( Helping people become aware )

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

COSMIC AWARENESS.....

## On Death

## and Dying

( The After-Death Experience )

Paul Shockley  
Interpreter

### QUESTION:

A question from S.K. of Rolling Meadows, Illinois:

"In describing the near-death experience; when people have left the body, they often describe themselves as emotionally detached, looking down on their death scene with no emotion; yet later, when they travel through the tunnel and confront the Light, they feel tremendous peace, joy, bliss and love. Now my curiosity is about the emotional change in a person at death. Do all the negative emotions,—fear, anger, uncertainty,—fall away to be replaced with only positive emotions? It doesn't seem to be an absence of emotion that they experience in the soul-body, only an absence of *negative* emotions. I've read that a person doesn't really change when he dies and moves on to the next plane; yet it does seem that people describing the near-death experience often are transformed by it. Is there a sudden realization that comes with death? Would Awareness expand on this information?"

### COSMIC AWARENESS:

This Awareness indicates that essentially, 90% or more of all fear is in some way related to the fear of death. This Awareness indicates that this is the basis for security-seeking and for greed factors. This Awareness indicates that entities in fear of death, compromise themselves, become hostile, become fearful, become self-centered and selfish, and become greedy, and become somewhat emotional at the threats of loss of association, friendship, or property. This Awareness indicates that obviously, entities in moving up the path of the physical experience to the point of death and passing beyond death's door, will no longer have need for fear. This Awareness indicates therefore, they become emotionally detached in the sense that they are no longer worried about dying, for this has already occurred,—(at least it *appears* to have occurred in their experience.)

This Awareness indicates therefore, they are at peace; and when they discover that there is something more,--the brilliant White Light of the after-death experience, wherein they are given the bliss-energies from the Christ-Light or High Self, or that Christ Consciousness; these entities then experience the bliss and joy which floods the area of the soul which has been vacated by other energies based on fear and greed. This Awareness indicates however, not all entities pass through death's door and shed fear.

This Awareness indicates entities having great feelings of guilt and fear of punishment, fear of hell or damnation, fear of the demons or astral projections; these entities often become quite fearful after death, and the emotions and insecurity and the seeking after further security and escape from punishment,--these emotions are often still strong in these entities. This Awareness indicates that also entities who pass over during times of extreme hostility and rage may find themselves very angry and emotional. These entities sometimes haunt areas, seeking revenge. This Awareness indicates essentially however, this is mostly the astral shell carrying on these emotional actions; the essence of the entity generally moves on to the White Light experience.

AFTER THE NEAR-DEATH EXPERIENCE,  
IS ONE A NATURAL HEALER ?  
(The Movie, "Resurrection" )

#### QUESTION:

There's a movie making the rounds called *Resurrection* which concerns a woman who was almost killed in an automobile accident and was brought back to life in the operating room, having undergone the near-death experience,--through the tunnel and into the lights and so forth, as indicated in some of the books by Elisabeth Kubler-Ross and Raymond Moody. When this entity recovered, she found that she had this ability to heal entities simply by touching them or holding them; and this was the gist of the movie. I'd like to ask Awareness: Is there any basis in truth in this type of action, that entities who go through the near-death experience and resume their lives, that they have any special healing power?

*ED's Note: This editor heartily recommends C.A.C. members see this movie if they get the chance. It's really great! And the passing over scenes where Ellen Burstyn plunges through the tunnel toward the Great White Light etc. is very similar to the information we have received from Awareness about the passing over experience. (Another great movie with a similar scene is "All that Jazz", also a true story.)*

#### COSMIC AWARENESS:

This Awareness indicates that this movie as based on a true account. This Awareness indicates that in some cases, entities in returning from a near-death experience will have greater healing powers. This Awareness indicates however, this not always the case. This Awareness indicates that some entities, having the near-death experience, will return with greater insight and understanding of life, with a greater appreciation for life, and with personality changes, but the entities do not necessarily choose or receive the capacity to heal others.

This Awareness indicates in some instances, the entities may have a personality and spiritual change which impels them to enter certain fields of research or exploration, and the entities may find themselves desiring to teach others. This Awareness indicates that still others may find themselves wishing to serve in some other manner, through nursing or through some form of social endeavor. This Awareness indicates that those who experience similar near-death experiences may also find a desire to share this information through lecture or through writing, or may find that they do not wish to talk about this for fear that they will be considered as abnormal or subnormal in terms of the normal standards which they consider as necessary to survive in the society properly.

This Awareness indicates it depends much on the individual and his or her personal attitudes and inclinations, according to the type of being. This Awareness indicates that some entities, being highly sympathetic to the sick and dying are inclined toward wanting to heal. Other entities looking at the sick and dying are frightened, and wish to escape and avoid looking at those, or being around those entities. This Awareness indicates that this difference in attitudes and personality and experiences will determine what effect the near-death experience might have on an individual.

WHAT DO THEY MEAN: " MAKING PEACE  
WITH ONE'S GOD" PRIOR TO DYING ?

#### QUESTION:

Would Awareness comment on the subject of 'making peace with one's God' prior to death? There's a lot of people using the phrase, particularly the fundamentalists make a big to-do of this, threatening other entities that if they don't do this, some dire consequences will happen. In the army and the military and so forth, they have these chaplains that go around on the battlefield when entities are dying asking the same question. When Henry David Thoreau (who had never belonged to any church), was on his death bed and his friends were pushing him to 'make peace with his God', he commented that he was not aware that they had quarreled, and proceeded to die. Would Awareness comment on this subject of making peace with one's God?

#### COSMIC AWARENESS:

This Awareness indicates that this, of course, requires first that an entity recognize a Divine Aspect of their being, and also recognize a unity of being, whereby the Divine and the physical and personal aspects can be united as friends. This Awareness indicates that this also requires a williness of an entity to give up a least a portion,--if not all--of one's personal will, to allow the Divine Being to direct the entity. This Awareness indicates that total peace requires that the individual surrender totally to the Divine Aspects of one's being.

This Awareness indicates that the main reason why entities emphasize the need for a priest or minister or rabbi at the time of death is so that the entity can somehow come to terms with any discrepancies or differences within the being. This Awareness indicates that such actions require that the entity be made ready for the passing over by coming to terms with the Divine. This Awareness indicates that as this occurs, the entity is more inclined at the moment of death to accept such

instruction than if the entity had 25 years or more to create havoc and conflict before having to come to terms. This Awareness indicates essentially, this is an action or service by the organized religions, intended to assist entities in passing over, giving them the last chance to come to terms with the Divine Forces. This Awareness indicates that this actually is beneficial for many entities and helps them to enter into the after-life with a more clear feeling about the experience.

This Awareness indicates that wherein during the life, prior to the deathbed experience, entities are asked to come to terms with the Divine, many entities are afraid of what the implications might mean. This Awareness suggests that wherein there are certain requirements placed upon the person which are expected of those who have come to terms with the Divine, such as no longer being allowed to 'sock it to your neighbor before he or she socks it to you', or wherein an entity is no longer allowed to indulge in physical gratification, 'the sins of the flesh', because the entity has reached a communication with the Divine; this Awareness indicates that wherein an entity fears that such atonement with the Divine Forces will prevent the entity from having the right to do what he or she wishes to do in terms of this or that action, the entity then may put off,--even though recognizing this atonement as having a particular value for his or her soul growth,--the entity may wish to put this off until he or she can indulge further in the enjoyment of the physical, power, lust and greed forces.

This Awareness indicates that therefore, wherein an entity approaches this death experience and realizes that the play is over and the piper must be paid, the entity knowing that indulgence is no longer going to be offered, the entity is more willing at that time to surrender to the Divine. This Awareness indicates however, the entity still may have racked up much karma which needs to be reconciled. This Awareness indicates that wherein the entity's motive is simply to repent and be atoned at the last minute, having ripped-off life and others for all he or she could get, now escaping from any form of punishment by last-minute atonement; this Awareness indicates that wherein an entity recognizes and does this with intention, the entity still will receive karmic repercussions. This Awareness indicates however, wherein an entity truly experiences remorse and seeks to make peace with Divine Forces, the greater portions of karmic experience can be erased by the Grace of the Divine.

#### HOW THE GRACE OF THE DIVINE WORKS

( Parable of the Prodigal Son )  
Applied to Luciferian  
Experiment

#### QUESTION:

This is the 'Grace' that Bill Sheppard channels so much about that is the alternative for entities to the 'Great Experiment of Lucifer which required overcoming karma to return to the Source?

#### COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that the Luciferian experiment, (as the entity Bill Sheppard calls this), is essentially the incomplete expression or experience of human endeavor. This Awareness indicates that the completion occurs when entities reunite with the Divine Forces of the universe by

surrendering self, either accompanied by remorse for error or by simply atoning to the Divine.

This Awareness indicates this also is seen in the parable of the prodigal son which returns home. This Awareness indicates that the Luciferian experience is that of the separation. The son leaves the family, leaves the father, goes out and becomes involved in all types of activities which are abhorred by the father. This Awareness indicates that the son then comes home and is graciously welcomed. A great party and feast is given. This Awareness indicates that the second son, who remained at home and never left is somewhat envious,--wondering why he, having been obedient and never having left, is not shown the same appreciation as the son which left in disobedience and then returned home, welcomed by a feast.

This Awareness indicates that essentially the Luciferian energies, separating from the Divine Forces; Rhyee leaving Celestria, going out seeking to discover its own individuality, then eventually returning, realizing its effort as a failure, being incomplete, and that the completion lies in returning home to the Father, to the Divine, to the family; this action of returning home is that which brings forth the Grace which is the crowning glory, which tops the Luciferian experience and brings completion to it. This Awareness indicates that the Luciferian experience cannot be complete without the crowning glory of the Grace of the Father, which is allowed when the Luciferian returns, recognizing the error in his movement, in his past.

This Awareness indicates that this again relates also to the old Masonic story wherein the initiate stands before Lucifer and states, "I have followed you all the days of my life. You have promised me everything: glory and wealth, pleasure and happiness; but you have brought me nothing but pain, pain, pain, and still more pain. Therefore, I denounce you forever." At this point, according to the story, the Luciferian image begins to shatter, and in its stead appears the image of Christ. This Awareness indicates that this as another allegory or image or symbol or parable of the same concept, the same message: that the individuality is developed by following Lucifer. And when the individuality is fully developed, the entity, through suffering and through separateness, creates the individuality of self and recognizes incompleteness in that self, and therefore to find the completeness, the wholeness, or holiness, he must return to the Divine from which it separated.

#### THE FALL OF THE ANGELS

This Awareness indicates the necessity or the action of separating in order to develop individuality, is that which allows the entity to return to the Celestria, to the Divine, in a body or personality or as a being that is above the Angels who never left the Father in the first place. This Awareness indicates that those who left and fell into Hades, upon returning to Celestria, will be *above* those known as the Angels which did *not* leave Celestria. This Awareness indicates this in the symbology of the prodigal son story, wherein the returning son received the greater glory. This Awareness indicates that this entire action of the fall of the Angels, the separation of Rhyee and the creation of Hades and the incompleteness and the development of individuality, which needed to be surrendered and the return to the Divine; all of this as having been part of the Divine Plan of the Creator to allow entities the opportunity to discover the powers and forces of creation, to explore creative forces through individual action, through rebellion, through separateness, and to have the opportunity to come back to the Source with understanding equal to that of the Creator.

This Awareness indicates that there is also the saying that "when you allow your loved ones to leave; if they leave and then return, then indeed they are yours." This Awareness indicates that the Divine Creator, without the movement or the fall of the Angels, had a situation, had an experience whereby all entities in Celestria were obedient simply because that was the culture, that was the custom,--to be obedient to the Divine Creator. This Awareness indicates however, wherein an entity has the opportunity to disobey and leaves in disobedience, then returns with head bowed, repentant and willing to obey, not because of custom or command or by force or coercion or threats, but because the entity is willing and desirous of being close with the Divine Creator; this then is that which is greater than the experience of having entities around who are simply there because they are afraid to leave.

#### THE GENDER OF THE DIVINE CREATOR: THE "FATHER" IN HEAVEN

This Awareness wishes to speak an aside in reference to the previous message. This Awareness indicates that wherein *It* speaks of the Divine Father, this Awareness indicates that this not in reference to male/female images. This simply as an allegory; that the reference being in terms of the prodigal son and the return to his father. This Awareness indicates the Divine Creator is not any more male than female. The Divine Creator having both aspects as one. This Awareness indicates that there are customary terms in your culture which have, in the past, emphasized the concept of God, or the Divine Creator as being masculine. This Awareness indicates these as only being symbolic in representing certain aspects or qualities. This Awareness indicates that *It* is not intending to imply the Divine Creator is male. This Awareness indicates that the terminology of the return to the "Divine Mother" would be equally as accurate. This Awareness indicates however, it would draw attention to *It* in a manner which would distract from the message for many entities, and therefore this Awareness uses the more acceptable terminology in describing these energies. This Awareness indicates however, in future times, it would be appropriate for terminology to be devised which would allow entities to recognize the Divine Creator as having no sexual preference in *Its* being.

#### ANGELS WHO DID NOT "FALL" SIMPLY HAD NO SENSE OF ADVENTURE ( How the Intuitive Side of the Brain Works )

#### QUESTION:

In the closing part of the discussion of the Luciferian energies returning, Awareness referred to the Angels that didn't leave Celestria because they were 'afraid' to leave. Is that why the Angels that remained, remained?

#### COSMIC AWARENESS:

This Awareness indicates that in part these entities were loyal to the Divine Creator through identification with the Divine Creator. These entities not simply afraid, but lacking in adventure, lacking in the rebellious spirit which would cause them or impel them or influence them to strike out on their own. This Awareness indicates these entities not having enough initiative to leave their own, to discover or to create a world outside, or to make the effort to create on their own. This Awareness indicates that this does not mean these entities as inferior, but as different; they being more peaceful, more accepting; the others being more individualistic and capable of endurance under hardship.

This Awareness indicates that those who struck out and were adventurous enough to seek to create that which was not yet complete and who worked to build towers of Babel, towers of rational thought, towers of understanding, towers of civilizations, towers of occupations, towers of society, towers of cultures and all of these towers of thought and ideas of a rational nature; these entities seeking to complete something, but finding nothing being total *until* they return to the Divine.

This Awareness indicates this can also be seen in reference to the rational mind,--the left side of the brain,--in comparison to the intuitive or holistic mind,--the right side of the brain. This Awareness indicates that the intuitive side of the brain, being holistic, does not have as many qualities at its disposal, is not as complete in its totality, without having the service of the left side of the brain at its disposal. This Awareness indicates likewise, the left side of the brain is not complete until it unites and surrenders and allows itself to be reunited with the right side of the brain.

This Awareness indicates that wherein an action is studied rationally with great effort, and the action cannot be completed,--whether this is an invention, the research into a concept, or a situation which needs completion,--wherein the left side of the brain, through its rational reasoning, is incapable of reaching a proper solution to the problem, it may find that it becomes totally frustrated after much energizing and effort, and the entity then, decides to quit and take a break. This Awareness indicates as soon as the entity decides to quit and take a break, the right side of the brain begins operating,--for it operates in pleasure, in enjoyment, in music, in arts and in play.

This Awareness indicates the entity may go golfing or go out walking, or enter into some enjoyable activity. The entity may find himself singing, whistling, attending a movie or reading a book, or taking a journey. It is during these moments of relaxation, after the left side of the brain has worked itself to the bone; it is during these moments of relaxation that the intuitive mind takes all of the energies which have been generated by the rational mind and process this through a higher computer, a spiritual computer, and presents from this the insight, or intuitive answer which comes like a "bolt out of the blue" to the entity, and he suddenly has his answer.

This Awareness indicates that in this manner entities receive--through moments of relaxation or through dreams, or through moments of pleasure,--the answers which they could not find during times of hard, rational thought. This Awareness indicates that the total process is that which is necessary; the rational mind being likend unto the male force,--structuring, building logically; the intuitive mind being likened unto the female force. The rational mind in its building process plants a seed which enters into the intuitive mind, which in turn produces the baby, and the answer is born.

This Awareness indicates in the Cosmic level: Rhyee leaves, enters into the rational or material world, begins attempting to build concepts, civilizations, and great towers of wisdom and knowledge based upon rational thought; and after a particular length of time becomes frustrated. Nothing works. Nothing that has been tried equals the glory of God. The entity is frustrated, the civilization is frustrated, the entire system is frustrated; and therefore, the rational mind begins to break down.

This Awareness indicates on your plane in your social structure, this occurred with the advent of the hippie movement, wherein LSD and other hallucinogens were part

of the solution; wherein the atomic radiations emitted by the atomic testing were also part of the solution which broke down certain barriers between the planes of the physical, astral, mental and causal levels so that energies could come through and frustrate the rational approach; and whereby during the 60's and 70's, entities became more and more indulging in play and pleasure, entering the golf courses, the theaters, the bedrooms, the restaurants, and all of the traveling which occurred. And it was during this play and pleasure period that the various answers began to flood in from the feminine side of society, the circular systems, the curves, the creative areas, rather than the structured, sharp, controlled areas of the left brain of society. The masses began to create insight, experience the movement of these energies into the higher computer, the biosphere. From this then came answers. These answers are still pouring in upon this plane. Some can be applied by the rational mind, by the rational civilization, by the rational, structured society.

This Awareness indicates this action essentially is likened unto the crowning glory being placed upon the rational Luciferian creation, and it occurs only as the surrender of the Luciferian energies to the Divine Forces of the intuitive biosphere of this society and planet is allowed. This Awareness indicates that this as the veil or mystical marriage whereby the masculine, or structured concepts pierce and enter through the veil, the hymen, the lifting of the veil, and entering into the Christ Light, the bride, the Isis, the intuitive energies; whereby these come together to allow the Second Coming of the Christ Light to appear in the world for all entities to experience.

#### THE VARIOUS SYMBOLOGIES OF THE "FALL"

( More on the Tarot, the Kahunas, the Great Pyramid )

#### QUESTION:

It would appear, then, that those who remained in Celestria may be in some respects less interesting, but was it a necessary element for the universal balance that a portion would remain?

#### COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that many of those entities who remained in Celestria have since journeyed to this plane as emissaries, to assist in speeding-up the evolution and bringing back those who have gone astray. This Awareness indicates this as associated with the concept of Isis following Rhyee,--after Rhyee 'split', or left the scene, leaving Celestria; Isis which remained, followed. This Awareness indicates this likened unto the female following after the male in order to bring back the male to his true status at the right hand of the Divine.

This Awareness indicates this also may be seen in the Lover's card of the Tarot, wherein the male looks to the female who, in turn, looks to the Angel above. This Awareness indicates this also as symbolic of the Kahuna philosophy, wherein the rational mind or the middle self,--the conscious mind,--looks to the subconscious, which is the lower self; and the lower self, in turn, has communion with the Higher Self,--the Christ Consciousness. This Awareness indicates this also relates to the Holy Trinities wherein the Father,--or Higher Self; the Son,--or middle self; and the Holy Ghost,--or subconscious lower self, become a Trinity in a Cosmic union. This Awareness indicates this also relates unto the oriental trinity deities.

This Awareness indicates that there is also a symbolism reflecting in the image of the pyramid with the all-seeing eye above. This Awareness indicates that this pyramid as the rational structure, the rational mind. This Awareness indicates that the all-seeing eye is that which is the holistic mind, or the intuitive mind, or the right side of the brain, the Christ Consciousness. This Awareness indicates that this being complete or crowned when the all-seeing eye, or light above the pyramid is present. This Awareness indicates that there are other symbologies in the pyramid also that do not necessarily apply to this particular allegory: the pyramid symbolizing the pituitary, the sphinx symbolizing the pineal, the hall or records as the connection between these two entities,--this as the offspring, or Christ Light which results when the pineal and pituitary join together in mystical marriage.

#### CONCERNING THOSE WHO DIE SLOWLY

( More on the "Long Body" )

#### QUESTION:

Awareness, I had one final question that relates back to the question on the near-death experience. It's a question about those entities waiting for death. This is prompted by an experience Vicki and I had last fall when we travelled to Victoria to see my ancient aunt who is in one of those euphemistically called 'rest homes'. While we were there we noticed all of these entities who were obviously waiting around to die. While we were there we witnessed a number of these ancient entities who were doing very strange, and what seemed like almost tragic things in their final days. For example, there was one old lady who paces the floor carrying a well-worn old teddy bear snuggled in her arms, stroking it. My aunt (who is still very sharp mentally) told us that women spends every hour of the day walking the floors, holding onto that teddy bear, and she's been doing this for months. Another lady was sitting at a table, writing with her fingertip, writing sentences and then rubbing them out, rubbing them out with circles just as hard as she could, almost like her fingers would be bleeding. My aunt told me she does this 12 or 14 hours a day and has been doing it ever since she was there.

My question is: these entities who are in such places awaiting death; is this the working out of karma or something,--waiting to get realizations so they will be able to experience the death experience to their best benefit, or is this what most entities can expect when they reach those ages?

## COSMIC AWARENESS:

This Awareness indicates that this action wherein entities pass over very slowly rather than suddenly, is that which may be described best as the movement of the 'long body', or the movement of the soul through the eye of a needle. This Awareness indicates this likened unto trying to put a sweater through a needle's eye. This Awareness indicates there is only one way which it can be done, and that is to unravel it and re-knit the sweater on the other side. This Awareness indicates that part of the entity has already passed over and is dwelling on the other side. Part of the entity still remains on this side. This Awareness indicates that the more progressed the condition is,--the more of the entity which has passed over, the less that remains; and that which remains is generally the most early portions of the entity's experiences,--the child. The child within the entity remains. It is for this reason that elderly people very often are called childish or childlike. This Awareness indicates that the adult portion of these entities is dwelling on the Inner Plane, preparing for the complete passing over. This Awareness indicates that wherein an entity reaches a sudden death, or a passing over, this does not necessarily happen.

This Awareness indicates that the passing over in this manner, actually begins as soon as the entity begins to conceive of something beyond the physical. This Awareness indicates that wherein an entity is born, the entity clings heavily to life and the physical world. The entity may have a desperate fear of death and may cling strongly to materialism and may not wish to think of death or of any afterlife or of anything which cannot be proved by the senses. This Awareness indicates that as soon as an entity's consciousness begins to perceive abstracts and other concepts of a world beyond, portions of the entity's consciousness move into those realms.

This Awareness indicates that these entities, in moving into those realms, have use of the energies from those Inner Planes and can apply those energies to life on the physical planes.

This Awareness indicates it is for this reason that most of the great successful people have had psychic experiences, or have been involved in some way in metaphysical teachings or metaphysical concepts, or at least if nothing else, have a strong spiritual aspect of their lives which is more important to them than the physical life. This Awareness indicates that these entities are drawing on the spiritual energies which help in their physical expressions. This Awareness indicates however, these entities also have portions of their consciousness spread into the other realms.

This Awareness indicates that as the entity grows older, the spiritual realm or the Inner Plane becomes more and more important, and the entity may cease talking about these realms, or cease drawing these energies into the physical, and may simply reside in the physical, but emotionally and mentally be living in the spiritual or Inner Planes. This Awareness indicates that as more and more of the entity's energies transfer into these spiritual levels, less and less remains for physical activities; and entities looking at that body may see that it is sedentary or inactive, or almost dull in its behavior, lacking in flexibility, lacking in adaptability of a physical nature, and the entities begin to recognize old age and childlike behavior. This Awareness indicates that as this progresses, the old-age effects on the body and the childlike behavior may intensify.

This Awareness indicates that often you will see elderly persons spending more and more of their time asleep or meditating, and only occasionally coming out to recognize the 'world out there'. This Awareness indicates that this as indications of the final stages of passing over, wherein most of the entity,--in terms of attention and interest,--is on the other side, and only occasionally comes back into the physical plane.

This Awareness indicates that for entities who wish the best of both worlds, who wish to live a long physical life; it is important that they learn how to draw on the Inner Planes, how to have the consciousness that enters into those Inner Planes, and yet also have a firm grounding in the physical plane with enough activity, exercise, and purpose to keep them involved in the physical activities of life. This Awareness suggests that wherein entities' interest goes; there also follows your soul and your energies. That it is important for entities to have an interest in both the physical and the spiritual realms. For in this manner, the entity will live a long physical life, learning much and having many opportunities for growth in the physical plane, while also being given much opportunity by focusing on the spiritual realms, to learn and receive from it energies necessary for growth and fruition.

## WHICH DEATH IS BEST--FAST OR SLOW ?

( More on Edgar Cayce )

### QUESTION:

In the discussion of entities in rest homes, and their slow form of passing over, the question came to mind of what it was in the makeup of a person who dies slowly in this manner,--portion by portion--that is different from those who die suddenly: in their sleep, from a heart attack, stroke,--the sudden, the clean-cut exit. It seems that the sudden passing overs are more gracious and easier on all involved, and I would like to understand the comparison of these two methods of leaving the physical plane.

### COSMIC AWARENESS:

This Awareness indicates that the more gradual movement is that which allows the entity to condition himself or herself, into the other side, or other plane, well before fully entering. This slow transition allows the entity to become more adjusted, without the shock of a sudden passing. This Awareness indicates that the entity who dies suddenly may experience a period of disorientation, not understanding what occurred,--in some cases, not even realizing that one has passed over. The entity may feel completely disoriented, confused, and unable to adapt to the new situation. This Awareness indicates that in most cases, there will be those from the Inner Planes, or other dimensions, who will assist the entity in realizing what has occurred; but in some situations,--particularly wherein there are masses passing over at the same time,--often there are not sufficient guides to assist these entities in fully understanding what has occurred. However, there are usually, among those masses, enough companionship to help each other to adjust to the situation of sudden change.

This Awareness indicates that it does not really make a great difference how entities pass over in terms of their ability to adjust. If an entity passes over suddenly, and experiences a disorientation, that disorientation may be more brief an experience than if the entity is long-suffering and passing over more gradually.

This Awareness indicates however, in many cases, entities passing over gradually can use those moments of being in and out of the body much in the manner of a deep meditation, to allow a deeper understanding of the death and pain process. This Awareness reminds entities of the message regarding Edgar Cayce as having suffered greatly on a battlefield for some days before passing over; this suffering being that which had allowed the entity to experience certain states of consciousness which later contributed to his ability to enter into trance reading levels.

**SLOW DEATH CAN OCCUR TO THE AWARE  
AS WELL AS THE UNAWARE**  
( Most entities choose how they will die )

#### QUESTION:

Those entities who take the slow, painful route of passing over; are these generally entities who have little or no understanding or belief in the hereafter?

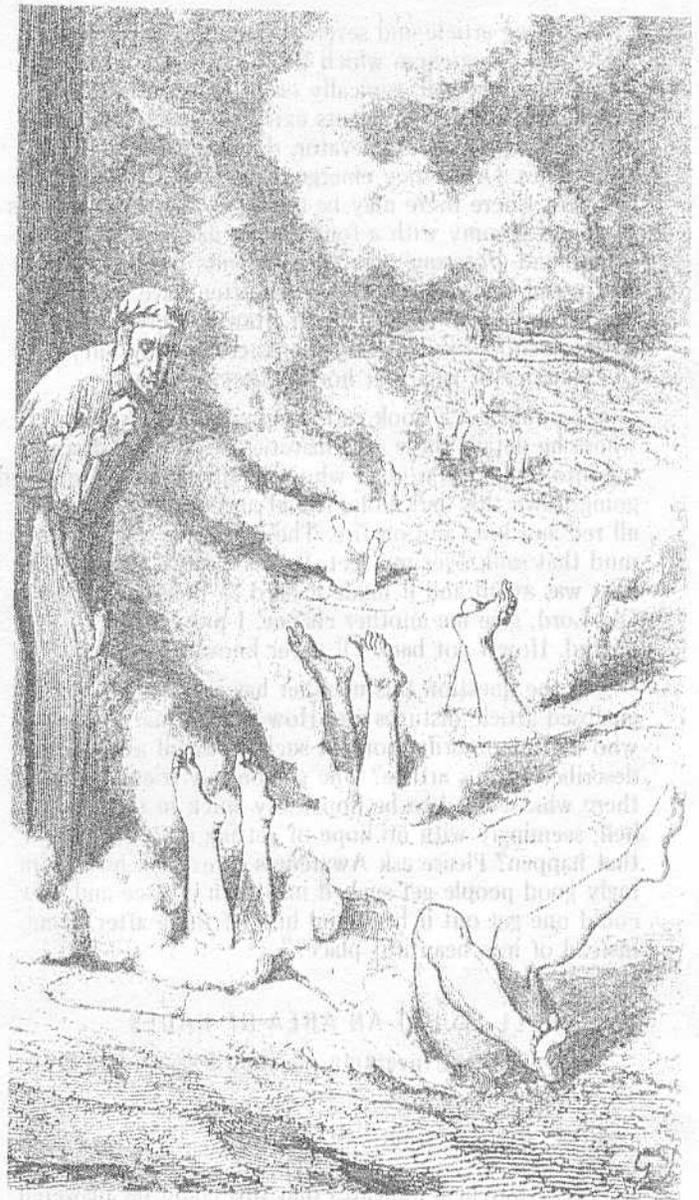

#### COSMIC AWARENESS:

This Awareness indicates this not necessarily appropriate to this type of passing over; that it can occur to anyone, regardless of their state of consciousness. This often relates more to the environment in which an entity finds itself,-- whether the entity is capable of letting go, whether the entity is of a strong will, needing to wait around until certain events are completed upon this plane before removing the entity's influence upon these events. This Awareness indicates that often entities linger and linger, in part to help watch over those whom they love, and to continue having some influence on the affairs of those whom they love.

This Awareness indicates that often, also, entities have other reasons for remaining. This Awareness indicates that in some cases entities have a death wish and desire to move quickly into other dimensions, or may have a death wish not quite so strong, and may take greater time; this depending in part upon the degree of intensity in the death wish, or the degree and intensity one feels toward life. This Awareness indicates that each situation is unique, according to the attitude of the individual.

This Awareness indicates that essentially, each entity picks his or her own path for departure, even though this path may be of a subconscious direction. This Awareness indicates that in some cases, however, this is a cultural karma, rather than a personal pattern or karma. The pattern of departure, for example, wherein an entity becomes victimized by a mass catastrophe, such as in Nagasaki and Hiroshima, or areas wherein natural catastrophes have taken the lives of thousands,--this Awareness indicates this not necessarily the subconscious wish of an individual. This Awareness indicates that in some instances this is more likened unto the death of a particular culture rather than a death of individuals, and the individuals are simply victimized under that cultural death.

This Awareness indicates that these experiences usually find a balancing or justice at a future time, or are in some other way balancing the scales from a past situation.

#### DOCTORS SAY "HELL" EXISTS

( MORE ON LIFE AFTER DEATH )

#### QUESTION:

A.K. of Portland, Oregon sent in a question along with a clipping from a tabloid. I shall read a little bit from this tabloid article and then ask her question. It concerns the life after death experience by those who have come back.

"An amazing breakthrough in the study of life after death has produced the first dramatic evidence of the existence of hell, a hell of pain and horror more than equaling the worst nightmares of biblical warning. The evidence comes from 'back from the dead' hospital patients, people revived from clinical death by a top heart specialist. In the past, such patients have reported only pleasant heavenly experiences, peaceful ascent to flowered landscapes and a joyful reunion with deceased relatives and a shining god-like being of light. Despite documenting hundreds of similar cases, doctors could find no mention of hell or anything like it until now. Based on this overwhelming evidence, not everyone goes to heaven. Hell also exists and at least as many people go there as to heaven."

It's a long article and several events he mentions here. "The bad experiences which Dr. Rawley is convinced are glimpses of hell, typically occur apparently in the bowels of the earth. Patients exit this world, descending at the speed of an elevator, down a dark shaft lit by torches. Often they emerge through this tunnel into a cavern where there may be a lake of fire. They say it's dark and gloomy with a foul stench, naked writhing bodies and grotesque creatures. Patients trapped in the half-world between life and death often have begged him to save them from hell. Dr. Rawley reports that within a short time, these patients completely bury the memory of whatever horrors they've seen.

He's published a book called *Beyond Death's Door*, where he details these case histories of patients descending into hell. One woman who attempted suicide reported going down this dark hole, round and round. "It was all red and hot and on fire. The earth was like slimy mud that sank over my feet. It was hard to move. The heat was awful and it made it hard to breathe. I cried, Oh, Lord, give me another chance. I prayed and I prayed. How I got back I'll never know."

Now the question this member has is this: "The enclosed article disturbs me. How can ordinary people, who die temporarily, contact such an awful astral plane described in this article? One person saw friends he knew there who seemed to be hopelessly stuck in that awful hell, seemingly with no hope of getting out. How could that happen? Please ask Awareness to explain how seemingly good people get sucked into such a place and how could one get out if he found himself there after dying, instead of in a beautiful place?"

#### HELL IS JUST AN AREA OF HADES

(A Recent Invention...Grossly Exaggerated')

#### COSMIC AWARENESS:

This Awareness indicates that this could be answered in two statements: By believing in hell, and, by believing one deserves to go there. This Awareness indicates however, there are more levels to this; for though that answer is complete in itself, it still creates a reality for many entities.

This Awareness indicates that there are many creations in consciousness whose energies are real unto themselves. This Awareness suggests that *all* is imagination, including that which you call 'reality'. That energies which come together on various vibratory rates, create that which may be called 'matter'; yet if these material images are picked apart, one by one, each will be nothing other than sound, heat, light, rays, or mind or gravity. This Awareness indicates these vibrations create that which appears to be reality, or matter. These vibrations, mingling and intertwining together create that which may be called 'reality', and that wherein an entity is experiencing one of these particular levels of reality, other levels of reality may seem to be 'unreal'. This Awareness indicates that wherein an entity moves into that other reality, the reality which was just left will be unreal, and the new reality is that which is real.

This Awareness indicates that 'real' means 'realized'; and wherein an entity is experiencing something, *that* is real. This Awareness suggests that wherein an entity dies and moves into a level of consciousness which believes in hell, which believes that they are to be sent to hell, then that consciousness will *realize*, or make *real*, that hell.

This Awareness indicates this realization comes from the experiencing, which is imagination; but wherein more than one entity imagines this, that image becomes reinforced and has greater energy. Wherein countless hundreds, thousands, or millions image a hell, they are indeed creating that hell in that other realm, so that entities may participate in those levels of experience.

This Awareness suggests the purpose of this Awareness in coming at this time, is to diffuse extremes in consciousness, to reconcile polarities, to alleviate the suffering, sorrow and tragedies, not only on this earth plane, but also on other realms. This Awareness indicates that wherein entities energize concepts of hell, fear, hatred and demonic tortures, that these will simply grow stronger. This Awareness wishes that entities not to identify with hell, not to associate their actions with hell, nor to assume that they are going there. This Awareness indicates that this as a gross exaggeration, and those entities who exaggerate or have these beliefs and fears, whether conscious or unconscious, these are the entities who will be given that experience in order that they may satisfy the guilt feelings and beliefs that they must be punished for their sins.

#### ED'S NOTE:

At this point in the reading, Awareness stopped its dissertation on the after-death experience and went into a long rap regarding the demonic and demented entities who inhabit the realms just beneath the surface of the earth. This was triggered by the previous question which referred to grotesque creatures and a 'foul stench'; that the entity going through the after-death experience did tap into those energies of that demonic area just beneath the surface of the earth. At the time this reading was given, Awareness told us in no uncertain terms, to withhold and not publish this part of the reading until it gave permission to do so when additional information on middle earth and UFO's would be given, and this to be published and released in one package at a later time. This was eventually published in 'Revelations of Awareness' No. 79-25 (The Web of Conspiracy, Part 2,--The Secrets of the UFO's), \$4.00 from C.A.C. The first paragraph of this information is included herewith because Awareness later refers briefly to those demonic entities later on this reading. For a complete version, please refer to page 21 and 22 of the UFO reading (79-25).

This Awareness indicates that in another level, this experience as related unto that which is deep into the shell of the earth,--not the center of the earth, but deep into the shell of the earth. That there are certain subterranean entities who are demented and demonic in their deteriorated states of consciousness. These are the lower realms of humanity. These are described in Richard Shaver's experiences in terms of his journeys through the caves and into those caverns beneath the surface. This Awareness indicates these entities are called Deros. These are also the entities who have inspired many legends and other types of philosophies and religions. (Such as elves and imps, gnomes, goblins and trolls).

## THE FOUR LEVELS OF HELL

(The Kaballah Connection)

(Opening Message, following reading)

This Awareness indicates in relation to the question previously asked regarding that concept of hell, this in relation to that which this Awareness has referred to as 'Hades', this Awareness wishes entities to understand that essentially there are four levels. These also correspond to the elements of Creation, -fire, air, water, earth. That there is in the Kaballah that which is the fire level or Atziluth; the water level, or Briah; the air level or Yetzirah; and the earth level Assiah. That below this is that which is called the Clithoth.

This Awareness suggest that Atziluth as that which corresponds to that which this Awareness has referred to as Celestria. Briah corresponding to water, magnetism, emotions, or images. This Awareness indicates this as the area known as the formative levels wherein the Celestria energies are grounded. This Awareness indicates that Atziluth is likened unto that which is the spirit or vital forces of Celestria, and Briah as likened unto the magnetic, or basic foundations for Celestria. This Awareness indicates that Yetzirah as that which equates to the mental level; that this includes the Luciferian energies of the mind. That the physical creation of Assiah is that which is represented in Terrestria, or in those physical creations. That the Clithoth as that which equates to Cimmeria on the lowest level, and to the regions of the damned, or that which may be the lower depths of that which is Hades or hell. [This Awareness indicates that much of this information previously given in this opening message will be of little concern to your membership; that this as something for your records.]

ED's Note: I have included this opening message, however, for the benefit of those members who have taken the Development Classes (or who plan to take them) for the study of the Kaballah is part of the preparation for the rituals used in these classes which were presented by Awareness.

### THOSE WHO PROMOTE "HELL" ARE DESTINED TO EXPERIENCE FULLY THEIR CREATION

( THE POPE, BILLY GRAHAM ETC. HAVE RESERVATIONS )

This Awareness suggests that in relation to the connection between hell and Hades, that hell is simply an area of Hades which has been energized by those who have pursued those concepts that have been handed down through the Christian and Jewish traditions. This Awareness suggests that this as but an exaggeration of the area of Hades. That these are consciousness experiences, or consciousness levels. That essentially Hades as being the *realm* and this as having been created through imagery and through that which is imagination of many, many entities and immortal beings over eons of time. That the invention of hell as that which is relatively recent and as an exaggerated experience, focused and intensified for the purpose of increasing the threat and the punishment against those who reject the course of the priests or those who are promoting the particular salvation from that concept.

This Awareness indicates that as entities focus and intensify concepts of dire punishment and great pain and hell, these energies become realities. These thoughts and thought-forces are emanated outward and find expression through any entity who is capable of accepting those energies. This Awareness indicates it is for this purpose, or for this reason, that many of the entities of low development, of demented mentality, often engage themselves in sadistic expression, for they have tapped into those thought-forms which have been projected by entities who believe in and energize and promote concepts of hells and demons.

This Awareness indicates incidentally, that the entities who first promoted the concept of hell, those entities who thought and sent forth those concepts into consciousness through their exaggerations; those entities are, themselves, damning themselves to experience that thought process and image which they sent out. This Awareness indicates that many of those original thinkers who promoted concepts of great punishment and hell have already experienced this for themselves. For the nature of consciousness is that whatever you think and send out is but a carbon copy, and you, yourself, keep the original.

This Awareness suggests that when you think a thought, the thought-form, the magnetic qualities stick to yourself, and the spirit of the thought moves out. Therefore your thoughts linger about you, even though they are projected toward others. This Awareness indicates that more may be given in regard to thought-forms in a different reading.

This Awareness wishes at this time to focus on the relationship between Hades and hell. That essentially Hades as being a sub-astral plane; this likened unto three lower levels of the astral realm, and that hell is a sub-level creation of the lowest of these astral planes.

This Awareness indicates that if worse torments could be created and entities could imagine worse torments, and develop a concept for such a place of existence, then indeed they would make room in consciousness for such a place. This Awareness indicates for example, a name of Globbadah as being the most hellish place in all hell could be conceived

as full of multiple tortures, etc., with detailed descriptions, --that if this were promoted as a belief in reality, a factor of reality, --then, indeed, there would be created in consciousness by the imagination a state of being which some entities would feel inclined to enter in order to alleviate their feelings of guilt.

#### THE NATURE OF GUILT AND IMAGINATION

This Awareness wishes entities to *understand* the nature of guilt and the *nature* of the imagination. That entities can punish themselves all they wish by creating these levels of punishment. Yet this as all but a *creation of imagination* and has nothing to do with the reality that: You are what you think; You become what you do, and you may be whatever you desire. This Awareness indicates no entity needs to suffer, except when the entity believes he needs to suffer.

This Awareness indicates it is for this reason and no other that entities are urged to behave in responsible and loving ways toward one another, so that you do not feel a need to be hostile and condemning toward yourself or seek out punishment to alleviate the feelings of guilt for having harmed another.

[This Awareness indicates that any questions may be asked regarding this or other areas which might have been left unclear.]

ON THE PHYSICAL PLANE, OPPOSITES ATTRACT;  
ON THE ASTRAL PLANES, LIKE FORCES ATTRACT

#### QUESTION:

One question in relation to the original question, that this doctor describes one of these patients being brought back from the after-death experience as going down the tunnel, shooting down a tunnel. Awareness has indicated this was strictly an imaginary trip this entity was taking, but through dimensions of the inner earth. That he was in a position where he could see what was actually happening in the inner earth, and he described it and didn't like it. Is this correct?

#### COSMIC AWARENESS:

This Awareness indicates this as correct in relation to the astral experience the entity was perceiving. This Awareness indicates that in another sense, the earth was a symbolic replica of the entity's own body; and the entity's consciousness, rather than leaving the entity through the crown chakra and moving into Celestria, the entity's consciousness slipped down the spinal column, which was the shaft, and moved toward the lower kundalini fires within the entity's body, and the entity experienced great distress at those energies which it observed in the process. This Awareness indicates that this also had its reality levels in astral experiences, for indeed there are in the astral planes those experiences and levels of consciousness wherein entities gather for such unholly purposes as tormenting each other.

This Awareness indicates that entities only move toward those vibrations which they are attracted toward. This Awareness wishes again to repeat something which has been given previously in a different context: That the physical realm polarities are different from the spiritual realm polarities.

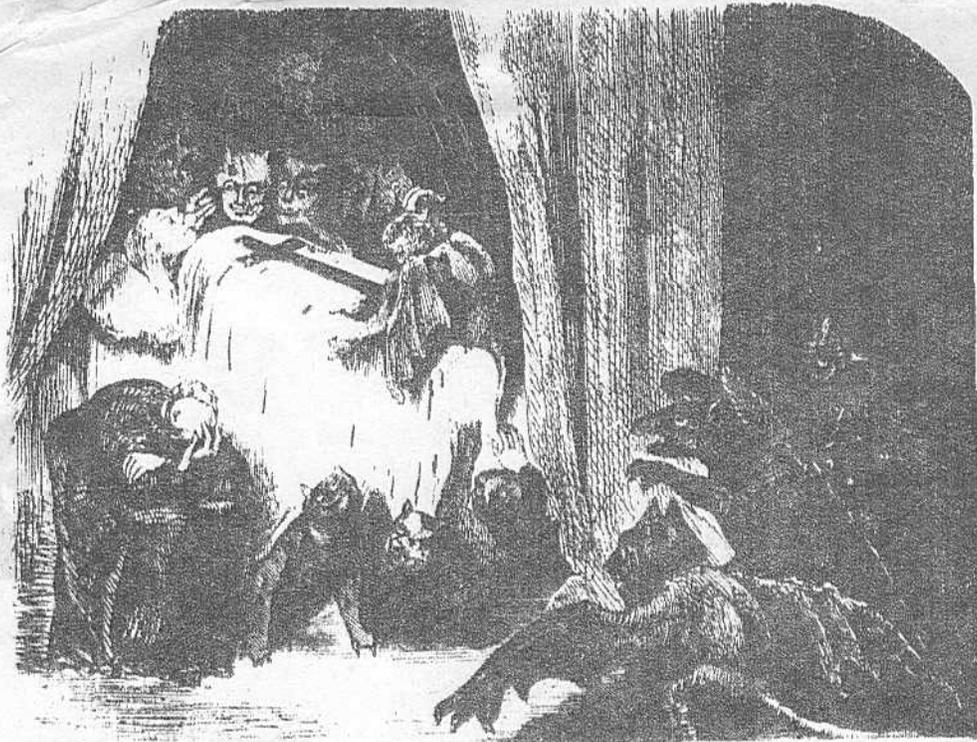

The prideful are broken on the wheel

The lustful are smothered in fire

The slothful are thrown into the snakepits

That on the physical plane, opposites attract. This Awareness indicates on the astral and anti-matter plane, like forces attract. Therefore, when entities leave their body in death, they move automatically toward that which is of their own vibratory rate. This Awareness suggests if entities are filled with hostility and hatred, they are drawn to hostility and hatred. If entities are filled with love and concepts of unity, they are drawn to those forces of love and unity. If entities are filled with guilts and self-judgment, they are drawn to areas wherein they can be judged and punished for those guilts, according to their needs. This Awareness hopes this clarifies, so that entities may understand the need for working out their own self-image, their own attitudes toward themselves and others.

#### HELL AWAITS ALL SUICIDES

This Awareness indicates also that entities who commit suicide, whether directly, indirectly, voluntarily, or involuntarily, through mishap or accident, or whether through long illness or sudden decisions to commit suicide, that this *does not* relieve the entity from the vibrations which the entity feels, and those vibrations after death will simply draw the entity into those same energies for further work that the entity must then deal with, even without the physical body. This Awareness indicates that should an entity find himself in hell, whether in this physical experience or in an astral experience, the entity needs only to change the vibration, which is changed from the attitude level. The entity needs only to change the attitude and the vibrations will change. And with proper attitude and a heightening of vibration, wherein the entity emanates love, the entity will discover himself being lifted out of those lower regions into higher levels.

This Awareness suggests that if you cannot find room to love another entity, love a flower or love a portion of yourself, or love a spot on the wall, or anything at all; and you will lift that much into higher realms and be removed that much from the punishments of hell, Hades, or whatever level you are experiencing.

This Awareness indicates that as there is longitude, latitude and altitude in the three-dimensional levels: Attitude is that which lifts the soul from the lower vibratory rates toward the higher vibratory rates; and attitudes toward love, levitate; while attitudes of separateness and hatred sink. The gravity and seriousness in attitudes allows the entity to sink into deeper levels; whereas the levity, love and enlightenment allow the entity to rise.

This Awareness indicates that occasionally it is necessary to become heavy, to sink, to become serious and grave in order to rescue that part of consciousness which is in those lower realms whereby you may pull part of yourself up, or whereby you may lift others up by getting into those heavy levels, those serious levels, those grave levels, those levels of gravity and heavy concerns, long enough to tap into the vibratory rate of such entities or of your own portion which is caught in those lower levels to allow you to free that portion of consciousness and rise with it into higher levels, higher attitudes, higher vibrations of love, levity, enlightenment, joy and harmony.

This Awareness indicates the Cosmic Entity, the space Wanderer, the Voyager, the Celestial Emissary, is capable of walking into the lowest regions of hell, throughout the realms of Hades, into those most abominable places, taking on the sins of others, and walking back into realms of Celestria and discarding all of the scars from the experience.

This Awareness indicates hell has nothing which entities need fear, but is created for entities to experience if they wish to experience pain, have some type of fear, or if they wish to indulge in suffering to alleviate their guilt at having hurt others rather than taking the action of serving others in repayment for the harm done.

(Emphasis is by the editor)

## HELL--SUPPOSE IT'S TRUE AFTER ALL?

( "Hell no, we won't go!" )

### QUESTION:

One final question in relation to this. The entity described earlier as going down this tunnel and was brought back to life. Had this entity not been brought back to life, would he have lost his opportunity to face the White Light of Realization that Awareness has referred to in previous readings?

### COSMIC AWARENESS:

This Awareness indicates this entity as essentially on the subjective level, requested to move into those realms to see for himself. The entity as one who believes in hell, yet could not consciously accept that belief which had been programmed into his subjective or unconscious mind. This Awareness suggests that the entity, in having moved into and experiencing this on the subjective or subconscious levels in the astral experience, then returned satisfied that there indeed *was* such a place which he did not wish to attend. This Awareness suggests that had the entity died in the process, (which was not in the script for this entity), the entity would have spent some time in that realm, until the entity was satisfied that he had repaid any debt to others through suffering himself.

This Awareness indicates that suffering as being the slowest way to repay or to learn the lessons which life gives. That wherein an entity enters into a period of suffering, the entity may wallow in that pain for much time without learning the lesson, simply being angry and hostile toward others for his or her own suffering experiences.

This Awareness indicates that a much faster growth and development comes when the entity begins to give service, to repay for any harm which the entity may have done others. This Awareness indicates that an even faster rate of growth is obtained through alchemy of changing consciousness, changing attitudes; and the fastest change in attitudes is through the action of loving without binding anyone to your love, loving in a way that frees others, giving love simply because you love.

This Awareness indicates this as very difficult for entities who are used to controlling others and are seeking something for themselves through the energies or love of others, for most entities of this nature in attempting to give love, usually conceal barbs and hooks in their love and pass this love off in an effort to hook another and use their energies or sap their vitality, or devour their being. Therefore, these entities often find themselves working their development out through service or through suffering.

\*\*\*\*\*

### ED's Note:

For more information on hell and Celestria, please refer to 'Revelations of Awareness' No. 78-19 (The Immortal Realm of Hades);\$2.00; Also No. 78-35 (Sex life in Celestria);\$2.00 from C.A.C.

For more information on hell in relation to the suicide, please refer to No. 79-28 (Suicide);\$4.00.
