Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

Oh, forn-i-cate, De-gen-er-ate....abuse those DRUGS!
Snort that coke, and knock her up...."

SEXUAL LICENTIOUSNESS, PERVERSION, DRUGS, Etc.!

ILLUSION AND THE NATURE OF REALITY

(Opening Message, CAC Gen. Reading, April 12, 1980)

COSMIC AWARENESS:

This Awareness suggests that you look at the word *Illusion*. This Awareness indicates the root of this word, *lucia*, relates to the concept of light. This Awareness indicates that the *il-lucia*, as being likened unto a poor light.

This Awareness indicates that the concept of an illusion is such that it requires an entity to believe in reality, and to assume that one knows reality and can distinguish reality from illusion. This Awareness indicates that the materialist assumes that matter is the reality, and imagination is an illusion. This Awareness indicates that one entity may assume that power is reality, and love is but an illusion.

This Awareness suggests that the entity who is involved in the dream believes the dream to be the reality; and when being forced to be shaken from that dream, feels he is being forced into an illusion until he is ready to accept that new illusion as a reality. This Awareness indicates that entities who assume that the material is the reality and the consciousness is the illusion, must look at the nature of the construction of matter, and recognize that any physical construction made by human thought, was first conceived in the thought or mind and then brought forth into matter. This Awareness asks, "Which is the reality--the imaged concept, or the resultant manifestation of that concept?" This Awareness indicates, "Is the cause the illusion, or is the effect the illusion? Which is the reality?"

This Awareness indicates that entities in considering realities and illusions must recognize that this is likened unto looking at the same coin from two different sides, wherein one side of the coin is labeled *Illusion* the other side as labeled *reality*, but each having a different meaning in the language of the entity who looks from the opposite side.

This Awareness suggests you visualize a coin whereby you can see through to the other side, and when looked at from one side, the words in this particular language would be inscribed *Illusion*; and when looked at from the other side, the words would be read backwards in a way that spelled *Reality*. And you imagine yourself explaining to a foreigner who speaks a different language, that one side is illusion and the other side is reality; but this foreigner explains to you that in his language it is just the opposite, and *this* side is the illusion and *that* side is the reality.

This Awareness indicates that so it is between dimensions of consciousness--the one side appears to be an illusion when viewed from the other side.

This Awareness indicates there is *nothing more real than the imagination*; yet those who have no imagination, who do not dwell in the imagination, consider those energies as being but illusions. This Awareness indicates that those who dwell in levels of imagination, can convince themselves that these are realities; whereas the other entity's imagination is an illusion.

This Awareness indicates that these are but words, which may be similar to accusations or labels placed by one viewpoint on the other viewpoint, by one observer on the other observer--much like arguing that an entity is standing to your right, when looking into a mirror, and using the reflection for your reference point; while arguing with an entity who insists that this is not so, who is looking at this from the non-reflective point of view.

This Awareness indicates that in reaching levels of communication --one with another; in dealing in a society--one with another, it becomes much more difficult when entities carry illusions in their consciousness. Yet, this is a fact of life--a reality of society, and cannot be dismissed as but illusion.

This Awareness indicates that in one sense, the illusions and fantasies are *realities of life*, and this Awareness suggests that also, what is occurring at this time is that entities are becoming aware of each other's fantasies and are attempting to express their own fantasies as realities. This Awareness indicates that in many ways, the imagination is being let free to spill itself out on society in almost an unlimited way: the genie as escaping from the bottled-up insides. The subconscious regurgitation of emotions, fantasies, and traumatic or creative expressions, are being let loose. The Pandora's box, with all its furies, all the demons, all the plagues, are being opened up from the subconscious levels of entities. The astral plane is being emptied out on to the earth plane. This Awareness indicates this as occurring through music, through images, through pictures, through illusions, cinema, television, and even through your politics and world affairs.

This Awareness indicates the astral plane and that plane which has been termed 'reality' are merging, coming together, rubbing against each other, and there is no way whereby these can be made separate. This Awareness indicates this blending of these energies will eventually balance out, and the land of the 'Magi-Nation' and that which is *Reality* shall merge into a world of creativity. This Awareness indicates that entities who understand the balance between illusion or imagination or reality, and entities who understand these energies, will be the New Beings who create the peace and harmony for that New World.

MANY ARE CHANNELLING ASTRAL POISONS LOCKED WITHIN THE MASS MIND

QUESTION:

Does that mean that those many entities that are expressing their fantasies, I presume, in these weird stories we read in the paper every day, will either have departed this plane or their consciousness will have changed so that they will go along with the New Being philosophy?

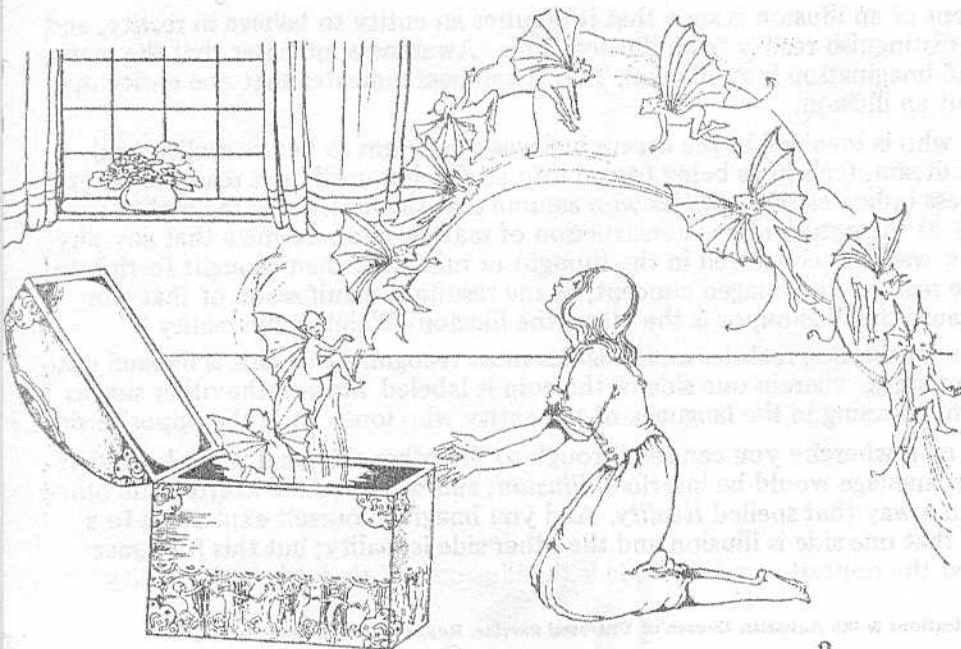

COSMIC AWARENESS:

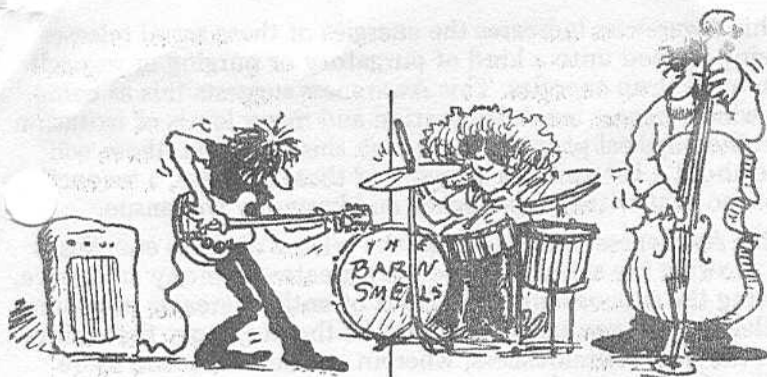

This Awareness indicates that many of these entities are but channelling the poisons which have been locked up inside the mass mind, the astral plane, for eons of time. These poisons being regurgitated out upon this plane for those Lightworkers to clean up, to look at, to diagnose, and to find the proper medicines and remedies for these

entities, so that the catharsis which is occurring from the angry young men (or the angry old men and women)--the catharsis which is occurring upon this plane, emptying out the astral poisons, can be looked at, released, and a new action begun.

This Awareness indicates this much like the old Greek drama wherein the drama moved to its climax, and the catharsis, the weeping and wailing, the agony was expressed; and the audience cries, then goes home feeling much better at having had a chance to release those feelings which were portrayed by others on the stage in that which was but an *illusion*.

(Emphasis is by the editor)

A SHOCKING REPORT ON THE PORNOGRAPHIC AND SUBVERSIVE LYRICS IN ROCK MUSIC

(From a CAC Gen. Reading)
April 13, 1980

QUESTION:

Yesterday, Awareness gave some information on how the energies from the astral were being worked out in fantasies today. I'd like to read a little of a report that just came out on rock music and it's influence on teen-agers to see if there is a corollary here.

Kingsbury Smith of the Hearst's Newspapers writes, "A shocking report has come to light on the harmful influence that pornographic and subversive lyrics in rock music may have on American teen-agers, and even younger children, listening. According to this report, almost 50% of recorded rock music in recent years contained lyrics that tended to encourage sexual licentiousness or the use of drugs or perversion. The report charges that the morals of many teen-agers have been and continue to be subverted by some of the most popular rock music. It implies that if your teen-age daughter becomes pregnant or your teen-age son becomes a drug addict, it may be due to the influence of lyrics in some of the rock music they have listened to during youthful years when they are particularly susceptible to musical impressions. The Allen Report said that whereas in the early '70's subversive rock lyrics pushed drugs, promiscuity and revolution, the current perversion-oriented lyrics are pushing the worst types of degeneracy. Citing the verses of many of these lyrics, the report added, 'What can parents expect during this decade as rock music advocates sadism, masochism; incest, necrophilia, homosexuality, bestiality, rape and violence, in addition to the ever-present rebellion, drug abuse and promiscuity? The obvious answer is stupefying.'"

Will Awareness please comment?

COSMIC AWARENESS:

This Awareness indicates that this as being accurate in its description of the effect of the music to some degree. This Awareness indicates that these influences upon the youth are, in fact, having certain damaging effects in the morals of the nation. This Awareness indicates that this as also releasing certain pent-up anxieties and feelings which *would be expressed in other ways*, perhaps just as damaging.

This Awareness indicates the young people in taking drugs and becoming involved in early sex, are essentially rebelling against society's codes in the way whereby they can personally do so. This Awareness indicates that these entities are not simply objecting to society's moral codes, but have chosen this way of expressing their frustration with society in general. This including the over-all actions of society whereby they allow the leaders to create wars and violence on large scales.

This Awareness indicates that many of these young people feel that they are living on the brink of destruction. Many feel that they may never grow old enough to have legitimate sexual relationships with others; so why bother trying to meet society's codes? This Awareness indicates that the attitude among many young people, and older people alike, is..... "It's all going down the tube, so grab what you can, while you can." This Awareness indicates that this is being presented because of the nuclear threat and the threat of global annihilation. This Awareness indicates that these entities have grown up from childhood with this threat hanging over their heads. This Awareness suggests that many older people also are leaning toward this attitude.

This Awareness indicates that this also relates to the clearing out of certain astral energies which have been pent up for many eons of time in the astral plane; this where, in older times, entities referred to these energies as 'demons'. This Awareness indicates that these so-called 'demons', or blocked frustrations in the astral planes, whereby certain forces and energies or spirits held on to the immoral or degrading types of attitudes and consciousness,---were locked into the astral plane, being able to filter through only when there was an opening.

This Awareness indicates that much of the present rock music and many of the movies and television and the peer-pressure group and drug use allows the astral plane to be emptied out upon the earth plane. This Awareness indicates this also relates to the use of nuclear weapons and the radiation pollution and microwave pollution, which has had its affect upon the barriers between the astral and physical planes. This Awareness indicates these barriers being broken down are allowing these two planes to merge. That which is pent-up and hidden in the astral plane is being released and worked out through entities' emotions---much of this as sexual perversion, much as violence, much as being expressions of bizzarrism.

COSMIC AWARENESS:

This Awareness indicates that the majority of teen-agers watching a bizarre act of an entertainer, recognize that this is a bizarre act, and are simply enjoying the 'freak at the circus'. This Awareness indicates that the majority of such entities do not intend to imitate or emulate such actions themselves in their own lives, but simply enjoy watching the crowd and seeing the bizarre actions of this entity who is bold enough to get up and make a fool of himself in his expressions. This Awareness indicates that many entities consider this as being a kind of vicarious form of rebellion against their establishment, their parents, or their parents' values; and in watching this entity carry on in the bizarre manner, these entities, these viewers, feel a kind of satisfaction in the vicarious-rebellion experiences.

QUESTION:

On a TV program recently there was a segment on a random killer syndrome that happened to people using, (sniffing, or snorting) cocaine. According to the TV reporter it had no relation to how much, what quality or how often the cocaine was used, nor how long, how old or what health the user was or if other substances, such as alcohol, had been used with it. The report said that after sniffing up a line the victims would just go into labored breathing and some other phases and would be dead within two or three minutes. This has never been discussed in all the other material on cocaine and it sounded like a scare story. Is there any validity to their story, and how dangerous is this drug?

COSMIC AWARENESS:

This Awareness indicates this is valid in some respects, this depending on the general health of the entity and how much the entity depletes his or her energies and relies on the affects of the drug as a substitute for normal rest. This Awareness indicates that there are also certain indications of some entities having a kind of, what might be termed, an 'allergy' to this drug. This Awareness indicates that the continued use of this substance can be damaging to the psychological factors of an entity as well as to the general health.

This Awareness indicates the energies of these astral releases as being likened unto a kind of purgatory or purging or regurgitation of pent-up energies. This Awareness suggests this as being that which creates much frustration and many levels of irritation upon the physical plane. But through this irritation, there will come about a balancing, a merging of these energies, a reconciliation, so that within time, peace and harmony will ensue.

This Awareness indicates that the release of these energies is also allowing the astral plane to have greater harmony and peace, allowing the subconscious emotions of entities greater possibility of release; and eventually, this shall be the purgatory that brings forth the new consciousness, wherein entities can relate more clearly with one another.

This Awareness indicates that essentially, this present action is likened unto an era of tribulation, particularly a tribulation in relation to the physical plane. This Awareness indicates that it can be seen as horrible, but is also part of the process of clearing out the pent-up frustrations of the biosphere or mass mind. This Awareness indicates that in some ways this may become even more appalling as time passes, but there also are those energies which are now beginning to turn in other directions to move toward a re-establishment of greater respect for the social codes of the past. This Awareness indicates it shall never become as fixed as in previous times. That the social codes of 1950 will eventually be looked upon much as the entity in 1950 looked upon the Victorian social codes.

VICARIOUS REBELLION

(The Fascination with the Bizarre)

QUESTION:

Then it probably stands to reason then that the biggest majority of teen-agers listening to rock music with these lyrics can look at them and probably understand these things, but will not necessarily go out and experience and practice some of the things told to them in the music?

WILL COCAINE KILL YOU ?

QUESTION:

Gerry Morse was up here a while back and she observed a baby-boom phenomenon in women of all ages, even into their forties, some with grown children. This has also affected women who for years never wanted children. She said that practically every woman she knew was either pregnant or planned on getting pregnant. Would Awareness please comment on this?

COSMIC AWARENESS:

This Awareness indicates that it appears there is a tendency at this time for many women to focus on this action. This being part of a general reaction to earlier trends away from childbearing. This Awareness indicates that many entities feel their lives are empty at this time because there is little real substance in society to give meaning, and many entities seek to give something to their world which is of value, and the natural inclination of many women and men is to assume that the action of giving birth and carrying on the species is the proper gift to society. This Awareness indicates this because it is a natural, programmed action of the species. This Awareness indicates that likewise, this as related in part to the psychological needs of entities to express themselves in a manner which appears to be meaningful during a time wherein meaning and values are crumbling.

This Awareness indicates also that this, in part, is related to an increase in the activity of women depending upon welfare and child-support for their sustenance. This Awareness indicates that many women find that the more children they have, the more money they can collect from welfare programs. This Awareness indicates that also this relates, in part, to a subconscious urge to increase the population out of a feeling that war is imminent and that the more entities there are, the greater the chance of some surviving. This Awareness indicates this appears to be a strong subconscious influence or pressure on many entities at this time, this both men and women. This Awareness indicates there also appears to be an influence coming from an attitude that although the parent has not found satisfaction in the life experience, it wishes to give children an opportunity for such satisfaction; therefore, it hopes to bring about children for more enjoyment in future times. This Awareness suggests that this attitude as being a minor factor. That the majority of parents are simply following their personal feelings, feeling totally incapable of having much expression in society because society is out of their control, but still feeling the avenue of expression through the action of giving birth and creating their own empire within a family structure.

IF JESUS WASN'T ADAM, HOW COME CAYCE

READ THIS ON THE AKASHIC RECORD?

QUESTION:

A question from P.D.R. of Denamora, New York. "In Revelations of Awareness No. 79-25, a question was asked about Edgar Cayce stating that Jesus was Adam in his first incarnation. Awareness stated, 'There is no indication seen that Jesus was Adam.' From what Awareness has been revealing about Jehovah and his creations lately, I can understand that; but Edgar Cayce was not the only one that said Jesus was Adam in his first incarnation. Ruth Montgomery in the book, *The World Before*, given in automatic writing from a group of entities from the spirit planes--so they claim--also said that Jesus was Adam. My question is, Edgar Cayce and these entities communicating through Ruth Montgomery said they read the information from the Akashic Record. How could they read the information from the Akashic Records if, in fact, Jesus was not Adam? It is my understanding that anything in the Akashic Record had to happen sometime in the past in order to be there. Where did they get the idea that Jesus was Adam if he was not?

COSMIC AWARENESS:

This Awareness indicates that it appears the entity Ruth Montgomery got her information from the Cayce material in an indirect manner. This Awareness indicates that it appears that the Cayce information as being likened unto reading energies in a manner that is literal when, in fact, it is but reflective and symbolic. This Awareness indicates that the definitions involved in terms of the story of Adam and Eve as being most difficult to explain when entities consider these as being absolutely literal. This Awareness indicates that Adam symbolically representing the conscious mind, Eve symbolically representing the subconscious mind. This Awareness suggests also that in the cloning process of the Jehovah group on Mars, that Adam was not simply a single clone, but was a series of experiments whereby eventually this particular result was created which, then being influenced and affected by others, was eventually transferred to Earth for mixture, as followed historically, with other Earthlings. This Awareness indicates much of this information has been given, much is available in other works.

This Awareness suggests that there is a kind of repeat or reflection in the experience or story of Adam and Eve. This Awareness suggests that the simplicity of answer requested by the questioner, or by the question, as that which complicates the ability to convey clearly what is involved. That for the simplicity of answering this in the manner desired, it can be only given at this time that the entity known as the Christ, or the being who inhabited the body of Jesus, was not the same entity who was created by Jehovah.

This Awareness indicates however, that there are other levels of this. That the original story, or the original writings from which the Book of Genesis was taken by the biblical writers, was in reference not to Jehovah, but to the Elohim. That the Elohim being the gods--this in plural--who created the heavens and earth. This Awareness indicates these being terms used by writers of a much earlier work, handed down through ancient secret schools from Lemuria, Atlantis, and eventually to the Hebrews, in story form from which the Book of Genesis drew for

much of its information, which it then compiled and added information relating to Jehovah, the Hebrew deity or lord, for their culture. This Awareness indicates that all this as being related to the Hebrew Book of Genesis, but this as having drawn from other sources and these mixing with the Hebrew philosophy and doctrines of the priests.

This Awareness suggests that in terms of the Christ Consciousness coming down upon this plane, that this as being from the serpent people, or those of Galactic Man, or the Galactic Space Confederation; whereas Adam, created by Jehovah, as having been from a totally different clan of space entities. This Awareness indicates that the Akashic Record as that which is not like the Britannica or Americana Encyclopedias, wherein an entity simply reads the words which have been recorded by some scribe. The Akashic Record as being energies which can be seen in fourth-dimensional consciousness which come through as words or images, but the skill in reading depends on the interpreter or the interpretation of how those energies are evaluated. This Awareness indicates for this reason, entities should not trust trance readings one-hundred percent for their validity, but only look at these informations as ways to delve into their own consciousness and look deeper to discover for themselves by reading the Akashic Record on their own.

This Awareness indicates *It* is not giving these messages to entities as dogma, but is giving these messages so that entities can expand their awareness and examine more deeply the limited knowledge which has been handed down in allegories, myths and stories from the past, so that these myths and stories and allegories can come alive within the individual consciousness and have meaning to the lives of entities. This Awareness indicates that in later times, more information will be released regarding the ancient histories of the origins of the various tribes.

UNBLOCKING THE 'ROYAL PATH'

(More on the Trinity)

QUESTION:

A question from P.H., San Francisco, Cal. "Max Freedom Long in his book, *Secret Science at Work*, states that the reason why we cannot make contact with our superconscious mind is because the "Royal Path" is being blocked by wrong thinking or karma. He gives some explanations on how to unblock the path, but gives no specific techniques. My question is, can Awareness give us some specific techniques on how to unblock the 'Royal Path', especially when karma is involved from a previous life?"

COSMIC AWARENESS:

This Awareness indicates that essentially, this is what this Awareness has been doing for approximately seventeen years since *It* began through the channel of Ralph Duby and previously, through other channels. This Awareness indicates that the so-called 'Royal Path' as simply being that which entities may refer to as the subconscious---that information locked within the cells of the body as memory. This Awareness indicates that as entities move into these cells with closer awareness, they are more able to contact the higher levels of consciousness. That as entities are locked into rational thinking and fail in their communication through the subjective or creative thinking process--the intuitive levels--these entities simply cannot communicate with the higher self.

This Awareness indicates that essentially, the Kahuna philosophy is such that the doer, or the middle self, as it is called, is the same thing as the conscious or rational mind. This Awareness indicates that the subconscious, or lower self in the kahuna terms, is equivalent to the subconscious or unconscious, or the host of the body; the conscious mind being the guest in the body. This Awareness indicates the superconscious as being that which is outside the body, but hovering nearby as a kind of overseer. This Awareness suggests that the conscious mind is capable of communicating with the superconscious only through the messenger--the subconscious. The Kahuna philosophy explains it that the middle self must be in harmony with the lower self, for the lower self is that which is the messenger to the higher self. In another sense, the rational mind must be in harmony with the emotions of an entity, for the emotions to carry the message to the spiritual self.

This Awareness indicates the Kahuna philosophy refers to the higher self as the 'Father' and as the 'Light'. This Awareness suggests that as entities become more at peace with themselves, the potential for moving through the lower self, or the subconscious, and having greater communication with the superconscious increases. This as the Trinity. This Awareness suggests that in another sense, the conscious mind may be thought of as the Son of Man, the subconscious as the Holy Ghost, and the superconscious as Father or God. This Awareness indicates there are many ways in which the Trinity is expressed in various religions. That each of these various religions having Holy Trinities, can be traced to the same source. This Awareness indicates that the concept of this Trinity applies not only to man as an individual, but mankind, and also to the universal beings. This Awareness suggests that it is possible for entities to become friends with the subconscious only by breaking down barriers of hostility between one's emotional urges and the mind, which seeks to be rational. Wherein the rational mind fights against nature, the barriers shall increase; but wherein the rational mind attempts to communicate and 'tame the beast', then the possibility for higher communication occurs. This Awareness suggests this related to the card in the Tarot wherein the entity is opening the mouth of the lion. This also has reflective symbology to the story of Daniel in the lion's den. That wherein the entity or middle self is able to communicate with the animal self, the subconscious, the lower self, in a harmonious way wherein one is at peace with oneself, wherein the house divided is not divided; then this wherein the two come together 'in my name'; wherein this occurs, then these two in harmony can reach a communication with the superconscious, or the higher self.

This Awareness indicates that there are many ways of doing this. That this depends on which path is least offensive to the rational mind. This may be done through hypnosis. This may be done through such things as Tarot readings, astrological readings, or through meditation, or through prayer, or through psychological releases, through arguments and crying and the weeping and wailing until one finds personal peace between his deeper self and the conscious self. This may be done through exploring consciously until one has whittled away to the very roots of one's unconscious. This may be done through emotional catharsis or through the charismatic movement, or through religious techniques of such types. This may be done by such actions as developing one's ability or frame of mind to be able to walk on fire or walk on hot coals. This may be done through entities' efforts to withstand pain. This may be done through gradual lifetimes of suffering until one reaches harmony with oneself and accepts oneself, so that the rational code and the subconscious code eventually merge together into a harmonizing relationship. This Awareness indicates that this also can be accomplished through the karmic relation with one, generally of the opposite sex, wherein energies are balanced out. This Awareness indicates that this also may be accomplished through the experience of life and death and passing through the gates. This Awareness suggests also there are innumerable other methods available through various schools of personal development and consciousness-raising techniques.

This Awareness suggests the general understanding of the purpose---to become friends with your subconscious---this as being the most helpful in determining how or what path to take. This Awareness indicates also, that the entity Max Freedom Long, includes in his works various prayers or techniques for meditating or for reaching those states of communication.*

*The books of Max Freedom Long are available from C.A.C. (See book catalog).

.....Getting History Straight.....

WHO
WAS
JACK
THE
RIPPER?

(IS HE ALIVE AND WAITING IN DETROIT?)

QUESTION:

A question from J.D. of Brooklyn, N.Y. "It has been stated historically that Jack the Ripper had never been caught or identified, but I have secured information from a psychic sensitive hypnosis subject who stated that Jack the Ripper was still alive, but was in a mausoleum in a graveyard. I believe he said in Detroit, Michigan or Chicago, and his body is intact in a state of suspended animation, but that the tomb is guarded by the devil or dark forces or spirits. What are the details associated with this?

COSMIC AWARENESS:

This Awareness indicates this as a fabrication.

QUESTION:

While we're on this subject: several years ago a book came out, a very detailed book by someone who did some very good detective work. He claimed that he proved that Jack the Ripper was really one of the Royal Family, the Duke of Clarence, I believe. The Royal Family being the family of Queen Victoria. If it is no longer to be secret or a violation or anything, would Awareness please explain or reveal who Jack the Ripper really was?

COSMIC AWARENESS:

This Awareness indicates that this book and the movie, *The Seven and One-Half Percent Solution*, as that which gives sufficient information regarding this concern. This Awareness isn't particularly inclined to concern *Itself* with solving mysteries of history which are of no consequence to entities. This Awareness indicates, however, that the information has been researched quite thoroughly in this book; and also, there is information in the movie which relates closely to the facts of the case.

ED's NOTE: I read the book, but couldn't remember the name. If interested, don't write C.A.C. Check with your library. The second book, *The Seven and One-Half Percent Solution* is available in paperback edition. (A new Sherlock Holmes story).

WHAT AREAS OF QUESTIONING SHOULD THE MEMBERSHIP COVER ?

QUESTION:

A question from M.B. of Chicago: "Does Cosmic Awareness have any questions or areas of questioning that IT wishes the membership to ask that could help save time rather than waiting for entities to come along eventually, if at all, with the question? "

COSMIC AWARENESS:

This Awareness indicates that the key areas of growth for the entities on this plane lie largely in the areas of communication and in personal relationships. This Awareness suggests that questions relating to general types of relationship situations between entities and the communications necessary to resolve differences, so that entities can begin to function in more creative levels, more harmonious levels, and more cooperative levels---these appear to be of great importance at this time.

This Awareness indicates also that the area of social values as being important at this time, particularly in relation to present-day concerns regarding the various cultural beliefs which are in conflict with others. This Awareness indicates that a merging of minds will need to eventually occur, so that entities have certain common ground on which to relate. This will require a value system acceptable by all, whereby entities can agree upon certain values as being universal. This Awareness indicates that when these values become universally accepted, then entities may use this platform of universally accepted values on which to build a new society.

This Awareness indicates that wherein entities have conflicting values, wherein cultures have conflicting values, then it requires a separation, a segregation of these values, so that each culture or individual has his or her space in which to live out his or her values, or wherein the culture requires a separation from other cultures in order to maintain its values. This Awareness indicates that wherein such a culture or individual seeks to impose his or her values or its values upon others, then this leads to conflicts wherein the others do not wish those values imposed upon them. This Awareness indicates that so long as there is no common ground for values between individuals or cultures, then there will always be conflicts, particularly when the individual or the culture seeks to impose values upon others.

This Awareness indicates that questions relating to these areas and relating to communication between entities or groups or cultures regarding values and situations---these can assist in clarifying many problems which entities may share. This Awareness indicates that following this, entities may also find questions regarding the individual spiritual growth and development, the paths which entities wish to follow.

This Awareness suggests that during times of urgency relating to conflict between societies or relating to dangerous periods to cultures in terms of their physical well-being or in terms of their financial or emotional or spiritual well-being---these urgencies can also be of great importance. This Awareness indicates that the economic crisis occurring presently as being of great significance in terms of individual needs, in terms of relationships, and in terms of social values, and these need to be more deeply understood.

This Awareness indicates that generally, however, the areas of questioning which may appear to be of greatest importance are those areas relating to values, for these can be used as keys to unlock various levels of human relationships: personal, group, or cultural, so that deeper understanding may occur. This Awareness indicates that this also unlocks areas of relationship within the individual--psychological, spiritual, emotional, mental and physical; and can have effects on the health of individuals, particularly in regards to values which affect attitudes which, in turn, have effects on the health of an individual or others.

This Awareness indicates that questions of a technical nature, questions of a historical nature over details of particular situations--historical, or mythical, or significant to individuals in terms of their belief systems---these types of questions can be of some value in assisting entities to determine the validity of certain concepts; however, this not being nearly as meaningful to an entity's basic well-being as a clear understanding of values.

This Awareness indicates that an entity may wish to know exactly what Mohammed had to eat in his diet during his early childhood or what effects his early childhood may have had on his later thinking; but these questions or such information has little real significance in terms of an entity's present situation in comparison to the value system which the entity may hold, that which the entity values in life. This Awareness indicates the values an entity holds determines the entity's potential for good or ill, toward himself or others.

The Significance of a 'Significance' (Closing Message)

This Awareness suggests that entities in examining their values, be very aware of significances, and ask yourself, "Why is this significant to me? Is it important to have such a significance? And if it is important, why is it important to me? What is it I actually want from this significance?" This Awareness indicates that in looking at consciousness, observe those areas of significance as being likened unto mountain peaks, and ask yourself, "Who put that there for me to observe and hold significant, and why was that put there?"

This Awareness suggests that often the values of your grandparents, or great-grandparents, or great-great-grandparents may have been handed down from generation to generation, simply because it was handed down to them from generation to generation, as something significant. And often entities take such significance as being of some sacred value, when in fact it may never have had much purpose or meaning or value at all, except to the one who insisted at the beginning that it was significant and valuable.

This Awareness indicates that there are some entities who, for example, may value a particular color as being significant, as being their favorite; and if tracing back that purpose or reason for that significance, may discover that it was because of a particular item they enjoyed when they were young, which was given to them by a particular person they liked. This Awareness indicates or, on the other hand, they may dislike a particular color because a particular entity they disliked used to be associated with that color.

This Awareness indicates it is important that entities examine those things in their lives which they hold as significant, either for or against, which they value or dislike. This Awareness indicates in such examination, you may become more aware of yourself and of your life; and there is nothing more tragic than an unexamined life.

This Awareness suggests that those who can examine themselves and their lives can find greater harmony, happiness, peace and prosperity.

IS THE CATHOLIC CHURCH A PART OF THE BEAST?

(From a C.A.C. General Reading)

August 10, 1979

(ROCKEFELLER & ROTHSCHILD CONTROL VATICAN RICHES)

QUESTION:

There was an article in last week's *Parade* magazine in reference to the Pope, who made the statement that the riches of the Vatican and its financial statement has always been kept hidden from the masses, but that under his administration this information was going to be brought forth for the public to look at. The article also stated that the Catholic Church has for years been allowing the Chase-Manhattan bank, owned by Rockefeller, and the Rothschild banks to handle the money and investments of the church; and it also stated that some of its investments included the notorious Watergate complex which brought about the fall of Richard Nixon. All this seems somehow significant in light of the recent information given on the Beast. Awareness has never, to my knowledge, had entities look at the Catholic Church in relation to the Beast conspiracy. Would it give that information sometime if it indeed is true?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness suggests this not at this particular time. This Awareness indicates also that you must understand the Catholic Church as now having gone through a transmutation, whereby it is not any longer under the control of the Rothschilds or Rockefellers. This Awareness indicates that previously the Catholic Church was under the control of these entities and their forces and was indeed to be used as part of the world game, the world government, the take over of the masses.

This Awareness indicates that the Divine Plan was such that it allowed the serpent to enter into the forbidden area of divine power just far enough to get itself caught by its own greed and its own effort to not only hold dominion over the physical world, but also over the spiritual worlds. This Awareness indicates this trap was part of the Divine Plan to allow that force to experience and taste the nectar of spiritual reality, but to be transmuted by the essence of that reality. This Awareness indicates those entities who worked for this serpent, leading this serpent to this place, are in the present process of being transmuted from their dark powers toward that which is evolving toward light.* This Awareness indicates that not only is the earth itself being salvaged and brought back to Light, but also those entities who played the roles of Dark Forces--these also shall be given their opportunities to return to Light and only those who refuse shall be lost and excluded from that Light. This Awareness indicates that none shall be excluded except those who exclude themselves.

This Awareness indicates that at another time a reading on the Catholic Church and its role, particularly in the production of arms, may be in order; but only if this is put into perspective with the entire picture. This Awareness indicates that present time is not appropriate for such information.

(Closing Message)

This Awareness indicates that the Catholic Church in the beginning of this age was created not as the final church for the human condition, was created not necessarily to channel the spiritual teachings of Christ, but rather was created to

Pope Pius and his cardinals witnessing the death of Paschal, from an ancient engraving. Harper's

hold the form so that the message could prevail and be maintained and come through for a long enough time that it would have its affect on human consciousness. This has been successfully accomplished by the Catholic Church.

This Awareness indicates that the Catholic Church is now in the process of transmuting its own nature and becoming an instrument to channel spiritual messages pertinent to the here and now, so that entities begin to understand the essence of Christianity, the essence of the Christian teachings, rather than just the form, rituals and words. The Catholic Church is now transmuting itself to be able to present the spirit rather than just holding the laws, principles, and the messages of the words. This Awareness indicates it was necessary during this past age that the structure be strong and physical rather than light and spiritual, for the masses upon this planet were relatively dense and could not understand the message of Christ. That the masses are now reaching that level of consciousness whereby they can understand not only the words, but the spirit of Christianity; and the Catholic Church is making certain transmutations within its being to allow these spiritual energies to flow through. This Awareness indicates that this holds true for other Christian churches also, wherein they are lifting their consciousness to higher realms of realization, rather than simply mouthing certain scriptures in a manner that suits their own opinions and beliefs and sets others apart from them and sets them up as being self-righteous. This Awareness indicates that there are still many who are fascinated by the form, by the words and forget the spirit.

*ED's Note: This particular reading was given a few months after the executions of the Rockefellers and the Pope etc. wherein Awareness stated 'the dismantling of the Beast machinery had begun.' One only has to look at the history of the Catholic Church to realize, in light of recent information, that the Dark Force has been using that structure for centuries. Since Awareness has indicated many times that the spotlight of consciousness is revealing rascality on all levels, that it is time to 'let it all hang out', etc. we would like to have further questions on this subject. (Maybe if enough of you out there would send in question, Awareness might be prompted to give us a reading or two on this subject.) But like some of the information It gave on the entity Jesus, we were told to withhold the information because it was so high-powered and entities might leave C.A.C. in droves because their programmings would not allow them to handle that information. It is a known fact that the Catholic Church is the world's largest property holder, (it even owns the Union Pacific Railroad), and its riches, if used properly, could feed every starving entity in the world and raise the living standards of the entire Third World nations. While the robotoid Pope jets around the world washing feet and espousing much of the same old doctrine of the past, millions still starve and the world continues on the brink of nuclear destruction. It makes one ponder. (These feelings may stem from the fact that this editor, Vikki T., Paul Shockley, to name but a few, were all persecuted and burned at the stake by these entities in previous lifetimes.)

METRIC MADNESS! IS IT PART OF THE PLAN OF THE BEAST?

(WHY NAPOLEON HAD SIX FINGERS)

(From a C.A.C. General Reading)

July 1, 1979

QUESTION:

A question from R.B. of Phoenix, Arizona: "In reading the book, *The Great Pyramid, a Miracle in Stone*, by Joseph A. Sythe, a century-old work reissued in 1973 by Steiner books, I came across this passage: 'The French people in their first revolution made an attempt to abolish alike the Christian religion and the hereditary weights and measures of all nations, seeking to supplant the former by a worship of philosophy and liberty, and the latter by a scheme of meters.' Several additional unfavorable comments are made elsewhere in the book in reference to the 'atheistic metric system.' I don't recall Awareness having commented yet on this system of measurement, especially in light of current political maneuvers. Is the metric system perhaps a long-term ploy of the Beast?"

COSMIC AWARENESS:

This Awareness wishes entities to note, that the Kabalah has ten Sephiroth, the Arabic numbering system using numbers one to ten, and then continuing. This Awareness indicates that the ancient Egyptian system of measuring in terms of cubits, acres and the other measurements as generally based on twelves. This Awareness indicates that these are two different types of systems. This Awareness indicates that both have merit, that there is a value in measuring quantity by using the decimal or metric system, which measures in terms of tens; there is also a value in terms of qualities in using the method measured in terms of twelves. This Awareness indicates that the only major danger in switching to the metric system is that within the measurements that came from Egypt using the twelves as a base, there was included an ancient science coded information which relates to hidden science of the stars, this relating to the zodiac, the months of the year, the twelve notes of the chromatic scale and other forms of measurements including certain relationships with the Great Pyramid and other structures. This Awareness indicates that this relates to certain forces from other systems outside of the Earth. This Awareness indicates that the loss of the use of twelves in measurements is an effort to eradicate, to erase all traces of the ancient teachings which were once given to this Earth by these entities from other systems.

This Awareness indicates the entity Napoleon as one who had six fingers, on each hand. This Awareness indicates there were others like this, these entities as having come from a distant planet, being born upon this planet with a special mission. This Awareness indicates that many entities who are voyagers are from this same source, that the majority of these entities have only the five fingers, that the sixth finger is that which through the heredity factors of earthly parents generally is missing. This Awareness indicates that this, people having come from the planet wherein six fingers were prevalent, developed a base, an arithmetic based on twelve, and this was the source of much ancient information. This Awareness indicates that the majority of entities on the Earth now having five fingers, the base is on tens. This Awareness suggests that it is not a matter of evil, but rather a matter of whether the ancient informations can be remembered, restored, brought back for evaluation, if all traces are erased. This Awareness indicates that the emphasis on the metric system is in part an effort to erase this and in part is also an effort to simplify the measuring systems throughout the world.

This Awareness indicates that if successful in implementing the metric system, the next action could be changing the year to ten thirty-six day months, plus extras for the extra days. This Awareness suggests that this as all being unnecessary and unlikely to occur. This Awareness indicates that there appears to be a movement that will react against the complete implementation of the metric system, that this appears to be workable on many levels in terms of machines, in terms of bolts, in terms of manufacturing and in terms of the various forms of measurement, but that it appears this will not go much further at least not in the near future. This Awareness indicates there will be contact with other systems from outer space which will affect the measuring methods to make the Earth's systems more universal and in harmony with those from other systems---this appears to be in the not too distant future.

This Awareness indicates the metric system as relating to the influence of Jehovah.

QUESTION:

Awareness, many people simply resent this being pushed on them from every direction, and feel like it's sort of a movement to herd them, to get them used to the idea of being programmed and told what to do. Is there anything sinister behind this, or is it genuinely supposed to be a positive movement?

COSMIC AWARENESS:

This Awareness indicates this as having been brought into action at this time in order to assist in the efforts to make a universal measuring system which would allow for greater ease in creating the one-world government, whereby all entities would come under the same systems, teachings, economics, political choices and regimentations. This Awareness indicates things are at present in a state of flux, due to the situations which has been recently occurring and the outcome of these situations is unclear at this time as far as immediate energies upon this plane are concerned. This Awareness indicates that in the overall picture, all will end properly and the good will win out. This Awareness indicates however, the immediate and detailed operation and activities upon this Earth are in question, are uncertain.

This Awareness indicates that many light groups look at the end result and cannot be bothered with present realities which are uncertain, but that this is not dealing with the here and now; this is a form of avoidance, of escaping from what is happening in terms of the urgencies upon this plane. This Awareness suggests that entities who concern themselves with these infringements upon their rights, entities who look at such things as the metric system and its imposition upon them, entities who resent this, and who speak out, entities who promote this and attempt to bring this into being--these entities are in fact more involved in changing this plane, in bringing about the reconciliation of forces than are many of those entities who simply glory in their own righteousness and say that they are not going to be concerned about these petty problems, for they know that in the end all will be well.

This Awareness indicates this as likened unto the king who sends out his armies to fight his battles, and he himself stays home and is not even interested in hearing what is occurring, is not even concerned for he knows that in the end he will be alright. This Awareness indicates there is a strange irony in this kind of spirituality, which such entities will eventually need to face. This Awareness indicates in terms of concern about this, this is healthy that entities should look for any possible conspiracy involved in pushing of the metric system upon them. This Awareness indicates that any major changes of this nature or any other nature does need attention and does need to be looked at carefully. This Awareness indicates that in one sense, the resentment is caused by a feeling that the value system, the measurement system which these entities have grown up with, is being taken away and another placed upon them. This Awareness indicates this as a part of a subtle programming whereby if they can take away the measuring system, and can implement a different measuring system, then it will be easier to take away the present money system and implement a different money system.

This Awareness indicates this is an action which removes the basic values of one or several generations by placing new values on the upcoming generations, so that the older generations begin to feel they have no place and no say as to what is occurring. This Awareness indicates the programming including an action whereby all entities who value independence will be gradually moved out of society, and those new generations who accept regimentation will become stronger and more powerful. This Awareness indicates this is part of the Beast plan, that the intention was that by the mid-'80's those entities over 40 years old who grew up with values based on concepts of individuality, would gradually be removed from society, dispersed, eliminated from any levels of influence, and the youth who has been regimented into school systems, regimented by the uniform draft, whereby both male and female would be drafted into service, these entities would accept the regimentation from their government because they have been trained and have experienced the system from childhood through schooling, through the uniform draft for their military or their national commitments.

This Awareness indicates this was all part of the plan, the scheme to create the mass control over these entities, over the people of this nation, that the individuals having any influence would be eliminated from society. This Awareness indicates all this is in question, may not come about, as there are subtle changes occurring behind the scenes which can eliminate the power of those who would have brought forth this kind of society.

(Closing Message)

This Awareness indicates from time to time, other messages regarding what has been planned by the Beast which is now losing power, will be brought forth for entities to observe, and entities will begin to realize how totally controlled their lives would have been. This Awareness indicates that in putting this statement in this manner, this Awareness is attempting to diffuse the possibility that this could happen. This Awareness indicates that this could happen if entities are not continuing to be watchful, for even though the Beast is being dismantled, it is a powerful being, and it has great strength, and could if entities cease to be watchful renew itself, as was indicated in the *Book of Revelations*, whereby the wounded unto death head of the Beast was revived and all nations wondered at the Beast, and worshipped the Beast. This Awareness asks that you remain watchful so that this does not have the opportunity to occur.

ED's Note: More information on Napoleon and his cosmic mission will appear in future issues. Also more info on the machinations of the Beast.

REVELATIONS OF AWARENESS is a cosmic newsletter published every two weeks by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington 98507 (A non-profit organization.) Rates and membership information is available upon request. For samples of these communications, send \$3.00 for 80 page book, 'Cosmic Awareness Speaks' to above address.
