B I G F O U R CONFERENCES -- AMICABLE LABOR SETTLEMENTS --
HYDROGEN POWER FOR PEACETIME USES -- REVIVED RELIGIOUS SEARCHINGS --
Are these the s i l e n t ministrations of our S p a c e B r o t h e r s ?

Today we are witnessing the greatest social revolution ever to befall man, and the transmutation is a delicate but very sure process. It is as though God's smile had actually cut through the thick smog of age-old superstition, doubt and distrust, and planted a fresh seed of revived hope. So pulse the overtones today which are everywhere felt. In Detroit, for instance, a city which in the reckoning of more than a few adept souls could be a destined center within the Universal Plan, three major automobile companies have recently settled their labor-management problems with minimum discord, arbitrating paramount issues across the table. Never before has this been done. The annual wage guarantee which only a short time ago was ridiculed as "visionary" and "utopian" is now but the assurance of a more mature management at last recognizing that since labor is geared to inflexible patterns, it (industry and management) must go more than half-way, and show its responsibility in view of its decisive advantage and priority position.

* * * * *

At the BIG FOUR CONFERENCE in Geneva this past July, a World Inter-planetary association really went to work and made world-wide news through doing its utmost to widen nationality into universality, and to assert that in back of such universality is Cosmic law and justice which dare not be swept aside.

We are vague on specific details of this Conference, but according to our informant, Mr. George Adamski, Professor Alfred Nahon, of Lausanne, France, informed Mendes France that the space brothers were through fooling around amid the atomic stock-piles which both Russia and Britain were hugging and that this might be their last opportunity to get rid of these nuclear nuisances before the UFO's forcible intervention, in order to preserve planetary equilibrium. According to Adamski, the bill introduced on July 17th at the Geneva Conference was not refused--it was discussed by the BIG FOUR who also talked about space ships and space, for the note called upon them to tell the world about aircraft from outer space, "observed in all countries since 1945," in order to prevent a "stupid panic" when the facts finally become known.

Mr. Adamski seemed to believe that this piece of business was actually considered by the delegates representing the United States, Great Britain, France and Russia; whereupon the Interplanetary Society avers through United Press dispatches that the sole purpose of calling the Conference was for agreement upon this inter-terrestrial issue. We have no way of ascertaining the truth, although it seems more than coincidental that the same BIG FOUR practically announced the Satellite program simultaneously! (Or are there artificial satellites already constructed in space?!)

* * * * *

IT IS HEARTENING TO NOTE THE CHANGED TENOR ALONG ATOMIC LINES... to realize what positive stresses are suggested as alternatives to the otherwise grim misuses of nuclear energy. By attempting to make a miniature artificial sun on earth, and harnessing the vast resources of sea water, Project Sherwood, a research started in 1951 is attempting to copy the sun's method of generating power through fusion, or melting of hydrogen. Well, if it can be done, very fine! But we agree that it may take all of the twenty years envisioned before a pilot model of an operating thermonuclear power plant can be developed, so long as we still cling to our erroneous ideas of what energy actually is, and explode it in the deserts and in the oceans, instead of allowing its "Unknown X" properties to explode our dogmatic scientific finalities.

DETROIT FLYING SAUCER CLUB
RESUMES PROGRAMS IN NEIGHBORHOOD AREAS

It has been several months since the last official program of the Detroit Flying Saucer Club was announced, and undoubtedly many of our members and their friends have wondered just what has happened. The explanation is not difficult to give. One of the best answers is that we have simply exhausted the surface elements of the extra-terrestrial "phenomena" as such, and are now expanded into the real marrow of the Saucer backbone. It has been a year of analysis, sifting, and most important, TESTING in more ways than obviously is apparent. At this moment the wise words of Orfeo Angelucci come to us: "There is much work being prepared in the space field. It is so vast that no central point is yet established, therefore it is as yet confused and not quite clear as to its main character."

The picture to us is not bewildering even amid varying temperments and tendencies of the UFO pattern, but we do feel that we need more face-to-face evidential to back up the aspirational generalities which we completely believe in, so that we in Detroit know our precise accent and rhythm in the overall Cosmogonic scheme. Our desires to meet in large auditoriums and sow the "saucer seed" to the world cannot and dare not be forced prematurely.

Even so, the following persons met recently and were nominated to serve on a Committee to do research work on the future of the DFSC, to recommend a course of action harmonizing with the period at hand. Eunice and Harry Brown, Louise and Ed Andrew, Marlys and Ted Walling, John and Bea Hoffman, Clyde and Helen Trepanier, Betty Jane Quinlan, Ann Fairbrother, Eunice Quennell, Vern Willard, Lee Childers, Vern Boyington and Henry Maday.

Three committee meetings have been held, the Saucer mailing list has been divided into Postal Zone neighborhood areas for leaders in these districts, and Mrs. Helen Trepanier and Mrs. Ann Fairbrother have been delegated as Discussion Group Chairmen, to implement local Discussion interest. Detroiters and suburbanites interested in contacting Mrs. Trepanier may do so at KENwood 4-8368; and Mrs. Fairbrother at ELgin 6-6397.

DETROIT FLYING SAUCER CLUB
FINANCIAL REPORT

Nine Lectures August 1954 through August 1955 --

Our Club, a non-profit dedicated organization attempting to clarify and rightly interpret the inter-terrestrial picture "as it unfolds itself" -- and further determined to be as educational as it is informative and as Spiritual as it is gregariously social. We have attempted to bring the best and most accurate information possible to our friends in the Detroit area, and found this could only be intelligently accomplished thru public lectures. With this thought in mind, we have brought our members the most qualified speakers throughout the world, with a minimum cost to our friends:

RENTALS OF HALL FOR MEETINGS.....	\$1976.00
HONORARIUMS FOR SPEAKERS.....	3708.00
DIRECT MAIL & PROMOTION.....	1303.00
EDUCATIONAL EXPENSES & RECORDINGS.....	377.00
FEDERAL TAXES.....	159.00
	<u>\$7523.00</u>

RECEIPTS FROM ADMISSIONS TO LECTURES.....	<u>\$6522.96</u>
TOTAL DEFICIT.....	\$1001.04

(Signed) John C. Hoffman, Treasurer

DAN FRY THRILLS DETROIT FLYING SAUCER AUDIENCES -- IS NOW WORKING ON THIRD BOOK!

When DANIEL W. FRY, modest and unassuming Californian came to Detroit in June, with his friend Ralph Huffman, members of the DFSC had the rare opportunity of hearing and meeting one of the most sincere and authentic Saucer authorities in the world today. These are praiseworthy words, yet they are carefully weighed. It has been a long time since anyone has impressed quite as much as Dan...and perhaps it is because of his unaffected knowing about many sciences and technical subjects, humanized thru his practical slant. We saw him interviewed for 4-1/2 hours by able reporters from the Detroit Times and Free Press; had Dan's story lacked any authenticity, we are sure Messrs. Art Hinkley and Curt Haseltine would have detected it; instead Dan felt he received the best interview report of his career by the outstanding job showing up in the Sunday, June 19th edition of the TIMES, by Art Hinkley.

Elsewhere in the VIMANA we are printing a page of Dan's Questions and Answers, but meanwhile here is a paragraph from a recent letter to Henry Maday from the author of "The White Sands Incident" and "To Men of Earth."

"...I am well started on my next book, and hope to have it ready for publication by the first of November. It will be called "Steps to the Stars," and will be essentially a textbook which will explain some of the advanced concepts of the Physical Science, which I received during my contacts. As the second book presented the social and spiritual message, so this book will present the scientific message. I had been reluctant to release this material before, but, in view of the great improvement in international relationships which has become evident during the last few months, I believe it will now be safe to do so. Incidentally, there are comparatively few people who realize how much we have to thank our "visitors" for this improvement." (We're right with you, Dan; we believe this too!)

* * * *

FLYING SAUCER BIBLE RESEARCH COMMITTEE UNEARTHS INTERESTING
EVIDENTIAL OF "SPIRITUAL" U.F.O.'S MENTIONED IN SCRIPTURES

According to Reverend M. E. Grey, Robert Johnson and Luther Childers, there are many instances of so-called miracle portents being the evidential of spacecraft from other planets recorded in our Bible, and they have come up with a most interesting series of references to support their point.

Bob Johnson writes: "There is one thing that we have found out that we are sure of... and it is that the word "cloud" was used too many times for transportation to have the meaning of a medium thru which rain is carried. In EXODUS 12; 21 and 22, we read: "And the Lord went before them by day in a pillar of a cloud, to lead them the way; and by night in a pillar of fire, to give them light to go by day and night. He took not away the pillar of the cloud by day, nor the pillar of fire by night from before the people.'"

This Bible Research Committee further gives us many Scriptural references, and we shall quote only a few, namely: DEUTERONOMY 1:33-PSALMS 78:14--ISAIAH 19:1--JEREMIAH 4:13--EZEKIEL 1:4--DANIEL 7:13--MATTHEW 17:5--ACTS 1:9--REVELATION 1:7.

"It seems to accord best with the goodness of God and with the manner in which the universe is made, to support that every portion of it may be visited, and become successively the abode of the redeemed; that they may pass from world to world, and survey the wonders and the works of God as they are displayed in different worlds. The universe so vast seems to have been fitted up for such a purpose, and nothing else that we can conceive of will be so adapted to give employment without weariness to the minds that God has made in the interminable durations before them."

--BARNES' Commentary on Peter

Sightings

(Herein are two important sightings reported by members of the DFSC, and which were given in person at the June meeting in the Detroit Institute of Arts, featuring Dan Fry.)

TED WALLING of 923 West Twelve Mile Road, Royal Oak, Michigan, writes:

"On March 6th, 1955, we were visiting friends who live near the 8 Mile Road in the vicinity of Northland Center.

"We had an enjoyable evening and as it was getting late for our little son, I went to the car before my family got ready to leave. It was about 9:00 p.m. when I left the house ...walking toward my car, I looked up into the sky and was admiring the beautiful stars. It was an exceptionally clear sky for that time of year. Suddenly I noticed down the street a bright object hovering in the sky. I estimated it to be about 4 blocks away. My first reaction was that it might be a powerful landing light from an airplane, so I proceeded to walk to my car. As I was just going to take out my keys, something made me look at that strange light once more. Now I really became excited, for this light had come much closer and was still coming closer. I couldn't stand it any longer so I ran to a position where I could see it better. There it was only half a block away, standing in mid-air. There was no sound of a motor or any reflection of light, just a solid body of light, shaped like a diamond, with darker shadowing in the middle portion where the rest of the object had the brightest bluish-white light I had ever seen.

"I stood there watching it with my mind filled with wonderful thoughts, when I realized I should get some witnesses, but I still hated to leave this beautiful sight. Suddenly as if knowing my undecidedness, it started drifting slowly towards the next street. I almost wanted to follow it for it was moving so slowly, but I wanted the others to see it too. Running into the house, it took some convincing to get them to come to the back yard, and when we finally got the back door unlocked, we could only see a small object climbing higher and higher into the heavens... After writing this report on July 12th, I saw the same thing in the northeast part of Detroit, and watched it disappear into the skies. The object remained motionless in the sky long enough for me to pull my car off the road and roll down my opposite window to watch it."

* * * * *

JAMES CANON, C.P.A. of 19401 Woodworth, Detroit, Michigan, writes:

"On the evening of May 31st, 1955, at approximately 10:10 p.m. my wife and I were sitting on our front porch enjoying the spectacle of a star filled summer sky. At this moment there appeared overhead five silver disc shaped objects, travelling due north at a rapid pace. The discs were in a kind of a spread out V formation. After the objects had traversed some distance across the sky, we noticed a sixth object some distance behind them which suddenly flared into a bright light and disappeared. We viewed the original five until they passed from our sight."

A PERSONAL JOSTLE TO TWO AMERICAN AIRLINES PILOTS LIVING IN BELLEVILLE, MICHIGAN:

Gentlemen,-- your modesty and reluctance to tell members of the Detroit Flying Saucer Club your experiences in encountering several UFO's near Washington, D.C., and on flights down south, is your original sin of omission. Captain C.S. Chiles and First Officer, John B. Whitted, flying Eastern Airlines reported their findings...(Project Saucer Case No. 144) Captain E. J. Smith and First Officer Ralph Stevens, United Airlines pilot, near Emmett, Idaho, stood up and were counted. (Project Saucer Case No. 10); Captain Jack Adams and First Officer, G. W. Anderson, of Chicago and Southern Airlines, are another couple who have been willing to discuss this matter out in the open.

Casey, after flying for 20 years, you deserve that wonderful farm which you are nourishing in Ohio. But think of the grand feeling you will receive, when following your testimony, you have helped hundreds of people to climb another milestone of belief. (It might even bring your own turn of riding in a Saucer or spacecraft a year nearer to realization) --

CELESTIAL VASTNESS

Strangely it looks to me to see from far
The planet earth like any other star!
Once its round side seemed limitless, but now
Its disc is like an apple on a bough.
All size is relative, and God alone
Knoweth the actual value of each one
Of the bright globes that in the ether swim,
And worlds, because of men, are dear to him.

(The above poem, like the one below it, was recently discovered by the VIMANA editor in an old book "Life in Other Worlds," by Adam Miller, M.D., and bears 1878 as its publication year. These two poems, which appear untitled in this old book, are apparently from a long dedicatory poem entitled "An Epic of the Starry Heavens," by Thomas L. Harris, although it has been impossible to delve into various archives to support this supposition.)

S O L A R S P I R I T

I often used to wish, at eventide,
I were a spirit free and glorified,
Wandering through trackless ether at my will,
And as the planet Mars shone bright and still
I hailed its ruddy flame, and wished I were
Midst its unvisioned realms a wanderer.

O God! Thy goodness everywhere I find--
The space we think devoid of life is all
One high celestial hall,
Thronged by the deathless spirits of the free,
Members of one sublime humanity.

Our Revived Spiritual Searching --

We mentioned on our first page the constructive turn of events within our American and world cycle. Everywhere comes the query: "Where can I read something that would epitomize the philosophy or grandeur of advanced peoples, such as our space brothers?" We do not have far to go. Right in our grass-roots American soil grew three mighty literary oaks in the guises of Ralph Waldo Emerson, Henry David Thoreau and Walt Whitman. (If these souls weren't "advanced" planetary agents sowing a Cosmic seed for this very day at hand, to smarten this old earth with exciting normalcy and original texture, then we haven't read them since our tenth grade assignments.) They stand today even greater than one hundred years ago....and it behooves us to read them again for the sake of rediscovering within ourselves the indescribable beauties, the universal intuitions, and diverse attributes of the soul's hallmark, so endless in scope and majestic in concept! After all, our Venusian and Martian brothers can only *i n s p i r e* us to a better view of ourselves, and we can quicken the advent of their visit this much by our own preparations into expanded consciousness. Do you not agree?

-- *Henry*

EXCELLENT SAUCER PUBLICATIONS recommended by VIMANA STAFF:

Typical Quotes from among the best:

From C.R.I.F.O. ORBIT, by Len Stringfield, September 2nd, issue:

"...Before the hopkinsville 'little green men' story broke over the nation, DRIFO had silently gathered some unpublishable facts concerning such orgish encounters near Cincinnati...we have more recent evidence and each story lends credence to the other, for we have checked each person involved and got their personal account..."

* * *

From THE LITTLE LISTENING POST, at Washington, D.C., Clara John, Editor: "...A man working close to Government sat recently in the Garden of the L.L.P. expressed the following:

'We are now one octave beyond Columbus. As curiosity drew him over the rim of the ocean, so Adventure and Expansion will bring discovery of Free Energy. Saucers will be built. Men will fare forth from this planet. Higher Intelligence will not deter them. The thing is secular. Spiritual growth will remain a matter of the individual. Evil is traceable to the survival Urge, even as it shows itself in Nature. The cure for evil is developed awareness that survival, brotherhood, are eternal facts regardless of appearances. This removes fear always associated with evil.'

From THE FLYING SAUCER REVIEW, official publication of Space Observers League:

"...To hide the truth of the entire Saucer issue, the powers-that-be are throwing at the American people one of the biggest lie campaigns in the history of the country... On top of that, they are attempting to build a wall of resistance against the expected "mass" survey in 1956. This will be the year when Mars moves to within 35,000,000 miles of Earth. And, little known to the public, Venus will pass within 25,000,000 miles of earth, 10,000,000 miles closer than Mars." --Editorial.

From the AUSTRALIAN SAUCER RECORD, official organ of the Australian Flying Saucer Research Society: "...It may be said that Jules Verne and H. G. Wells were the founders of modern science fiction: though their techniques were very different from that of the modern writer... It was natural that the early writers, having used the more obvious possibilities of earthly scenes, should have turned to space for a background."

--P. D. Thomas, Hon. Ass't Secretary.

From SAUCERS, published by Flying Saucers International, Max B. Miller Editor, we do not quote except to recommend very thoroughly this fine little newette magazine, which carries many scoop stories, such as the Padre Island incident, John Otto's Light Beam Communication progress, and other firsts. We especially recommend the March '55 issue, for its excellent and unbiased reporting of two credible Saucer contacts, and we will agree with Mr. Miller on his review of Cedric Allingham's book: "Flying Saucer from Mars." Max doesn't buy Allingham's story, and neither do we...something about the photo of the "white" saucer in Allingham's book did not strike us right--and Desmond Leslie told us last year to watch out for this book--meaning, be on our guard...

* * * *

A LETTER TO THE EDITOR FROM LONDON ENGLAND:

Dear Mr. Maday:

I greatly enjoyed reading the copies of the VIMANA that you sent me in April. The Major Fault Lines of the World article in your last issue of March 15th was especially interesting.

...There is no doubt at all about the genuineness of Flying Saucers--but there are very many schools of thought as to where they come from. Some say from Venus, or Mars, or Clarion, some say from another solar system, some from the ethers. (Meade Layne, who appears to get a great deal of his information thru the Mark Probert controls seems to favor the Mat and Demat theory of emergence from space (the Ethers). What do you think? Then again, some writers like H. T. Wilkins and Jessup seem to think that some at least of the saucer people are hostile.

It seems to me that until one has had some personal experiences that the best thing to do is to wait and see, and at the same time read and study the different schools of thought, and try to sort it out for himself. But it is always interesting to get other people's point

DAN FRY ANSWERS QUESTIONS FROM THE AUDIENCE AT RECENT DETROIT FLYING SAUCER CLUB
PROGRAM IN ART INSTITUTE
(See story on page three)

QUESTION: How is the force developed to counteract the force of Saucer acceleration?

ANSWER: There is no force developed to counteract the acceleration. The acceleration is produced by a force which acts upon every particle of the mass, therefore there is no effect on the mass as a whole. It doesn't need anything to counteract it because it doesn't disturb the body; if every atom is accelerated equally, it doesn't matter to how high a degree it is accelerated; you won't feel any effort or strain or no part of the body will tend to move more rapidly than the other or be displaced from any other part of the body in any way. The field which propels the Craft itself--the propulsion of this particular craft on which I rode--was identical to a gravitational field, except that it is in opposition to our gravitational field. This concept takes a minute to absorb:--basically, we have sought three ways to get away from the world:

- a) We must destroy gravitation
- b) We must shield gravitation
- c) We must overcome gravity by interposing a superior force. The last mentioned is the only one we've had any success with to date...by use of the rocket which produces a force great enough to overcome gravitational force. But this is a very clumsy and inefficient method. As a rocket technician I know this. The efficient method is to produce a force which is in opposition to the gravitational field so that the object will still follow all the laws of gravitation but will simply fall away from the earth rather than toward it. It really isn't as difficult as it seems!

QUESTION: Do you know which planet your Space or Mother Ship came from?

ANSWER: This particular ship was not directly from any planet or system. This group achieved virtual independence of planets as far as life requirements are concerned. Those ships are very large...practically planetoids in themselves and since there are closed systems it is simple to produce all the necessities and comforts aboard the craft itself. A babe born on the Queen Mary, for instance, could yet live all its life aboard the Ship... it would still receive as much energy from the sun in space or in water and does not have to be on a planet or in the ocean. The extra-terrestrials do touch various planets, for purpose of acquiring materials for new construction.

QUESTION: Has this extra-terrestrial group contacted any others on earth, especially the four year duration?

ANSWER: Yes--quite a number of contacts. I have received letters from many who had identical experiences and believe there will be many more.

EDITOR'S NOTE: DAN FRY will be a regular contributor to the columns of the VIMANA, and at a future date, when our new issue is out, we will release more of the vital information which he offers.

Address: 22 Northcote Street, Kilburn, South Australia.

Up in the Air!

LAURA MARXER AND INTER-PLANETARY SOCIETY PETITION UN CONGRESS --

LAURA MARXER and her group on Inter-Planetary Relationships deserve the high praise of all thoughtful people for the petition to the United Nations' current session, sent to New York City late in September. Although fairly long--over two pages--it none-the less represents solid thinking, and if guided into the right agencies ought at least to cause a few tremors among those delegates who are fortunate enough to read it.

(Copies of this petition--which aims to have 3000 signatures, may be obtained from Laura Marxer, 24720 Carlisle, Dearborn, Michigan.)

DR. GEORGE HUNT WILLIAMSON BEGINS TELONIC RESEARCH CENTER!

It is always heartening to hear from our friend, "Ric" Williamson, and the co-author of "The Saucers Speak!" is very busy right in his old stamping ground of Prescott, Arizona, where he is promotion manager of NBC. However, Ric who is a real "stardust" zealot, cannot get Saucers out of his blood, anymore than any of us can...so that now his newest enterprise is his TELONIC Research Center, which is going great guns, working hand in hand with some very well known scientists. Ric writes: "...we have our Master Unit...Interstellar Communicator ready to go. It utilizes ultra-violet and infra-red frequencies. It is attached to a very fine photo-equatorial, Unitron Refracting telescope for DIRECT planet to planet communication. We will use it, of course, for contacting UFO's in our atmosphere as well. Have been in touch with Dr. --- (mentioned in Keyhoe's book) and he says big things are in the wind."

We certainly do wish Ric the very best of everything, and are very excited over his new venture. He further writes: "IF YOU KNOW OF ANY INTERESTED "hams" HAVE THEM GET IN TOUCH WITH A. DAVID MIDDLETON, W5CA, TIJERAS, NEW MEXICO." (Ric is publishing a Telonic Quarterly Bulletin, which, incidentally, also draws the cooperation of young Tom Comella, of Cleveland, former brilliant editor of Flying Saucer News-Service Research Bulletin.)

* * * *

ORFEO ANGELUCCI'S "Secret of the Saucers" highly recommended.

"The Secret of the Saucers" by Orfeo Angelucci (published by Ray Palmer and the Amherst Press) is one of the noblest books yet essayed on the UFO cause, and has excellent probability supporting out-of-this world evidential. The philosophy of a superior race whose benevolent and brotherly interest in the problems of our earth meets our highest respect, for what is written could so rightly be the Truth that anything less than this must be fictitious, even though lived out as fact. A most interesting reconciliation of what happened thousands of years ago in what astronomers, today, classify as the asteroid belt...as the planet Lucifer, for example...and other references mentioned in our Bible are intelligently dealt with in Angelucci's book.

* * * *

"THE VIMANA"

Courier of the New Cosmic Cycle, is a magazine edited by Henry Maday, with publishing offices at 6432 Cass Avenue, Detroit 2, Michigan. (Single issues, 25¢.) As we go to press at this time, we have an intuitive feeling that it may be some while before another issue appears, and we are sorry about this, but such a delay will be only temporary. The editor is going on an Assignment which may keep him busy for the next several months...and no interruptions dare take place until it is completed. Our readers will understand! In the meantime we intend to contact each of our subscribers by letter, should refunds on any subscriptions be in order. Thank you, our friends, for your long waiting! Meanwhile - let us hear from you.
