that the Hindus might be more correct than mistaken when they say that "REALITY, as the human senses conceive it, may in itself be ONLY AN ILLUSION!

-----30-----

UFO AUTHORS---
Mc Coy ("The shall be Gathered Together") and George Hunt Williamson (Other Tongues Other Flesh) shown in Portland Oregon with Jim Ewart founder of the Portland UFO Research group tell of their visit to the lost cities of the high Andes.

Williamson and Mc Coy are currently back in this area of the plateau of the Wizzards and other 2 1/2 mile high areas. Williamson maintains that he has determined that these people must have built these cities well over 100,000 years ago. This would indicate that in the South American areas the colonists of Lemuria left a mark much older than science admits.

SPACE SHIP LANDING REPORT

WAS IT SAUCER?

Fireball Seen Over Longview

2 Hurt as Plane Dips to Dodge 'Object' in Air

AMARILLO, Tex., July 23. —(AP)—Two women were injured last night when a Trans-World air liner dipped suddenly in what its pilot said was an attempt to dodge an unidentified object.

Mrs. Mary Clark, 65, of North Adams, Mass., suffered head cuts and a bruised back. The hostess, Miss Dorothy Rekow, suffered a bruised hip and back injuries.

The pilot, identified as a Captain Schamel, said he dropped the four-engined craft about 500 feet when he sighted the running lights of "an approaching object" flying an approaching course.

Mystery Ship Over London

LONDON, Wednesday, Sept. 18. —An unidentified luminous object, shaped like a cigar and traveling at a high speed, was seen by north London residents early today, the Air Ministry said.

A Ministry official said callers reported the object blue-green, cigar-shaped and traveling very fast.

SPEED OF LIGHT

Professor Cyril Stanukovich, the Russian satellite expert, said their scientists are now working on "photon rockets" which will develop super-cosmic speeds approximating the speed of light.

ASTRONOMERS SEE PINK UFO

The London Times, of November 7, reported that hundreds of people in Bathurst, near Sydney, Australia, saw a metallic object over the town on the previous day. Police, press and radio were deluged, the Times reported, with reports of a flying saucer. Two R.A.A.F. Sabre jets circled over Bathurst for an hour without seeing anything. Finally Sydney Observatory stated that it was usual for Venus to be visible during daylight at that time of the year.

However, on the same day, four astronomers at the Commonwealth Observatory at Mt. Stromlo, near Canberra, Australia, on "Sputnik watch" reported a strange object moving across the sky, which was neither a meteorite nor one of the Soviet space satellites! The object was a vivid pink and unlike anything seen before, it was stated. It remained in view for about two minutes, and disappeared under the moon.

"The strange thing is that it should disappear after passing under the moon as it was a perfectly cloudless sky," said Dr. Przybylski, who saw the object just after having completed observations of the passage of the two Russian satellites!

CIGAR-SHAPED OBJECT OVER JAPAN

This photograph was taken by Mr. Shinichi Takeda, of Fujisawa City, Japan, near Enoshima Miami Beach, at 11:28 a.m. on August 20, 1957. His sister saw the object first and indicated it to him. It was silvery in colour and gave off a brilliant glow. The space-ship was flying at about 4,000 ft. in a southerly direction. When it was directly overhead the cigar made a 90° left turn and increased its speed. Subsequently, 15 bathers at Enoshima Miami Beach spotted a similar object passing over them at high speed. There was no sound heard with either sighting. (Photo: courtesy Mr. Yunsuke Matsumura.)

Did Christ Visit India?

By B. J. BHANDARI

(From Blitz Newsmagazine, Bombay, India—August 31, 1957 issue)

The Place of the Esoteric Schools and Groups

Most highly trained rational scientific minds of the Western world seem to have a mental block whenever other less tangible fields of perception are mentioned.

When metaphysics, occultism and for many years even hypnotism were mentioned these "mentalities" would eye the ceiling and refuse to admit reality on these other mental levels.

What is the place of the little-known esoteric schools of the world in the understand of the secrets of the cosmos? Were (and is) there various schools of knowledge that the Western society builders did not wish to admit the existence of?

Without doubt, there is in this very digest, resumé of this very type of learning in our various concepts. Much of this learning has been, we are certain handed down thru these various little-known schools and groups every since the time of the mother-land of MU's existence some two hundred and fifty thousand years ago.

Many of the "discoveries" so laboriously "proven" by the expenditures today of the billions of taxpayers dollars have been available thru this type of thinking for thousands of years.

Dr. Strass-Gordon (who you will hear much more of in later issues) was a pupil in modern days of one such group so was Ouspenski and about 2,000 years ago so was Jesus Christ. Here is an interesting account of Christ that is not told about in the Christian bible.

Mr. Nicolas Notovitch in his book THE UNKNOWN LIFE OF JESUS CHRIST....has brought out certain facts that compel attention. He says that when Jesus attained the age of 13 he left his father's house, went out of Jerusalem and, in company with some merchants stayed in India visiting many important places of learning in Nepal and India.

In the course of travels in the Himalayan regions the author (1877) learned from the head of a Lamasary that there did exist some very old writings of the history of Ladakh Monastery dealing with the visits of Jesus to their group some 1850 years before. Other monastic groups also had copies of the visits of Christ and the copy at the monastery of Himis. They were in the Pali language and certain Lamas were able to make translations. The versions, Mr. Notovitch explains, were written three or four years after the death of the Christ from the testimony of eye witnesses and is more likely to bear the stamp of truth than the narratives of evangelists who wrote at diverse epochs and so long a time after these real events took place.

Without preliminary details or explanation the manuscript begins by announcing that in the year of the very death of Jesus Christ a few merchants who had returned from Judea brought back the information that a just man named Issa in Israel, after having been twice acquitted by his judges, was finally put to death by the Roman gov., Pilate who felt that Jesus would take

advantage of his popularity to re-establish the kingdom of Israel.

Jesus began in India by frequenting the temples of the JAINS (or Jaynes) who were amazed at the wonderful and brilliant intellect and asked Jesus to remain with them. But he left them to settle at Puri which was a great spiritual center. Puri then had a great Sanskrit library. Jesus spent some six years there and at Rajgir, Benaries and other holy cities. He delved deeply into medicine, mathematics philosophy and religion..... Jesus found much to condemn in the Brahman laws and customs and even entered into public debates with them. Among the things that Jesus much condemned was the humiliation of the laborer (caste) and Jesus preached to the Shudras reminding them that God was One according to their own laws, that all exists thru Him, that all are equal in HIS sight and that the Brahmins had obscured the great principle of monotheism in perverting the words of Brahma Himself and insisting to excess on the exterior ceremonies of the religion.

Seeing that the people were beginning to embrace the doctrines of Jesus Christ whom they had hoped to gain on their side and who was now their adversary the Brahmins resolved to assassinate him. But being warned in time by his devoted servants he left Puri and took refuge in the mts. of Nepal.

There he spent six years among the Buddhists where he found the principle of monotheism in its purity. He then mastered the sacred writings of the Sutras. After being in India some 16 years Jesus be-thought himself of his native country. At this time he sent the following letter to his mother:

Beloved mother: Be not grieved, for all is well for father as with you. He has completed his present work here on earth, and has done so nobly. None in any walk of life can charge him with deceit, dishonesty, nor wrong intention.

In his period of life here he has completed many great tasks and is gone from our midst truly prepared to solve the problems that await him the future. Our God, the Father of all of us, is with him now as He was with him heretofore; but even now the Heavenly Hosts guard his footsteps and protect him on his way.

Therefore, why should you weep and suffer? Tears will not conquer your grief and your sorrow cannot be vanquished by any emotion of your heart or mind. Let your soul be busy in meditation and contact with him who is gone, and if thou art not idle, there will be no time for grief.

When grief throbs through the heart, and anguish causes you pain, permit yourself to rise to higher planes and indulge in the ministry of love. Your ministry has always been

that of love, and in the Brotherhood thou canst find many opportunities to answer the call of the world for more love.

Therefore, let the past remain the past. Rise above the cares of earthly things and give your life to those who still live with us here on earth. When your life is done, you will find it again in the morning sun, or even in the evening dew, as in the song of birds, the perfume of flowers, and the mystic lights of the stars at night.

For it will not be long before your problems and toils here on earth will be solved also, and when all is counted and arranged, you will be ready for greater fields of effort and prepared to solve the greater problems of the soul.

Try, then, to be content until I come to you soon and bring to you richer gifts than any that you have ever seen, and greater than the made of gold or precious stones. I am sure that my brothers will care for you and supply your needs, and I am always with you in mind and spirit. Your son, Joseph.

Strong Case for Investigation

The editor of the SPACE - CRAFT DIGEST believes that all cases of the "cosmic mind" should be investigated in the light of the possible existence of a universal "I" field existing as a fundamental force of the cosmos. The narrow tree limb of the learning of the Western peoples is not adequate to explain the wonders of the Universe. The dogmatists in science and religion have for ages concealed this knowledge to keep their little domains which they consider threatened just as did Pilate and those who drove Jesus from their midst. The different church groups seem to have done their share in the prostitution of learning.

Man - - - On His Blindness

The inability of the senses of man to detect the many actualities of the cosmos is most confusing. For how can man make instruments to extend his senses unless he is aware of what he wants his instruments to detect?

If one were to have operated a radio transmitter a hundred years ago ... no scientist of that period could have built a receiving set because he did not know that an instrument could be made to detect messages from the "air".

TODAY ... we are in the same position when we talk about the higher energy levels of the universe. Man is still "blind".

THE EYE ... detects just a very narrow sliver of the "so called" electromagnetic spectrum. The red, orange, yellow, green, blue, indigo and violet. Let us imagine that the ability of the eye to detect the light spectrum were to be narrowed to just the red portion of the spectrum. His would then be only a RED universe in the daytime and an even blacker night. An even more narrow slit of the actuality of the spectrum...the light spectrum being just a small slit of the whole electromagnetic, of course.

THIS ILLUSTRATES how close to being blind man now is, even though on a bright sunny day he thinks he sees ALL of the magnificence of creation.

FIELDS beyond the electromagnetic exist. Man at the moment gropes for these great fields of force which are fundamental in the universe.

These are the fields of the many-leveled mind !

The ancients of Lemuria had an "eye" called the Third-Eye which could detect this field of the cosmos. Since the time of the catastrophe that destroyed the motherland of MU, man has lost his "third eye", just as he would have lost the sight of his "light" eyes if he had not used them through the hundreds of generations since MU.

THE MIND EYE (the pineal) is more developed in some parts of the world's inhabitants than it is in the "blind" Western Man.

WE WHO cannot understand this must nevertheless not deride those who have the ability which we lack. For just as our eyes detect the electromagnetic field of force, so the mind's "eye" operates in the area of another great force field of the cosmos where today we are only groping at the edges.

There have been men who have conversed with Lemurians and left notes of their conversations. They have moved thru the "curtain" by means of the MIND'S EYE which can penetrate to intercept the radiations of this higher level of universal radiation -- -- The UNIVERSAL MIND. These writings shall be made available to members of the PACIFIC LEMURIAN SOCIETY as they become ready for publication.

BUT, today, the great frontier seems to be the area of the understanding of the many-leveled mind. This is the frontier that Lemurians had solved nearly two hundred thousand years ago. Strangely enough, they also had solved the problem of pure electrical space flight using the natural forces of the cosmos.. using their own multi-leveled minds.

Emerald Tablets of Hermes Trismegistus

have left us "AS ABOVE-- SO BELOW".... the simple four-word formula that is the "Secret of the UFO"... all of the laws of the cosmos can be found in an atom (and its formation and behavior) or in any other phenomena that exists as some thing created or completed according to certain natural laws. These are the fundamental laws of the universe and the metaphysical laws of triads and octaves penetrate everything.

It is certainly amazing to find one of the fundamental esoteric laws explaining the way that one can better understand the UFO---or is it?

Study the space-vortex atom and you'll find that a vortex conception answers the reality of the atom. It follows that a ZETA-type atom-plasma accelerator (with modifications) works particles into heat pulses in pure wave form (this is pure energy form) and is accomplished due to the constriction effect of a great magnetic field concentration. The acceleration is done by tremendous voltage differentials. TWO Zeta machines can result in an ETHER or SPACE-PUMP to give a required gravity differential. Then, the power problem is licked by the use of resonance and we have the UFO-type space vehicle that can travel at unlimited speeds. For the faster it travels it begins to resemble the pure energy of space itself (electrically) As the UNITY of the space fields and electricity is now beginning to be understood it follows that free conversion of the "frozen matter" of the material into pure radiation energy becomes the "secret" of space travel.

BUT--in the so-called plasma concept which has been contracted to ROCKET*DYN the expelled plasma is going to be used as a THRUST FUEL reaction motor which is still an im-

practical rocket.

Again we must emphasize that reaction motors are crude. The SPACE VORTEX THEORY forces upon us the ETHER PUMP concept which provides a gravity shield that reaction vehicles never will provide. As man is subject to gravity he will not become a successful space animal.

MAN, to travel in space, must therefore be an integral electrical part of his machine. No reaction-type craft can accomplish this for he will always be the "load".

To make the space-craft a complete planetoid is the objective. To do this it must be independent or shielded from the force fields of the objects in the cosmos. Upon landing man must then adjust electrically to his destination.

-----30-----

DR. I.M.LEVITT director of the Fels Planetarium mentions how valuable a space-platform with an astrophysical setup would be. He says such an observatory could learn more in one week than all of the observations made thru the atmosphere of the earth to date. He emphasizes that a new distribution pattern of the white dwarf stars (incredibly dense some millions of times as heavy per cubic inch as lead) might show them to be much more numerous than hitherto suspected. This would make the universe much more material than hitherto postulated.

Dr. Levitt indicates that slowly but surely the dogmatists are taking a licking and we are having to revise our theories of the cosmos almost by the day. When we get rid of the dogmatic in our Universities we will be on the track to reality much faster for then the new minds will not be so cluttered with claptrap needed to get as degree as they are today.

"... the roads of the Incas were the most useful and stupendous works ever executed by man."

— ALEXANDER VON HUMBOLDT

HIGHWAY OF THE SUN

By Victor von Hagen
(Little-Brown) publishers

George Hunt Williamson author of OTHER TONGUES-OTHER FLESH told the editor of the SPACE-CRAFT DIGEST that in the Fall of 1958 he is to return from some of the areas of these ancient cities with some of the answers to this fascinating riddle.

He has traversed the plateau of the wizards on which there are carved in granite figures of giant animals such as elephants, cougars and camels which can ONLY BE SEEN FROM THE AIR! What people did this?

There are no camels and elephants in So. America! The chambers of rejuvenation of these ancient show that the angle of the early mornings sun's rays seem to be the secret of health and long life.

BELOW.... is a "compass rose" showing true North and which only can be seen from the air. It also carries the message of the "tree of life". These "secrets" of a people that lived up to a HUNDRED THOUSAND years ago give us a new conception of the time-table of man in this hemisphere.

Man has been on this planet much longer than our school system admits. These "fables" that have been taught as truths have done our understanding of the path of man on the planet great harm. SPACE-CRAFT DIGEST and the PACIFIC LEMURIAN SOCIETY feels that when we know the real story of these peoples that built monuments and indicators to be seen by their own space-craft perhaps as long as a 1,000,000 years ago we will know more about the real story of man. these explorers have now found indications that these ancients may have been on the earth as intelligent inhabitants for much longer than just one to two hundred thousand years. WHAT HAPPENED? WE are not immune from that type of catastrophe. We must have the answer if we are to be ready for any contingency.

The Tres Cruces or Tree of Life at Paracas. Its direction is true north-south.

The amazing story of the re-discovery of the centuries old road system which extended throughout the fabulous Inca empire for 10,000 miles!

These descendants of the LEMURIANS built this fabulous system from sea level to 15,000 feet. Suspension bridges that rival any of the world today. Only a trace of this fantastic civilization remains today... what happened to this knowledge?

Finale -----20 March 1958

The year 1960 sees the approximate completion of a basic 7,000 year cosmic cycle. Whether one is a student of the esoteric or whether he is a hard-headed business tycoon who is a member of the FOUNDATION FOR THE STUDY OF CYCLES it is apparent that the early 1960's are a very critical period.

The cyclists state that in their study of wars for the last 2550 years that the early portion of the next decade is to be a time of extreme crisis.

The occultists have some of the following predictions from the publication PSYCHIC OBSERVER:

The master teacher Agasha is quoted:

1965 is painted as the target date for the start of the "Golden Age of Peace". The "other world" is definitely going to be brought nearer and its exploration will be further stimulated more completely by "strange things" observed in the skys...more lights, mysterious objects, and material falling from space.

TOKYO....Japanese scientists are now studying a metal object that "appeared" from outer space it is reliably reported by INS (March 13, 1958)

Agasha says further...." one great discovery, already suspected if not actually postulated by atomic physicists in the forefront of atomic research will be the 'ghost' of the atom...what Agasha calls the "anim" or the etheric counterpart of the atom! It is to the physical atom what the Astral body is to the physical body.

FATE MAGAZINE in its April issue has the following UFO reports:

LOUISIANA...near Natchitoches Hestel Rayford, 32, employee of the Rothchild Tank and Boiler Works of Shreveport .."came over the hill and saw this object shaped like a football about 15 feet long and 10 feet high in the middle of the road. I drove to within 100 feet of it and it emitted sharp bright rays of light. I felt the car get hot and immediately stopped. The car kept getting hotter and I got out and took cover in a ditch. In a matter of seconds the car burst into flames. The light rays came from the top of the object. It then made a sound like a deisel and roared away." He went on to say IT LEFT A PECULIAR SMELL IN THE AREA and that he was within 15 feet of the object at one time and that it was army green in color. IN MEXICO..... near Tampico technicians Camarillo and Silva of Radio-Atlas saw a UFO 20 feet in diameter which " PASSED THRU ALL HUES UNTIL IT BECAME INTENSE WHITISH BLUE AND THEN DISAPPEARED!!!!

COMMENT..... these reports seem to the editor to be very important. The "Heat Ray" of the UFO indicates that such a thing actually exists. The moving thru the hues of the visible spectrum and then "disappearing" indicates that radiation propulsion is being used. The importance of this type of concept of the reality of the ufo cannot be over emphasized.

LEMURIA

The Lost Continent of the Pacific

The PACIFIC LEMURIAN SOCIETY is dedicated to the accumulation and preservation of the lost knowledge of the "Motherland of MU" from which descended our planet's present inhabitants through the rocky road from ancient Lemurian civilization, through flood and cataclysm, low savagery and finally to today's gadget-packed civilization living from the brink of one war to the brink of the next. For a hundred thousand years no Lemurian fought in a conflict of nations.

If we analyze what we have today as representing our advancement in civilization, we will find that we have gained nothing that the ancients did not have, and that they enjoyed immensely long lives and a natural happiness that is beyond our dreams of today. The Lemurians devoted themselves earnestly to the establishment of communities in distant lands and to the education and advancement of the peoples of these colonies. The Eastern Boundary of this ancient continent was the present West Coast of the United States.

The Lemurians have left their traces in Washington, Alaska, Oregon (see below), Mt. Shasta, Santa Barbara and Baja California, as well as in the ancient buildings in Peru and Yucatan. The Lemurians colonized China and India and inspired the great Pyramid of Egypt. This knowledge of the ancients is still with us today. We shall search it out and publish it for all members.
