(THE PSYCHIC STORM):
HOW SHARING GROUP KARMA PREVENTED WORLD WAR III

(But Most Will Remember the Winter
of 1977 for Being so Cold)

(Paul Shockley)
Interpreter

Question: (From C.A.C. General Reading, April 1, 1977)

Awareness, we are here today for a general reading, current events and other questions sent in by the membership for C.A.C. Is there an opening message?

Cosmic Awareness:

This Awareness indicates that the psychic storm, which has been indicated in previous readings, has generally subsided.

That the intensities of this storm were shared and spread among the masses, rather than being focused into certain areas. That the sharing of this as that which eliminated much destruction that had otherwise been programmed to take place, particularly during the month of March.

This Awareness indicates that in a reading approximately 18 months ago this Awareness indicated the possibility of World War III beginning during this month.

This Awareness indicates that the changes which occurred in consciousness between that time and this present time as that which did bring enough levitation in terms of concepts, attitudes, values, that this did not receive the focus, the desirability and the force which would have been necessary to bring this off.

This Awareness indicates that the energy, however, was still there, and the possibility of this was still present, particularly if the focus on this had remained and did not move into other areas.

This Awareness indicates that the weather patterns, the personal involvements, the relationships that entities had with one another, wherein difficulties were experienced and resolved in various ways: these actions all participated in spreading the energy among the masses so that this energy was not able to become focused toward this particular action which had been planned in creating the World War III nuclear war.

This Awareness indicates that this diffusion of this event began last summer during the presidential campaigns, and was continually weakened and diffused up to the time, yet the energy on this was still present.

This Awareness indicates that you may understand this more clearly if this is put into the reference of karma: that it is possible for entities to share the karma, to take on karma for others.

This Awareness indicates that approximately three years ago, many entities working in high levels of spiritual development, in high levels of spiritual responsibility, did experience great stress. This stress being that which was placed

upon them by certain inner forces as an action of sharing earth karma, this being likened unto a gamble by these forces, with the hope that these entities would be able to take on certain amount of this karma and work it off in a manner that allowed its diffusion.

This Awareness indicates that most of the light groups and their responsible persons, members, may recall the kinds of stress which they felt during the period two to three years back, particularly in the fall of 1975.

This Awareness indicates that the psychic storm mentioned between December and the present time as that which is similar, except that the earth karma was being shared, not just by the entities who are capable of working in high responsibilities of spiritual energies and light groups, but by other entities who have experienced little more than mere materialistic values, and all those in between.

This Awareness indicates the masses around the world were experiencing these difficulties in an action and to a degree that each individual upon this plane did, in some way, take on a portion of the earth's karma. That this now has basically subsided to the degree that the intensities shall be lessened, and the possibility of shifting into new levels of greater freedom and relationship, greater harmony, and more efficiency in living conditions as now on the horizon for most entities.

This Awareness indicates that this will be felt especially beginning in July. That the coming two years shall bring many great benefits to entities, regardless of certain forces at work which might attempt to move situations in other directions.

This Awareness indicates that such forces shall find that their actions of manipulating masses in a manner that is not beneficial to the masses shall only bring back upon them their own rewards of negativity for their negative motivation.

This Awareness indicates that in general, the actions from the time these readings reach the general public, the membership, the actions shall be such that entities shall begin feeling greater ease in their life and living conditions: that more of a spiritual awakening shall be felt on all levels.

THE NATURE OF COSMIC AWARENESS

(Ralph Duby, Interpreter)

This Awareness does not have eyes, yet sees all things;
this Awareness does not have hands or fingers, yet touches all;

This Awareness does not have ears or nose,
yet hears all things and senses all odors.

Indicated that this Awareness does not have a mouth,
yet knows the taste of all things.

Indicated that this Awareness does not use the force of mind,
does not have emotion, does not have that sense that you understand as feelings;
for all these this Awareness does not use.

Indicated to all those who are Organization of Awareness ministers,
that this Awareness has begun to teach you, and that you shall be taught well.

It is asked that you remember this message.

HOW THE NEW WAVE OF ANTI-MATTER ENERGY
CAN EFFECT PERSONAL RELATIONSHIPS
(Excerpt from a reading 12/23/1976)

Question:

My friend, Bill, is willing to help me in many ways. But he is very possessive and jealous of my other interests and unable to understand my need for privacy and continence. What is my obligation to him? Should I break with him completely?

Cosmic Awareness:

This Awareness indicates that there is coming upon this plane a great wave of anti-matter energy; this anti-matter energy is that which is likened unto the kundalini forces: This as likened unto a high vibratory energy which does begin to break down physical matter. That this energy as also such that it shall create upon this plane a greater amount of Akasha and Spirit for entities to work with. This energy shall either be used for entities to tune into and merge with by surrendering unto this energy, or entities may utilize this energy for personal power and control and to intensify their own confusions, concepts, problems, and beliefs in such a manner that they can exert greater emotional control over certain other entities for a brief time.

This Awareness indicates wherein this latter action is used, entities shall simply burn themselves out, likened unto an electric element which has received too great a charge. For these elements must either allow the energy to pass on through, through non-resistance, or they shall be burned out. This Awareness indicates the energy you are hoping to save through your action of continence as that which shall be slight in comparison to the energy which shall be moving in on this plane. This Awareness indicates that you may continue this as you desire, yet there is also that opportunity for relationship with others through opening up and surrendering to the love and affection which comes with this energy of these higher vibrations.

This Awareness suggests this as approximately seventeen or eighteen months away whereby this energy does reach its peak. This Awareness indicates that following this peaking out period, the energy will move in a more gradual increase from that time on. Between now and seventeen or eighteen months from now this energy shall multiply itself rapidly on this plane.

This Awareness indicates there shall be that opportunity for entities to become closely acquainted with one another on many levels. That following this, and during this increase of energy, there will be great difficulties for any entity who attempts to maintain a separateness or achieve a personal power over any others through the act of separateness or control.

This Awareness suggests the path of least resistance as the path of higher awareness; that the pineal chakra relates unto power and control of others and over self. That the opening up and allowing the pituitary to open creates that opportunity whereby entities may enter the doorway to wherein the messenger within does control the God of the Macrocosm. This Awareness indicates that this occurs not through effort but through surrender.

This Awareness suggests there is the surrender unto God, unto the Essence, unto What Is. That this as that which this Awareness indicates, rather than surrendering unto the will of other entities: that you need only surrender unto the light within.

HOW TO PLACE ASIDE MIND, EMOTION, & FEELING

Question:

How can I place aside mind, emotion and feeling when the influence of everyday pressures make such a task almost impossible?

Cosmic Awareness:

This Awareness indicates that you may find a few moments a day wherein you move into your room and lie down. That in placing your hands to your forehead, fingertips to the forehead above the eyes, touching the forehead and considering that which is

mind, wherein you allow everything that has been on your mind, everything that has thought and concept and idea and word attachment to enter into your hand, into your fingers and then gently, through feeling, feeling these things entering your fingers, place them down beside your thighs. Then raise your hands again to your forehead, and if you have not yet placed aside all thoughts, all concerns, you repeat this action. That this be done three times if necessary.

Following this, you do the same with emotion. All actions which have had an emotional influence on you throughout the day or week which have some concerns with your emotions up to this time, be placed in your fingertips and laid down to your sides. That this be done three times if necessary.

That this again be repeated with feeling, wherein you listen to all the sounds and activities around you, then realize they would continue to exist without your concern. This Awareness indicates that one hundred years ago there were sounds and actions that existed and you were not there to do anything about them, or to be concerned about them. In this same manner, you look at the present-day sounds and actions and realize for a moment you can place aside your concern for them. In this manner you allow that concern for feelings to be placed into your fingertips and laid down beside you. At anytime, you may pick this up. In doing this exercise, for even a few moments a day, you will find that moment widening into larger and larger spaces. In this manner, the space not only widens, but begins spilling over into other areas of your life so that the pressures begin to become influenced by the coloring of this space; that the pressures then become less intense.

L.M. "THE WITCHITA LINEMAN" FOR COSMIC AWARENESS

Question:

Would Awareness indicate the significance of the work I have been doing for the last six months? (ED'S NOTE: Contacting old Organization of Awareness members)

Cosmic Awareness:

This Awareness indicates that you are one who has been moving into those areas of contact which have been making connections between the severed parts of the light which this Awareness has introduced and which has been scattered throughout the various sections of the country. You may see yourself as likened unto the lineman who does connect back up the wires which were blown out by overexcessive voltage power.

This Awareness indicates that the energy which has been introduced through the information which has come through Ralph Doby and others as that which did blow out many people and their ability to handle such heavy energy. These entities did need time for cooling off and relaxing and letting some of this energy discharge. In this discharge the energy did spread out from them and into other areas of consciousness. Many of these entities are now discharged and are ready to begin filling themselves again. This may be likened unto capacitors in the electronics field. These capacitors are now those whom you have been contacting and whom you are in touch with and are making the re-connections of wirings.

AN EXERCISE FOR THOSE WHO FEAR THE UNKNOWN

Question:

How can I learn to worry less about the unknown?

Cosmic Awareness:

This Awareness indicates that it is the known which is the problem. That the known does create the trap which does give the appearance of security.

Visualize yourself in a dungeon held by shackles. Across from you, on the wall, is

a spot of light that has been there for as long as you can remember. In this image, visualize this spot of light as always being there, and the only thing visible in this dungeon. This Awareness indicates that you imagine years and years of observation of this light. This is the known. This spot of light is that which you know and which you are identified with, and this is the only world you have: the spot of light and the shackles in the dungeon. Visualize someone who then comes in and opens a door, creating a large light opening. The fear which would run through you with this new opening was as likened unto that which is stepping into the unknown. The known, which was this tiny spot of light which has had you hypnotized for years, as that which is the appearance of security.

Security and bondage and bonds are all the same; freedom is that which does take you out from security.

Entities constantly struggle for freedom and constantly struggle for security and that there is a balance between these two, wherein there is an insecurity that is acceptable and gives freedom.

This Awareness indicates that you are now being uprooted from your foundation and placed into those areas of walking into the holy ground, the world of the unknown, wherein you will have to create your world as you step. Look at the "Fool" card in the Tarot stepping from the cliff, realizing that, as he steps, the ground appears under him and he will not fall. Yours is the same case: that you are capable of walking through many lifetimes, but that there is nothing that can destroy you. This Awareness indicates that in being able to accept the unknown without fear, the sharpness of changes do begin to diminish so that you are capable of moving into greater and greater unknown areas and functioning in poise and calmness.

A SPIRITUAL HEALING FOR
A WHEEL CHAIR PATIENT

Question:

(A long letter from a friend of a man who has been confined to a wheel chair most of his life, and who has written to other psychic healers but without results). "It is just because of such meager lack of results in the past, that makes me suggest you question Awareness before-hand to see if It would consider such a difficult healing..."

Cosmic Awareness:

This Awareness indicates there now be a pause....That the action of healing any entity is as difficult as that entity and those around say it is.

This Awareness indicates that from a higher level any action of healing becomes a simple matter when it is allowed and accepted.

This Awareness suggests that you visualize seeing yourself directly before an entity who is very ill and very weak; that as this closeness and proximity of relationship conveys certain images of illness and weakness to you, and as this description is given to you, the task is somewhat difficult due to these descriptions and identifications. This Awareness suggests that you begin to practice mentally moving 5,000 feet upward, and from there to look down at that ill and weak entity who now appears as a small speck on the earth plane. That from this distance you send your love, your attention, and your energy toward this small speck, and you now visualize the possibility of this small speck rising in perfect health, perfect balance and harmony though you have been told this small speck was hopelessly invalid.

This Awareness indicates from the distance, from the distance away from the action, the image becomes easier to hold: and in imaging this small speck rising in health, you may move upward in your identification, look down and see your small body-speck and may image it clearly, whereby a healing is imaged. This Awareness indicates that such imaging does heal, and such is now being imaged whereby this entity's body does begin making those repairs to allow him to rise from his bed. This Awareness moves now into

into cells, those tissues, those vertebrae, those atoms that are vibrating in a certain time and space in this universe with which this entity has identified himself and has moved into. This Awareness indicates these atoms are totally flexible and changeable, according to your will and the will of this Awareness, for this Awareness does contain within Itself all that is, and this does also include that which is the vibrating atoms of this entity's physical body. This Awareness wills you to be well. This Awareness indicates that these now are being moved in this vibration through the action of attitude which is changing, and that these energies are being aligned in a manner that is bringing about the harmony and help and revitalization of this body.

This Awareness indicates that the entity does understand that he is not this body, but that he is an entity who is channeling himself through that body, and is experiencing the captivity of being within a body which has been somewhat inactive. This Awareness indicates that now it is possible for this entity to move on from this karmic action to another action, for the remorse and the lessons which needed to be learned while inhabiting this body as paralyzed and immovable, as that which has served its purpose and need no longer be binding upon this entity.

This Awareness indicates that this entity shall now begin imaging himself traveling from place to place, imaging the body and its feeling as it moves in various actions, moving various parts. That this be imaged on the energy level as well as on the experiential level. This Awareness indicates that this entity is capable of rising: that you may take up your bed and walk whenever you will to do so.

(Closing Message):

This Awareness indicates that the energy of seeing this entity in movement and experiencing the action of moving about in a normal lifestyle; that this image and this energy as that which must overcome all of those other images which did define and visualize the entity lying paralyzed and unable to move. This Awareness indicates that this as that which is related unto the Law of Description whereby entities who define and describe another entity's illness do help to confine that entity to that state of being. This Awareness indicates that wherein the definition can be changed and the consciousness of many entities together may visualize and see that entity changing and expanding his action, that this is that which does help immensely. This Awareness indicates It has sent that healing which was necessary in overcoming all those thousands of images which held this entity very fast; that this shall begin having its effect from this moment on and shall grow stronger daily.

HOW TO OVERCOME "NEGATIVE" ENERGIES

Question:

"Your literature is saving my life, thank you. However, I am in trouble and I'm having a hard time. I am drowning in an unexplained existence. Please ask Awareness how to reverse negative energies that are taking me under."

Cosmic Awareness:

This Awareness indicates that no energies are negative except by your judgement of them. That there are certain forces which can be in opposition to your wishes, and these are generally referred to as negative. This Awareness indicates that resistance to these forces gives greater strength to them.

This Awareness indicates that you cannot surrender to the forces of opposition without difficulty, and you cannot resist the forces of opposition without creating greater forces; but that you can tune yourself to the will of God, or to levels of Awareness and surrender yourself to the divine forces.

This Awareness indicates the path of least resistance is the surrender to the forces of the Divine, not to the forces of opposition to you, but to the forces of the Divine. This Awareness indicates that wherein you surrender your own will to those forces which oppose you, that this is likened unto being a force which you might term positive, and surrendering unto the force which you might term negative, for the opposing force is seen as negative. This Awareness suggests that this is purely personal interpretation of the forces. This Awareness suggests that you surrender yourself unto that which is

Divine is that which benefits all involved, and does not separate, condemn or exclude any.

This Awareness indicates that in the action of surrendering to the Divine Forces, the act of surrender may require that you stand up and stand firm for the forces of the Divine, for the forces which creates good for all involved.

This Awareness indicates that surrender does not mean to lie down and give up, but to surrender your personal will to that which is the Divine Will of the Law of One.

A PEEK AT CARLOS CASTANEDA

Question:

K.D. of Tampa, Fla. would like to know if the book, Tales of Power, by Carlos Castaneda which regards sorcery, if this book and his others* contain beneficial information in light of the New Age teachings?

Cosmic Awareness:

This Awareness indicates this may be referred to as a "turn-on" book, which turns entities on to certain levels of thinking in terms of fourth dimensional concepts. This Awareness indicates the material within this book as not entirely accurate; that this as a cross between fact and fiction: but the general effect of the book as beneficial in the sense that it expands consciousness into looking at other ways of viewing reality.

* A Separate Reality; Journey to Ixtlan; Teachings of Don Juan; Tales of Power.
(Available in paperback on newstands or thru CAC)

IS REINCARNATION MENTIONED IN THE BIBLE? (ONE OF THE WORST VIOLATIONS IS NOW REVEALED)

Question:

D.G. of Wallowa, California, asks a question on reincarnation. She wonders why the entity, Jesus, never preached of reincarnation, but only of the entrance to the Kingdom of Heaven, and she wonders why most of the spiritual groups she knows of (The Church of Light, she mentions in California), do not teach of reincarnation. They teach man only progresses on to higher realms and does not regress to live out further lifetimes on earth, and she asks: "Would Cosmic Awareness please comment on this?"

Cosmic Awareness:

This Awareness indicates the entity, Jesus, did speak of reincarnation in several places. That the entity did speak in the sense of parables, that in one instance the entity stated: "You must be born again".

This Awareness indicates this as having double meaning, wherein the entity referred to a transformation within, yet the entity also as referring to reincarnation.

This Awareness indicates the entity also was mistaken for another, whereby he stated: "Elias has come and is John the Baptist". This Awareness indicates this as a reference to John the Baptist being a reincarnation of Elias.

This Awareness indicates that there were many other references to reincarnation through the text and teachings of Jesus. That the emperor, Justintine, did have these references to reincarnation taken from the Bible at the Niocene Council during the 5th Century. These references being removed for purposes of causing the followers of the Christian religion to put forth more effort in their spiritual devotion as demanded by the church. This Awareness indicates this as becoming that which may be termed a tool for greater control, for greater psychological control over the consciousness of the followers of the church.

This Awareness indicates that wherein entities believed they have only one chance to make it, then the priests in power could cause those entities to behave in a manner as dictated. That this as a form of behavioral management, or modification of behavior, through the threats of heaven and hell, by removing the concepts of reincarnation: life after death, other than a life of heaven or a life of hell.

This Awareness indicates this as a major hoax, and one of the great violations brought about through the manipulation of spiritual teachings by those priestcraft rulers who sought power through spiritual controls.

CONCERNING A DREAM ABOUT THE CRUCIFIXION OF JESUS CHRIST

Question:

I had a dream one night which seemed to be the judgement and death of Jesus Christ. It was a very beautiful dream and just before I awoke, there were many entities standing around, and they said that I should remember this dream. I think these entities planted a movie in my mind because it was not an ordinary dream. I would like to know the meaning of this dream.

Cosmic Awareness:

This Awareness suggests that this as that related unto a memory. The entities within your dream were those certain aspects of a group of entities who you were with during the time of the crucifixion.

This Awareness indicates that these entities in your dream did come from the deeper regions of your memory and from that which is the reflective beings on the inner plane. This Awareness suggests these beings from the inner plane and the memory of your previous incarnation being moved from memory levels as those who are the same entities moving through time and space on these levels to bring this memory and message to you. The experience and the memory of that experience was necessary in reopening a chakra that was tending to close. This as related unto the pineal, which is opening even more at the present time as this interpretation is being given.

This Awareness suggests you understand the crucifixion relates unto the movement of the energies through the medulla oblongata, or the hill of golgotha, into that which is the pineal. The pineal, being the ego or the magician and the great identity of self, the serpent arising to the top of the spine, the serpent of wisdom. This is the movement toward the Christ and toward the Lucifer, this toward the bright and shining being of individuality, whether this be a particular version of Christ or of Lucifer.

This Awareness indicates these two as reflections of each other in polarity of oppositions. This Awareness indicates wherein this version of Christ and the Lucifer do move into that which is an awareness beyond their own glorification, this becomes the crucifixion or the loss of ego; this becomes the resurrected Christ, crystal, or Christ consciousness, whereby one ceases to be an entity and an individual within a body; and instead, becomes as the living universe expressing that universal viewpoint through an instrument called a human being.

This Awareness indicates that when your ego is placed aside, you then become attuned to, atoned or at-one with this Awareness and find yourself being likened unto a television set which is constantly channeling. Then your choice is not what you want to watch or experience, but rather what kind of program you will channel: whether this be scattered energies, static, violence, or those qualities which present the kind of shows that are possible by those who dwell in that kingdom of heaven within their lives. This channeling directs you as a living, walking projector of movies, created in this heavenly dimension for the presentation and enjoyment of those on the physical dimension.

Revelations of Awareness is a cosmic newsletter published by Cosmic Awareness Communications,
