Awareness

Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the force that expressed Itself through Edgar Cayce, Jesus of Nazareth, the Buddha, Krishna, Mohammed, and other great avatars who served as 'Channels' for the 'Heavenly Father', and who speaks again today as the world begins to enter the *New Age* of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through certain carefully trained channels. The information contained herein was received from deep trance states and 'interpreted' by an entity affiliated with C.A.C. This information is for those who inherit the New Age. Awareness tells you not to believe anything, but to question, explore, doubt and discover for yourself what is the truth. Cosmic Awareness only indicates and suggests.

Paul Shockley
Trance-Interpreter

REGARDING CANCER

THE GREAT AMERICAN TRAGEDY

Question:

A question from R.L., Williamsburg, Virginia: "Please submit this question to Cosmic Awareness. According to American Cancer Society, one in 14 women in the U.S. are losing a breast to cancer. What is the cause, or what are we doing as a society of women to set ourselves up for this? Please explain and give additional information. I have experienced this surgery and work with women who have. I desire understanding.

COSMIC AWARENESS:

What Causes Cancer?

This Awareness indicates there is much information out on this problem, but that you will not find this information in medical books controlled by the medical profession.

This Awareness suggests that much information is available through the homeopathic, naturopathic, chiropractic and herbal forms of medicine.

This Awareness indicates that in many cases, there is in actuality no need for the surgery. This Awareness indicates, there is the beginnings of cancer, or of a tumor, which could be cured by the unorthodox methods; that in some cases the surgery may be necessary according to today's values and technological capabilities.

This Awareness indicates that the best method is preventive medicine. That the causes of cancer are many. This coming through the chemicals which are used in various industrial activities, through the preservatives and additives in foods, the artificial flavors and colors, and through the water systems wherein impurities are added.

This Awareness indicates that also, and somewhat to an even greater degree, the problem is caused by the suggestive force which continues to promote the fear and danger and threat of cancer.

This Awareness indicates that this suggestive force is that which is an unknown in terms of the regular medical profession's use of tools and medicines in dealing with disease.

The Subconscious Death Wish

This Awareness suggests that to a great extent, cancer is a psychic disease caused by death wishes, fear and belief that one may catch this dreaded disease.

This Awareness indicates that entities can protect themselves from this to some extent by proper attitudes, by realizing themselves to be spiritual beings, to have dominion over their physical body, recognizing the power of their mind, the power of their will to keep themselves well and healthy.

This Awareness suggests that, however, when entities begin to feel a kind of death wish, a feeling of unworthiness, and when entities couple this feeling with poor eating habits, poor environmental situations, and detrimental behavior patterns that harm the health, this opens the door and creates greater possibility for the weakened condition that leads to the problem of cancer or other diseases.

This Awareness indicates that essentially anyone could contact the problem of cancer, but essentially anyone can also throw off that problem:

This Awareness indicates there have been many entities who have had cancer and have healed themselves, simply by the sheer will to be well.

This Awareness indicates that the mind is the builder, and wherein one can accept a healing, half of the battle is won; the body tends to follow the directions of the mind.

This Awareness suggests that wherein entities are convinced that there is no hope, then the situation follows that conviction.

Methods to Help Reverse Cancer

This Awareness suggests, however, that entities having such a problem: do what you can to monitor and to change your situation, bringing about greater health. This Awareness suggests, however, that you also continue to keep check and keep track of the situation.

This Awareness suggests that certain herbs, such as chaparral, such as white oak bark.... This Awareness suggests this information on the traditional cancer-curing herbs as have been used for many centuries is available in various herbal books: this in American Herbal Formulas, in Back to Eden, in Dr. Christopher's works, and in other herbal books on the market. *

This Awareness indicates there is also help which can be obtained through homeopathy medical systems, and through other more commonly known organizations, such as Friends of Cancer Victims.

This Awareness indicates that this Awareness has given information on cancer situations during the past five or six years; that this information essentially is a repetition.

This Awareness suggests that there is much information on the market today, but the American Cancer Society and the A.M.A., having so much more access to public communication, tends to dominate the field of propaganda related to this situation.

This Awareness indicates that the time comes shortly wherein the tables shall turn and the old ways shall pass away, and opportunities shall come about whereby entities may have the true art of healing upon this plane.

The \$64,000,000,000 Question

This Awareness indicates that entities surely must wonder why the American Medical Association, why the American Cancer Society, and why the American people are so determined to allow cancer to be the great American health problem that it is, when other countries of the world, using other medical systems and other dieting methods, other types of food processing, do not have this problem.

This Awareness suggests that entities simply need to look around and question and be truthful with themselves.

This Awareness indicates that this, however, seems quite unlikely as far as the average American entity is concerned at this time, for most Americans prefer to follow the dictates of the programmers of this system, rather than question and look toward other systems which are more effective.

This Awareness indicates this as being somewhat of a tragedy, yet this being that which this Awareness allows, so long as the entities in the situation, so long as the victims of the situation, desire to continue and to allow this to continue simply because they do not wish to take the initiative in looking in other directions, and prefer to continue supporting these organizations that feed their employees and their armies of doctors on the ill health of their patients.

This Awareness indicates this is not intended as a condemnation of doctors in general, but that this Awareness wishes entities to look at the authority of the medical profession and question where this authority comes from, and whether it is all that it claims to be in terms of a true healing profession.

This Awareness indicates the medical system used in America today as being approximately fifty years in building; and thousands of years of research used by other systems, such as the herbal, homeopathic, and the Chinese methods are basically condemned and ignored by this new medical system.

This Awareness suggests that entities are given free will to follow those systems and forces and leaders of their choice. This Awareness indicates also that the problem finds its roots in the food and industrial areas; that the healing cannot be stressed without an awareness of the causes.

The Grape Diet and Other Cures

Question:

One question in relation to that last one. Through the interpreter, Ralph Duby, Awareness gave a grape diet for people inflicted with cancer.** Will this grape diet work for women who have breast cancer?

COSMIC AWARENESS:

This Awareness indicates that the action of fasting as that which can help. The action of using grape juice for a period of seven days, the diet given previously, and the action of the seven day Awareness fast as given previously: all these are beneficial.

This Awareness indicates the nature of cancer is such that the entity's consciousness must first desire to be healed.

This Awareness suggests that the reaction of the body to a fast or diet change is that which can create a shock among the cells, which, also triggered with the desire for healing and the suggestion of healing, can cause a reversal in the cancer-causing activities.

Hypnosis, Laetrile, vitamins etc.
as Aids in Reversing Cancer

This Awareness suggests that Type 5 or auto-suggestion, and also hypnosis, can be of great benefit in reversing the condition.

This Awareness indicates that Laetrile and other vitamins, such as vitamin C and vitamin A can also help in this condition by strengthening certain aspects of the body. That multiple vitamins and minerals, allowing the body to have greater strength, can assist it in resisting the situation.

Lemon Juice, Cider Vinegar as Cures

This Awareness indicates the use of lemon juice, increasing the use of lemon juice to that which may be approximately one pint daily, as that which can be beneficial.

This Awareness indicates that apple cider vinegar as that which can be beneficial.

This Awareness indicates that the herbs mentioned previously as given in the various herbal formulas, particularly that of the American Indian Herbal Encyclopedia and Dr. Christopher herbal formulas; these taken along with those fasting and cleansing diets can be of great benefit.

This Awareness indicates that the cleansing of the physical body allows the odic force and the resonating electromagnetic energy to increase and to drive out the cancer-causing elements of the system.

This Awareness indicates there are also certain chemical and drug therapies that are recently being discovered which will be on the market within a few years that can be beneficial in certain types of cancer.

Cosmic Awareness is Disgusted

This Awareness indicates that the information relating to cancer as that which is likened unto an avalanche of information which tends to become overbearing and tiresome to this Awareness, in the sense that there have been many cures for this disease which have been totally ignored by the forces which do not wish this to be conquered.

This Awareness feels a tendency to look away in utter disgust at these forces which allow entities to be mutilated and to suffer the agonies of this disease when it could easily be cured by methods which have already been discovered, tested and proven.

This Awareness indicates there are even methods using clay* which can cure certain types of cancer. This Awareness indicates that entities who seek to bring forth these cures are generally ridiculed and even destroyed for their efforts.

This Awareness indicates, however, that these cures shall surface, and the masses of entities upon this plane shall eventually awaken and realize what is occurring, and those who have held power and have misused that power shall find themselves being overthrown by the masses:

The meek shall inherit the earth.

**TELL IT
LIKE IT IS!**

EDITOR'S QUESTION: Awareness tells us one of the most powerful forces on this plane is the power of suggestion, a tool well known and used by the alien force. Have you ever wondered why the American Cancer Society doesn't call itself "The American ANTI-Cancer Society?" If one desires to bring an end to something, does one resist it or promote it? Would you call the recent anti-war movement which brought about the end of the Vietnam war, "The War Movement?" (Think about it).

Will Excessive Sex
Cause Cancer ?

Question:

A question from E.N. "I have a question for Cosmic Awareness as follows: From the book, Thinking and Destiny, by Harold Percival, page 361, 'Cancer may be the growth of thousands of years. It is usually caused by sexual thoughts and appears about the middle period of life and later, seldom in youth. In later life, a person ought not to entertain sexual thoughts. Cancer is likely to become more frequent in the New Age with the development of thinking.' His question is: From when is considered the middle period of life, and does entertaining sexual thoughts here mean dwelling one's thought on sex uppermost to spiritual development, and, is cancer likely to become more frequent in the New Age because we are in the age now where spiritual development should be uppermost in our thoughts?"

COSMIC AWARENESS:

This Awareness indicates that the thoughts of sex and sexual images do not, in themselves, cause cancer. This Awareness indicates that when entities move through their normal growing cycle, there are certain circuits which open as the entity moves from childhood into adulthood.

This Awareness indicates, during puberty, the sexual circuitry begins to open and certain types of consciousness and activities, as well as hormones, and other chemical effects begin to happen in the body in a manner that creates changes in that body.

This Awareness indicates the entities who move into continued physical development eventually reach that period of life in which that which may be termed 'menopause' occurs. This Awareness indicates that this as again another shift in development and another circuit opens wherein the entity is allowed to begin developing more of a feeling of personal purpose in terms of the career motivations or in terms of the basic life purpose--why the entity came to this plane.

This Awareness indicates that it is during the period of menopause and thereafter that the entity begins to sense his true purpose in living upon this plane. This Awareness suggests that entities, during that period of menopause, who seem to feel that their true purpose is to wallow in sex, will tend to keep his energies in the sexual circuit open, but will fail to open other circuits. This Awareness suggests that there is nothing during this time that indicates an entity should not indulge in sex, so long as the entity can also open the next circuit and move into areas of consciousness which allow the entity to begin seeing his true purpose as a spiritual being.

This Awareness indicates that the problem comes about when the entity wishes to retain the youthful vigor, focuses on that, becomes obsessed in that, and cannot move beyond the significance of sexual activities and allows that to dominate one's life.

This Awareness indicates that in essence, sex itself does not lead to cancer, but as the entity, Percival, said, the dwelling in concepts of sex as that which can, in some cases, bring about a kind of short-circuit of the energies which can bring this action about.

This Awareness indicates that even in this situation, however, it is not the direct result of such thinking, but such thinking leads to other attitudes, and it is those other attitudes which help to bring about the cancerous conditions.

This Awareness indicates those other attitudes deal with attitudes of death wish, feelings of not being important, not being accepted. This Awareness indicates that entities who dwell on sex and also feel unloved, these are the entities who tend to open the doors and create the atmosphere for cancer to appear in their lives.

Other Causes of Cancer

This Awareness indicates that the dwelling on sex is only one of the causes which can lead entities to feel unloved. This Awareness indicates that the death of a partner, the loss of a loved one, can also cause entities to feel unloved, and though they may not have any great desire for sex, they too can contact that condition which leads to cancer.

This Awareness indicates that, basically, the real cause of cancer is related unto the death wish. That the cancer conditions are prevalent in most entities, but the bodies of those who wish to continue living, who have enthusiasm for life, and who are loving and feel loved, these bodies generally are too healthy for cancerous conditions to gain control of their cells.

This Awareness suggests that essentially the death wish is that which is the culprit. That this death wish can be very subtle, and often entities have mixed feelings and do not even realize they have had a death wish. This Awareness indicates that this can often be caused by a rejection of one who was loved. This can be caused by the loss of a loved one. This can be caused by an entity feeling unloved and unwanted, or rejected, and in this kind of attitude, the cancerous condition can begin to grow.

This Awareness indicates that even after the situation changes, and the entity finds new desire for life and new hope, the condition which began earlier may have gained a kind of foothold in the body and may continue having its effect.

This Awareness indicates that in such a situation, the entity now wishing to live but having cancer, must go through a strong mental and emotional cleansing in order to throw off that cancerous condition which was invited in during that period wherein the death wish was felt.

This Awareness indicates that sexual relationship between entities is not the culprit in relation to cancer. That thoughts of sex in themselves do not cause cancer, but that the feeling of loneliness, of alienation, is that which can result from such thoughts and such images and this can assist in creating that problem.

A Comment by Awareness Regarding Sex

This Awareness wishes to make one comment regarding sex. That entities upon this plane have created a great taboo from sex, and from the other normal biological functions of their body, and this great taboo has created many tragedies that cannot even be imagined by most entities.

This Awareness indicates that millions upon millions of entities have been slaughtered, have suffered, have experienced un-nameable tragedies, indescribable sorrow, because of the taboo against sex.

This Awareness indicates the various wars which have been fought have been basically nothing other than sexual repression and perverted expression of sexual images and energies. This Awareness indicates that wherein an entity cannot make love freely because of the taboos, the entity then begins creating judgment, hostility, self-righteous values and cravings which lead to ambitions, which lead to rejections of others, which lead to an entire myriad of complicated forces and activities of that life; and when an entire society builds itself around a taboo of this nature, the entire society can also begin creating these kinds of aberrations.

This Awareness indicates when the society comes in contact with another society and the relationship is in conflict, the hurling of bombs, the shooting of bullets, the destruction and death that follows, is in a sense, but an exaggerated action of intercourse between these cultures and societies.

This Awareness indicates that entities who understand the nature of symbology will notice that the 8th house of the zodiac, the sign of Scorpio, relates to both

the house of sex and that which is law enforcement and war, and the 8th house of Scorpio is also called 'the house of death'.

This Awareness indicates that all of these are as different levels of the same energy. That each is a type of alchemical change. That the release of sexual energies balances out the psyche of entities. That the retention of these energies tends to create greater polarity and greater imbalance, and this can be used for power, but will eventually be released, and when released, this can be released in a manner that may be destructive because of the great power which motivates and drives the agent holding that power.

Question:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that the time has come wherein entities cease in actions of promoting their personal values at the expense of others.

This Awareness indicates that wherein an entity has a value that allows the entity to condemn others, to harm others, to hate others, this entity does need to question that value.

This Awareness wishes entities to notice the difference between self-righteousness and the spiritual life. The spiritual entity looks at others for that which is valuable, that which is beautiful, that which is spiritual and that which is good.

The self-righteous entity looks at others for that which is the flaw, for that which is evil, for that which is harmful and for that which is bad. The purpose of the self-righteous entity is to find something wrong with others in order to compare themselves with that other, so that they, themselves, shall feel superior.

The purpose of the spiritual entity is to look at others and find areas of compatibility so that they can be as one.

This Awareness indicates that entities who look at others to deprive them of their expression, who look at others to feel hostility because their values are not the same, entities who look at others and hate them because they express themselves in this or that manner: these entities are being self-righteous and are creating the ills of the world.

This Awareness indicates those entities who look at others to find areas of compatibility, to find areas wherein there is potential for communication and harmony: these entities are assisting in bringing about the New Age, in bringing about the world without sin, in bringing about the activities that bring forth harmony and express love between entities upon this plane.
