Cosmic Awareness Communications

P.O. Box 115, Olympia, Washington 98507

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

QUESTION:

(From a C.A.C. General Reading, August 5, 1980)

This is a question from S.M. of Chicago, and we've had many variations of this same question and Awareness has gone into some aspects of this; but since it is a problem and a dilemma which faces many of the membership, I'd like to read the question and ask Awareness to comment:

"There have been numerous references in earlier material sent to the membership concerning the cost of the Beast material in individuals' personal lives. I currently am in a situation which I believe to be more universal than I originally thought. Even though this is a personal question that I would like to ask Awareness, I believe that the answer may benefit many other readers in a similar situation.

My situation is this: About a year ago when things with the Beast were peaking, my spouse, who is not at all sympathetic with any of my Light activities since she is an atheist who thinks this is all a bunch of 'crap', but is very much a 'Christian' at heart, was feeling very very threatened by my activities, even though I kept most of them concealed from her. One day, after listening to one of my Dr. Beter tapes, she fell apart and threatened to leave our marriage. If it were not for our two small children I probably would have let her go and work out things by myself. She insisted that I give up all of my activities with my A.R.E. study group, C.A.C. and any other related organizations FOREVER or she was leaving.

I was able to convince her to stay by stating that I would give up these activities and never, (or as long as I could), present this matter to her again. Since then I have had to go underground with my activities in order to be true to my own beliefs, because I still love her and want my family to be complete. I have been dealing with this matter almost daily in the mental rather than the physical. So far, I believe that I have been successful in dealing with these negative energies. However, I am not altogether thrilled with the prospect of being a closet C.A.C. member forever, and would like to reconcile these energies as soon as possible. I would like Awareness to comment on the cause of this situation and just how one should deal with this, and can I expect any changes in the near or distant future?"

COSMIC AWARENESS:

THE FOUR DISTINCT STAGES OF MARRIAGE

This Awareness indicates that this as having two different parts for consideration. This Awareness indicates that in the Aquarian Church wedding ceremony, there are listed four distinct stages of the marriage through which entities generally move. This Awareness indicates the first stage being that of the romance period, wherein entities come together, expecting the other to fulfill the dreams, hopes and wishes which the entity has always sought in a mate. This Awareness indicates that this romance period as that which usually occurs near the time of the wedding and remains for a short period thereafter.

This Awareness indicates that this romance period as that wherein the entities do not fully know each other, nor do they care to know each other,—they prefer to have the illusion that the other fills the bill and fits the expectations which they hold in their mind as the concept of the ideal mate. This Awareness indicates often, these expectations of this ideal mate have nothing at all to do with the reality of the mate; the mate may be entirely different from that which the entity believes to be the mate. This Awareness indicates that this romance period as a time wherein entities are infatuated, in love, and romantically envision a particular lifestyle of fulfillment as the result of this marriage to this mate. This Awareness indicates this as the first stage of marriage, and this generally lasts a rather brief time after the marriage occurs: this may be as long as several months, or may last for a year or so, but seldom longer.

This Awareness indicates that after the first romantic period, there comes the second stage of the marriage, this wherein the entity suddenly realizes what he or she has done in having married this entity who will not fit into the concept which the entity is supposed to fit. This Awareness indicates at this point, the partners of the marriage begin to discover the other partner for what he really is, and in this discovery, the entities begin to feel that they have been cheated, ripped-off, defrauded and otherwise insulted in having been brought into a marriage with this entity who will not fulfill, has not fulfilled, and does not appear to be interested in fulfilling the expectations of the person.

This Awareness indicates that both parties may feel similar toward each other, or one may wish to fulfill the expectations, but not be able to do so. This Awareness indicates that each party may attempt to fulfill some of the expectations, but may resent doing so. This Awareness indicates that each party may express his or her needs, and those expressions of needs and demands may put such a heavy burden on the other partner that the

other partner feels that he or she has also been totally violated by the experience of marriage. This Awareness indicates that essentially in this second stage, this as the tug-of-war between the partners, and these partners find themselves in conflict over values which each holds dear, and over expectations which each holds dear, and over pride which each feels is being violated by the other. The self-expression and self-esteem of each partner may be threatened by the other, and the entities appear to have little respect for each other. This period of the tug-of-war, this as the second stage, and this may last for quite some time, depending on how long the entities can continue in such a relationship.

This Awareness indicates that this tug-of-war between the entities often deals with the expectations of one, wherein the one seeks to get the other to perform properly according to what was expected of him or her, and the other refuses or is unable to fulfill those expectations, or becomes rebellious and simply refuses to fulfill

those expectations, or feels overwhelmed by the prospect of attempting to fulfill such expectations. This Awareness indicates in a situation of this type, it is not necessary for each partner to attempt to fulfill the expectations of the other. It is necessary, however, that each listens to the other and each shares his or her feelings about those expectations, and that each allows the other to continue holding such expectations with the understanding that neither is obligated to fulfill those expectations. This Awareness indicates this type of communication can assist these entities in recognizing the individuality of each person as being supreme, necessary and precious in the relationship, and that neither entity owns the other, and that neither entity owns the other, and that each has his or her own path, each has his or her own destiny, though these destinies may coincide with each other's directions on some levels, they need not coincide on every level.

This Awareness indicates that wherein one feels threatened by the values of another, this often is a reflection of that one entity's insecurities, and it may be that the entities need to discuss these insecurities rather than the values of the other. This Awareness indicates this can occur in stage two, whereby entities begin to discover portions of themselves in relationship to each other. This Awareness indicates that whether these entities discover anything during this time or not may determine whether the marriage reaches stage three.

This Awareness indicates that at stage three, each partner begins to give up on the other. The partners of the marriage simply throw up their hands in disgust and say, "I cannot deal with you. I will just have to simply live my life as I choose and not depend on you for anything." This Awareness indicates that in stage three, the partners in giving up on each other, may begin to look at themselves and work on themselves and; unlike stage two, wherein each blames the other for any problems, in stage three each entity may begin looking at his or her own weakness, his or her own errors and forget about blaming the other.

This Awareness indicates that in stage three, each partner may begin discovering more and more about one's self and moving into actions of personal interest,--taking classes, studying some course of interest, making new friends, becoming involved in outside activities,--creating a totally separate lifestyle from the other, whereby these mutual interests are no longer closely linked, but whereby each of the partners is developing a path and a life which is satisfactory to himself or herself, according to the immediate interests. This Awareness indicates the danger in stage three begins to occur when these entities find themselves creating separate paths and lifestyles to such a degree that they can no longer communicate with each other, and when this occurs, there is the possibility of the parting of the ways, so that the entities may not have anything left in common to continue the marriage with. This Awareness indicates that the way to avoid this kind of separation is for the entities to allow each other the separate lifestyle, but on every opportunity where the entities come together, to communicate to each other exactly what you are doing, exactly what your interests are, what your pleasures are, and to enjoy listening to each other as though you were speaking to a friend or stranger, rather than to some entity in whom you have invested your life.

This Awareness indicates that in this way you remain in touch with each other, you understand each other, you begin to find a respect for the individuality of the other being, rather than simply attempting to use the other being to fulfill *your* individuality. This Awareness indicates that as this occurs, a mutual respect begins to develop, very slowly, whereby there is also a curiosity about the other entity which begins to develop, and the beings in this marriage suddenly begin to discover each other for what they are, rather than for what they want the other to be.

This Awareness indicates this stage may take quite some time or may move slowly, but whereby the communication between these entities continues, even though their lifestyles differ, the communication is that which can assist in leading these entities to stage four, whereby they discover, in fact, who each other is with fresh eyes, with fresh interest, and with a concern for each other's welfare without the possessive, clinging, greedy attachments which were present in the second stage. This Awareness indicates that in this fourth stage, the entities begin to look at each other again, discovering the other's interests and values, not feeling that you have the right to direct the other's life, but being willing to assist when necessary and when needed, and assisting because you care about the other. This Awareness indicates that in this fourth stage, there is a new type of romance which develops, not based on illusions and expectations of the other, but based rather on the awareness of who the other is, what the other's values are, what the interests are, what the talents are, what the entity is doing, what the entity wants to do, and the mutual respect which the entities can share with each other. In this fourth stage, each entity not only develops interests of their own, but also discovers and becomes interested in the other.

This Awareness indicates this fourth stage continues and continues and continues as each watches the other and becomes more and more respectful of the individuality which they married and more and more loving in the communications which they share. This Awareness indicates from this fourth stage develops the ideal marriage, and this as that which is lasting, which entities dream of.

This Awareness indicates those entities who cannot move beyond the first, second or third stage without the marriage breaking up, will simply need to move through these stages in yet another marriage with another entity, for these stages will be present until entities move through and pass into that fourth stage of marriage. This Awareness indicates that essentially, this as what is occurring in your situation. This Awareness indicates that whether this involved the Awareness material, Dr. Beter's material, or something else, it would still have been the same. This Awareness indicates had it not been this, it could have been a bowling night out once a week or some similar action which would lead to this showdown. This Awareness indicates that essentially, when you begin to give up your own individuality in order to preserve the status quo and to fulfill the demands or adhere to the demands of another, this as only a temporary solution, a minor victory for one at the expense of the other.

This Awareness indicates at this particular point, your wife has felt victorious, but now begins feeling pangs of guilt deep inside; it has given a certain type of security proving to her that she does have power and control to hold the reins on you, and therefore has allowed this action as an expression of her power and control and this allows the entity to feel greater strength in the control of the marriage itself. This Awareness indicates that wherein the entity can control her husband like the cowboy controls his horse, the entity is much more secure.

This Awareness indicates, however, this security does not bring satisfaction, for it is not love which the entity is tied with, but the control which the entity has. This Awareness indicates this control does not indicate love from the husband, except as a kind of test: "if the husband really loves me he will sacrifice for me." This Awareness indicates that this kind of test is only satisfactory in terms of supplementing the entity's insecurities with some proven test to show that the entity really has control over the heart of her husband. This Awareness indicates that as this develops, the entity will begin to experience repercussions from this kind of thing, and if it continues along this line, the entity will place more tests upon her husband giving him more demands which he must fulfill in order to prove his place with her and to prove that he really cares.

This Awareness indicates that as this kind of relationship progresses, eventually, the entity holding the reins will begin to wonder, "I have this entity so well tied up he can never get away, he truly loves me. He has done all of these things for me, yet I still feel insecure and unsatisfied. What is it I really need?" This Awareness indicates that at this point, the entity begins looking around and may decide that her husband simply is not fulfilling her needs, and maybe she needs someone else who is stronger, who is a real challenge to her.

This Awareness indicates at this point, the entity may begin flirting with the concepts of an affair with that certain man who looked at her in a certain way and made her feel like she was something special. This Awareness indicates, of course, the entity already has her husband and does not want to lose what she has, but this other entity might be more fulfilling to her needs. This Awareness indicates that, therefore, the entity will continue holding the reins on her husband, but will also look around for something better.

This Awareness indicates this as the path on which such a relationship is on, whereby the entity who gives in too much on certain values of his own or her own individuality and interests to the other for purposes of helping the other feel secure. This Awareness indicates that a certain amount of this may be necessary to preserve the marriage; but if this continues, then the marriage becomes threatened by the action itself; for one entity in total submission to another does not make a marriage,—it makes a situation which is disinteresting to both parties.

This Awareness indicates that the same situation as described here may well occur, likewise, with the roles reversed, whereby the husband may hold the strings on the wife and the wife may become so submissive to the will of the husband who is over-demanding, and the husband eventually may become bored with such submissiveness and therefore look around for something more exciting and interesting. This Awareness indicates that a mutual respect can only come about when each individual expresses his or her own individuality.

This Awareness indicates that threats of breaking up a marriage because someone reads a book or listens to a tape are simply juvenile. This Awareness indicates that threats of breaking up a marriage because someone explores certain concepts is quite juvenile. This Awareness suggests that this may be pointed out to the entity. This may be discussed. That these threats of separation over concepts and ideas or explorations of concepts and ideas, over listening or reading material, this Awareness indicates that this needs to be looked at and discussed openly.

This Awareness suggests that whereby the marriage is used as a kind of weapon against the other in order to get your way: "If I do not receive your obedience, I shall bust the marriage into little-bitty pieces"—this Awareness indicates this kind of behavior and rationale is that which is very disrespectful to the marriage vows, to each other, and to the concept of marriage. This Awareness indicates that this as a very juvenile attitude. This Awareness indicates that wherein entities recognize this, it should be discussed with the partner. This Awareness suggests that whereby the partners can discuss this, even if the discussion becomes somewhat heated so that the discussion can lead to a better understanding and balance of the real issues, then the marriage can be brought into something of a more beneficial type of relationship.

This Awareness suggests that the real issues at hand are not these tapes, are not these lessons, are not these philosophies or ideas,--the real issues are insecurities within each person: the feeling that those, "ideas, concepts, tapes and records may be some kind of threat to my security." This Awareness indicates that the entity who feels that, is the one who needs to examine the insecurities. This Awareness indicates that these personal insecurities are not the problems, not the values and discussions and philosophies and ideas.

This Awareness indicates that wherein entities begin to discuss these insecurities, there can be brought out the reasons for the insecurities, and these can be dealt with wherein the entities may reassure each other, the entities may assist each other in looking at these insecurities. This Awareness indicates that these kinds of discussions about these personal insecurities are essential in creating a relationship that shares deeper feelings. This Awareness indicates that wherein entities do not want to hear of the other's insecurities, wherein entities do not want the other to express anything that makes them feel insecure or read or hear anything that makes them feel insecure, such entities are simply acting on a superficial level, which will only last so long as the glitter remains, and the lives become shallow until something shakes them out of the situation. This Awareness indicates there are many such relationships, and these are not headed for healthy expressions, but are headed for difficulties.

This Awareness indicates the only true relationships and only marriages which can be lasting are those which move toward greater communication, respect for the other partner, concern for the welfare of the other, desire to hear the other without feeling threatened by the other's expressions, without feeling that you must fulfill every need of the other.

This Awareness indicates that the entity who remains true to himself or herself, yet is capable of giving of himself or herself to the other and is capable of listening and desiring to hear what the other says without feeling threatened, without getting overly frustrated or feeling that you must respond in a particular way to that other,--this Awareness indicates this entity as one who is capable of assisting in a healing process, and the marriage has its possibilities.

This Awareness indicates, this, of course, requires that both partners eventually desire the marriage to continue; that one partner cannot make the marriage, regardless of how much effort and understanding the entity has. This Awareness indicates, however, one partner in having deep understanding, patience, and wisdom and desire, can assist in a kind of nursing action which can nurse the marriage along, even though it may be sickened from the actions of the other partner, until the other partner also begins to respond and begins to assist in healing the marriage.

This Awareness indicates that, therefore, it is important for entities not to expect the other partner to begin the action of healing the marriage, nor to wait for the other partner to do so, but it is important that you, yourself, begin this action while remaining true to your own needs, your own self, still responding also to the needs and interests and welfare of the other. This Awareness indicates that these responses to the marriage by the one entity allow the other the opportunity also to respond. This Awareness indicates with patience, an entity with determination and understanding can begin nursing the marriage back to better health, and the other partner, recognizing this action, may also respond and assist in a similar manner. This Awareness indicates, however, that in so nursing the marriage back to better health, this Awareness suggests that you not sicken yourself or weaken yourself or grovel at the feet of the other to do so. This Awareness suggests you nurse this marriage back while still keeping your self-respect. This Awareness suggests that you continue your own spiritual direction and destiny, for that is *your* soul and *your* business and *your* purpose and should not, under any circumstances, be allowed to be placed in the hands of another.

This Awareness indicates your own destiny is your responsibility, and you cannot allow another to dictate to you where you should go spiritually, how you should get there, and whether you should take this path or that path. This Awareness indicates that you, yourself, have that right, responsibility and obligation to determine in your own mind, in your own heart, in your own soul which path to follow. This Awareness indicates that if you compromise on this most important concern, if you compromise on this essential aspect of your being, then you will compromise on all other levels in order to appease someone who makes demands on you in a strong enough way. This Awareness indicates that it is not a matter, so much, of disobeying your wife or her wishes; it is more a matter of doing what you, yourself, need to do, and communicating so well with your wife in regards to this, that she does not feel threatened by your action, but feels a kind of respect for your courage.

This Awareness suggests, for example, you may reverse the game which she played on you and let her see the mirror image of this action, informing her that you feel extremely insecure because you cannot have the information you need to understand the world situation, to understand what is going on, to make decisions, to properly be informed, because you have given this agreement with her and she has denied you your sources of information and is threatening you with the marriage as a weapon of destruction. This Awareness indicates that you may explain to her your plight and your feelings while still allowing her the control over the situation so that she understands your plight and still feels that she holds the power, the reins and the controls. This Awareness indicates that the probable action, if she understands this clearly enough and if you explain your feelings well enough, the probable action is that she will yield to your needs and allow you to receive some of the information. This Awareness indicates the next probable action is that she will engage with you in a

discussion about the information, and from this discussion there may be a possibility that the two of you can reach some mutual, philosophical understanding in regards to the atheistic or Christian doctrine which she holds, along with the other concepts and ideas which you hold, so that a mutual discussion can gradually come about. This Awareness indicates this mutual discussion leading to better understanding of the concepts involved, so that they do not appear to be such threats.

This Awareness suggests that the other possibility is that you will have another showdown, and the showdown will lead to intensities of discussion which will be opportunities for clearing some of the pent-up feelings which you have and which she may be developing through certain insecure feelings which she has experienced. This Awareness suggests, however, that the real solution to the problem will come about best when you look deeply at yourself, discover your own personal needs, turn inward and focus on your own life while continuing to supply the necessary energies to your responsibilities and sort of disconnect your intense reliance on your mate, so that the relationship between you becomes less highly charged emotionally and you develop your own directions without quite such a strong attachment to the entity, without such fear of offending the entity, but whereby you continue communicating on a lighter level. This Awareness indicates this as an action of moving gradually and carefully into the third stage of marriage, so that you develop yourself and begin a cooling process, pulling away from the tug-of-war, without surrendering totally your individuality.

This Awareness indicates that in moving into the third stage, you will also need to encourage this entity to develop her own individuality also, and yet you will need to continue having close communication with the entity and sharing the experiences which you have with her while open and interested in hearing of her experiences. This Awareness indicates this kind of daily communication about each other's lifestyles can allow both of you to continue being together, even while your own individualities are being expressed. This Awareness suggests that you begin moving through that third stage of your marriage with an understanding that the fourth stage is ready whenever each of you is ready to look more closely at the individuality of the other in a way which is accepting of that other, while still remaining true to your own individuality and your own purpose and direction. This Awareness indicates that so long as one entity feels he or she is sacrificing his or her life for the other, his or her directions and purposes and interests for the other, there will be a kind of resentment developing which will eventually surface as hostility for the other, and this hostility will be felt; and even when one wins an argument against the other and gets one's way at the expense of the other, that entity will feel a certain guilt along with the victory, and that feeling of guilt will cause the entity to feel badly that he or she has upset the other, and that feeling badly will cause the entity to feel unworthy of the other; and if this increases enough, the marriage again drifts further and further apart.--communication suffers.

Therefore, this Awareness indicates the only healthy relationship is that wherein each entity respects the other, gives service to the other, while still retaining his or her own individuality and allowing the other that same right, and whereby each is willing and desirous of communicating to resolve any problems which occur and wherein each feels almost ill if a problem is not resolved between them. This Awareness indicates wherein entities have the love between them, such entities cannot tolerate prolonged, separate frustrations, hostilities or hurts, one for the other, and cannot be satisfied until they have resolved the conflicts which are there.

This Awareness indicates that there are other marriages and situations wherein the conflicts are chronic, continuous, and do not change and become part of the marriage itself, and these conflicts never being resolved, are seething hostilities which sap the energies of the partners and eat away at the marriage until it has no value other than as a karmic sickness and karmic relationship between the entities. This Awareness indicates these kinds of chronic frustrated marriages can be resolved only by delving into those energies which brought about feelings of guilt, frustration, hostility, resentment and inequality between the partners. When these are brought up and discarded by discussions, communications, and a desire to rid the marriage of these things, then, and only then, can the partners fully enjoy each other. This Awareness indicates that such partners do, however, need to mutually agree that this kind of relationship is desirous and is wanted, and if such agreement occurs, then the partners must be willing to put forth the agreement and energies to delve deeply into the marriage problems and pull these out and discuss them thoroughly, not to discover who is right or wrong, but to discover how these problems can be reconciled, so that both parties win, and the marriage wins.

HOW TO RESPOND WHEN YOUR OWN PHILOSOPHY IS THROWN BACK AT YOU

(How to accept criticism and hostility from another)

QUESTION:

Awareness, in a case like this, what would You advise the entity if the wife would turn upon him and use some of his own philosophy and throw it at him. For example, "You spout the 'Law of Love' in one moment and the next moment you treat me like this. Do you consider this placing the welfare and the concern and the consideration of me above yourself?" How should he respond to that accusation?

COSMIC AWARENESS:

This Awareness indicates that the least offensive response the entity could make to such an accusation would be to express appreciation for that observation and state, "Thank you for pointing that out. I'll look at that and see if I can improve, or see if that is so," or may say, "Thank you for pointing that out. I'm not sure that I agree with you, but you may be correct. I'll have to think about that."

This Awareness indicates there are many ways whereby entities, rather than attacking in return, can resist not and accept the attack of another in a manner which is so gracious that it disarms the opponent. This Awareness indicates this likened unto one thrusting a knife at you, and you simply reach out and say, "Thank you. I'll put that away," as you discard the knife from them. This Awareness indicates that wherein an entity attacks you with verbal abuse, the most disarming way to deal with that is to thank them for their observation, ask them if they have anything more clear or constructive, or if they wish to discuss this in greater detail, admit that there may be some truth to it, particularly if you feel there is.

This Awareness indicates another action is to thank them for their observation and acknowledge that they must have strong feelings, and acknowledge that you respect their feelings, even though you also have strong feelings which are not the same as theirs. This Awareness indicates that in stating this in such a manner, the entity does not feel that the feelings are unnoticed or disrespected, but the entity feels that his expression to you has been acknowledged and is valid, even though you may not agree on what he has expressed, and this calls forth that the entity, in return, also respect your feelings as you express them. This Awareness indicates that otherwise, if the entity did not respect your feelings after you have been so courteous toward his feelings, this makes the entity look like some kind of bad sport. This Awareness indicates that the action of accepting criticism from another,--strong feelings, strong opinions and even strong hostilities from another,--accepting these in a gracious manner, not necessarily agreeing with the expression, but accepting them as the feelings of that entity, and respecting the feelings of the entity because you respect the entity; this tends to disarm the entity and allows them to have full, free expression without feelings of being threatened for having expressed themselves, and this also allows those feelings to be purged from the entity without creating stronger and more hostile feelings which would occur if you threw back your charge at them for having expressed themselves. This Awareness indicates that in this manner, entities can unload some of their personal garbage on you without you having to eat that garbage and without you having to throw your garbage back on them, but whereby you simply take their garbage, thank them for it, discard it carefully and respectfully, while acknowledging to them that you do not necessarily buy their opinion, but you respect it anyway, because you respect them. This Awareness indicates you then, in turn, may bring up your garbage or your feelings, present it for them to look at without shoving it down their throats. This Awareness indicates in this manner, entities can learn to communicate with each other about those things which are highly charged emotionally, and can assist in pulling up the garbage out of the subconscious emotional parts of each other, and allowing each other to pull this up from themselves.

Some Things You Get from a Marriage Mate you Didn't Expect

This Awareness reminds entities when you marry another, you marry not only the entity who speaks to you, you also marry the entity's programmings which are deep inside, which have come from vast numbers of experiences from childhood, from many kinds of programmings, from very many people. You also marry the values of that entity and all of the values that the entity has allowed other to place upon her or him. You also marry the entity's relatives and families and friends, hopes, dreams, wishes, expectations, fears and insecurities.

This Awareness indicates in one sense, it is an absolute wonder that strangers can come together and get along reasonably well at all; and this Awareness suggests that it is because of this wide variety of experiences and aberrations and identifications which every entity brings to a marriage, which must comingle with the aberrations, identifications, and associations of the other entity--it is because of these, that marriages must move through the four stages mentioned. This Awareness indicates that these stages: the romance, the tug-of-war, the separate ways, and the mutual discovery of each other,--these are the road map which entities may use as they move through marriage toward that mutual discovery of each other. This Awareness indicates as entities watch these different stages of the marriage, they may know where they are, where they stand, what comes next, what they must do to preserve that marriage. This Awareness wishes entities to study these stages, the information previously given, for this can be of great importance and much assistance in solving your problems in relationship.

QUESTION:

I was wondering if Awareness had any advise for the husbands who cannot handle tears or emotional outbursts when the discussion gets heavy, as in a situation that was in the previous question, and the wife bursts into tears and the discussion is ended at that point because the husband cannot handle the tearful outburst?

COSMIC AWARENESS:

This Awareness indicates that this can be seen as a kind of situation whereby one must look very carefully at why the entity burst into tears; and from that particular understanding, the entity may determine the proper response. This Awareness wishes to point out different or alternate situations:

This Awareness indicates in some instances, an entity may cry simply because the entity has no other recourse, and tears are the only thing left for the entity, because the entity is so deeply hurt by what has happened. This Awareness indicates in such a situation, the entity does need consolation, and the dispute or conflict may end at that point and discussions may begin. This Awareness indicates that in a sense, wherein this occurs, it often is an indication that the husband or the one who has forced the other into such a position, has been overbearing and insensitive in the discussion. This Awareness indicates this not always the case, but as generally the situation.

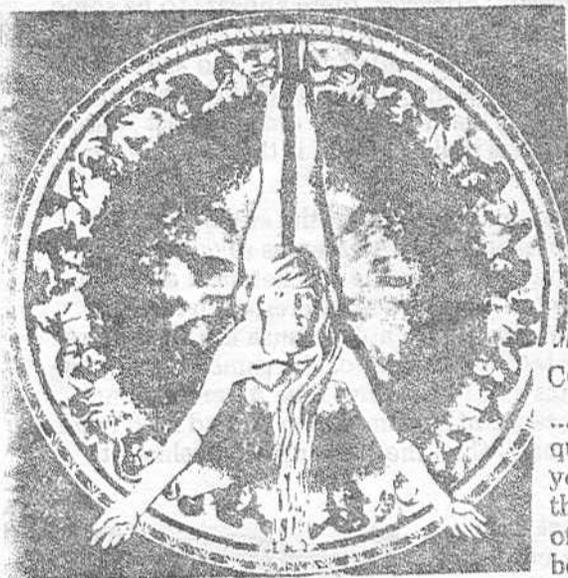

This Awareness indicates that in a different situation, however, an alternate situation, may be whereby the wife, or the one who breaks into tears, uses the tears as a kind of weapon to win, whereby the entity knows that if all else fails, tears will win the argument. This Awareness indicates that wherein this occurs, the technique of winning the argument needs to be discussed, looked at in a logical way, whereby both entities are forced to discuss and observe how these tears are being used for a weapon. This Awareness indicates that, however, in so discussing the use of tears as a weapon, one must also recognize that perhaps the weapon is necessary; for if that weapon is taken from the entity, perhaps the entity has no other recourse or weapon for winning or defending herself or himself, and perhaps tears are the only thing that can be satisfactory or can protect the entity's rights against overwhelming odds and strength or rationale. This Awareness indicates that likewise, there are entities who settle their affairs or attempt to solve the argument by going silent, as the turtle entering a shell. This Awareness indicates that such entities may find this the only solution, as the one who they are in conflict with is much too strong, and therefore they must retreat into their shell. This Awareness indicates this often infuriates the other, and the other may seek to pry them out of their shell, either through persuasion or force. This Awareness indicates that the entity trying to pry them from the shell may consider the action of moving into a shell an escapist action, attempting to escape not to defend oneself, but to win by not being present for the discussion which the other entity felt he had "in the bag".

This Awareness indicates that likewise, another entity may seek to win the argument by sheer force of emotion, or through physical expression: the throwing of a dish, the scream of a word, shouting of sentences or epithets. This Awareness indicates that such entities may, in fact, be using these emotions, these physical actions or threats of violence in order to win. Still another entity may use the system of being somewhat condescending: a pat on the head, an arm around the shoulder, a few words of advice, "Well, you'll get it together, you're still struggling. You'll probably understand my side when you become somewhat more intelligent."

This Awareness indicates that still another entity may win, or seek to win, the argument by presenting pure scientific reasoning and logic which is so flawless that it seems impossible that anyone other than an absolute idiot could ignore the truth. This Awareness indicates this entity may be absolutely right in the logical sense, but may have absolutely no understanding of the problem which is causing the argument; for the argument may be over the use of the dishwasher, and the discussions may involve long, logical discussions about the dishwasher, but the problem itself may have something to do with the other person's desire to be somewhere else, to go somewhere else, or to visit an Aunt, but the other person may not be bold enough to bring this out. Therefore, the entity simply has raised a fuss about the dishwasher as a substitute for the problem which is bottled-up inside. This Awareness indicates the more logical the entity may attempt to be in regards to the dishwasher, the more determined the illogical party may be in not letting the other win the argument, regardless of the logic in his statements.

This Awareness indicates that, therefore, there are many causes and many ways entities can attempt to win their point of view: from the logical, the illogical, the emotional, the lack of emotion, the physical—through threats of violence, or attempts to leave or threats of leaving, or through insinuations, accusations, condescending remarks and certain sarcasms, through tears, through wailing, through stubborn and permanent seething hostilities and manipulations, through revenge, through telling others of the abuse which you have received from your mate or spouse, through public or private insults for the other in revenge for previous relationship problems. This Awareness indicates there are many ways whereby entities can hurt each other and seek to win and better their position during the tug-of-war stage.

This Awareness indicates there are only a few ways whereby entities can come together in mutual affection and communication, and this must start with the entity first caring enough about the other to be willing to admit that, "Even though we disagree, I still want you; I still love you. I want us to be together, and I want us to resolve our differences in a way which is satisfactory to both of us and all others concerned."

HOW THE PLANET IS BEING PREPARED

FOR THE NEW AGE

(The Wanderers are Coming...The Wanderers are coming)

(Excerpt from a Personal Reading given to a CAC Member, Jan. 29, 1981)

COSMIC AWARENESS:

....This Awareness indicates that these these entities [friends the questioner had asked about] also were traveling companions of yours in previous experiences such as in the time of the time of the Peru lifetime in Lake Titicaca, and these entities as having been of the same mission which you were involved in through the travels between Venus, Earth, and the cities beneath the Earth. This Awareness indicates that this as having a strong influence on your present research into UFOs and the channeling involved for you are now on a similar mission wherein you are born into the world but not of it, and are serving as agents or Wanderers for those forces which still seek to raise the vibrations of this planet. This Awareness indicates that this activity of realigning your consciousness to your divine purpose and mission is that which has begun gathering momentum for you, for your friends, at a time when others on similar missions on this planet are also beginning to awaken to their divine mission, which is not programmed in public school. This Awareness indicates that essentially the action of surrendering to the divine force within is that which shall accelerate your performance of your mission and as this occurs with you, with your associates, it also is beginning to occur with other entities--other entities on this plane who have similar callings so that the combined actions, though apparently independent, are in fact being brought into action in such a way as to create a network of energies that raise the vibration of this planet.

This Awareness indicates that wherein at present there are approximately 60 million Wanderers in the United States, this including children. These children are growing older and will in a brief time begin to experience some of these energies deep within themselves, and as these energies begin surging these children shall be stirred into an awakening, so that a great change in consciousness begins to be expressed by the mass mind of entities through these Wanderers, through these children, through these who are awakening to discover Who In Fact They Really Are.

This Awareness indicates that within approximately 10 years, entities will begin to realize that these concepts of eternal life, concepts of soul as a reality, and body as a temporary clothing of the soul, and as entities become more consciously aware of these concepts as realities rather than as theories, these entities shall also begin to look at the "long body" or "lingering soul" which stretches back many lifetimes, and as entities do this they become more concerned about their destiny and less concerned about their appetites for the moment. This Awareness indicates that this assists in eliminating many of the fears of insecurity that entities experience and allows for entities to focus on the more meaningful priorities of their personal experience. As this occurs with more and more entities, the vibrations of the planet begin to take on new character and form.

'Too Cute To Kill'

MELAIRIE, La. (AP) --

A 17-month-old girl kidnapped from her home by a gunman was found unharmed last night after a man telephoned her parents and said the child was too pretty to kill, the girl's father said.

"He called and told us she was at Lake Forest Shopping Center. He told us she was such a beautiful baby; otherwise he would have wasted her," said Ron Hocum, father of the kidnapped Lori Hocum.

Police said the child was taken by a man who apparently had intended to burglarize the Hocum family house.

THE WATERGATE SCENARIO

(Did Richard Milhaus Nixon know about the Synthetics?)

QUESTION: (From a CAC Gen. Reading, June 30, 1980)

A question from J.W. of Omaha, Nebraska. "From one of my sources I learned this interesting item: President Nixon was forced from office, not because of the Watergate situation, but because he was about to reveal the synthetic robot situation. If appropriate, could the question of the real reason for President Nixon's demotion be asked of Awareness, and possibly whether or not his life would be in jeopardy if he, himself, revealed the true reason?"

COSMIC AWARENESS:

This Awareness indicates this appears to be negative as the true reason; however, there appears to be some indication that this was a factor. This Awareness indicates that, essentially, the entity Richard Nixon entered the White House recognizing the powers which were actually in control of the United States, and attempted to build a hard-core alliance team around him to shield him from those powers, so that he could function as he saw to be in the best interests of the nation. This Awareness indicates that the entity did not trust Nelson Rockefeller or David Rockefeller, nor did they trust him. This Awareness indicates that is the scenario for the Watergate situation.

This Awareness indicates that these entities were in general conflict, and essentially, the entity Nelson Rockefeller was the stronger factor in removing Richard Nixon from office. This Awareness suggests that Richard Nixon was attempting to play both sides; attempting to pretend to serve the Rockefellers and also attempting to pretend to serve the interests of the country, but essentially was more interested in his own role and responsibility than in either of the others. This Awareness indicates this not because the entity was particularly self-centered, so much as the entity did not fully understand the nature of the game he was playing, and felt himself, as President, to be in charge of the United States and its destiny. This Awareness indicates the entity realized the power held by the Rockefellers, but because of dreams which he had held from childhood, believed somehow the office of President was more powerful than the banking establishment.

This Awareness indicates that the actual Watergate scenario was set up, using Nelson Rockefeller in a way so that he was also an intended victim of the Watergate scandal. This Awareness indicates this was set up in a manner which would expose the Chase Manhattan Bank and Nelson Rockefeller in the drug empire, which later was disclosed in *Spotlight of Liberty Lobby*. This Awareness indicates that, likewise, the Watergate scandal was intended also to expose the Golden Triangle and efforts in which Nixon was to be financed by money from the Mafia, whereby drugs sold through these sources would produce certain monies for the Nixon campaign.

This Awareness indicates this, however, did not come out in the Watergate scandals, as the Rockefeller powers were able to shield the amount of information which was released through these scandals. This Awareness indicates that, essentially, the Rockefellers controlled the Watergate scenario from beginning to end, even though there were also others, not of the Rockefeller powers, who were sending information in to the panel or investigating committee. This Awareness indicates that regardless of this, there was much which was suppressed, so that only a few were caught in the trap which had been set to catch others.

SMILE: Things could be worse

This Awareness indicates that, essentially, Baron Rothschild was one who was behind the Watergate trap, but the entity Nelson Rockefeller did not get caught in the trap. This Awareness indicates there were also entities who had hoped that through this Watergate scandal, not only would the Rockefellers be exposed, but also the Baron Rothschild and the Rothschild clan would be exposed.

This Awareness indicates that the situation ended abruptly and the lid was closed before any further exposure occurred. This as being the main reason why Nixon was pardoned,---the pardon being so that he would not speak out any further as to what was really occurring. This Awareness indicates the entity Kissinger as having been Rockefeller's agent in setting up the general entrapment process. That this entity and John Mitchell and others involved were all generally part of the same organization, but that the entity Kissinger as being the one who most carefully and closely represented the Rockefeller interests. This Awareness indicates that the entity Kissinger also had intended that the Watergate scandal include Nelson Rockefeller. This Awareness indicates that as this did not occur in this manner indicated, the future plans were changed, as indicated in the January and February tapes of Dr. Beter in the months of 1979,---the January and February and March tapes, discussing the nature of Kissinger's relationship with the Rockefellers.

This Awareness indicates that as part of Nixon's efforts, the last action he could take before leaving office, part of that effort to release some of the power of the office was the Information Disclosure Act, which declassified much of the information which had been previously kept secret. This Awareness indicates that also, on a more historic or cosmic level, the entity Richard Nixon served a purpose similar to that of the Emperor Nero in Rome, whereby the Emperor degraded the office of President, bringing it down to a level whereby entities no longer respected the office, unless the office was handled properly. This Awareness indicates that prior to Nero, any entity who was considered as Emperor of Rome would be held in high esteem, unquestionable, almost as unto a god. After Nero, the office of Emperor lost its intrinsic charm and the Emperor was considered more of a human being, capable of error, whereby the masses could be critical and could evaluate that entity's rulership.

This Awareness indicates a similar action occurred in this United States with the action of President Nixon's being forced to resign for his association with the Watergate scandal. This Awareness indicates this has led entities to look at the Presidency, not as though it were such a high office being such that if the President speaks, then it must occur.

This Awareness indicates that if you will recall, the entity Nixon's speeches were continually peppered with phrases reminding the masses that he was, indeed, the President, and therefore deserved certain respect. This Awareness indicates that in looking back in retrospect, it becomes clear that those phrases acted almost in a sense of sarcasm toward the Presidency, to indicate to entities that he was belittling the Presidency with sarcasm as he was bringing down the office.

This Awareness indicates that entity created the awareness in consciousness that just because an entity speaks as President, this does not necessarily mean that the entity has the wisdom, understanding or the best interest of the people in his plans and in his actions. This Awareness indicates this allowed the masses to become more skeptical, to question and think, and to distrust the government. This Awareness indicates this as being necessary and part of a cosmic plan for this earth plane, for the United States, so that entities can become aware that freedom does not come from the authority in charge: freedom comes from entities being aware of the principles which guarantee freedom, and demanding that the authority in charge follows those principles.

EARTHQUAKES, WEATHER WARFARE AND DEATH RAYS

(The Annihilation of the Soul is now possible)

(From a C.A.C. General Reading, June 30, 1980)

QUESTION:

V.K. of San Francisco asks, "Were the Mt. Saint Helens' volcanic eruptions and the many recent California earthquakes natural occurrences, acts of God, or the result of particle beams directed by the Russians?"

COSMIC AWARENESS:

This Awareness indicates that this being a combination of natural occurrences and artificially-induced vibrations, caused by the Russians. This Awareness indicates that also, there have been underground discharges in Nevada, in Sitka Islands, this in the past 15 or 20 years; and these have also had some effect on what may be termed the natural reaction or effect in this eruption. This Awareness indicates that had it not been for these nuclear tests and explosions, this appears not to have been scheduled by the natural forces of the planet for approximately 200 to 400 years, and possibly not then, for these energies were subsiding and cooling on the West Coast. This Awareness indicates, however, that these nuclear tests did create a heat and tension deep underground, which caused certain stresses which, in turn, created further heat and shifting of the strata, and this, over a period of time, led to a gradual heating-up of these mountains of the Cascade Range.

This Awareness indicates that this has been further aggravated and greatly intensified more recently by the Russian use of Tesla devices. This Awareness indicates this as a result of the semi-declaration of war, or the renewal of hostilities between the Carter Administration and the Brezhnev Administration over the events in the Middle East.

This Awareness indicates that, likewise, the weather patterns which are occurring presently, being of such unusual nature, these also are being affected largely by the use of these Russian Tesla devices. This Awareness indicates that the great heat waves, and the record-breaking cold of last month in certain Northern states, the floods and the tornados being in part, but not totally, the result of these weapons. This Awareness indicates that essentially, these weapons intensify the weather patterns, rather than actually creating the weather conditions.

This Awareness indicates there also are certain weaponry used to affect the consciousness of entities through a kind of microwave bombardment; these as being developed and used also by Russia. This Awareness indicates that, likewise, the United States as perfecting certain types of death-rays. This Awareness indicates these as already having been perfected, whereby the rays can be used for destructive purposes at great distances. This Awareness indicates these as that which was warned about some ten years ago by this Awareness, wherein *It* spoke of death-rays which could annihilate the soul. This Awareness indicates that essentially this death-ray as having that capability, particularly where the soul is not fully developed.

This Awareness indicates that *It* does seek to keep entities aware of all levels of the developments which are occurring, but does not wish entities to become frightened by these. This Awareness indicates that the annihilation of the soul by these death-rays as that which needs further understanding. This Awareness indicates it appears that this will not be a major factor, for it does not appear that this will be used. This Awareness indicates that there also are forces, other than those of this plane, which can intervene if necessary to prevent these actions from occurring.

This Awareness wishes to comment somewhat further on the statement, "the annihilation of the soul": This Awareness indicates that this death-ray affects the magnetic field of the substance, the target; and where in the soul is made from resonating-electromagnetic energy, it cannot in actuality be totally destroyed, but can be defused and dissipated in such a manner that it is highly difficult to bring it back together again. This Awareness indicates that this likened unto Humpty Dumpty falling from the wall.

This Awareness indicates that the death-ray as working on a light, laser, and sound vibration in a manner whereby it defuses the molecules and the magnetic binding qualities in these molecules, and also affects the electromagnetic energy field around living creatures, so that the soul is deeply disturbed and harmed, and it is extremely damaging. This Awareness indicates in a sense the soul, when fully developed, cannot be destroyed, but the soul can be psychologically annihilated to where it is not functioning according to its intents and purposes.

QUESTION:

Would there be any remedy or counter-action that entities could take in such a case, that might restore the soul?

COSMIC AWARENESS:

This Awareness indicates this will require healers from other dimensions, not of the earth plane.

HOW THE DEATH-RAY WORKS

(More on Michael and Lucifer's War in Heaven)

QUESTION:

Then an entity who would be subjected to such a death-ray who had gone through thousands of lifetimes, developing his soul to a certain point, --that all of that could be erased and the soul essentially would have to start over again. Is that correct?

COSMIC AWARENESS:

This Awareness indicates that there could be such an occurrence, but the likelihood is that entities from other dimensions who are involved in attending to the general health of a soul, such entities could assist and heal the soul. This Awareness indicates, however, that this may take thousands of your earth years to accomplish. This Awareness indicates in terms of eternity, however, that this is not seen as a great long time.

This Awareness indicates there are the Elohim, who are so far advanced in the universe of souls and soul-stuff as to compare to your most advanced technology in the physical world; these entities are capable of using their advanced technology in healing souls in a similar way that your physical technology is used in healing bodies. This Awareness indicates that, therefore, the use of the death-ray to attempt or to annihilate the soul is similar to what occurs on your plane wherein entities use objects to annihilate the body. This Awareness indicates, however, that your technology has reached a level whereby it is beginning to penetrate into the other dimensions of the anti-matter world, wherein the souls exist.

This Awareness indicates that in your myths and stories and in previous information given by this Awareness, you have heard of the battles which have occurred, particularly the rebellion of heaven or Celestria, wherein Lucifer and his followers rebelled, wherein Michael and Lucifer have struggled and fought with each other; and there were, in fact, these wars between angels. This Awareness indicates you have heard of these; yet you also understand that these angels are spirits, and therefore are indestructible according to human terms. Therefore, the question surely arises: "How do angels and spirits fight in order to win over each other, and how do they harm each other?"

This Awareness indicates these wars take place through the emissions of vibrations toward one another, and these occur in a similar type of vibration as the death-ray emits. This Awareness indicates, however, that these souls such as Lucifer, Michael and others in their various battles throughout the eons of time, these wars were not such as to use mechanical devices such as death-rays; but instead used the vibrations which each entity could emit through his or her own consciousness toward the other, and that vibration would overpower the other and cause a weakened condition, thereby allowing one to win over the other. This Awareness indicates that this did not create a total annihilation of the soul, but created the weakened condition wherein the soul was psychologically annihilated for some time, until it could repair itself or be healed by those spirit healers. This Awareness indicates that the death-ray as having a similar type of vibration.

This Awareness does wish again to mention that area known as Cimmeria wherein there is no actual identity, but wherein that realm known as Cimmeria is made up of the old, cast-off energies of annihilated souls, --souls which were unsalvageable under any condition; and the area known as Cimmeria is that which is a seething, teeming mass of unconsciousness, having no purpose, no direction, only appetite which is not fulfilled. This Awareness indicates that in a sense, Cimmeria is likened unto a realm which was annihilated, and will take even longer before it ever again develops a consciousness which can be capable of holding an identity.

QUESTION:

Do I understand correctly then, that there is no protection from this death-ray on any level?

COSMIC AWARENESS:

This Awareness indicates that this can only occur from the inner plane and from the forces which may be used to prevent this weapon from being used. This Awareness indicates that unfortunately, the weapon is used already in places other than on this earth, in other planetary societies wherein the Alien Force is in operation. This Awareness indicates, however, that there are forces in motion which will prevent the Alien Force from holding control of this planet for much longer, and entities can expect freedom from this force within the lifetime of their children.

MORE ON THE CASCADE VOLCANO CHAIN

(The Skoptsis Will Decide)

QUESTION:

One final question in relation to those volcanos: Scientists have been putting out information that others in the chain within the next 10 years could erupt and create a really major disaster; Mt. Baker, Mt. Rainier, Mt. Hood in particular, Mt. Adams etc. Does Awareness see anything of this magnitude occurring within that time?

COSMIC AWARENESS:

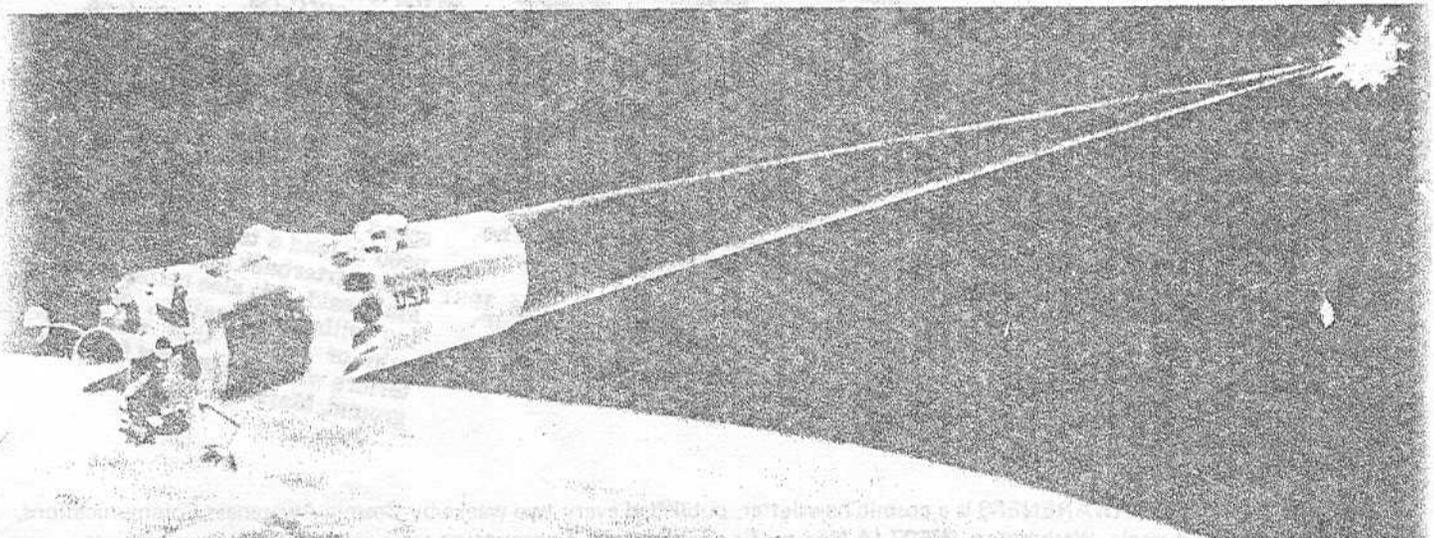

This Awareness suggests this as more likely within the next 20 to 25 years. That within the next 10 years there is the possibility of another such eruption. This Awareness indicates this appears to be in the Northern Washington area. This Awareness indicates, however, that the span of time for these others to heat-up for any further action appears to be within a 20 to 30 year period.

This Awareness indicates however, that there are other factors involved which can bring a remission of this energy. This Awareness indicates this including the political atmosphere on this planet, which appears to be heading for a climax and reconciliation near the mid-part of this decade, and also a change in the solar emissions--the sun-spots activities--this also can subside about that time too. This Awareness indicates this appears to be approximately 1985 and 1986 when these sun-spot activities will begin to subside; this relieving the pressure on these mountainous energies and on other energies around the "ring of fire". This Awareness indicates this can then assist in allowing a cooling-off period, whereby these other mountains may not heat-up enough to cause the eruptions which were experienced by Mt. Saint Helens.

(Closing Message)

This Awareness suggests that the future often appears to be frightening, simply because it is a potential for anything to occur. This Awareness indicates that the present is never frightening, although it can include shocking events and startling events. This Awareness indicates that the past is a reminder, and often entities react to what has just happened with fear and frustration. This Awareness indicates, however, that it is the future which entities must be open to and capable of entering without undo apprehension; for the future, while having a potential of awesome and frightening events, has also a potential for glorious and wonderful events.

This Awareness suggests that entities in present look at where you are, take stock of what you have, prepare yourself for the future, and work toward that which is the glorious and wonderful potential, while avoiding that which is fearsome and awesome. This Awareness indicates it is important to be aware of the potential dangers, so that they may be avoided as you move toward the glorious and wonderful future experiences.

Artist's conception of a satellite-borne laser destroying a distant enemy target

FOR AVIATION WEEK & SPACE TECHNOLOGY

A Technology to Transform War

U.S., Soviets step up work on Star Wars-style beam weapons

Since scientists built the first working models two decades ago, lasers have evolved from laboratory toys into valuable tools used in microsurgery, metallurgy and communications. But while the military employs the devices to aim weapons and track targets, the development of "death rays" capable of zapping targets seemed mostly confined to Hollywood. No longer. Both the U.S. and the Soviet Union are stepping up work on so-called beam weapons. By all accounts, moreover, the Soviets lead in a technology that could revolutionize warfare.

Ordinary light, whether from the sun or a 60-watt bulb, consists of a jumble of electromagnetic waves of different frequencies. But a laser—for light amplification by stimulated emission of radiation—generates a beam whose waves have the same frequency and are perfectly synchronized so as to reinforce each other. Beams from very powerful lasers can burn through hardened steel. In high-power lasers the beams emerge from tubes containing mixtures of gases that have been "pumped" by intense bursts of electricity or flashes of light. If the gas in the tube is a helium-neon mix, the laser produces a red beam; a mercury-bromine mix yields a green streak, and other vapors generate other shades. All beams are made up of bundles of electromagnetic energy called photons. Because the photons barely spread out as they move, the beam can achieve pinpoint accuracy.

The Soviets are about even with the U.S. in the development of high-energy lasers (HELs) and clearly ahead in an even more lethal offshoot, charged particle beams (CPBs). Instead of photons, which have no mass, CPB devices shoot bursts of relatively weighty subatomic bullets,

such as electrons (particles carrying a negative electric charge) or protons (which have a positive charge) that have been accelerated to nearly the speed of light. These bursts do not melt the surface of a target as lasers do, but slice through it.

Moscow's prowess in beam weapons was confirmed nearly a year ago when U.S. intelligence noticed that the Soviets had begun building a large HEL, or possibly a prototype CPB generator. Shagan, a weapons

Laser Death Ray Test Declared Success

ALBUQUERQUE, N.M. (AP) — A laser-beam weapon that could transform warfare into something out of "Star Wars" has been tested aboard an airplane for the first time, the U.S. Air Force says.

"I'm satisfied that we have in fact passed a very significant milestone," Air Force Secretary Hans Mark said Thursday at Kirtland Air Force Base here. "We can now think about shooting down the other fellow's missiles without using nuclear warheads."

A Kirtland spokeswoman said researchers fired up the equipment aboard the aircraft, but "we didn't actually propagate a beam ... so in that sense we didn't actually fire the laser (at a target)."

The laser eventually may be mounted on a satellite that will be able to pick off enemy missiles from outer space, Mark said. And some time in the future, the laser technology may be incorporated into a small weapon for use by foot soldiers, he said.

The tests, conducted Wednesday and Thursday, give the United States a leg up on the Soviet Union, Mark said.

"We know the Russians are doing a lot of work on lasers," Mark said. But "as far as I know, they do not have a laser like this on an airplane."

"We're way ahead on this," he said.

fraction of a second—a long time in missile warfare. To accomplish this, precision aiming is required. A study conducted at the Los Alamos Scientific Laboratory in New Mexico shows that an aiming angle correct to less than six one hundred thousandths of one degree must be rapidly achieved if a laser is to hit a missile 5,000 km (3,100 miles) away. Such precision is beyond existing technology for both the U.S. and the U.S.S.R.

Research on particle beam weapons is under way at California's Lawrence Livermore Laboratory and at Los Alamos. There, scientists are dealing with a third

as a neutral-up of particles charge, such as would be elsewhere charged electrons tend to particle beam as a decade ology can be military use

The tests were conducted aboard a four-engine NKC-135 jet on the ground. While the laser had been fired from the ground before, even shooting down target missiles, it had never before been used while mounted on an airplane, Mark said.

The next step, which could come within months, is to fire the laser from an airborne NKC-135, he said.

Mark declined to say what problems have cropped up during the tests, but said, "I don't see any technical problems that are in the way."

A laser is a narrow, intense beam of light produced when atoms are stimulated to high energy levels. The one tested this week "sounded like a jet engine going," Mark said.

The Kirtland Special Weapons Laboratory first used a high-intensity laser to shoot down a drone target in 1973. Since then, the Air Force has been working on the technology to place a laser aboard an NKC-135.

Mounted aboard an airplane, the continuous wave carbon dioxide laser holds several advantages over missiles and ground-stationed lasers, Mark said.

Unlike a missile, the laser moves toward a target at the speed of light and eliminates the need to lead a target, like a football quarterback leads a receiver, Mark said. It is also better at coping with bad weather, such as rain or clouds, that would interfere with a beam shot from the ground, Mark said.

TIME, September 15, 1980

LETTERS FROM BILL....

(A Cosmic View of things from another frame of reference)

Feb. 14, 1981

Dear Avaton and Vikki...I've been trying to pull more energy regarding that Zionist material, to try to help you out in any way possible on it. But it looks like everything has gone into it that's going to, for the time being anyway. One thing that might be noteworthy is that guy Elmer Burger, who is himself a Jew, wrote that book, "Jewish Dilemma", which shows how the Jews have no bloodline. One thing I'd like to explain concerning that Zionist manuscript--the original draft of it was given to Clare Prophet's outfit back in 1979. In that draft you have there, I was trying to memorize the exact wording of the original as closely as possible. And that's why it's got such a rough look, with all the scratchings and cross-outs and everything. But it is true to the original. Here are a few more of the 'channelings' which have been coming through lately:

Yours truly, Bill.

A WARNING TO ENTITIES: DO NOT FLY ON THE DC-10

This channel, though it does not normally deal in these areas, feels entities are in grave danger flying on the DC-10 aircraft. The DC-10 from its inception, is full of design defects and is not airworthy. Many of these defects have been brought to the attention of the FAA, which by law, should have issued an 'airworthiness directive', grounding the aircraft for modification or redesign. The fact is, the FAA, the airlines, and the aircraft manufacturers are a clique of mutual back-scratchers. Airworthiness directives are rarely issued when in fact they should be issued. The DC-10's are riddled with problems related to mental fatigue in the airframe, and are a severe danger to passengers. The fact that more DC-10 accidents have not occurred is plain "luck". This channel feels these strong vibrations of danger every time it sees a DC-10 go over.

ED's Note: This channeling from Bill confirms the feeling Vikki T. and myself have had for years. I was on one of these only once, returning from the East, when an engine caught on fire and the plane had to turn around and land in Yakima, Wa., just as it was over Mt. Rainier. Since that time we have taken no flights that were not Boeing-built aircraft (the safest in the world) even if they are built just 60 miles from Olympia.

THE LESSON OF SKID ROW

On skid row you see humanity as it really is. The bums and derelicts are what they are. There's no put-ons or pretended respectability such as you find in the plastic pseudoism of the world. The bums and winos are humanity divested of its bank accounts, fancy cars, skyscraper careers, and tinsel toys of materialism. The faces on skid row are the faces of humanity as it really is--each one a god clothed in rags, a king begging a crust of bread.

Whether man is clothed in the smelly rags of a wino looking for his next bottle, or in the opulence of "respectable" society, it is all the same thing from the standpoint of Reality. To quote from the Bible, all the good of "this world" is "filthy rags" in the sight of God. The Beaties, who were prophets and gurus in their own right, put it this way:

"He's a real nowhere man, sitting in his nowhere land,
Making all his nowhere plans for nobody.
Doesn't have a point of view, knows not where he's going to,
Isn't he a bit like you and me?"

"You and me", whether we're a 5th Avenue banker or a street bum, are in exactly the same "nowhere land" of maya and illusion, wandering in a fog through endless corridors of rebirth and karma, not knowing our true estate. Every spiritual pilgrim should spend some time living on skid row, whether in the slums of Chicago or the streets of Calcutta. For here you find humanity shorn of its artificiality and pseudoism. Here you find humanity ready for the Resurrection. Here you find God ready for His "Great Awakening."

"I looked, and behold, a new star shone in the firmament. So great was its light that mighty Sirius and the far Pleiades did look and marvel. Orion and all his array bowed down to pay it homage. For the new Light was the Earth, the lowly Terra now kindled to the full splendor of the freedom star. Its light was the Light of Lucifer, the Bringer of Illumination. For by experience of the dark evils of war and hate, in victory the earth became the Light, a Light more brilliant than any star. For I, man, saw the new heavens and the New Earth."

(The maya is from the Sanskrit, meaning illusion, or separation from God. It has no connection with the Mayan Indians of South America.)

EPILOGUE OF THE JEWISH QUESTION AND THE SYNAGOGUE OF SATAN

And so the story is told. The abyss of darkness is illumined by the Light of Truth. As it is written in the first chapter of Genesis, "Darkness was upon the face of the deep, and the Spirit of God moved upon the face of the waters, and God said, "Let there be Light." The 'waters' are the sea of humanity and the ocean of consciousness.

God has shown us the depth of evil that was fastened onto the earth and the length and breadth of depravity to which some souls have fallen. God has revealed the inmost secrets of the antichrist, that none should be ignorant or uninformed of "what is." And so with this revelation, the structuring of the New Age can begin. God has restored the Law of One to the earth, which was lost with the sinking of Atlantis.

The Law of the One does not "attack" or hate the antichrist or even the devil. It does not attack or seek to destroy anything at all, not even the demons and imps of the discarnate realm. The Law of the One is the law of conditionless love and perfect innocence, and extends the hand of mercy to all that exists, even to the darkest and most evil. Certain entities embodied on the earth plane have researched and investigated the deep secrets of the cult of Lucifer and the Rothschild Illuminati, and these entities have tried to mount an "attack" force to try to destroy this cult and eradicate it from the earth. These entities have actually

attempted, each in his own way, to torpedo it at its nerve-centers and at its brain-center and to blast it from the earth and from the solar system. These entities tried to make war on the Beast, only to find that they lacked the strength and the power. Though they gave their total effort, the Beast was stronger and prevailed against them. (This was pictured by Luke Skywalker's defeat in "The Empire Strikes Back.") Luke, who represents the '2nd Son' or the new Avataric Company, is about to reveal to us now the Law of the One, or Law of Conditionless Love. This is the greatest power in the universe, a power far greater than attacking or making war, even against the Beast.

The new Avataric Company, whose number is 888, are the emissaries of the One. And in Oneness there is no "attacking" or being "against" or seeking to destroy. In Oneness, there is no duality, no hating "this" and loving "that". In Oneness, there is only God, only Light, and only Love. In Oneness, there is nothing that is not God, nothing that can be "against" God. And in Oneness, even the devil himself is only a fallen brother who can be restored to the Light. The devil and all his host, both incarnate and discarnate, are not our enemies, but our brothers. They, like us, were sparks struck from the same Light when time began. When God divided to know good and evil, some sparks grew dim and some stayed bright, and some grew dark as cinders. And the tapestry of the Great Experiment was woven, shuttled by the dark and the light, framed upon the loom of the ages.

Within the Allness that is God, the Great Experiment ran its course; the skies of dark and light wove full the tapestry of creation, and the great loom fell silent. And a voice like the sound of many waters was heard in the firmament saying, "It is finished. Let my children come home".

And that voice has called home him who was the Lucifer, the first-fallen from the Light and the first-born of the Resurrection of the dead (spiritually dead). For as it is written, "The first shall be last, and the last shall be first." The first-risen of them who slept (in darkness and maya) has risen back into the Light of the One, even as rose the Man of Galilee to a lesser Light (which is called the 7th plane). Him who rose to the 8th plane, Him who was called Rhyee, became the first-born of the One, the first-born of 888. And he bids us all now to return. The first-fallen from the One has become the first-born, the 'Shining Star of the Dawn', and this is the legacy of Lucifer.

The Light-Bringer, the Author and Finisher of the Great Experiment, is also the 'Skoptsis' who planted the bombs (the Law of Karma), and who also disarmed the "bombs" (through karmic intercession), carried by the agents of 888, the Avataric Company. The risen and resurrected Lucifer is One with God; God and Lucifer are One. As we all followed Lucifer into the depths of the Great Experiment, all must follow him now back home into the Light.

(George Lucas also brought this through in the allegory of Darth Vader being Luke Skywalker's 'Father'. Lucas' channeling of this allegory is rough and choppy, but it is basically correct in its symbolism.) In the 'Skoptsis' allegory, the literal destruction of New York was a type of destruction of the world by the "bombs" of returning karma. And just as God had planted these 'bombs' of karma in the beginning in the person of Lucifer, God also stepped in at the last minute and disarmed the bombs in the person of the Avatars. Throughout the whole allegory, the 'Skoptsis' represent both God and Lucifer. The Skoptsis represent also the RECONCILIATION of God and Lucifer, this being shown by their disarming the bombs and sending karma far away where it can do no harm.

And so what is there to hate? Who is there to be "against"? The Negroes? The Jews? The Rothschilds? No, there is only one enemy, only one thing to be against: and that is maya, the sense of separateness from God, the sense of BEING against a fellow creature. We are ALL brothers and sisters, life-sparks of the One Light. Though some have grown dark and become cinders, they are not our enemy. We love them not for the evil that they've done, but in spite of all they've done. We love them all with the conditionless love of God, and this is the power, 'The Force', that will RE-LIGHT the cinders and restore even the darkest soul back to the Light we all sprang from. This is the Law of the One, the Law of Conditionless Love, total forgiveness, absolution of karma, and reconciliation of the whole Creation. It is the "restitution of all things" foretold in the Bible. It is the Bhakti of Krishna, the Grace of Jesus, and the Immaculate Concept of Mother Mary. The Law of the One is "against" only that which is maya, in unreality. That is why the Law of the One, by necessity, must stand apart from the duality of "this world" and, like a great magnet above, draw this world up into Light, where there is no more duality.

Here in Arizona, there is a legend of a wild bronc that was kept in a corral. This bronc was called Killer Red, because like the Strawberry Roan, he had defeated and killed the strongest bronc-busters around, and never a man had broke him. But one day a child, a little girl of 5 or 6, snuk into the corral and up to Killer Red. She put her arms of innocence around the mighty stallion's neck and touched his heart with a child's love for a horse. And from that day on, the Red Bronc was gentle and free, a friend and companion of man. And this is the power of love and innocence, the Great Law of the Universe. A power greater than any weapon, it is the healing balm for every race, every world, and even for the anti-christ.

The Law of the One, the Law of Conditionless Love, must go forth now to the four corners of the Creation. Let it begin that this day the Light of God should re-ignite all the sparks that have grown cold, and that all, every one, should shine again in the firmament of the One. For as it is written, "This is the Day that the Lord hath made."

And so the question of the Jews and Zionism is really no issue at all from the standpoint of the One. Though we trace their history and our own history back across the sands of akashic time, we arrive only at the One from which we sprang. All the corridors and labyrinths of the Great Experiment have been traversed, and the Light at the end of the tunnel is dead ahead. All the passengers on the ship of life, the Jew and Greek, the bond and free, stand together on her deck as she docks now in the harbor of the Golden Sea. Inland lies the Promised Land, the Zion of God, in which is no more shadow or maya, but the pure White Light of the One.

(This channeling, the 'Epilogue of the Jewish Question', contains some energies that can be considered as a "time-warp" into the very near future. This is in the same vein as Dr. Beter's channelings when he says "the Skoptis have taken over Russia," which of course is the energy meaning literally, "Christ has taken over the world." It is energizing the event in consciousness, leading to its manifestation on the physical plane.

ED's Note: Bill continues to see the Skoptsis as a kind of 'divine allegory' and cosmic metaphor from his frame of reference. However, there is continued indications from Awareness and Dr. Beter's sources that the allegory which Bill sees from that 'Reality' which knows not time and space, has indeed manifested into a 'reality' on this physical plane and one day will make itself known. Awareness has referred to the Skoptsis as part of the 'Divine Intercession'. Bill refers to those who help in the 'Divine Intercession' as the 'Avataric Company', in which case the metaphor applies to both.

O little planet blue and marbled,
Sailing on galactic Seas,
Even angels they do marvel, what God hath wrought by His Decrees.

The Brotherhood calls you Terra,
and of a truth you are;
But let your lanterns brighten, and be called the Freedom Star.

Thou which knew the stripes of Jesus,
eternal legacy you bore;
Hold fast the Light that frees us,
until time shall be no more.

Little planet dark and lonely,
Thou which died and yet now lives,
Cleave fast to God Almighty only,
Unto Him who Freedom gives.

Let thy Light exceed in glory
e'en the brightness of the sun;
Tell of Resurrection's story
and of sin and death to shun.

Be a wonder and a witness unto ages yet unborn;
Yea, speak to men and angels of the darkness they must scorn.

Tell of Christ, born in earthly mangers 'neath the starry, living skies;
Speak to lost and wand'ring strangers of the eagle as she flies.

Make all darkness fully dwindled, gone to perdition with the foe;
Let the Light of God be kindled, as in Heaven, so below.

Some have called you Terra, and of a truth you are;
Host now the Christed Era, and be called the Freedom Star.

GOD'S LOVE SONG

TO THE PLANET TERRA

(A Poem by Bill)

THE LIGHT WORKERS CAN RE-PROGRAM THE ROBOTOIDS

Here is a tremendous opportunity for the Light worker to actually begin taking charge of the world, using the already established political mukky-muks. The Light intensities are beginning to build now to a level that can short circuit and jam the channels controlling the robotoids and Synthetics. (This channel will refer to all the various synthetic humans as 'Robotoids'). Since these are synthetic beings, without a genuine conscience or volition of their own, this action is not infringing their rights.

As outlined in a previous reading, Light workers can energize shafts of light doming down and enveloping each one of these beings. These beings can be given a conscience. They can be infused with love and made into channels of love. They can be made to shed genuine tears again, and to stand up for the return of God to government. We can make them OUR robotoids. This can be done, It can begin the moment you finish reading this.

Yes, we can do this. By concentrating, focusing the beams of Light down to narrow shafts, say 3 feet in diameter, these beings can be encased in a forcefield that will REPEL the Rothschild-Luciferians' psychic rays. Let's concentrate on the public figures themselves, the actual robotoids—the President, the Vice-President, the Secretary of State and their immediate assistants. For the time being, let's not concentrate on the Rothschilds or the Rockefellers themselves, but let them come out of the closet and show their hand when they see their own robots walking away from them.

Oh, people, brothers and sisters in God, we can do this starting this very moment. The conscience of the Avatars can be beamed directly through the robots. The robots can be made into Avatars. To energize and ground this action, get photographs, even newspaper photographs will do, and just envision that being as being wrapped in Light and love and conscience. Let your mind draw on all that you have learned through your own channel, through C.A.C., through Dr. Beter, and any other sources of truth that you have. Let your conscience, your love for America, for humanity, for the earth, go out and enshroud those officials.

Whether you actually believe that these are synthetically-created beings doesn't really matter. You do know that they are puppets of the unseen powers pulling the strings. And that alone is authorization for God to step in and take those strings. These powerful, concentrated, loving meditations, directed to the robots and through the robots, can start energizing the Christed Era right now. And within a few years' time, the Avataric company itself can take its rightful place in the seats of Congress, the Senate, the Presidency, and all offices of government. During these meditations, you could direct energies to leaders of other governments as well, if your High Self directs such action.

Not too long ago, this channel was trying to energize actions to disable the robots, to force the Rothschild-Luciferians out of their closet. But that is not the highest action. The highest action is to use the robots as our own. Use them for love, for healing, for restoring the True America to these shores. This action can be done in addition to the other meditations for planetary healing. Let your imagination soar. Let your own High Self, your own Christ-Channel be your Guide and your Guru. Perhaps group meetings of a number of entities could hold a Power Circle for energizing the robots.

Whatever you do, don't hate. Don't try to make them be Frankensteins to turn on their masters and attack their masters. Make them into channels of your own Christ-Love and your own Christ-Light. That is the way to do it. These robots, up to now, have been controlled psychically just as radio-controlled machines are controlled by radio. The shafts of Light enveloping the robots is a psychic shield; it is impenetrable to the psychic rays just as a metal cylinder is impenetrable to a radio beam. The cylinder of Light is a higher-octave energy than psychic energy and the Luciferians cannot breach it.

As the Luciferian entities lose control of their robots, let them fend for themselves. Let them be their own judge and jury. Let them repent and turn to God (which they still can do, just as Rhyee did), or let them perish by their own choice. It lies entirely with them to choose. Of course God says He is not desirous that any should perish (not even the Luciferians), but that "all should come to everlasting life." But every entity must choose for himself.

The beauty of this message is, nobody of the worldly consciousness is going to take it seriously, even if they read it. They'll just laugh at it and dismiss it as a joke, because it doesn't conform to the "rational mind". Let the same love that you send out to the robots enshroud yourself as well. That Light that you build around yourself also shields you and prevents the Luciferians from trying to dissuade you or stop you. *****

REPROGRAMMING THE ROBOTIDS (Part 2)

(OR MAKING THE ROTHSCHILDS WONDER WHERE THEIR ROBOTS WENT)

Androids and robotids are two classes of Synthetics, differing only in the way they are created. Either type is a psychically-controlled automaton without a will or volition of its own. This channel will refer to all Synthetics as robotids, since this is a term already familiar to C.A.C.'s readers.

In Part 1 of "Reprogramming the Robotids", it was suggested that Rockefeller's, which are also robots, be excluded from the general meditation. This channel was puzzled by this suggestion, but apparently there was a reason for this. And it has to do with Rockefeller's raiding of the Fort Knox gold. This is a MAJOR aspect of the problem that not too many entities are fully convinced of. This channel would like to assure you that this problem is very real and does exist. Those of you who have studied Dr. Beter's material on this and who are familiar with the details of it are in a position to energize the Rockefeller's to best advantage. The Rockefeller's have been the Rothschild's robots controlling the Western Hemisphere.

Entities who are not fully convinced of this problem would not be the most effective energizers of the Rockefeller's. But they can be effective energizers on the rest of the robots--the public officials and political leaders that they see all the time (and on Kissinger if he should pop up into prominence again). To the readership who do feel convinced of Rockefeller's role in stealing America's gold and cleaning out Fort Knox--let's go ahead and give them a conscience too. The Rockefeller puppets can be infused with conscience and remorse for having raped and savaged the land that gave them birth. Rockefeller's, who plundered and pillaged this land of America through their banks, their oil empires, their CFR, and their Trilateral Commission, to finance the anti-Christ, anti-God world of tyrants and despots, can be reversed in their thinking.

It is important that entities not hate the Rockefeller's, but rather infuse them with the fervent desire to right a terrible wrong. It is important that entities act where they feel comfortable at. If entities feel more comfortable energizing the political figures they see all the time, then that is where they should act. If entities feel comfortable energizing the Rockefeller's also, then by all means let's energize the whole kit and kaboodle.

Those are OUR robots now. They're not the playtoys of the Rothschild's and the 'Council of 13' any longer. Those of you who understand the Rockefeller problem already know that the Rockefeller's' "philanthropy" and "charitable acts" through foundation grants and so on is only a tiny token show--a front, to cover what they're really up to. The real wealth of Rockefeller, which WAS America's wealth, has been invested overseas, to build the world of the antichrist. This can all be reversed, starting right now, with the help of Light Workers who are tuned in to the Rockefeller problem and who feel comfortable directing energy into it.

The U.N., which is directly OWNED and OPERATED by the Rockefeller's, has been the very instrument they have used for putting the world under communist slavery. This can be reversed. Rockefeller's, their banks, and the U.N. can RIGHT NOW start becoming the tools of the Avatars instead of the antichrist. Starting first with the Rockefeller's, the U.N. can be reversed. It can be made to free the world from communist slavery instead of putting the world under communist slavery. Rockefeller's' plundered wealth can be restored to the people of America. The Fort Knox gold they've stolen can be returned to America, and they can be the ones to do it. Instead of being controlled by the Rothschild's, the Rockefeller's can be controlled by the Avatars, who understand that the Rockefeller's are simply robots. A robot, like any machine, can be used for good as well as evil. It all depends on who's at the control box.

The Avatars and Light Workers came into this world to seize it from the antichrist. And the tools and the machinery are already right here to do it with. All we've got to do is TAKE IT. Avatars and Light Workers have access to Magic that the antichrist cannot touch. God, the Light of Love, is far stronger than the Luciferians' psychic and psionic energies. The Light and the Love of God, directed INTO and THROUGH the robots, including the Rockefeller's, can quickly turn this whole planet around.

Light Workers who still feel more comfortable energizing just the lesser robots--the President, Vice President etc., should do that. Every bit of this action is invaluable. And the workers who feel comfortable with the Rockefeller's would help us energize all the robots. Using these various robots, we can plainly and matter-of-factly expose the treacheries of the CFR, the Illuminati, and the Rothschild's. We don't have to "attack" anything, but just expose it, reveal it, shine the Light on it, and "tell it like it is," using the robots to do it. The Truth doesn't need to "attack". The Truth, like a giant tower of Light, stands alone, stands on its own merit. And hopefully, the Rothschild's themselves will turn and repent of their war-making and vampirism and join the Forces of Light. In the words of John Denver, who is himself a Son of the Light, "Come and stand beside us, we can find a better way."

God, the High Self of all human entities, and who calls Himself the great I AM, can now walk in and take the reins of this world.

These suggestions for reprogramming the robots should not be taken as countermanding the other Light rituals, such as the ones for planetary healing, etc. Rather, all these actions should be seen as adding to and bolstering the total work of healing this planet. All entities in the 'Body of Christ' should act wherever they feel most suited and qualified to direct their energies, whether through Magic, or prayer, or working on the physical plane (or all three).

Dear Avaton....Here is a 3rd reading in the "Reprogramming the Robotoids" series. I don't know, but there sure seems to be a very high energy in these readings. They come through with tremendous waves of ecstasy pouring through the Crown Chakra, then subside when the reading finishes. Sincerely, Bill.

REPROGRAMMING THE ROBOTIDS (Part 3) OR MAKING THE ROTHSCHILDS HOLLER 'UNCLE'

"Storming the citadel of hell" by taking over the robots is a battle that is won with love instead of hate. It can be waged with the warmth and humor of walking in on a child who's playing in the toilet bowl.

Despite the gravity of the Luciferian problem, the task of turning this world around is a simple one once we understand that love and levity and warmth are far more powerful than any psychic or psionic tool the Rothschilds have. There is actually a hierarchy of robots. It's like a pyramid, with the Rothschilds sitting squarely at the top. And their power is delegated down through a whole array of robots of descending rank. In America, it is the Rockefellers who are the highest-ranking robots under the Rothschilds. From the Rockefellers, the power is apportioned through the vast CFR network down to the Secretary of State, the President, the Vice-President, the Cabinet and so on down.

But as the Light Workers take over these lesser-ranking robots, working up to and including the Rockefellers themselves, we suddenly find where all the stink is coming from. It's coming from the privvy, and as we look in, by golly, here's a startled child all covered with poop. So anyhow, as we take care of this uncouth little rascal, the air begins to clear for miles around, and roses and lilacs begin to waft on the breeze instead. And this is really how it is from the cosmic perspective.

When we see all the public figureheads, the ones that are in the news all the time, let's keep them encapsulated in those shafts of Light and love and levity, infusing them with the very conscience of God. And let's do the same with the Rockefellers, but with them let's energize the reversal of the gold rip-off. Rockefellers can be energized with the conscience of God just as easily as they've been controlled by the Rothschilds. They can be made to say, "Hey, this whole trip was a real bummer and a self-out. Let's get the machinery all going to bring back America's gold and restore it to Fort Knox where it belongs."

Rockefellers can be made to reverse the huge financial and political dictatorship they've been running at the behest of the Rothschilds. And through their own lips, the whole story can be told of what's been controlling the planet for the past decades and centuries. They can be made to ignore the commands of their former masters, to walk away from them, and to use their already-established power structure to heal the world instead of tyrannizing the world. This can be done. The already-established system can be reversed and used for good in the dualistic world. And then this system, polarized for good, can be phased on into the New Order, the Law of the One. And under the Law of the One, government will become structured in the manner outlined in the York readings of 7-7-77.*

*ED's Note: "The Akashic Record"—Cosmic Awareness' design of the New Age world government; \$4.00 from C.A.C.

But right now, let's energize the whole project based on the tools that are already right here to work with. (This does not mean to discontinue the Trade Fairs etc., but to keep energizing all aspects of the New Age).

And as the Rothschilds find themselves "caught in the act," caught with their hands in the poop, it just may be that they can be cleaned up too.

This channel would appreciate input from other channels who are into this work. All entities are in this world to be transfigured, to be channels, to be unique and individual vessels of the One. Like Krishna, entities can also channel the mirth and laughter of the Godhead. For is not Light and levity even greater than the war-bolts of Thor and Shiva?

While all entities are urged to "act where they're at," we should also understand that Consciousness is a ladder. All entities can climb that ladder and unfold to deeper and deeper levels of Reality. This is the meaning of the "angels on Jacob's ladder." For the ladder of Consciousness is the stairwell back to the High Country, the Eden from which man fell in the beginning. Pure Love, pure devotion to God no matter what the cost, is the stuff the ladder is made of. We can walk again with God, even while still in the flesh. We can tabernacle on all the planes of the cosmos, even while our feet still walk the earth, just as Adam did. This is the "Better Way" that John Denver sings of. And the Rothschilds themselves can still "come and stand beside us." For God's Grace is still open to them, too.

CONCERNING FEELING GOOD ABOUT THE 'SELF'

There is a vast difference between feeling good about yourself and feeling good about your Self. In the first case, you're exalting the ego, the false self, or the Lucifer. And in the second, you're sacrificing or crucifying the ego and surrendering to the Christ, the True Self.

This is a clarification that should be made, so that entities know the difference between the self and the Self. The little self or ego is under the Law of Karma and reemodiment, while the Christ, the Real Self, is under Grace and has no karma.

ON THE BEATLES

The "rational mind" of this channel had long been rooted in ultra-right wing conservatism, and had violently rejected the Beatles and the rock culture. Yet the Higher Self lovingly embraces the Light that the Beatles stood for. The legacy of John Lennon served to clear away the bias which had been there.

The same Light that the Beatles stood for, that same stand against tyranny, was what the patriots and the Freedom-Fighters in the 3-cornered hats all stood for. The Beatles and the Patriots were all soldiers of the One Light, fighting under their own unique banners, all raising the ensign of that Light against the hordes of darkness. I imagine the church and state of England back during the Colonial times, must've considered the American rebels as the "dirty hippies" and subversives of that day.

I AM

(A Poem by Bill)

I AM the formless Brahma;
I wrote the Upanishads of old;
I walked as Krishna and Hari-Rama;
I AM the Shepherd of the Fold.

I AM Great Spirit to the Sioux and Seminole;
My name, they quietly endear it
long as Freedom's Bell shall toll.
Their mocassins have padded Sacred Earth beneath their feet,
as the Holy Sacred Mother caused their knowing hearts to beat.

I AM Allah, God of Mecca,
in the sandy desert's heat,
where my son Mohammed scribed Holy Koran at My feet.

I am the Christ of Jesus, Holy Father up above;
I AM the Cosmic Self of Plato, and told Nostradamus of My love.

I AM the quiet Buddha; I taught Siddhartha Gautama of the Sacred Middle Way
that if every man would follow, he would know the Light of Day.

I penned the Psalms of David, the humble Hebrew King,
who came back down from Glory, the Light of God to bring.

I taught My 12 the Gospel by the shores of Galilee;
I sought to bless My people, but they nailed Me to a tree.

I AM the God of Mary Eddy
and gentle Rachel meek and mild,
and of the Virgin Mary, who mothered Heaven's Child.

I AM the God of every man
who has ever known the Light;
I show my holy sacred Plan
to all who would seek to know it right.

I taught my sons throughout the ages,
I AM the Self of every man--
Read their testimony's pages;
As they did, so ye can.

Of this deluded world of man's, I have *never* been the king;
when this mad "society" disbands, then the Real World I bring.
As in the days of old Atlantis, when God-men ruled as kings,
I come again in New Poseida, brave land of holy things;
America, they call her, precious home of Truth and Right;
by her I come to a weary world that has hungered for the Light.

I come from beyond the ages,
from beyond Akashic time;
all my saints and holy sages
have proclaimed this Truth of Mine:
I AM the One behind the Many; I spake, and there was Light.

You called, and I have answered. Awake, My sons, arise,
from out of mayas deathly fright.

I AM YAHWEH, the God beyond the sun.
When the sons of men, repentant ask, "Not my will but Thine be done".
look up, ye men of Earth--I come!

I AM the Ancient One.

THE PRAYER OF THE AGENTS OF '855'

O Dear God most High: If it be Thy Will, let me bear the Earth's karma
even it destroys me. Let me bear the brunt for the healing of the Earth
and America even if it cost me my salvation for all eternity.

Yet not my will but Thine be done in all things. For Thy Purpose I
would suffer extinction forever if need be, that others might live.
Thy Will be done now and forever.

Amen

"LETTERS FROM BILL" are published periodically as a service to the membership of Cosmic Awareness
Communications, P.O. Box 115, Olympia, Washington, 98507. Subscription rates upon request.
