NOVEMBER 1990

ST. LOUIS, MISSOURI

PARAPSYCHOLOGY POTPOURRI

by John E. Schroeder
Chmn. Parapsyc. Comm. UFOSGGST

Walter Palmer presented his review of Budd Hopkins' release on "The Ongoing Problem of Deception in UFO Abduction Cases" at the October 3 meeting of the Parapsychology Committee. Before the regular program, there was the "Sharing Session".

Palmer recounted interviews of Howard Blum and Whitley Strieber. Blum mentioned UFO overflights of U.S. military bases. He also sighted a mysterious group of 17 who (paid from National Security Funds) gathered UFO data.

Strieber claimed that he had told less than 10 per cent of his experiences in the three books he has written because 90 per cent of his encounters are too bizarre to recount.

John Schroeder noted that Blum, a former New York Times investigative reporter, claimed that our military successfully downed some UFOs which had intruded on U.S. bases.

Warren Bartling discussed the recent earthquake along the New Madrid Fault. He claimed that 10 faults going east-west crossed the north-south New Madrid Fault. Warren also stated that a basketball sized glowing globe of light traversed some of the secondary faults at the time of the quake.

Schroeder added that geologists suggested pressure of rock movement produced balls of static electricity which moved along fault lines. Bartling commented that sun flares also produce electromagnetic fields which distort radio/television reception and sometimes manifest as globes of pink to purple light.

Tom Sinople suggested the Parapsychology Committee collect narratives which might confirm or negate the hypothesis "solar flares which result in sunspots and barrage the earth with energy slower than the speed of light affect the human brain and increases ESP powers." (WE INVITE READERS TO SEND SHORT ACCOUNTS OF ENHANCEMENTS OR REDUCTIONS OF PARAPSYCHOLOGY POWERS DURING SUNSPOT HIGHS.)

A MOST SUCCESSFUL CONFERENCE

by J.L. Palermo
 MO. MUFON

This years "SHOW ME UFO/IAC" Conference captivated most of its patrons. I don't mean this in a conceitful manner. We have a list of things that went wrong (no instant video for one thing). The glorious plans for video we had dematerialized friday night at 9:00 PM when the producer, Steve West, arrived to inform me that his van with the duplication equipment had been stolen on a road trip. I have some concern about his explanation since while he told me the equipment had been stolen from him Wednesday of the conference week, when I spoke with him Friday morning of the conference, everything was fine (what does YOUR investigative mind tell you?) And though they didn't have the equipment to produce the videos of the conference agreed upon, they still wanted to come in to video tape interviews of the speakers for their documentary and cut that into a video for conference attendees. This didn't happen either. What did happen was a gentleman from Michigan, Tom Sullivan, came to the rescue with his camcorder that he brought with him. I've just received the sessions back from Michigan. Those who are interested in purchasing the talks they found most interesting can do so by sending \$18.00 plus \$2 shipping and handling with the name of the speaker you want. These tapes are available only in VHS. Make your money order out to J. L. PALERMO & CO. and please allow three to four weeks for delivery. Remember, each purchase goes to support the researchers and

THE FAR SIDE GARY LARSON

Continued on Page 7.

After the refreshment break Walter Palmer outlined the special report Budd Hopkins sent members of "IF" the Intruders Foundation. Budd described a six car accident at an intersection in Washington, D.C. which mysteriously had no observers, no people in cars, no emergency vehicles and no police present. Regressive hypnosis revealed that Kerry was abducted and subjected to alien experiment on and alien craft. The story pictorially presented to Kerry to cover the actual intrusion was similarly planted in Ann's mind while she was immobilized in the car. Deceptive aliens disguise their appearances with imposed imagery. Some contactees have recalled approaches of five foot tall owls, grey deer, small animals and some Bigfoot type creatures which delivered messages. The substitute appearance prompted the human beings memory to lie.

Two other ruses seemed successful in getting human contactees passive assent to intrusive and painful examinations..."You are not really your mother's child. She may act as if she loves you..I am your true parent, so follow my instructions. You know I, your true mother, would never hurt you". The patent deception is followed by painful probes and needle inserted into the navel or sinus cavities.

The third lie calms and causes the human to acquiesce to the physically painful and psychologically destructive alien actions. The lead alien asks "How can you reject our experimental procedures? You have already given us permission to do them." Again, deception supported by nothing but the alien's word, yet contactees accept without even a challenge. Belief in reincarnation allows the contactee to assert, "I must have given permission in a prior lifetime". Permission granted to do anything, even genetic experiments. Alien sadism again is covered. They may not be our enemies, but they don't act like friends. If we do not understand alien objectives and agree with them, we must stand on our rights and deny alien depreda-

tions.

The next Parapsychology Committee meeting will be held at the Schroeder's home, 4991 Miami Street in St. Louis (352-3058) at 7:30 P.M., Wednesday, November 7, 1990. Chairperson Walter Palmer will update his review of a UFO Parapsychology book.

WE NEED YOUR SUPPORT: BECOME A MEMBER!!

On behalf of the Board of Directors of the UFO Study Group of Greater St. Louis and Missouri MUFON, I would like to toss a reminder your way that without your renewed or first time membership, everyone in ufology is set back a little. Your membership of \$8.00 a year is THE support fund for this publication. THIS publication is, for many, the ONLY source of current, direct from the front lines of research, forum of communication there is. Membership also supports our organizations activities such as education, speakers, and our library.

We know not everyone can be a ufologist by means of researcher or investigator or lecturer. You CAN be a ufologist as a financial supporter. It's as simple as making out a check for \$8.00 to the UFO Study Group of Greater St. Louis and mailing it to P.O. Box 31544 St. Louis, Missouri, 63131.

Sincerely,

J.L. (Joe) Palermo
Board Member, UFOSGGST

ALIEN KNOWLEDGE TRANSFERE

(C)1989;Lorne Goldfeather
President, UFORIC

In this article, I will discuss one method that is used by an advanced race of beings I call the "Watchers" to communicate words and ideas.

During the period of time I was experimenting with electronic beacons, I was having repetitive dreams about bananas. The dreams became so intense and identical that I felt compelled to the library and found myself scanning medical research books on the brain. The information was quite technical, and since I was very poor in math, physics and biology, I was astonished to find myself quite easily comprehending the material. It wasn't long before I discovered that bananas, figs and dates all contain the amino acid tryptophan. It is used by physicians as a sleeping aid. It's supply in the body can be augmented, as well, by consumption of warm milk. Vitamin B7 and C are required for conversion of tryptophan to serotonin, which is a neurochemical transmitter of information. It's chemical structure is similar to LSD, however, it does NOT cause hallucinations. It's function is to program different parts of the nervous system and the brain.

The pineal gland, or third eye, is a small triangular object attached to the top of the brain stem. There is scientific speculation that it is a valve, regulating the flow of though. It has the ability to receive and process incoming information about light and dark. This is also the spot which is said by sages to be the seat of psychic power and intuition. Melanin, a chemical which is elaborated from serotonin by the action of enzymes, determines skin pigment and is only found in the pineal. The serotonin acts as a timing mechanism and relay station, switching states of consciousness on and off, as well as regulating sleep. Light is absorbed into the pineal from the sun by way of the optic nerve. This is important to know so that I can explain how the "Watchers" transmit information.

Peptides, on the other hand, relay micro-cellular words broadcasting sentences, after the area targeted has been switched on by the neurochemical, to receive. The string of 20 amino acids which make up a peptide is a kind of alphabet used to construct genetic material.

There is a great biological signaling system out there known as the Genetic Signalling System. If you are not properly tuned into the frequency, it is mere static and useless to the receiver. There are both WORLD POPULATION BROADCASTS (WPBs) and INDIVIDUALLY TARGETED SYSTEMS (ITS). Their main function is to trigger evolutionary growth patterns. Each nervous system will process the information in a different way, and respond according to their own past life development and current sociological imprinting. The goal of the "Watchers" is to help create one bio-planetary nervous system. Scanning, probing and modulating thoughts, emotions and soul blueprints on this globe, these sentient beings correct and adjust accordingly, using biochemically driven energy beams in order to give a gentle push or shove where they can without having to land outright on the White House lawn.

The "Watchers", specifically a female called Estera (Star-Sun), told me, using direct coded impulse stimulation of the auditory nerve, that they are able to transmit information directly into my brain for storage, assembly and assimilation by the following method:

A beam of energy, different than light but containing many of its properties, biological in nature, is transmitted to the pineal gland. This concentrated focus of computerized impulses is able to hold and transmit information at tremendous speeds. It enters the gland by way of the optic nerve. From there, serotonin and melonin are released, translating the messages into physical response.

Various parts of the learning centers are switched on. The increase in the neurochemicals, aided by the purposeful intake of tryptophan, causes the mind to enter a deeply relaxed and receptive theta state. The pineal acts as a relay station between the incoming psychotronic impulses from the UFO and the messages transmitted inside the brain after processing.

The amino acids which make up the genetic alphabet are influenced and affected by frequency, intensity and color of the craft's flashing lights. One blinding flash of light may indeed consist of hundreds of high speed transmissions. Thus cellular information is transmitted on the energy beam carrier wave, together with the neurochemical on/off binary codes. So, they not only put me in a receptive state to receive knowledge, but fed it to me, as well, like a bio-computer.

(Anyone wishing to contact Mr. Goldfeather may do so through this publication)

NOVEMBER 1990

PARAPSYCHOLOGY COMMITTEE MEETING

November 5, Monday evening at the home of John Schroeder, 4991 Miami St., St. Louis, Missouri at 7:30 PM.

UFO STUDY GROUP OF GREATER ST. LOUIS

November 11, Sunday afternoon at Tyler Place Presbyterian Church. This is located at 2109 S. Spring at Russell. in St. Louis, Missouri. Membership will begin arriving at 2:00 PM.

ST. CHARLES UFO RESEARCH COMMITTEE

November 20, Tuesday evening at the Beanery Restaurant located on Duchesne just north of West Clay, St. Charles, Missouri. 7:30 P.M.

STUDY GROUP HEARS FIRST HAND FROM ROSEMARY OSNATO

by J.L. Palermo
St. Louis, MO.

The UFO Study Group of Greater St. Louis met at 2:00 PM on October 14, 1990 at Tyler Place Presbyterian Church at 2109 South Spring at Russell. As it sometimes happens, I ran late getting to the meeting, but only because I was acting as a gracious host to my guest, Miss Rosemary Osnato from New York City. The previous day (and night) of the "Show Me" UFO/IAC Conference had been exhausting and neither of us woke up before 11:00 AM. Getting a meal, cleaning up and gathering television and VCR for the meeting simply ran us late. As we arrived the meeting was recessing for a snack break. President John Schroeder looked relieved as he spotted myself, Rosemary and the television I was carrying in.

As Rosemary was greeted by some of the attendees, those who already knew who she was were already anxious to speak to her. John Schroeder had a similar interest and offered the floor to Osnato. She modestly accepted the opportunity and briefed us all that she was from New York, attended the conference as my guest and, being one "taken" by aliens (she dislikes the term "abductee"), she is involved with Budd Hopkins' "INTRUDERS FOUNDATION" and it's publication. A few questions from the audience eased her speaking and she began to talk about her experience. A few key items were that she was taken from her apartment in New York City in the summer of 1972 by a blue beam from atop her apartment roof top. Osnato feels she was gone for at least a forty-eight to seventy-two hour period, that she was taken to an area based in a desert setting, the entrance and exit of alien craft to this area was a large lake of some sort, she was driven home at least the remainder of the distance by automobile with a primate looking

driver and when delivered home, she was dressed in her own winter clothes. This is but a minimal bit of information concerning Osnato's alien experience. She kept it brief, respecting the intended program for the afternoon.

The remainder of time was spent on viewing a video tape "The Meier Chronicles", a ten year old "documentary" of the Billy Meier case from Switzerland. There has been much debate concerning this case. The Mutual UFO Network, Inc. accepts the case as a fraud. This is due to some of the pictures being admitted photos of a model by Meier. The video program has the problems of being an attempted documentary versus the real thing. Its' production design is more like a "60 Minutes" in favor of Meier with the only hard facts being the photographs and super-8 film of the alien crafts and a picture of one alien, a very pretty human female. In all fairness, there are correlations (that I could see, anyway) between what Meier describes as a signal that the alien crafts were near and what Ed Walters also has said is a signal that the aliens were coming. They both indicated a humming in the head telling them the aliens were approaching. There is also one photo of an alien craft coming just around a tree at the top portion of the tree. Just like a photo by Ed Walters, the tree branches are seen in front of the air craft. Interestingly enough, both Meiers' and Walters' photos have the craft approaching from the upper left area of photo with the tree, of course, in the left portion of the picture. This is not to indicate that Ed Walter's faked his photo like Meiers is accused of, to the contrary, in the same way that Walters' photo was judged to be real, the same logic must be applied to this particular Meiers' photo. One piece of evidence that stands out to me is one particular piece of super-8 film footage where the shot starts out zoomed in to the body of the craft showing very detailed blinking lights and craft construction (like the detail of space

craft from the Star Wars or Star Trek movies) and then it slowly zooms out to a final shot of the craft hovering what would appear to be potentially 50 to 60 yards away. As a filmmaker of some nineteen years and having shot some 2,500 feet of super-8 film, both ASA 40 and 160 and black and white and having done trick photography with it, I have to say that I'm convinced that this particular shot is real. One can apply all the same logic to this piece of film as does Bruce Maccabee to the Gulf Breeze photos and you have to come out with the same conclusion. Super-8 film is, for all intent and purposes, an amateur film format. Without taking it to another format like 16mm or 35mm motion picture film you can't play with it much more than basic trick photography (ie; stop-action motion, multiple frame animation, time lapse photography, lap dissolves and superimposed titles). In other words, the sophisticated special effects like matte processing or optical printing or other highly expensive special effects for motion pictures does not exist for Super-8 film! What I saw on the super-8 film that Meiers shot with his camera (which doesn't have all the sophisticated "bells and whistles" necessary to accomplish the above mentioned special effects) could not have been superimposed without the same obvious problems that Maccabee described for Ed Walters.

While I can't say that Meiers' didn't fake some of his UFO photos or flower his story to make it more appealing, I can say that this particular super-8 footage dictates that I read his book (available through the Study Group's Library for qualified UFOSGGST members) thoroughly to see what other correlations can be found.

The next meeting of the UFO Study Group of Greater St. Louis will convene in the same Presbyterian Church as this time. This time, I'll be presenting an update on active ongoing investigations occurring in the last six months since the trace landing case in Bel Grade, Missouri. I hope to see you there.

CONFERENCE

Continued from Page 2.

the continued effort to unravel additional ufological facts so that we can better deal with the aliens who are involving themselves in our lives.

In future publications of the Enigma will feature a synopsis of each of the speakers presentations. I can tell you that, overall, the comments I've heard have indicated that "this was the best conference I've ever attended!" We were attended by between 500 - 700 patrons (Editors estimates), our CBS affiliate KMOV-TV rolled video for evening news coverage and a television news station from Decatur, Illinois added to the media coverage.

One of the most welcomed and appreciated aspects of the "SHOW ME UFO/IAC" Conference is the two hour breaks between sessions. Conference founder Bruce Widaman originally designed the conference this way to enhance the interaction capabilities between not only patrons of the event but also the speakers and fellow researchers that attend. This allows more time for actual ufology growth to occur as well as the patrons getting updated information. From the comments I've heard I have to say "Good show, Mr. Widaman, fantastic idea!"

We want to also thank the one and only Mr. Dan Wright for assisting us in keeping things moving for our audience. In a crucial moment of need, Mr. Wright was agreeable to sharing current investigation information while Bruce Maccabee's materials finally came into his possession after being misplaced by airport personnel. A sincere Missouri thank you to both Dan Wright and Bruce Maccabee for their professionalism in a difficult time.

Watch for the first of five articles on the speakers of the "SHOW ME UFO/IAC" Conference in the next issue of the Enigma.

THE FAR SIDE / By Gary Larson

"I can't believe it! One lousy little bee gets inside and you just freak out!"

REQUEST FOR ARTICLE SUBMISSIONS

by J.L. (Joe) Palermo
ENIGMA Editor, St. Chas., MO

Many of you have thoughts, ideas, and possibly even your own research that would not only make the kind of copy we want but is better served by your sharing it with us via this publication.

Don't be shy! If you're concerned with the way you write, that's what this editors' job is all about! Your material will be worked with and polished (if needed). Of course, space considerations may cause either the need for condensing your article or holding it for a future issue. Or it may be that your writing is better suited for the letters to the Editor area.

No matter where it goes, it needs to be SOMEWHERE...HERE...IN THE ENIGMA. This is the primary forum in this bi-state area to express your ideas and thoughts on the subject of ufology or parapsychology, Bigfoot, the psychic realm and more!

The ENIGMA is where you can definitely exercise you FREEDOM OF SPEECH. Please submit your articles or comments no later than the 20th of each month. You can mail to: J.L. Palermo, Editor
The ENIGMA, 1811 Trails of SunBrook,
St. Charles, MO. 63301.
