## ALIEN APPROACHES

America's Admiral Inman made the newspapers in Great Britain earlier this year. The following story was printed in *THE SUNDAY TELEGRAPH* on 23 January 1994:

"Did Admiral Bobby Ray Inman withdraw his nomination as the new U.S. Defense Secretary on the instructions of alien life-forms? This exotic possibility has reached me (*TELEGRAPH* writer Mandrake) from Washington - in an extraordinary analysis of the conspiracy theories blossoming around the Clinton tenure of the White House...

The imp-faced Admiral Inman, the former deputy director of the CIA, indignantly claimed in a rambling press conference last week that he was the victim of a Capitol Hill media plot. His allegation featured Mr. William Safire, the *NEW YORK TIMES* columnist, and Senator Bob Dole, the Senate Republican leader. The Senator, he said, had stitched up a deal with Mr. Safire to hammer him in his confirmation hearings over alleged tax problems while the Right-wing columnist would continue to lambast President Clinton in print on the Whitewater scandal. Mr. Safire called the Inman accusations "weird."

But weirder still were allegations in the *WASHINGTON POST* on the day of the 62-year old admiral's outburst - that he was the U.S. Government's ambassador-at-large to little green men.

Admiral Inman was well known to flying-saucer conspiracy theorists, said the *POST*. He was an intimate of "MJ-12", spoken of in UFO-lore as a secret Pentagon group that liaises with beings from outer space. Furthermore, NASA scientists had been offered access by the admiral to alien spacecraft."

There you have it - a British media view of U.S. politics and the UFO cover-up. It is surprising how well versed the British writer is on the Inman involvement, MJ-12, and the whole cover-up issue. The devious acts of some politicians and military people make all Americans look bad. It is time to at least put an end to the UFO cover-up.

## BRITISH GOVERNMENT HAS UFO PHOTOS

UFO expert Bob Boyd has copies of some UFO photographs that the British government has kept quiet for 20 years. 1,400 troops observed the UFO over Cyprus. Following the event the British Ministry of Defense collected 100 rolls of film and hid them away from the eyes of the public. Now the UFO researchers want more of the films released. They cite examples of UFO incidents where witnesses tell of military aircraft are flying in hot pursuit. It is obvious that gun camera films were made. These need to be released.

## SPIELBERG TO EXPOSE UFO COVER-UPS

According to the 22 December 1993 issue of the *LONDON DAILY MIRROR*, director Steven Spielberg is deserting science fiction - for science fact. The *MIRROR* Spielberg is secretly working on a movie with a fifty million pound budget that he claims will unmask a government cover-up of an alien spaceship crash in New Mexico in 1947.

PROJECT X is based on the Roswell Air Force base incident. Supposedly, Spielberg believes the U.S. military took away alien bodies from the crashed UFO. Hollywood insiders say the director has got hold of previously unseen film footage of the flying saucer taken by a military officer. The movie is about the UFO crash and the political intrigue that followed.

Spielberg has already got a team at Hamlin Productions working on the script. The movie is due for release in 1997 - the 50th anniversary of the Roswell crash.

For Spielberg to make an investment of this magnitude, he must be very confident that the Congressman Schiff GAO investigation is going to go nowhere. And he may be correct. Insiders are saying that the answer is already written. It will be a better whitewash than the Condon Report. Don't be surprised if some new kinds of balloons aren't blamed for whole affair.

## CHINESE REPORT UFOS

More than 6,000 UFOs have been sighted over the channel between China and Taiwan. Reported by China's Xinhua News Agency, this story was published in the *EDINBURGH SCOTSMAN* on 8 December 1993. The news agency was reporting on the first China-Taiwan UFO Symposium which was being held in Beijing, China, where scientists on both sides said the thousands of UFO sightings deserved more scientific study.

A British newspaper, the *WATFORD OBSERVER*, states that the Chinese UFO journal, *Feidie Tansuo*, sells 300,000 copies each month in China. Considering the poor economic conditions in China, that is an outstanding circulation for a periodical.

It is rather astounding that UFO activity of this magnitude has gone unreported in the U.S. media, even the tabloid press. Why have we not seen some mention of these UFO reports in any of the major newspapers? CNN missed the boat also. Why? The *EDINBURGH SCOTSMAN* received the story from the Reuter New Service and that is how I found out about it. That service is received in the United States also. Why was it ignored? Even if our media giants believe 6,000 UFO reports to be too insignificant to be newsworthy, isn't the fact that China and Taiwan were able to meet together in Beijing for a major UFO conference newsworthy?
