Awareness

Cosmic Awareness Communications

P.O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

Paul Shockley, Interpreter

TIME IS RUNNING OUT.....

HELP SAVE MANHATTAN

C.A.C. MEMBERSHIP ENERGIES CAN HELP IN THE "COSMIC INTERCESSION"

(From a C.A.C. General Reading,

December 4, 1980)

A CHANCE TO REWRITE THE SCRIPT

(Where thought goes--energy follows)

ED's Note:

The entity asking the following question is Bill S., an entity who wrote us a few months ago and whom we asked to drop by and see us when his pilgrimage led him in this direction. You will be introduced to bill in 'Revelations of Awareness' No. 81-2 (A Search for God), forthcoming soon in 1981, which goes into more details on his 'writings' and the Cosmic experiences which predicted the destruction of New York City six years ago--a prediction almost identical to that made by Edgar Cayce 40 years previously. Other information concerning the potential destruction of Manhattan will be found in 'Revelations of Awareness' No. 80-1 (What's Ahead in 1981) which was mailed to the membership Dec. 10, 1980.

QUESTION:

Awareness, this entity has written a couple of letters previously describing a Cosmic experience that happened to this entity six years ago in which there was a vision of the destruction of New York City by nuclear holocaust, and this vision was given in very vivid detail and it was claimed to be the beginning of the Battle of Armageddon. Then the vision backtracked and gave a second scenario. This second scenario was an intercession or intervention by a group of entities who stepped in with prayer and Light energies which could defuse the impending cataclysm. This eleventh-hour intercession is still possible, and the people out there who are receiving this message can still do this intercession. The forces of Armageddon can still be transmuted and the earth cleared for transition into the New Age if entities will fervently pray and intercede with the Higher Self. With such an intercession, the vision of the nuclear holocaust can still be averted and many entities preserved from destruction. This is the essence of that vision of six years ago which came completely independent from any connection with any organization or any esoteric group or teaching. Does Awareness see this as having been a valid vision, and is this the correct interpretation of the vision?

COSMIC AWARENESS:

This Awareness indicates that this vision as that which was given to you by this Awareness through your own channel. This Awareness indicates that this as having been correctly received. This Awareness indicates that the action of receiving this information and other parallel information to that which has come through this channel [Paul Shockley] as that which has been of significance in assisting in levels of verification for not only your own channel being given verification from this channel, but also this channel being given verification from those writings and messages which you have received which parallel information through this channel. This Awareness indicates that these two channels being totally independent of each other, without any communication or knowledge in a physical sense of each other, bringing forth information which is essentially parallel, as that which assists in verifying the information presented by each of the channels.

This Awareness indicates in regards to your earlier vision wherein you were given the two tracts of the script, wherein that which has been written and which has been put into motion in the biocomputer of the earth mass-mind consciousness, wherein New York City is to be sacrificed:---this Awareness indicates that this as one script of future scenario. This Awareness indicates that the re-scripting or rewriting of the script is that which also can be accomplished, whereby enough entities are made aware of the potential devastation and danger, but who are of high enough consciousness to rearrange in their visualization the images and pictures to bring forth a change in the image or script, so that the destruction does not occur. This Awareness indicates that this kind of action requires a special type of consciousness, and cannot occur simply by entities being unaware of the potential danger of such an occurrence, but must occur after an entity is aware of the chaotic script, but of such consciousness as to still overcome that image of the dark script, to bring about the change in the script to allow that script to be rewritten.

This Awareness indicates that wherein consciousness goes, wherein thought goes, energy follows. This Awareness wishes entities to look at that very carefully: Wherein thought goes, energy follows. Wherein thought goes, energy follows. That wherein the thought has been used to place cobalt bombs around the island of Manhattan, (and other places), the energy has followed and these bombs have been set. This Awareness indicates that wherein thought goes toward the destruction of Manhattan island, energy follows. This Awareness indicates that therefore, if entities follow through on the thought and image of this occurrence, the energy for its occurrence will follow.

This Awareness indicates that if thought moves to recognize the absolute horror and devastation and the regret of having allowed this to happen, then energy can also follow to energize the regret of having allowed that to happen, and this Awareness suggests that if this regret is felt *before the occurrence*, entities may have time to change the script and think along different lines, thinking rather along lines of some form of reconciliation between the super-powers, a kind of enlightenment or catalyst which occurs in a different way, so that the Manhattan island need not be devastated, but may remain intact, so that the causes for such occurrence would be changed, so that peace could in some way come about to make this action unnecessary, so that entities may visualize a different course of action.

This Awareness indicates that in rescripting or rewriting the future events, there must be a thought line that runs from *what is* to *what may be*, but this thought line must move in a different direction, away from the chaotic event, toward one which is an avoidance of that event. This Awareness suggests therefore, that entities may wish to consider writing letters for example, to the Russians, asking that they remove these cobalt bombs from New York City. This Awareness indicates that entities, in asking this, may also suggest that the leaders of both major powers, and of the European nations consider meeting in constant Summit for peaceful settlement to all international affairs, and remain in summit until a peaceful solution is found.

This Awareness indicates that entities also may consider writing letters to newspapers and to various leaders of this nation, asking that the policy of 'First Strike' against the Soviet Union be re-examined, and suggesting that this is counter to the American way of life. This Awareness indicates that it counters the principles upon which this nation was built and founded. This Awareness indicates that wherein the Soviet Union, at present, has as a policy that of defense rather a 'First Strike' policy, and whereas the present Bolshevik administration of the United States has the 'First Strike' policy as its primary foreign relations policy in terms of military approach to the Soviet Union, this makes for a difficult situation, so that peace cannot be easily obtained between these super-powers; and therefore, wherein entities can, in some way, send forth their messages, asking for reconciliation regarding these conflicting approaches, wherein the Russians are creating threats for retaliation or secret attacks, and wherein the American forces, under Bolshevik influence, are preparing for 'First Strike' attacks, the energies need desperately to be reconciled.

This Awareness indicates that the letters themselves do not particularly have any great impact in the affairs, although they do have some effect. This Awareness indicates that the *real* magic occurs by the energy which follows the thought. This energy is that which occurs in the bio-computer of the earth's mass-consciousness, the mass-mind of the planet, which is recording and playing out all of the energies and thought-forms which entities create in regard to the events which will occur on this plane, for these are triggered by the mass-mind, which receives its collective energy from individuals who have directed thought toward particular events and actions of the future.

This Awareness indicates that therefore, when a mass of people collectively energize their thoughts toward one particular action, and in focusing on that particular action, give suggestions for rewriting the script of the future events; those energies of that collective group move into the collective mass-mind of the consciousness which surrounds the planet, and this has its influence on the minds of all others and creates the influencing factors for their behavior. This Awareness indicates that the letters themselves are simply grounding actions, physical in nature, which bring these thoughts/energies into physical manifestation. This Awareness indicates this much on the order of a ritual, wherein the concept is expressed in consciousness and acted out in physical action, such as the breaking of ground with a shovel before starting the process of building a temple.

This Awareness indicates that the physical action, the ground-breaking, is a grounding action which allows the concept which has been in consciousness of entities and planners to actually be grounded and begin to take form in the physical world. This Awareness indicates that likewise, wherein entities visualize and image changes coming in future events, and wherein entities visualize these future events, it is necessary that these events become grounded in some ritualistic action, rather than simply remaining as imaginary events of the future. This Awareness indicates that wherein such images are not grounded, these images are nothing but daydreams, having no substance or value.

This Awareness indicates therefore, if entities can image future events of value and then wish to take an action to ground these events, then the energies of that image or thought will be manifested into the physical, to some degree. This Awareness indicates that again, this is the principle that energy follows thought: If an entity visualizes and thinks along a certain line, energy will follow. But if the entity wants this vision to become manifested in physical reality, the entity must take this vision in some symbolic sense and ground this action by thinking it down into the physical plane. Therefore, the grounding action is that which thinks toward the physical and the energy of the concept then follows into physical reality.

This Awareness indicates that entities who do not have time or interest in writing a letter may also help, to some degree, in grounding their images by taking some physical action. This Awareness indicates this may be nothing more than imaging a harmonious resolution and reconciliation to the problem of the cobalt bombs being placed around New York City, visualizing a harmonious resolution, and then grounding this action by stamping one's foot, by hitting one's fist upon the table or floor, or by any other physical action which, to you, symbolizes the grounding of your concept and image.

This Awareness suggests that you never ground this image if you have any negative images included that you do not wish to allow. This Awareness suggests that you perfect the image as much as is possible before grounding this. This Awareness suggests this also be done through deep breathing, so that the oxygen fills your lungs and fills the blood to allow you to have the opportunity for better imaging; and then, when the image is clear, then you may ground the action with your physical movement. This Awareness indicates once this has been finished, the grounding action completes the ritual, and it is best to forget the work until you are ready to again run through the imaging and grounding process at a later time.

This Awareness indicates that if entities have the understanding and wisdom to look at the potential danger without projecting that image in the future as a reality, but if they can look at this potential danger as but a fiction story of what could be, and recognize instead that the truth will be something entirely different, and if entities can realize that they have an influence in writing the future history by simply thinking and allowing the energies to follow those thoughts so that the thinking toward that which is ideal carries energies toward that which is ideal, and is grounded in reality.

This Awareness indicates there *can* be an intercession in the events which come. This Awareness indicates that this requires that entities have control of their minds and not be influenced by fear, by prejudism, by critical self-evaluation, or by confused efforts to try to understand, rather than simply understanding.

This Awareness indicates that if entities can understand what has been given in this message, can read the handwriting on the wall in terms of the old script which may be played out in terms of the destruction of Manhattan island, but looking at this script can say, "No, I will not have it like this. I will have it this way instead." And if entities can focus their energies and thoughts toward a reconciliation, so that these chaotic conflicts which plague humanity at this time can be changed, then these things need not come about. This Awareness indicates that it is up to each individual to do what each is capable of doing.

This Awareness indicates there are some individuals who, in looking at this, will say to themselves, "What do I care about New York City? I know no one there. Maybe this would be the best thing for the world". There are other individuals who will say, "I wish I could do something, but I am so small and I really don't understand, and I have no power". There are other individuals who will say, "I can understand writing letters. It seems somewhat futile, but I could do this, if this is what is required, but the other information about thought, and energy following thought is too confusing to me, so I'll just forget that".

This Awareness indicates there are some others who will understand and will think clearly, allow the energy to follow their thinking, and will conduct a grounding action, and it is this thinking that will enter into the mass-mind, the bio-computer which surrounds this planet and feeds the consciousness of the many entities upon this planet, to think along different lines; and it is this programming which comes from these entities who think along different lines who program the mass-mind to think along different lines; and the mass-mind, then, spreads this concept to others who are connected with the situation around Manhattan island, so that these others are compelled by the mass-mind to follow through in the programming which you have given the mass-mind, which, in turn, has compelled those responsible to change the script.

This Awareness indicates that this *CAN* be an intercession. It requires understanding of this situation and action by a number of highly intelligent and aware entities to act as indicated in this message.

DESTRUCTION OF MANHATTAN COULD HAVE OCCURRED EARLIER

QUESTION:

Awareness, the course of action as just outlined requires a certain amount of time in order to make this manifest. The information given at the time of the 'Hot Line' in October gave us the feeling, at least at that time, that there *wouldn't* be time for this action. Obviously something has changed between that time and this. Is it true that the turning point on November 17th was allowed by an action of the Skoptsis showing mercy and with-holding their action to allow this intercession?

ED'S Note: the October reading just referred to follows this reading.

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that this had been scheduled, or intended to have occurred at an earlier time, particularly if there had been any action in the Middle East prior to election as had been planned by the present administration, but which was cancelled at the Eleventh hour. This Awareness indicates that this reprieve by the Skoptsis for a time, now allows certain other energies to clarify, so that if consciousness is clear enough in a number of entities, this can have an influence of some degree in preventing the chaotic event from ever occurring.

This Awareness indicates there is some danger in releasing this information in that entities who are hung-up on the image of the destruction and chaotic experience may, through fear and misunderstanding, ground those images in some kind of action such as slamming their foot down or pounding on the table, thus helping to bring about *that* particular scenario. This Awareness indicates therefore, this Awareness has gone to great lengths to explain how entities may intercede with positive action to program the mass-mind and to re-write the script. This Awareness indicates that some of this has already occurred from previous actions of a few entities through their own instinctive reactions and images. This Awareness indicates that many entities instinctively act in such a manner to assist in such reprogramming, even though they may not always know the method or effects of their thinking and the power of such thinking.

The October, 22nd Reading now to be Released

QUESTION:

Awareness, would the release of this reading just given, along with the reading of October that Awareness instructed us to release only if the event took place.....would this explain and emphasize how urgent and how critical and how imminent at the time that reading was given, and the scenario Awareness outlined that the government would possibly take,---would combining these two readings allow the members to see how serious this was, coupled with the fact that *now* they can do something about it to intercede; *or* would that reading, with the negative picture of the statue of liberty falling into the sea etc. only add to energizing the possibility of the event?

COSMIC AWARENESS:

This Awareness indicates that with this particular message sent as a cover on top of the other message, so that entities read this message first, and therefore, are prepared to read the other message with a different attitude---this can be beneficial. This Awareness indicates that had entities received that message at that time, without having the clear understanding of how to avoid sending negative images, or grounding the action, without having any ability to change the situation, they would have added to the energizing of its destruction, even if dreading and fearing such destruction.

This Awareness indicates that *now* it is possible for this to be averted, and entities in understanding how these energies can intercede in events, may also assist in the interceding to prevent this occurrence. This Awareness indicates these actions of entities are needed to assist in interceding and preventing this event from occurring. This Awareness indicates there are others on the inner plane, and others on the physical plane who are presently interceding in a similar way through their own natural instinctive thinking process.

QUESTION:

Would Awareness indicate if this should be given top priority of if those publications now in motion for coming out in the near future should continue, or if it looks like there might be two, three or possibly four months before another point could be reached where this event could actually take place? In other words...

COSMIC AWARENESS:

This Awareness indicates that it now appears that early February as being a highly charged time. This Awareness suggests that this message may be given a priority to some degree, that it be released as soon after Christmas as is convenient. This Awareness indicates that it appears the extra time for such energizing can be valuable. This Awareness indicates that this not intended to place undue hardship on you to release this information, but that it is of some value wherein entities can be of assistance in understanding how to intercede in future events.

This Awareness indicates this action has generally in the past been left to those of higher understanding on the inner planes to think events through, through the imaging process upon the physical plane, guiding human affairs with their mental images. This Awareness indicates this as similar to certain Russian experiments wherein an entity focuses through a window at a dog within a room, and with his mind, directs the dog to move from one place to another, and the dog so moving, without realizing that he is being directed by an entity outside the room.

This Awareness indicates that there are such beings on the inner plane who give their time and energies in focusing and directing entities to move from place to place, to take upon themselves some act, or involve themselves in some circumstance. This Awareness indicates these entities often lead entities to meet each other by chance, to form alliances and marriages and agreements which all seem to have come about by circumstance or coincidence.

This Awareness indicates that the action of interceding as that which has, in the past, been left to those on the inner planes, those guides. This Awareness indicates that now, entities on the physical plane can also participate in directing the affairs of their world through mental imagery and through the action of programming the collective mass-mind of humanity, to bring about the future events which are desirable for all.

QUESTION:

The general nature of these letters that entities are being encouraged to write as part of the grounding action, is (in general) the same essential message of reconciliation that the Awareness campaign has been expressing for those members who have been motivated thus far. It would be helpful to have a little more information on how the same type of letters with the New York potential in mind will be enhanced or modified as far as their effect.

COSMIC AWARENESS:

This Awareness indicates that wherein the Kremlin begins receiving letters from American citizens protesting the cobalt bombs placed around Manhattan island, it will have an effect: for this is an action which is intended to be secret, if it is used, and the fact that many American citizens know about this, will tend to influence the Kremlin to avoid using this unless absolutely necessary in their evaluation of the future conditions.

WHO TO WRITE TO ?

QUESTION:

In addition to writing Premier Brezhnev about the cobalt bombs, would Awareness, in light of the administration changing, indicate the names of entities in the American government other than the President, that the members should write to in reference to the 'First Strike' information which we are against because it is not in the American tradition?

COSMIC AWARENESS:

This Awareness suggests that this be directed to the incoming and to the present President. That this be directed also the Secretary of State, to the Secretary of Defense. This Awareness indicates that those various departments dealing with military affairs be listed. [This Awareness indicates that the Interpreter as slipping out of trance. This Awareness suggests the *Law of Gratitude* be given.]

Americans 'Need a Shock'

NEW YORK (AP) — President-elect Ronald Reagan should declare a national economic emergency as soon as he takes office and then follow up with concrete action "to really shock the American people," Republican Sen. Robert Dole said yesterday. "In my view he needs something to dramatize the problem we have in America. Maybe he can declare an economic emergency on the 20th of January," Dole said. The Kansas Republican, who will become chairman of the Senate Finance Committee when the GOP gains control of the chamber next year, was interviewed on NBC-TV's "Meet The Press."

The Honorable Jimmy Carter
(or Ronald Reagan)
President of the United States
The White House
Washington DC, 20500

The Honorable Edmund S. Muskie
Secretary of State (outgoing)
The White House
Washington DC 20500

General Alexander Haig (incoming)

The Honorable Leonid Brezhnev,
Premier of Russia
The Kremlin, Moscow, Russia, U.S.S.R.

Defense Secretary, Harold Brown
Dept. of Defense, the Pentagon
Washington DC 20301 (outgoing)

Defense Sec, Casper Weinberger

"COME TOGETHER

OVER ME"

('I read the news today, Oh boy')

A personal note from your editor

regarding John Lennon:

As I was sitting at the typewriter the night of December 8th, putting this reading together, the FM radio solemnly announced that ex-Beatle, John Lennon, had just been assassinated in Manhattan. Like it was for millions, there was shock, disbelief, anger, followed by shameless weeping for this gentle entity whose words and music and activities shaped the thinking and life-style of a generation of New Age beings who had incarnated on this plane, only to feel, 'We must have landed on the wrong planet'. He was a symbol that stood for revolution--musical, mental and personal revolution. John Lennon had the uncanny ability to say what the rest of us were thinking about politics, war, social values we had found obsolete; and when the Beatles said the way to cure the problems of the world was with love and peace, it was exactly what we all wanted to hear. Everyone listened, even big business, for these minstrels were as much an economic force as they were a political and social force. The Beatles led us inside ourselves to help us to discover Who, In Fact, We Really Are. As this new awareness grew, the murmur to 'Stop the slaughter' grew into a shout, and suddenly those in power were removed, the slaughter stopped. Some of the lyrics written by John sounded like themes from a Cosmic Awareness reading:

"Imagine there's no heaven
It's easy if you try, No hell below us, Above us only sky;
Imagine all the people living for today; imagine there's no countries,
It isn't hard to do; nothing to kill or die for, and no religions too;
Imagine all the people living life in peace...
Imagine no possessions, I wonder if you can;

No need for greed or hunger
A brotherhood of man;
Imagine all the people, sharing all the world...
You may say I'm a dreamer, but I'm not the only one;
I hope someday you'll join us
And the world will be as one"

His lyrics were full of deep and profound esoteric statements, laced in a poetry that shall long endure. Future historians, looking for the Beethovens and Mozarts of the '60's, can't help but recognize the Beatles as the spokesmen and movers of consciousness of that time. Paul McCartney was the shaft of the sword, John Lennon the creative force, the cutting edge that slashed through consciousness to move the masses up another stair in cosmic evolution. John had many faces: he was the Walrus, the Egg Man, the kid in Strawberry Fields, the philosopher, the renegade, the Fool on the Hill; his songs like "Instant Karma", "Give Peace a Chance", "Come Together", "Across the Universe", (the list is endless) telegraphed his message to the masses, millions seeing many other mystic levels of these songs while under the influence of the 'devil weed' and other substances used to expand the mind in those chaotic days. His inspiring paean to peace, "Give Peace a Chance" became the anthem of the 'Flower Children' and helped to bring about that 'Revolution' which eventually ended the slaughter in Vietnam. John Lennon was the true creative force behind the Beatles and his words and music uplifted the spirits of young and old alike; he made one feel happy; if you wanted to feel good, you listened to the Beatles and the expression of love and joy formulated in their songs by John Lennon.

But the main reason for bringing up this entity, whose death has rocked and shocked and stunned the consciousness of the world, is to share with you some insights which your editor and Vikki T. arrived at, trying to answer the question, "Why John Lennon"? How could the higher forces allow this gentle entity to be violated in such a manner? Why did not the Higher Self of John lead him from that area of crucifixion? After we wept, we talked about it, searching for the answer in the Cosmic Awareness philosophy. What we arrived at and what set our hearts at peace on this issue was that there is much more than meets the eye in this apparently senseless murder of a Beatle--who many of us cherish as an international treasure. We believe the entity John Lennon sacrificed himself so that the world could focus on his message: love, peace, the brotherhood of man, at a time when mankind itself was facing extinction. In addition we feel he could well have sacrificed himself to save his beloved island of Manhattan from destruction by the Skoptsis, and for this reason we feel this theory is pertinent to this particular reading enclosed.

Awareness has indicated there needs to be a 'shock in consciousness' that could defuse the negative energies of the Beast, and particularly those energies now focused on the destruction of Manhattan. What one man could shock consciousness in such a manner? What one man could produce in his death such a world-wide outpouring of grief and a relistening to his statement? Even the death of John Kennedy was not so heavy. What one man could be sacrificed that would put headlines around the world: "All you need is love"? What one man could produce a silent vigil in every city of the world, with thousands chanting, "Give peace a chance"? What one man could produce such an outpouring of love and response at his death? I can think of no other. Certainly not Carter, Kissinger or any other world politician. Certainly not any of the popular rock super-stars like Springsteen or Bob Seegar etc., who are all deserving in their own right. No, only the sacrifice of a Beatle could stop the world for a moment to allow millions to grieve and question and re-examine the message of this entity. This incredible outpouring of love and emotion around the world, given a channel of expression thorough thousands of radio and TV outlets, allowed thousands to telephone these stations who put the messages on the air--messages of tribute and respect, messages which made us all once more review the message of John Lennon, hear his songs round the clock for several days. These songs, these statements, all this fantastic energy released from the mass-mind into consciousness must surely have defused the dark energy that would obliterate Manhattan Island from the face of the earth. (I am not suggesting that you not write the letters Awareness suggests you write in this reading enclosed, for this is still necessary. Manhattan may have been saved, perhaps only temporarily by John's sacrifice; but these same energies could still erase humanity from the face of our globe).

There are even special programs, special sections of newspapers being devoted to this entity. A planned world-wide silence of 10 minutes, a meditation on his memory and his concepts of world peace and the brotherhood of man. Is this not magic? Will not Awareness use this energy of consciousness to help defuse the hostilities in our world that now are heading toward nuclear annihilation? We think so. We believe true alchemy is involved in this tragic event.

There were just too many weird coincidences to dismiss in this matter: After reviewing some of John Lennon's lyrics, there seems to run an almost premonitory scenario of what was to come: From the Ballad of John & Yoko, "Christ you know it ain't easy; You know how hard it can be; The way things are going, they're going to crucify me". And other lines such as "Once there was a way to get back home", and "Boy, you're going to carry that weight a long time" to the culmination of that dark day in Manhattan, "Come together right now, over me." Certainly humanity has 'come together' over John Lennon, if only for a moment.

Secondly, we know from previous Awareness readings that the Beatles were Wanderers who came to this plane on a special 'mission'. It told us that Wanderers are karma-free, and even if they fail their mission, they reap no karma. We know, of course, the Beatles did not blow their mission, that these entities were vanguards of the 1000 entities Awareness tells us reincarnated in various places around the world at a time their combined energies would confront the Beast energies, transmute these energies and herald the coming of the New Age of peace and enlightenment for humanity on this plane. Awareness also tells us that 'there are no accidents'. It tells us also that the Higher Self, along with those guides and masters of the inner plane, protect those entities of the Light. We know from the personal experience of Edgar Cayce that the soul-stuff withdraws before an entity is about to die. (His experience in the skyscraper wherein he was about to step into an elevator, but declined because he saw no auras around the entities packed into that elevator. A moment later the elevator cable broke and they all crashed to their death.) No, John Lennon's Higher Self knew he was about to die and agreements had been made right down the line, except possibly to the conscious mind. Perhaps this was even part of the scenario John had set up before he came to this plane. The whole thing appears to me like a Passion Play of Jesus, with John Lennon taking on the karma of New York, similar to Jesus accepting the karma of the world. Even the character of Judas appeared in the form of the entity who pulled the trigger. Although reviled by a world who is crying for vengeance, the entity David Chapman needs to be looked at from a cosmic viewpoint. (The last thing John Lennon would decry would be the death of his assassin, for John lived his message: violence only begets violence). Chapman, the papers claim, was not crazy; had in fact been a Beatle fan and a Lennon fan in particular for 15 years. He was a born-again Christian. He set out deliberately to stalk and slay Lennon, his only excuse being that he did not like the way John inscribed his autograph on his phonograph record. Like Judas kissing Jesus just before he slipped away to betray him, Chapman looked into the eyes of John Lennon as John wrote his name on the album, just hours before slaying him. From our knowledge of what Awareness has told us about the Higher Self, this contact HAD to register on John's Higher Self. John simply had to know, as Jesus had known: "Go swiftly now, and do what you must do". Awareness tells us Judas' action was planned as part of the cosmic passion play, that Judas created no karma by his betrayal. Perhaps the entity Chapman was being driven on some level to act out his part in a modern passion play and he, too, may not have created karma for this action. This is a possibility, perhaps not the correct one. But it seems to us that this entity has also sacrificed his life, along with the life of John Lennon, in order that the energies about to destroy Manhattan could be released in a symbolic manner wherein one entity gave up his life instead of two or three million New Yorkers having to give up their lives. This symbolic 'shock in consciousness' may indeed have all been planned eons ago so that entities today might think again about world peace, love, and an end to violence which both Jesus and John Lennon spent their lives trying to implement upon the consciousness of humanity.

This was our conclusion on this tragedy and whether right or wrong, it put our souls at peace. (Paul Shockley will not be up here until January, so there is no way we can ask Awareness about this at this time. Maybe later). We believe that John Lennon was a true soldier of the Light, whose life and music raised the consciousness of the masses, for everyone who has ever heard his music has an Akka-cord connection to that entity. John died in the 'heart of the Beast'--the Manhattan stronghold of the bankers and the war machine. Awareness has indicated the artery carrying the life-blood of the Beast had been severed. The life-blood of John Lennon was severed at his heart artery--symbolology all too close to be just 'accidental' in my opinion. The recent earthquake in Italy, although given world-wide coverage, did not shake the consciousness of the world (even though 5000 died) like the death of this one entity, John Lennon--soldier of the Light.

John Lennon 'loved' New York and called it his home. Was he aware of the 80 cobalt bombs placed around that island? If so, it was probably on a higher level and he decided to do something about it. Millions on Manhattan could well owe their very lives to this gentle being and never be aware of it. For after touching the lives of millions with his music, John Lennon may have been impelled by destiny to leave his justly-earned retirement after a job well done, and answer one last call to duty--a call to re-alert the masses to his message, a call to introduce his message of peace and love to a whole new generation of entities nodding off to sleep, feeding their senses, boozing, listening to scatological, low-level lyrics of much of present day rock and roll, ignoring the juggernaut approaching which could blast them off their planet; a call perhaps to rekindle that divine spark in every human face; and that final call perhaps to even sacrifice himself that millions of innocent beings might not be sacrificed. Yes, John has been called, probably to an even bigger assignment, but his legacy to entities on this plane are etched into the very soul of everyone who ever heard his music.

John Lennon's death was a restatement of his life and philosophy: violence is not the answer--'Give Peace a Chance'. His murder was showing the world that if it could be stunned for a moment by the death of a single man, how would it react if millions were the victims of a single act of violence--the nuclear holocaust now being planned by those behind the scenes.

Well done, John Lennon, Soldier of the Light. We salute you and grieve no longer, for we are beginning to understand. We have all 'Come Together Over You' and we will indeed 'Give Peace a Chance'. John Lennon--Wanderer, piper, you have left the world a rich legacy and you may have possibly helped to deliver millions from destruction and from the sorrow and tragedy that would follow. "Let us all shine on". The world has lost another avatar, the sons and daughters of the Light have lost a beloved Brother: you will be sorely missed, but as you have stated: 'The love you make is equal to the love you take'. We pray the world has got your message this time: "All I am saying, is Give Peace a Chance".

"Let it Be"

AFTER THE FALL...

THE SACRIFICE
OF MANHATTAN

and What you Need to do NOW

(C.A.C. General Reading)
Given October 22, 1980

EDITOR's Note:

It is the fervent hope and prayer of this editor, the staff of C.A.C. and the Interpreter, Paul Shockley, that this particular reading will never have to be mailed to you. This reading was given on the afternoon of Wednesday, October 22, 1980, and upon instructions from Cosmic Awareness, we started putting it together the following day, to release it to the membership ONLY if the events mentioned in this reading were actually to occur.

(Avaton)

QUESTION:

Does Awareness have an opening message?

COSMIC AWARENESS:

This Awareness suggests the date be given.

ENERGIZER:

October 22, 1980.

COSMIC AWARENESS:

This Awareness indicates the time approaching whereby that which was warned of* may soon become a reality.

* ED's Note: Awareness is referring to information given in a reading of October 13, 1980 (not yet published) where it warned that the Skopsis behind the scenes were planning to destroy Manhattan Island if the Bolshevik plans for nuclear war continued.

This Awareness indicates there is but a very unlikely possibility that the earthquake in New York City shall not occur. This Awareness indicates that the greater uncertainty is the degree of the intensity of the event.

This Awareness suggests that this message, the warnings given, as being unlikely to have any beneficial effects on the outcome of the event. This Awareness suggests therefore, that this message not be released until the occurrence of the event, if indeed it does transpire. This Awareness indicates that when and if the event occurs, this Awareness suggests this message then be released quickly to your membership.

This Awareness indicates that those entities in the area who have had communication with this organization have received warnings. This Awareness indicates that others have received warnings from the Dr. Beter Audio Letter. (ED'S Note: When we released the Hot Line Newsletter No. 80-32 concerning David and Goliath, we inserted a special letter to our New York City area members, warning them of this planned earthquake).

This Awareness indicates the majority of entities prior to this event would scoff at such information or become frustrated and hostile at such information. This Awareness indicates that those who have taken the information seriously and acted upon the information and have taken steps to avoid the event, are gambling on the outcome of information which may or which may not be valid. This Awareness indicates that only the event will verify the validity of the information, and many entities do not wish to act until the news media tells them which way to go.

This Awareness indicates that essentially, the event as one which will, if it occurs, not allow time for the news media to inform the masses. Therefore, there is great danger that many will not survive the event.

This Awareness indicates that this message, being given prior to the event, but to be released in the event the event occurs, as that which is not intended as a forewarning, for such has already been given; this message rather being to indicate to entities what may be expected to follow the event, that entities may better prepare themselves through greater awareness.

This Awareness indicates that depending on the intensity of the earthquake and its effect on surrounding areas, this may determine to a large degree, the degree of reaction throughout the nation to the event. This Awareness indicates that assuming the event as a relatively minor earthquake, serving as a warning, the action will not create great, immediate changes throughout society or through the policies of banking and government procedures in a way which is strongly apparent to the masses; but rather, will be of a more subtle nature---a change which occurs without great attention.

This Awareness indicates that assuming, however, that the event is of a great magnitude, whereby warning is ignored or is not given (this being a strong likelihood), then entities may expect major changes and reactions in the monetary system and the government reaction to the event.

This Awareness indicates that the potential prepared for this event is such that it could affect states and cities on the Eastern seaboard to such a degree as to shatter the economies of these states and cities for approximately 400 miles around.

This Awareness indicates that it appears that Boston will be greatly shaken if the magnitude of this event is released in its full potential. That also Washington D.C. and that area and Baltimore may also feel the intensities of this energy. This Awareness indicates that the greatest devastation would be to the Manhattan Island and the low-lying areas nearby.

This Awareness reminds entities that this event, to a degree, was previously prophesied in the Edgar Cayce readings regarding earthquakes on the Eastern seaboard. This Awareness indicates again, that the area of Virginia Beach appears to be a safety-zone and that areas inland appear to be untouched by the event. That the greatest potential damage being that of Manhattan Island and the local islands and cities in the area within a 25-mile radius and particularly those on the coastal areas---this largely from tidal waves.

This Awareness indicates that also the fault-lines running to Boston as having strong effects on those areas nearby. This Awareness indicates that other fault-lines stemming from that area also shall serve as energy points, carrying this vibration along these lines.

This Awareness indicates that the potential for great devastation is that which cannot be ignored or minimized; and that were it possible to avoid this action, it would be of great urgency that members of C.A.C. put forth vast amounts of energy to change and prevent the occurrence. This Awareness indicates however, that it is beyond the control of the members of *Cosmic Awareness Communications*; it is beyond the control of any who are in touch with this message. This Awareness indicates that there are more powerful forces working in regards to this action, and it is too late at this stage, to avoid the potential for this action.

This Awareness indicates that there are other forces which could, by choice, prevent this from occurring; yet it does not appear to be the likelihood that this will be averted, at least to some degree. This Awareness indicates that it appears that the best entities can pray for is that it be of minimal destructive force. This Awareness indicates that this does not mean there cannot be a total reprieve, but rather that it is highly unlikely. This Awareness wishes this clarified so that entities who have received information regarding this will not tend to energize feelings of guilt for not having taken greater actions or efforts to prevent the event after it has occurred. This Awareness indicates that the concern should be not of heaping guilt upon oneself, but rather of looking forward to events which follow. This Awareness indicates that preparing for the potential results of the event become a new concern, which may be of extreme urgency or of lesser urgency, depending upon the degree of the potential devastation caused by the event.

This Awareness indicates that in the event the earthquake occurs and totally destroys Manhattan Island, which is a very strong probability at the time of this reading, then entities may expect the collapse of the economic system to occur in a form of ripple, whereby it spreads slowly across the nation, from bank to bank to bank to bank, and whereby entities begin quickly extracting their savings from the banks, and whereby the banks fail. This Awareness indicates this could occur within a matter of days, or, if the devastation is not so great, within a matter of weeks.

This Awareness indicates that in the event the devastation is light and the buildings remain intact and business continues as usual, then entities may consider their savings to remain relatively safe within their banks, and a panic may be avoided. This Awareness indicates that even a minor earthquake could, however, greatly affect the stock market for a period.

This Awareness indicates that in the event the devastation is great, entities may expect the government to declare National Emergency Powers, particularly if this entire island is basically destroyed. That the government could easily declare a 'National Emergency', suspend the elections, and attempt to set up the Executive Orders to deal with emergencies, so that the Constitution is suspended and entities are essentially under dictatorial controls. This Awareness indicates that this could prevent entities from leaving the country, from withdrawing their money from the banks, from traveling without permission. This could result in collapse of economy, with controls placed on economy, wages, and on production. This could result in a kind of intensified national scramble to attempt to reestablish order.

In the event the economy collapses, entities could expect possible and probable rioting or demonstrations, looting in certain areas, and in many cases, violence and civil strife until order is restored. This Awareness indicates that entities may also expect corruption and black-market activities among officials in the event that order is curtailed by the confusion which might ensue.

This Awareness indicates also, that in the event of a major disaster in the New York area whereby the banking system which is headquartered on Manhattan Island is destroyed, then entities may expect that the actions of the Russian Skoptsis would not simply end there, but would spill over and follow through in different areas.

This Awareness indicates likewise, the activities of the Bolsheviks could well become frantic, and an effort to react with a nuclear strike against Russia--this also could be triggered by the event; and the Russians, recognizing this potential, would be properly prepared to deal with any efforts by these Bolsheviks. Therefore, entities, soon after the earthquake on Manhattan Island, could possibly witness the destruction of certain military weapons if the Bolsheviks attempt to launch these into a strike against Russia. This Awareness indicates that this could occur in various places throughout the United States wherein entities are nearby these military installations.

This Awareness indicates that this particularly in terms of those missiles and weapons which could rain devastation upon the Soviet Union. This Awareness indicates that this appears to be somewhat more unlikely, for there is the possibility that the Bolsheviks will not be organized enough to have the impetus to initiate a strike against Russia.

This Awareness indicates however, that in the event they attempt this, the Russians will be completely prepared, being already apprised of the trigger in Manhattan Island, knowing that it could trigger reactions from the remaining Bolsheviks; and therefore having their weapons at ready in event the Bolsheviks attempt to respond.

This Awareness indicates that likewise, entities may expect sudden changes to occur within government levels in this nation. This may occur in secret without entities being aware, whereby the Synthetic leaders are replaced by Robotoid leaders, and the country appears to be moving in a National Emergency state with an effort to return to normal in relation to the national emergency conditions; and it may appear that the leadership remains in the same hands of the Bolshevik powers, while in fact, the faces may appear the same, the leadership may be switched to create again that which is controlled by the Skoptsis, making this a Russian satellite.

This Awareness indicates that there is also the possibility of a struggle occurring between the remaining Bolsheviks and the Skoptsis, whereby the change will surface and become apparent and entities may recognize that there is, indeed, a struggle occurring for the leadership of this nation between two factions.

This Awareness indicates that the more likely direction will be that whereby this change in leadership is kept relatively quiet, without entities being given the opportunity of knowing what has transpired until some time later, when the word leaks out.

This Awareness indicates that the events of the earthquake at such a devastating level would indeed be followed by increased activities in the United States by Skoptsi agents and their friends and associates in the United States to assist in transforming the nation into a Russian satellite. This Awareness indicates that this may also take place under the guise of a national emergency, wherein the leaders of the country are serving this purpose, keeping the masses under control through the National Emergency Act while transforming the nation into a Russian satellite. This Awareness indicates that this as a strong possibility in the event that the Bolsheviks are basically destroyed by the Manhattan Island event.

This Awareness indicates that in the event this does not occur to such a degree as to destroy the Bolshevik power in this country, then entities can expect that such an earthquake will serve as a warning to the Bolsheviks, and that they may gradually and carefully begin to back down from their intense plans for global warfare and nuclear strike against Russia. This Awareness indicates that these entities then may begin to back-pedal, and there is a possibility of continued struggle while jockeying for position; and there is then a possibility for eventual agreements or reconciliations between the Skoptsis and Bolsheviks. This Awareness indicates however, this does not appear to be the probable directions of events at this time; this appears to be a possible direction. This Awareness indicates that any questions relating to anything mentioned may be asked at this time.

QUESTION:

I'd like to ask Awareness if the letter we sent out the other day to the members in the immediate area of New York and Manhattan should also be sent to those entities in a 200-mile surrounding area? It occurred to me we have members in New Jersey etc. who didn't get the letter.

COSMIC AWARENESS:

This Awareness indicates that it appears that these areas will not be hit with such devastation as to warrant the need for such forewarning. This Awareness indicates that those which are on the coast in low areas, particularly in the New York City area, are most vulnerable. This Awareness indicates that those 25 miles away, while likely experiencing a strong quake if the full potential is used, will not be in such danger as to warrant over-concern for the event.

This Awareness indicates that in any case, there is little that could be done for these entities, even if they were expecting an earthquake; for they would not be inclined to leave the area, even if recognizing the type of earthquake that would likely occur. This Awareness indicates that the likelihood is that they would prefer to sit through the experience, as the damages in those areas would be slight enough that it would not merit entities leaving. This Awareness indicates that there is, of course, a possibility that such an earthquake given full potential, could trigger off great, massive earth changes in the area, which could have heavy results. This Awareness indicates however, this does not appear to be that which is to occur.

This Awareness indicates this would not be of value to the Skoptsis and would serve as a terrible propaganda event against them if it ever were discovered that they had caused such an event. This Awareness indicates therefore, the probability is that it will be confined to the target area, but will have some unavoidable repercussions in other areas nearby.

QUESTION:

Awareness, surely neutron bombs that would set off this earthquake would have some radiation or sound or something that survivors could testify to, leading entities to finding out that it was not a natural earthquake. Isn't that possible?

COSMIC AWARENESS:

[This Awareness indicates that these being cobalt bombs.] This Awareness indicates that eventually, entities will discover that it is unnatural--or a form of geophysical warfare. This Awareness indicates that by the time it occurs, even if entities discover, it will be too late for entities to voice objections for any purpose that would change the course of history. This Awareness indicates that the Skoptsis realize that entities will eventually realize the truth, but also they recognize that most entities would not believe the information even if told, unless it were told on the daily news broadcast. This Awareness indicates that most entities believe only what they read in the paper or witness from the television broadcasts. This Awareness indicates that therefore, as long as they are told it was an earthquake, they are not inclined to believe others who say it was brought on by cobalt bombs placed by Russian Skoptsis.

QUESTION:

Then there is no radiation threat from the cobalt bombs?

COSMIC AWARENESS:

This Awareness indicates that this as quickly dispersed; that this not lingering or of great hazard in comparison to other types.

THERE COULD BE A SERIES OF EARTHQUAKES

(Each a stronger warning to the Bolsheviks)

QUESTION:

Does Awareness see a more specific date or perhaps day the event will occur?

COSMIC AWARENESS:

This Awareness indicates that it appears these may be released in a series of events. This Awareness indicates that there was indicated a possible energy on the 23rd, 27th, 31st, November 4th, 7th, 12th and 17th. This Awareness indicates the 8th as also having been a number.... This Awareness indicates this as possibly having been energy associated with the Interpreter's birthdate. This Awareness indicates that the 4th and 31st also as having previously been energized as Halloween and election day. This Awareness indicates that the 23rd as appearing to be a relatively weak energy, not likely to be strong enough to indicate an earthquake of any magnitude, but perhaps an event associated with possible earthquake concerns. This Awareness indicates that the 17th of November appeared to be a strong energy. This may indicate an energy associated with after-effects or a second, or some after-shocks of a high magnitude; or this may also indicate the major event after preliminary, smaller events. This Awareness indicates that it appeared that after November 21st, there was no further energy on the quake. This Awareness indicates that this appeared to indicate the major events would be at an end by that time in relation to the earthquake. This Awareness indicates however, after that, other events could be just beginning.

ED's Note: After the question was asked, (Could Awareness give a specific date for the event?) the mind of the Interpreter got into the way and finally Awareness indicated that the energizers present start counting out loud the dates, starting with the 22nd. The Interpreter, still in trance, raised his arms into the air. As the numbers were counted and those days when the energies indicated a possible earthquake were called out, the Interpreter's arms would suddenly jerk. In this manner the days when the earthquake were most likely to occur were indicated by Awareness. It is very difficult for Awareness (or any psychic for that matter) to give exact dates from the energies given by the question asked. This being very heavy information, a part of Paul's mind was reluctant to take the responsibility for verbalizing an exact date for the event in question and therefore Awareness came up with the method described.

QUESTION:

If these quakes do, indeed, occur in a series, is there going to be some clear sign so that we'll know which one is the big one and therefore release the information to the membership?

COSMIC AWARENESS:

This Awareness suggests that when you read of an earthquake in New York, you may release the information. This Awareness suggests particularly this in relation to an earthquake centered near Manhattan Island. This Awareness suggests that when this makes news, that you then release this information. This Awareness indicates that you may also release information regarding the possibility of a series of further earthquakes occurring if the first news is such as being a mild earthquake, rather than a strong earthquake, which does not have great repercussion on the business of the Manhattan Island banking establishment. This Awareness indicates that if the event appears to be only a warning to the banking establishment rather than as something which curtails their activities, this Awareness suggests that then, it is likely that further and more devastating earthquakes are ready to be released; except, if these events do occur as a series, this can also imply that the Skoptsis are open to some form of negotiation, along with the 'big stick' which will be used if negotiations are not properly related by the Bolsheviks.

ED's Note: in a reading the following day, Awareness indicated that another sign indicating Manhattan was about to go was that there was a strong possibility that Mt. St. Helens in Washington State would have a massive eruption, this time with lava flows possibly creating much havoc. This was probably what Awareness was referring to in this reading when it referred to an 'event possibly associated with earthquake concerns'.

QUESTION:

Once this occurs, if this does occur, would follow-up events and their ramifications going to supercede the possible beneficial effects of the letter-writing campaign in relation to the gold theft from Ft. Knox?

COSMIC AWARENESS:

This Awareness indicates that it may overshadow this for some time. This Awareness indicates however, that it also appears to be an action which will be compatible to the necessary changes which would occur. This Awareness indicates that this letter-writing campaign can assist in informing the masses through its effect of bringing the information out into the open through the proper investigation of the gold theft in Fort Knox, of informing the masses so that they begin to understand what, indeed, has happened during the past years--how their country has been overtaken by these Bolshevik powers, and how it now is being resolved, and how entities can take back greater control of the economy through clearer communication and controls to govern the economy. This Awareness indicates this can coincide with the new, reestablishment of order in this country, if and when it occurs. This Awareness indicates that also, wherein the Skoptsis see the American people actually taking responsibility for their rights, they will be less inclined to dictate behavior to the American people, and more inclined to allow them a certain amount of self-government.

WILL 'LIGHT WORKERS' SURVIVE ? (More on the types of karma)

QUESTION:

One question in regard to this potential event: In the past, Awareness has indicated that there are no accidents and it also has indicated that entities who are working for the Forces of Light often are protected or are in a state of grace, and can move in and through these intensities unscathed. I would like to know in the event of a massive earthquake such as predicted for Manhattan Island, if those entities working for the Forces of Light--and there must be a lot of them--are either being directed now out of the area or will be protected as this intensity occurs and they remain?

COSMIC AWARENESS:

This Awareness indicates that the events, in terms of catastrophic occurrences, reflect not only personal karma, but also cultural karma and group karma. This Awareness indicates that wherein a major event of catastrophic proportions falls upon a people, this often is, in fact, a group karma or cultural karma, rather than the individuals' involved in that situation.

This Awareness indicates there were a lot of good people in Nagasaki. There were a lot of good people in Berlin. There were a lot of good people in various places wherein major events occurred that destroyed towns and villages, such as Pompeii, such as in Atlantis--wherein several cities were destroyed. Wherein there are storms, tornadoes, cold spells, or other types of physical occurrences, entities often find themselves in a state of disaster, along with their neighbors.

This Awareness indicates that likewise, these individuals may have a family karma or an occupational karma. This Awareness indicates that many entities in certain areas of business: in the banking business, in the computer business, in the manufacturing business, or in any other type of occupation, may suffer a similar type of karma for the occupation. This may be termed occupational benefits or occupational hazards--or both. This Awareness indicates that while there are many good people in Manhattan Island, there can be an event which destroys the occupations and the occupiers along with it. This Awareness indicates however, that wherein the entity has been operating in levels of light and has been a good person, the entity's personal karma shall be that which brings forth the rewards of a good life, and the entity will return or carry with him or her, the rewards for having lived a good, servicing or serviceable life. This Awareness indicates that therefore, there may be what one would term

'innocent persons' who lose their lives in a major catastrophe. This Awareness indicates that these, however, while innocent as individuals, are suffering from the karma of the culture or occupation or place which they choose to be.

This Awareness indicates that wherein an entity's purpose is such as to merit a change, each entity upon this plane has guides who watch over the general development and expression of individuals; and whereby the guide recognizes that the entity would be better off leaving a particular area for a time, to preserve the life and to become safe from an impending event, the guide will set up events for that entity's life to move the entity out.

This Awareness indicates however, when one's guide recognizes that an entity is stuck in a particular rut and is not likely to change, or whereby the guide recognizes that the entity's life is but an action of self-serving, or whereby the guide recognizes that the entity is not about to do anything other than what he or she is presently doing, and the life is a waste at present time--then the guide does not necessarily take action to move the entity away from the cultural event, the group event, the occupational event, or the hazard which might take the entity's life.

This Awareness indicates that likewise, guides can also assist entities during a time of crisis to move into a safe place, if that appears to be the experience which the entity needs and if the entity is open to inner guidance. This Awareness indicates that many entities do not heed the guidance given them by these inner beings from the inner plane; and therefore, not heeding inner guidance and heeding false guidance from the exterior world, these entities may simply continue in their action until the event which occurs removes them from the activity and terminates their being or changes their occupational experiences.

OTHER EVENTS OCCURRING NOW

(Closing Message)

This Awareness indicates that there are many other events which are also occurring on this plane at this time. This Awareness indicates particularly in the area of China, whereby great changes are occurring in the leadership there. This Awareness indicates that likewise, in other areas of the world, changes have intensified; the forces are becoming more defined and the activities more intense, as these forces struggle for control.

This Awareness indicates this may be likened unto a mopping up by the Forces of Light on the battlefield. This Awareness indicates these are mop-up battles. This Awareness indicates that it appears that the major battle, having taken place approximately 18 months ago, as that which served as a turning point; and this present event as that which is a major battle, but which will (if it moves as it appears to be moving), will be the last great battle between the Forces of Light and the Forces of Darkness upon this plane.

This Awareness indicates however, that this particular action of the earthquake in New York and the power struggle in China--these as but focal points of this last, great battle and are not to be confused with the entire battle; for there will be continued struggle, even after these areas have been de-energized. This Awareness indicates however, that these do appear to be of tremendous power releases in the consciousness levels, so that great changes can begin to occur at a much more rapid pace to bring about light and greater harmony upon this plane.

This Awareness indicates that all of this, of course, is yet to be determined by the events which are in the making and have not yet occurred at the time of this reading.

(The Law of Gratitude is recited)

ED's Note: for more information on what to expect if the National Emergency Executive Orders go into effect, please refer to 'The Gathering Storm' and related 'Revelations of Awareness' newsletters released the following months. Also please review the Dr. Beter material regarding the Cobalt bombs placed in earth-faults and other information relating to geophysical warfare.

For more information on disasters and big events, please refer to 'Revelations of Awareness' No.78-5 (The 747 Collision):\$1.00.
For more on the turning point battle, please refer to 'Revelations of Awareness' No.79-17 (Apocalypse Averted):\$2.00 from CAC.

REVELATIONS OF AWARENESS is a cosmic newsletter published every two weeks by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507 (A Non-Profit Organization). Rates and membership information upon request.
