A MESSAGE TO MUSICIANS FROM COSMIC AWARENESS

(Paul Shockley, Trance-Interpreter)

Question:

J.K. of Vernon, Connecticut writes: "I have a question for Awareness, I have noticed increasingly deeper and deeper levels of meaning and truth in the lyrics to contemporary songs I hear on the radio. I pay more attention now to songs than ever before and I know music increases the vibrations. Is this due to the increase in awareness of those who create the music and lyrics, and would Awareness comment on how this effects the general public?"

Cosmic Awareness:

This Awareness indicates that the majority of fine musicians and artists are attuned to higher spiritual forces. This Awareness indicates that many of these entities, by their nature, are capable of tuning into higher forces of vibration and music, yet there are certain problems which these entities have not resolved, and many of these entities become fixated on lower levels of consciousness, not having yet evolved beyond certain stages of development.

This Awareness indicates that in these instances such entities write and become involved in art and music which is of a somewhat degraded nature. This Awareness indicates that even this is in the will of Awareness, for such entities tune into those levels of degradation and do, to some extent, lift others.

This Awareness indicates that the danger here is that these entities also present an opportunity for those who are above this level to be dragged down to a degraded nature.

This Awareness indicates that even this is no great problem, for those entities who are dragged down that easily need to work out certain karmic problems and deeper understanding so that they are not easily influenced by such degraded levels.

This Awareness suggests that each level of development has its level of expression, that music expresses these levels: That wherein entities are seen as climbing the ladder to the higher spiritual levels, and some entities are dragged down to lower rungs, those entities are simply in a learning process, and may again begin climbing; that the opportunity is always available for entities to rise or fall according to their level of awareness.

This Awareness suggests that those who have the wisdom and understanding to use that music, to listen with their ears, with their soul, with their feelings, and with their spirit, to those finer notes, those musics that come from the etheric level, the sounds which are of the Universal Spheres, those vibrations and tones which are of an uplifting nature, those entities who attune to the highest and best shall find themselves rising on the scale and moving into higher spiritual vibrations where their reward becomes great on all levels.

Revelations of Awareness is a cosmic newsletter published by Cosmic Awareness Communications, P.O. Box 113, Olympia, Washington 98507. Please send your subscription orders to this address.

This Awareness wishes to caution entities about listening to words and music which drags their spirit downward, which causes them to feel sorry for themselves, or to become wrapped up in negative lamentations, but that entities instead, to listen to those musics and words, and the art expressions which lift their souls, which make them feel good about themselves and about others, and about their world, and allow them to feel happy to be alive.

This Awareness indicates that music which allows entities to feel compassion for others, lamentations that express truth, love and compassion, these also can be uplifting to the soul. But those lamentations, those expressions of sorrow which tend to make the entity identify with feelings of inadequacy, with feelings of loss that cannot be explained or fulfilled, with feelings of inferiority, such songs do intend and do have the effect of lowering one's self-esteem and causing one to sink in feelings of desperation and loss, which cannot easily be recovered.

This Awareness suggests that you look at music as though you were listening to a programmer attempting to program yourself, and that you ask yourself:

"Is this the programming that I want?"
