( Helping people become aware )

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

How much are you contributing  
to the Dark Forces

#### YOUR MAIN CONCERN SHOULD BE PERSONAL GROWTH

( Planet earth not intended as a 'resort area' for entities )

#### COSMIC AWARENESS:

This Awareness indicates that along with the messages given by this Awareness in relation to current events and personal affairs, this Awareness wishes to remind entities that the greater concern, even more important than personal needs and personal security in these changing times, is your personal growth and development. This Awareness indicates that while *It* gives much information in regard to lessening the sorrow, suffering and tragedy on this plane and in attempting to assist entities to learn what can be learned, to understand the various interactions of energies upon this plane which create the tragedies and difficulties; this Awareness wishes to remind entities that they are here in part, if not in total, to learn what can be learned in terms of personal growth and development.

This Awareness indicates this plane has not been considered as a resort area in the universe, wherein entities were supposed to enjoy themselves. This is a planet on which entities have been placed for lessons which can be learned, or have volunteered to help bring about more harmonious situations, assisting in the learning of such lessons as will bring about greater harmony for the inhabitants.

This Awareness indicates that therefore, the important point to keep in mind is not simply to listen for information that can be used for your advantage, but rather to discover how much you have contributed, how much you contribute to the Dark Forces of this planet, and how you can reduce the amount of contribution, while still surviving in your present existence.

This Awareness indicates that it must first be recognized that everyone upon this planet, in one way or another, to one degree or another, contributes somewhat to the problems which are prevalent upon this planet. This Awareness indicates that even in giving good service, entities may serve those who are causing problems, and in this manner, may be assisting in the problems. This Awareness indicates this however, can also be a part of the solution, whereby entities do not make such distinctions as to who is served and who isn't, for wherein an entity begins to attempt the discrimination of who is right, and who is wrong, who should be served, and who should be denied service; such actions often lead to even greater problems.

This Awareness indicates therefore, the question is not one of judgment or discernment in terms of what one should deny or what one should refuse to another, but rather a question of: *How much and in what way am I contributing to the general force that is creating problems upon this plane?*

This Awareness indicates that there are some entities who contribute because of circumstances; they work at a particular job which makes some small insignificant-looking part, which may in turn be a key part for a weapon of great destruction, which in turn may eventually

destroy multitudes; or they work in some circumstance whereby they assist in the production of food which serves the general population, but also serves those who are of a destructive nature. This Awareness indicates that these entities, by circumstance of their occupation may be contributing to the Alien Force on this planet, and it may be impossible for them not to.

This Awareness indicates there is another class however, who contribute by choice, not simply by circumstances nor by ignorance of the ramifications of their contribution, but rather they choose to do this particular type of work because they are competitive in nature and seek to gain power over others and be on the winning side, the side which has the greater power, and which is capable and willing to destroy others in order to maintain, gain, or hold that power. This Awareness indicates that this group as working in a greater degree of contribution to the Alien Forces.

This Awareness indicates that those who are serving in occupations which give humanitarian services, such as the feeding of others, the caring and nursing of others, such as medical attention to the needy, wherein this is given in proper motivation and methods, wherein entities involved in educating and assisting others to grow and develop their skills, talents, techniques and abilities to improve their lives; these humanitarian efforts are those which contribute *least* to the Alien Forces, and *most* to the Forces of Light.

This Awareness indicates that wherein entities wish to take stock of their activities and look carefully and ask themselves: *'How can I contribute more to the Forces of Light, to the humanitarian projects and activities, and less to those activities which are destructive and harmful to others?'*; this Awareness indicates when an entity begins to look at this and ask these questions, that entity is in the process of growing and developing in his or her soul growth.

This Awareness indicates that this is an action which is the purpose, and most meaningful upon this plane, whereby entities grow and develop themselves to be more sensitive, more aware, more spiritually oriented, and entities being more inclined towards humanitarian activities.

This Awareness indicates this as a movement away from gross materialism, greed and power-seeking. This Awareness wishes entities to recognize that this is the important, *the more important* concern; that this concern should be given greater significance *than concern for survival* during difficult times, or for the quality of survival. This Awareness indicates that the *quality* of life is that which is of greater importance, but wherein this quality of life depends on the denial of such quality to others, this then is an action which does not serve the Forces of Light.

This Awareness indicates the Forces of Light require that *all* benefit from an action, and the quality of those involved and their life-style, the *quality* of life is that which is enhanced by such action. This Awareness indicates that the sacrifice of one or a few for the many, or the sacrifice of many for the one, is not an action which is satisfactory to the Forces of Light.

**THE FRUSTRATION OF MANY C.A.C. MEMBERS FOR BEING THE CUTTING EDGE OF CONSCIOUSNESS:**

More on the purpose of the Awareness messages; more on predictions

**QUESTION:**

It's probably appropriate at this point to ask to read an excerpt from a letter sent by C.M. of Republic, Washington, which is indicative of the type of frustration a lot of entities are feeling, and although Awareness has covered most of these topics in the past, there might be some new information *It* might give along this line in view of the current situation.

He says: "The Global 2000 plan is shocking, but just a logical extension of the Trilateral Beast plan. I can see how power would tempt people to try this. However, I don't know what I can do about it, so I suppose I'll just go to work and pay the bills. Look, none of my friends, including my wife, believe me about the Electronic Funds Transfer System, not to mention UFOs and Robotoids, and what sleepers are going to believe they should give up beef, not for any of the other good reasons, but that the Powers That Be have poisoned it? What can anybody do? Can you imagine the reaction that even a well-written letter to the editor would bring?"

All my life, my friends were people who merely tolerated me for the far out ideas I presented. It seems that Awareness is subtly suggesting that until the masses wake up, you better head for the hills and plant a garden.

Sure, it sounds like the same old cop-out, but you already said the presidential elections are a farce, so other than supporting the few honest people at the local level, what is there to do? I believe Awareness advised another frustrated crusader to essentially shut-up, until you are asked for opinions. I've slowly learned to follow this advice on my own, so until somebody asks me about Robotoids and so forth, I'll just do my daily duties and try to keep an open mind.

Speaking of open minds, I am increasingly finding it hard to take you guys seriously. For instance, I started with C.A.C. just as the *Gathering Storm* material came out. I found it fascinating and quite probable. I spread the word as delicately as I could. No one believed me, and why should they? The bombs didn't fall, the dollar didn't crash, and then Awareness says it wasn't supposed to happen. Oh, really! So now Awareness tells me about a plan to poison us, and there's very damn little any individual humans can do! How cranked up am I supposed to get about a far-away plan, and besides, how does anybody know that Awareness isn't just 'calling wolf' to the planet earth? Don't get me wrong, I'm not about to cancel C.A.C. and take up *Reader's Digest*. Not yet anyway. Enclosed is my renewal."

I wonder if Awareness could respond to entities like this who are frustrated about plans like Global 2000, and give them perhaps some specifics on what they actually could do about these situations.

## COSMIC AWARENESS:

This Awareness indicates that the purpose of these messages is not simply to create a group of fanatics who are out shouting doomsday messages at their friends and associates. This Awareness indicates that this is not the purpose, nor is it desirable. This Awareness indicates that the purpose of these messages is to allow entities to *become aware*. Those who do not wish to become aware, need not become aware. This Awareness indicates that wherein entities show an inclination, show a quest for deeper understanding, these are the entities who may wish to ask questions, and who you may share messages with.

This Awareness indicates that *It* does not intend to supply answers to every question which are to be exact in every way, but rather to give general directions and general indications. This Awareness wishes you to understand that *It* is reading energies which give indications, *not facts*. This Awareness indicates the fact is the facial, or the actualization of indications that *may* develop from energies which are seen. This Awareness indicates that *It* did not indicate that the 'crash of '79' was not supposed to happen, rather, *It* indicated that the way in which entities perceived the message was not correct in that it actually occurred, although entities have not, in many cases, seen how the crash of '79 has had its effect on present trends.

This Awareness wishes you to look at the graphs and see where this began, and you will discover that during this time there were the activities which served as a trigger for *all that has happened since*. This Awareness indicates that entities tend to think in terms of compartments, whereby a prediction or indication is given of a scenario which is to be started at a particular time. This Awareness indicates that *It* indicated to entities that the 50th anniversary of the Great Depression was to be the time whereby these energies would be triggered for a greater problem. This Awareness indicates that you may wish to examine history, and discover that the Great Depression did not simply crash like a roof falling in, but rather caved in slowly, timer after timber, over a period of years until reaching its deepest effect in and around the years of 1932 and 1933.

This Awareness indicates that likewise, the crash of '79 did not suddenly occur on the 50th anniversary of the stock market crash of '29, but rather, certain energies which were triggered during that time period began having their effects similar to that of dominoes, knocking over one thing after another until reaching the point wherein at present time, the depression is being seen for what it is. This Awareness indicates that these energies of such magnitude wherein entire societies are rolled over, do not occur in the split-second timing which individuals often like to assume.

This Awareness indicates that in terms of the various uncertainties regarding things which cannot be proven, such as Robotoids, such as the Global 2000; this Awareness suggests that if these concepts bother you, do not give such significance to them, but put them on the back shelf of your mind and simply watch events as they pass, and ask yourself as time passes, whether these events are adding to the credibility of this information, or if these events are detracting from that credibility.

This Awareness indicates that all things can alter and change. This Awareness often gives plans and entities often consider these plans as predictions. This Awareness indicates that the *plan of Global 2000 is not intended to be a prognostication*, such as often is interpreted by entities in looking at messages. This Awareness indicates it *can* be a prediction, it *can* be a prognostication, but is in fact a *description* of a plan *which may or may not* develop. This Awareness indicates the same is true of aspects of the *Book of Revelation*, or any other prognostication, for all of these are but descriptions of archetypal energies, movements and concepts, or what may be termed "plans".

This Awareness indicates these plans may be promoted by the one who describes the plan, or may be exposed by someone who is describing the plan to others. This Awareness indicates that it *IS* frustrating to be the cutting edge of consciousness, and entities within the C.A.C. movement, and entities in these areas and conceptual levels of awareness *ARE* the cutting edge of consciousness. This Awareness asks you: How would it feel to be the point of a scalpal which must cut into the flesh of a loved one? This Awareness indicates that obviously, it is not a position to be envied, but may be a position of necessity if an operation is necessary.

This Awareness indicates that to be the cutting edge of consciousness requires that entities not have the stability and certainty of routine, and absolute understanding based on tradition, but rather that entities be adventurous, and conceive ideas which may be unusual, strange and eccentric in relation to others. This Awareness indicates that the distinction between insanity and eccentricity in ideas is that with insanity, the idea springs from *nothing* and has no logical connection to anything, nor is it even plausible. This Awareness indicates that with concepts which are plausible, even though erroneous, the entity is not insane.

This Awareness indicates that entities may have bad judgment, may have false answers, may have erroneous information, yet not be insane. This Awareness suggests therefore, you not equate these concepts with insanity, but rather that you look to see whether there is any true connections between reality and the concepts presented, and discover the information on which such eccentric concepts may be based. This Awareness suggests that it is unnecessary for an entity to sort out and attempt to prove or disprove every concept, for it would be totally impossible to do so. This Awareness suggests however, that it *is* practical, although sometimes it appears to be unusual, for entities to listen to every possible idea, and without judgment of that idea, place it into the boiling pot of ideas, (this may be likened unto the concept of brainstorming) and allow this to enter into the pot, stir the pot, and from this pot of many various ideas, be willing from time to time to reach in and try out an idea, as a standard of measurement in attempting to understand current events, things which are occurring.

This Awareness indicates that also, it is frustrating for entities not to have acceptance of their personal ideas or opinions, particularly wherein one has studied deeply and is convinced of some concept, or the plausibility of the concept. This Awareness indicates that

it becomes frustrating when others appear to be totally ignorant of that which you have looked at deeply, and when these entities, slightly and flippantly, throw off the meaning as though it were totally erroneous, without further examination.

This Awareness reminds you that all of these changes in consciousness, particularly among the lower classed consciousness levels; (this Awareness indicates this in reference to the dull consciousness levels which are involved mainly in following traditional thoughts and relying on programmers in society who reinforce the traditions they have received through previous programmings)...this Awareness indicates that these entities *do* change, *do* awaken quite slowly. This Awareness reminds you that it has taken approximately 40 years for entities to begin to believe in the possibility of "flying saucers", even though these were described in 1948 by credible witnesses. This Awareness indicates that now the percentage of believers has outstripped the non-believers and the believers are in majority. This Awareness indicates however, that for many years, these believers were seen as lunatic-fringe entities and were ridiculed by their associates and friends and were seen as being somewhat eccentric if not completely loony.

This Awareness indicates that ridicules were not simply on a personal level, but were leveled at them in radio and press also. This Awareness indicates that likewise, the early environmentalists, and even today these entities are receiving extreme criticism and the movement grows slowly. This Awareness indicates however, there is that which is the gradual awakening. This Awareness indicates that entities often do not like being awakened from an ignorance or a stupor; they prefer their dream, even though the dream may be false. This Awareness indicates that some entities even prefer their nightmare, even though the nightmare may be nothing but illusion.

This Awareness indicates that therefore, you will find much resistance to any form of enlightenment or information that awakens or causes entities to forego their dream pattern, their illusion of the world of reality. This Awareness indicates that there is no solution to how you may avoid such frustration of being on the cutting edge of consciousness, but it may be of some significance and of some consolation to you to recognize that this is not unique to this organization, to these messages, to these times, to these situations, or to these civilizations.

This Awareness indicates that in *all* things, those who are the forerunners of new concepts, ideas or activities, are often the brunt of criticism. This Awareness indicates this (also) applies not simply to areas of psychic, political or philosophical research, but also in artistic expressions, in social expressions and in all other endeavors of human expressions.

This Awareness indicates that the early pioneers of flight were ridiculed by onlookers, laughed at for their crazy contraptions, the same with the automobile, the same with the efforts to create uses from electricity, but these entities failed to break before the criticism of the masses, and went on to prove that greater things could be done, and in this determination, and in their own awareness of the reality of what they were doing, these entities altered the belief patterns and traditional thinking of the masses. This Awareness indicates that

these things *do* take time. That entities may often ridicule to save their own face, and to protect their own concepts, but the message may lie sprouting in the back of their mind while being examined in quiet, being looked at carefully, out of the public eye, wondering at what you said, and wondering quietly if it could be so.

This Awareness indicates these seeds which are planted, which raise questions, are the seeds which ten or twenty years later, are being printed in papers or shouted in the pulpit. This Awareness indicates that ideas always begin small, and with much scrutiny, and often are rejected, until they have forced their way onto the marketplace of concepts, whereby entities begin to look more carefully and examine their usefulness in applying them to the scheme of things.

This Awareness suggests that you not become discouraged that others do not accept as quickly as you may have accepted these concepts, but rather that you examine carefully the concepts, ask yourself: "Am I growing and learning anything from this? Or am I demanding these concepts serve me, to make me more important to my friends?" This Awareness indicates that many entities who receive messages from this Awareness misuse these messages, attempting to become important to the associates by relaying information which appears to be valuable to the entity and often the purpose being to create an interest for yourself and your ideas. This Awareness indicates that it is generally this type of action which leads to the more serious difficulties that entities have between themselves and their friends in regard to the Awareness material.

This Awareness indicates that many entities seeking to create a particular face by using the material, often *lose face* when the material does not measure completely to the presumed statements that others interpret from these messages. This Awareness indicates that many entities do not follow these messages far enough to recognize the scope and purpose and meaning and effect of these messages, but simply take one or two messages out of context and examine that in light of what they perceive, and discard the message as being of no validity, or of little significance.

This Awareness indicates that such concerns and such critics are of little concern to this Awareness, for it is quite common that entities examine things very briefly, and without in-depth study make snap-judgment of the total. This Awareness indicates that there are many problems which entities will encounter from reading and sharing messages from this Awareness. This Awareness indicates there are many problems which entities will encounter from *not reading and not sharing* messages from this Awareness. This Awareness ask you whether you would prefer to have the problems of not having these messages or of having these messages and dealing with them? This Awareness indicates this as an individual concern and for each to consider.

**ED's Note:**

This last question presented by Awareness to the members of C.A.C. really gets to the heart of the matter. Each month, many entities respond to our advertisements, join C.A.C. for a minimum of three months and then drop out. During this time, they order a few backissues which appeal to some interest (usually selfish) like health or finances, then get blown out by some particular rap Awareness gives, such as confirming certain of Dr. Beter's alarming (and often far-out) revelations about the conspiracy now occurring behind the scenes. Many admit they do not wish to know about these things, even IF they are true. They prefer to drop out and go back to sleep. However, after a year or two goes by, many of these entities who dropped out, later resume their membership and hungrily devour the material they had missed. (Something had occurred during this absence to make some changes in their head).

Fortunately, there is a good 'hard-core' of entities in C.A.C. who have been here since the beginning, and nothing seems to blow them out, even though many will often write some pretting stinging letters about one thing or another. It is this 'hard-core' of entities who have done, and are continuing to do, the magic, the transmuting of those energies which have forced the Beast into retreat, and which will, eventually, bring about a lasting peace upon this planet.

**TIME NOW TO STOP  
SOUNDING THE ALARM**

**AND FOCUS ON THE IDEA  
AND CONCEPT**

....RECONCILIATION OF DIFFERENCES,  
FOR EXAMPLE.

**QUESTION:**

Awareness, recently the Interpreter was wondering and discussing what role C.A.C. and the Aquarian Church now have, or will have in the coming months, in relation to the possible scenarios that could occur. Now that most of the heavy material has been given by Awareness, the Interpreter was wondering what exactly the role could be. Could Awareness give us some information on that? Is it the transmutation action as previously indicated?

**COSMIC AWARENESS:**

This Awareness indicates this in the affirmative. This Awareness indicates that prior to the storm, it is necessary that entities warn others of the impending danger. This Awareness indicates once the danger is seen by all, it no longer is important to continue speaking of the danger. This Awareness indicates that only the few who are mindless can fail at this time to see that the dangers are upon you. This Awareness indicates that the recession is now a depression, and the threat of war is now imminent and the potential for war grows greater and is no longer hidden in underground papers or in discussions in secret. This Awareness indicates the dangers of war now are on the front pages of your papers, are now on your television sets.

This Awareness indicates that prior to this time, these concepts were *unthinkable* and were not discussed except in secret. This Awareness indicates that now the depression is here and entities are feeling this more and more and the crash is happening and the energies are falling daily. This Awareness indicates that it now is important not to continue warning or pointing fingers of blame, or saying who is doing it, it is now important that entities focus on those actions and energies which can bring forth a balance, a harmony, bringing forth the new beginning, a new dawning. This Awareness indicates that to transmute these energies is not an easy matter when dealing with matter itself.

This Awareness indicates however, that you can transmute these energies by going to that which is anti-matter, or non-material, by going to that which is the concept, the idea, and by focusing on ideas and leading energies toward these ideas. This Awareness indicates that by moving toward the idea, matter follows. This Awareness suggests that in the future months, this Awareness shall present concepts and ideas which entities may focus upon and whereby matter shall follow and the alchemical forces shall begin to create effects that assist in bringing forth harmony.

## HOW TED KENNEDY WAS FRAMED ...CHAPPAQUIDDICK MYSTERY ENDS

### QUESTION:

A.P. of the Philadelphia SPIRAL sent out a publication some time ago with an interesting article I'd like to read to Awareness. It's from the Energy News Digest of June, 1980, and it's called "Kennedy Was Framed."

"A long time political assassination researcher is claiming that the tragedy at Chappaquiddick could well be the biggest cover-up of them all. Robert Cutler of Manchester, Massachusetts, says his 10 year study of the accident at Chappaquiddick has convinced him that Senator Edward Kennedy was framed in that accident. Cutler contends that Kennedy was not even in the car that night it was driven off the bridge carrying Mary Jo Kopekne to her death.

'Cutler asserts that on the night of the tragedy, Kennedy was drugged and kidnapped by a group of conspirators with CIA connections, a group that was out to destroy his chances of ever becoming President. He alleges that Kopekne was murdered when the Senator's car was deliberately driven off the bridge, and even that a Ted Kennedy look-alike was used to implicate the Senator. It is Cutler's theory that the conspirators chose to discredit rather than murder Ted Kennedy because the American people would have been deeply suspicious of a third Kennedy assassination by a 'lone nut'.

'As for the Senator himself, why hasn't he spoken up? Cutler says Kennedy knows that he was framed, but that the Senator fears that either he or his family will be seriously harmed if he tells what he really knows to the American people.'  
(End of article).

### COSMIC AWARENESS:

This Awareness indicates that *It* previously gave a message indicating this scenario as being accurate. This Awareness indicates this appears to have been in 1975 that a question of a similar nature was asked. This Awareness indicates that the scenario as that which is essentially accurate in that the entity Ted Kennedy was given the alternative of either going along with this frame-up, or finding himself assassinated. This Awareness indicates the purpose was that which is known as the political assassination so that this entity would never be allowed to gain any kind of power equal to that of his brothers.

This Awareness indicates that this relates back to the efforts of John and Robert Kennedy in their attempts to break connections that Joseph Kennedy, their father, had with the entity Onassis, in relation to underworld activities; that as long as their father was alive, these entities--John, Robert and Ted--were unable to confront the syndicate crime world, but once their father had died, these entities chose to go after the mafia, and the underworld connection and network that had formed and which controlled much of the nation. This Awareness indicates that the entities became the target for the assassination which resulted in the essential destruction of the Kennedy clan.

This Awareness indicates that Ted Kennedy as having become a victim of psychological and political assassination. This Awareness indicates this entity as being controlled by these forces.

### A TIME TO DIVERSIFY YOUR ENERGIES

( U.S. ECONOMY CAN GO EITHER WAY )

( Opening Message, C.A.C. General Reading )

February 13, 1982

### COSMIC AWARENESS:

This Awareness indicates that there are many energies in motion which do not flow in the same general direction. This Awareness indicates that these energies tending to be in conflict and moving toward one another in a manner that conflict could follow in the event that these energies do not align themselves properly. This Awareness indicates however, there is always that possibility whereby a force can enter in, which creates a current or stream in consciousness that assists in aligning these energies by deflecting them so that they move in a general direction, parallel to each other, rather than in conflict to one another.

This Awareness indicates this is in reference to energies which are in motion in terms of political, economic, international relations and social conditions. This Awareness indicates that these energies also are being affected by changes in astrological conditions and in effects of technology on the natural forces and energies of this earth plane. This Awareness indicates that as the artificial manipulation by man comes in conflict with the natural manipulations of universal forces, such as planets and energy currents of the universe, these energies become more difficult to manage or to interpret, except when combining and when interpreting both the artificial, or man-made currents of energies, along with the cosmic currents, the astrological currents of energies.

This Awareness indicates that because of these conflicts, it is necessary that entities be more pliable, more capable of moving in various directions as necessary. This Awareness indicates that the key word for the present era is to be diversified, or capable of relying on something else, if this particular thing does not work. This Awareness indicates that by diversifying your energies, diversifying your securities, you have a greater chance of succeeding in your actions and in your purposes.

This Awareness indicates that it appears that the economy as that which is heading for what may be called a cross-road, and it will either improve sharply, or will decline sharply; depending on the direction, the weight of energy follows. This Awareness indicates at this particular time it is not clear as to which direction these energies shall go.

## WILL EL SALVADOR BE ANOTHER VIETNAM?

( WHAT IS REALLY NEEDED TO DETER WAR )

### QUESTION:

Would Awareness indicate whether this trend that is now growing by our government, of sending advisors to El Salvador, and starting to inform the public that probably we will eventually have to send troops and so forth; does it look to Awareness like this situation is going to turn into another Vietnam, along with all its problems and repercussions that will occur at home?

### COSMIC AWARENESS:

This Awareness indicates that this appears to be an action which is reflective of the Vietnam situation of the sixties and early seventies, wherein it is a shift of energies so that in this particular instance the energies are believed to be more in favor of the United States than as occurred in Vietnam. This Awareness indicates you will notice that the supporters in Vietnam were China and Russia and North Vietnam, with the United States and its allies coming from great distances to fight a war in an area that was difficult to supply.

This Awareness indicates in this present situation, the United States is closer, and the opposing forces are located generally at greater distances, having more difficulty in the supply lines, similar to that which the United States experienced in the Vietnam conflict. This Awareness indicates essentially there are those who believe that the El Salvador situation as that which will be the Vietnam for Russia and its allies. This Awareness indicates that there appear to be entities who have specialized to such degree in the direction of military, political, and industrialization complex, that these forces believe they have the answers through these energies for stabilizing the world and its various conflicts.

This Awareness indicates that these entities believing in the power of military confrontation as a solution to problems, are willing to risk the rest of humanity in order to prove their point. This Awareness indicates no other facet of humanity is so presumptuous. This Awareness indicates that there are specialists in various facets of human life, each having its own speciality: the legal profession, the medical profession, the political profession, the scholastics profession, the construction profession, the farming and agricultural profession, the manufacturing profession; all of these have their own specialists, and do have intense and very focused purposes in terms of specialized fields. This Awareness indicates the sociologists, the psychiatrists, the religionists, all of these areas may become extremely focused to the point of being blinded to all else, yet none of these, no matter how fanatic and focused; in themselves are a threat to the rest of humanity, to the degree

that the military forces when mingled with political and economic goals can be.

This Awareness indicates that these entities fail to appreciate the expressions in other facets of humanity, seeing their own role and purposes as being of such significance that all else fades in comparison. This Awareness indicates these entities often focusing so completely on the military and political aspects of a situation that they are like children playing with electronic games, failing to see anything that occurs around them, seeing only the immediate purpose within the small frame-work of the game. This Awareness indicates these entities looking in terms of the game-playing, the war games, do not comprehend what they are doing and how dangerous they have become to humanity itself.

This Awareness indicates that these various areas, heating up in terms of military confrontations, in terms of social unrest, these are the prelude to a greater explosive occurrence which is building and will imminently follow unless entities can foresee the dangers and warn others and reconcile these energies so that the focus toward war does not continue.

This Awareness suggests that when focusing upon a goal, whether entities like the goal or not, the focus remains steady, with or without approval.

This Awareness indicates that wherein entities can turn the focus in different directions, this becomes a greater way of dissipating that force than continuing to focus and approve or disapprove. This Awareness suggests therefore, that rather than simply giving disapproval for activities which are leading toward war, it is more beneficial and effective to focus on activities which lead toward peace. This Awareness suggests that entities should spend more time focusing on actions that promote negotiation and conflict resolution rather than crying out against potential war and warning about the dangers of war.

This Awareness indicates that whereas these warnings are important, they still add to the focus, and when the entities who are focusing upon war give forth arguments that to deter war we need greater strength, greater force, greater power, this Awareness indicates that such focus on war then is not deterring the war, but simply adding to it. This Awareness suggests that the focus may be changed to read: *To deter war we need greater power of negotiation, greater communication, greater understanding.*

This Awareness suggests that these are the weapons that can deter war, that the greater hardware and missiles are not deterrents, they are only greater weaponry which can be used to intimidate for a period, causing some slight delay in the triggering mechanism. This Awareness indicates the entire triggering mechanism can only be defused when the causes, the fears and the purposes of war are discussed, reconciled and placed aside.

## THE NATIONAL PEACE ACADEMY --

### SHOULD THE COLLEGE IN YORK LINK UP?

#### QUESTION:

There's a lot of publicity being circulated now by the National Peace Academy campaign out of Washington, D.C. It appears that this proposal for a Peace Academy which was submitted to President Carter has now been investigated by various members of these committees and they're about ready to bring it before the Congress, and they're circulating information to millions of people now to support this with letters and with monies to have it brought into being.

Many members have sent in this identical literature that A.W. also sent in, but I'll ask his question. He would like to know; (he put forth a long statement about the Peace College in York), "Is my surmise correct that the York Peace College effort would benefit greatly by linking its energies with those of the National Academy of Peace and Conflict Resolution now going forward in Washington, D.C.?"

#### COSMIC AWARENESS:

This Awareness indicates that this already has its link within the concept. This Awareness indicates that in terms of legal or in terms of other links, this can be flexible, may be something which could be worked out at a present, or future time, depending on entities' desires. This Awareness indicates however, that there are many difficulties in pursuing this type of link, in terms of those organizations. This Awareness indicates that it appears this action is best accomplished by allowing energies to be moved spontaneously and without efforts to manipulate or control.

This Awareness indicates that there are forces in movement that follow concepts, and the concept of peace as that which is now gaining momentum; this in terms of the Peace Institute, or institutes of peace. This Awareness indicates that in understanding what has occurred, it is important that entities recognize the various levels whereby things are brought into manifestation.

This Awareness has previously given information relating to the Cabala, the Four Worlds; the Fire, Water, Air and Earth principles, or that which is Radiance, Magnetism, Relativity and Stability. This Awareness indicates that the National Academy for Peace as that which is coming into existence on the social and rational level. This Awareness indicates this being particularly settled in academic energies, these of the mind. This as being associated with the element of air.

This Awareness indicates the Peace College as promoted in York, as that which was designed primarily as a spiritual force or energy, this giving forth ideals or models, being that on the level of Radiance or Fire, the concept of expanding peace institutions throughout the world, the concept of spreading peace procedures and conflict resolution principles throughout all teachings, throughout various places and countries, throughout the world.

This Awareness indicates this college being more in the abstract or idea realm, as that which is much slower in manifesting, serving more as an ideal, whereas the physical manifestation presented by the National Peace Institute, having social backing from academic and political forces, as that which appears to be manifesting more quickly. This Awareness indicates that in many instances, this kind of manifestation will be seen, whereas concepts and ideas occur on one level and actuality occurs on another.

This Awareness indicates that the energies are compatible, but on different levels and requiring different applications and dedications. This Awareness indicates that it is much better that large numbers of entities can become involved in promoting concepts of peace, and that the concept be spread as far and as wide as is possible. This Awareness indicates that there is the next step in terms of manifesting this concept upon this plane which bring about the action that ties these energies together. This Awareness will reveal this step only after it has been taken.

## WILL AN ALMOND A DAY

### KEEP CANCER AWAY?

#### QUESTION:

Member K.K. asks: "In the Edgar Cayce readings, it is stated that if one eats several almonds a day, he need never fear cancer or tumors. Was Cayce referring to the bitter almond found in the center of apricot pits, or to the sweet almond; and how long of a period of time must these be eaten before they become effective in the system in preventing cancer?"

#### COSMIC AWARENESS:

This Awareness indicates that both these as containing the substance commonly known as laetrile. This Awareness indicates that these as being beneficial in cancer prevention. This Awareness suggests that the continued use of these as sufficient as a kind of protection; that timing or waiting periods as not a concern in this. This Awareness indicates that essentially, these being taken similar to that of a vitamin, whereby the system has this substance in it as that which can be most beneficial as a prevention of this disease.

This Awareness indicates however, that this not being absolutely infallible as a protection from this disease. This Awareness indicates there are certain ways whereby this disease could infect a body if the causes are strong enough to outweigh the preventive medicine. This Awareness indicates that whereby entities abuse their bodies through excessive actions which cause or contribute greatly to cancer, such as the death wish, the excessive use of tobaccos, the pollutants such as asbestos and other particles being taken into the system which contributes to cancer-causing conditions, the foods or food additives which are commonly associated with cancer-causing conditions, and whereby entities fail to clean the system, ridding the system of toxins and poisons,--even the use of almonds may not prevent the disease.

This Awareness indicates however, that this can be a barrier against the disease. This is similar to the saying, "an apple a day keeps the doctor away." This Awareness indicates that to some extent, an apple a day can keep the doctor away, as far as those diseases which are the result of deficiencies which would result if the apple were not eaten, or some other food or fruit were not eaten, to overcome that deficiency. This Awareness indicates that apples as having good effects in terms of assisting entities through the vitamins contained within them and the minerals, and therefore, do assist in a preventive effect to keep the doctor away. This Awareness indicates likewise, the apricot pit or the almond may be beneficial in supplying certain vitamins and substances to keep the cancer away.

#### QUESTION:

If the almonds have been toasted and/or salted, does this take away the medicinal aspect?

#### COSMIC AWARENESS:

This Awareness indicates it appears that this diminishes the effect slightly, but does not remove the effect entirely. This Awareness indicates that this appears to be approximately 25% loss in terms of effectiveness.

### ANXIETY--THE BASIC CONDITION OF HUMANESS

(COSMIC AWARENESS FORGIVES OUR FAILURES)

(Closing Message, Gen. Reading No. 2) June 18, 1981

This Awareness indicates there is much anxiety in the mind, brought on by the basic condition of humaneness, whereby each life seems to be rather short and troublesome, with much suffering, disappointment and uncertainty, with hopes, temporary gratifications and joys, with visions and fears. This Awareness indicates that because of these anxieties, entities often find it difficult to see clearly. This Awareness wishes to express to entities, that many of your failures, the so-called sins, are the results of the conditions in which you live. Therefore; this Awareness does not hold such entities as being fully responsible for every little infraction, but recognizes the difficulty experienced in the human condition, and finds great joy when entities can overcome even a portion of their frustration and the conditionings which create anxiety. This Awareness recognizes the difficulties involved in being human, upon this plane of less than infinite understanding. This Awareness indicates that *It* also wishes to point out the greater picture, whereby entities can see beyond these finite levels, into that which is infinite, beyond the physical plane with all of its frustrations and anxieties.

### DID JESUS REALLY TURN WATER INTO WINE?

MORE ON THE KAHUNA MAGIC & SECRET SCHOOLS

#### QUESTION:

A question from M.B. She would like us to ask Awareness if Jesus turned water to wine, and if so why, and was it white wine?

#### COSMIC AWARENESS:

This Awareness indicates this as a symbolic statement, which after reading the Scorpio Correspondence Lessons on magic, will be better understood. This Awareness indicates that this in reference to mana, which in Polynesian means water, and which in the Kahuna philosophy comes in three different types: the low mana, middle manna, and High Manna. This Awareness indicates in the Scorpio readings on magic, the Sea of Scorpio, you will recall that the middle self is the guest in the house of the animal or lower self, this in reference to the human being,--the middle self being the conscious mind, the lower self being the subconscious; the Super-conscious being that which is the High Self or the Christ Light above, the Father in Heaven.

This Awareness indicates that in the Kahuna philosophy, (Kahuna meaning carpenter or priest, which Jesus was familiar with, being the son of a carpenter and this as a symbolic term and title in this story of the life of the entity Jesus); the entity Jesus symbolizes the conscious mind with the Christ as that Light above which descends and speaks through the entity Jesus. This Awareness indicates that the three mannas are equated to these three selves: the High Self or Christ Light, the middle self or the man Jesus, or the mind which is the conscious level; and the low self or the animal or subconscious level.

This Awareness indicates that the mana of the low self is described in the Polynesian or Kahuna philosophy as being a pool of water. The manna of the middle self is that which is described as a fountain or a squirt. This Awareness indicates this symbolizes manna being moved by mind, by directed conscious energy. The conscious mind moves or squirts or creates a fountain of this energy by focusing the energy of consciousness. The pool of energy, the low mana, hangs about the body as an aura or energy. The conscious mind directs the energy, or the pool of manna, in a squirt or a fountain, directing this energy.

The Superconscious mind takes this energy and transmutes the energy from low vibratory energy into resonating electro-magnetic energy,--a much higher frequency; which descends upon the physical body as showers of light, creating electrifying feelings or energies of bliss and of ecstatic sparkles of energies. This Awareness indicates that this kind of energy is felt wherein entities receive such ecstasy that their hair stands on end, or goose-bumps rise, and the entities feel a great charge of vitality. This Awareness indicates that this as called High Manna, and this is known as the Spirit.

This Awareness indicates now, in looking at the water and the wine and the middle self, Jesus, turning the water or low mana into wine or the spiritual energies; this as an action which becomes more clearly understood in terms of its symbolic meaning.

QUESTION:

Then the 'wine' Jesus was said to have made from water was actually not wine but water. Is that correct?

COSMIC AWARENESS:

This Awareness indicates that the story as that which was symbolic: a message for initiates of the inner circle who were being given in these writings, the coded symbols and messages of the secret philosophy. This Awareness reminds entities that throughout the Gospels there are references to 'those who have ears to hear, let them hear this.' This Awareness indicates that wherein these terms 'He that hath an ear'; this Awareness indicates that these terms being used were intended to inform the inner initiates that there was being expressed in this writing or statement, secret coded symbols that they were to listen to with the inner ear of knowing, knowing the symbolic meaning behind the symbolic words spoken. This Awareness indicates that wherein initiates were given these stories and writings of the esoteric symbols and meanings, they would receive with this the necessary understanding and teachings which were intended by those who were followers of the entity Jesus.

This Awareness indicates that others outside the inner circle, could read these same passages and would simply see a story of a personality which was conducting certain actions which seemed to be impressive and interesting, but whereby no one could understand how he accomplished these actions; and those without the inner ear would simply be amazed at the story, but would not have the understanding of how it was done, or what was really behind the actions. This Awareness indicates therefore, the only thing they could do was be in awe of this carpenter.

This Awareness indicates that those who had the inner ear of understanding could look at these symbols: the seed, the water, the wine, walking upon the water, calming the storm, controlling manna; this Awareness indicates that these entities could understand the secret esoteric teaching within these writings and therefore could practice the art which was being given in code to the inner circle of initiates.

This Awareness indicates unfortunately, though Jesus intended that his Disciples would learn these secrets, then go forth and teach others, and from this teaching, teach still others; this Awareness indicates unfortunately, the Disciples, (by the circumstances which followed each of them), were unable to fulfill this dream of setting up the secret esoteric schools which would pass on this information. This Awareness indicates that it was not until the entity Max Freedom Long (and others before him) deciphered the language of the Polynesians and their hidden, coded words, that allowed them to break the code of the biblical stories, the New Testament coded language; it was not until this time that these things were released in great number to the public.

This Awareness indicates that there, of course, were many esoteric schools in India and in Tibet and in other areas which already had this teaching handed down from the time of Jesus and before, and it was from many of these sources that Jesus received his teachings which he attempted to give to those in the Holy Land. This Awareness indicates that therefore, the teaching was not lost by the Christians; it simply did not flower through their efforts. The teachings remained in Tibet and India in certain secret and esoteric schools, and also remained in the coded language of the Polynesians who had carried this teaching (long before the entity Jesus), these Polynesians carried this into the Pacific when they migrated in that direction approximately 4,000 B.C. This Awareness indicates that these entities and this coded philosophy as going back to the root-religion from which Jesus also received his training and teaching.

IMMEDIATE FUTURE UNCLEAR--BUT IN THE LONG RUN,  
A NEW WORLD IS COMING THAT WILL BENEFIT ALL

( Closing Message, C.A.C. Gen. Reading, Feb. 14, 1982 )

This Awareness indicates that the energies which tend to move into states of flux and then crystallize into what appears to be a situation, soon alter and become a totally different situation, and again change, bringing about a new flux of energies. This Awareness indicates that these energies tend at this time to be moving and fluctuating at a greater pace than at times previous. This Awareness indicates that for this reason, it becomes much more difficult to observe the flow of energies and to know where they are moving,--for that which is in motion in a particular direction, may suddenly change directions without warning.

This Awareness indicates that when observing such changes, entities wishing to know the direction and current of energies must rise to a higher viewpoint, so that rather than watching the many sudden changes up close, they rise to a higher level and see the general movement of the zig-zagging energies below.

This Awareness indicates that while the immediate future is not fixed and cannot be seen clearly at this time, this Awareness wishes to indicate that from a higher level, the future of this plane as that which is indicating a great promise; a New World which will bring benefits to all. This Awareness indicates however, that there appear to be many difficulties on the path to this attainment.
