Cosmic Awareness Communications
P. O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the *Force* that expressed *Itself* through Edgar Cayce, Jesus of Nazareth, the Buddha, Krishna, Mohammed and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the *New Age* of spiritual consciousness and awareness. Since 1963 *Cosmic Awareness* has been communicating through certain carefully-trained channels. The information contained herein was received from deep, super-conscious trance states and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the *New Age* and those who shall inherit the *New Age*. Throughout the many thousands of 'Readings' given through these channels, *Cosmic Awareness* repeatedly tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. *Cosmic Awareness* will only indicate and suggest. Members of *Cosmic Awareness Communications* are invited to send in questions (on anything of general interest) for possible publication in this Newsletter.

QUESTION:

In the Past, CAC has received requests from members asking if we have someone who can do good, reliable astrological charts. We had hoped the entity KB would be able to this by mail, but this situation didn't develop.

Now Ananda Li Miller has offered her astrological experience to the membership and we would like Awareness to comment if this is a good idea and whether her capabilities in this area would be sufficient. Also whether Annie may have some other type service she could render in addition to doing astrological charts?

COSMIC AWARENESS:

This Awareness indicates that this entity as capable of giving this service in terms of astrology—that the entity can do this particularly on cassette tapes in a manner that is expedient and efficient.

This Awareness indicates that the entity also has certain abilities relating to counseling—this in terms of a spiritual counseling which may also be included in the tape, particularly slanted toward the person's situation as indicated by the chart.

This Awareness suggests that this entity also has very strong healing powers, particularly in terms of the laying on of hands, but also the entity as capable of absent healing. This as a quality which may be developed.

This Awareness suggests that the information necessary for this entity to create the proper charts and to give the astrological readings may be presented in a certain mail-out that will explain what is necessary and what services she offers.

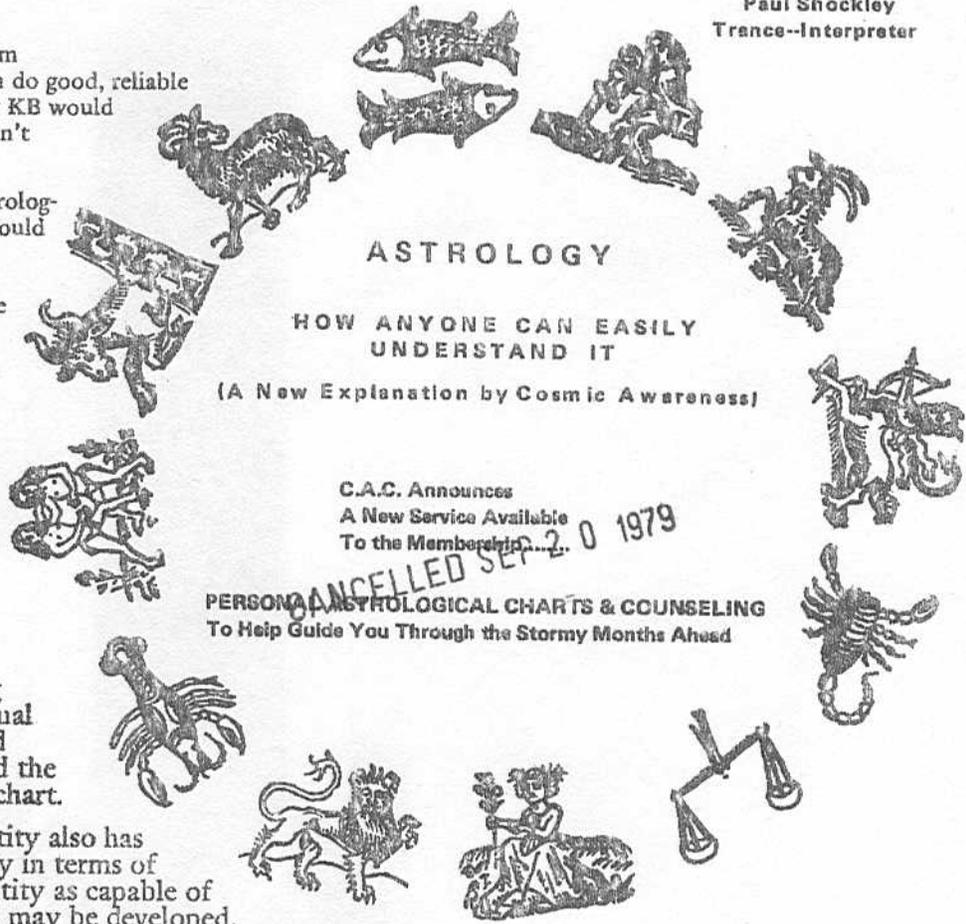

*Please see end of reading for fees and information on this new astrological charting and counseling service.

This Awareness indicates that the entity Stuart Turner of the Aquarian Church as also one who has particularly clear energies in regards to astrology. This in particular relating to psychological analysis using astrological sources of information. This Awareness indicates that the Aquarian Church, the Goodship, may release information regarding this entity, Stuart Turner, in regards to his particular capabilities.*

This Awareness indicates that it can be of great service for entities to have access to astrological information in making decisions during the coming three years in particular. That there can be some intensities during these times which entities may be prepared for, and in preparation may avoid mistakes.

*Entities subscribing to Paul Shockley's 'Voyage to the Source' Newsletters will receive information on the service of Stuart Turner.

Paul Shockley
Trance-Interpreter

ASTROLOGY

HOW ANYONE CAN EASILY UNDERSTAND IT

(A New Explanation by Cosmic Awareness)

C.A.C. Announces
A New Service Available
To the Membership

PERSONAL ASTROLOGICAL CHARTS & COUNSELING
To Help Guide You Through the Stormy Months Ahead

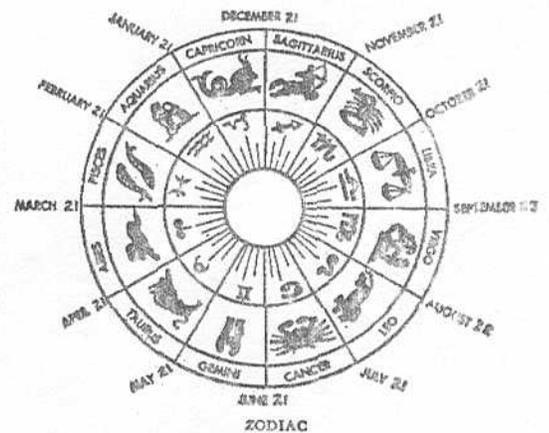

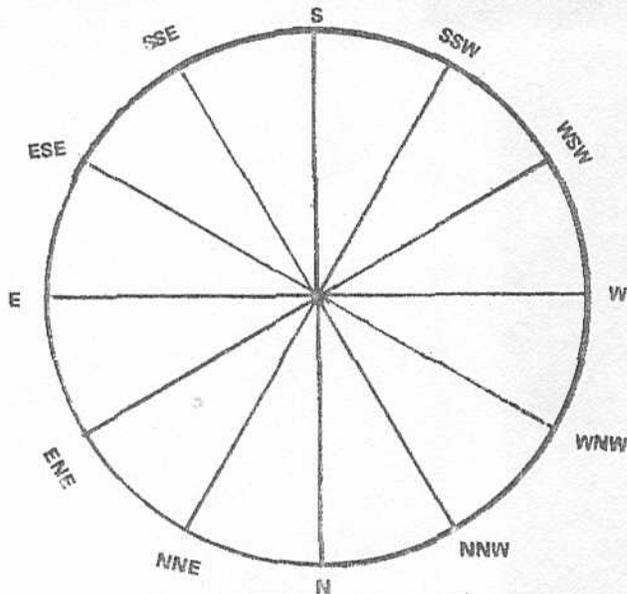

CANCELLED SEP 20 1979

This Awareness wishes to comment briefly on astrology.

This Awareness indicates that astrology is not basically a science of the constellations' influences upon the earth, even though the constellations have influence upon the earth. This Awareness indicates that this is not essentially a science of planetary influences upon the earth, even though the planets have influence upon the earth. This Awareness indicates that the signs of the zodiac are *not* the constellations. That the signs in fact are the *directions of the forces of the universe*.

This Awareness suggests that you take a square piece of paper, put North, South, East and West upon these corners, then write in North-Northeast, East-Northeast, East-Southeast, South-Southeast, South-Southwest, and West-Southwest, West-Northwest, and North-Northwest, and you shall have a zodiac. All that remains is to take these twelve directions and place signs upon these directions.

This Awareness suggests that after this, you place a series of star systems or constellations inside those directions, giving them the same signs or direction symbols. This Awareness suggests that the center of this to be the earth. That around this earth be the planets.

This Awareness indicates what you are looking at is the influence of these forces in these various directions upon the central point, which is the individual around which the zodiac influences are acting and being centered upon. This Awareness indicates that essentially it is not the constellations that are creating the signs, it is not the planets. The constellations are named after the signs which they rule. The constellations move and change their positions, just as the planets move and change their positions. Yet the signs remain the same, just as directions remain the same.

This Awareness indicates that the various directions of the universe emanate a different energy. That wherein a planet or constellation moves in between an entity and that energy which is emanating from the outer edges of the universe—that energy is blocked by that planet, by that constellation, and therefore the entity in the center receives a different kind of energy. This Awareness indicates that this is the affect upon entities—the astrological affect. That wherein there are aspects and angles between planets, between these forces of the signs, the energies of the signs upon an entity, these also have their affect and this is also an astrological influence.

The Science of Astrology is Millions of Years Old

This Awareness indicates that the science of astrology is that which is over four-hundred thousand years old upon this earth and is essentially millions of years old in the universe. This Awareness indicates that it has been lost, it has been confused, it has been perverted, it has been distorted. The astrologers have been mistaken, the scientists have been mistaken—but the science itself is accurate. This Awareness indicates interpretations may be mistaken, but the energies are what they are.

This Awareness indicates that science originally discarded astrology because Copernicus discovered the sun was center of the solar system and not the earth, and therefore believed that horoscopes were in error as the horoscopes put the earth in the center. This Awareness indicates that were the horoscopes to have put the sun in the center, the influences acting upon the sun, with the planets and various signs around the sun, would not have given an accurate astrological influence on the individual unless the individual also was on the sun. This Awareness indicates that this would have given a chart for an entity living upon the sun. That the chart is not the same as an astronomical chart of the solar system, but rather is determining the *influence* upon the individual. This Awareness indicates astronomy deals with quantity, with locations, with masses; whereas astrology deals with quality, with influences.

Aquarius the water carrier.

This Awareness indicates that another argument which science has used to discredit astrology is that the constellations have moved out of their original placements and therefore the signs are inaccurate. This Awareness suggests that many scientists are saying that there are no longer twelve signs. One particular book has been written giving 14 signs, because the constellations have changed. This Awareness indicates that *It* has mentioned previously, the constellations are *not* the signs. The constellation was simply named *after the sign which it rules*, just as planets are placed in certain signs which they rule. This Awareness indicates the concept of a ruling sign, or a planet in ruling sign, simply means that the sign has a quality similar to that of the planet—the constellation has an emanating quality similar to that of the sign which it rules.

This Awareness indicates that in ancient times entities did not have calendars as you have now, hanging upon their walls; therefore, they had other means of reading the time of year, the time of cycle, and these times were read in the heavens. This Awareness indicates that as entities looked upward and saw that which was the Leo constellation at a particular point, they knew what time of year it was. This Awareness indicates that wherein entities looked up and saw the constellation of Taurus, they knew what time of year it was, according to the location of that constellation.

This Awareness indicates that from this time of year they picked a symbol which would typify the type of energy which was prevalent at that time of year. This Awareness indicates the bull as being an animal which typified certain energies of fertility during the spring of the year; therefore, the bull was superimposed over the star system (which, incidentally, does not look like a bull in any shape or manner unless one's mind is conditioned to see bull superimposed over that star system.) This Awareness indicates in this manner the ancients then began to condition their minds to seeing the bull when they saw that pattern.

This Awareness indicates that wherein it was possible for entities to choose a symbol to typify a type of energy or consciousness expressed by that sign, and wherein there was a pattern of stars which was associated with that energy and the typifying symbol and pattern of stars could be brought together in a particular symbol, they would do so. This Awareness indicates the scorpion as being a symbol which fit coincidentally into the pattern of stars which was used which emanated the energies of that sign now known as Scorpio. This Awareness indicates had the star pattern been of a different nature, looking like a creature of

a different type, the entities might have chosen a different symbol which expressed the same kind of energies as indicated by the sign of Scorpio or by the constellation within that sign.

Sagittarius the archer.

This Awareness indicates that in other words, astrology is not based on the signs known as the constellations, but rather the symbols were created to fit the energies and superimposed over the constellations, and the constellations were then named after those symbols and those energies. This Awareness indicates that the energies themselves emanate from the outer edges of the universe, and toward the subject, which is the individual at any time or place within that universe.

This Awareness indicates each entity, where ever that entity is, has around him or her a zodiac of energies which are focusing upon that entity. This Awareness indicates the entity is receiving influences from all directions. This Awareness indicates the entity also is emanating his or her own personal influences outward.

This Awareness suggests that the astrological influences are of a very high vibration working on the etheric body and are influencing in a manner which is of a greater force for this kind of energy than is for example, a tree, a magnet, or another entity nearby. This Awareness indicates that many scientists have argued that the mother standing near the child has greater influence than Mars, Jupiter, or another planet. This Awareness indicates that this is so on one level, for the mother has a certain type of influence, but that vibration emanated by the mother is not of the same octave, not of the same frequency, as the vibrations emanated by Mars, Jupiter, Pluto, or any of the other heavenly bodies.

This Awareness indicates that psychology can deal with the environmental effects of local behavior upon the individual, such as whether the individual had a mother nearby or not. This Awareness indicates that astrology reflects the cosmic influences upon the child and can determine whether or not the entity had a mother nearby. This Awareness indicates that you notice the difference: astrology can determine whether the child had a mother nearby, when the mother was present, and what the relationship was. This Awareness indicates that psychology or psychiatry determines what affect the presence of the mother may have had upon the psyche of the child.

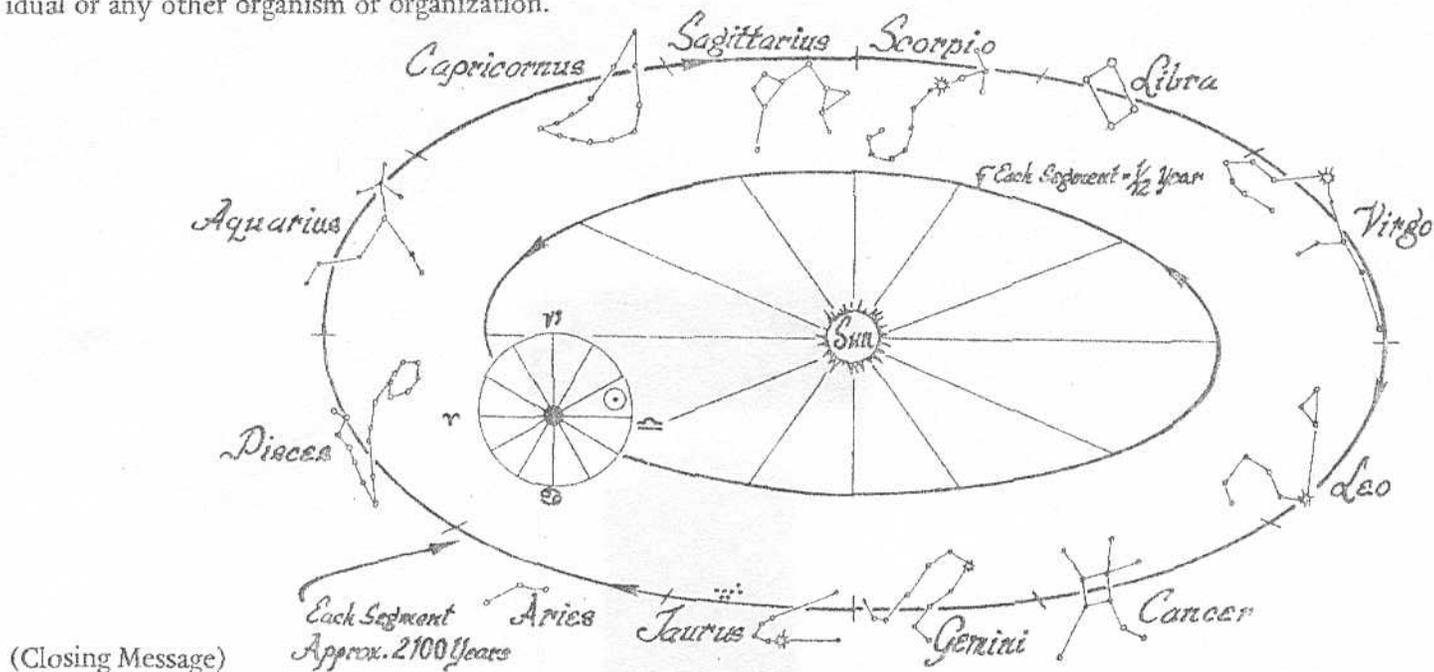

Leo the lion.

Scorpio the scorpion.

This Awareness indicates that psychiatry and psychology deals with the child's innate nature in relation to the nature of the mother and other environmental factors, but that astrology itself deals with the influences of the etheric and atomic particles, the consciousness, the universal awareness and consciousness which emanates throughout the cosmos and influences cells, the emotions, the feelings, the agility, motion, and the physical features of an individual or any other organism or organization.

This Awareness indicates that there are many complexities of relationship between forces of a cosmic level, of a social level, of a personal level; that these appear to be impossibly complex, so that a mind might feel like a spaghetti factory in trying to unravel reality from all of these complexities. This Awareness suggests however that it is much like a musical scale, or chord, whereby a note is played --that note echoes on a higher vibration, an octave higher, and that higher octave also creates an overtone still one more octave higher, which in turn creates another overtone one more octave higher and so forth into infinity.

This Awareness indicates that likewise, a chord may be played whereby each note of that chord creates overtones of higher octaves which in turn create higher octaves, etc. into infinity. This Awareness indicates that these being only a few of the sounds creating vibrations that move on into infinity and never cease in their movement, each one creating a higher sound which becomes much harder to hear as it is softer, losing volume while moving into higher frequencies. This Awareness indicates that likewise, events which occur on one level echo into another level, and into still another level.

This Awareness indicates the individual has within himself many atoms; that these atoms are tiny solar systems. This Awareness indicates that in the heavens entities look upward and see many stars; these stars are solar systems. That these solar systems are likened unto molecules, similar to the molecules within an entity's body. This Awareness indicates that many of these molecules create certain patterns; many of these stars create certain patterns. This Awareness indicates that atoms create molecules; molecules create patterns; patterns create that which becomes substances and solids. This Awareness indicates these molecules creating chemicals; chemicals and minerals and other substances, coming together, create organs and organisms and organizations. This Awareness indicates that these creating those greater organisms, organizations or organic creations called planets. That these planets adding together around a central sun, may be likened unto molecules or atoms. That these suns coming together may be likened unto chains of energies, forms, shapes.

This Awareness indicates that there are certain forms and shapes and energies that flow between suns, between planets, even as there are energies which flow between atoms and their parts. This Awareness indicates that when entities understand the microcosm, when an entity can understand an atom, an entity can also understand the macrocosm, the universe. When an entity can understand oneself, the entity also can understand the Universal Being.

This Awareness indicates that 'as it is above, so it is below.' This Awareness indicates upon your plane at this time, there are forces which have been in movement for eons of time, which are now coming into a climax. This climax between the positive and negative forces upon this plane are not unlike the climax which occurs in the sexual act between male and female. That wherein this climax occurs, a blending of energies may occur which balances out the male and female principles to allow a neutralizing of the energies upon this plane. This Awareness indicates that this House of Sex, Scorpio, is also the House of Death; that there is in death an action of change; there is in sex an action of change--that energies transform and transmute. This Awareness indicates that wherein entities move through those points of interchange, that wherein love is present, all will turn out properly as the energies transform, transmute, or transfer; and that transformation will bring about the New Being--the birth of the Christ-Child within each entity, within the realm of humanity upon the face of the earth.

This Awareness indicates that you are likened unto sperm and eggs, rushing toward your purpose. As you approach the future month; during these coming few years, this Awareness asks you, each and every one, to love one another, to be aware of your own divinity, and to recognize the relationship between yourself as a mediator between the smallest creation and the largest creation--the microcosm, the macrocosm--and to reconcile the 'yes' and 'no.'
