COSMIC AWARENESS is the Force that expressed *Itself* through Edgar Cayce, Jesus of Nazareth, the Buddha, Krishna, Mohammed and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the *New Age* of spiritual consciousness and awareness. Since 1963 *Cosmic Awareness* has been communicating through certain carefully-trained channels. The information contained herein was received from deep, super-conscious trance states and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the *New Age* and those who shall inherit the *New Age*. Throughout the many thousands of 'Readings' given through these channels, *Cosmic Awareness* repeatedly tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. *Cosmic Awareness* will only indicate and suggest. Members of *Cosmic Awareness Communications* are invited to send in questions (on anything of general interest) for possible publication in this Newsletter.

HUMANITY AT THE BRINK.....

the Eve of World War III

COSMIC AWARENESS ALERTS ALL ENTITIES
THAT A PLANNED "LIMITED" NUCLEAR WAR
COULD HAPPEN MOMENTARILY

MILITARY INSTALLATIONS
TO BE PRIME TARGETS

(Opening Message from a C.A.C.)

General Reading Given

March 5, 1979

What to Look For...How to Prepare...How to Evacuate
IF YOU LIVE NEAR A TARGET AREA

COSMIC AWARENESS:

This Awareness indicates that the situation upon this plane, upon this planet, is that which is reaching the climactic stage, whereby forces are moving toward collision courses, and only high levels of attention, discernment, and the recognition of right action will prevent the chaotic effects which appear imminent. This Awareness indicates that this is not intended as a prediction of chaos, but as a statement of *what is*. This Awareness indicates that the discernment, attention, and recognition of right action may indeed move into the situation to prevent this chaos from occurring.

This Awareness indicates that the intensities which had diminished previously have moved into certain propensities toward that which was described as nuclear war. This having increased as a possibility more during the last few months than had previously been. This Awareness indicates that in another level, the forces working to prevent this action as having also moved into greater awareness, attention, discernment, and recognition of right action whereby this may be avoided.

This Awareness indicates there are definite forces seeking to create the limited nuclear war. That this information in detail as available through the sources previously mentioned. (ED's Note: Awareness is referring to a reading not yet published where it mentioned the publication of the U.S. Labor Party, 'The New Solidarity' and the 'Spotlight' newspaper as being 85% accurate in their reporting as opposed to the controlled press which is about 40%).

This Awareness indicates that the potential having increased, and the threat continuing for the duration of the Spring of 1979 into early summer. This Awareness indicates that whether this occurs will depend largely on the forces pushing to create this, and the forces which are being cornered and put on the spot to react against the threat. This Awareness indicates that this information, in terms of details, is available on the Dr. Beter tapes and in the U.S. Labor Party paper, in foreign newspapers, and on short wave radio. This Awareness indicates that there is little information regarding this within the controlled media; therefore the majority of entities are unaware of the potential dangers at this time. This Awareness indicates that the danger of nuclear war as greater than any time since the Cuban missile crisis, and as being more of an international program than even that confrontation.

This Awareness indicates that entities wishing to assist in lessening the dangers may meditate and send healing light energies to the planet, this using the imagery whereby the planet is seen from a distance with light pulsations being projected or imaged to lessen the danger. This Awareness indicates also that the letters to Senators, calling for attention to this situation, can be beneficial. This Awareness suggests that entities first listen to the Dr. Beter tapes, particularly that of January and February of this year. * This Awareness indicates that the dangers being so great that it could occur before this message reaches the members of *Cosmic Awareness Communications*.

*Write: The Dr. Beter AUDIO LETTER, P.O. Box 16423, Ft. Worth, Texas, 76133 for full information on tapes available. To subscribe to New Solidarity newspaper, send \$12 for 50 issues to: New Solidarity, P.O. Box 1920, G.P.O. New York, N.Y. 10001. For a subscription to 'The Spotlight' send \$16 for 52 issues to: The Spotlight, 300 Independence Ave. S.E., Washington D.C. 20003. (Interesting backissues concerning the Beast are available).

NOTE: This reading is not copyrighted. Entities are requested to copy and disseminate to others as soon as possible.

**SIGNS TO LOOK FOR WHICH MEAN NUCLEAR
WAR IS ALMOST CERTAIN**

This Awareness indicates that wherein entities are alerted to this possibility in time, whereby the event is not forthcoming at present time, that entities may be alerted to watch for certain signs which will indicate the increased probability of this event occurring. This Awareness suggests that one of these signs being the continued activity of China in Vietnam; the intensification of conflict in the Middle East, particularly in Saudi Arabia, whereby a situation similar to that which occurred in Iran becomes activated; and a situation whereby in the country of Poland that the Pope, in visiting that country, be assassinated or in some other way used to trigger conflict, revolution or violence within that nation; or whereby the nations of Germany or France experience a coup in their governments.

This Awareness indicates that *any of these events* could trigger the nuclear war; that *several of these events* will undoubtedly trigger the nuclear war. This Awareness indicates that this will be of great significance to entities within the United States, for the weaponry of the United States has been reduced. This Awareness suggests that entities in wishing to understand exactly what has happened, the changes which have occurred of dramatic nature, to listen to the Dr. Beter tapes of October 1978, November, December, January and February of this year. This Awareness suggests that those following also can be of assistance.

**BRITISH PLANNING WAR TO STOP THE RISE
OF NEW EUROPEAN MONETARY SYSTEM (EMS)**

This Awareness suggests that the United States as being used as a tool in this nuclear war by the British advisors to force a desperate change in situations regarding the European Monetary System's sudden rise in stature, which threatens the International Monetary Fund controlled by the Illuminati. This Awareness indicates that this as the reason for the recent recognition of Communist China, the efforts being to create instability in all nations which have supported the European Monetary System.

**COSMIC AWARENESS WARNS ENTITIES
TO MOVE AWAY FROM TARGETS**

This Awareness suggests that whereby nuclear war should occur, that entities having time and opportunity to move away from any military base in the United States, particularly any of the military bases having nuclear armaments, for these will be the priority targets. That entities move away from any large populated areas, particularly of an industrial type, whereby such industry produces war machinery or adds to the war industry. That entities move away from any nuclear power plants which may be struck to create damage. That entities generally move toward the unpopulated areas, particularly into heavily forested areas—that the forests can absorb radiation and transmute much of this. This Awareness suggests also that in the event of nuclear war, that entities avoid contact with the areas near the bays on the Atlantic seaboard, wherein Russian neutron and cobalt bombs have been planted.* That entities avoid the fresh water lakes and areas of the Great Lakes within the interior of the United States, for these have been also planted with atomic land mines or cobalt and neutron bombs. That entities avoid the coastal areas of the Pacific, from the California border and south, for these areas also have been planted with cobalt and neutron bombs. This Awareness indicates these cobalt bombs as capable of creating earthquakes—that they have been placed so as to trigger off a major earthquake in California and down through parts of Mexico.

**NATIONAL EMERGENCY POWERS WOULD BE ENACTED
AS DETAILED IN 'THE GATHERING STORM' MATERIAL**

This Awareness indicates that in the event of increasing tension, whereby a national emergency is called, that entities may recall the information previously given* whereby executive orders could be put into effect. This Awareness indicates that there are approximately one million names of entities within the United States who have been issued warrants of arrest. This information being placed on computer, whereby in the event of national emergency a button is pushed and these warrants of arrest are automatically printed and sent to the various local governments. This Awareness indicates that also there are certain assassin groups, terrorists groups who are being trained to create havoc within the United States—partly to give the powers an excuse for setting up greater police controls, and partly to eliminate certain individuals which are considered to be detrimental to the programming which the powers desire to see enacted. This Awareness indicates that for those who suspect that their names may be on this computer, that these entities may wish to receive passports and move to other nations prior to the intensities, or be ready to leave as intensities increase.

**NUCLEAR WAR WOULD BE VERY BRIEF
(How To Evacuate From Target Areas)**

This Awareness indicates that the likelihood is that a nuclear war would be very brief. This Awareness suggests that indications at present are that the United States would lose considerably, that the powers which are in control would cease to be. This Awareness suggests that there are certain forces working with the Russians which are attempting to overthrow the Illuminati without violence, attempting to quarantine these forces, but which are far advanced on many levels, beyond the understanding of the physicists and military strategists of the Western world. This Awareness indicates that the Russians have moved far ahead of the United States and European nations in military accomplishments by their study of Nikola Tesla's works, and by studies into the psychic sciences which have surpassed those in the Western world.

This Awareness indicates that there is no need for entities to panic because of this information. This Awareness suggests that the possibility not as inevitable, nor as unrealistic, nor as realistic, but as a *possibility* that needs to be looked at—whereby entities can, at least within their own minds, be prepared to do something if the event occurs. This Awareness suggests that whereby entities need to be capable of leaving quickly their comfort zone for others, that it is helpful if entities know what items, what goods, can be taken, and where they are located. This Awareness suggests that you look at your belongings, look at the size of your belongings, and determine which are most valuable and can be moved easily in the event of necessity. This Awareness suggests that you also consider what you will need under the minimum survival circumstances. This Awareness suggests shelter and food and warmth as being essential for survival. This Awareness suggests that for those needing medicines, this also be considered. This Awareness suggests that you look at this as a possible necessity without being fearful that it will occur, but being prepared if it should occur.

IGNORING THE DANGER DOES NOT DIMINISH THE DANGER

This Awareness indicates that there are many entities who feel that the discussion of something of this nature is promoting negative images and is alien to spiritual energies. This Awareness suggests: would these entities, who feel this way, dare to speak their thoughts to those children in Cambodia who were forced to lie upon the ground while half-track trucks were driven over them? Would that these entities who feel this way could tell those children, 'Don't think about negative things—think only good thoughts—flowery thoughts, thoughts of beauty.' This Awareness suggests that these children had more beautiful and spiritual thoughts than many of these spiritual ostriches, who hide their faces from threats and dangers, believing that ignorance is bliss—ignoring those dangers in hopes that they will simply go away.

This Awareness indicates that entities can do more in ridding the world of alien forces by looking directly into the eye of the Beast—directly into the eye of the alien force—directly looking into the eye of the hurricane—the gathering storm—of the dangers which threaten—of the wolf outside the door. This Awareness indicates that in looking directly into the eye of the thing, entities can affect—through their *attention*—can affect the energies that drive and motivate the force. This Awareness suggests that you look at the negative without fear, and in your look that you *transmute* that negative slowly, carefully, with great vigor and force, toward the positive, toward the harmonious resolution. This Awareness indicates that ignoring dangers does not diminish the dangers. That facing the possibility and being prepared to confront the possibility allows you to have the courage to use your energies in a proper manner. And this proper manner, right action, is that which can be vital in times of chaos, and can turn the tide of battle, or the tide of events.

**ATTENTION WITHOUT FEAR WILL OVERCOME
THE ILLUSION OF SEPARATENESS
--THE CAUSE OF THE PROBLEM**

This Awareness suggests that those entities within the Cosmic Awareness Movement who are afraid to look eye-to-eye with the forces of the so-called negative side of life, would be better off not being involved in the Cosmic Awareness Movement—that this is not for such timid creatures. This Awareness suggests that these entities were better off to go into their homes, closets, or gardens and smell flowers and pretend the outside world does not exist. This Awareness indicates the purpose of Cosmic Awareness ministers and the initiates and members in being informed is to *assist in giving attention to these negative forces, and transmuting by that attention.* This Awareness indicates attention is like the spotlight being shined upon the force of darkness. Darkness cannot work its manipulative and deceptive deeds when the spotlight of attention has been placed upon it. Therefore it must take on a new face, and pretend to be friendly and nice—and in that pretentious action, if dwelled upon long enough, the force tends to become a reality of friendly and nice qualities. This Awareness indicates there is great potential at present time for reconciling the forces of negativity and the forces of positivity—the forces of Lucifer and the forces of Christianity; the forces of Satan and the forces of humanity. That all of these various conflicting forces, having merged at this time to oppose one another, are in a position whereby a reconciliation is in order. This Awareness indicates that it would be fitting and proper if, somewhere within the next decade, someone would initiate a convention of Christians, Jews, Luciferians, witches, Satanists, Hindus, Muslims, and Krishnas, and all other religions, to discuss with each other areas of agreement, whereby common ground might be found to begin a dialogue. This Awareness suggests that these entities might be very surprised to discover how many areas of agreement can be found. This Awareness indicates it is possible that upon this plane, in such a convention, the entire universe with its conflicting forces—the dark forces of the Satanists who seek to control the minds of others—the shadowy forces of the Luciferians who seek to use the energies of the others—the shiny faces of the Christians who seek to light a narrow, rigid path for others to follow—and the masses of humanity who move in and out of this tapestry. All of these forces within the universe in its various realms have much in common—particularly a desire to be free, to live, to share their values and themselves without being threatened or denied.

This Awareness indicates this as the basic need of every entity within the universe—that all other concepts and differences are secondary needs. Therefore, the threats which are caused by such secondary needs are unnecessary and inappropriate. This Awareness suggests that whereby entities become aware of this basic necessity of life, liberty, the desire for freedom and harmony with others, and begin building a society which respects these basic needs, then there can be peace and a common denominator between all forces. This Awareness indicates that in the meantime, entities must continue in their observation—giving attention to *what is*—whether or not they like the picture they see. This Awareness suggests that those who do not like the situation are free to put their energies—put their lives—into changing that situation. Those who are unwilling to put their energies into such change have little right to complain about the looks of things.

This Awareness indicates *It* did not create evil in the universe; that evil does not in fact exist. That evil is the result of the illusion of separateness, and therefore itself is an illusion. That the illusion of separateness has created entities who believe themselves to be apart from others and from the universe, and who enjoy the illusion of being separate because of the significance and power which separateness appears to give to them. This Awareness indicates that power also is an illusion, and all the accomplishments which accompany that power are illusions. This Awareness indicates that death itself is an illusion, and the fears which accompany the threats are but created by the illusion of separateness. For in the highest levels, entities cannot be destroyed, and therefore have nothing to fear except the various descriptive terms and identifications which they have created to describe themselves as being individual entities and separate from other forces.

This Awareness indicates that the illusion of separateness or individuality is that which has some value in creating a sense of purpose and being; but wherein this separateness is extended too far and infringes on the rights of others, this becomes a compounded illusion which results in that compounded expression which violates, and appears as evil in the universe. This Awareness indicates clear attention without fear pierces the illusion, and dissolves the appearance of evil and the force and illusion known as separateness. This Awareness suggests that the more entities look at the illusion of separateness, hiding behind the face of power, the more these faces will be exposed, and the more those who play the demons *must come forth into the light* of unity and rejoin the ranks of those who follow the *Law of One*.

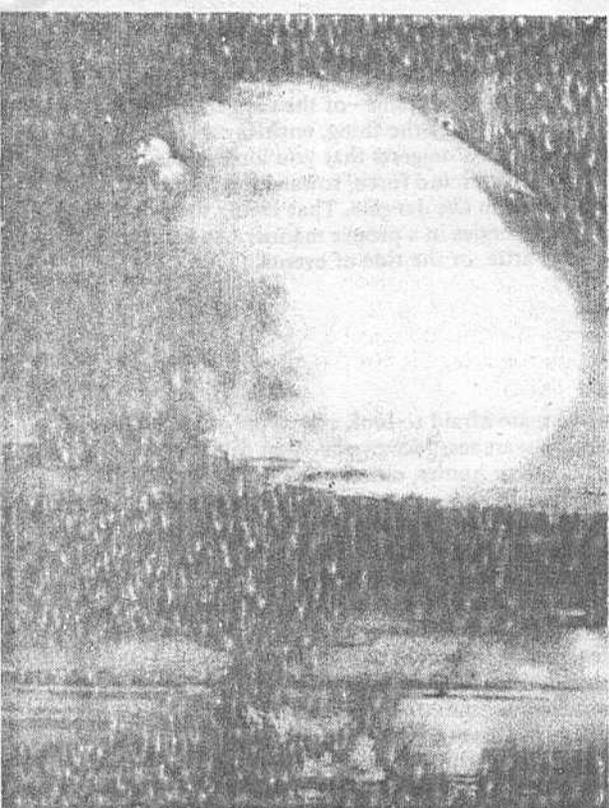

This Awareness suggests that this be the conclusion of this opening message.

THE PROBABILITY OF NUCLEAR WAR

(Today & December, 1978)

(C.A.C. General Reading, March 6, 1979)

COSMIC AWARENESS:

This Awareness suggests that the questioning relating to the opening message yesterday be opened for discussion.

QUESTION:

What precisely are the probabilities of the current nuclear crisis Awareness described last night of actually happening in the next three months? In December, Awareness commented on a Dr. Beter tape, which implied a nuclear war was imminent, and Awareness' reply was that a war was not imminent, but the leaders were playing games with deadly toys, or something to that effect. What were the probabilities of nuclear war when Awareness commented on that particular tape of Dr. Beters?

ED's Note: this questions refers to the October 1978 Audio Tape of Dr. Beter and the response from Awareness was printed on page 28 of 'Revelations of Awareness' Newsletter No. 79-1 (The Gathering Storm).

COSMIC AWARENESS:

This Awareness indicates that at the time of the comment by Dr. Beter, the nuclear war was approximately sixty-five percent probability. At the time this Awareness commented on Dr. Beter's comment, the probability according to actions which had been placed into movement, had decreased to approximately thirty percent probability. This Awareness indicates that during the months that followed, the forces operating through the International Monetary Fund and the various agencies, have regrouped their energies, and re-evaluated circumstances, and have activated a new approach. This Awareness indicates that meanwhile, those forces siding with the European Monetary System, having begun to spread and grow, becoming a greater threat to the International Monetary Fund, created a situation for the International Monetary Fund which was not acceptable to them. Therefore, the International Monetary Fund, in desperation, has begun to re-activate the plans promoted by those elements within their ranks which would lead to nuclear war on a program plan created from the Rand Corporation war-games computer.

This Awareness indicates that the desperation will determine the degree of probability. This Awareness suggests that wherein an alternative to nuclear war is found, this may decrease the probability. This Awareness indicates that the present probability rate is again at sixty-five percent—that the intensity of such a nuclear war is that which can vary, even if it does occur. This Awareness indicates that the computer program from Rand Corporation is promoting the concept of a quick nuclear strike that ends as suddenly as it begins, with certain economic advantages, with certain psychological advantages, and with certain social advantages, after the initial strike. This Awareness indicates this also including certain political advantages. This Awareness suggests that from such a limited nuclear war, the International Monetary Fund and those working along its lines, conceive of much advantage for the programs and changes which would be desirable to them in an atmosphere of the pre-nuclear war situations.

This Awareness indicates that on the other hand, the nations whose interests lean toward the European Monetary System, tend to seek peaceful progress and growth—industrial growth and development in the underdeveloped nations. This Awareness indicates this also has the backing of France, Germany, Russia, certain Arab nations, and to some extent Italy and many officially uncommitted, nations of South America. This Awareness indicates that this development of the industrialization of the underdeveloped nations is not to the liking of those industrialized nations under the International Monetary Fund.

This Awareness indicates that in terms of the sixty-five percent probability of nuclear war, that this does not necessarily imply a nuclear war of great devastation to all the world, but that the potential is there. This Awareness indicates the Rand Corporation's game plan as that which is expected by the Western powers, but the Soviet Union has publicly stated that it does not intend to be controlled by rules of the Rand Corporation's computerized game plan. This Awareness indicates that essentially there has been a dramatic shift in the powers during the last four years, which has resulted in the break-down of detente. This Awareness indicates this information as available from the Dr. Beter tapes, but that this Awareness shall very briefly capsulize this information to allow others to understand in a general sense, what is occurring.

KISSINGER AND ROCKEFELLER ASSISTED RUSSIA IN PLACING NEUTRON BOMBS IN U.S. WATERS

This Awareness indicates the Russian Revolution in 1917 was created by Bolsheviks trained in Lower East Side New York, financed by Jacob Schiff through Chase Manhattan bank, sent to Russia on British boats, and the revolution begun in 1917 to overthrow the Tzar. This Awareness indicates this in part as a revenge against the Tzar having assisted Abraham Lincoln during the Civil War—having pledged protection to Abraham Lincoln in the event that France, under the Rothschilds, should intervene in that Civil War. This Awareness indicates that this in part an effort to conquer Russia as part of an effort to conquer the entire world.

This Awareness indicates that as of 1917, there were certain spiritual organizations, which moved into underground status, submerged their motives and intentions, and these organizations began a plan for re-capturing the Soviet Union from the Bolsheviks. This Awareness suggests that this took approximately sixty years for these entities to move into positions of power, whereby they could begin to have an effect. This Awareness indicates that thereafter these entities assisted those Bolsheviks in power, as they placed the neutron

and cobalt bombs and land mines in the fresh waters of the United States' lakes and around the seaboard on both coasts, and in the bays and inlets on those coasts. This Awareness indicates that this placement of these nuclear weapons was assisted by the Rothschild forces, the Rockefellers, and Kissinger. This Awareness indicates that Kissinger fired General Brown after General Brown had removed many of these nuclear weapons—the excuse as being that General Brown had made bigoted comments, and therefore was a liability. This Awareness indicates that this occurred approximately four years ago. This Awareness indicates that during that period, detente was the fad—that the United States was moving into closer alliance with Russia, opposed to Communist China. This Awareness indicates that this relationship suddenly reversed when the Bolsheviks were removed from power in Russia, and found themselves exported into other European countries and the United States, leaving those in Russia with the control over the neutron and cobalt bombs in the United States waters.

This Awareness indicates that this created a blockade or quarantine of the United States and the International Monetary Fund Bolshevik controls. That in the meantime the Third World Nations, the OPEC nations, were developing their own standards through the sale of oil. This Awareness indicates that likewise these nations were amassing large amounts of gold by purchasing this from open markets. This Awareness indicates this began to weaken the International Monetary Fund's exclusive control over the world's money markets, and this began to create the potential for a competitive money source.

This Awareness indicates that during the last few months, France and Germany, along with the nations of the Middle East—OPEC nations and other countries such as those of South America, India, Italy, and some European countries—have been leaning more toward the concept of the European Monetary System. This Awareness indicates this as undermining the control of the International Monetary Fund. This Awareness indicates that consequently, a desperate move has been initiated by those of the International Monetary Fund, whereby a limited nuclear war is given priority as a means of solving the problem.

**SPIRITUAL ORGANIZATIONS IN RUSSIA
HAVE CHANGED PREVIOUS STRATEGY
(Extra-Terrestrials Giving Help and Advice)**

This Awareness indicates that in another level of viewing the situation, that which is called the Soviet Union—the Russians—this new spiritual organization in power in Russia at present, is being given guidance by forces outside this planet—these being from the Space Confederation—who are attempting to advise and assist the Russians in their technology, and in their political strategies. This Awareness indicates their purpose is to avoid nuclear confrontation, avoid hostilities and violence, in as much as is possible. This Awareness indicates that they will, however, allow violence and the confrontation rather than to allow this plane to be taken over by the International Monetary Fund, the Illuminati and its powers.

This Awareness indicates that the system of the *Mark of the Beast* will never be totally global, although it may receive a footing in the United States and in Europe. This Awareness suggests that this entire situation may be avoided in the event of a nuclear disaster which could eliminate the powers who are seeking to bring this enslavement into being. This Awareness indicates that essentially the technology now available to the Russians is far superior to that in the West, but the Western Illuminati powers are seeking to compensate for this by merging with China and by black-mailing other nations, by overthrowing those nations which can be subverted, weakened, or brought under their control.

**OTHER SIGNS OF WAR.....A COUP IN FRANCE OR GERMANY,
A REVOLUTION IN POLAND, OR SAUDI-ARABIA**

This Awareness suggests that you may watch for a possible coup in France and Germany, or an attempt at such. That Saudi Arabia as also in great danger of being made the next Iran. That Poland as another country which can become a stage for revolution. This Awareness indicates that any of these can increase the probability—that the more these countries are not made unstable, the less likely the nuclear war would be. This Awareness indicates that also the longer such instability is put off, the less the chances of nuclear war.

This Awareness suggests that the Vietnamese and Chinese conflict as that which appears to be diminishing, yet this can also flare up in a brief period and increase the potential dangers again. This Awareness indicates that as this diminishes, the potential danger of war will also subside. This Awareness suggests that when and if the conflict from China and Vietnam subsides totally, that the sixty-five percent danger just mentioned may drop to fifty percent. That the avoidance of further instability in the areas of India, along the Chinese-Russian border, Iran, Turkey, Saudi-Arabia, France, Germany, and Poland—as long as there is no increase in instability in these areas, the potential danger of nuclear war will continue to drop by approximately ten percent each month that this peaceful stability continues. This Awareness suggests that wherein however, instability among these areas begin to increase, the potential each month, beginning in this month of March (1979) may be seen to increase the probability of nuclear war. This Awareness indicates that this can give entities a working formula:

The longer the war is put off, the less its probability. The longer the instability is put off, the less the probability. The greater the increase in instability in these nations, the more nations involved in that instability and the sooner that instability begins to show up—the greater the potential for nuclear war. This Awareness suggests that the most dangerous time appears to be in *May and June.*

This Awareness indicates that it appears that this great intensity at this time can have an effect in diminishing the intensities of the depression which was planned for October of '79. This Awareness indicates that this does not mean the depression will not occur. This Awareness indicates that there are already efforts to undermine the dollar to bring about a greater inflation and an increase in unemployment within this nation. This Awareness indicates that essentially the forces of the OPEC nations, the nations of Germany and France, are supporting the dollar at present time in order to prevent or delay the economic collapse of this country. This Awareness indicates that they also are seeking to rally support from industrialists within this nation, to persuade the powers of this nation to join with their efforts for the European Monetary System program. This Awareness indicates that the recent meeting of Carter with the leaders of France and Germany as that which centered largely around this concern.—that President Carter refused to cooperate in this matter. This Awareness indicates essentially the President as being a puppet, unable to do anything but serve as a mouthpiece for the powers which are governing him. This Awareness indicates that there is grave danger to this entity, particularly between now and the end of June—that this entity may even be used as part of a plan to initiate a conflict.

This Awareness indicates that you also watch the Pope's visit to Poland, the anniversary of St. Stanislaus' death, for this can also create a setting whereby he could be used to ignite revolution in Poland, further upsetting the stability of the world.

NEUTRON BOMBS WILL ONLY KILL PEOPLE....
YOUR PROPERTY WILL NOT BE HARMED

(How Prayer & Meditation Can Help)

This Awareness wishes to comment upon the intensities of a nuclear war. This Awareness indicates that neutron bombs tend to have greater effect upon living things than upon property, and therefore are held in high priority. The physical damage is contained in small areas, with radiation covering larger areas and destroying life; the radiation being that which diminishes quickly to allow the conquering forces to enter.

This Awareness indicates that generally speaking, the Soviets would attack not to totally destroy populations, so much as to wipe out the military might of the United States and its allies. Yet, if carried away by intensities and emotions which could flare up in an explosive manner, the Soviets would be capable of totally destroying approximately half the population of the United States before the situation ended.

This Awareness suggests that those who receive these messages not to panic, not to attempt to choose sides, but simply to be aware of the potential energies which are moving in upon this plane, which have been prophesied in the *Book of Revelations*, which have been prophesied in many ways, and which now are in greater potential than ever before. This Awareness indicates that there is equally the potential for moving through these times without these events occurring, whereby entities may work off these events by giving greater attention—by the proper movement of energies.

This Awareness suggests that those who have inclination toward prayer can do great things. Those who have inclination toward imaging and visualizing and sending light can do great things. This Awareness suggests that the healing techniques most effective are those which work through the process of changing consciousness.

This Awareness indicates that essentially the earth is being controlled by the mass-mind energy which surrounds the planet and emanates from the masses of consciousness. This Awareness suggests that wherein entities in large numbers look at the potential dangers without fear, and can begin to visualize the nations moving through these dangers without the nuclear war occurring, without the Battle of Armageddon, and without the Mark of the Beast being initiated—when enough entities can look at these energies and beyond toward a harmonious world, gradually moving consciousness from those negative images into images of greater beauty and joy—these entities can indeed begin to create an action which melts away the negative images and moves toward that which is the harmony desired. This Awareness indicates that the action of visualization not only effects the mass mind because of the participation of those entities involved in this, but also tends to create a movement which draws in the imaging and leads other entities' visions to follow the same course. This Awareness indicates this as likened unto one who moves in light, creating a vacuum which sucks in others, who then follow behind.

This Awareness indicates that the healing program, the healing technique through visualization or prayer or meditation, is basically based upon that which was just given—the movement from the negative toward the positive. This Awareness indicates this can be referred to as imaging. That the action of prayer is one whereby entities put energy into a situation and gradually move into a level of faith—that their prayer will be answered.

This Awareness indicates that those who do not wish to look at the negative in the first place do some good, but are only approximately 25% as effective as those who can look at the negative and then move from that to the positive.

This Awareness indicates that there is no way possible for the Interpreter, for this Awareness, for the members of C.A.C. to answer all the questions which the members and readers of this material shall come up with. This Awareness indicates that it will be rather pointless to become overly dependent on this Awareness, through this Interpreter, to answer all of your questions or solve your problems. This Awareness indicates that essentially there are many who will not wish to be given this information; that there will be others who will wish to be given more information for their own personal needs. This Awareness indicates that essentially this information has been held off—in part, due to the desire not to alarm entities—in part, due to the frustration which the Interpreter has felt during the past few months regarding the intensities of the previous information given—whereby the Interpreter has actually dreaded to move into trance-levels. This information has also been held off partly due to many entities telling the Interpreter and others that they do not wish to hear such negative information.

This Awareness indicates *It* would be lax in *Its* concern for the needs of humanity if *It* did not convey this information. This Awareness suggests that members of C.A.C. who do not wish to hear this kind of channeling should have the opportunity to be put upon a separate list, whereby they are not given such information. This Awareness suggests that C.A.C. may choose to form a mailing list which can be termed the "Good News Mailing List," whereby members not wishing to know what is occurring on certain levels will simply be sent information of good news, while others are receiving that which is related unto intensities, or that which may be called "Bad News." This Awareness suggests that this can solve the dilemma of the situation, so that *It* can have greater freedom through *Its* channel to inform entities and make them aware of what is occurring. This Awareness indicates this as being a purpose of this Awareness channel.

This Awareness indicates also that each entity reading this information does have personal opportunity for annihilation each day of their lives, regardless of whether there is a nuclear war or not. This Awareness indicates that therefore, it becomes strange for entities to panic at the thought of nuclear war, except in relation to their concern for the welfare of all others who might also be terminated. This Awareness indicates that it is the *magnitude of destruction*, beyond self, which is so frightful when regarding nuclear war. This Awareness indicates it is this very magnitude which requires that this Awareness relay this information as a potential—as a danger—even though it may be upsetting to the placid, peaceful attitudes which entities desire. This Awareness suggests that further questions now may be asked.

ED's Note: For more information on the neutron bomb, please refer to the booklet, *A Magic Happening at Yorktown* (\$3.00 in C.A.C. Book Catalog). This tells what happened when the Interpreter, the C.A.C. staff and other members just happened to be in the Senate chamber in Washington D.C. the day Congress passed the neutron bomb legislation. The story is weird but true.

QUESTION:

How does the urgency, or the possibility of the nuclear war, affect the priority or urgency of our 'Beast' mailing of 23,000, now being processed here at C.A.C.?

**DON'T WRITE C.A.C. ABOUT THIS EMERGENCY SITUATION
(ASK AWARENESS THROUGH YOUR OWN CHANNEL)**

COSMIC AWARENESS:

This Awareness indicates that essentially this information is still important to be released, but that this urgency of potential war is that which 'upstages' the other information. This Awareness suggests that the Beast material may be worked in your spare time. This Awareness suggests that this when, and if, there is spare time. This Awareness suggests however that those other entities who have received the Beast material and are copying this information, may continue in that action. This Awareness suggests that the present information being released may also be copied and released by other if there is time---that generally speaking, there is not much time for this to be re-copied and released.*

This Awareness suggests that the likelihood of a nuclear war as discussed here seems to fade after July, if it has not already occurred. That this does not mean it will not flare up again, but that the intensities appear to be most strong during the period between now and July. This Awareness suggests that entities receiving this information take stock of their own lives and not panic, but look carefully at the areas in which you live, and determine what your actions will be in case you see this event coming into being from the signs which this Awareness has suggested that you watch for. This Awareness indicates that a dialogue back and forth in letters or in questions would be time-wasting and too slow, and would create a dependency that would hinder your own looking and the opening of your own channels to this Awareness. This Awareness suggests that you look very carefully within, asking this Awareness, asking those higher forces which you believe in, 'what should you do?' And with great questioning, you shall receive clear answer, based not on emotion and panic, but on practical approach to the situation.

This Awareness suggests that except for rare questions which are of general interest to all, and which are timely, this Awareness suggests that C.A.C. not bother to answer questions being sent in from the membership regarding the message just given relating to the potential for nuclear war. This Awareness does not wish to create panic, nor does it wish to swamp the office and staff of C.A.C. with the fears and misgivings and arguments and concerns of personal danger that many of the members might wish to question and seek guidance on. This Awareness has presented this information as a desire to inform entities of what may occur--not to panic entities, but to give them a chance to prepare themselves in case this does occur. This Awareness indicates that enough has been given to allow entities to make clear determination of their route or program for dealing with such emergencies.

THINGS TO CONSIDER WHEN PLANNING YOUR ESCAPE ROUTE

This Awareness indicates that many entities may choose to sell their property and move to other locations, whereby some entities may rent their property; others may hold on to their property and be ready to go on a quick vacation into the country at a moment's notice. This Awareness suggests those moving to other parts of the country to carefully note their route, to consider the lateness of a movement--whether the routes would be closed, would be clogged by excessive traffic, would pass by areas which would be potential targets, or whether the routes would be clear and open for quick and easy exit. This Awareness suggests that entities also consider when they would make their movement, if this becomes necessary, whether to wait until the last moment, or whether to move when certain signs begin to show.

This Awareness suggests that entities really wishing to watch the situation to send for the Dr. Beter tapes, and to watch the newspapers of the U.S. Labor Party, the Spotlight, and certain articles which appear in the controlled press, which often hint, without saying much about what is occurring. This Awareness suggests that there are other sources of information, particularly those who have access to foreign news. This Awareness indicates the staff of C.A.C. as limited in its capacity of solving all personal problems of members. That the responsibility is not theirs, but is the responsibility of each individual to be informed and to make their own decisions. That the staff of C.A.C. can only do that which it is capable of doing. That these entities have already shouldered more responsibility for keeping the membership informed than would normally be required of entities.

**SPECIAL INFORMATION FOR THOSE
LIVING IN CALIFORNIA**

QUESTION:

Awareness, to head off a barrage of questions from our many members in the San Francisco Bay area and around the San Andreas fault: would Awareness clarify the statement about the bombs placed beneath the water that might trigger earthquakes? If this is a limited war--targeting military areas--is it a strong possibility that these earthquakes also will occur?

COSMIC AWARENESS:

This Awareness indicates this as in the affirmative. This Awareness indicates that there are enough forces within these devices to create a very devastating earthquake in that area. This Awareness suggests that those in that particular area may watch even more closely for the signs which have been given than others in other areas. This Awareness suggests that any entities wishing to move, may choose to move inland from that area, toward the Rocky Mountains, toward Arizona, Nevada. This Awareness suggests that the eastern part of California should be sufficient to avoid the greater shocks. This Awareness suggests that the areas of any inland State, or those States North, appear to be safer.

This Awareness suggests however, that you not panic from this information. That the indications are that the first earthquake would simply be one of a warning, rather than of intense devastation. That after that occurs, it is not taken seriously, then

* A good clear, sharp copy of this reading, suitable for offset reproduction is available from C.A.C. (A \$10.00 donation is requested to cover costs).

a more intense earthquake would be given; and, following that, an even greater earthquake. This Awareness indicates that this appears to be part of a program to assure the United States that the geophysical warfare of Russia as that which is real and formidable. This Awareness indicates that if such an earthquake occurs, as is intense, that entities may then consider it time to leave.

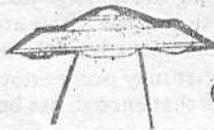

This Awareness indicates that you continue seeking information, keeping abreast of events, and remember that all this can be avoided—that the future is never fixed; that consciousness is all that is, and consciousness can create or change forces which are in movement.

THE LAW OF VIBRATION

*New Law. Please add to your booklet,
The Cosmic Laws of Cosmic Awareness*
(\$3.00 available from C.A.C.)

This Awareness indicates that following is a very important consideration for those who can see its implication: That the *Law of Vibration** states that any vibration which is sent out for good, for service increases into higher frequencies as it moves through space, until it returns to its origin, bringing the gifts of those higher frequencies. That forces drawing on vibration for selfish purposes of lust, power, and greed—drawing these forces into themselves—will receive vibrations that decrease in their frequency level, moving into lower frequencies as they enter into one's being—requiring that the being needs another 'fix' of incoming vibration and energy, then another, and another, as though one were addicted. This Awareness indicates that magnetism—the drawing of energy—decreases the vibratory rate, while radiance—the giving forth of energy—increases its vibratory rate. That wherein entities radiate good, those energies increase into higher frequencies, and bring back good. Wherein entities send forth selfish energies, those energies bring back, as magnets, the lower vibratory forces.

This Awareness suggests that keeping this in mind, entities may use these vibrations in meditation, in visualization, in prayer, in their chants, in their situations, to increase the frequency levels of the vibrations in their lives, and in the world in general. This Awareness indicates the implications of this also explain why forces of darkness continually need to feed on the energies of others, because they never receive enough energy for themselves through the universal vibrations. This Awareness indicates that this also explains why forces of darkness will always lose in the end—for the force of love creates greater and greater power for those who love, and the force of greed demands greater and greater power in order to survive.

WILL THE SPACE PEOPLE INTERVENE IN CASE OF NUCLEAR WAR ?

(Don't Hold Your Breath Waiting for the Rapture)

QUESTION:

Awareness, there are many entities in the C.A.C. membership, and elsewhere, who believe the information put out by a number of these so-called UFO experts like Alan Michael—that a nuclear war will never be allowed by the space people: that if these missiles go up, they will be inactivated, and it won't occur. What is the truth about this in reference to this situation described by Awareness?

COSMIC AWARENESS:

This Awareness indicates that this as relatively accurate in the following sense: This Awareness indicates that it has been suggested by this Awareness that a nuclear war at the time of this reading as being approximately 65% probability. This Awareness indicates that it also was suggested that the intensity of this nuclear war is that which is highly variable. This Awareness indicates that essentially it is unlikely that the nuclear war, if it did occur at all, would be greatly devastating in the manner that many entities might imagine.

This Awareness suggests that in the first place, the Russians have the capability of stopping most of the United States' missiles before they even reach their higher altitude levels—shortly after leaving their launching silos or platforms. This Awareness indicates that this as a result of technology given them by the Space Confederation. This Awareness indicates that this relates also unto information already available in the Dr. Beter tape for January of 1979, whereby this entity explains certain systems used by the Soviets and by the United States for tracking and destroying missiles. This Awareness indicates entities wishing to know more about this may listen to this tape. This Awareness indicates that also, the Space Confederation as working in areas of thought-control, using certain vibratory mechanisms that can influence the blocking of the mind of an entity, to prevent the entity from activating certain mechanisms. That some of these mechanisms are also under control by the Space Confederation, whereby they can be inactivated in flight by certain vibrations.

This Awareness indicates however, there are also certain so-called aliens, or UFO forces which are not with the Space Confederation—these forces working on the opposite pole, for other purposes—who also have high technology and can counter some of the technological capabilities of the Space Confederation. This Awareness indicates that the powers of these beings, working in the Luciferian realm cannot be ignored or underestimated. This Awareness indicates that essentially the situation at present is one whereby not only are humans involved in a possible conflict, but also the forces of the Luciferians, or the entities from Orion, are in conflict with the Galactic Space Command, or that which is often called the Space Confederation. This Awareness indicates that the Space Confederation has been attempting to keep those forces from Orion from entering this plane, but these forces enter—particularly during October, during meteor showers whereby they may enter with the meteors.

This Awareness indicates that there are forces which are very formidable in many ways, and that some of these forces have powers which cannot be shrugged off simply with a statement that the space people have power over nuclear weapons. This Awareness indicates it is not a matter of humans versus space-people. It is a matter of different types of philosophies by both humans and by space people. That essentially there are those humans who are the tools of the space people from Orion—there are also humans who are receiving directions from the peaceful Space Confederation, the Galactic Pact, or Galactic Space Command.

This Awareness indicates that more than this would simply lead to increased questions that are not answerable at this time. This Awareness suggests however, that entities may experience being beamed up by certain space ships, if it reaches a point whereby that is the only alternative. This Awareness indicates that this as rather like a 'last resort'. This Awareness suggests that the Galactic Pact, or Galactic Space Command, or that which is called the Space Confederation—these entities prefer not to become involved in the affairs of others, but to let those others work out their own destiny and their development, as much as is possible. This Awareness indicates that their purpose for interfering would be only if it becomes apparent that the planet itself is threatened, or that the mass of humanity would be enslaved by forces which they could not overthrow. This Awareness indicates that it is a possibility—this being approximately fifty-fifty possibility of divine interference in a very dramatic way, but this Awareness indicates also that this would not occur until the time indicates an absolute necessity of such occurrence. This Awareness indicates that there is approximately that fifty percent possibility of such a necessity. There is also approximately fifty percent possibility that the human race can work this situation out for itself, without the need for such dramatic divine interference.

This Awareness indicates by 'divine interference' it refers to that which has been called 'the rapture'. This Awareness wishes entities not to sit back on their haunches and wait to be raptured, but rather to enter into the activity of raising the vibrations of this planet, caring for themselves and their loved ones, and for others through service, through becoming aware.

QUESTION:

One question there wasn't time to ask in relation to the earlier reading about the possible atomic threat—this question for possible inclusion in that reading when we mail it out, and the question is this: In the event that this does occur, is there something readily available to entities, perhaps herbal or something, that would help them either prevent or overcome radiation sickness?

COSMIC AWARENESS:

This Awareness suggests that baking soda and epsom salts in a hot bath can draw out much radiation. That the eating of lemon peelings can also be of great benefit in relieving radiation. This Awareness indicates that D-Cell water as beneficial. That deep breathing oxygen can be of great benefit, and that pure drinking water in large quantities can assist.

This Awareness indicates that if nuclear war should erupt, there will be interference from the Galactic Space Command, who will become involved in neutralizing radiation. This Awareness indicates also, that entities may release radiation from their own being by fasting, using fruit juices, preferably grape juice and citrus juices. This Awareness indicates that mud baths can also be quite valuable in drawing out radiation affects.

This Awareness indicates that the likelihood of actual population destruction from a nuclear war as being quite limited. This Awareness suggests that the likelihood of military population around military bases as that which is relatively high in comparison to the percentage given previously. That it appears highly unlikely that civilian populations would suffer from nuclear war—this in reference to cities. That those entities who are involved in strategic areas of military targets may suffer, according to the percentages given previously. This Awareness indicates, however, that there can be that problem resulting to civilians caused by the national psychology which would result from a nuclear war of any type. This Awareness indicates that there can be violence perpetrated by fellow citizens against each other, by concerned government agencies against those who are seen as potential threats. That these can be of greater threat than actual nuclear radiation. This Awareness indicates there also can be that threat of accident when masses of people begin to panic and move with great fear, throwing caution to the winds. This Awareness indicates there also can be some danger in terms of geophysical warfare and affects.

TRANSMUTING MEDITATION

(A Method to use NOW to keep it all from happening)

This Awareness wishes to take entities on a mental voyage and stretch the areas of comprehension. This Awareness suggests you visualize a sphere of space, calling this sphere and all that is within, *consciousness*. This as a sphere of consciousness. This Awareness suggests that you examine this sphere of consciousness and notice that it is likened unto a kind of gelatin or plasma—being very thin and pliable. This Awareness suggests that you may also notice that wherein you and others focus or look toward this field of consciousness, an energy moves which tends to draw in a thickening action, causing the consciousness to collect around that point or that significance—the focal point on which you send your focus.

This Awareness suggests that you may examine those points of significance, those focal points, and observe that they appear to be more dense, more thick—likened unto gelatin that is beginning to set, or to harden or to crystallize. This Awareness suggests you now visualize this field of consciousness having many such points within it, wherein these fields, these focal points, have crystallized or are very thick and gelatin-like; and wherein other areas are very thin and spatial, whereby movement through those areas is without resistance; but movement through the thick, gelatin, crystallized areas becomes quite difficult, with great resistance.

This Awareness indicates this field of consciousness which has now been created as a model, can be used to describe many different experiences and realities. This field of consciousness with the thick globules and the thin spatial areas can be used to describe the nature of the universe, with its stars and matter—the planets, the various areas wherein focuses have created crystallized bodies.

This Awareness indicates that this field can also be used as a model for examining the nature of the human consciousness, the human mind. This Awareness suggests that using this model, equating the significant focal points crystallized and thickened in this model, to those thoughts, those images, those ideas that are crystallized and thickened within ones consciousness—entities can begin to recognize a similarity between their own belief systems and this model of consciousness.

This Awareness suggests that entities may also begin to examine the thick globule or the crystallized points while simultaneously examining their own belief focal points, their own concepts which are held as significant, and things which 'matter' to them. This Awareness indicates this model can allow entities to super-impose their values and beliefs upon these thick, crystallized areas in the model.

This Awareness suggests that the same action of applying the model to the mass consciousness is also appropriate. That you visualize using the model as a background for super-imposing mass consciousness values and significances upon, in order to see the similarity of the values of mass consciousness and that of the model. The crystallized points, the focal points in the model are seen in the mass consciousness as crystallized concepts and ideas which are solid, fixed, and 'matter'.

This Awareness indicates in these applications one can see how consciousness, the field of consciousness can be seen in all areas, whether physical or mental, whether individual or in mass consciousness levels. This Awareness indicates this has other applications also, but these will not be considered at this time.

This Awareness now wishes entities to look again at the field of consciousness, the model. That in examining this field, certain areas have been crystallized by the focusing of energies into that area, causing a thickening of the consciousness, a thickening and a gelatin action to occur in those areas where the consciousness focused and the significance or point began to matter. This Awareness now wishes entities to visualize moving directly into the center point of the the crystallized area—not looking at this area from outside, not focusing on the area, but as *light itself*, moving directly into the center of the focal point and being inside that point of significance—being inside that crystallized point within the field of consciousness. And from inside that point, turning up the amps of their being, turning into light and radiance, and radiating outward, giving attention in all directions—focusing in all directions at once, radiating outward and creating inwardly a vacuum, as you send energies in all directions from that point.

This Awareness suggests that this begins to dissolve the crystallized energies of that point in that field of consciousness, allowing that energy of that point to be spread in all directions throughout the field of consciousness. And in this manner, the essence of what existed in the crystallization is released into the field of consciousness, evenly scattered in all areas, dissipated into consciousness itself—the significance being wiped out entirely.

This Awareness indicates that this action which has just been described is the action which entities may use for all forms of magic, all forms of transmutation of negative energy into harmonious energies. This Awareness indicates that this action which has just been described, when understood completely, can be used for healing others at a distance, for healing your own illnesses, for healing the illnesses of the world, for dissipating negative forces, for changing activities which have been prophesied which are building for negative purposes—by changing these into other forms, other energies through the transmutation and the dispersing of those energies.

This Awareness wishes you to understand the profound significance of that image which has just been described, and to practice this action in your imaging and in your meditations.

This Awareness now wishes you to look again at the field of mass consciousness, and look at the negative forces within that field of mass consciousness which this Awareness has previously described: all of that energy which has been building upon the concept of the Mark of the Beast, this energy which has been in motion for hundreds, for thousands of years by thousands, by millions of people and their focusing, their minds—this concept of the Mark of the Beast wherein marks would be placed upon the hands and entities would be enslaved. This Awareness suggests you look at that field of energy called the mass mind, and locate within that field that concept which has been crystallizing around the ideas presented in the *Book of Revelations* about the Mark of the Beast—all of the energies and the technology and the manipulation and the political and secret efforts of entities to bring this about—all of the worry and talk and conversation of entities who concern themselves with this and speculate on what will happen. This Awareness suggests you look directly into that field of consciousness known as the mass mind and locate within that field the energies of that 666.

This Awareness asks that you now, when locating that energy, move your very being directly into the center of that energy, carrying with you the *Divine Light*. And from inside the most secret point within that energy, this Awareness asks you to begin radiating that light, begin radiating and spreading that light from that secret point outward. And as your light spreads and spreads and moves outward and radiates in all directions, that you begin visualizing the energies of the 666 as it begins to dissolve into the field of consciousness which created it in the first place.

This Awareness suggests that you repeat this action and sustain this action of radiating from inside the 666 outward, sending it outward as 999, in all directions, reversing the energies—not focusing upon the 666, but focusing from the 666 in all directions outward, toward 999—moving from the center out, rather than focusing from outside into the center.

This Awareness suggests in this manner you shall be an instrument in transmuting those energies of the Beast into light, and dissolving its power, and creating in its place freedom.

This Awareness indicates that this method of transmutation may be used on all levels for those things which you desire to dissolve and transmute and dissipate. This Awareness suggests that this also can be used wherein an entity is ill and you visualize yourself moving into the heart of the illness and transmuting by radiating from that inner point outward, until the illness is seen to be totally dissolved.

This Awareness indicates that questions relating unto this method may be open, if the method has not been presented clearly. This Awareness wishes that entities begin using this in their lives on all levels, and in actions which will help to transmute the energies of the Beast as well as the potential for the nuclear war, and other illnesses of the mass mind.

THE FEAR OF DEATH

(Closing Message) (March 6, 1979 reading)

This Awareness indicates that during the lifetime of most entities upon this plane, many have been controlled by the fear of death. Many have used the threat of death to control others. This Awareness suggests that 95% of all human affairs have been regimented and controlled because of a threat of death.

This Awareness indicates that entities pursuing personal security at the expense of personal happiness—entities pursuing personal security at the expense of personal expression—entities pursuing personal security at the expense of others—entities pursuing personal security at the expense of freedom: these entities have been controlled in 95% of their activities by the fear of death. This Awareness indicates that wherein an entity does not have the fear of death, but whereby this is reversed, and an entity has only an approximate percentage of 5% fear of death and 95% desire to be free, to express, to serve others, to love others, to love life—such an entity is 95% free, and these entities are rare, but such entities are happy indeed.

A PINPOINT OF LIGHT IN THE DARKNESS

(Opening Message for C.A.C.)
General Reading No. 7
March 9, 1979

This Awareness indicates that (the information as being somewhat premature in relation to what is presently occurring), yet this Awareness wishes to indicate that there is seen, for the first time in many months, a ray of light, a ray of hope. This likened unto a pinpoint of light shining through into a dark room; which indicates the possibility that there can be a dramatic transmutation of many energies upon this plane, whereby much that has been indicated can be altered and the intensities alleviated greatly.

This Awareness indicates that this not intended to discard what has been indicated as irrelevant, but rather as an indication that there does appear to be some new potential energies which can bring about greater enlightenment very rapidly. This Awareness suggests that more may be available on this in the future months, whereby this becomes more clearly established. This Awareness indicates this relates largely, not in terms of events that are occurring on the secular levels in the exterior manifestations, but rather on certain adjustments which are occurring within consciousness, within the mass mind.

This Awareness indicates this taking into account the effects of the meditation given in the previous reading and the response of C.A.C. membership and others, in working with this meditation for the mass-mind transmutation. This Awareness indicates that, depending on how well this meditation is conducted, this will indicate the nature of much of the future transmutations of the energies. This Awareness indicates there are other forms of meditations and other techniques which may be also introduced to assist in transmuting certain other energies. This Awareness indicates this as coming in different ways at future times, according to the will of this Awareness and the response of entities.

(Extra copies of this reading are available for \$2.00 each from the address below. Offset reproduction proofs are available for \$10.00. Entities)
are requested to reproduce this material immediately and disseminate to as many others as possible, particularly to those in government.
