## THE UNIFIED STATES OF AWARENESS (Some Feed-Back on the Economics)

Paul Shockley  
Trance-Interpreter

(C.A.C. General Reading, Oct. 29, 1977)

### Question:

Awareness, we're here for a final reading, with some questions sent in by the membership and a few other questions. Does Awareness have an opening message?

### A PARABLE ON PLANTING SEEDS

#### Cosmic Awareness:

This Awareness wishes to give a parable for your consideration. This Awareness indicates there was once a king who realized that he was ill of health and unable to attend his people.

This Awareness suggests this king had two sons. That he called his sons to him and told them that there was much grain which could be used for planting.

This Awareness suggests this king explained carefully to the sons that the people of the land needed grain and seeds to plant their crops, but that these seeds and this grain which he had would not be sufficient to feed all of the people. The king suggested that the sons plant the seeds this year, harvest the crop and save all of the seeds available and that on the next year these seeds be distributed to the needy people of the kingdom.

This Awareness indicates that the sons, desiring to be obedient, wishing to do what they could, immediately set out on the task of planting the seeds. This Awareness suggests that one of the brothers seized upon the seeds, and with his servants, carried these seeds out into the fields and began sowing the seeds upon the earth, casting these seeds among weeds, upon rocks, and upon barren soil.

This Awareness indicates the other brother, frantically calling to his brother, suggesting that these seeds be held in abeyance while the soil is prepared for the planting. This Awareness indicates that a conflict arose between the brothers, for one wished the seeds to be planted and scattered quickly that the harvest might come soon, so that the future seeds might become available. The other, being concerned that the seeds be planted properly, given tender care, that the plants would grow and produce bountifully.

This Awareness indicates that in this conflict, the first brother won out and cast his seeds about in a manner whereby all the seeds available had been planted quickly. This Awareness indicates the other brother began tilling the soil, but found that there were few seeds left, for the majority of seeds had been taken and scattered about.

This Awareness indicates that when the seasons passed, weeds sprang up, but the harvest did not materialize, and the first brother realized that he had failed in his efforts.

This Awareness indicates that the second brother, planting what few seeds he had, was able to raise a small crop, and from this small crop then reaped a harvest which

equaled the amount of seeds which the brothers originally had. This Awareness indicates that on the second year, the brothers then began tilling the soil together, planting the seeds in good ground and attending this fertile garden, and reaped a bountiful crop.

This Awareness indicates in the harvest of this crop, the brothers reaped enough seeds that they could be spread among the kingdom, whereby all the people were given enough seed that they might grow their own.

This Awareness indicates that, however, during that delay, many people of the kingdom suffered needlessly.

This Awareness suggests that entities who come to this Awareness for seeds of wisdom, who scatter those seeds carelessly upon rocky soil, throughout weeded and barren lands, without concern as to where they fall, are wasteful of the seeds which this Awareness gives. This Awareness suggests that a seed well placed is a seed that produces.

#### IS THE NEW AGE GOVERNMENT COMMUNISTIC?

##### Question:

Thank you. Some members who read the information on the Unified States of Awareness are reluctant to join, they say, for fear that its ultimate goal is communistic in the economic and political sense as we know it. They fear that private enterprise, labor unions etc. would be eventually eliminated. Would Awareness please clarify the basic goals and motivations and so forth of the Unified States of Awareness so that entities may not get confused on these and other important factors?

##### Cosmic Awareness:

This Awareness suggests as has been indicated previously, that private enterprise shall continue under the Unified States of Awareness, that the purpose of the Unified States of Awareness is not to take over the lives of entities, but to give entities freedom whereby, through their own relationship and service to one another, they may be allowed that space and that opportunity to full expression of their human qualities.

This Awareness suggests that the Unified States of Awareness is not presented as a control organization, as a controlling type of government, but rather as one which governs the release of power to the people.

This Awareness suggests that the Unified States of Awareness does not have any control over the masses other than that control which the masses impose upon themselves through the rules which they, as individuals, select when they become involved in the Unified States of Awareness.

This Awareness suggests that if they do not wish to become involved, then the Unified States of Awareness has no effect upon them whatsoever other than the fact of its presence and possible influence on their attitudes.

This Awareness indicates that essentially the Unified States of Awareness is an anti-government organization that is not governing the affairs of man, but rather is governing the release of control and power over man.

This Awareness indicates that again and again and again this Awareness has indicated that the upper tiers can only advise and request from the tiers below. This Awareness indicates that if you feel threatened by advice or by requests, then there is something akin to paranoia in your consciousness that must be looked at by yourself.

This Awareness indicates that this Awareness does not demand, does not dictate, does not insist, but simply gives suggestions, gives indications and requests to entities. This Awareness indicates that this action as that which this Awareness is suggesting in the Unified States of Awareness; that this Awareness is requesting that entities consider this kind of program, consider this kind of activity as a form of governing that allows entities to govern themselves without power, control and authority hanging over their heads.

This Awareness suggests that entities who are looking for communists behind every rock will find communists behind every rock; that entities who wish to think this Awareness is a communist have that right; but this Awareness indicates that those entities have also something else that needs to be dealt with in their own consciousness.

This Awareness indicates that this Awareness is not concerned about communism, is not concerned about capitalism, is not concerned about your political situations. This Awareness is concerned only with the welfare of entities upon this plane. This Awareness is not concerned with the economics. This Awareness is not concerned with the religions. This Awareness is not concerned with the violence and wars per se, but is concerned with the welfare of individuals upon this plane; that the purposes of war, the purposes of economic movements, these are not the concern of this Awareness. What is of concern is the welfare of individuals upon this plane. This Awareness is not concerned with races, is not concerned with principles, is not concerned with morals, is not concerned with ideals. This Awareness is concerned with individuals and their welfare upon this plane. This Awareness wishes entities to understand this clearly, that there has been enough suffering in the name of race, religion, principles, ideals, communism, capitalism religions of various types, and the social codes, the economic codes and all of these other types of identifications which entities align themselves with: this Awareness wishes to transcend these identifications; that entities look at one another and see the Divinity behind the eyes of the other, and recognize the potential value and transcend the potential negative. That entities eliminate the suffering and accusations and judgments and hostility which is being hurled from entity to entity upon this plane.

This Awareness indicates there has been enough suffering and tragedy upon this plane in the name of fear.

This Awareness suggests that entities who are ready to look for something new, without fear, without paranoia, may have the discernment to recognize the value in what this Awareness is presenting; that those who do not may look in other directions and follow those false gods, those false principles, which set one nation against another, which set one ideal against another, which set one religion against another, which set one entity against another. That entities who wish to do this are of their own volition and this Awareness can only watch, wait, and sigh...for this Awareness has indicated there is world enough and time. This Awareness has watched this continue for eons of time, and this Awareness has eons of time in which it can wait for future generations to clarify their relationship with one another, if this generation cannot do so.

Question:

Thank you. In light of what Awareness just said, I don't think it's necessary to read the letter I have in my hand. This was sent to S.C. by an economist in Canada by the name of Marion L. S.C. got rather upset and sent the letter to the Interpreter. The points that she brought out in the letter aren't as significant, I personally believe, as she makes out, and so I'd just like to ask Awareness if it thinks any of the questions brought up in this letter should be asked?

Cosmic Awareness:

This Awareness suggests that this letter be addressed. That the questions this entity asked are the questions that many entities may ask also. This Awareness suggests there is a certain level of consciousness which looks, not to perceive, but to criticize, and looks not find value, but to find fault. This Awareness suggests that many entities have this kind of consciousness and that, therefore, this letter be read and the questions be addressed so that this may be cleared; that thereafter, letters of this type need not be considered for these readings.

Question:

Shall I read the entire letter?

Cosmic Awareness:

This Awareness suggests this in the affirmative. 3.

Question: Thank you. "Dear S. Thank you for your letter and enclosures which I read with interest. I have to say that the name, Unified States of Awareness turns me off. It sounds to me too much like the United States of America, and so gives me the feeling that it is another American institution that you are trying to impose on the world."

Cosmic Awareness:

This Awareness suggests that here is an example of criticism that rings of little discernment. This Awareness suggests that this as likened unto saying, "I once knew a girl named Maria Johnson and didn't like her. Therefore, why should I like a girl named Mary Jones, because the names are similar." This Awareness indicates this as likened unto saying, 'Maria Johnson may be promoting Mary Jones.'

Question: "I'm not saying it is that, but just that the name gives me that feeling."

Cosmic Awareness:

This Awareness suggests that you examine your feelings carefully to see these biases.

Question: "Then you add to it by putting in pictures of Washington and Jefferson and talking of the ideals of Life, Liberty, and the pursuit of happiness."

Cosmic Awareness:

This Awareness suggests that the material this Awareness gave did not have pictures of Jefferson, Madison, or others included. That the summary which Anthony Warren gave did have pictures of these entities. This Awareness suggests that these entities gave forth upon this plane a freedom which never existed before. These entities, 200 years ago, brought forth upon this plane the beginnings of Democracy in a manner that allowed many nations upon this plane to rise to levels whereby there has been great freedom in terms of economic growth, and in terms of personal freedoms. This Awareness indicates that what has occurred in recent times, in certain levels of corruption in the political sense within the United States, cannot be blamed upon the founders of this nation, Jefferson and Madison. This as likened unto blaming the grandfather for the sins of the grandchild.

This Awareness indicates it is not what the founding fathers did to this country. It is what occurred after the international banking system moved in and took over the monetary system of this nation that has corrupted its politics, corrupted its medical fields, corrupted its communication networks, and has corrupted the conscience and affairs of business.

Question: "To the hungry people of the world, the right to just stay alive may not mean much..."

Cosmic Awareness:

This Awareness suggests that this does mean something. This means something to this Awareness, and the tone of the letter implies that it does not. This Awareness wishes to clarify this point: that this is very important to this Awareness that entities not be made to suffer. That the very nature and purpose of the Unified States of Awareness is to give entities freedom to enjoy life.

This Awareness indicates that the action of objecting to freedom and liberty on grounds that an entity cannot eat freedom and liberty is bantering over words, and has nothing to do with what this Awareness has given. This Awareness indicates that Itself mentioned in a previous reading that entities cannot eat concepts, that food is necessary. This Awareness wishes entities to understand this; but this Awareness does not care to become involved in arguments over semantics when it is clearly explained by any entity who wishes to discern clearly rather than to find something to criticize.

Question: "...if they have to choose between liberty and food for their children, which will they choose? As to the pursuit of happiness, Maeterlinks, 'The Bluebird', shows

that you are more likely to find happiness if you don't pursue it."

Cosmic Awareness:

This Awareness indicates that it has been given by your founding fathers that entities deserve the right to life, liberty, and the pursuit of happiness. This Awareness asks this lady: Would you like your right to pursue happiness to be taken from you? This Awareness indicates are you advocating that the right to pursue happiness be taken from entities? This Awareness suggests that it may be true that entities can find happiness without pursuing happiness, can be happy without pursuing happiness, but the question is: Do you want that right to pursue happiness to be taken from you?

Question: "It seems that you are trying to be universal, but perhaps subconsciously, you still believe that the Americans are the chosen of God."

Cosmic Awareness:

This Awareness indicates this seems like an effort to project your own feelings into the situation. This Awareness suggests that the... This Awareness suggests that this sentence be read again.

Question: "It seems that you are trying to be universal, but perhaps subconsciously, you still believe that the Americans are the chosen of God."

Cosmic Awareness:

This Awareness indicates this as of some twisted and perverted thought-form. That the statement as being difficult to decipher in relation to what this Awareness has given. This Awareness suggests that as far as It is concerned, Americans are, indeed, the chosen of God. That likewise, Canadians are the chosen of God. That likewise, Europeans are the chosen of God. That likewise, the Chinese, Russians, blacks and all entities upon this earth are the chosen of God.

This Awareness suggests that, indeed, as far as It is concerned, ALL entities are the chosen of God, and in fact, ARE gods.

Question: "I am interested in the economic ideas which are similar, in some ways, to my complete contract cooperation enclosed, but I have certain criticisms. (1) Whether you have dollars or talents, you still have to consider comparative value. How will you do so?"

Cosmic Awareness:

This Awareness indicates this has been given. That indeed, there must be comparative value. That It has given this information previously.

Question:(2) "Ten percent of created money going to the bank seems to me very dangerous. It is one of the worst features of our present system that banks get so much power. That managers are to be elected will not make much difference. Our present politicians are elected."

Cosmic Awareness:

This Awareness indicates it has been given that this ten percent takes the place of the taxation. That the ten percent goes back to the people.

Question:(3) "Another bad feature of our present system is the overstress on trade, talking as if an increase in trade was always a good thing, regardless of what particular commodities are being exchanged. This ten percent on all trade that you suggest will continue this false idea."

Cosmic Awareness:

This Awareness indicates there is nothing in error about entities trading with one

Question:(4) "That the lower tiers shall determine the disbursement of funds and the budgeting after being advised by those on the upper tiers sounds democratic; but, in fact, would probably lead to a tradition of always accepting the advice, and therefore giving power to the upper tiers."

Cosmic Awareness:

This Awareness indicates there is a difference between giving advice and giving direction from a position of authority. There is a difference between granting your advisor power, or the advisor retaining a kind of power over you. This Awareness suggests that if entities grant their advisor power by constantly taking the advice and being so passive and thoughtless and without inner guidance that they feel it is necessary never to question the advice of those who offer their advice, then indeed these entities do not have control of their lives. This Awareness indicates it is not possible to enforce entities to use rights which have been given. It is only possible to give entities those rights.

Question: "We see this here in many big well-established co-ops, whose members complain that they have no real control."

Cosmic Awareness:

This Awareness suggests that wherein you give an entity the right to take an action, but the entity complains that he cannot take the action, this is not the fault of the one who gave that right, but rather is the fault of the one who does not use that right.

Question: "Galbraith economics, The Public Purpose, shows the same thing happening in big companies where the shareholders, who are the legal owners, have no control. That is in the hands of Techroth Structure, as he calls it, the men who together possess the knowledge. So, if your top tier have the wisdom, they will have the power."

Cosmic Awareness:

This Awareness indicates that the top tier has the opportunity to understand what is occurring on the other tiers. That entities who wish to move up to the upper levels, have the opportunity to move upward, for they have the power to remove them. This Awareness indicate that, indeed, the entities who have the 'crow's nest view' will be able to see more of what is occurring in an organization. But wherein those on the crow's nest are only there by the permission of those on the decks below, then their position is not one of power, but is one delegated by those from the decks below. This Awareness indicates that at any time those from the decks below can call the entity from the crow's nest to come down and they can move up if they wish to, and if they believe that those in the crow's nest have a kind of power which they want. This Awareness indicates that once such an entity reaches the crows nest, thinking that he or she has power, that entity may discover that those on the decks below can call them down.

Question:(Not in letter, but asked by the energizer)

I was wondering if there was any further comment in relation to the second point of questioning: "electing the bankers, we've tried it with politicians"?

Cosmic Awareness:

This Awareness indicates that though it is true that there is a certain amount of corruption among politicians who have been elected, that there is some corruption due to the fact that the money powers can sway the elections through their funding means. This Awareness suggests that even under these conditions, a comparison of those countries and nations which have elected officials to those which have the dictatorial officials, those self-appointed, or those who take control by force without election, shows that which has occurred in Kenya and in Uganda and in various African countries, this Awareness indicates that throughout various times in recent history.

been those nations throughout the world which have had their leaders who appointed themselves by means of force, rather than by popular election. That these nations and these leaders, a cultural effect of such governing systems compared to those in countries which sponsor elections by popular vote, will clearly show that there is a great benefit in the electoral process.

This Awareness suggests that the banking system itself, whereby entities have been given by their fathers and their father's fathers, and their ancestors, and their close associates positions of power through economics to dictate over the lives of others by buying and selling armies, by buying and selling corporations, by funding this or that venture, by denying this nation its needed funds while giving another nation great wealth and power to violate others: this kind of economic manipulation which has occurred down through the past several thousand years, whereby wars have been staged, wars and violence and revolutions have occurred; this kind of economic manipulation through occult forces of money by officials who were self-appointed or chosen by their friends to regulate these monies, this as that which is the corruption of your political system and all other systems upon this plane. This Awareness indicates this has even corrupted your religions. This Awareness indicates that when the economic system is such that it is owned by the people themselves, and the people create their own banks, choose their own tellers and officials and can fire those tellers and officials if necessary, or can simply pay those tellers and officials a wage as any other public servant receives, then there becomes a freedom in the economic world which does not allow for the controls and powers of manipulation through economy over the political, medical, religious and communications systems.

This Awareness suggests that this entity asking these questions would prosper from reading a booklet called The Occult Use of Power Through Money. This Awareness suggests this book available from Alexander Thompson. This Awareness suggests this entity also would prosper from the book, Pawns in the Game.

Question: Her letter continues: "Question (5). The desire to arrange things in an exact geometric pattern is very human and is a way of expressing complexity in a simple way, but it is not natural. Twelve trees in an exact circle with exactly twelve branches on each tree are not in accordance with nature. The stars and the planets are not arranged exactly. The study of ecology shows that nature achieves balance, but in an infinitely varied and irregular fashion. Your system of clubs sounds natural, but your hierarchy does not."

Cosmic Awareness:

This Awareness indicates that the allegory which this Awareness gave, of using trees, twelve trees with twelve branches, each having twelve limbs, each having twelve stems, was not an attempt to modify nature into an artificial reality. The purpose of this allegory was to explain a concept which entities could use to understand the workings of the structure which this Awareness is presenting. This Awareness indicates that in nature, these trees do not exist; that in reality a piece of graph paper is not natural, but a piece of graph paper is often necessary to present certain concepts of the mind, whereby the mind can follow these concepts. This Awareness indicates that straight lines do not exist in nature, yet the mind itself often uses paper with straight lines in order to present concepts for the understanding of the reader. (Editor's note. The letter being read is written on lined paper).

Question: (6) "You don't say how the needed goods and services are to be produced..."

Cosmic Awareness:

This Awareness indicates this as that which comes further down the line. That there can be many areas which need attention, that this is only one. That the initial purpose of this Akashic Record was to give the skeleton of the action; that the flesh and the blood and the living parts shall be presented later.

Question: "It's all very well to say that everyone will create whatever they want to create, but if too many people make pottery and too few make saucepans, what will happen?"

## Cosmic Awareness:

This Awareness indicates that there will become a shortage of saucepans, and when there is a shortage of saucepans the price of saucepans will rise. Therefore entities will begin to look at saucepans as a means of earning money from a needed product, and these entities then will begin to make saucepans. This Awareness indicates this as a matter of supply and demand.

Question: "City people need the produce of the farmer. But what if the farmer says: 'Why should I have to work so hard, while you in the city amuse yourselves'."

## Cosmic Awareness:

This Awareness suggests the farmer may quit his work, sit down and rest. This Awareness indicates that the farmer may choose to move to the city. This Awareness indicates that the person in the city may decide to move to the farm which the farmer has abandoned. This Awareness indicates that there is a tendency for entities to want that which the other has, and therefore to make changes at different times in their life. This Awareness has not insisted that entities be stuck on a farm, or that entities be stuck in a city. This Awareness indicates that it has given that if entities have the opportunity to do that which they choose to do, there tends to be a balance whereby those things which are important are done willingly and joyfully because the balance of nature is such that the entities will produce that which is enjoyable for them to produce, and there will be enough of a disbursement of energies whereby most products needed will be produced. This Awareness suggests that wherein there becomes a shortage, and entities become aware of that shortage, they can transfer their energies into production of that which is necessary.

This Awareness suggests that in the present system, there are vast amounts of energy which goes into shuffling paper from desk to desk to keep track of profits, to advertise products, to attempt to create programs which will grab profits for your particular purposes, for your bureaucracy, for your company: that there are vast amounts of creative energy put into action from the greed incentive purposes. This Awareness suggests that there are many wasted hours of energy put into production of war machinery, of those various kinds of activities which are but competitive with others and which in time becomes violative of others, which destroy the energies of others, or which are destroyed by those who set themselves up as your enemy, or set themselves up to defend themselves against your attack.

This Awareness suggests that the competitiveness in the present system is that which eliminates much energy which is created, which sets up clashes of energy designed to wipe out others' energies. This Awareness suggests that the system which it is suggesting to entities upon this plane is one wherein there is no competition, but wherein there is an activity that allows for co-creative action, cooperative actions without great duplication or competitive duplications.

This Awareness suggests that for those who do not wish to participate in this action, there is still the world of free enterprise whereby entities can compete with one another. This Awareness indicates this system does not contain military forces, does not contain police forces, does not contain law enforcement for its own organization or its members. It does contain certain rules which the entities place upon themselves by their own agreement, and which the entities may place upon those who are in the higher positions, but that those in the higher positions do not, and are not allowed to place rules upon those of the lower positions. The only rule which the entities of the lower positions must follow in relation to those on the higher position, is the rule that allows those on the upper tiers to resign if they wish to.

Question: "I would suggest that you start in your clubs by assessing the needs of your members."

## Cosmic Awareness:

This Awareness suggests that the very purpose of this Unified States of Awareness has come about from this Awareness watching the tragedy upon this plane for several thousand years, whereby this Awareness has assessed the needs of entities upon this

plane, has assessed the needs, has assessed the needs, has assessed the needs, again and again and again, has offered solutions again and again and again, whereby the needs continue to grow, to change, to become more widespread, to become more universal in their nature. This Awareness indicates that the purpose of the Unified States of Awareness is not to control entities, but to look at that which is necessary and to respond to those necessities. This Awareness suggests that each level, in each tier, in each branch, in each limb, and each individual within the Unified States of Awareness, will be assessing the needs of those on the level below, bringing that assessment up to his or her own level, sharing this with those in his or her own cluster, and attempting to find a solution that will satisfy the needs of those below.

Question: "Considering how to satisfy them if possible, producing the goods in your community and only trading when necessary, not just to get rid of surplus. When it comes to trading, the most important kind is between city and country so it is vital to improve the understanding and friendship between city folk and country folk." She concludes with: "We will begin our course with the study of Anthropology, with special reference to the economies of simple societies, as we feel we should be able to understand the true nature of man and his needs. I think you would benefit from this. We are also discussing the ethics of economics. I would like to discuss your economics along with other alternate economics. Is it OK to duplicate those parts of it, of the record, before I return it? Yours sincerely, M.L., School of New Economics, Peace River, Alberta."

#### Cosmic Awareness:

This Awareness wishes to point out to this entity that there is more involved in this action than the branch dealing with economics, this being the 8th branch. There is also the activity within human affairs that deals with property ownership; the activity which deals with communication systems; the activity which deals with the environmental and domestic needs of entities. There is the activity which deals with cultural levels and artistic expression. There are activities dealing with records, classifications, computerizations, and order. This Awareness indicates there are activities dealing with counseling, consulting and balancing of human affairs. There are activities concerned with foreign countries, with the extension and expansion of human consciousness. There are activities concerned with engineering and structuring, building and planning. There are activities concerned with social welfare programs. There are activities concerned with the individual and his or her integration in terms of all aspects of one's life. There are activities concerned with the health, diet and nutrition of entities.

This Awareness indicates there are many facets and many activities which are being considered in this Unified States of Awareness. That to go into extreme detail on any one of these areas at this time would be to ignore the others. This Awareness indicates that information which has been given thus far as only opening the tip of the iceberg. That this as only giving the conceptual level of the first tier of an organization that expands in quantum leaps, down through many tiers, wherein each tier multiplies itself twelve times.

This Awareness indicates this multiplication to the twelfth power by each tier as that which not only relates unto numbers of entities involved, but relates also unto positions and activities and affairs of human endeavors.

This Awareness suggests that before moving into consideration of criticisms such as has been given in this letter, that further readings relating unto the Unified States of Awareness be concerned with the further unfolding of this information. This Awareness indicates that, in essence, the energies spent on answering questions of this kind, in answering criticisms of this kind, are wasteful energies that could be used for unfolding the further picture of the Unified States of Awareness. This Awareness indicates this as likened unto an entity seeing a baby being born, and when the hair of the head appears, the criticisms begin. This Awareness indicates that when the baby is completely born and is ready to be presented for judgment by the critics, then is the time for the critics to be given their say. This Awareness indicates there are two types of entities upon this plane: those who do the work of creating, and those who criticize the creators. This Awareness indicates those who are sharp with their criticism seldom accomplish anything other than to force the creators to work harder. (END OF READING)
