Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

( Helping people become aware )

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest, neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

HUMAN FIREBALLS...

THE MYSTERY OF

## Spontaneous Human Combustion

Also.....MORE ABOUT CONTRACTS ON THE INNER PLANES

( Excerpts from a C.A.C. General Reading )

November 6, 1981 Paul Shockley, Interpreter

### QUESTION:

Sometime back Awareness gave a little bit of information on the phenomenon of spontaneous human combustion, and this fall *Science Digest* came out with an article on this subject which has resulted in a number of questions sent in by members, so I'd like to ask Awareness about this, and read a bit on the subject from an article in the *Hefley Report*. It says:

"Blue sparks flared simultaneously from her back, chest and shoulders, igniting her hair. Suddenly, tongues of flame engulfed her body, her new formal became a tinderbox. The girl's boyfriend and dancing partner, Billy Crawford, extinguishes the blaze, although he suffers numerous burns. He is fortunate--he recovers. But Marybelle Andrews, a 19 year-year-old English barmaid became a statistic filed on spontaneous combustion in 1957.

So did Phyllis Newcome, another English girl, who erupted into flames before a roomful of people in 1938. At that time, onlookers reported to the police and the *Landon Daily Telegraph*: "There was no other fire in the room."

A coroner's jury sifted through the evidence by looking at the charred bones of W.A. Shepherd, and by looking at his untouched, unburned, unsinged truck. The cause of death was listed as "undetermined." Fellow workers gave this account: "He was waving to friends as he drove past. Suddenly, he became a human torch."

A fiery death snuffed the life of Mrs. A. Martin, of Philadelphia, in May, 1957. Shocked friends found her still smoldering body. But only her legs had burned...her shoes remained intact.

On Christmas Eve, 1895, Mr. and Mrs. Rooney of Seneca, Illinois were fated to die. She combusts; he asphyxiates. Likewise, death stalked Mrs. A. Johnson, an English widow, aged 68, as she sipped her tea. She never finished. She becomes another victim of spontaneous combustion...a sudden killer fire that originates internally in people.

A yellowish, foul-smelling smoke billowed from the apartment windows of Mary Reaser in Florida. Neighbors responded immediately to the alarm, only to find a circle of ashes about 4 feet in diameter, containing a right foot...the grim reminder that this had been a living person.

During the 18th century, a similar case occurred in Italy. The Countess of Cesena incinerated. She left a pile of powdery ashes, a mass of calcinated bones and both legs (with the stockings still on and unburned) in a blackened circle. Soot covered everything in the room...the floor, the rug, the furniture, the walls and ceiling.

Spontaneous human combustion still happens. There have been more than 50 documented cases in the last hundred years. Although the cause is still unknown, there are certain common aspects. Usually the combustion begins with a blue flame. Coincidentally, in the psychic field, blue is supposed to be a high-energy color. Sometimes one part of the body remains intact; often, it is a hand or foot. The burning takes place within a circle of 4 feet. Nothing outside the circle shows any devastation by fire. The human body kindles and burns rapidly. The wildfire may last only a few seconds; at

most, a minute or two.

To voluntarily produce such a holocaust, a crematorium would have to maintain a heat of 2,000 to 4000 degrees Fahrenheit continuously for 8 hours."

Studies show there is a strong acrid odor. The flames hover around the solar plexus, which is known to psychic researchers as an area of great sensitivity and strength. The strange phenomenon of spontaneous human infernos has continued to baffle the best scientific minds in the world, and there's other articles which have appeared, which talk about a woman who burns to ashes, while sleeping beside her unsuspecting husband without even scorching the bed-sheet, and evidently this phenomenon is increasing. There's been things in the paper that it happened in Aberdeen a few years ago to a woman, and it's happened to a doctor,.....would Awareness explain this phenomenon and its psychic implications?

The Hefley Report, P.O. Box 7242,  
Burbank, Calif., 91510. (Now defunct).

PLEASE NOTE: for easier reading and greater understanding, Cosmic Awareness suggests that these communications be read aloud.

### "THE MALEVOLENT 7"---THE DEATH RAY

#### COSMIC AWARENESS:

This Awareness indicates that this is associated with forces that are unseen on this plane, which can emit a kind of ray. This Awareness indicates these forces being of a nature whereby they can emit a ray toward a particular individual and this creates an internal combustion,---this not too unlike the microwave oven and its effect on food placed within it. This Awareness indicates that the organic matter placed within a microwave oven heats from the inside out, and the exterior of the oven area,--that area outside of the organic matter,--remains cool. This Awareness indicates that likewise, this particular type of ray affects the chemicals within one's body; these being rays of a much shorter frequency than the microwave. This Awareness indicates these affecting the body from the inside out, through a manipulation of the chemicals within, so that these chemicals are altered and become volatile. This Awareness indicates that it simply cooks the entity from the inside; and the heat, when reaching the surface, bursts into flame.

This Awareness indicates that this is used by forces against entities who are....this Awareness indicates there are many reasons for these forces having the use of this against others. In some cases, the victim has been under a contract,---perhaps several lifetimes previously,--to some force, and is not fulfilling that contract. In other cases, the entity is a threat to these Dark Forces, and therefore are prime targets. This Awareness indicates that those who are protecting themselves with the Pure Light of the Christ Consciousness are generally relatively safe from these rays. This Awareness indicates that love vibrations tend to prevent these rays from entering one's system, but this is not always the case. If these rays are deliberately turned toward an entity and are of high enough frequency, over a long period of time the entity's love vibrations may be hindered and weakened, so that the energies can move through.

This Awareness indicates that this as that which may be equated to the malevolent 7 ray, or the death ray, which is often used from other dimensions against entities upon this plane; these being used by Dark Forces against those who are threats to the Forces of Darkness and who are not keeping their Light in the highest order. This Awareness indicates that wherein an entity of great Light becomes weakened by circumstances which create anger and frustration within the entity; this allows these rays to penetrate; and if the weakened condition is not corrected, these rays may penetrate enough to cause damage,--an extreme condition would lead to spontaneous combustion.

This Awareness indicates that the condition of the physical body as that which also may contribute to the susceptibility to these rays; whereby the body is of a particular chemical balance, there is the greater potential for the rays to serve as a trigger to ignite these chemicals. This Awareness indicates the human body does produce within itself, under some conditions, sufficient amounts of nitro-glycerin to contribute to this condition under certain circumstances, wherein other forces are used as a triggering of these and other chemical reactions.

ALCOHOL AS A FACTOR IN SHC  
SUB-ASTRAL SLAVERY BY SOUL SNATCHING  
...More on contracts on the inner planes

#### QUESTION:

Awareness, many of these entities were found to have been alcoholics, or had a lot of alcohol in them, and some scientists refer to this syndrome as happening to sots and drunkards, because of combustible gases generated by the decomposition of the alcohol which is continually drunk. Is alcohol a significant factor in this spontaneous human combustion?

## COSMIC AWARENESS:

This Awareness indicates that this can be a contributing factor in creating the chemical imbalance which allows the body to become susceptible to these energies mentioned. This Awareness indicates that this also allows for entities from astral levels, --the sub-astral levels, to invade the body and to take control of the body, so that it can be brought into even greater imbalance for this purpose. This Awareness indicates this may serve as a means whereby some sub-astral entity can gain the control of one's soul, and remove that entity's soul from the body, and take it to the sub-astral levels for purposes of slavery.

This Awareness indicates this also as associated with that reference to contracts which have been made in this or previous lifetimes, wherein there are occasions wherein entities create contracts in between lifetimes with entities of the inner dimensional planes; and in some cases, these contracts have been with entities of a low-vibratory level, who seek to collect on their contracts; and when the entities are no longer willing to submit, and are moving in other directions; these entities may begin to take some kind of toll,---this being one of the means for this.

## THE 'SELF-DESTRUCT' BUTTON IN MUMMIES

This Awareness indicates that there is also another aspect of this, whereby entities who have been mummified in previous lifetimes: these entities often were given a kind of check, so that they could be controlled by the priests, even in their following lifetimes; and these checks, or what may be termed control factors, or self-destruct buttons; this Awareness indicates these mechanisms to destroy the reincarnated entity whose mummy was conditioned and developed for a particular purpose; wherein this entity does not respond according to the programming, the self-destruct mechanism may be brought forth, so that the entity in being rebellious or disobedient to the priesthood which initiated the action, this self-destruct mechanism may be imposed. This Awareness indicates that in some instances, the extreme is the spontaneous combustion. This Awareness indicates however, that in most cases, the entity will simply be brought to a state of poor health, until the entity succumbs and surrenders to the illness.

## THE "RED BALL" DEATH RAY ...COOKS ENTITIES FROM THE INSIDE OUT

This Awareness indicates there also are forces which can send out the invisible,---that which may be called a red ball; this as an invisible energy which moves out and follows until it reaches an entity, and this leads to the spontaneous combustion. This Awareness indicates these rays spoken of and the ball, are essentially the same thing, and are in fact psychic energy sent from elsewhere and directed to the entity who is victimized by this. This Awareness indicates however, this also can be developed as a technological machine which cooks entities from the inside out. This Awareness indicates that it has been developed by earlier civilizations and used; that entities wishing to know more about this machine, may study the works of the one known as Richard Shaver.\*

\*A series of books published by Ray Palmer Publications in the 50's called 'The Hidden World', which concerns the civilization known as the hollow earth. In previous readings, Awareness has confirmed these civilizations do indeed exist beneath the surface of our planet, and those nearest the surface are of the Alien Force. (For more info on this, please refer to 'Revelations of Awareness' No. 79-25 (The Secret of the UFO's); \$4.00 from C.A.C. (Most of the Richard Shaver books are out of print, but can be found if entities look around in occult bookstores and mail order book firms. Several are still available from Palmer Publications, Amherst, Wisconsin. (To keep from being destroyed, Palmer published this information as fiction.

## U.S. MILITARY HAS SIMILAR DEATH RAYS

### QUESTION:

Well, when an entity on the physical plane spontaneously combusts, then this ray Awareness mentioned does not originate on the earth plane, but comes from other dimensions?

### COSMIC AWARENESS:

This Awareness indicates this as generally the historic application, as being from other than physical dimensions. This Awareness reminds entities that you are surrounded by different vibratory rates, with dimensions overlapping into this dimension; and that many of those on the inner dimensions are capable of having technologies that cut through dimensions and affect things on this plane. This Awareness indicates that also there are developed at this time, certain technologies on this plane, whereby rays are capable of creating this same type of phenomenon. This Awareness indicates these as death rays; and in some cases, these may be responsible,---as victims of the test of this ray. This Awareness indicates these in reference to rays created by the military for military purposes.

## ALIEN FORCE HAS MANY WAYS TO DESTROY AN ENTITY: LIKE ALCOHOL RELATED ACCIDENTS

### QUESTION:

Human combustion is so rare. Surely there are more potential targets. Are the other ones so well protected, or is there some other reason why it is used so rarely?

### COSMIC AWARENESS:

This Awareness indicates that this as related to a protection which entities have, whereby the auras are strong enough to prevent these rays from penetrating long enough to create the situation. This Awareness indicates that there are also other ways besides the use of rays to destroy entities if this is desired by those of the Inner Planes. This Awareness indicates there are also accidents which can happen which are, in fact, brought on by forces on the Inner Planes. This Awareness indicates that the number of accidents resulting from alcohol are far greater than the number of spontaneous combustions; this being a much easier way to destroy an entity, with less fanfare and with less mystery involved. This Awareness indicates that therefore, it is a more favored way, by these forces, of ridding this plane of entities and gathering their energy for other purposes.

## ED's Note

ED's Note: When Awareness gave this little rap about drunken drivers, Vicki T. and myself exchanged nervous glances as we sat energizing this reading. We were recalling that rainy night in Feb., 1981, when we and two others were driving home from the movie, "Melvin and Howard". It was a 4 lane highway and I was driving on the inside lane, planning to turn into a restaurant a block ahead, when I noticed a pair of lights hurtling toward us at great speed, directly in our lane of traffic. I was hypnotized as these lights approached, but finally was able to yell to everyone to prepare for a crash. On my right were two passing little sardine-can type foreign cars, and I somehow realized that if I swerved into their lane I would cause them to crash; and at the same time the oncoming auto in my lane was starting to swerve across and into their lane of traffic. At the moment of impact, I swerved our car slightly to the right, (but not far enough to hit the passing cars in the other lane), hoping to avoid a direct head-on crash. It worked. The car hit our left front fender and ripped along the entire side of the car, blowing out our tire before it careened down the highway. The impact crushed both front and rear doors way in, broken steel pushing out to within inches of my shoulder. Our car was totaled but we were unscathed. We had been driving an ancient Cadillac sedan which, in those days, was built like a Sherman tank. We figured that this, and some fantastic luck, saved our lives. The woman who had struck us was found by police 30 minutes later, drunk out of her skull. She had crashed her station wagon, after hitting numerous parked cars, into the building which happened to be the headquarters of the Washington State Patrol.

When we checked this accident out with Sam Millar and his Tarot, Sam said it had been set up that way. That because our car was larger and stronger than those midget cars passing on our right, I had sub-consciously accepted the impact instead of swerving and letting this drunken woman strike the other two cars head-on, which would most surely have killed them all. In previous messages, Awareness has warned us about possible attacks by the Alien Force, due to the nature of the business we are in at C.A.C. It informed us that our house and office were protected and that certain friendly UFO's are periodically directed by Awareness to reinforce the energy field around the property where we live and work. However, it was never mentioned that any protection extended beyond this area, like when in our car. Until this reading, the thought had never occurred to us that this incident could be anything more than another drunk creating havoc, and that we were just plain lucky. Was this the Alien Force, working through this sodden woman, making an attempt to wipe out the CAC staff? We don't know and will probably never ask. We are just very grateful that we are still alive and the C.A.C. communications are still going out on a regular basis.

Avaton

## WHO ARE THE VICTIMS OF SHC?

### QUESTION:

One other question came to mind in regard to the victims to date, was that they seem to be very commonplace, and not very threatening; therefore not likely targets.

### COSMIC AWARENESS:

This Awareness indicates that this is not always the case. This Awareness indicates that in many instances these entities, while living a common life in appearance, have uncommon thoughts and also may have lived a previous life in which agreements were made, and which are not being carried out in this lifetime. This Awareness wishes to point out to readers that this concept of spontaneous combustion is that which should not be energized by identification or fear, for it will tend to increase the number of such incidents. This Awareness indicates that the fascination of anything which the human mind

cannot understand often brings about an increase in the appearance of that phenomenon. This Awareness indicates that the human mind wishes to pride itself on knowing everything, so that it can cease to question and wonder. This Awareness indicates that it is important, however, that certain things not be pursued with a sense of fascination.

This Awareness indicates that obsession with negative experiences and with unusual experiences can be detrimental to your health. This Awareness indicates that the more unusual a situation is, the more entities cannot let go of the memory and concept associated with the situation. This Awareness wishes to give enough information to allow entities to cease being so totally fascinated with this, but does not wish to give so much information as to create a kind of obsession to explore this area in greater depths; for as entities become overly fascinated, if they should become identified with the concept, it can also have some potential for creating problems. This Awareness wishes that entities recognize that these energies are there, and like a hot stove should not be touched for too long, or entities can get burnt.

ED's Note: there's an interesting article in the September, 1982 issue of FATE magazine (\$8.95 a year from Clark Publishing Co, 170 Future Way, Marion, Ohio 43302) about a man named Jack Angel, who survived SHC. His story confirms much of the Awareness information.

## CONTRACTS MADE ON THE INNER PLANES

### QUESTION:

Would Awareness expound a bit more on the subject of contracts? Lee Michaels was talking about that recently. Are all of these contracts, or the majority of these contracts done with lower level entities, or Alien Force entities, or are contracts sometimes made on the higher levels?

### COSMIC AWARENESS:

This Awareness indicates that there are contracts on all levels. This Awareness indicates that even as there are contracts continually made on the physical earth plane in all levels. That even the entity who says, "I will meet you at 4 o'clock in front of the store," this essentially is a verbal contract or agreement. This Awareness indicates that likewise, the contracts to sell nations or their goods, or their people; these also are contracts. This Awareness indicates that contracts occur on all levels when entities make an agreement with each other.

This Awareness indicates that the question of whether a contract should be collectible is determined by the way in which the parties involved interpret the contract. This Awareness indicates that in the making of a contract, one entity may state, "I will meet you at 4 o'clock in front of the store." The other may say, "Alright, I'll try to make it." This Awareness indicates that the use of the word "try" will allow the second entity an option, a way out of the contract. This Awareness indicates the first entity, having made his statement, "I will meet you in front of the store at 4 o'clock" does not have a way to weasel out of the contract. This Awareness indicates that therefore, the contract is unfair to the first entity; and if the second entity wishes to hold the first entity totally responsible for being exactly there on time and for being present as agreed, then the second entity should also be willing to be firm about his commitment. This Awareness indicates that this may appear somewhat ridiculous in relation to the situation; but if this, for example, were a situation of life and death,--a situation of great importance, then these aspects would be necessarily considered.

This Awareness indicates that there are contracts which should be written down, and contracts which can simply be recorded in one's memory, and other contracts which may be justifiably broken. There are also contracts which are void from the beginning. This Awareness indicates that a contract which can be justifiably broken is one in which one entity forces another into the contract against the other's will,--this being referred to as coercion; or wherein one is tricked into signing a contract; or wherein one is enticed into signing a contract under false information, or during a time of confusion and wherein one is not lucid.

This Awareness indicates that many of the contracts which are formed inter-dimensionally, between lifetimes, are formed under duress, during states of confusion, or under times of emotion; and these may be recorded by the lower astral entities, so that they may be brought

up to the entity at a later time. This Awareness indicates that many of these sub-astral, or lower astral entities, or of those inter-dimensional civilizations which are not of high integrity; these entities sometimes create contracts which are enticed through the promises that, "you will be given the opportunity to see your loved one again, if you sign this contract." This Awareness indicates that sometimes, such contracts are of no importance because the natural law would allow you to see your loved ones again anyway, if it were your choice; and the promises that this will be allowed are simply selling you something which you already have as your right, but which you may be ignorant of. This Awareness indicates that at any rate, such contracts may have been agreed upon by you, and you may have a contract against you asking that you perform certain activities on this plane in order to fulfill that contract, and you may be suffering from some form of deprivation because you have not fulfilled that contract and because that contract has not been nullified by higher levels of authority on the Inner Planes.

This Awareness indicates that bringing these things into your attention, or becoming aware of these contracts from inner levels, can often be beneficial in helping entities to either have the contract nullified, or to fulfill the contract. This Awareness indicates that the higher, more ethical forces in the Inner Planes may have arranged contracts with individuals on this plane to do certain things to bring the planet into greater harmony. This Awareness indicates there have been errors involved on the Inner Planes, in that many of these highly developed individuals have allowed what may be termed mismanagement, by subcontracting those of the lower planes to handle the affairs which were originally intended to be handled by those of the higher planes.

This Awareness indicates that when the affairs of ancient Egypt were first set up, this was contracted to be carried out in a precise manner; but the entities involved, subcontracted these activities to entities of a lower, less ethical nature. Therefore, many of these energies were distorted, and further contracts were made which benefited those in power, rather than benefiting the entire society, as was originally intended. This Awareness indicates that this as that which is now being examined, and whereby changes are occurring on the Inner Plane as humanity begins to awaken and demand and recognize rights of individuals and rights of each other. This Awareness indicates that it may be somewhat of a surprise to entities on this physical plane to realize that entities in the Inner Planes often have the same kind of political hassles as occur on this plane; but this is the way things are, and should not be too surprising, in that the ancient *Law of Correspondences* states that, "As it is above, so it is below, and vice versa."

### CAN CONTRACTS BE BOUGHT AND SOLD?

### QUESTION:

Awareness, can these contracts be bought and sold to others? For example, if a contract was made in good faith on a higher level by an entity, is there any chance that this could be sold to an entity of a darker level that could misuse the contract later on?

## COSMIC AWARENESS:

This Awareness indicates that these contracts may be bought and sold, but that the involvement of energies as stipulated within the contracts cannot be changed. This Awareness indicates that wherein an entity agrees to come to this plane for a particular reason, even though the agreement may have been transferred to someone else, that particular reason cannot be altered by the second holder of the contract. This Awareness indicates that on the Inner Planes, such contracts as are related to the performance of individuals, generally are not transferred. These generally are sealed in areas for posterity,--this as similar to your courthouses,--these generally being sealed, so that a record is available. This Awareness indicates that the lower levels of the astral planes often record contracts in stone and in the physical wounds and stresses of human bodies. This Awareness indicates that wherein an entity has been wounded in a past life, this wound may carry a kind of contract, or the energy of agreement, even into a future lifetime. This Awareness indicates that the future lifetime may produce in that area where the wound was, a stress point which, when released, releases the contract; or wherein the contract is performed, the stress energy may be released.

## DO THE WANDERERS MAKE CONTRACTS?

### QUESTION:

In the case of the Wanderers that come to this plane, particularly like during this time to help raise the consciousness into the New Age; have many of these entities actually made contracts, or has this been more of a voluntary nature?

## COSMIC AWARENESS:

This Awareness indicates that many of these entities from the higher vibratory rates have made contracts and agreements that they would be born upon this plane and live their life so that they brought forth Light and love to this planet, to the best of their ability. This Awareness indicates that these entities were not however, given contracts which asked them to perform to any specific duty other than that of bringing forth love and Light to this planet; and in some particular instances, wherein the entity would add on specific things which he or she would agree to. This Awareness indicates that the consequences for failure to perform such was not included in these contracts; there was no punishment involved if these entities were unable to perform their contracts. This Awareness indicates however, that if the entities in coming to this plane, became involved in karmic actions resulting from their own misbehavior, this would require that they remain on this plane until the karma is resolved.

What does the Wanderer expect in return ?

### QUESTION:

Well, the nature of a contract implies that the entity signing the contract will receive something in return if he performs. In the case of the Wanderer coming down who signs the contracts, what does a Wanderer expect in return for his services?

## COSMIC AWARENESS:

This Awareness indicates that these entities would receive appreciation upon their return and the benefits of knowing that they had assisted in helping to raise the vibrations of a dark planet into Light. This Awareness indicates that these entities on returning to their original planets also would receive the benefits of those planets; that these planets already are of high vibration and there is little which is needed by entities on those planets. This Awareness indicates however, that in some instances, entities have signed agreements with those of lesser levels, and were requested to perform certain activities upon this planet, and when these were performed, (such as entities who may require several lifetimes to perform an activity); when these were performed, these entities were to have been removed from this planet and given some reward in higher levels.

This Awareness indicates that often these were not forthcoming,--the rewards were not given, and the entities were left here for further experiences and further contracts upon this planet because they had forgotten what their contract was, and because between lives they were told that they had not yet completed their contract. This Awareness indicates that these are some of the mismanagement and trickery conditions which have occurred on this plane from unethical forces on the Inner Planes. This Awareness indicates that this is that which is coming to light on the Inner Planes, and many of these entities on the Inner Planes are being investigated and looked at by forces within; as there are on these Inner Planes, contracts for entities similar to those on this earth plane, and entities on the Inner Planes are beginning to wonder if they, too, have been defrauded.

## SELLING ONE'S SOUL TO "THE DEVIL"

### NOT JUST A PIECE OF FICTION

...HEY, DON'T JOKE ABOUT THIS!

### QUESTION:

Then this legend of Dr. Faust, the ancient entity who made a contract with the Prince of Darkness, that in exchange for youth and wealth and the pursuit of the libertine life, would exchange his soul at the end of that life. This, then, is actually a possibility; there's more to this than just the legend, is this correct?

## COSMIC AWARENESS:

This Awareness indicates this in the affirmative.

### QUESTION:

How prevalent is this type of thing on the physical plane?

## COSMIC AWARENESS:

This Awareness asks for clarification of the question. What is meant by "this type of thing?"

### QUESTION:

The Dr. Faust.....

COSMIC AWARENESS:

This Awareness indicates there are a number of entities on the physical plane who are willing and desirous of having physical benefits at the expense of selling their soul. This Awareness indicates there are even humorous jokes whereby entities sell documents in which you may sell your soul for ten dollars. This Awareness indicates that while these are relatively harmless as humor, the implication is that which can be of great significance. This Awareness indicates that for entities to joke about this type of thing simply shows a naivety and a lack of understanding.

This Awareness indicates that the selling of one's soul occurs when one agrees to go against the Forces of Light and to yield to temptations which the entity knows to be in error, and knows to be that which is other than good. This Awareness indicates that wherein one continues to do this, and particularly wherein one has no remorse and does not wish ever to be forgiven, but identifies with the power of darkness; these entities are well on their way to selling their soul. This Awareness indicates that wherein one openly makes the statement to oneself and is willing to sell one's soul; this then allows the entity to move into those more darkened areas at a faster pace. This Awareness indicates that it is a very serious matter, and entities following this path will find themselves in hot water, spiritually speaking.

Dr. Faust, an ancient entity, bargains with Mephistopheles. In exchange for his soul, the Devil promises to make Faust young again and provide a life of pleasure, power and knowledge. Many books, operas and plays are based on this legend, originally credited to Christopher Marlowe.

ED's Note: For more information on contracts, please refer to 'Revelations of Awareness' No. 82-10 (The Eve of Destruction); \$4.00 from C.A.C. Also, No. 82-13; \$3.00.

QUESTION:

Then the books and movies they put out on Satanism and witchcraft; some of these strange rituals they do to invoke the so-called Satan, then this has some basis in truth, and this would also relate to such a contract. Is that correct.

COSMIC AWARENESS:

This in the affirmative. The so-called devil cults which are springing up are those which are bringing forth great problems for many entities,--including those involved in these devil cults,--but also for those who are and will be victimized by these. This Awareness indicates the worship of Satan as on the rise, and there are requirements in many of these devil-cults for blood sacrifices, often moving into human sacrifices.

CONTRACTS NOT ALWAYS RESPECTED

...MORE ON THE "LORD'S PRAYER"

QUESTION:

Awareness, I understood in some previous readings that the outright sale of your soul had been outlawed by the Galactic Command agreement as to what was reasonable practice on this plane.

COSMIC AWARENESS:

This Awareness indicates this in the affirmative; these are no longer recognized from levels of Celestria.

QUESTION:

Well, in that case, the contract would be invalid.

COSMIC AWARENESS:

By the standards and laws of Celestria. This Awareness indicates however, if one does not acknowledge the laws of Celestria, and follows the laws of darkness, and if one creates a contract with the Forces of Darkness and acknowledges that contract to be valid; then the contract is as valid as the entity wishes it to be, and if the entity feels bound by that contract, then his own loyalty to the contract binds him.

It is for this reason that entities may recall the 'Lord's Prayer,' asking that the trespasses be forgiven; "forgiving our debts". This Awareness indicates that this may also apply to the forgiveness of contracts of a dark nature: even as you would forgive the contracts which you might hold over others which were of a dark nature.

\*\*\*\*\*

ED's Note:

Entities still curious about spontaneous human combustion should read the article, "Human Fireballs", by Larry Arnold, in the October, 1981 issue of Science Digest. There is also an in-depth article on this subject in the Jan-Feb., 1982 'Frontiers of Science', 2201 St. Paul St., Baltimore, MD., 21218. Subscription is \$15 a year and backissues are available. C.A.C. recommends this publication because it questions and delves into many of the psychic areas which other publications will not explore, such as UFOs, etc.

# Hoquiam Corpse Burning Perplexes Chief

Hoquiam Police Chief Richard Barnes said yesterday that the burning of a woman's body in a coffin inside a locked funeral home still remains a mystery, one which may never be solved.

"We have no proof that a crime has been committed," the chief said, "and

no evidence of it. It's all conjectural."

The body of Mrs. Sam Satlow, 50, was in a coffin — the bottom half of which was closed — in the Coleman Mortuary in early morning hours of Dec. 10, when firemen were called by a resident of an upstairs apartment who smelled smoke.

Barnes said firemen found the body "completely consumed to the hips" and estimated the metal coffin must have been red hot, "just like an oven."

Mrs. Satlow died of carbon monoxide poisoning three days earlier. Grays Harbor County Coroner Harold Schmid said an autopsy showed a .26 blood alcohol reading. Courts recognize a .10 reading as a presumption of intoxication.

Under the circumstances, Schmid refused to rule the death either as suicide or an accident, leaving it "undetermined" in his report. Barnes said. Firemen said the mor-

tuary was locked when they arrived and Barnes said investigation showed no evidence of forced entry, nor any obvious evidence of arson.

"The fire people can't explain spontaneous combustion," Barnes pointed out, "and at the same time, there is nothing that would fit with arson. It absolutely remains a mystery."

Barnes has sent the burned coffin to the Treasury Department's laboratories in Washington, D.C. and expects a report back in about 10 days.

If that report sheds no new light on the mystery,

the chief is at a loss to explain the incident, unless new evidence turns up.

"And, we really need a logical explanation," Barnes added, "to put an end to so many wild, baseless rumors that are going around the community."

## HOW TO PREVENT MOTION SICKNESS

### QUESTION:

There's a couple of items in a little Canadian publication on magnetism and parapsychology called *Journal of Natural Health & Parapsychology\** and I'd like to ask Awareness if the following has any validity. Somebody wrote in from Austria, who said: "I was always one of those unfortunate people who had to stay home when my family went out in the car. I just could not stand driving in the car as I had to vomit every few minutes. A woman in her early seventies told me that she had had the same problem, which she had for many years, and then told me a very simple method of solving this problem. She said, "Just make a pocket in your shirt, or make a belt to which you can attach a pocket, and place a fresh potato in it and leave it there." I followed her advice, and to my astonishment, the next time we went out in the car the car-sickness completely disappeared and has never returned since."

Would Awareness comment if this putting a potato in one's pocket can cure motion sickness?

*Journal of Natural Health & Parapsychology,*  
PO Box 2222, Niagara Falls, Ontario, Canada,  
L2E6Z3 (\$13.50 per year).

### COSMIC AWARENESS:

This Awareness indicates this appears to be that which is effective in two different ways. This Awareness indicates the suggestion as that which has some slight effect, whereby the entity having this potato and being told that it will cure the illness, is influenced somewhat by that suggestion. This Awareness indicates that the motion sickness in fact being more in the mind than in the physical, yet it appears that

the potato does have a particular vibration which affects the aura of an entity in a manner that tends to give a sense of stability to the aura, whereby the entity feels this stability, particularly in the stomach area, where the nerves of the subconscious mind tend to be most associated.

This Awareness indicates that it appears that this can be used by many entities. That other entities may also benefit by carrying certain gems and stones, or other vegetables such as onions or carrots. This Awareness indicates that it is something which entities may wish to experiment with if they have this problem. This Awareness suggests that entities having this problem and finding this to be effective, may also find that a gradual reduction in the size of the potato, or other workable vegetable or stone, may lead eventually to the total elimination of this object, so that their enjoyment of the ride without the object can be experienced.

## HOW TO PREVENT ARTHRITIS

### QUESTION:

Michael Contris, who writes a feature for the local newspaper, has mentioned several times that when he was a boy, his father had him and all of his brothers and sisters carry a slice of potato in their pocket all the time, stating that this, I believe, prevented arthritis. They lived in Grey's Harbor where it was rainy and damp, and Mike claims to this day he still carries one around and he's never been bothered by arthritis. Is this another case of this suggestion, or is there actually something in the potato that can cure or prevent arthritis?

### COSMIC AWARENESS:

This Awareness indicates it appears that the potato does emanate some vibration into the aura which balances the odic force, which balances the currents of energy and gives a sense of stability to

the entire aura. This Awareness indicates that this is more than suggestion, but it also benefits from the power of suggestion. This Awareness indicates that entities should never underestimate the power of suggestion, but also that many of these things which appear only to be suggestion may also have some other element of validity.

This Awareness indicates that during the coming twenty years, there will be more and more realization of the effects of the invisible fields of energy on the physical bodies, and as entities become more aware of these invisible fields of energies emanating from various physical bodies, it will develop into a science which will allow entities to understand how and why these emanations of energies from physical bodies can have their effects upon other physical bodies.

This Awareness indicates although entities may feel this to be quite unusual that a potato could have an effect upon an entity's aura or physical body, should also consider that effect which another physical body being next to your own has, in terms of its effect on your aura and physical body. This Awareness suggests that it is commonly recognized that when two entities come together, even though they do not touch or speak to each other, just being in close proximity has its effect on an entity.

This Awareness indicates that generally, when an entity gets close to a doctor or healer, the entity automatically begins to feel better. This Awareness indicates that when an entity gets close to one who is a loved one, the entity begins to feel better. This Awareness indicates that it is the proximity of the auras emanating from the energies of the entities which create an etheric reaction of these energies, which allows for the healing in the auric level, which then affects the physical levels.

#### GEMSTONES AS A HEALING AGENT

This Awareness indicates that also, the carrying of certain stones or gems or metals can also have effects on the physical body. That in some instances, a stone can be harmful to an entity, whereas in other instances the stone can be beneficial. That stones carried for a brief time may be beneficial, but carried excessively may be harmful. This Awareness indicates that entities being sensitive to these energies will intuitively tune in and know when they have worn something long enough, or whether this is a stone which is beneficial to them or harmful to them.

This Awareness wishes at some time in the not too distant future to present information regarding the effects of gem-stones when carried by entities having different types of illnesses or conditions, and how these gem-stones can be used for healing.

#### GARLIC, ONIONS & BONFIRES IN HEALING

This Awareness indicates the old stories of carrying garlic to keep negative forces away, this also is not simply an element of suggestion. That it does in fact have a certain element of truth. This Awareness indicates likewise, that an onion can be used to keep certain cold germs or what may be termed as spirits or energies away by drawing those energies to it. This Awareness indicates also, that flames can draw negative forces into them. That wherein an entity feels there are bad vibrations in an area, this may be countered by certain actions such as burning candles or bonfires or such.

#### Positive & Negative Energies in Certain Physical Areas

This Awareness indicates that there are, throughout the physical plane, certain grid-type energies, where there are vortices, where certain areas are beneficial, other areas are negative in nature, whereby entities may sit in one place and feel quite comfortable, whereas others may wish to avoid a particular area altogether, and people tend to stay away. This Awareness indicates that there are also areas that draw certain types of people, either of an area which draws people of higher vibration or an area which draws entities of a sub-level or lower vibration.

This Awareness indicates that wherein you become aware of these, you may find yourself walking along a path and feeling different types of energies and vibrations at different places on the path, whereas some may be attractive, causing you to want to linger in that area, and others tend to make you want to hurry on to another place. This Awareness indicates this can best be tested in an area that is free from suggestive forces such as dark shadows or meadows, but wherein rather you are in an open field, walking down a path, or in a desert-like area, walking along a path wherein all of the areas surrounding are similar.

This Awareness indicates you will notice that some areas, even though similar to other areas, still seem to be more beneficial feeling and other areas tend to be somewhat distressing. These are those areas wherein the energy vibration rates are varied.

#### DANGERS IN SHAKING HANDS

##### ...MORE ON MALE & FEMALE ENERGIES

#### QUESTION:

A question from Dr. J.D. of California: "Dr. Cotum\* in his booklet, "The Psychic Dangers of Shaking Hands," suggests that the Western convention of handshaking, --that is, right hand to right hand,--"shorts out" the inner selves, and passes along our unresolved psychic garbage to one another. Would Awareness comment on this much-used electrical hook-up and confirm or recommend acceptable ways of preventing energy run-offs or acquiring that which is undesirable into our psychic fields?"

\*Phonetic spelling.

#### COSMIC AWARENESS:

This Awareness indicates that the right hand is that which sends energy, the left hand as that which is receptive. This Awareness indicates that wherein two right hands touch, this allows the energies to meet each other in an assertive manner, rather than in a receptive manner. This Awareness indicates that neither hand is especially receptive. This Awareness indicates however, depending on the individual, some individuals are more receptive than others and will draw energy from a more assertive person, even though both are using the right hand.

This Awareness indicates that in terms of entities of the opposite sex; this appears to be even stronger, --the female being more receptive. This Awareness indicates however, that the brief contact is that which is so limited that very little shall pass in this manner. This Awareness indicates that for an entity to stand within the aura of another for a period of approximately one minute, as much energy will pass between these entities as a handshake lasting five seconds. This Awareness indicates that a handshake lasting approximately five seconds, (which is a relatively long handshake), will send, or allow energy to be relayed between entities of a quantity approximate to that of entities standing within one foot of each other, or two feet of each other, for approximately one or two minutes, this depending on the strength of the entities' auras.

This Awareness indicates that some entities, having strong auras, often tend to approach others and stand close, so that the auras are mingled. This Awareness indicates that this tendency of some entities to mingle auras is that which can allow greater dumping of garbage, and also can sap the more recessive entity of energies, --the more aggressive entity drawing energy from the passive entity. This Awareness indicates that there are sometimes subconscious or conscious motives in standing close to another, --the motive being to take energy, or to be intimate. Yet, there are also often more legitimate reasons: an entity may be nearsighted and cannot see clearly unless standing close to focus on the details and features of another's eyes the entity may wish to be near.

This Awareness indicates that therefore, nearsightedness is often mistaken for a desire to be intimate, when in reality, the entity simply wishes to see clearly the entity being spoken to. This Awareness indicates that still others who are farsighted will desire to stand back, and may appear to be somewhat cold. Their purpose for standing back may be to see the entity more clearly, because when too close, the entity's features become blurry. This Awareness indicates that therefore, to assume that the proximity of one entity to another is strictly associated with psychic intent, is in error. It may well be simply a matter of near or far-sighted problems of vision.

This Awareness indicates that for those who wish to become intimate, and whereby entities are in agreement and enjoy being close, touching each other, it should be understood that indeed energies between these entities shall flow and pass from one to another. This Awareness indicates that the male energy, whereby the energy is passing from the male to the female, and whereby the female energy is passing back to the male, these energies should be understood as balancing forces. This Awareness indicates that the right side of the male as being the masculine side, the left side as being the feminine side. This Awareness indicates this reverses in the brain, and the more receptive and holistic side of the brain is on the right, whereas the rational or more assertive and aggressive, structured brain is on the left. This Awareness indicates that the male energies flow best when the female is to the left of the male; this allows the positive side of the female to be next to the negative side of the male. (This Awareness indicates that this in general, and not necessarily as a hard/fast rule.)

This Awareness indicates that wherein the roles are confused, such as wherein the female is asserting herself in her masculine energies and the male is more recessive in the supportive or feminine energies, the balancing action would best be served by the female being on the left side of the male; this would tend to allow the masculine qualities of the female to draw from the feminine qualities of the male, --this balancing out the energies.

This Awareness indicates that wherein the male is overly macho, and the female is especially responsive, a reversal of these positions could be beneficial: the female being to the right of the male.

This Awareness indicates that the handshake as that which does convey vibrations of one entity to another and create an aka-contact. This Awareness indicates however, this not being a serious problem, for most entities can filter out these unwanted vibrations, --except in situations where an entity is much too sensitive and comes in contact with large numbers of persons having low vibrations who wish to shake hands; this then can lead to certain types of stress within the-aura. This Awareness wishes also to comment on a similar area, that being the activity of intercourse: that wherein entities have intercourse together, this creates an intense exchange of energies, and the entities carry each other's vibrations for greater periods of time.

#### GIVING BLOOD TO OTHERS (More on Psionics)

This Awareness indicates that also, along a similar line, wherein entities give blood, the blood which is given goes into a blood bank and is processed; then the plasma, or blood, is given to another. This Awareness indicates that often, the blood given to others is placed in entities whose vibrations are very low, and the mixture of one's blood with that of others can have an effect on the original donor, even though he or she never has met the recipient of the blood; this effect being similar to that activity known as radionics, wherein a substitution, or a portion of an entity is affected and affects the whole entity. This Awareness indicates that even as a photograph may be used for voodoo, or radionics or psionics devices; likewise, blood-drops may be used. This Awareness indicates that wherein blood is given to strangers, this can have an effect on the original donor, whereby the stranger's vibrations are causing certain frequency attunement in the original donor.

This Awareness indicates that if this has not been presented clearly, that further questions may be asked.

#### PSYCHIC DANGERS IN CROWDS

...How music creates an oversoul or collective aura

QUESTION: (Vicki)

One question that came to mind from the example of hand-shaking with a lot of people, was I was at the Rolling Stones concert in Seattle this October and there were 77,000 people in one building (the Kingdome), all crammed together, and during that time I was in close proximity to hundreds of people, and I was wondering what kind of exchange, from this many entities' auras together at once, was transpiring? Also, I came down with a cold afterwards, and I wondered at the time if I'd picked this up, like garbage off of other people there. What all was involved here?

#### COSMIC AWARENESS:

This Awareness indicates that this can occur, and often does occur. This Awareness indicates that the commingling of auras of entities is that which can be beneficial, and which also can be somewhat detrimental, --this Awareness indicates that depending on your own strength of your aura and your ability to shake off the vibrations received. This Awareness suggests that a good practice would be to take a shower after you have

been in contact with others in a close proximity, unless these other entities are of such high vibrations that you thoroughly enjoy basking in the vibrations you received.

This Awareness indicates that in many cases, a good concert, wherein the music is uplifting,-- this will create a kind of oversoul, or collective aura, whereby the vibrations of all entities involved, tune in to the oversoul aura of the concert, and the music affects (in an alchemical sense), affects the vibrations of every entity present. This Awareness indicates when this occurs, the music having its effect on the vibrations, may be beneficial or detrimental to the entire audience, depending on the type of music and its effects on auras.

This Awareness indicates that wherein the effects are beneficial, then entities can leave feeling they have been healed, or made more wholesome by the concert, and the commingling of the many entities and this type of experience may be beneficial,--the auras of others not having harmful effects. This Awareness indicates however, if the music itself is of such a nature as to damage the aura,--the strength of the aura, such as occurs with some rock type music,--this not only weakens the individual's auras and the collective aura, but also allows for the lower vibrations of individuals' auras to be commingled with others, dragging even those with firm, strong auras down to more base levels. This Awareness indicates this particularly with the rhythms which are counter to the heartbeat, and with those beats and tones which are stimulating to the lower chakras.

\*\*\*\*\*

ED's Note: although Vicki T. was one of the flower children in the late 60's and was present at numerous rock concerts and festivals, members should not get the impression that she is an avid rock fan today. She isn't. She doesn't like the punk-style rock now being promoted, but she does still have a thing about the Rolling Stones. (She's seen them every time they ever came to Seattle--5 times I believe). She also went to Paul McCartney's "Wings" concert (me, too). However, she is also a member of the Seattle Opera Society (you ought to see her all dandied up when she attends an opera); she is also a member of the Classical Music Supporters Guild and personally corresponds with Dekoven--a Telemann and baroque music freak who has a weekly program every Sunday on public radio network. (Avaton)

THE DESCENT INTO MATTER....

WHAT IS REQUIRED TO BE AN AVATAR?

....MORE ON WANDERERS & VOYAGERS

#### QUESTION:

A question by R.E. "An occult work alleges to describe the lifetimes of the soul manifesting as Jesus Christ, that prior to his messianic incarnation he had appeared as Joshua and so forth. Others say Christ and Buddha were avatars, the descent of Divinity into flesh, while Awareness has said great numbers of Voyagers and Wanderers, basically with little or no negative karma, incarnate to serve mankind, and that Jesus as well as Lucifer were among the higher souls or levels of the super-heavens or Celestria, before their historic missions. Would Awareness please describe what distinguishes the Christ and Buddha entities from others in Celestria, as well as the Cosmic Wanderers, and made them especially fit for their missions?"

#### COSMIC AWARENESS:

This Awareness indicates that these energies wherein entities of high and pure consciousness enter into the physical plane, these energies as such that the entity must first agree to such a mission. The entity then also must choose or be given the appropriate timing and place whereby the entry into the physical plane will be conducive to a clear entry, unaffected by poor astrological influences, but rather, wherein the astrological influences shall be of high benefit to the entity. The entity then also must select the activities and environment and parents who would be beneficial to the necessary upbringing which would be required for the entity to perform his or her mission, these being guided and directed not only by the entity, but by other forces and spirits and energies involved.

This Awareness indicates that this then also requires that once the entity is in the physical form, that opportunities are given whereby the entity may have those experiences which lead the entity toward his or her mission.

This Awareness indicates that entities entering into the physical plane without karma, or having very little karma, and being able to move through these experiences without incurring further karma, but in avoiding karma, while also taking on the karma of others, or creating actions which serve others without encumbering personal karma; this as an action which requires some sensitivity, intelligence and spiritual development.

This Awareness indicates that in reference to the question as to what the entities are like in the higher realms, these entities simply have a purity and clarity; an understanding from having moved into these energies of purity through long and continuous motives and intentions, without seeking personal glory and vanity. This Awareness indicates that essentially, these entities are cosmically aware, or what may be termed "unified" with the Father, unified with the Universal Consciousness, the Creative Spirit.

This Awareness indicates that in descending into matter, it is necessary that the entities preserve that purity, while entering, or that upon encumbering any impurities that they somehow extract themselves from these energies to move into and up through the energy fields toward the experience, releasing and becoming unattached to physical needs as they move toward the higher, more spiritual path.

This Awareness indicates that in the event the question has not been answered sufficiently, that this be repeated. This Awareness indicates the question as being somewhat abstract, and the energies involved for the answer not being fully clarified.

MISSIONS IMPOSSIBLE....

CHRIST AND THE BUDDHA ETC.

....MORE ON CELESTRIA

#### QUESTIONER:

Yes, I think the gist of this particular question is: Are entities, such as the Christ and Buddha and those other avatars who were successful in their missions (more or less) on this planet, basically different from the other entities existing on Celestria who had not as yet taken a mission like that?

## COSMIC AWARENESS:

This Awareness indicates that the realms of Celestria are such as to be highly varied. Entities in these areas as to be quite different from one another in many diverse ways. This Awareness indicates there are many entities who never have existed outside of Celestria who have had little experience in reference to the lower vibrations, many who have moved in and out of the various vibrations, who have gained much experience through the movements. There are those who have moved in as emissaries between Celestria and those lower realms such as is known as Hades, and also those who have moved in official states into the physical plane, (Terrestria), back and forth into Celestria, or into Hades, and in various manners have traversed the universe from one vibration to another.

This Awareness indicates that the concept of the Christ coming into the flesh as that which needs to be looked at from different frames of reference. This Awareness indicates that entities move from higher vibrations into the lower vibrations sometimes in order to work off karma which they have not yet completed, sometimes to assist others who are working off their karma, or they may simply move into those areas for greater experience and understanding of what those areas are about.

This Awareness indicates likewise, entities involved in material lifetimes, may move from one existence into another material physical body without moving into other dimensions for any measurable length of time. This Awareness indicates that when it is said that the Christ entered into the flesh, this as in reference to the Christ Consciousness, the pure Spirit, that which is the Christos, entering into the body, or consciousness of the entity known as Jesus.

This Awareness indicates that the movement into this entity's consciousness, whereby *It* expresses *Itself* through his speech, through his actions, through his life, as that which is similar to that which occurs to Buddha, and to many other avatars. This Awareness indicates that an avatar as one who becomes such a pure channel and such an opening, that the Pure Light may emanate through the being.

This Awareness indicates that there are others who also emanate this light, but who are not known historically, and who may live their lives very briefly, in areas remote, or in areas such that do not receive the publicity to alert the masses. This Awareness indicates that it is a common reality that the Christ Light is available for any entity who is open to channel that purity, those concepts and energies of oneness, unity, of the void, consciousness, or bliss which is associated with Buddhahood or the Christos.

This Awareness indicates that the only thing which prevents this is the personality, the personal identity, the personal needs of an individual, and the identification of the individual with the physical realities that interfere with the spiritual realities. This Awareness indicates that the Christ coming into the flesh is essentially, the pure consciousness which is manifest and which seeks to enter wherever there is the opening which allows the spirit the opportunity to enter and serve through the structure, whether this structure be through a single individual or through a composite or group of entities, or through a structure created for the purpose of channeling spirit.

This Awareness indicates that this Christ Light of Celestria must not be confused with the body, the flesh and bones of the entity who represents the physical Jesus, or the physical Buddha, for it is not the physical body that is of great significance, rather, it is the Christ Light expressing through these entities which is of significance, for this Christ Light as that which can come to any entity who is open to receive this.

This Awareness indicates that it is a common error for entities to believe that a particular physical being can serve as a savior, although the physical being can assist and point the way, and help an entity to open and receive the Christ Light and guidance from these spiritual realms. This Awareness indicates it is the Christ Light, the Christos, the sound current, the vibration from the higher realms, which is in fact leading an entity into the spiritual and Divine Path. This Awareness indicates it is not the name, it is not the physical flesh being, it is not the image, but if the name, if the physical being, if the image of the entity is required in order to set the consciousness of an entity on the path following the spiritual current, then this is appropriate, whether this be under the name of Jesus, Buddha, or whatever.

This Awareness indicates that some names, some images and some physical beings do have greater influence in leading entities to the light, and therefore those which have greater influence may be of greater significance to this cause. This Awareness indicates however, that the choice is by the individual's free will, according to what he or she finds most suitable in terms of assisting on the search, on the path toward the higher vibrations.

This Awareness reminds entities that the top of the mountain is the place where all who climb will eventually reach, regardless of which path may be taken.

## WHAT IS BEYOND THE DARK STARS?

### QUESTION:

Here's a rather strange question from S. H. "Awareness, can You give me an idea of Your feeling (for lack of a better way of asking this question) how did Awareness feel when a portion of Yourself was gathered as light and then exploded? Was this a reversing action of energy of what is called 'cold electrons'. In other words, was this one of the times that the universe and universes turned inside out, and in the reversing action of this energy a new universe and universes was made, or is this action for the future?"

## COSMIC AWARENESS:

This Awareness indicates that this action is continuous, is always occurring. This Awareness indicates that the so-called dark stars are, in fact, holes in space wherein energies from one universe are flooding into another universe. This Awareness indicates that on the other side of these dark stars resides the other portion of this Awareness's Consciousness. This Awareness indicates this likened unto the two lobes of the Cosmic Brain.

## A war to end the world?

# In two hours nothing but smoking ruins...

Now you see from published facts what USA plans to do to USSR.

According to recent revelations in Washington, the USA first drew up plans to *wipe out the USSR*, back in 1949. That all-out nuclear assault on the Soviet people was scheduled to take place in 1957. As you've probably seen in the press, this "top secret" war plan was given the name *Dropshot* (taken from tennis).

Naturally, full details of Dropshot have not been given out. No matter — those nuclear plans of 1948 have been radically "advanced" since then. The general outline, however, was available to commentators as early as 1978. As you might expect, editors and reporters gave Dropshot little attention.

Main reason for that was the *astounding goal* of USA war-planners in 1949. They aimed to follow up atomic bombing of USSR with *invasion by 23 divisions*. That was to be nothing short of occupying the Soviet Union.

And at the same time, another 15 USA divisions would smash and occupy the other Socialist nations on the European continent.

In short: *total extermination of Socialism*.

You can see that the out-dated war plan of 1949 is very much to the point now in 1982. Fully 33 years ago USA planned to wipe out USSR at a time when Socialism was *no threat at all* to Capitalism. "Turning back the Soviet threat" simply had *no meaning* then. Naturally, many military experts answer that fact with the question: is there actually such a threat *now*?

Bluntly: is Washington's frenzied arms build-up in response to any Soviet menace; or, is its real aim the same as Dropshot's... *to destroy Socialism*?

This year the prestigious *Centre for Science and International Affairs* (Harvard University) made public two more documents long kept top-secret.

- One, dated 1954, covered a briefing of U.S. Navy chiefs by the Air Force Strategic Air Command; it mapped out a new scheme for liquidating USSR.

- The other, dated 1955, was from the Department of Defense, and gave expert views on how effective that Strategic attack would be if it were launched.

You'll find it interesting to note that *none* of these war plans in any way tried to *justify* a nuclear-holocaust inflicted on the Soviet people. Their attitude is unbelievable: a war of extermination is treated like an effort to explore the Moon or Mars, *just a scientific technological "problem"*!

It goes without saying that all this hasn't been lost on political and military leaders of the USSR.

The cold truth? Not only Soviet but authorities all over the West understand that Washington's infamous plans are *up-dated every year to this day*.

Of course, the situation has radically changed.

- In the 'fifties USA had 750 big atomic bombs, and planned to drop about 500 of them on USSR.

- Some 10 years later they had 2,000 much more destructive bombs which they could deliver to Soviet targets.

- At no time did USA planners make any difference between *military targets* (like airfields) and *heavily populated centres*.

- *All were to be wiped out in a single massive blow.*

Don't be mistaken: even the "earlier" nuclear bombs in Washington's arsenal were capable of wiping out the Soviet

Union in such a "First Strike" blow, planned (at the time) in absolute secrecy.

Naturally you are asking: *why didn't* they wipe out the Soviet people, *as planned*, from 1949 to this day?

Never did Washington give the public the answer.

The *one factor* that held them back was not humanism, but a fear that USSR would *not* be *totally* wiped out, and would *return the deadly attack in force*.

But get this: official documents reveal that USA *never ever* feared a Soviet "first strike", only blows in retaliation for nuclear assault.

Washington's history (particularly the Indian Wars and the Spanish-American War) show clearly that *hitting the opponent first*, while he is unprepared, is traditional cowardly "strategy" for USA war-makers.

But in the case of USSR... would Socialism turn out to be unprepared to handle a nuclear coward? Or?

The Pentagon seems never to have considered what worried President Eisenhower: legally, Congress has to declare war, but how could it do so without exposing a "first strike" war plan?

In any case, once that strike was launched, the Air Force was confident that *all USSR would be reduced to a smoking, radiating ruin within two hours*.

And that was at a time when USA could strike only with nuclear bombs carried by *bombing planes!*

Today they could strike with 2000 or more "instant" rocket-missile weapons.

Yes, but. You get the point, for sure. If they were *afraid*, back in the 'fifties, that USSR might send over some atomic *bombers* of its own, how much worse is their fear today that Soviet nuclear *missiles* would be able to return that terrible rain of death and destruction.

But *fear* is not the proper term now.

If the White House or the Pentagon ever "presses the button" to destroy Socialism, then retaliation will be inevitable. So the First Strike is *SUICIDE*.

Even so the "planners" go on planning.

They count on missiles fired from USA bases. From Trident and other submarines. From super-bombers. From cruise missiles. From many varieties of nuclear bomb launchers always ready in Europe.

In Europe the propaganda from Washington incessantly harps on this array of First Strike weapons. Claiming that USA could, really, *start and end a nuclear war all in one blow*.

Nobody is fooled. Europeans realize that even before USA's final suicide, *they would be gone* to the nuclear-bomb "paradise".

Especially, nobody is fooled by the nonsense about a nuclear war being *winnable by anyone*.

The grim and terrible truth, however, is that many in high places in USA today are thinking that it *might be worth trying*.

To hose these types down with some ice-cold reality, the people everywhere — above all we who live on this continent — must intensify our anti-suicidal efforts.

*No war can save either system!*
