## CONCERNING ABORTION FROM THE COSMIC VIEWPOINT

Q. We have a question from L.A. of Koloona, Iowa. She is very curious to know whether there are any mailings where Awareness has commented on "abortion". Abortion is something that she cannot understand and would like to have information on this subject.

A. This Awareness indicates that wherein an entity can visualize two universes simultaneously existing in the same space, but one universe being on the inside of a sphere and the other universe being on the outside of the sphere, and the sphere having so many parts within it that it is, in actuality, spheres within spheres, within spheres, within spheres, etc., and on the insides of all of these spheres inside these spheres there are energies and entities; and on the outside of these spheres, around spheres, around more spheres, there are entities and energies; and upon each of these spheres, there is a multiplicity of tiny spheres.

This Awareness asks you to visualize a dot with a million circles radiating out from that dot, likened unto dropping a stone in water. These circles moving out from that dot, a million of them. Each of these circles having on its inside a dot, and out of that dot radiate millions of circles. All around those circles, on the insides, are a series of dots, and all of these dots have radiating around them a series of circles. Upon the outside of those circles are dots, and on all of those million circles and the billions of dot are circles radiating out from them.

This Awareness indicates that from this picture, now visualize that everything which is on the outside of any of those circles is on the inner plane, even though that may also be placed and be seen as being on the outside of another circle. For you must understand that in this image, that which is on the inside of one circle will be seen as being on the outside of another circle. This Awareness indicates that there is the inner plane, which is on the inside of the circles, and there is the outer plane, which is on the outside of the circles.

There are certain substances which are balanced by as many forces on the inside, as many circles on the inside, as there are on the outside, so that these dots are neither overwhelmingly on the inner plane nor overwhelmingly on the outer plane... these dots being associated with such things as clouds or wispy, nebulous shapes or substances. There are also certain dots which are mostly on the inner plane, and other dots which are mostly on the outer plane.

This Awareness indicates when a spirit begins to move through, a dot begins to move through from the inner plane to the outer plane.

In the constant changing of time, there becomes that possibility whereby the entity can move through and enter into the outer plane, or the entity can be aborted and only move through to a certain point and be cut off and sent back, this being likened unto a new circle being drawn which excludes that entity.

This Awareness indicates wherein an entity begins to move through into this plane as a baby, it is dying on the other plane as an adult, and is beginning to lose its consciousness from the other plane and is beginning to enter this realm: and as it grows and develops more and more into this plane, there is the possibility of extracting itself from the other plane to such a degree that it no longer has any nourishment from the other plane, (the other plane being that which is nourished by imagination, and this plane being that which is nourished by mind, thoughts, rationality.)

This Awareness indicates wherein entities can dwell on both planes, there is the possibility of longer life, and the shocks of passing over is much less intense.

That wherein entities upon this plane have lost their imagination, their contact with the other plane, these entities may find themselves approaching that time wherein their sustenance has dried up, and they are so wrapped in matter that they are being led to death. This Awareness indicates when they approach death, if this is gradual enough, they begin to allow their fantasies freedom and move into those other realms and begin creating a world in the anti-matter side, in the land of the imagination and, in this manner, begin to pass over.

This Awareness indicates that occasionally in their efforts to pass over, someone on the other side decides to abort this entry into the land of the imagination, into that which is beyond death's door, and the entity is sent back into this plane to continue to live a longer life on this plane.

This Awareness indicates likewise, entities who seek to enter into this plane and are aborted, then move back into the other plane to finish living their life there for a certain length of time.

This Awareness indicates that the tragedy involved in abortion is not so much the depriving of life, because life cannot be deprived between one plane or another: the tragedy is in the attitudes of the entities who do the aborting, whereby they can be so calloused as to assume that the entity is but an object rather than a god, a human being, a form of deity as great and as valuable as they themselves.

Q. Well, it was always my understanding that there had to be an agreement on all levels, of both the mother of this incoming entity and the entity coming in. Now, if this agreement had not been made, would it not be a violation on the part of the entity coming in, and therefore justify the mother aborting it, if circumstances....(Awareness interrupts)

A. This Awareness indicates that at the time any entity seeks to enter, there is always an agreement or the entity would not be able to enter into that doorway. Either the door is left open accidentally, the door is left open through negligence, or the door is left open without any consideration as to who comes in or whether anyone comes in at all. And in leaving the door open, there is the agreement.

This Awareness indicates that wherein an entity enters into your home because your door is left open and inviting that entity, do you have the right to slay that entity for violating your home?

This Awareness suggests that once an entity enters due to your negligence or invitation, it is up to you to relate to that entity in a manner that does not violate the entity, but does either ask the entity to leave your life, your home voluntarily, or allows the entity to stay under certain conditions.

This Awareness indicates that entities can, if they desire, rather than consciously slay the guest, entities can wish them to death.

Q. Does this create karma on the entity wishing them to death?

A. This Awareness indicates this in the affirmative, to the degree of the violation, whatever that violation may be.

This Awareness indicates that a violation by one who negligently leaves the door open, or the one who consciously entices by opening the door constantly and carelessly, and under such seductive influences and attitudes as would surely bring someone in, then consciously and violently rejecting; this kind of violation brings on greater karma than the one who negligently allowed someone to enter and with much regret and sorrow felt forced to ask to have the entity removed.

This Awareness suggests the sensitivity felt toward the entity as that which alleviates much of the karma. The hostility sent toward that entity with the attitude of 'get it out of here' is that which can bring on greater karma.

This Awareness indicates the alleviation of karma is through responsibility and communication. But wherein one is irresponsible, then communication with that entity who enters into your home must be such that the entity does not feel great hostility at being rejected.

Q. Could Awareness explain a little further about allowing the entity to stay "under certain conditions" mentioned?

A. This relating unto forming your lifestyle wherein this entity can enter and share your life with you. This Awareness indicates that many mothers allow their children to enter without condition, and in due course find themselves having no life of their own and their children being the dominating force in their life, and themselves simply responding and reacting to the commands of the child; the cries, the tantrums, the moods, the demands. This is likened unto being so foolish that you not only allow the door to be open to invite the stranger, but you also allow the stranger to enter and take over your house, and perhaps even eventually eject you from your life and have the stranger taking over all that you held sacred, and simply flaunting it as an inheritance of no value.

This Awareness suggests that in allowing entities into your home, you may bring forth certain rules, certain regulations, certain conditions which can create the space for them to be and not hinder your own space for you to be.

CONCERNING ARTHRITIS:  
ITS CAUSES AND ITS CURES

Q. E.M. Writes: "During the past three years, a healer has been treating me for arthritis. Physically, there has been no noticeable improvement. Will continuing the treatments result in a complete cure in the near future? If not, will Awareness please give information and suggestions to cure my crippled body?"

A. This Awareness indicates there has been much information given on arthritis: that celery juice and carrot juice used over a long period of time, in quantities of one to two quarts daily for a period of not less than three months, as that which has great benefit in alleviating the deposits which bring about the problems leading to arthritis.

That apple cider vinegar is also that which is beneficial; that acupuncture can be beneficial, wherein this is used properly; that acupressure is another similar treatment. Sauna baths can give relief. Heat lamps can assist. Fasting, using the seven-day diet, can be beneficial. (ED'S NOTE: See Revelations of Awareness, "A Diet to Increase Your Awareness").

There is also a doctor in Texas who has perfected a system using hormone shots. This may be explored through your local A.M.A....that there are also certain herbal

combinations which can be of great benefit. These may be explored through Mary Farrel of the Aquarian Church, through Dr. Christopher in Provo, Utah at the Herb Shop; through certain books on herbs which are available at local libraries or book stores.

This Awareness indicates that also a system using sonics shall be eventually perfected, and this shall be that which brings total relief to this area. This Awareness indicates, however, this as some time in the future.

This Awareness suggests that the popping of the fingers, toes, neck, vertebrae in the spine; these as being beneficial in avoiding those energy blocks which can lead to arthritis; that massages are beneficial.

This Awareness suggests that the attitude itself is that which is the greatest cause of arthritis. This attitude as that which is one brought on by circumstances whereby an entity is constantly subjected to a barrage of negative energies, criticisms, complaints, directions, orders, frustrating situations, dilemmas, and over a long period of time these energies begin to create tensions within the body at certain points, and these tensions begin to draw in calcium deposits or other chemical wastes which accumulate in the area where these tensions are. These tensions then begin to become even more inflexible, with more difficulty increasing the longer they remain.

This Awareness indicates that wherein an entity is in a situation which is chronically negative, the danger of arthritis increases. That wherein an entity is in such a situation, the entity cannot simply ignore the negative forces, for these negative energies will pass through without the filtering process of the conscious mind. This Awareness indicates that if an entity is conscious of the negative influences coming at one, the entity can filter these out, not by resisting them, but by simply canceling them out, negating by simply saying to oneself, "this is ridiculous; this is not so; this I will not accept". This Awareness indicates that as these negative forces move in toward the entity and the entity consciously filters them out, the energies cannot build up in the system.

However, wherein an entity is being constantly and chronically fed negative suggestions or complaints, or forces of that nature, and the entity decides he cannot listen any more, or wherein the entity feels he cannot stand to pay further attention to that voice or that force or that situation, then there is a shutdown of the filtering plant, and the forces move right on through into the subconscious levels of the entity and begin to build up on the cells. And these build-ups of these energies then bring about the feeding ground for the elements that make up the arthritis. This may be likened unto a ship which sits under the water for such a long period of time that barnacles and all kinds of other wastes and scum begin to build up on that ship until its form is no longer recognizable.

This Awareness indicates that there can be a cleansing, either through the filtering action of the conscious mind which looks deeply at these collected frustrations and negative feelings, or through certain diet, fastings, through certain chemical scrapings, through the acupressure or acupuncture actions, which may be likened unto certain storms upon the waters above this ship which can loosen these barnacles.

This Awareness suggests that there are many ways of freeing yourself from these collected intensities, these negative fields. But that the first and most important action is that of filtering out those negative forces by consciously looking deeply at them within your own psyche and recognizing what those negative suggestions, complaints, sounds and feelings were that got through which caused you to become so painfully locked into your corners.

THE DIFFERENCE BETWEEN "D" CELL WATER  
AND PYRAMID ENERGY-CHARGED WATER

Q. What difference in benefits is obtained from drinking "D" Cell water as opposed to pyramid energy-charged water?

A. This Awareness indicates that the D Cell water is that which contains a solar energy which has come into being through sunlight. This as an entity of a spiritual nature: this being anti-matter, or spirit, in a small form with a life of its own, whose ability is such that it can negate and eliminate poisons, fluorides and chemicals within the water and within the system of the entity using this; and also gives vitality and anti-matter, or spirit, to the user, whether this user be plant, animal or human.

This Awareness indicates that the pyramid energy is that which may be associated with as the Odic Force, or Orgone energy: this as more closely related unto a kind of psychic energy rather than spiritual energy: The difference being the psychic energy does hold like a magnetic field and does collect certain electrons and ions, whereas the D Cell energy does radiate and rejuvenate the life systems, the biological systems.

This Awareness indicates the pyramid energy may preserve forms which have little life within them by collecting ions and electrons in a manner that preserves these energies by coating these energies with electrons and ions, preserving the form. But the D Cell energy preserves, not so much the form, as it increases the life force and vitality of the creature by placing within each cell a miniature sun, or solar force, which allows that cell to rejuvenate and grow.

This Awareness indicates the "S" Cell is capable of taking these cells which are polluted or ill, preparing to die and decay; the "S" Cell can reverse the action of the life force and move that back into a harmony which then can be enhanced by use of the D cell for increasing the vitality.

This Awareness indicates the pyramid energy can be used for drawing out certain forces from the physical body. In this manner the pyramid energy may be used to pull ions and electrons from a certain area and rearrange them in another area that is in balance and conducive to harmony. That the action of the pyramid energy is not such that it actually creates a greater amount of anti-matter, or spirit, but rather it rearranges the molecular, the electron and ion formations within the object.

\*\*\*\*\*

(EDITOR'S NOTE: In the past, Awareness gave us much information on "D" and "S" Cells, thru the channel of David Worcester. "D" Cells are magic, and when placed in jugs of drinking water and drunk daily, help to raise the consciousness and maintain psychic balances etc. It keeps the drinker healthier and it automatically removes any pollutants that may be in the water. It has been called "Holy Water" by some & greatly aids in healing. Once you drink "D CELL" water, you will probably never drink any other kind. They are also used in gas tanks of cars and for a variety of other uses. "S CELLS" are placed in small amounts of water and are used when "the temperature of consciousness" gets too heavy, when cancer and other severe illnesses of a psychic nature occur. C.A.C. does offer "D CELLS" and "S CELLS" to the membership and prices and some information is available upon request. For an in-depths study of these, a booklet titled "D CELLS" is available for \$3 from C.A.C. (This because of a limited number left and we have to Xerox them until time permits a reprint).

However, prices of the "D" and "S" Cells and limited info on how to use them is available at no charge to C.A.C. members.

CONCERNING THE RAISING  
AND DEVELOPMENT OF CHILDREN

Question:

C.A.C. member, N.J. writes: "Your communications are shattering. I eagerly await the mail that contains a CAC envelope. I would like to ask Awareness for suggestions on how to better handle the development of the children, or if it is time for me to change to another goal. And, if so, what suggestions could Awareness make"?

Cosmic Awareness:

This Awareness indicates the coming Correspondence Lessons will contain much information relating unto this situation. This Awareness indicates that in the meantime, that you consider the action of building a good self-image for each of the children, for no entity can perform properly without a good self-image.

This Awareness suggests that wherein self-image is rewarded for performance, that this as likened unto putting the horse before the cart. This Awareness suggests that you assist the child in performing best by assisting the child in feeling good about him or her self. This Awareness suggests that in order to do this you must give encouragement, you must compliment the child, even on the little things, and must temporarily ignore performance if it is not up to par.

This Awareness indicates that as the child begins to realize that you do care for him, or for her, while they are in their present stage of behavior, the child then begins to feel that he or she is worthwhile. This Awareness indicates that at that point, after the child has a feeling of self-worth, reinforcing this self-worth by compliments in relation to those actions which are of a positive and worthwhile nature, will assist that child in bringing out those qualities; that a caution in regards to negative behavior may be given in terms of how you feel about that type of behavior, rather than in terms of making the child feel bad, or in error.

This Awareness suggests you not associate the child with his or her behavior, for the child is not his behavior. The child simply is one who behaves, and the behavior is not necessarily the child. This Awareness suggests this distinction must be made also with the child, that he or she is not his or her performance level. This Awareness suggests that you let the child feel good about being who he or she is and discuss the performance as though you were discussing a role being played by an actor or actress on a stage called 'life'; that you can then assist these entities in learning to play their roles so that they have greater applause from more people for these roles, and their performances. This Awareness indicates more shall be given on this in the coming Correspondence Lessons.

This Awareness suggests that the raising of your children, the work with children, is that which is blessed by this Awareness, for this does indeed assist in bringing about those entities who have come at a time which is crucial, and assisting through careful training, you may help to raise these entities with attitudes of good self-image which shall be beneficial to many throughout their future lifetimes.

This Awareness indicates that these children of this generation shall become those who bring forth the Age of Aquarius in its true meaning; and that wherein you can assist them in understanding the new ways so that they are not caught by old hostilities and concepts and negative feelings about themselves, so that they can understand self-respect, respect of others, and responsibility toward themselves and others, so that they understand freedom of expression, freedom to make freedom for others; whereby they understand co-creative concepts, these children then can grow into adults who can make wondrous changes upon this plane.

This Awareness suggests that you may do whatever you wish, but that the work with children as that which is of great noble value.

CONCERNING THE ASTRAL RESULTS  
OF SEXUAL EXCESS ON EARTH

Question:

C.A.C. member R.E.E. writes: "The Rosicrucian seer, Max Heindel, from claimed first-hand viewing of the etheric and astral planes, indicates that individuals who participate in sexual excess, either in unison with marriage mates or others, or solitarily, are punished severely, or at least undergo some purgation on the lowest astral planes in the afterlife, where they do die without having cleared this from their astral bodies. Will Awareness please comment on this at length", he requests.

Cosmic Awareness:

This Awareness indicates this as occurring wherein entities have great feelings of guilt about this action and violate those principles and morals which have been instilled within themselves.

This Awareness indicates this occurs, not because of the action, but because of the feelings of the entities whereby the entities feel it is necessary to purge themselves for their error. This Awareness indicates that this is error in attitude and has no cosmic error involved.

This Awareness suggests that entities who overindulge in sexual activities, who overindulge over long periods of time, can indeed weaken their aura and weaken certain forces within their endocrine system, which can allow the physical body to become somewhat distorted in future lifetimes, and the beauty of their body becomes somewhat diminished. This Awareness indicates that this does not necessarily imply that an ugly person has been involved in excessive sex. There are other actions which also can bring about distortions in the physical form.

This Awareness indicates that it does not necessarily imply that a person who is considered beautiful has abstained from any sexual activities. This Awareness indicates that what is being said here is that there is a certain value in allowing the kundalini forces to have a certain amount of strength in your physical form which can be used for strengthening other parts of your body: toning and firming up the muscles and flesh, rather than being emitted constantly as fast as is possible to build up this kundalini energy.

This Awareness suggests that entities who dwell on sexual activities for a short period of time in their life shall not necessarily be damaged by this action; but wherein an entity spends most of their lifetime being obsessed by sexual activity, that obsession and the excessive expression can have an effect upon the physical form of the entity. This Awareness indicates that it takes several lifetimes before this can be of great damage to the form of an entity, that many lifetimes of excessive sexual expression can lower and damage the self-image of an entity, and this is that which becomes most damaging.

This Awareness suggests that wherein an entity feels good about oneself and feels one is capable of giving service to others, the image is that which assists in attaining a good form

Question:

A follow-up question on that. "It is wise for individuals either to remain single lifelong, or to place very great stress on sexual exchanges in marriage. In other words, says Mr. E., is the sophrosyne, the golden mien of the ancients, the most desirable course for the overall growth of individuals at this time"?

Cosmic Awareness:

This Awareness indicates that it has been given that you walk the straight and narrow path. This Awareness indicates it has been given that you walk the razor's edge.

This Awareness suggests that this does not mean that you walk the path of absolute righteousness as opposed to absolute unrighteousness. This means that you walk the path of the medium, the middle way in all things, reconciling the "yes" and the "no" in those areas which are polarized.

This Awareness indicates that there is no great harm in entities stepping off the path, for in stepping off the path, one begins to realize where the path is. This Awareness indicates that if you are walking and it is dark, it is only by stepping off the path that you can be aware where the path is. This Awareness suggests that the important thing is to be aware of where the path is and be able to find your way back.

This Awareness indicates that there are instances wherein an entity may step off the path to communicate and to assist another who is lost or needing communication. This Awareness indicates that in straying from the path, it is important that you know how to return to that middle way, the golden mien, the reconciliation between "yes" and "no".

This Awareness does not chastise nor condemn nor judge any for wandering from home, for wandering from the middle path; for this Awareness suggests that it is through your errors and your mistakes that you learn, and that the important thing is for you to learn, rather than for you to become fanatical over being righteous. This Awareness does, however, caution you to be responsible for your actions and to be aware of the actions which can lead to responsibilities which you must face.

CONCERNING "YAHWEH"  
AND OTHER "MESSIAHS"

Question:

Member V.H. of Iron River, Wisconsin, sent in a letter and a newspaper called "Yahweh Power Report", which calls itself "the most important prophetic newspaper in America, the all-seeing eye." It is put out by Doctor Joseph Jeffers-Yahoshua, and she writes: "Dear Awareness: please comment on Dr. Joseph Jeffers, who claims to be the true son of Yahweh, the Messiah, also known as Yahoshua, who was known as Jesus 2000 years ago. He claims the true name of the our Creator is Yahweh, not God, and if we don't call Him by Yahweh, we will not be saved from what is to come in our world. He wants all to sell their possessions and move to Yahweh City in Missouri. He claims by doing this, when the time comes (he mentioned Feb. 1977) we will be taken out by space ships to a safe place, as so-called stated in the Bible. Jeffers also claims that there was no such person as Christ or Jesus; he was not crucified on the cross, but someone else was; that the Bible has been changed to suit the needs of the churches. Please explain, as many are confused about the True One returning in the final days. Thank you."

Cosmic Awareness:

This Awareness indicates that information has been given regarding this; that the pronunciation of Jehovah in the Hebrew language as that which is Yahweh. (Yod He Vah Heh). The four letters meaning: Fire, Water, Air, Earth. The meaning of Fire, Water, Air, Earth, being RADIANCE, MAGNETISM, RELATIONSHIP or MOVEMENT, and STABILITY. This Awareness indicates these are symbolic of the four creative forces in the Universe.

This Awareness indicates the name, Jesus, as Yod-He-Shin-Vod-He, Yod-heh-shin-vah-heh, or Yah-heh-shin-vav-heh), the Shin added in the middle, linking the Yah-He-Vah-He, Yah-Heh-Vod-Heh, or Yod-Heh-Vod-Heh, or Yod-Heh-Va-Heh back to Anti-Matter, or spirit. This Awareness indicates the name, Jesus, as symbolic of the mediator between the Spirit and the physical creation forces.

This Awareness indicates that the Yah-Heh-Va-Heh, or Jehovah, as being a Jewish name for the Creative Forces: this being a secret name used by the priests of the Jewish, the Hebrew language, using these terms for metaphysical understanding of Creative Forces. This Awareness indicates that the term, God, as that which came about through the Greek language, that Yod-Heh-Shin-Va-Heh, or the four qualities,

have to do with the forces which created, and continue to create, the material world.

This Awareness indicates that as to whether these forces are God is a matter of what you wish to term a God. This Awareness suggests that the entity as being the son of Yah-Heh-Va-Heh, or Yahweh, is in fact accurate, but that this claim may be made by any entity upon this plane, or any particle of matter: for all matter is the offspring of these four qualities, Yah-Heh-Shin-Vah-Heh, or Yah-Heh-Vah-Heh, if entities prefer to leave the Shin from the word. This Awareness indicates that the Shin is, in fact, the life-force and consciousness that links entities to the spirit. (EDITOR'S NOTE: these are phonetic renderings of these God-names; the spelling may be incorrect in some instances).

This Awareness indicates that an implication of being the offspring of Yah-Heh-Vah-Heh alone, without having the Shin involved, the Anti-Matter involved, would imply a dead body.

This Awareness indicates that any entity who follows this form of prophecy may be likened unto one who follows the dead teachings of the offspring of a dead piece of matter. This Awareness suggests that entities tune into their own inner Light and feel their own source of Divinity; that there shall be many who shall use these times of intensities to make a buck on those who are ready to follow the sales-pitch of one who can play the Messiah. This Awareness indicates there are many who would like to play the role of Messiah, that these entities are in need more of assistance than followers.

This Awareness suggests that entities not believe the prophecies based on negative energies, negative images of threats and doom, for entities have it within their own powers to image the creation of the next moment and to bring about the changes in this plane for harmony, peace, happiness and joy for all concerned; but wherein entities begin lending their voices, their attention, their energies to those who prophesy great doom, these entities acting in fear can only add to that image.

This Awareness indicates that wherein an entity offers a prediction, but offers no alternative as to what entities can do in terms of avoiding the catastrophe, and wherein that entity makes predictions which exclude others and create a following around about oneself, asking entities to sell their possessions and follow him or her: this entity should be looked at with great skepticism, for this kind of action has been going on for many years wherein entities sell their homes and sit on a mountain, waiting for the end of time.

This Awareness indicates that when, and if, the end of time comes, selling your home and following another to a mountain shall not save you any more than remaining where you are and being in harmony with yourself, with this Awareness, and with those round about you.

#### ARE WE MOVING INTO ANOTHER "ICE AGE"? A WEATHER REPORT

##### Question:

A recent C.I.A. report concluded the earth has entered an adverse period of weather that is already reducing food production and causing major economic problems throughout the world. They project that the world climate, which for several decades has been ideal for agriculture, is returning to conditions that existed from 1600 to 1850 (?), a period called a 'little ice age', characterized by lower temperatures, shorter growing seasons, and periods of famine. However, some climatologists dispute this: in fact, they say a definite world-wide warming trend is in sight, which could melt polar ice and raise the levels of oceans, and possibly inundate coastal cities. What is the truth about the current weather cycle, and are either or both of these schools of thought correct?

Cosmic Awareness:

This Awareness indicates that there is an action occurring at the present, wherein the polar shift, wherein the polarity upon the poles of the earth is such that a slight wobble is occurring, and there is also an effect within the aura of the earth whereby certain flux in the atmosphere is creating changes in the polarity of the aura: this relating unto the Van Allen Belt and the aurora borealis, the effects being such that weather is affected, consciousness is affected, the radio-activity in the atmosphere is affecting, as well as being affected by this.

This Awareness indicates that the general direction in terms of temperature as that which remain unstable for approximately three more years; after this, a warming shall occur.

This Awareness indicates that dampness and more precipitation shall occur during the next thirty years than during the previous thirty years.

This Awareness indicates that in terms of a mini ice-age, that this is unlikely; that the indications are other than this in the sense of large-scale weather changes. This Awareness indicates this as not indicating a great warming period; that there appears to be a stability in the weather conditions beginning approximately four to five years; that the temperatures will remain relatively similar to the previous thirty years.

WHAT HAPPENED TO ROCKEFELLER'S  
'ATTEMPT' TO TAKE OVER THE U.S.

Question:

J.T. of Glenwood Springs, Colo. writes: "I would like to know why Awareness's prediction for last summer about Rockefeller declaring an emergency and taking over didn't happen".

Cosmic Awareness:

This Awareness indicates that much attention was called to this potential action, that the effect of Watergate and the movement and manipulation relating unto that action, which was triggered by these forces, went further than these forces intended and almost got out of their control, exposing more than they desired.

This Awareness indicates that the ramifications of this continued to reverberate for many months, and the information given relating unto the potential take-over of the nation was spread among many circles of influential persons, and this had its effect on causing these forces to check themselves and draw back and to realize that they were not invulnerable to exposure.

This Awareness indicates that the danger of this action has greatly lessened, has been more or less put on the shelf for the time being until a new indication of success is found available for them.

This Awareness indicates that there is also going on in the psyche of these forces a relooking at their role, and they are beginning to re-evaluate their actions in light of the changes which are occurring in consciousness.

This Awareness indicates there is some indication that these entities may, before long, do an about-face and become involved in assisting to bring about a democratic world government, as indicated by this Awareness in previous messages wherein even the banking system is controlled by elected officials, and their world government is an extended version of democracy, spreading the liberties which the United States Constitution began 200 years ago. This Awareness suggests that entities wish to energize the participation of these entities into this kind of action wherein there can be that new freedom and liberty upon this plane.
