Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

78-40

COSMIC AWARENESS is the force that expressed Itself through Edgar Cayce, Jesus of Nazareth, the Buddha, Krishna, Mohammed, and other great avatars who served as 'Channels' for the 'Heavenly Father', and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through certain carefully trained channels. The information contained herein was received from deep trance states and 'interpreted' by an entity affiliated with C.A.C. This information is for those who inherit the New Age. Awareness tells you not to believe anything, but to question, explore, doubt and discover for yourself what is the truth. Cosmic Awareness only indicates and suggests.

Paul Shockley
Trance-Interpreter

Some Insight on

ALEISTER CROWLEY

"The Devil's Apostle"
"The Great Beast 666"

Question:

A question from J.D.S. of San Francisco: "Aleister Crowley, who called himself a Magus, and also the 'Great Beast 666', has been labeled as a Satanist and the "wickedest man on earth" by his detractors, and one of the foremost and brilliant occultists of all time, by his disciples. He is claimed to have received clairvoyantly the text of a most unusual and striking book, called the Book of the Law, or Liber Al Legis. This book was purported to have been dictated by a preternatural being called Aiwaz. My questions are these: What does Awareness have to say that can shed some light on the true character and import of the entity Crowley? Was he the Beast 666 in a different sense from the computer Beast as previously indicated in your book, Cosmic Awareness Speaks, Volume 2? Who was Aiwaz, and is Crowley at present reincarnated in the physical? What comments does Awareness indicate concerning the Book of the Law?

COSMIC AWARENESS:

This Awareness indicates the entity Aleister Crowley as one who delved deeply into the mysteries of life and the mysteries of the mind, without regard for concerns relating unto motivation, black or white, but rather to discover realities and truths related unto the mind.

This Awareness indicates this entity as having dabbled in all kinds of occult and metaphysical concepts as well as the various religious deities and concepts in order to discover the nature of the mind. This Awareness indicates the entity, in calling himself 'the Beast 666,' was simply spoofing, or kidding his followers for what he knew would be attributed to him by his detractors. This Awareness indicates that the entity knew that there were many who would criticize him and his works, and simply placed the label of criticism upon himself in a way that would not allow them to have anything worse to say about him than he said about himself already.

This Awareness indicates the entity as simply a human being who was very curious and wished to discover many things about the nature of the mind. This Awareness indicates the entity did make certain errors and did move into areas of what may be termed 'black magic'. The entity also moved in areas of white magic, and the entity did discover much about the nature of the mind and shared this information with others. The entity was of a theatrical bent and enjoyed such theatrics as would shock or impress those who heard of, or read of, his work.

This Awareness indicates there are many who would 'give their eye teeth' to find someone to play the role of the beast so that they can clearly know who it is 'out there' that they can vent their hostility, venom and anger toward. This Awareness suggests the entities seeking to find a beast to hate had best look within at the source of that hatred, and those who seek a messiah to love had best look within to the source of that which desires to worship.

In reference to the Book of the Law, this Awareness indicates there is much valuable information in this book. There is a suggestion that entities read this book for whatever is of value to them. This Awareness indicates there is much that can be misinterpreted from this book. This Awareness indicates the law: "Do what thou wilt" as the whole of the law which was given by Aleister Crowley, as nothing other than the recent hippie term, 'Do your own thing'.

This Awareness indicates that this 'do your own thing' was not the real meaning of Aleister Crowley. This Awareness indicates in reality, Aleister Crowley was giving forth a law which had a double meaning. "Do what thou wilt", as read by some entities implies that they should do whatever they want; but read by other entities, "Do what thou wilt" is a statement to the spiritual Deity of the universe whereby the entity gives up his own will to that Deity and says, "Do What Thou Wilt".

This Awareness indicates Aleister Crowley enjoyed giving entities those terms and rules which would have meanings and value to them at whatever level of consciousness they were at. This Awareness indicates for those who wished to have a beast, an anti-Christ, to hate, Aleister Crowley gave them one. For those who wish to have a master-teacher to follow, Aleister Crowley gave them one. For those who wish to discover workings of the mind, Aleister Crowley gave entities much to think about and there was much within the work which had different levels of meaning for those who can perceive beyond the present perception into other levels of meaning; and, in this manner, Aleister Crowley gave entities works which can be used for climbing in a spiritual manner, up the stairway to greater understanding; but those who do not wish to look deeper, or to assume there is a deeper and better meaning to his work, will be satisfied with whatever interpretation they have.

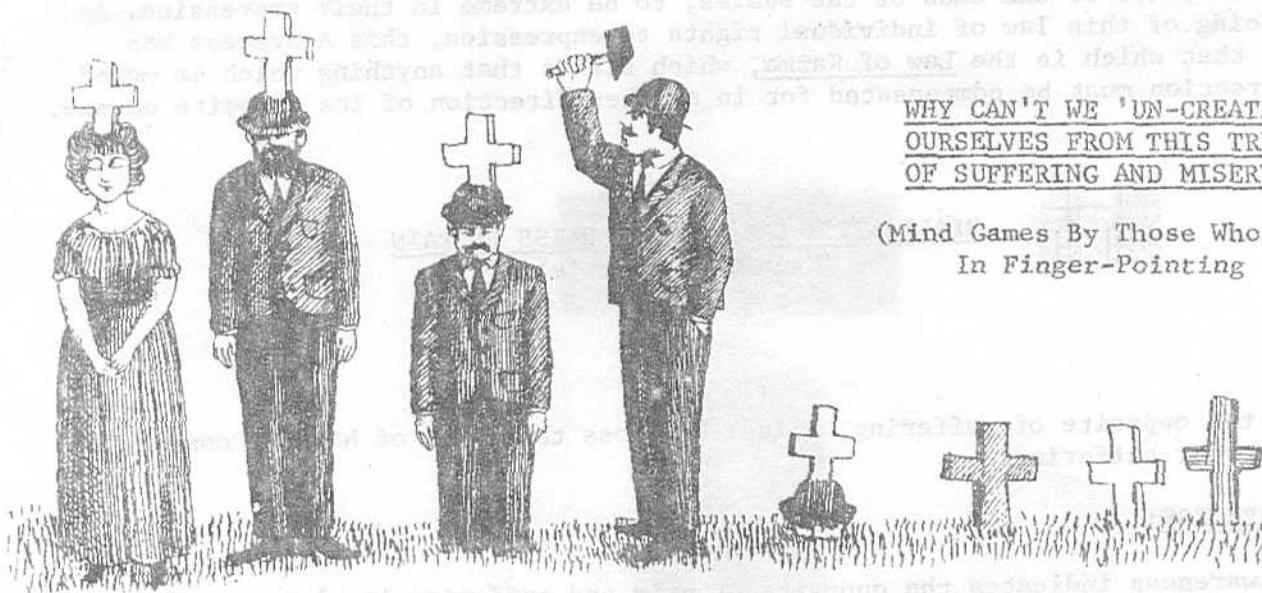

This Awareness indicates that even those will, in time, discover that Aleister Crowley and his material has given them deeper understanding of themselves, and shall in time, move on to other levels of understanding because of the material which he left for entities to concern themselves with, and to consider.

This Awareness indicates Aleister Crowley was a genius, but not a messiah nor a beast. He was a genius of the metaphysical and occult levels.

Question:

Is he back on earth for these days?

This Awareness indicates this entity is not seen on earth at this time. This Awareness indicates this not as being certain, that the energies for this question do not present a clear picture which can be answered with certainty by this Awareness. This Awareness indicates that it appears there are certain aspects of this entity which have returned while other aspects have remained on the immortal realm. The entity as having not fully re-entered into the mortal realm at this time.

WHY CAN'T WE 'UN-CREATE'
OURSELVES FROM THIS TREADMILL
OF SUFFERING AND MISERY?

(Mind Games By Those Who Wallow)
In Finger-Pointing

Question:

Two questions from E.C. of Flint, Michigan. She asks: 'How can we un-create ourselves if we so choose? If we can't, why not? It's cruel to oblige to exist and suffer with no self-determination and no escape. Why were we created in the first place? It all seems so dumb. Why bother? Why the misery and suffering, the endless treadmill?'

COSMIC AWARENESS:

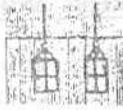

This Awareness indicates you create even those endless sufferings. You create the treadmill. You create the efforts to undo yourself.

This Awareness indicates you, each and every one, working individually and together in harmonious or disharmonious creative energies, create the universe, create your world, create your experiences. All that was created in the beginning was the Universal Consciousness, and out of that Universal Consciousness, the various aspects of this Awareness, which became the entities of the universe, began to play around with creative forces, creating polarities--positive and negative, light and dark--and from those polarities, began to intensify the positive and negative, intensify the light and the dark, until the universal light, or universal consciousness, was thrown into a turmoil, was thrown out of balance; and then entities were put into situations whereby they could do nothing but exist somewhere within those polarities of extremes of positive, negative, light or darkness, unity or separateness.

This Awareness indicates that sorrow and suffering are brought about by their opposites, and whereby entities wish to reconcile opposing forces, they may do so by such reconciliation. They may weaken the extremes. This Awareness indicates that in weakening the extremes of polarity, entities may move toward balance. Yet, in balance, entities cannot experience the extremes which often are desired when entities become bored with the balanced life and the ever-present joy of simply being who they are.

This Awareness indicates entities often desire to blame higher spiritual forces for their plight. Entities enjoy pointing the finger at their gods and saying, 'You have failed in your creation which you stuck me into'. This Awareness indicates this is a mind game of the entity of blaming someone else, and has little or nothing to do with the higher spiritual forces, except to assist in separating the entity from those forces; for in such finger-pointing blame, the entity separates themselves.

This Awareness suggests that it is a universe filled with joys and sorrows and this Awareness rests somewhere in the middle of all those polarities and watches entities rise and fall in ever-changing polarities, and calls and beckons that entities come to the center of the teeter-totter, the center of the scales, to be in balance and harmony with this Awareness, that they may avoid the suffering and the extremes which are brought on by such polarizations. Yet this Awareness allows entities to journey out to the ends of the scales, to be extreme in their expression. And for balancing of this law of individual rights to expression, this Awareness has installed that which is the Law of Karma, which states that anything which is moved in one direction must be compensated for in another direction of its opposite nature.

REALIZATION CREATES THE BLISS OR PAIN
(Even in Celestria)

Question:

Isn't the opposite of suffering, bliss? How does the bliss of balance compare to the opposite of suffering?

COSMIC AWARENESS:

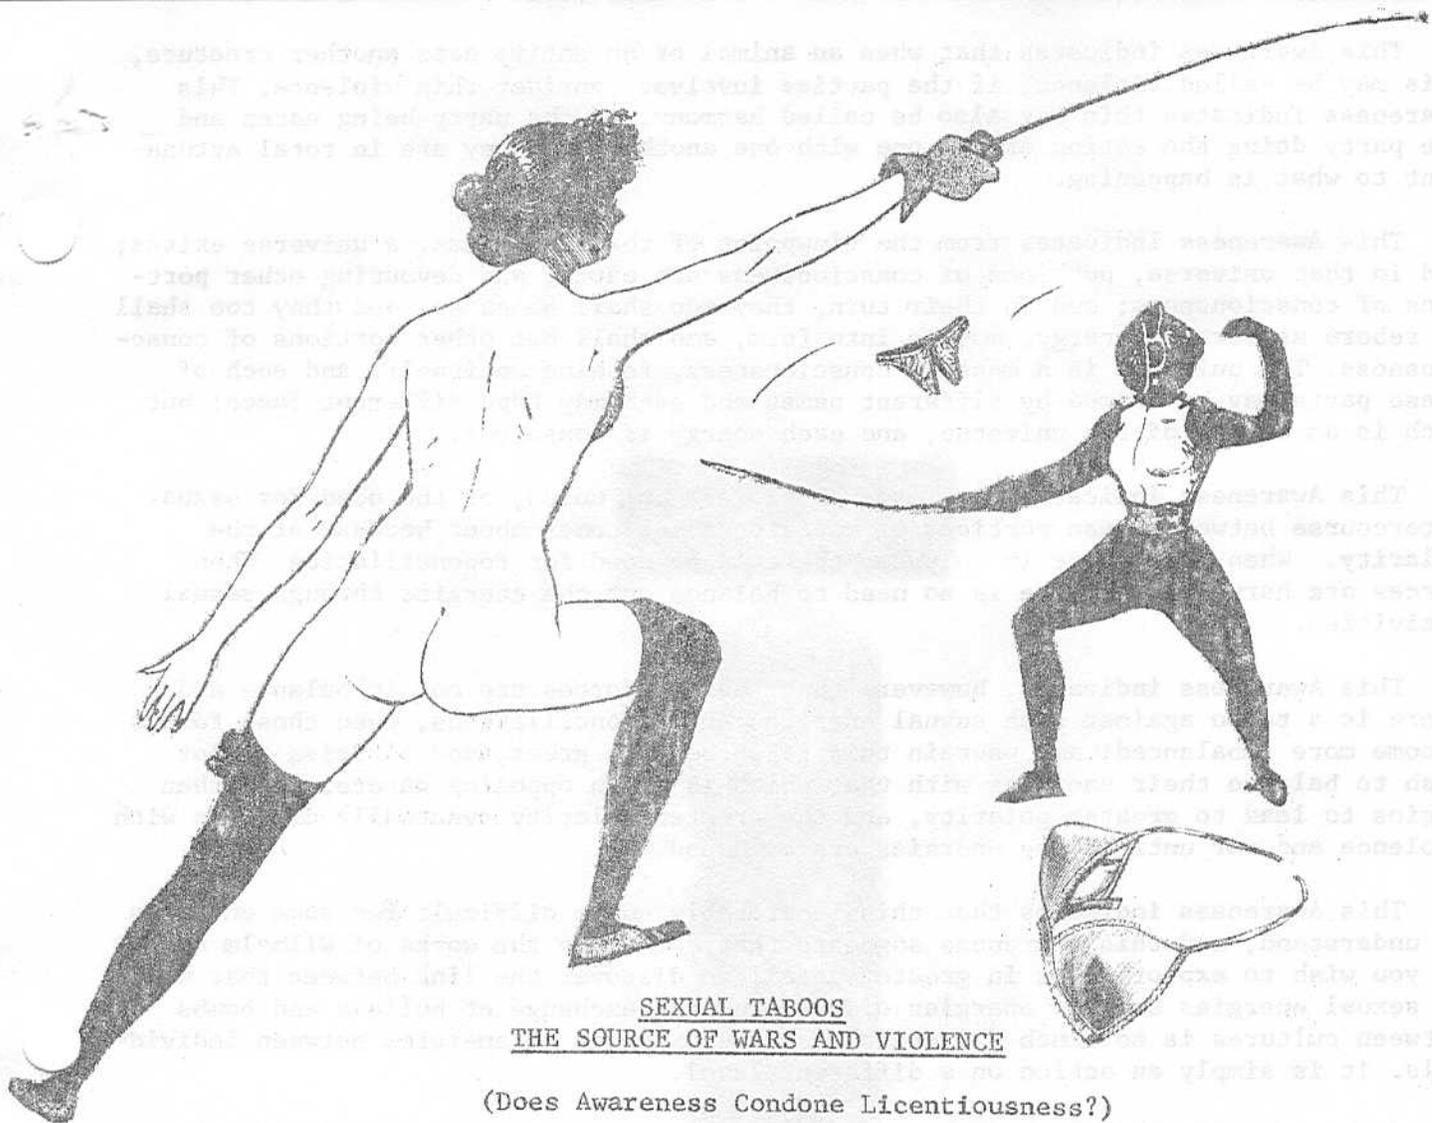

This Awareness indicates the opposite of pain and suffering is pleasure. The balance between is realization; and that realization is that which creates the opportunity for entities to experience bliss or pain.

This Awareness indicates those entities who live in Celestria in states of bliss also live in states of deep suffering at the guilt and the sorrow of seeing other entities in the universe living in pain and missing out on the bliss. Yet these entities, living in bliss, are lighter on the scales than those who are living in the heavy, grave levels of polarized extremes in tragedy and suffering. Therefore, those who are lighter on the scales have difficulty in bringing the scales into balance until entities from the grave, heavy, gravity side move toward that center to allow a more equal distribution of the weight of consciousness toward that which is Celestria and the essential levels of existence.

This Awareness suggests that wherein entities move toward areas of personal expression and desire, this tends toward the heavy, grave side of the scale, the dark and separation side; whereas entities who move toward unity and light, this movement tends toward the lighter side of the scale. And as entities begin shifting away from personal desires toward unity and service, one to another, toward love and mercy, toward care and consideration, the forces of the universe are all touched by that movement and polarities are reconciled to the degree of that movement, and the balance which was chrown out becomes that much more justified, so that a greater harmony is experienced on all levels, according to the degree of shift in consciousness toward love, mercy and unity.

This Awareness indicates that until total balance is reached, there will always be suffering, and this Awareness nor any other entity or deity can prevent such suffering, for that is the creation and the result of the activities of entities in throwing out the balance of universal forces through the efforts of self-expression and personal greed forces.

SEXUAL TABOOS
THE SOURCE OF WARS AND VIOLENCE

(Does Awareness Condone Licentiousness?)

Question:

Her other question: "In the last mailing Awareness says that wars and violence are caused by taboos against sex. That needs clarification. Wars are conflicts. The same reading said Awareness started conflicts so that entities can experience themselves. Wars are acts of disregard for other's rights and the forcing of one's will on another. These acts and attitudes existed before bodies, before gender and sex, before taboos. What caused them then, anticipation? Violence has been programmed into all forms of material life by reason of the need for food. It is impossible to avoid violence on this earth. Being eaten is the supreme act of violence. Every creature must do violence to its victim by eating it to avoid the violence to itself of starvation. People who are least inhibited in their sexual activities and attitudes don't appear to be correspondingly less violent and cruel. Should there be no restrictions on sex? Licentiousness is next to godliness, perhaps? I have other questions but these will do for now. Would appreciate some answers for a change. Sincerely, E.K."

COSMIC AWARENESS:

This Awareness indicates there were many questions in that question, that some may be covered and some may not. This Awareness indicates that essentially, sex is the merging of polarity forces, the positive and negative. Essentially, war is the merging of forces in conflict with one another.

This Awareness indicates essentially, the violence which is spoken of is nothing more than a reconciliation of energies. This Awareness indicates that entities or creatures or portions of consciousness, regardless of the shapes and forms of these entities, creatures or portions of consciousness may be experiencing, these are energies which are not in harmony and need to move into harmony.

This Awareness indicates that when an animal or an entity eats another creature, this may be called violence, if the parties involved consider this violence. This Awareness indicates this may also be called harmony, if the party being eaten and the party doing the eating are at one with one another, if they are in total attunement to what is happening.

This Awareness indicates from the viewpoint of this Awareness, a universe exists; and in that universe, portions of consciousness are eating and devouring other portions of consciousness; and in their turn, they too shall be eaten, and they too shall be reborn as further energy, moving into form, and shall eat other portions of consciousness. The universe is a mass of consciousness, feeding on itself; and each of these parts may be termed by different names and each may have different faces; but each is an energy of the universe, and each energy is conscious.

This Awareness indicates that essentially, sexual union, or the need for sexual intercourse between these portions of consciousness, comes about because of the polarity. When forces are in balance, there is no need for reconciliation. When forces are harmonious, there is no need to balance out the energies through sexual activities.

This Awareness indicates, however, that wherein forces are not in balance and there is a taboo against such sexual energies and reconciliations, then these forces become more imbalanced; and wherein this taboo becomes great, and entities do not wish to balance their energies with that which is of an opposing nature, this then begins to lead to greater polarity, and the greater polarity eventually disrupts with violence and war until those energies are balanced.

This Awareness indicates that this is probably quite difficult for some entities to understand, and this Awareness suggests that you study the works of Wilhelm Reich* if you wish to explore this in greater detail to discover the link between that which is sexual energies and the energies of war; for the exchange of bullets and bombs between cultures is not much different than the exchange of energies between individuals. It is simply an action on a different level.

This Awareness indicates that wherein entities can exchange these energies in a peaceful nature, in a loving nature, and wherein cultures can exchange those energies in a peaceful and loving nature; this kind of intercourse is called 'trade', and both parties benefit. But wherein the intercourse is one of violence and hostility between entities, or between cultures, in an effort to destroy the other because these entities feel threatened by the presence of their opposite polarity, then this is called war, or hostility.

This Awareness indicates the taboos against such exchanges of energies intensifies the frustration, and such frustration can lead, very easily, to violence.

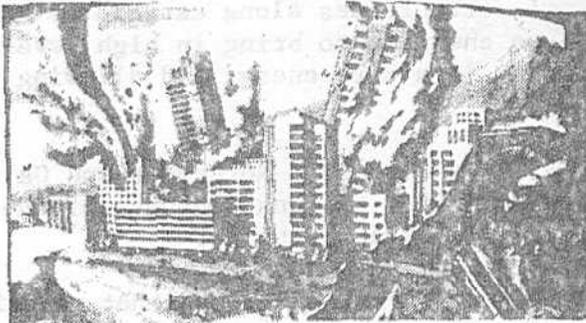

This Awareness asks you to refer back to the reading on Celestria and imagine entities in Celestria who come together and whose auras touch, and whose energies then send electrical sparks to one another to allow them each to experience the other in a kind of bliss, without these entities coming together in terms of their own bodies, but only their auras touching. This Awareness suggests now you imagine some deity making a rule that no entities in Celestria were to be allowed to mingle their auras without permission. This Awareness suggests that immediately you may begin to see the frustration that would start to unfold in Celestria; whereby entities would begin to build up their energies, their static energies, and not be able to discharge these energies. This Awareness indicates that as this occurs more and more, those entities would become more and more polarized and out of balance, and this would have its effect on the entire realm of Celestria; and in so doing, would create that which eventually would lead to a second fall of the angels.

This Awareness is not condoning licentiousness, nor sex, as a means of avoiding war. This Awareness indicates that love, responsibility and sensitivity are those forces which allow entities to relate clearly with one another. And where love, responsibility and sensitivity to all who are concerned is present in a relationship, then, if sex follows, there will very likely be no harm done.

This Awareness indicates that responsibility for one's actions, sensitivity to one another, love between entities: these create the combination of attitudes which allow entities to be close and to be responsible for that closeness and to be sensitive to all who are involved, or may be touched, or may result from that closeness. This Awareness indicates that, in this manner, energies may be balanced without harm. That wherein these qualities are missing, and entities simply invade one another without caring for the results, without being responsible, without love being involved, and without sensitivity for the activities, or for the feelings of others involved, this then, is a form of rape which does great damage and causes great harm.

This Awareness indicates that in this kind of expression, one entity may not feel a taboo, but the other entity may feel a taboo against this kind of rape and a violence occurs. This Awareness indicates that taboos against sex are not the only cause of violence, but are a major cause. This Awareness indicates insensitivity, irresponsibility and lack of love are also major causes of violence.

ED's Note: The books of Wilhelm Reich were burned and banned in the U.S. for many years. Lately they have been republished by Farrar, Straus and Giroux, Publishers of New York. The following books of Reich are currently available from C.A.C. although not listed in the current book catalog: The Function of the Orgasm, \$4.95., The Sexual Revolution, \$3.95, The Cancer Biopathy, \$12.95, Listen, Little Man, \$2.95

CONCERNING EARTHQUAKES
AND AREAS OF HIGHER
SPIRITUAL CONSCIOUSNESS

ED's Note: Many people write C.A.C. about moving to the West Coast because they feel that somehow that area appears to be more spiritually uplifting. Others write to ask about Cayce's prediction about San Francisco sinking into the sea from an earthquake. Awareness consistently repeats that the 'future is not fixed' and many earthquakes which should have happened on schedule did not happen because the consciousness in that area was changed, usually by one or two entities. Awareness, in fact, indicated several years ago that the earthquake predicted by Cayce was indeed averted by two entities who lived in a cabin near Bakersfield on the San Andrea fault and who meditated daily, thus moving the energies out to sea before they could build up. The following reading, given in the summer of 1978 in Oregon pretty well summarizes this situation and we ask the membership to please stop asking this type question.

Question:

Awareness, is Oregon going to be the spiritual capital of the world in the next thirty years?

COSMIC AWARENESS:

This Awareness wishes entities not to attempt to determine this kind of information at this time. This Awareness suggests that while this may be so, this as a matter of opinion. This Awareness suggests that there are forces in the Northwest which are open and receptive to spiritual uplifting. This Awareness suggests that It prefers that entities become the spiritual capital of the world themselves rather than thinking in terms of location or in terms of groups. This Awareness wishes that individuals each become the spiritual capital of the world.

Question:

Awareness, what kind of geographical changes can be expected for the Pacific coast of the United States?

COSMIC AWARENESS:

This Awareness indicates this as relative to time; that generally speaking, this Awareness indicates the high spiritual awakening in the Pacific Northwest is spreading into the areas of California. This Awareness indicates this extends into Alaska and British Columbia. This Awareness indicates that it is this kind of consciousness that is affecting the molecular levels and magnetic fields in the fault lines along the West Coast. This Awareness indicates this type of consciousness is that which prevents the quaking and shaking of these fault lines. This Awareness indicates that one or two entities living in a high level of consciousness in a particular area on a fault line, this kind of energy is that which is capable of preventing earthquakes from occurring along these lines.

This Awareness indicates this as that which appears difficult for entities to understand. This Awareness suggests that you look at this in the analogy of a human body lying upon a table, wherein there are magnetic lines, meridians, and upon this body are certain acupuncture or acupressure points which can be stimulated to allow certain energies to flow so that the body becomes more balanced and harmonious. This Awareness indicates that wherein these particular points are touched by a kind of energy to allow certain energies to flow, the body tends to balance itself properly in terms of the Yin and Yang forces.

This Awareness indicates likewise in terms of earth forces along certain meridians of fault lines, there can be entities who serve as channels to bring in high levels of consciousness, likened unto a vortex channelling in a pure energy and allowing negative energies to be released.

This Awareness indicates that generally speaking the Pacific Northwest and California appear to be stable and relatively safe in reference to consciousness of the area and the apparent direction of that consciousness in future times.

This Awareness indicates, however, that the future is not fixed and that consciousness can change. This Awareness indicates that wherein the West Coast becomes too crystallized, too greedy, wherein entities become too polarized and full of frustration and hostility, then entities would be wise to consider leaving the area if they cannot change that consciousness.

MORE ABOUT MARIJUANA (Any Benefits?)

ED's Note: This question was asked by one of the young students at the Dean Point Free School, Nehalem, Oregon, during a trance session there.

Question:

Awareness, can marijuana be used with short-term beneficial effects on the body, and are there plants and herbs which counteract any negative effects that use of marijuana might have on the body?

COSMIC AWARENESS:

This Awareness indicates that the use of marijuana is generally not harmful. This Awareness indicates this does relate, of course, to each individual in a different manner. This Awareness indicates that excessive use of marijuana is damaging to kidneys, to liver function and to certain mental activities. This Awareness indicates that the same can be said for excessive use of almost any food or drink that there can be physical damage. This Awareness suggests that excessive use by one entity may be considered as minor use by another. This Awareness suggests that

entities be very sensitive to their bodily functions and reactions to the use of any forms of foods, drink or smoke.

This Awareness suggests that marijuana as especially beneficial to entities who are overly aggressive, overly forceful and overly active in terms of pineal focusing consciousness. This Awareness suggests that entities who have difficulty getting down to the work of living, putting their thoughts into action, putting their ideas into manifestation, entities who have difficulty putting into action their words and plans, these entities would be better off to avoid the use of marijuana.

This Awareness suggests that marijuana does tend to inhibit the activity level while enhancing the philosophical and mental observation. This Awareness suggests that the logical and rational mind tends to be somewhat inhibited by the use of marijuana whereas the intuitive mind is enhanced.

This Awareness indicates the amount of use is relative to the individual. This Awareness suggests that in terms of counter-acting the use, the effects of this substance, the best counterant is the non-use or the lessening of the use of the substance.

ED's Note: For more in-depth information on marijuana, please refer to Revelations of Awareness, No. 77-11, and 77-13.

MORE ABOUT LIMBO

(Waiting Around for Something to Happen)

Question:

K.R. of Los Angeles writes: "In my letter of May 8th, I asked about Limbo. I found a short reference to Limbo, but something that would help clarify the question is this: A friend, through her helper, Gabriel, is told of those who are to be released, so I asked about Blavatsky and Gurdjieff and Emmet Fox, and found that all of these noted teachers were in Limbo. Through her help, they were released. Her understanding is that the time of holding there is never more than 100 years. At each 100 year period, they are released. My question is: why are such teachers held in this state for indefinite periods, and if not for such as my friend, would they be held there for longer periods? A student, more than one, in fact, were terribly shaken when told about this and said, "Well, if such teachers are liable to Limbo, what hope is there for the rest of us? It isn't worth the effort." I had no answer. Have you had this question?"

COSMIC AWARENESS:

This Awareness indicates the source of your information is questionable. This Awareness indicates these entities mentioned did not spend time in Limbo as indicated. This Awareness indicates the entities as having moved for some brief time over the land of Limbo, passing through, and assisting others who were caught in Limbo to move on.

This Awareness indicates when entities of a high spiritual nature move through the land of Limbo, they create a kind of vacuum which sucks others into their aura and allows those others to move on. This Awareness indicates the planes of Limbo are being cleared out rather rapidly and that only those entities who are of a nature whereby they are overwhelmed with attitudes of seeking security, being overly dependent and being unadventurous and being of a lazy nature, so that they do not wish to move, or to leave that plane; only those entities are the types who are stuck in that area.

This Awareness indicates these entities in Limbo are basically seeking to continue a lethargic life which began on earth whereby they do not wish to improve or develop their lives, but whereby they are satisfied to let others lead them, to let others force them to develop, or to be dependent on others who are moving on.

This Awareness suggests that there are many entities living in your neighborhood and living next door in many different towns, many different cities, or living within the same house as others, and these entities are also stuck in Limbo.

This Awareness indicates Limbo is simply a place of waiting for something to happen, because the entity does not have the courage or incentive to make something happen for oneself.

This Awareness indicates that in passing over, entities on the other side have many of the same feelings and experiences as they have on this side; but on the immortal side, there is more time and less urgency to do something about those feelings.

This Awareness indicates an entity in this mortal realm who spends ten years sitting and waiting for something to happen, does not consider those ten years to be exactly a time of limbo, but rather as a time of boredom and frustration. Yet that ten years is a big chunk out of the entity's life, and eventually the entity may decide to quit waiting and to do something for themselves.

This Awareness suggests that on the other hand, an entity on the immortal side may spend one hundred years waiting for something to happen, and that one hundred years is only a brief moment in the time of immortality.

MIDWIFERY

(Is it the Coming Thing?)

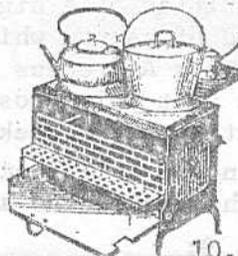

Question:

D.L. of Supulveda, Calif., writes: "Please submit this question to the Awareness. I am very interested in midwifery and would like to know if this would be the best way to bring entities into this plane in the New Age?"

COSMIC AWARENESS:

This Awareness indicates this as that which is a growing field and can be very beneficial to entities during the future situations, particularly in view of changes in value which are occurring among many of the people, particularly the younger generation.

This Awareness indicates that these changes in value, relating unto moving back toward nature and the simple and most urgent levels of action, shall begin to grow and expand and spread among more and more entities during the coming ten years. This Awareness suggests that the medical profession, as presently organized, will also undergo great changes during this coming decade, that midwifery will be of much value and shall have its place as the changes occur.

INOCULATION SHOTS

Question:

(Should Our Kids Have Them?)

S.Q. of Galena, Illinois asks: What does Awareness think of inoculations: diphtheria and polio, tetanus etc., customarily administered to most children beginning during the first few months of life? My first child had his first shot when he was two months old, and had at least three during his first year. The trauma of them, especially after the first shot, is enough to make me wonder if Awareness would say they are really useful and necessary. My second son is now at the age when the inoculation shots are due to begin and I am hesitant about whether to start them or not. Is there any no-fail things I could do which would make it unnecessary to give further inoculations? In other words, can I protect my children from serious disease without using inoculations?

COSMIC AWARENESS:

This Awareness indicates there has been information given previously on this topic. This Awareness suggests that, essentially, the effect of inoculation is such that the blood of the entity is made immune to the disease by contacting the disease in a level and at such degree as it can handle the disease without great stress. This Awareness indicates that the side effects of this inoculation for these diseases is relatively minor, depending upon the type of inoculation, and there are few problems related unto this.

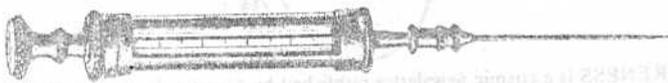

This Awareness suggests that the polio shots were such that they basically were useless and did cause some problems; that many of the flu shots can be forgotten as being unnecessary. But in general, much good has come from measles, scarlet fever, chicken pox, diphtheria, typhoid, tetanus shots, for many lives have been saved without the entities even realizing that their lives have been saved, simply because they had been vaccinated against these diseases.

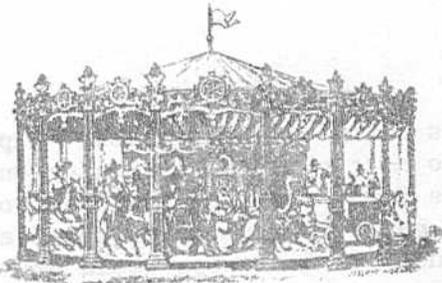

This Awareness suggests the alternative to vaccination is to have very pure blood, to have a very healthy body which is capable of fighting off diseases. This Awareness indicates that this is not very effective as a means of overcoming certain of these diseases. This Awareness indicates that wherein the white settlers moved toward the west and contacted the American Indians, the American Indians being pure in their blood and free from any history of tuberculosis, became very subject to that disease, even though the white settlers did not suffer from the disease themselves and could be around entities who had tuberculosis without it being contagious to them.

This Awareness indicates that often the more pure your body is, in terms of this kind of purity, the more subject you are to the filth and disease of pollution and those germs and problems which accompany the modern civilized world.

This Awareness suggests that your allowing the child to have these vaccinations as being more beneficial to the child than harmful at this time. This Awareness suggests that once these diseases are completely eliminated from the society, or wherein these diseases become so rare that it is unlikely for an entity to contact the disease, then the inoculation may be eliminated and you may take a chance without much danger.

This Awareness indicates that each of these various inoculations for different things has its own uniqueness; that you may use your own good sense to determine whether that inoculation is necessary or not. This Awareness suggests that it is important for children to have tetanus shots. That wherein a diphtheria danger is present, that this may also be given. This Awareness suggests that wherein there is a danger of any of these, that the best approach is to have the vaccine; that there is no absolute answer for this question--it is relative to the urgency.

THE WHEEL
OF
BIRTH,
DEATH,
AND
REBIRTH

(Does It Operate on Other Planes?)

Question:

In Its advice to entities in relation to getting off the wheel of birth, death, and rebirth on this plane, Awareness has indicated that there is a whole universe full of many mansions for entities to experience other than earth. My question is: Does not this same problem of getting off the wheel persist and plague entities who are born and die, and are reborn again and again in these other vibratory systems of the universe; and are not the reasons for this similar to the reasons entities become entrapped on the physical plane?

COSMIC AWARENESS:

This Awareness indicates this as in the affirmative. This Awareness wishes entities to understand that where you are is where you are. It is not a problem unless you make this a problem.

This Awareness indicates that it matters not whether you exist in the trunk of a tree, as a shellfish, as a human being, or as a god, or as a spirit between lives. What does matter is whether you enjoy being who you are. This Awareness suggests that the wheel of life is no problem unless you become hung up in one wheel, circling round and around and do not know that there is a way off that wheel, and are dissatisfied with being on that wheel.

This Awareness indicates that this as likened unto an entity who is born on a merry-go-round, without realizing that there are other experiences. This Awareness does not condemn any entity for such actions, but suggests that you are missing out on many mansions which may be of greater joy to you than the action of repeating... repeating...repeating...repeating...repeating...repeating...repeating.
