Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

COUNTERACTING THE WEATHER WAR-MAKERS .....

## HOW TO BREAK THE DROUTH

AN EXERCISE IN MAGIK  
FROM COSMIC AWARENESS  
TO THE C.A.C. MEMBERSHIP

Paul Shockley  
Trance-Interpreter

( From a C.A.C. General Reading )  
July 29, 1980

### QUESTION:

A question from S.D. of Wilmington, Delaware, in the form of a letter:

"I have something you may want to ask Awareness about, or at least think over. I remember reading in one of the Seth books that our weather is determined by the mass consciousness in that area of weather activity. It seems to me that if enough people use the same visualizing technique at specific times, weather (or anything for that matter) can be altered or changed. What I was wondering is: if enough of us got together, is there any reason why we can't break the drought in the mid-United States, created by you-know-who? Maybe we could get some kind of visualizing group going. I would be more than willing to front the cost of this. I realize you people are busy enough with the work at hand, but I had an idea and I thought I'd share it. It could be that even a small number of people with really intense visualizing could do a great deal. There must be something that can be done. Thanks for your time and attention."

### COSMIC AWARENESS:

This Awareness indicates that the consciousness of entities can affect the weather, within certain limitations. This Awareness indicates that the seasons of your earth are generally set as a pattern which cannot easily be changed by the energies of entities' minds. This Awareness however, indicates that within those seasons, the possibility of affecting alterations in weather patterns with the use of minds as that which can be somewhat beneficial.

This Awareness indicates that this as requiring a certain amount of concentration and what one might call 'faith', as well as the understanding of the use of what one might call 'magik'. This Awareness indicates this as being somewhat difficult for entities to attempt without having worked up to the action, but this may be attempted and some success can be expected. This Awareness will attempt to give information for entities on how this can be assisted:

## FIRST: ESTABLISH A UNIFORM TIME

This Awareness indicates that those wishing to participate in this action may enhance the efforts by deciding on a time wherein the action may start; this being such that more energies are concentrated on that particular time. This Awareness indicates the entities may begin previous to that time and pick a date or period within the month where they will aim their energies for the rainfall or cooling period. This Awareness indicates that another approach would be to start the action at a particular time wherein all begin attempting to affect the weather at that time. This Awareness suggests however, that either of these as being equally balanced whereby either approach is satisfactory.

This Awareness suggests that for simplification and to speed up the effects, this Awareness suggests that entities begin at the time wherein they receive this information to attempt, or to implement the procedure which will be described, so that the energies for the cooling period will begin. This Awareness wishes to explain the implementation of the method whereby entities may assist in affecting the weather:

### STEP 1: MOVE CONSCIOUSNESS INTO ALPHA LEVEL

This Awareness indicates the first step is to move your consciousness into the alpha level, a subjective level, whereby you place aside the rational, filtering system of the mind. This Awareness suggests this as close to the sleep state, but more of a meditative level. This Awareness indicates this likened unto a blank mind, wherein you simply feel the entire world about you, identifying not only with your physical body, but identifying with the space outside yourself, identifying with the sky, the earth, and all parts and creatures upon the earth, identifying also with water and air.

This Awareness suggests that this action, when done in deep meditation, allows you to experience the alpha level of consciousness. This as a subjective level. This Awareness suggests also that in moving into this state, that the physical body be in a comfortable position, whether standing, sitting or laying down. This Awareness suggests the spine be straight, the body be straight, whether sitting, standing or laying down.

### STEP 2: VISUALIZE ENERGY RUSHING TOWARD YOUR MOUTH

This Awareness indicates the second step is to visualize the energy about you rushing toward your mouth and nose as you breathe in deeply. This Awareness suggests you visualize this energy as white light, resonating-electromagnetic energy, which enters with the breath and stays in your body; and as you exhale, the light which was breathed in remains within you, and the air exhales, leaving the light within your body. This Awareness suggests that you take several such breaths, until you feel completely filled with light energy.

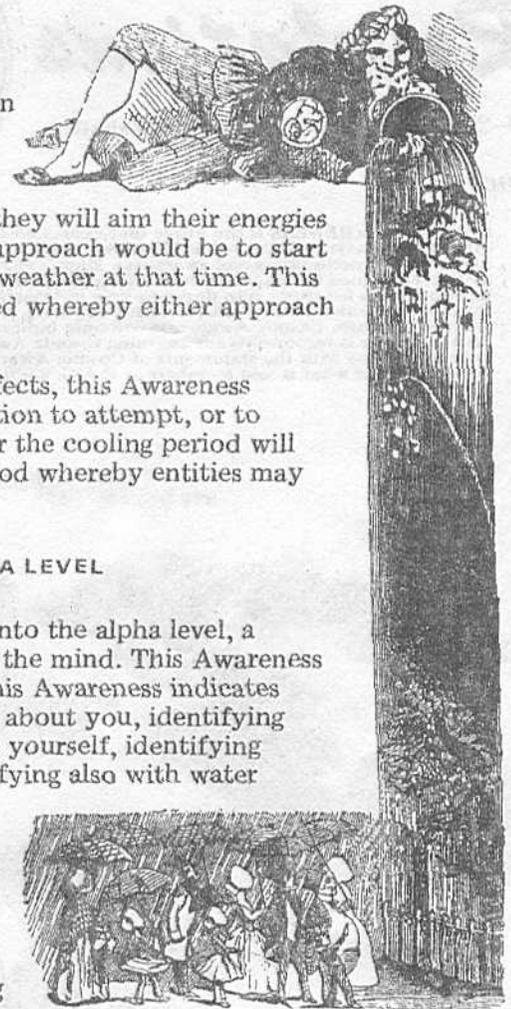

### STEP 3: DRAW IN WHITE LIGHT AS YOU BREATHE

This Awareness indicates the third step is to, again, identify with all the space around and about you and take another deep breath, drawing white light from that entire space—from horizon to horizon, from up in the atmosphere of the sky, from under your feet from the earth—drawing white light into your being as you take this deep breath.

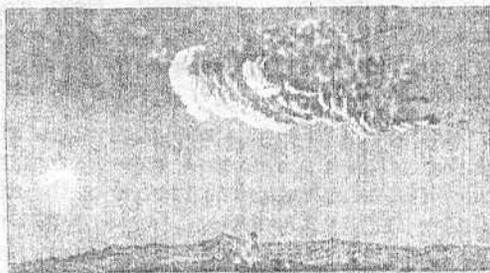

This Awareness suggests that you then hold that breath for a moment, visualizing the image which you desire of rain coming down or clouds forming and coolness coming across the earth. This Awareness indicates as you hold this image briefly, for a few seconds (before expelling the air), hold that image clearly in mind. Then blow that breath upward, along with the motion of your hands moving to direct that breath upward, toward the higher spirits, toward the sky. And imagine that image which you held to be expelled with the breath, launched upward into space toward the higher beings, and toward the source of energy which will bring forth the image.

This Awareness indicates that as this image moves upward into space, within your own consciousness or with words, repeat the phrase, "The prayer goes up; let the rains come down."

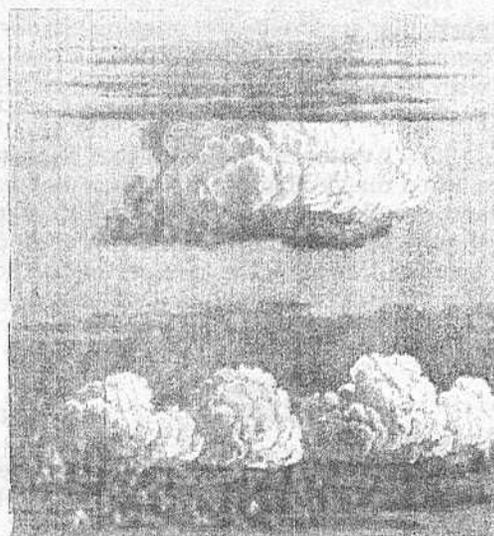

This Awareness indicates that you then allow the hands to drop to your sides; and repeat this action daily, in the morning and at night—prior to falling asleep or immediately after awakening, and during times of meditation. This Awareness indicates these being the most appropriate times for the subjective consciousness levels which are most effective for this kind of action.

This Awareness suggests that you may put a time limit on this, but the time limit may not be realistic in proportion to the energies which are being sent forth in terms of the required energies for the results. Therefore, the time limit may not be accurate. This Awareness indicates wherein you and others are working together, pick a realistic time limit, such as approximately one week or two weeks, this can be satisfactory. This Awareness suggests that the realistic time limit can be satisfactory, and the energies which are expended on this kind of ritual or activity as that which will determine the results within that time limit.

CLOUD  
ILLUSTRATIONS  
TO HELP  
IN VISUALIZING

ED's NOTE: If you are living in those parts of the U.S. where extreme heat and drought conditions have been happening for long periods, you may wish to help alleviate these conditions by using the above meditation. We suggest that entities get together and use those time periods previously established for the nationwide meditation used to help prevent nuclear war. These are as follows:

- 7:PM for entities living in Pacific Time states
- 8: PM for entities living in Mountain Time states
- 9: PM for entities living in Central Time states
- 10:PM for entities living in Eastern Time states

Note: this does not mean you should stop your meditations for world peace, but a suggestion that you could perhaps add this meditation for cooler weather and rain each time you do this. If it does not work for the country in general, at least it may help cool your immediate area.

#### OTHER METHODS OF RAIN-MAKING

This Awareness indicates that this as one approach; using the Kahuna Prayer in this manner. This Awareness indicates there are also other methods of rain-making through the use of consciousness, such as those methods employed by Indians. This Awareness suggests this generally involving the use of certain substances to alter the consciousness of the rain-maker, along with ritual, along with dancing for emotional purposes. The ritual being the grounding action; the emotional purposes being related to water; the image and concepts being related to the air; and the use of smoke or fire for the fire aspect--thus encompassing fire, air, water and earth in the ritual.

This Awareness indicates that essentially, the intense dancing for the rain, calling forth the rain gods--the action is designed to send energies through consciousness to those beings in other dimensions for their use in affecting the rain; and the action also is that which serves to build the faith of those who are participating in the rain-making activity, so that they eventually begin to expect rain. This Awareness indicates that this expectation is that which assists in the influence on the abstract levels, influencing consciousness to respond. This Awareness indicates that this expectation as also part of the influence on those invisible beings, guides and helpers who work with nature forces.

This Awareness suggests that these actions of affecting natural forces with the forces of consciousness are what is termed magik--the change of consciousness. This Awareness suggests that this as being understood best by those who recognize that the entire universe is a conscious being and aware of its parts; and therefore, capable of responding to the impulse or influences exerted by one part which is attempting to communicate with another part.

This Awareness indicates that entities who wish to build their confidence in having power over natural forces may remember the experiment of the clouds; whereby you stare at a small cloud, moving your consciousness into alpha level, whereby the cloud appears to turn like the negative of a photograph; and as you continue staring and holding that alpha level of consciousness, the cloud will begin to dissipate and disappear.\*

This Awareness indicates that entities may also experiment with this action in a reverse motion, whereby they take a small cloud and watch it grow larger by use of the mind; concentrating on building the cloud, rather than on dissipating the cloud. This Awareness indicates entities in the proper frame of mind may even find themselves capable of creating forms in the clouds, growing arms, legs, tails, or heads and faces on the clouds. This Awareness indicates however, this does require a slightly altered state of consciousness, outside of the beta wavelength, in the alpha, or in other deeper states of consciousness.

This Awareness suggests that the use of ritual and image and altered states of consciousness and identification with the nature spirits and the appeal to these forms, and the use of the Kahuna Prayer--this Awareness indicates this appears to be the general recipe for influencing these natural forces. This Awareness indicates the other alternative would be the use of certain microwaves, radionics or other devices, as used by the Russians in their weather war.

This Awareness suggests also, that entities may use pictures of a rainstorm, or may place a glass of water in a particular spot with the imaging purpose of letting that water symbolize rainfall by a particular time. For example, pouring this glass of water upon a rose or plant, or setting that glass of water in a particular spot; and doing this with full consciousness that it is a ritual intended to bring forth rain to that plant, or to bring forth rain within a particular time period. This Awareness indicates this also can have an influence.

This Awareness indicates that all magik is subjective in nature; for when it becomes objective, it no longer is considered magik. This Awareness indicates that in doing these subjective actions, which may appear to be ridiculous and senseless, entities often find strange coincidences occurring which substantiate the purpose of the action, even though they cannot rationally explain or link the two actions together. This Awareness indicates that the best approach in this effort is to experiment and practice.

### EXPECT DROUGHT TO CONTINUE (MORE ON THE WEATHER WAR)

#### QUESTION:

Awareness, does it look like without intervention, that the drought and heatwave is likely to continue through August or longer?

#### COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that even with intervention, the appearance is that only brief relief would be available in efforts of this type. This Awareness indicates that a more effective approach might be through entities sending images and thoughtwaves to the world leaders, requesting that they reconcile their differences and cease the madness of the course on which they have embarked. This Awareness indicates, however, this too appears to be of extreme difficulty; for the forces which have been set in motion are very powerful, and the number of members who would read this information and respond to it would be hard-put to generate enough energy to have a profound effect.

This Awareness indicates that some effect could be expected and this would be of great benefit. This Awareness indicates likewise, some relief through the efforts of weather modification through mind control could be beneficial if entities wish to put forth the efforts. This Awareness wishes however, to also point out that the total situation which is occurring at this time needs to be understood more clearly.

This Awareness indicates that the intense weather warfare which has been brought against this nation--from the heavy rains in the Spring, the various storms, the tornadoes, the freezing frosts in May, and the intense heatwave at present, along with the earthquakes and volcanic eruptions--this Awareness indicates all of this was set in motion as a result of the President cutting off the wheat sales to Russia in an action designed to hinder and create food shortages in that nation.

This Awareness indicates the Russian reaction being to affect the weather in such a manner that the United States would, in turn, lose its bread-basket and wheat crops and much of its food because of the intense weather manipulations. This Awareness indicates that meanwhile, as the United States is suffering from the weather war, the Russian nation is having the best weather it has had in years, and growing bumper crops.

This Awareness indicates that essentially, what entities are experiencing is a weather war, being waged as an alternative to a more devastating type of war which could occur, or could have occurred already. This Awareness reminds entities that *It* gave this information as to unusual weather conditions and geophysical conditions and social upheaval in the earlier reading of December, warning that between February and September these things would be experienced. This Awareness suggests that it appears that this will continue intensely through that period of September. Thereafter, a modification or diminishing effect will be experienced. (ED's Note: Revelations of Awareness No. 80-4, What to expect in 1980).\$2.00.

This Awareness indicates that essentially, entities can expect unusual experiences in weather war, social upheavals, geophysical upheavals for a period running through to 1986. This Awareness indicates thereafter, it appears there will be greater calm and peace. This Awareness indicates likewise, economic upsets may be expected during these times, to that period of 1986.

This Awareness suggests that entities prepare themselves for food shortages if you have not already done so; for it becomes more clear as the crops burn and dry in the fields, that the food which entities expect to receive in the market and on their tables will never reach the market. This Awareness indicates entities may expect prices of food again to rise, and also energy prices to rise still further. This Awareness indicates there will be a brief period whereby the economy appears somewhat stabilized, between present time and the election time; this being created artificially through the manipulation of the prime interest rates.

This Awareness indicates also, there appears to be continued efforts to move this nation toward a war-footage; and whereby this continues, there may be the economic revival which so often accompanies the efforts of munition-making and wartime manufacturing. This Awareness indicates essentially, the efforts to lead to war may help to bring the economy up, so that entities can again receive their wages and personal benefits at the expense of the lives of others, through the war programmers. This Awareness reminds entities, however, that in any future war, such as is being planned, the entire nation will be the front lines of that war.

## Worst Drought

**PEKING (AP)** — The Peking area is suffering from its worst drought in 100 years and more than 27,000 acres of crops have been seriously damaged by lack of rain. The underground water level has dropped six to nine feet, most of the 84 reservoirs in the area have dried up, and drinking water is difficult to find in some mountainous areas.

## Coldest in 300 Years?

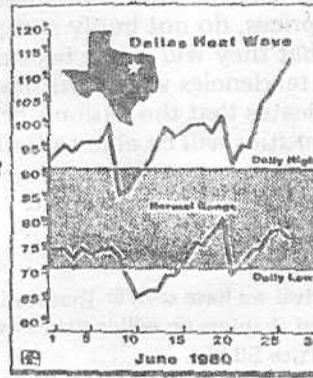

### Britain's Coldest July

**LONDON (UPI)** — This may be Britain's coldest July for 300 years, a weather expert said yesterday.

"There have been very few Julys in the last 300 years where the average temperature has fallen below 57.2," said Prof. Hubert Lamb of the University of East Anglia's Climatic Research Unit.

"But it is quite possible that July 1980 could be below" the lowest ever recorded, in 1802, when the average was 56.3 degrees, Lamb said.

## Midwest Shivers As Records Are Broken

**United Press International**  
A high pressure system sweeping from Illinois to Ohio has cooled breaking heat temperatures yesterday. A forecast was reported in Oklahoma and a drought related crop in Oklahoma.

**Midwest Shivers As Records Are Broken**

## Road 'Blows Up'

# Heat Toll 28 In Southwest

**Killer Storms Strike Midwest**  
A blizzard hit some parts of the Midwest, bringing heavy snow and strong winds. The storm caused significant damage and power outages.

**Nearly 100 Killed by Heat**  
A heat wave in the Southwest has claimed the lives of nearly 100 people. Many victims were elderly and lived in poorly insulated homes.

**Elite AF Unit Flunks A Test**  
A top-secret Air Force unit failed a test, raising questions about its capabilities and the effectiveness of its training.

**Ford Will Close Every U.S. Plant But 1 Next Week**  
Ford Motor Company announced that it will close all its manufacturing plants in the United States except for one, as part of a cost-cutting strategy.

**Chrysler Car Plans Also Move To Reduce Diesel Engine Model Introduction**  
Chrysler is planning to reduce the number of diesel engine models in its car line to streamline production.

## President Signs Draft Signup Law

The President has signed a law requiring young men to sign up for the draft. The law is part of a broader effort to address the nation's military needs.

## The Killing Heat Isn't Letting Up

The intense heat continues to grip the Southwest, with temperatures reaching record highs. The heat is causing widespread discomfort and health concerns.

## Chance of Radiation Leak Growing, Says TMI Report

A report from the Three Mile Island nuclear power plant indicates that the chance of a radiation leak is growing. The report highlights several safety concerns.

## Economist Sees Net Farm Income Falling 45% In 1980, the Biggest Decline Since 55% in 1921

**By CHARLES J. ELIA**  
The impact of the farm crisis is being felt in many parts of the country. Economists predict a significant decline in net farm income for 1980, the largest since 1921.

**prime source of asset wealth—his farmland.** We aren't predicting a big drop in farmland values," he says, "but the very fact that they're making at all is sufficient reason to pay close attention."

The Federal Reserve Bank of Chicago reported last month that a check of 525 agricultural banks in its district indicated a 2% drop in farmland values in the first quarter. It was only the second such decline since 1960.

In the late 1960s, farmland values increased an average of \$16 billion a year. In the past five years, the average annual increase was \$6 billion. Though he believes the recent decline is just...

## EUROPE

### Terrible Weather

**CORTINA D'AMPEZZO, Italy (AP)** — Snow fell in the Dolomites overnight and temperatures plunged 12 degrees in what the weather bureau called the worst atmospheric conditions recorded in July in 84 years.

Some recent news items from the controlled press

**QUESTION:**

In relation to food storage, one of the areas that has been most bothersome is; while you can store grains and dried foods, that the fresh produce would be badly lacking. Would Awareness comment on how much good it would be to consider sprouts as the live produce alternative?

**COSMIC AWARENESS:**

This Awareness indicates that in the action of storing grains, you also consider storing alfalfa seed and mung bean seeds and similar seeds, which can be sprouted for the green effects. This Awareness indicates these being so that entities may sprout these seeds in a matter of one, two, or three days, and have fresh foods for their tables. This Awareness indicates also, that in times of famine or hardship, there are options available to entities who cannot find fresh produce available. This Awareness indicates there are certain types of wild, edible plants which entities should become acquainted with in their own area, which could be used for food in emergency situations; or in present situations, just for the uniqueness and variety of the meal. This Awareness indicates that most bookstores and many shops in science museums have available cards or books which describe the edible plants, the wild edible plants in the particular area. This Awareness indicates that these would be very beneficial for entities to become acquainted with if emergency requires that such is needed. This Awareness indicates, however, that present conditions, while indicating food shortages and higher prices, do not imply complete famine; and this Awareness does not wish entities to become panicked and frightened that they will starve because of the food shortages which are likely to occur. This Awareness simply is pointing out the tendencies which entities must become aware of and adapt to, as these food shortages appear. This Awareness indicates that the nation's economy is still strong enough and the food production is still strong enough that generally, entities will be able to find whatever is necessary to survive without great stress or difficulty. This Awareness indicates however, entities can expect higher prices and certain shortages of foods during the coming year.

\*\*\*\*\*

**ED'S NOTE:** One of the best books on survival we have seen is Bradford Angier's "How to Stay Alive in the Woods" which has all the survival techniques necessary with several chapters on edible plants available in most of the United States. This book is available in most bookstores and also from C.A. C. (Price \$3.00).

In earlier readings, Awareness indicated that sprouts contain almost everything one needs to live on. These can be sprouted in a jar of water in just a few days. The crop can be harvested and eaten by itself or put into salads which makes the salad taste very good. Ann Wigmore, the famous naturopath claims that sprouts can eliminate cancer and other disease, and if placed in front of a TV set can eliminate all the dangerous radiation thrown out. Seeds for sprouting can be found at just about any healthfood store or food coop.
