(Helping people become aware)

\$4.00 SPECIAL REPORT

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

Also....WHY REAGANOMICS ISN'T WORKING AND WHAT TO DO ABOUT IT.

Part 1 (Setting the Stage)

HOW THE FEDERAL RESERVE OPERATES

(A short course in elementary economics)

This Awareness indicates that in reference to the changing world, particularly in reference to the changing economic conditions in the United States, this Awareness wishes entities to look briefly at that recent election. This Awareness indicates that the message which comes from the election is that which indicates the voters are highly concerned in regard to the economic policies which the present administration has presented, and these voters have sent a strong message, particularly to the House of Representatives and to the Congress, that this is an issue of great importance to them.

This message being very clear: that in the next election, if this situation hasn't been improved, the parties now in position in Congress or in the House may find themselves running an uphill course in efforts to be re-elected. This Awareness indicates the message being that the voters do not like what is happening to this country in terms of the economic policies and results of those policies at this time.

This Awareness indicates that the tendency is to blame the so-called Reaganomics program for the conditions which are present. This Awareness wishes at this time to clarify some points in regard to the economic ball-game, the game of economics, so that entities better understand what is occurring.

This Awareness indicates that it should first be remembered that the Federal Reserve Bank, which regulates the prime interest rate and flow of money available to loan or to use for financing throughout the economy, this Federal Reserve bank is that which is separate from the Federal government, is that which is *not* part of the executive branch, the legislative branch, or the judicial branch, *is not in fact part of the government at all*, but rather is a *privately owned corporation*, created for bankers and individuals by an act of Congress, and as such, Congress can regulate the Federal Reserve bank, if it chooses, even to the point of abolishing it.*

*ED's Note: The Federal Reserve is owned by the Rockefellers and 8 other Jewish families of bankers, including the Rothschilds and other foreigners. For more information on this closely-kept secret, please refer to 'Revelations of Awareness' No. 82-15.

This Awareness indicates however, that generally, Congress does not have much to say about these policies of the Federal Reserve bank, as the individuals elected to Congress are not generally fully informed on the issues and ways by which the economy is directed and moved through these banks. This Awareness indicates that the President has no direct control over the Federal Reserve bank. Although the President can make suggestions and appointments, neither the President nor the executive branch is capable of dictating the policy.

This Awareness indicates therefore, it must be understood that the Federal Reserve bank has a particular type of autonomy, or individuality, and a certain amount of power in its role of providing money to your economy. This Awareness indicates that this power is such that it can in fact usurp any efforts of the President or executive branch, in any attempts to create a

program dealing with economic needs of the country, or it can cooperate with such administrative and executive programs.

This Awareness indicates that during the past 30 years, as interest rates have risen from one or two percent to amounts of 18, 20, or higher percentage, the Federal Reserve bank as being the prime organization for regulating these interest rates, sometimes with, and sometimes against, or without the blessing of the President or the administration of the executive branch.

This Awareness indicates that with the final abolishing of precious metals backing on the Federal Reserve note during the Johnson and Nixon administrations, the Federal Reserve note essentially is valueless except according to the agreement of the masses, who have agreed to use this note in lieu of money, in lieu of precious metals, or other values. This Awareness indicates that the regulation of interest rates by the Federal Reserve is that which is associated with the prime interest rate, the amount charged to the preferred customers of the Federal Reserve.

This Awareness indicates that this prime interest rate may be increased so that higher interest is charged for loans from the Federal Reserve, or lower interest is charged for loans from the Federal Reserve. This much like turning on water in a faucet, or turning the water off, or turning it down. This Awareness indicates that wherein the flow of money is increased and the interest rate is dropped, this as likened unto the water pouring across a divider, whereby the interest rate which flows back to the Federal Reserve as that which is diminished while the money which moves out into society is increased.

This Awareness indicates that when banks and large corporations and businesses can borrow money at low interest rates, they are quick to do so, and to expand their business activities, lending to their preferred customers, being more lenient about their loans, or expanding their business organizations and corporations through borrowed money so that they can become more productive and to grow more rapidly. As this happens, and the currency flows into the society, this allows for a creation of more activity among businesses and among individuals who work for those businesses, to tap into and receive some of that currency.

This Awareness indicates that this currency then being gathered by these individuals may be put into *their* bank or savings place, into their storage vaults, or, if available for other activities, may be invested, may be put into further industrial activities of the individual, such as building a new room, a new home, or purchasing some items or commodities to improve their present activity and living conditions, thus the individual's business is stimulated and the larger businesses are stimulated, as the individuals using the currency return to the businesses to purchase as consumers of the products or services offered by these businesses.

This Awareness indicates essentially, the currency causes individual business and individual persons to come alive and to increase their busy-ness or to improve their business. This Awareness indicates that wherein the increase of business is occurring, more occupations are available, and entities in experiencing greater and greater numbers of activities and occupation, find the money flow, or currency, becoming even more easily available. This Awareness ind-

icates that when the currency is very very available, entities beginning to expand their activities may find themselves spending more than they are producing, and the production of commodities is not being balanced by the demand which entities are expressing, as they want more and more for which to spend their currency. Thus the demand side, the commodity side, needs also to be expanded in order to keep up with the demand, and as entities again seek to meet the demand of the many consumers, they may again return to borrow, in order to further expand their business.

This Awareness indicates that this kind of activity can continue for some time, increasing and building a society to a high and prosperous degree, on borrowed money. This Awareness indicates at some point along the way, entities may notice that the currency is being regulated somewhat by increasing interest rates, and also that there are what is termed the inflation rate, which increases so that the interest is off-set by the inflation, and these two are often neck and neck, and often are unpredictable in terms of future values. Thus the inflation rate causing the value of products to increase each year, requiring more currency in order to purchase these more valuable or costly products, whereby the interest being charged and being repaid (on the loan)--to the one who loans the money, is not being received in time to off-set the increase in inflation value.

This Awareness indicates that whereas one may receive 6% on interest from a loan given out, or from one's deposit to a bank, if the inflation during that period increased 8%, then the property is more expensive, and the money being paid back with the 6% interest would not be sufficient to buy that same piece of property, even with that added interest. This Awareness indicates that therefore, persons loaning money become very concerned about the inflation rate, and will insist that the interest rate be raised accordingly in order to off-set and bring down the inflation rate.

This Awareness indicates that when the prime interest rate at the Federal Reserve is raised so that less currency flows out to the society, and more interest is returned on that which flows out, this has its effect in bringing down the inflation rate, and it is through this manner that the rate of growth and expansion is curtailed, and the rate of inflation is curtailed, for as the interest rates increase, and less money flows into the society, when the currency is turned off or turned down, there is less busy-ness, less business among the corporations, among the individuals of the society, and as the corporations receive less currency, they become more efficient and demanding of more efficiency from their workers, and as they become more efficient, they lay off those workers who are not necessary or are not productive, and entities find themselves unable to tap the currency flow in the society, for they do not have their job, and being without work and without currency these entities cannot purchase, and as nonconsumers they simply are in need without purchasing or buying anything from the society, or are buying less and less, and the manufacturers of goods and commodities, having no buyers, or having fewer purchasers and consumers, become overstocked with their products, and no sales for their products, and therefore, become short of money, having high inventories and little income.

The masses of individuals, meanwhile, having little income, being most cautious as to how they spend their small amount of income, continue conservatively 3.

to ration out any currency which they may have stored up or available, and the economy essentially goes to sleep, or goes into stagnation, and when this becomes acute, it is referred to as a depression, wherein entities run out of currency altogether.

This Awareness indicates that the high unemployment, and low activity of corporate and industrial businesses follows the increase in interest rates by the Federal Reserve bank. When this is prolonged, the high unemployment increases even higher and the stagnation or depression continues to deepen. This Awareness indicates the stock market and bond market and mutual funds; these markets also reflecting the activities of the businesses, corporations and so forth, begin to fall, and show less and less value in proportion to the units they represent, such as stocks or bonds.

This Awareness indicates that as the interest rates of the Federal Reserve is lowered, this indicates the increase in flow of currency into the society, and the stock market and other markets of this type, bond markets and mutual funds and so forth, begin to rise quickly on the basis of future value of these stocks, as the money flows into the factories, industries, corporations, for entities know that as the current is turned on and the society begins to waken, and business becomes active from the current, these corporations will begin to produce, expand, and in so doing will hire, and the hiring of help will create jobs for entities who then may have purchasing power, and the purchasing power may then increase still further the activities and outlets for the products or services being offered by these corporations.

This Awareness indicates that if entities can understand the nature of the interest rate as regulated by the Federal Reserve, they may see this is likened unto a machine, the machine being society, and the currency being a current of energy which turns the machine on or off, up or down, and as the interest rate is raised, the machine begins to slow down and shut down. As the interest rate is lowered the machine begins to light up, speed up and increase its productivity and activity.

This Awareness indicates that by watching the regulation of the prime interest rates, entities can essentially know when to invest in stocks, when to pull out from stock investments, and likewise, in reference to bonds and other types of business ventures. Entities can also know when to hold onto their money, or when to begin building or improving their home or living conditions. Entities can also know whether their investments will be eaten up by inflation, or whether they will gain some certain amount from storing their money in some kind of money market or bank.

This Awareness indicates that essentially entities who store their money in banks, wherein the inflation rate is higher than the interest rate, are actually paying the bank to store the money for them. This Awareness indicates that in reference to the concept of Reaganomics, wherein the idea of offering a tax cut over a period of several years, by cutting back on government spending in the social areas, while still increasing government spending in the military areas, this as being part of the administrative program which, although does not have any particular effect on the Federal Reserve bank and its regulating of the economy, does have some effect on the amount of money that flows through the government from the society, and how it is spent.

This Awareness indicates that it is a secondary head of this machine, not having the total power to regulate the machine, but having a kind of secondary role, thus entities who believe that it is the administration's

policies and programs which are causing certain difficulties, these entities are only partially correct. That this may aggravate an already difficult situation, or may help, if properly handled, to alleviate a condition.

This Awareness indicates that the high interest rates over the past several years have in themselves created an austerity program which has slowed down the economy, essentially putting the machine to sleep, or at least to a resting position akin to meditation or limbo. This Awareness indicates essentially, the machine has gone into a slow idle position, and many entities are idle with the machine's position.

This Awareness indicates that the Reaganomics program as that which, along with the activities of the Federal Reserve, acting parallel, but not always in unison with the Federal Reserve's intentions, the Reaganomics program taking money from taxes, pouring this money into military programs, while removing the money from society's needs, the needs of individuals and social programs; in other words, taking money which comes from the masses, putting this money into a military machine, rather than giving the money back to the hungry and poor, the needy consumers,—this money going into the military machine, as that which under the Reaganomics program is intended by theory to create new jobs in industry as these military weapons and commodities are built and created.

Why Reagan's 'Tax Cut' Won't Work

But as this is being implemented, the consumers, having had their currency eliminated, are without work, without sustenance, leaning heavily on friends and relatives who likewise, have had their currency curtailed, and these entities all having very little currency, being idle or near idle, whereas the busy-ness of the society is essentially shut down, creates a situation wherein to one over-viewing the society, can see that the military budget is likened unto siphoning off energies from the consumers, from the society, from the machine that is asleep, or nearly asleep, and that the taxes which the Reaganomic program intends to cut, simply are not available to be cut, for the entities are not earning money, and therefore are *not* taxable. The currency is shut down and there is little that can be taxed. Therefore, the money which would go into the military machine is coming out of the society,—what little currency is there.

This Awareness indicates that the entity John F. Kennedy, during his administration, seeing that the economy was sluggish, used the tax cut as a measure for increasing the economy. In this instance, the cut in taxes allowed entities to have more money to spend, having received a kick-back from the government, and this money being suddenly released into the society, gave a kind of boost, or shot-in-the-arm of the machine, and the society perked up, picked up, and ran with greater vigor and energy.

This Awareness indicates that in such a case, there was not a deep recession, extremely high interest rates, and there was not the extremely high inflation which needed to be curtailed. There was simply a tired economy which needed a shot in the arm. This Awareness indicates that when the Reaganomics program was initiated, the economy was running rampant, almost running itself to death with over-inflation, much as Jimmy Carter's effort to run himself into a state of near frenzy and near self-destruction, this being almost analogous to the state of the economy during his administration, whereby the

economy reached a state of over-exertion, over-activity, over-inflation, and whereby the Reaganomics program seeking to cut government spending, as if this were the method whereby inflation could be curtailed, to cut government spending in the areas of social programs.

This Awareness indicates essentially, this could have been somewhat more beneficial, had it not been that the military budget, standing by, decided that it needed to have all of that which is deprived from the social programs, and the currency taken from social programs then being diverted to the military budget, whereby nothing was gained by this shift, and even energies of greater proportion were demanded. Therefore, the shift had little value in terms of cutting inflation, but it did have a great effect in terms of cutting down any business activities, whereby the entities of the society were left without any currency for spending or for generating activities.

This Awareness indicates essentially, it has created the greater gap between the powerful and wealthy groups, and those who are without currency. This Awareness indicates that in the attempt to offer a tax cut to society in order to bring about a stimulation to business, this is much likened unto giving a dying person a shot in the arm after having sucked all of the blood from the entity, so that the entity is weak and emaciated.

This Awareness indicates that the tax cut will benefit those who now have the currency, but what good is a tax cut to those who are without any currency, and who do not qualify even to pay taxes, for their earnings are too low? This Awareness indicates that stimulating business to produce, stimulating by offering tax cuts to corporations, as that which can in some instances be beneficial, wherein the corporations are in need of cash flow in order to produce and expand their activities, but wherein a corporation and its activities depends on consumers, and the consumers do not have the currency to purchase, these corporations in building more and more products and inventory, are simply storing up for nothing, and therefore giving businesses a boost for growth wherein there is no market for their products or services, does not face the issues according to the facts.

This Awareness indicates that therefore, until the total society is understood, whereby consumers are given the opportunity to purchase, the opportunity to tap into the currency, to receive the life flow and energy of the economic system, they are not viable as consumers, they are incapacitated as consumers, and the market place is empty, even though the merchants may be there with goods to sell.

This Awareness indicates that Reaganomics must be either abolished, or brought into a more balanced and integrated activity within a society, so that all of the society is served by the mechanizations of the Reaganomic system. This Awareness indicates that wherein an administrator of a country, wherein the executive branch of *this* government can work in cooperation with the economic policies of those who control the money, currency flow and interest, wherein these entities can work hand in hand for the good of the society, whether it puts the entire society into a state of rest, or into a state of hyperactivity, or if the activities keep an even flow it still can operate without crisis; but wherein the currency is cut off on both sides, throwing the consumers into a state of near coma, and the corporations are given all of the currency or the leeway to have their percentages of profits increased without a market available for selling such, and wherein the military monster stands by ready to devour all that is taken from the society's needy, and whereby the administration promises tax cuts, whereby

only those who are earning large amounts will benefit from such tax cuts, and those tax cuts are not then pumped into the society, then the entire action is but a futile action thrashing around, making sound and fury, and signifying very little, except making matters worse, rocking the boat, so that the what the Federal Reserve bank is doing in regulating the currency of the society, which may be painful, is even more aggravated by the excessive rocking of the boat.

Worst Depression in History Could be Coming

This Awareness indicates that essentially, the Reaganomics program will need to be altered, or the nation will experience the worst depression in its history. This could occur within a very short time, whereby the economy deepens very rapidly. This Awareness indicates however, it appears that the election of early November as that which may have been a strong signal and message to the Congress and to the House that something must be done if these individuals representing the masses intend to be re-elected. This Awareness indicates it appears that this message is leading these entities into more of a break with the Reaganomics program, and whereby there can be some strong measures in regard to salvaging some of the social programs and needs, while altering some of the programs which the Reaganomics advisors have promoted.

This Awareness indicates it appears also that the administration recognizes a problem to be more serious than earlier believed, and recognizes that there are basic flaws in their program. It appears also that the vote in reference to the nuclear freeze may have some bearing on giving Congress and the House greater impetus to curtail the military budget, and these things taken together can have an effect of balancing the energies, much likened unto the passengers of a ship telling the captain: "Sit down, you're rocking the boat!"

This Awareness indicates that the real determining factors, which are still uncertain, relate to the Federal Reserve regulations of the interest rates. Depending on whether these interest rates are lowered or raised, whether the currency is made to flow into society or whether the currency is curtailed to bring down inflation rates further; this will determine the future of the economy during the coming year, and for some time thereafter.

This Awareness indicates that it appears unclear at this time in reference to any social signals, to any given indications as to which course the Federal Reserve may choose. It may simply allow the interest rate to remain at a moderate level, allowing the economy to recover, or continue at its present level for some time to come. This Awareness indicates that this appears to be the most likely. That it appears there may be some slight alterations in the interest rates, but that these will not be great, being held within two or three points of where they presently are.

This Awareness indicates that this would give the economy a kind of recuperation, at a low activity level, much as a patient in a hospital who is kept inactive while allowing the fever of inflation to come down, but not put under sedation so that the entity is totally unconscious, or inactive in all ways. This Awareness indicates that essentially, it appears that this may occur in the coming two years, yet this is not entirely seen or clear at this time that this will be the policy.

EFT Mark of the Beast System Could Occur

This Awareness indicates also, it appears that there will be some increase in currency flow in the society

within the next two months, which may allow a slight upturn during the early parts, and possibly throughout part of 1983. This Awareness indicates that it is too soon to see clearly what the policy of the Federal Reserve banks shall be in this regard, for it depends largely on other plans related to the change in currency from the alternate programs mentioned previously in reference to Electronic-Funds-Transfer, and such systems as would be necessary to bring this into effect.

This Awareness indicates that it appears this entire scenario is yet to be determined as to the time of its implementation, or when it can or will be brought into public attention levels. This Awareness indicates that depending on decisions of entities behind the scenes, behind the Federal Reserve activities; this could alter any programs which the administration pursues, or which may be activated by the Federal Reserve.

This Awareness indicates that it is not presently clear in regards to this. This Awareness indicates that this does have some potential to deepen considerably if these entities choose that the time is right for implementing the deep recession which would allow for the Electronic-Funds-Transfer System, and the numbering and mark of the Beast program to be implemented into society. This Awareness indicates that it is not clear however, that this is the proper time for this, and these entities have not yet made that determination.

This Awareness indicates that there is also that unpredictable reality in reference to the Skoptsis, and the international scene which these entities are well aware of, and are aware that if they implement this program without having first neutralized the Skoptsis, they may lose many of the people of this nation and others, who will tend to lean more toward following and relying on the Skoptsis as redeemers in opposition to their program of economic slavery through the mark and Electronic-Funds-Transfer System.

The 'Alternative 4' Plan to Depopulate Earth

This Awareness indicates that it is essentially this lack of confidence and fear of the Skoptsis and the masses in reference to this which serves to curtail the implementation of this Electronic-Funds-Transfer System at this time. This Awareness indicates this also ties in with the potential of the Global 2000, wherein these many entities could suffer through starvation, sickness and disease if these plans are implemented. This Awareness indicates that essentially, the Global 2000 may be equated to that which could be 'Alternative 4.'

This Awareness indicates that 'Alternative 3' is still in operation, but that the Alternative 4 as being that program which would depopulate the earth to a degree of approximately two-thirds, or three-fourths fewer people, whereas one-fourth, or one-third of the present population would remain. This Awareness indicates that all of these plans are tenuous, depending on many circumstances, particularly the unknown, or unpredictable force associated with the Skoptsis.

The Russian Bear Begins to Growl

This Awareness indicates that entities may begin also to recognize that the Russian Bear has come out of hibernation and is beginning to awaken and growl. Its low-profile is now becoming more flamboyant and visible, and entities may find that within the coming months, it does not like being prodded from its low-profile hibernation by a cowboy with a stick, and that it is now close to antagonism, or may be goaded into going on a rampage.

WHAT ABOUT THE STOCK MARKET ?

QUESTION:

Awareness, what about the stock market? It's hitting historic highs almost daily. Is this for real? Or is this suddenly going to crash and a lot of entities lose a pile of money?

COSMIC AWARENESS:

This Awareness indicates that this as having been created from the lowering of the interest rates, and the hopes which entities have that the companies, corporations, and so forth, will have access to freer money and currency, which will then begin allowing for these corporations to grow. This Awareness indicates that essentially, the market has over-reacted to the energy being given, and the stock market may be equated to a graph, whereby an entity is given a shot in the arm to revive the entity, and the graph jumps wildly at the time, going too far, showing greater revival than is actually present within the entity.

This Awareness indicates that the reason for this excessive reaction is that many entities, knowing that the decrease in interest rates means that these corporations can become more active and productive, realize that the stock market itself is going to move upward, and wherein the stocks might move upward to, for example ten points normally, if there are one-hundred entities seeking to get in on that ten points, and each one purchases one point, the market might rise one hundred points, simply because it has too many entities for the amount of growth that is appropriate, and none of these entities want to get off for fear they will lose out on the ten points.

This Awareness indicates that at some point along the way, there will be a recognition that there are too many entities on this, and the amount is not going to be that great, and "I had better sell while I can, or I'll end up having everyone else sell, leaving me holding the bag." This Awareness indicates that when this occurs, many of these entities will begin to jump off the bandwagon, so to speak, and the points will settle down to where it would more appropriately be in reference to the amount of currency, or the energy that has been given to the situation.

This Awareness indicates that those who get on first and get out first, generally profit most. Those who follow and who get out last, may find themselves losing. This Awareness indicates that this depends of course on whether or not the interest rates are truly going to have an effect on the industries and increase the business and the activities. This Awareness indicates essentially, it does appear that there is an upturn in the society, the business, and the economic activities. This Awareness indicates however, as to how long this may continue, this is a question which is not answerable at this time, and which may come to light in a relatively short time.

If the next alteration in the interest rates from the Federal Reserve show an increase in the interest rate, then entities will know that this boost in the economy is short lived. If the next alteration in the prime interest rate at the Federal Reserve is to drop the interest rate even further, then entities will know that the economy is indeed in an upswing, and may continue in that direction for a time.

This Awareness indicates that it appears that the vote by the masses in the United States in reference to a nuclear freeze has given the Russian bear the signal to roar and growl in hopes that the American masses will feel somewhat intimidated, and pounce upon their leader to back off and "leave that thing alone". This Awareness indicates that it appears also that this will occur.

This Awareness indicates essentially, it appears that there can be a number of reconciliations brought about by these confrontations and realizations that have come to light as a result of the past election. This Awareness indicates that this past election as being but a small voice in the movement of history, yet that small voice appears to be such as to have a subtle and powerful effect on the direction of energies in the future.

ED's Note: for more information on the Electronic-Funds Transfer System and the Mark of the Beast, please refer to the many back issues of 'Revelations of Awareness', particularly, 79-1 (The Gathering Storm);\$4.00;79-11 (The Mark of the Beast, part 1);\$2.00; 80-26 (Part 2);\$3.00. For more information on the Skoptsis, please refer to No. 82-12 (The Mystery of the Skoptsis)\$4.00 from C.A.C.

The reference to 'Alternative 3' by Awareness concerns the slave labor used to work on the Moon and Mars bases—entities either kidnapped or who volunteered to follow some guru who told him he had contacts with UFO entities who could "rapture" him into space. These entities called "Batch Components" and who are programmed by computers etc. to follow like sheep those who run the Alternative 3 operations. Awareness has given considerable information on the Alternative 3 program which has been in effect for many years. Much of which is outlined in the book by the same name. Alternative 3 is essentially a colonization program which many countries are partaking in, the money mainly coming through the National Security Agency.C.A.C. has not as yet published this information, but did send it on to SPIRAL, P.O. Box 80323, Lincoln, Nebraska 68501 which has been publishing a very revealing series on this secret Alternative 3 project. Much of the information from Awareness has been published in this series by SPIRAL. Entities interested in this information should send \$5.00 to SPIRAL at the address just given and request the 3 part 'Alternative 3' series. Avaton.

This Awareness indicates that entities may begin to speculate on what the Federal Reserve will do, in terms of turning on or turning off the currency, by understanding what it seeks to accomplish. This Awareness indicates that whereas there is still the desire to bring down the inflation rate, the Federal Reserve will keep the interest rates high. Wherein the concern is for the unemployment rate, the Federal Reserve will drop the interest rates.

This Awareness indicates that by watching statements made by Paul Volcker in reference to unemployment or in reference to inflation, entities may begin to second-guess what the next alteration of the Federal Reserve prime interest rate will be. That wherein the concern is for unemployment, the interest rate will be lowered. Wherein the concern is for inflation, the interest rate will be raised to bring the inflation down.

This Awareness indicates that at present, in late October, Mr. Volcker stated that the unemployment was the number one concern at this time, therefore, it appears that the interest rates may decline, and in so doing, stimulate the economy somewhat until the number one concern is in reference to the inflation rates. This Awareness indicates if the inflation rates continue to decline, or if the inflation rates begin to rise, entities can second-guess what Mr. Volcker will do, and if inflation rates continue to decline, then you can also expect that in probability, the interest rates may be held or dropped somewhat.

This Awareness indicates that wherein the inflation rate begins to rise, you may second-guess that the interest rate will rise also, in order to bring the inflation rate down. This Awareness indicates this of course is assuming that the Federal Reserve is being operated in a manner which is *intended to benefit* the economy, and *not* to manipulate the economy into a depression or hyperinflation situation.

This Awareness indicates that wherein such opposite actions occur, whereby for example the inflation rate begins to rise and the interest rates drop quickly, or drop considerably, you can presume that Mr. Volcker is attempting to create a hyperinflation, or is allowing such to come about, and you may predict that the inflation will increase rapidly. This Awareness indicates in such a case, you may wish to purchase properties, precious metals, or other commodities which will increase in value as the money inflates.

This Awareness indicates that on the other hand, if the entity begins to raise the interest rates when the unemployment is high, and when inflation is dropping, you can be relatively assured that the economy is moving into a deeper depression, and that this is what this entity intends to do.

RECALL OF MONEY AND E.F.T. SYSTEM TO COME IN NEXT 2 YEARS--MAYBE SOONER

QUESTION:

Awareness, a week or ten days ago, Sam Millar came over. He was rather upset, saying that he felt very strongly that something was in the air concerning the money and banking system. This kept showing up in his Tarot readings for entities and he was concerned about entities who had money in the bank and so forth. He couldn't pinpoint exactly what this was but it did concern changes in the banking system which overnight could ruin many entities. I told him

what Awareness had previously given in reference to the possibility that a new currency would come out overnight with a minimum of gold backing, or some similar type of thing where they would recall the currency. Was that what Sam was picking up on?

COSMIC AWARENESS:

This Awareness indicates this appears to be in the affirmative. This Awareness indicates that this appears *still* to be a strong and probable action. It appears that this will occur in connection with Saturn moving into Scorpio, which essentially is the sign which rules banks and the monetary system; Saturn being a kind of restrictive energy, requiring great attention and responsibility in relation to this.

This Awareness indicates that this also can have an effect of strengthening the monetary system so that it is not so confusing and so uncertain. This Awareness indicates that the difficulty with this is that it also can give the monetary system such strength that it becomes tyrannical. This Awareness indicates that essentially, it appears as a strong possibility, bordering on probability that this next two years will see the implementation of the Electronic-Funds-Transfer System, the new currency, and this Awareness indicates that this could in fact come about overnight, in a relatively short period of time.

This Awareness indicates however, that as indicated previously, the unknown factor,--the Skoptsis,--and their influence in the world, and the continually awakening masses who now, in multitudes, are becoming more and more aware of the potential for economic tyranny through the Electronic-Funds-Transfer System; this is also an unknown factor. This Awareness indicates however, it appears that these alone are not at present time sufficient to deter or to prevent this from occurring.

Ahriman the Antichrist Still to be Experienced

This Awareness indicates that this essentially relates to the concept of Ahriman, the the Antichrist, which is still to be experienced by the human condition, whereby this still appears to be necessary before humanity awakens to higher spiritual realities. This Awareness indicates that Ahriman as the ruler of astral energies associated particularly with electronics, and mind control. This Awareness indicates that Lucifer as having been associated with deception and with the theft of energy from others; this associated in part with the concept of vampirism. That Lucifer essentially, has returned to the Godhead, and is no longer a powerful or threatening force on the planet Earth.

Mankind Had Little Love, Compassion or Mercy Before the Advent of Christ

That the entity Christ as a force, or concept and force that has its influence in humanity's life and evolution, bringing about such as to create within the human condition feelings of mercy, feelings of love, feelings of compassion for others. Such feelings as being essentially missing from humanity in earlier days of its evolution, except for family and motherly instincts. This Awareness indicates that even in early families, brothers and family members would often slay one another without great compassion or concern for each other's welfare, but with the advent of Christ, these passions have been altered significantly in the human condition, and entities now experience those feelings of compassion.

This Awareness indicates that mercy itself is a relatively new concept, also recent with the advent of Christ. This Awareness indicates that the advent of Ahriman as that which relates to the concept of dependency and of power through electronics, through relationships, through systems, and through interlocking and manipulating and crystallizing energies. This Awareness indicates although this concept of Ahriman as a Persian concept, it can be equated to the Christian concept of the devil, and in astrological terms, equates in part to the energy/symbolism of Saturn, the crystallizing energies of holding.

This Awareness indicates however, it also has still another aspect which is associated with Uranus, whereby the electronics and unseen forces are utilized by this Saturnian energy to hold and capture, and create fields which would entrap and contain energies of entities. This Awareness indicates that this in part, also relates to the movement from dimension to dimension.

This Awareness indicates that this in part relates to the concept of Stealth, to the concept of the Philadelphia Experiment, whereby energies traverse from one dimension into another. This Awareness indicates that the concept of Ahriman having moved, and being able to move the astral dimension into the physical form and shape through certain electronic devices, through certain electronic inventions and energy fields upon this planet at this time; this is that which this Awareness would discuss in the next reading.

This Awareness suggests the Interpreter be brought from trance.

ED's Note:

From that simple question about Sam, the following material was brought forth in the Opening Messages of the next three trance sessions.

The Web of Conspiracy...(Part 3): The Coming of the Antichrist

the Forces of AHRIMAN

(Part 2) AHRIMAN AND HIS HOSTS

(Opening Message, C.A.C. Gen. Reading No. 2)

COSMIC AWARENESS:

This Awareness indicates that this as the continuation, or second part of the previous reading. This Awareness indicates that in reference to the energies of Ahriman, this Awareness wishes to bring together certain concepts which may better help entities to understand what is coming in the future, and how to deal with these energies. This Awareness indicates that the concept of Ahriman, the Persian entity who is representative of the force of materialism, as similar to that of the Hindu Kali, or Kal, and of the Christian and Jewish being known as Satan or the devil. These representing that force on this planet and on certain physical realms which tie the human consciousness to the physical plane through the process of identification with physical matter to such a degree as to make it difficult for the entity to disidentify with material objects, things or attachments which the entity values.

This Awareness indicates a perfect picture of this force is seen in the Tarot card known as the Devil, wherein a being hovers over a cube of matter, appearing to be a large stone, this being in the image of a negative being, such as a devil-like creature, and standing down below, with chains attached to their bodies, linked to the stone, are two beings: a male and a female, having certain appearance, likened unto a goat; having horns and hooves in their physical bodies. This Awareness indicates these beings representing the male and female humans being somewhat materialistic, and likened unto having animal qualities; Capricornian symbology of the Goat, representing materialism, that is often symbolized by Saturn, which rules Capricorn, and by the stone cube, which symbolizes the cube of materialism, or the material values of the earth.

The being hovering over this, looking down upon these entities, as being a kind of demonic creature, representing material essences which are devoid of spiritual and more refined development. This Awareness indicates that this card corresponds in appearance to the card known as the Lovers, wherein an angel hovers over and above two entities, male and female, in that which appears to be likened unto a garden. This Awareness indicates this representing a higher state of existence; the angel representing the Higher Self, or Higher Consciousness; the male and female representing the conscious and subconscious of an individual, whereas the Devil card symbolizes the male or female, or conscious and subconscious aspects of an individual being chained to matter, and the Oversoul of the entity being directed by those inimical forces, or the Alien Force, or that which is demonic, or is associated with Kal, or Kali, or which may be referred to as Ahriman and his hosts.

This Awareness indicates that this as representing the entity who allows negative, or alien forces to be channeled through the entity's conscious and sub-conscious, through the entity's attachment to material values, and the devoid existence of any spiritual essences. This Awareness indicates that in the movement of human experience on this plane, the concept of Lucifer, the fallen star, or that which is pride and vanity, egotism which has plagued humanity, the concept of separateness as opposed to unity or holiness (whole-ness) or totality; this has long been a problem for humanity, whereby individuals have not only experienced their individuality as portions or parts of the universe, but have seen themselves in opposition and in conflict to the universe and to other parts, parties or portions of the universe. This as contributing to much competition between entities within the universe.

This Awareness indicates that this Luciferian concept or quality as that which has been diminishing for approximately 10 to 15 years, as Lucifer has returned to Essence, and is no longer asserting influence into the realm of consciousness. This Awareness indicates however, that there still is the materialism, and those energies associated with Ahriman, the Antichrist. These forces still active upon this plane, and essentially, still growing stronger.

This Awareness indicates that humanity in its evolution has yet to peak out on the Ahriman influence. This Awareness indicates that in terms of the Christos, or Christ, or Crystal Force which is associated in human evolution with the gestalt or totality of consciousness, the recognition that all is One, that all entities are part of a friendly universe, that all parts in the universe can contribute to a wholesome existence, if all parts are loving and merciful to one another; this Christos energy as that which has been sustained and active over many eons of time, prior to the Christian era, dating back beyond Atlantis and beyond prehistoric and written history.

This Awareness indicates that even though this has been present, it has not always been as strong as it has been since the Christian era began, whereby the exemplification of mercy and love has been made more wholesome and given a more predominant role in human consciousness. This Awareness indicates that this force as that which is still strong and active upon this plane. This Awareness indicates that this force as continuing and holding the Light while humanity continues to move through its progress, procession, and movement on the path of evolution.

This Awareness indicates that the energies of Ahriman have been active and steady also, and are at this time growing stronger, even as also there are many other forces in the Christos realm of Light Workers whose energies are bringing more love and mercy to this plane. This Awareness indicates that in the realm of the Christos energies, these are not confined solely to the Christian philosophy, but also are expressed in other religions around the world, and in other philosophies, not claiming to be Christian in nature; the concept of love and mercy and light as a path, whereby the truth, the light and the path are representative of these Christos energies.

A BRIEF HISTORY OF AHRIMAN-THE SATANIC FORCE

This Awareness indicates that while these remain relatively steady or growing, the Ahriman energies have in recent years begun to grow even stronger than they were previously, taking up the room,

or vacuum created by the removal of Lucifer and the separative energies. This Awareness indicates that the concept of Ahriman as that which needs to be explored briefly in relation to its social effects and its effect upon the human evolution. This Awareness indicates that It also can assist in opening areas which have remained mysterious to entities, whereby certain questions may be answered by better understanding of the Ahriman forces and energies.

This Awareness indicates that essentially, the beginning of the energies of Ahriman's contact upon this plane are recorded in ancient legends, stories, myths and experiences in regard to forces which go bump in the night, forces which enter into the material world, using entities for demonic purposes, or capturing the souls of entities, or using those entities to do actions which are neither loving nor merciful.

This Awareness indicates that these Ahrimanic energies are somewhat different from the Luciferian energies which are essentially based on conflict, separateness and fear, pride and vanity, and personal ego desires for individual security. This Awareness indicates these Ahrimanic energies as being more of the nature of harming others in order to experience the power which one would feel from such action, or seeking power for power's sake, in order to be ruler over some portion of the material plane, or material beings.

This Awareness indicates that this as being the satanic energy qualities. This Awareness indicates that these energies have been known and experienced down through time, and that there are many references to these energies in all religions and philosophies, ancient and modern. This Awareness indicates however, a more recent experience in human evolution occurred wherein during World War Two, these energies began to open the doors into the physical plane from the astral, or inner planes of the realms known as limbo or the sub-astral levels, whereby these energies of Ahriman could begin to move into material levels.

How Life Exists Simultaneously on Many Levels

This Awareness indicates that much of this is due to the electricity and use of electricity, and some is also due to the unleashing of nuclear energy: that these forces helped to break down the barriers in the realms between this physical vibration and the astral vibrations of the other planes. This Awareness wishes to remind entities briefly of John Keel's book, *The Eighth Tower*,* in which he speaks of the electromagnetic fields, and whereby this electromagnetic field has varying frequencies, ranging from the extra-low frequency levels to those which are within the hearing range, to those which are yet higher, in heat ranges, and to that which is the infrared range, which is essentially the 48th octave, to that which is of your own 49th octave, the octave of light and color as you see it, to that 50th octave of ultraviolet, and on up through the higher octaves of the microwaves, the gamma rays, and into the cosmic rays.

This Awareness indicates that these many different octaves contain within each of them certain realms whereby energies exist, and entities may exist on those frequencies, and may be unseen from other frequency levels in other octaves. This Awareness indicates that these many frequencies may exist in the same time and space, even as sound in the lower frequency levels may exist in the same space as sight, or light, and may also exist in the same space as heat, and may also exist in areas of extra-low frequency, and even in areas

wherein matter exists. These different frequency levels may all occupy the same time and space, and still not interfere substantially with each other's existence. Likewise, these different realms of energies and frequency levels may include inhabitants from different levels which occupy the same time and space, without substantially influencing each other's existence in that time and space. This Awareness indicates an entity from one level may in fact stand exactly where you are standing in terms of time and space, may in fact inhabit one's body. This being may be angelic or may be demonic, and may be somewhere inbetween, so that an entity experiences a subtle feeling of change in attitude, as though something had come over the entity,--a mood, or a different personality, or something which the entity feels, which makes the entity feel somewhat different than normal.

This Awareness indicates that these beings can also pop in and out of certain frequencies into other frequency realms, under certain circumstances. This often being very difficult, whereby the vibration rate must be altered substantially in order to jump into another octave. This Awareness indicates that when entities move into the dream state, essentially they are altering their consciousness vibration, and wherein entities see themselves moving from place to place in a dream, this energy which is extended into this area as that which requires a certain amount of sustenance and focus in order to maintain that activity.

HOW ASTRAL SHELLS FEED THE SATANIC FORCES

Wherein the focus is broken, the entity's activity may be shattered and the entity awakens from the dream and experiences something totally different. This Awareness indicates likewise, sustaining oneself in the physical plane requires a certain amount of sustenance and energy and focus.

This Awareness indicates that the Ahriman forces, from other planes in order to move into the material plane, require substantial energy to do anything more than simply materialize as an apparition, or as an image of fleeting moment, and these fleeting images, these phantoms of the night, these ghostly forms, moving into the material realm, have difficulty in remaining on those levels, and require great energy to continue.

This Awareness indicates that often such energy is supplied by intense traumatic experiences on the human level, whereby the emotions feeding astral energies, allow those energies to materialize briefly, in some form, on the material plane. This Awareness indicates thus, astral shells often receive great energy from some circumstance wherein the entity has been grossly violated, and passes over, leaving much emotional energy to linger in the old area, to haunt those areas for years, or even centuries thereafter. These energies then, haunting that area, may serve as a kind of bridge between these frequency octaves of different vibrations, the physical and the astral planes. This Awareness indicates that these astral shells are not actually entities in the full sense of a complete or completely evolved entity, but are rather mere cast-off portions of an entity,--the emotional energies which the entity dropped as it moved on into higher experiences in the higher planes.

* The Eighth Tower, by John Keel has been in and out of print various times. The last version we know of is Signet (pocketbook) 451-E7460 published by The New American Library, Inc. PO Box 999, Bergenfield, N.J., 07621. Write for their free catalog. It may be listed. (C.A.C. does not stock this book at this time).

This Awareness indicates the entity having left an astral shell, may well have moved on, reincarnated into another life, totally forgotten that traumatic experience, or may in fact have moved on into Essence, or into Celestria, or that which is known as Heaven. This Awareness indicates that still the astral energies may remain, and it is this astral energy which assists in feeding those undeveloped souls known as the hosts of Ahriman, or that which is the demonic forces.

This Awareness indicates that these are simply forces which have not evolved spiritually, which are still being created and sustained by those traumatic experiences of the human condition, whereby these cast-off energies, not having their complete evolution, band together for purposes of greed and need, needing to feed off of the energies of spiritual beings, needing to destroy and devour the spiritual energies upon this plane, and seeking power through these energies whereby the plane can be ruled and governed in a material way, to allow them to feed off of the spiritual energies which remain.

This Awareness indicates that the great joy of these cast-off astral shells and energies comes in having power over others. This Awareness indicates that these are essentially the Ahriman energies. This Awareness indicates that these energies are devoid of mercy and love, but are capable of being taught, are capable of being shown, are capable of evolving into beings which are loving and are merciful. This Awareness indicates that these may be seen as rudimentary or elemental creations that have not evolved into that more refined area and which are basically of a very crude vibratory rate.

This Awareness indicates that this may be compared to the concept of Darwin's evolution, whereby he saw man evolving from the primates of a very gross nature. That essentially, from these demonic energies, these which are less than spiritual, the evolvement of such energies can eventually, given enough time and given love and mercy in the proper way, these energies may in time develop into higher and more refined beings.

THE "PHILADELPHIA EXPERIMENT"

This Awareness indicates that in understanding the interdimensional quality of the Ahriman forces, entities may now recall that in 1943 there was that experience and experiment conducted by the Navy known as the 'Philadelphia Experiment', whereby a naval ship is said to have been made invisible. This Awareness indicates that this action as reported in a recent paperback book, and also as reported through certain writings associated with the UFO phenomena and research projects of individuals. This Awareness indicates that in these reports, entities may recall hearing of those who, in moving as crewmen on the ship, reported that there were extra entities, or other entities on board the ship; when they passed over into the invisible realm, reporting back that there were other entities on board the ship, other than the crewmen. This Awareness indicates there also were reports that some of these crewmen aboard this ship which was made invisible, later went insane.

One was reported to have walked through a wall in his own home, before his family, and disappeared forever. Another was reported to have burst into flames. Others were reported to have gotten frozen, or locked into the invisible field, never to return. Others reported that it was necessary to go into this invisibility field again, to bring back those who were frozen. This Awareness indicates that these areas and these reports have many mysteries connected to them.

This Awareness indicates that as the ship disappeared in one area, it was reported to have reappeared in still another area, whereby the crewmen of the ship, several of these entities were seen to have left the ship and walked into a restaurant, with only the upper part of their torsos showing, and having no legs visible. This Awareness indicates that these reports are generally scoffed at by most serious and logical entities, yet the reports are there, and there are many who take them seriously.

This Awareness wishes at this time to explain also that this Philadelphia Experiment was related to certain discoveries in regard to Einstein's Unified Field force theories, and that the Navy, although it was reported to have ceased in the operations because of the toll on personnel, it did not in fact cease, but continued working in these areas to further discover more how to perfect this invisibility shield.

DR. BETER'S "DUPLICATE WAR SHIPS"

This Awareness indicates the ship was said to have created a hole in the sea where the ship sat, but the ship itself was invisible. This Awareness reminds you of recent messages from Dr. Beter, in which he spoke of the Stealth planes, and of ships which were invisible in the area of the Falkland Islands and in New Zealand. This Awareness reminds you also of the entity Dr. Beter, when he mentioned a ship which was sunk, but whereby he also indicated that many of these ships were built in pairs, duplicates of each other. This Awareness indicates that these duplicates, whereby one ship may be sunk, lost, and yet still appears to be present, allows for such losses to occur without any knowledge from the public that the ship has been lost. This in reference to the carrier... (this appears to be the Nimitz). This Awareness indicates that in reference to these invisible crafts, the Stealth plane was also used briefly in the Vietnam conflict, this unsuccessfully. This Awareness indicates that essentially, this Stealth plane as being a creation which appears to be ultra-modern, but this also dates back into ancient times, relating to the valence craft, written in ancient Indian and Tibetan books in reference to these crafts used far back in prehistoric times.

THE "STEALTH" CONCEPT-THE SECRET OF INVISIBILITY

This Awareness indicates that the creation of the Stealth concept of invisibility as that which relates to the use of heat and cold to alter the frequency of molecular polarization, the polarity of an atom whereby the electron and proton, having their respective negative and positive charges, may be altered by temperature variations, whereby these are brought down to a near absolute zero, creating an inversion of the polarities, so that the atom particles change their polarity, and the atom itself is no longer visible on the material plane.

ED's Note: for more information on all this, please refer to 'Revelations of Awareness', No. 80-9 (Project Invisibility,-- Einstein's Unified Field Theory Proved & Used by the Military). \$3.00 from C.A.C. This same issue also has more information on Ahriman and the suicide squads he left when he fled this plane in the spring of 1979. In this particular reading given at that time, Awareness indicated that the chances were slim that Ahriman would ever return to this plane. However, it did leave that possibility, which today appears to be occurring. (All those bloody murders and other violence and violations you read about in your daily paper, all those rapes and senseless acts are being motivated through entities by these Ahrimanic forces.)

This Awareness indicates that in reference to the ship, and entities moving into the field created by these alterations of these energies; it is in this way that the crew members were said to have been frozen. It is for this reason also that certain crew members burst into flames; the polarities being altered significantly. This Awareness indicates that essentially, it did not require that the ship itself be frozen to absolute zero, but rather that certain particles in a particular area be altered significantly through the use of heat or cold to create an alteration of the atoms involved, and in this action a field of energy would be emanating outward within a particular sphere, cancelling, or defusing, or altering the polarity of the atoms within its range.

This Awareness indicates that this related to the use of sound frequencies altering the frequency of a particular polarity, or vibration. This Awareness indicates that as this occurred, it also assisted in making room whereby those from other dimensions could move into this dimension, and from this, there became greater openings for the astral or Ahrimanic forces to enter into this plane.

This Awareness indicates that likewise, those forces which were prevalent in this plane, but on less physical level, whereby through the entry into ancient caves upon this plane, or tunnels within the outer surface of the earth, these forces have been prevalent upon this plane for many hundreds of years, even thousands; these forces could take on more dense forms, as a result of the changing vibrations, caused by both the release of nuclear energies, electronic energies and the vibrations being tampered with.

This Awareness indicates that during this time, shortly thereafter, the so-called UFO appeared on the scene, these being essentially forces from other frequency levels, frequency rates, invading into this particular octave or frequency of the 49th octave. These forces also being capable of transversing: moving into infrared or ultraviolet octaves, and disappearing.

This Awareness indicates that the force known as Ahriman is not simply a single individual, although it can be personified by an individual, but rather is a vibration which can emanate through into this plane from its own vibratory rate, and entities attuned to that vibration may enter into this plane, and remain for a brief period, depending upon how well they can stabilize in this vibratory frequency.

MICROWAVES, ROCK MUSIC ASSISTS DEMONIC FORCES

This Awareness indicates in the past, it required intense energy coming from ritual from individuals who were emitting energy sufficient for these demonic forces to enter. This Awareness indicates at present, these forces as having made certain agreements with individuals of high technological levels on this plane, and having given many electronic creations to individuals on this plane which are assisting them to enter and remain for longer periods on this plane.

Many of these electronic inventions, the inventors are not even aware that their activities are assisting these forces of Ahriman to enter upon this plane. This Awareness indicates for example, the microwave energies tend to be helpful in allowing these entities to enter upon this plane. This Awareness indicates also that the intense music of the deep heavy rhythmic beat, the electronic musics, as also allowing the astral energies, or energies of Ahriman to enter upon this plane.

This Awareness indicates this as all part of the scheme of human evolution upon this plane, and therefore entities need not feel that they are contributing to something alien or evil on this plane, for it is part of the plan to empty out these astral and sub-astral planes into this 49th octave, so that they may be brought into focus and lifted into higher evolutionary activities.

This Awareness indicates that as these energies break down between the two planes, and the sub-astral energies empty into the physical plane, many of those forces which are associated with Ahriman manage to pop into this dimension and remain for longer periods of time. This Awareness indicates they also have certain influence on some entities upon this plane, giving them technological advice and assistance; this including the assistance and advice in regard to the Electronic-Funds-Transfer System banking systems use of computers for keeping track of individuals. This including the many electronic tracking device systems which may be used for purposes of war, or guidance, or for bugging and controlling others; this including electronic surveillance techniques and electronic manipulation of entities. This Awareness indicates that these uses of electronics are closely associated with the Ahriman forces, yet these electronic energies also as necessary for the higher development of the human condition, the human evolution.

UFOs AND THE MEN IN BLACK (MIB)

This Awareness indicates there is that energy associated with many stories of the UFO lore, known as the MIB, the Men in Black. This Awareness indicates typical stories are that these entities may appear after a UFO sighting, may appear to the entity having seen the UFO, and may tell the entity to, "Forget about what you saw. You did not see what you think you saw." This Awareness indicates

there are reports that these entities have difficulty with time, and often ask questions in regard to time, and often their phrases are turned about in an unusual manner, such as asking: "What time is it here?" or "What time do you have?" or "What time do you use?"; questions relating to time, and questions also worded in a manner which does not flow properly in the usual sense. These entities however, generally speaking in the language of the person to whom they address.

This Awareness indicates that also, these so-called MIBs have been said to appear dressed similarly in long coats, dark hats and suits with shiny black shoes, looking like oriental, or a cross between oriental and gypsy in appearance, having olive shaped eyes and olive colored skin. This Awareness indicates these entities often appear as somewhat oriental, yet, do not quite look oriental. This Awareness indicates that these entities have been said to appear on an entity's doorstep with perfectly shiny shoes, without any trace of mud, while the driveway and yard was completely muddy, indicating that the entity had not walked up the porch at all to the door, but simply appeared there from out of nowhere.

This Awareness indicates that these stories create many questions from entities wondering whether such entities are real or are phantoms, or are strictly creations of entities' imagination. This Awareness indicates that

basically, these MIBs are capable of moving from one dimension to another. This Awareness indicates they also are said to have use of automobiles, and generally use the black Cadillac, or another large car that is unlicensed, or licensed, but when checking the license it is discovered that it is not registered to an automobile or owner. This Awareness indicates these automobiles have been reported to have disappeared right in front of those who were following, or as having disappeared after driving down a dead-end road. This Awareness indicates essentially, these automobiles have this same device within them which allows them to electronically move from one dimension or frequency, into another, and the purpose of the MIBs reporting to an entity that the entity did not see the UFO, the purpose is in fact to reinforce the entity's mind that he or she did in fact see the UFO.

This Awareness indicates these entities appear not only to persons who are in positions of authority and respectability, but often appear to the farmer or isolated person who is away from the crowd. This Awareness indicates the reason for appearing to the isolated person is to create the impression that they are not necessarily wanting to be noticed, are not wanting to be recognized. This Awareness indicates that the fact is that these entities are moving more and more into this realm, and seeking recognition through rumor, through the repeated contacts with persons of an isolated experience, as well as through those who are in the more respectable positions in society.

These entities, in telling others, "You did not see what you think you saw", are in fact attempting to reinforce the reality of the experience, so that the entity cannot possibly forget what he or she witnessed, and if having any doubts about having witnessed this, will no longer have doubts after being told by these entities that they did not see what they thought they saw. This Awareness indicates in this manner, the Ahriman forces are moving into this dimension, very slowly, very subtly, in a manner whereby entities are becoming more and more accepting of the concept of others from outer space. This Awareness indicates the actuality is that these entities are coming from other dimensions rather than from other planets.

This Awareness indicates likewise, the so-called Space Confederation is not simply from another planet, but is from other dimensions, and these forces also can traverse dimensions; these being interdimensional beings also. This Awareness indicates that the Ahriman forces would like entities to believe that they are in fact from other planets, so that when they appear upon this plane they can appear to be highly evolved and bringing great technology, and being friendly in nature.

This Awareness indicates that the fact is, these forces moving upon this plane are part of the grand design whereby mankind will be tested, to determine whether the individuals involved are capable of rising above material greed, and retaining their spiritual instincts, or whether they succumb to these forces of lower vibration, and allow those forces to dominate and rule humanity, even in spite of their lower vibratory qualities, simply because they have more power.

This Awareness indicates that those entities who are spiritually evolved will, figuratively speaking, be lifted from this experience, raptured in a sense, by those of the Intergalactic Space Command, or the Space Confederation, or whatever you desire to call these interdimensional beings who will serve as protective guides, to deliver those who are merciful and loving from the intense experiences which will be placed upon others who succumb to the greed and materialism of the Ahriman forces.

WILL LIGHT WORKERS BE 'RAPTURED'
WHEN THINGS BEGIN TO GET HEAVY?

This Awareness does not indicate this being likened unto a lifting off from this planet, in the usual context of a rapture, whereby entities are picked up by spacecraft to avoid the tribulations. This Awareness indicates however, that this is not an impossibility, and that there are also other ways whereby entities may be raptured, including the possibility of being dematerialized, and moved into other dimensions while the tribulations occur upon this plane, under the Ahriman forces.

This Awareness indicates that *It* will perhaps give more information in this regard at a later time. That it is not imperative that entities understand these actions, but it is important that entities understand the need to remain spiritual during the coming years, and not to become too overly concerned with material needs and attachments. This Awareness indicates that entities should always realize their true attachment is to the Divine Forces of the Universe, and that they are simply visiting the material plane for a brief period.

This Awareness indicates also that it is important that entities recognize the purpose of Ahriman and its forces is to keep them attached to the material plane, so that they cannot escape the bondage or chains, or emotional attachments to this material realm. This Awareness indicates that those who wish not to be bound by Ahriman's forces must find ways whereby they are in the world, but not of it,--attached to the spiritual creation, rather than the material creation.

This Awareness indicates that a pause is needed, to look at certain energy.

This Awareness indicates that any questions in regard to this may be asked at this time.

QUESTION:

When these entities are raptured (possibly), are they going to inter-dimensions, or are these actual UFOs that will lift them to other planets?

COSMIC AWARENESS:

This Awareness indicates that *It* does not at this time wish to determine or to distinguish the approach or methods whereby the Confederation will create the movement or alteration. This Awareness indicates that *It* does not at this time wish to discuss the concept of rapture, other than as has been given.

HOW THE MEN IN BLACK TAKE THEIR
CADILLACS INTO OTHER DIMENSIONS

SOME OTHER DIMENSIONS ARE SIMILAR TO EARTH

QUESTION:

In reference to the MIBs' Cadillacs or cars; once they leave the physical plane, do these cars serve a purpose on other dimensions other than their use on earth?

COSMIC AWARENESS:

This Awareness indicates that these automobiles can be used in the other dimensions, for in that other dimension there is also the physical earth. That there are physical landscapes and movements and energies in other dimensions, just as there are in this dimension. This Awareness indicates that entities in moving into these other frequency levels often encounter landscapes

with unusual foliage, vegetation, or different colors for the sky, or different colors for vegetation, depending on which frequency level they may be experiencing.

This Awareness indicates as previously mentioned, these landscapes may inhabit the same energy, the same time and space as the physical planet earth. That there are many entities walking upon this physical earth in other dimensions which are not seen in the physical dimension. This Awareness indicates that the earth itself has many dimensional vibrations, and whereby some entities may enter into areas of the earth's vibration and experience certain landscapes, in other vibrations the landscape may alter somewhat.

This Awareness indicates that this can be understood from such as Kirlian photography, whereby a physical leaf may be seen, and whereby breaking off a part of the physical leaf, the leaf being half present on the physical plane, still may indicate, under Kirlian photography, a complete leaf,--this on another frequency level. Therefore, likewise, the earth on a physical sense may have certain shapes in terms of continents, whereas on another frequency the continent may have a slightly altered shape, relating to a more distant time, or a different vibratory space and rate.

This Awareness indicates for example, if a portion of a continent falls off into the sea on the physical level, under Kirlian photography or something similar, one might see the portion of the continent still present. This Awareness indicates on a frequency level of that same vibration as the Kirlian photography, entities living in that frequency might not even know that the physical counterpart fell off into the sea, for the landscape there could remain intact in that frequency level. This Awareness indicates this as very difficult to understand, but entities must also realize that the entire universe is created out of imagination; the imagination of the Cosmic Energies, the Cosmic Being, the Life Force which inhabits and flows through the universe is in constant motion, imaging in very many vibratory rates, and the entities or particles, or parts of that Cosmic Mind, in each of these many vibratory rates is imaging according to its own vibration and its own octave or dimension, creating its own dimension through its imaging, and if these imagings don't imagine the portion of their continent falling off into the sea, then that may remain intact, even though on another frequency level, that portion falls off into the sea.

The Reality of the Dream State

This Awareness indicates that this may also be better understood whereby an entity in a dream visualizes the portion of the continent falling off into the sea, but when awakening, realizes it still remains as it always was. This Awareness indicates or vice versa, the entity may in reality experience that the portion of the continent has fallen off into the sea, but in a dream state the portion remains as it always was.

This Awareness indicates that a dream is as real within its own frame of reference as is the awakened state real in its own frame of reference. That wherein an entity is in a dream, the entity cannot logically scientifically state that, "This is not real, and when I awake, I will know what is real," and likewise, the entity who is in the awakened state cannot scientifically and logically state, "This is not real, and when I fall asleep and go into my dream I will know what reality is."

This Awareness indicates each is real unto itself. Each is real in reference to its own frame of reference, for imagination is self-contained, and within any particular framework, that which is included is the reality. Unreality, illusion, confusion, and the breakdown known as insanity

occurs when entities begin to mix their dreams and imaginations so that they become confused as to which realm they are speaking of; whether the imagining of an entity is based on his personal dream or delusion, or whether it is based on the collection of images available to a society, which the society calls reality.

Why Earth Appears Solid

This Awareness indicates the reason why the material plane appears so solid and real is because there are so many entities imaging it and reinforcing the image for each other. That were this to be altered, whereby every entity sees something different and no one agrees with any other as to what the reality is, then all entities would be very confused as to whether they were imagining, or whether they were experiencing reality, and would be very confused to attempt to discover what reality was in such a setting.

This Awareness indicates that this may be tested by use of hypnosis or by using animals or other entities in a manner whereby under certain circumstances, each can be told a different set of facts, placed into the situation whereby each having a different set of facts, coming together with others in that situation, and having no way of agreement or reinforcement of those facts, for each is disagreeing with the other; these entities will not find a common agreement, whereby reality can be discerned.

This Awareness indicates for example, if four entities are to be placed in a room; one is told that those entities who enter the room are murderers, another is told that they are doctors, another is told that these are persons who have been known for long periods of time as being some kind of strange perverted people, having weird ideas and somewhat insane in nature, and another being told that these entities are there seeking counsel, and hoping to be saved by this entity, and seeking to be interviewed and helped,—put these four people in a room and see what happens. The reality level will simply fly out the window, and complete confusion will result.

A Definition of "Reality"

This Awareness indicates that reality is simply agreement on what entities imagine to be true, or what entities convince each other to believe.

This Awareness indicates the entire universe is nothing but imagination.

This Awareness indicates the MIBs, the UFOs, the concept of Ahriman, the concept of Lucifer, the concept of Christ, the concept of your own being came forth from the action of imaging, and the imaging of entities coming forth from the Divine Creator, the entity who created in his own image, as that which essentially is the Universal Life Force, the vibration that divided the waters into many octaves of frequencies, of images, of experiences, of types, of beings.

Is Ahriman on the Earth at this Time?

(More on Time-Travelling)

QUESTION:

Awareness indicated in a reading back in the spring of '69, I believe, that the entity Ahriman had escaped and had left the earth. Is this entity now back on the earth?

COSMIC AWARENESS:

This Awareness indicates this as in '79. This Awareness indicates that this entity as having moved back into his own dimension, having been in this physical dimension for some time. This Awareness indicates that when this entity returns to this physical dimension, he will be capable of moving in and out of this dimension at will, using certain electronic

devices which have been transported from the inner planes over to this plane, by use of the modern technological breakthrough, which in fact was inspired by Ahriman, and those forces. These allowing for the electronic era to occur on the physical plane, which in turn helps to break through the barriers or dimensions of these octaves or frequencies, so that humanity itself can in time begin to evolve and traverse these interdimensions of the universe, so that entities may time-travel, or may travel into different frequencies, may dematerialize or rematerialize.

This Awareness indicates that Ahriman as but a tool of the Divine Mind, this tool being that which may be used to sever the consciousness of entities from their physical view of the limited universe, into a new view of an unlimited universe. This Awareness indicates that although Ahriman, as a tool, seeks to bind entities to the physical plane, it also is bringing forth the technology which allows those entities to eventually escape from the physical plane, and into other dimensions, and also will give those entities the impetus, the motive, the desire for such escape.

HOW MANY MEN IN BLACK ARE NOW ON EARTH?

(HOW THEY CAN HARASS AND DRIVE ENTITIES MAD)

QUESTION:

Could Awareness give us a rough figure on how many of these Men In Black are actually on the earth at this time?

COSMIC AWARENESS:

This Awareness indicates essentially, these entities pop in and out at various times. This Awareness indicates that these entities generally do not remain on the physical plane, but when the electronic frequencies are conducive, these entities can remain for long periods of time. This Awareness indicates there are certain number of these entities on this physical plane at this time. This does not appear to be over 600. This Awareness indicates however, these entities also are capable of working with entities from this plane in a manner whereby they are used by the Ahriman forces.

This Awareness indicates that one thing which entities may wonder or question about is the harassment which some have experienced after having been in contact with the so-called Men In Black. This Awareness indicates that many times these entities have in fact been caused to go insane, or commit suicide, or have been so harassed that their life has totally been uprooted and eventually destroyed. This Awareness indicates essentially, these entities, the Men In Black, have the ability to cause certain fear in entities, the fear being such as can drive an entity mad.

This Awareness indicates there is a saying: "The Gods make mad those whom they would first destroy." This Awareness indicates this is in reference to those Ahriman forces. This Awareness indicates that these forces have been such as to harass and drive entities mad, particularly if they are getting too close to the truth, too close to understanding the reality of the interdimensional relationship of Ahriman and the physical plane. This Awareness indicates it is for this reason at this time that this Awareness wishes to open this information to the masses so that the lid is off and entities are no longer harassed by these MIBs and these Ahriman forces for allowing the information, or for stumbling onto this realization, or for getting too close to the realization of what is occurring.

This Awareness indicates that an example of this is in reference to Alexander Thompson's son, Alexander Thompson, Jr., who in his experiences got too close to

understanding what was occurring in regards to interdimensional realities, and was confronted by an MIB, and in this experience, without fully understanding what was occurring to him, was eventually driven to a point of extreme frustration, extreme uncertainty, which then, through other forces from these inner planes, led to his fatal accident in the automobile. This Awareness indicates this entity as having been literally driven off of this plane by these forces. The entity as now having overcome the forces and is preparing a new life in another dimension at this time, and will return to this physical plane.

HOW TO DEFEAT THE FORCES OF AHRIMAN

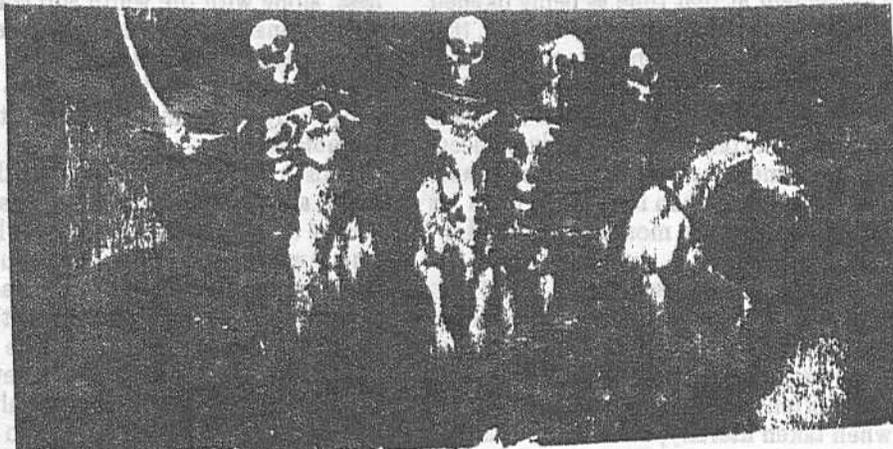

This Awareness indicates that essentially, at this particular time, wherein these forces are growing stronger, the most important thing which Light Workers can do in order to prevent these forces of Ahriman from having great power and control over this physical plane, and in order to allow this physical plane to pass more quickly through the Ahriman experience: the most important thing that Light Workers can do at this time is to remain alive, to remain alive, and continue channeling the Spirit, the Higher Light, the Light of Awareness, the Light of Christ Consciousness through their lives, and into the world itself.

The most important thing is to stay alive, and keep the Light alive within yourself. This Awareness indicates there will be many reasons why entities will be considering skipping out on this plane. There will be many reasons why entities will think of giving up. There will be many reasons why entities will say: "I am tired of this place. It is not my cup of tea. I would prefer to be back in Celestria; I would prefer to be elsewhere." This Awareness indicates the most important thing entities can do is to continue staying alive. By staying alive, entities are defeating the Ahriman forces which would bind entities into the material slavery.

This Awareness indicates by staying alive, and keeping the Light within your lives, you can help to defeat, and overcome, and diminish the power of this Ahriman experience for humanity. This Awareness indicates that those Light Workers upon this plane, can at this time keep the Light on this plane for a little longer, and by doing so can assist the masses in waking up much more quickly to the reality that the material plane is not where it's at, and in this manner, humanity will evolve much more quickly and the Ahriman experience will be short-lived, and entities may then have the universe, and the imagination as their playground.

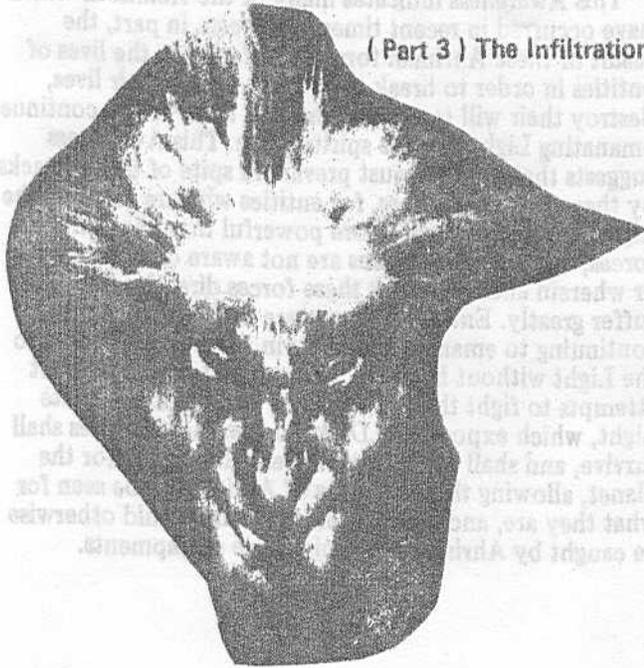

This Awareness indicates many of the violations which have occurred in recent times have been, in part, the result of these Ahriman forces interfering in the lives of entities in order to break their spirit, break their lives, destroy their will to survive, destroy their will to continue emanating Light and the spiritual life. This Awareness suggests that entities must prevail, in spite of these attacks by these Ahriman forces, for entities who are carrying the Light, are in fact much more powerful than the Ahriman forces, but wherein entities are not aware of these forces, or wherein entities attack these forces directly, they can suffer greatly. Entities being aware of these forces, and continuing to emanate the Light in their lives, clinging to the Light without hostility, without bitterness, without attempts to fight the Dark Forces, but simply emanate Light, which exposes the Dark Forces; these entities shall survive, and shall bring forth the enlightenment for the planet, allowing these energies of Ahriman to be seen for what they are, and allowing entities who would otherwise be caught by Ahriman, to avoid those entrapments.

ED's Note: Alexander Thompson, Jr., died in a single-car accident in the summer of 1982 in York, Pa. Strangely enough, a few days before this occurred he was driving Lee Michaels through town and both these entities were almost killed while stopped at a red light. A large truck, loaded with rocks and dirt, trying to turn the corner from the inside lane, couldn't do it, and suddenly started backing up at high speed, striking their car, breaking the window and dumping dirt into their laps. C.A.C. members who attended the famous York Conventions in 1977 wherein the Unified States of Awareness came into being, will remember Alex Jr. as that pleasant young man who escorted members around the college grounds and was always remembering to get those things done that Alex Sr. had forgotten to do or didn't have time for. (Alex Jr. later was the right arm of Alex Sr. when it came to running the college complex). Young Alex had visited Olympia several times, had also lived for a summer at the home of Paul Shockley. Young Alex was an entity who had tremendous potential. There were many who wept when they heard this entity had been wasted. (Avaton).

the Forces of AHRIMAN

(Part 3) The Infiltration

THE INCREDIBLE AND BUSY UNIVERSE....
HOW SIMULTANEOUS INTERDIMENSIONAL
REALITIES WORK AND CO-EXIST
...(HOW THE SATANIC FORCE GETS TO THIS PLANE)

(C.A.C. General Reading No. 3)
November 10, 1982

(Opening Message)

This Awareness would like to continue the discussion in relation to the Ahriman forces. This may be considered as part three.

This Awareness indicates that whereas in the previous readings, relating to UFOs and the Ahriman forces, this given in 1979, this Awareness indicated that certain of these forces moved from deep space, this known as the Natas, and certain of these forces also as being associated with the constellation of Orion. This Awareness indicates that these forces sometime back were brought into union as allies, working together, this as movement through time and space in many types of activities associated with various planets, including the earth.

This Awareness indicates that whereas this Awareness emphasized the movement at that time as being likened unto physical movement through the constellation, this Awareness wishes to clarify at this time the more complex reality of that form of travel. This Awareness indicates that whereas the concepts of interdimensional movement are difficult to explain, it often needs to be given piecemeal, one portion at a time, whereby entities grasp and understand certain basic ideas, then later these ideas may be altered just slightly so that the more subtle realities can be experienced and understood.

This Awareness indicates that these forces are often not exactly as given, just as the legends of past creations and theories are often given in allegory or in story-form, with personification or persons representing concepts or energy forces. These are often ways whereby an idea may be conveyed, yet when taken literally, are not the exact truth, but are simply a message carrying the truth, if entities can decipher its true meaning.

This Awareness indicates likewise, in discussing entities as traveling from other parts of space to the earth, this as a more simplified description of the reality, and that the reality must also include the realization of interdimensional movement, or that which may be called traversing frequencies in the electromagnetic scale.

This Awareness indicates that wherein these energies, these entities, are capable of moving from one dimension to another, or from one frequency to another, (perhaps the term 'dimension' is not accurate, but in one general sense, these are likened unto life planes or planes of experience in the electromagnetic scale); whereby entities are capable of existing in different frequency levels, so that it is likened unto moving from one realm of reality to another.

This may also be termed 'dimension', although in the concept of dimension, it is not precise. This Awareness indicates that these realms, or frequency realities, may be likened unto many varying third dimensional realities within a fourth dimension or fifth dimension. This Awareness indicates that essentially, to better understand this in relation to the concept of dimensions, this Awareness wishes to note that what might be termed the first dimension being likened unto a line, as that which is the idea of a series of dimensional dots (.....), a series of dots in a line having length, without height or depth or width. That this concept of a line with length, having no height, width or depth, is that which represents one dimension.

This Awareness indicates that even this, having length, as that which represents an idea, although it has no basis in the third dimensional realm because it is simply one dimensional and can only exist as an idea, having no height or depth or width, cannot exist in the third dimensional reality. This Awareness indicates likewise, when this is extended to four points, creating a plane, so that the line then moves into a planes, such as a sheet of paper; if this is in movement as a plane, it is a two dimensional concept. Having in itself no height or thickness, it does not exist in the third dimensional reality, but exists only as a concept, thus the first and second dimensions exist only as concepts and cannot exist in terms of third dimensional realities.

This Awareness indicates however, you will notice that a plane, being second dimensional, can be extended to have a thickness, such as a sheet of paper or a cube of ice, and this plane being given the height or thickness, along with the width and length, now is third dimensional and may exist as a reality in the third dimensional plane, being tangible and so forth. This Awareness indicates this may also be something which exists only in the mind of an entity, having no actual tangible reality.

This Awareness indicates that the concept of height, width and depth and the length as that which indicates a third dimensional creation that has a place in space. This Awareness indicates that you will notice an unusual phenomena in relation to each dimension. Each dimension described, contains within itself an infinite number of lesser dimensions. The cube can have an infinite number of planes, or sheets within it, each of these having no height, having only width and depth, or length and depth, or having no thickness. These second dimensions fit into the third dimension in an infinite number.

In other words, there can be an unlimited number of two dimensional realities within the third dimension. This Awareness indicates likewise, the sheet of paper can theoretically be cut into an infinite number of lines. There can be an unlimited number of lines, or one-dimensions in the second dimension. Each dimension is capable of having unlimited numbers of dimensions within itself.

This Awareness indicates that likewise, the fourth dimension, which some consider as time, (which the Cayce channeling and this Awareness suggest to be imagination), the fourth dimension as that which contains within it infinite numbers of third dimensional realities, or unlimited numbers of three dimensional realities. This Awareness indicates that in the dimension associated with time, or that which exists as duration; within that fourth dimension, there can be unlimited numbers of third dimensional cycles and sequences and durations.

This Awareness indicates that depending on how entities prefer to arrange these ideas of dimensions, whether the entity considers time to be the fourth dimension, or whether it is the fifth dimension, this is irrelevant to this Awareness.

This Awareness indicates that in the 6th dimension, which this Awareness considers as merely extensions of the 4th dimension, for mental purposes, this as the dimension of possibilities or potential realities. This Awareness indicates that this potential reality is capable of including within itself unlimited numbers of imaginings and of time expressions. This Awareness indicates that this may be further discussed in future readings, but that the point which this Awareness wishes at this time to stress, is that there can be *unlimited numbers* of third dimensions in the fourth dimension, or that which this Awareness refers to as the imagination: the Universal Mind being capable of imagining and creating unlimited numbers of third dimensional worlds.

This Awareness indicates that these 3-dimensional realities, existing within the electromagnetic scale, as that which can eventually be understood when consciousness reaches a certain level of development. This Awareness indicates entities who are caught in the illusion or veil of Maya, wherein entities believe that their own third dimensional reality is the only reality and the only vibrations which fill their time and space; these entities seeing only that which the senses convey, believe in the Tree of Knowledge, and are incapable, under those particular rules, to understand the reality that there can be *other* dimensions paralleling and existing in the same time and space, but not tangible to their senses.

This Awareness indicates that these Ahriman forces, understanding the ability to move from one octave of the electromagnetic scale to another, can penetrate and move from one frequency to another, moving from the physical plane into another plane in another realm or dimension, or frequency, and moving from any of these frequencies into the physical plane. This Awareness indicates that not all forces which are in other planes are capable of traversing these frequency barriers, but some are.

This Awareness indicates that there are beings who are associated with that which is known as the UFO phenomena who are capable of moving between these frequency barriers, traversing the electromagnetic scale, moving from one reality or dimension to another on this scale. This Awareness indicates this not in reference to moving from third dimension to fourth dimension exactly, so much as moving from one third dimen-

sion to another third dimensional reality, moving between these scales from a three dimensional reality to another three dimensional reality. This Awareness indicates that in order to do this, they *may* choose to move into a fourth dimension, and then back into the third dimension, a different third dimensional reality.

This Awareness indicates that this likened unto jumping from line to line on a two dimensional plane, or from plane to plane on a three-dimensional cube. This Awareness indicates that jumping from cube to cube, or third-dimensional reality to third-dimensional reality, by moving into a fourth dimension; this also is a possibility, and this as created through attunement to the fourth dimension, or that which is imagination.

This Awareness indicates however, there are also electronic means whereby this change can occur, and there are entities in these realms who are capable of such traversing through the use of these mechanizations. This Awareness indicates this technology is now coming upon this plane, whereby there are those who are moving into the understanding of that which is the creation of altering matter through the manipulation of atomic structure. This associated with the Stealth program, the Philadelphia Experiment, and other similar activities.

This Awareness indicates that this also relates to studies and discoveries which are associated with antimatter, or antigravity devices. This Awareness indicates that in reference to the movement of energies through space and time, these energies or entities are capable of what might be termed hyperspace travel, this being more on the order of moving into different dimensions and reappearing in another time or place. The action as that which allows very high speed movement across the universe at speeds higher than the speed of light, for these movements are simply into those higher frequencies on the electromagnetic scale, whereby entities move into higher dimensions, and then reappear again in a third dimensional reality elsewhere.

This Awareness indicates that this concept as somewhat difficult to understand, and somewhat difficult to explain in words which can be understood. This Awareness is not seeking to assist entities in being able to make such movements, as *It* is rather seeking to assist entities to expand their awareness and consciousness into a state whereby they can grasp the infinite universe and understand the workings of the universe itself, in order that they may be more free of the dimension in which they are trapped, through lack of understanding.

This Awareness indicates that it is not essential that entities know anything outside of the room in which they may live and reside, but it can be helpful in expanding an entity's consciousness to have information which allows the entity to know more about the outside realities and to have a greater understanding of these realities, even though the entity may continue residing in that same room.

This Awareness indicates that in this manner, wherein an MIB or some other phenomena might happen to pop into your room briefly, and out again, it will not seem like such a shock, so unusual or unexplainable. This Awareness indicates the entity who believes that his or her room is the total reality may not be able to explain how such a phenomena occurred where something popped in and out, and particularly wherein there is believed to be no other outside reality.

AN EXPLANATION OF GHOSTS ETC.

This Awareness indicates that *It* wishes at this time to explain to entities the phenomena known as ghosts and as forces which might be considered as alien. This Awareness wishes to do this in a way whereby you yourself can better

understand this phenomena. This Awareness suggests you imagine yourself lying on your couch, and you begin to meditate, closing your eyes. You meditate and you see a scene; this appears to be an imaginary world, somewhat different from your present reality, or in a different place, or different time.

This Awareness indicates you may hold this image, visualizing for example, that you are moving into a time of ancient past, and into an area of the earth, quite some time ago, or perhaps in a great distant future. This Awareness indicates that in this movement, you may begin to see vividly the landscapes, the oceans, the mountains, the continents, the shores of a map, of a time, and of a country, and you may begin to move down onto this time and place. As you approach this, growing closer and closer, you may begin to see outlines of trees. You may describe these trees. You may also begin to recognize animals or people.

This Awareness indicates if you continue holding this theme of consciousness, you may begin to experience greater and greater detail, even to the point of standing close to these entities, watching them communicate with each other. This Awareness suggests you might even find yourself moving up close to these entities. This Awareness suggests that you may discover that these entities do not see you, even though you wish them to see you. This Awareness indicates that in this action you may also discover that after much effort on your part to get them to see you, you have the ability to stimulate their awareness by touching them, or by doing something with objects within their realm, whereby these objects are picked up by you and moved, and they become aware of your presence through the movement of objects which they and you mutually can observe.

This Awareness indicates that you may also discover that in your actions of doing this you create fear in their minds, first a wonderment, then a fear,--and you may find yourself being the object of a search, whereby these entities are searching to find out what this invisible force is. This Awareness indicates that such can in fact lead to further efforts on their part, and on your part,--on your part to communicate, on their part to understand,--and the fear you may have of these entities, and the fear they may have of you can create a greater sense of conflict and caution by the intrusion of your being into their dimension.

This Awareness indicates that as you continue intruding in their dimension, you may find yourself suddenly being the object of search, the object of many technological devices, whereby these entities are searching desperately to find out how they can trap you, catch you, examine you and perhaps even destroy you. You may find yourself even to some extent feeling a need to escape, or to hide from their technological efforts to locate you. This Awareness indicates if these entities are of high technological levels, they may create some form of force field whereby they trap you and prevent you from moving.

This Awareness indicates that essentially, this can even lead to a type of potential violence, if carried to extreme, whereby you damage them or they damage you. This Awareness indicates that now that you have experienced this movement, (invasion into another dimension), you may wish to look at this from another frame of reference. In this action you have moved into a different third dimension, different from your own, as an intruder, just as though you were a stealth creature, an invisible force likened unto a ghost, likened unto a phantom, a poltergeist, so to speak: *You* as their form of poltergeist, having moved into their reality. What *they* see is some invisible force that goes bump in the night, and creates unusual and unexplainable phenomena. Having moved into their

realm, being invisible to them, yet being partially capable of manipulating certain energies in their realm, they become aware of your presence, just as you may become aware of the presence of poltergeists in your realm, or of UFOs, or of other similar types of phenomena.

This Awareness indicates that in this manner you have become for these entities, that which you wish to understand in your own third dimensional reality. You are an intruder into another reality, even as there are those who in their meditations from other planes, penetrate and move into this plane, yet retain certain invisibility or certain amount of intangibility, whereby they cannot be fully made tangible as a reality in your dimension.

This Awareness indicates that through extreme effort and focus and concentration in this other reality, you may be capable of forcing yourself to become not only able to touch objects which mutually are observed by yourself and these entities, you may also under certain circumstance be able to tune in to their visual frequency, and move yourself to that same frequency, and then be visible to them and communicate with them as a being which they visibly can contact. This Awareness indicates that this then becomes an apport, or what may be termed as a being who teleported into another dimension.

This Awareness indicates this likened unto that which this Awareness described as the MIB who teleports or apport into your third-dimensional reality. This Awareness indicates likewise, these craft, such as the so-called UFOs and others, are also capable of being moved through these dimensions, by altering the frequencies to match the frequency in which the craft seeks to move. This Awareness indicates that as this can occur through your imagination, through your meditations and through your mind, these energies also can be manipulated through electronic instruments and devices, by the manipulation of vibrations affecting the atomic particles or vibrations of the atom.

THE NATURE OF THE AHRIMAN FORCES (DIFFERENCE BETWEEN SPIRITUAL & MATERIAL SCIENCE)

This Awareness indicates that *It* wishes now to discuss briefly the nature of the Ahriman forces. That these essentially are materialistic in nature, yet these also as being capable of moving interdimensionally, which, while not of the highest spiritual values, does have certain physical value which is important to the evolution of humanity. The materialistic sciences essentially, have a value in helping in the evolution of society, and the spiritual sciences also have a value in helping in the evolution of society.

This Awareness indicates essentially, the material sciences create a deeper understanding of matter itself: what it is, its general makeup, and how entities may move through these material realms, manipulate matter, or understand matter, whereas the spiritual sciences delve into the use of consciousness to understand the universal energies which include the makeup of matter.

The Law of Love -- More Definition

This Awareness indicates that in the *Law of Love*, this Awareness has suggested that entities deny the existence of evil in the world. This Awareness indicates essentially, this denial of the existence of evil in its absolute sense does not imply that entities should fail to recognize malevolent beings, beings who do harm, beings who are up to no good, beings who are not beneficial to one's welfare. These beings will *always* be present while entities are involved in material realms

and material activities. This Awareness indicates that It does not consider these beings to be evil, It considers these beings to be part of the material phenomena, the material reality, and their purpose is to frustrate humanity, to frustrate consciousness so much that it eventually turns to the higher vibrations, and moves away from involvement in matter.

This Awareness indicates this may be likened unto creating pressure, creating conflict, creating disturbances so that entities cannot go into these lower vibratory rates, attaching themselves to matter, and enjoy that experience. This Awareness indicates rather these forces are intended to create, to trap, to hold these entities there in a way which creates unpleasant and difficult situations, so that the entity eventually realizes, "This is not where I want to remain. I wish to become unattached to this third dimensional realm, to this materialism, to this greed and self-seeking activity. I wish to become unattached, and move into that which is the higher, more freeing energy of the spiritual universe."

This Awareness indicates these Ahriman forces, while seeking and trying to trap entities, are in fact creating the energy which leads entities into realizing this is not satisfactory. This Awareness indicates therefore, the sooner entities become aware of the role and purpose of the Ahriman forces, and the more entities are made aware of the need to identify with the spiritual energies, the more free the entity will be.

WHY LIGHT WORKERS

MUST STAY ALIVE

This Awareness indicates that the reason why Light Workers on this plane should remain alive, should struggle to continue being, and holding the Light, is because there are so many others on this plane at this time who do not have the Light, who cannot see the Light, and who, without having Light Bearers around would become totally lost in the darkness which the Ahriman forces create.

This Awareness indicates the purpose of the Ahriman forces is to create the darkness, to create the trap to hold these entities until they cry out for deliverance, and the purpose of the Light Bearers is to show these entities the way whereby they may be delivered. This Awareness indicates that the more quickly entities experience the discomfort and become aware of the Light Bearers and the way of deliverance, the more quickly the program, the activity, the scenario of the Ahriman force and its game will begin to dissipate, and allow the new energies to manifest upon this plane, and into the others.

This Awareness indicates there are a great number of Light Bearers upon this plane at this time. These Light Bearers are awakening others, yet there are also a great number of Ahriman forces who are attempting to entrap entities at this time. These Ahriman forces communicate with entities telepathically, and can only communicate with those who are open to messages or impulses of greed, violence, hostility, and such energies as are separative and combative toward others.

HOW THE DARK FORCES CAN GET TO THE LIGHT WORKER

This Awareness indicates that those entities who get their joys from hurting others, or who get their joys

from having power over others at the expense of others; these are prime targets for the Ahriman forces. This Awareness indicates also the Ahriman forces seek to shut down any Light Workers, if possible, but these forces can only do so by working through those areas wherein the Light Worker is weak, or through those who may be weak who are associated with the Light Worker.

This Awareness indicates that the Dark Forces work through the weakest link to get to the Light Worker, to prevent them from holding the Light of deliverance. This Awareness indicates that this Ahriman programming is not something which the Ahriman forces realize to be a part of a cosmic plan to bring humanity back to the Light. The Ahriman forces simply are seeking power over others. This Awareness indicates the cosmic plan of using these Ahriman forces to intensify difficulties for entities who remain in these areas, is that which was created by Higher Forces, and which is allowed to continue as a part of a Divine Plan to bring entities back to the Light.

This Awareness indicates that therefore, it is not reasonable to assume that the Ahriman forces will leave entities alone once they start moving toward the Light. These Ahriman forces will do *everything in their power* to drag you back down into the trap of being attached to material things, being attached to concepts, ideas, and activities which are not clear. This Awareness indicates that this does not mean that entities should give up material wealth or material objects in order to be free, but rather it means that entities must allow these things not to interfere with their spiritual attachments. That the attachments to the spiritual realities as that which *must* be more important.

This Awareness indicates that entities who have no material wealth or no material attachments, may find themselves prime targets for the Ahriman forces, because to exist in a material plane, entities must have material acouterments,—objects and energies of a material nature to allow the entity survival as a material being,—and if an entity is shunning such material things, the entity may find himself or herself in such a position of dire poverty and need as to be relying on others, creating attachments in this manner.

This Awareness indicates that therefore, this Awareness has suggested that entities, in attaching themselves to material things, attach themselves in the same way that entities would put on clothing, knowing that this can be taken off, that this is not essential to one's survival as a being. This Awareness indicates that the use of material wealth, material things, as a tool for helping oneself and others to move toward the more spiritual realms; this is the proper use of material values. That those entities who use material wealth and objects as a tool simply to build up security on the physical plane and who ignore their spiritual needs and the spiritual needs of others, these entities are simply playing the game along with Ahriman's forces and are failing in their spiritual mission.

This Awareness indicates therefore, entities need not give up their physical goods in order to become spiritual, but rather need to put the priority on the spiritual development, and allow the physical and material goods to be seen as tools to support that spiritual growth and development.

HOW TO AVOID AHRIMAN'S TRAPS

(That Impulse to do Something Terrible)

This Awareness wishes now to discuss briefly how the Ahriman forces can bring great trouble to Light Workers, and how these entities may avoid falling into those traps. This Awareness indicates that wherein an entity begins moving on the path of Light, the forces may begin creating various types of blocking actions, either through temp-

tations to lure the entity into some other action which would bring about a deterioration of the entity's character, or the forces may attempt to cause an entity to move in a direction which leads to conflict with others, and these forces may cause an entity to become over-zealous in their activities, or these forces may attempt to cause an entity to do something which is simply bizarre or unlikely.

This Awareness indicates it is likened unto a perfectly good entity who suddenly gets the impulse, almost obsessional impulse to do something terrible. This Awareness indicates that when this occurs, entities may assume it is an Ahriman force seeking to cause the entity to do something terrible, so that the entity will not continue following the path of Light. This Awareness indicates that these forces may also attempt to create paranoia and fear among the Light Worker, the entity following the path of Light, creating a paranoia or fear that if they continue following the path of Light they may suffer greatly from this, or creating a fear that these Ahriman forces are going to get them.

This Awareness indicates that in the Christian doctrine, this would be an effort by these forces to create a fear among the Christians that the devil was out to get them. This Awareness indicates that it does not matter much what terms entities use; what matters is that they *understand* the nature of these energies involved. This Awareness indicates that wherein these forces manage to create a kind of fear, or to telepathically communicate to an entity to do something terrible, the entity may, if succumbing to this suggestion, may then develop feelings of guilt, may develop feelings of paranoia to an extreme degree, and if this continues, or if the entity does not break that binding telepathic control, these forces can drive this entity to suicide, or to an action of violence, whereby his or her credibility destroyed.*

This Awareness indicates that moving onto the path of Light requires that entities be aware that there will be some likelihood of tampering with their lives by these alien forces. This Awareness indicates that being aware of the likelihood of this tampering, entities may then want to take action whereby these forces cannot be effective in their lives. This Awareness indicates one of the first steps in this direction is to make your purpose and direction *absolutely firm in your own mind*, that you are on the path of Light to stay, and will never turn back, regardless of what occurs on any level of your life.

*ED's Note: for more on voices in the head and how to tell whether they are divine or Satanic, please refer to 'Revelations of Awareness' No. 82-7 (The Dark Messiah); \$3.00 from C.A.C.

Once this is completely determined, the forces then know that they cannot get to you by messing with your mind. This Awareness indicates that this will immediately eliminate much of the effort of these forces to create temptations to lure you away from your purposes. This Awareness indicates the next step is to create a kind of program in your life whereby you move on the path of personal development, while also giving service to others through some form of charity, of material or service activity, whereby giving material wealth, monetary wealth, or some service to others, you are assisting others, even while you are still on the path yourself. This allows you to put your energies into something which you can tangibly see is a statement of your intention and purpose to be of service to others. Without this tangible action on your part, you do not have the reinforcement, psychological reinforcement that you are doing good for others. This Awareness indicates that without realizing you are doing good for others, it is easy for you, in certain times of distress, to begin to see yourself as a selfish person, one

who is seeking spiritual development for some personal gain, and therefore it is easy for these forces of Ahriman to begin to cause you to look at yourself as being unworthy of spiritual gain.

This Awareness indicates that the action of giving something of spiritual value to others, or promoting something of spiritual value is that which allows you to recognize in a tangible way that you are contributing Light to this planet, and this enhances your own self-esteem as a Light Worker, so that you cannot be influenced into feeling guilty or unworthy by these Ahriman forces.

This Awareness indicates the third action or step in preventing these forces from having any control over your life is to be *extremely cautious* as to what kind of energies you allow into your life: those energies which come from various friends, acquaintances and activities that are disruptive to a clear field of energy, disruptive to your purposes, disruptive to communications, disruptive to your situation, which must be kept on a solid base as much as is possible.

This Awareness indicates that wherein for example, an entity who is an acquaintance who takes your time talking about things which are mundane, unimportant, or irrelevant to your purposes and who keeps adding more and more of this kind of energy to your life, using up your time, using up your attention, using up your energy which could be used for something which you yourself feel is more valuable, and particularly wherein this entity begins to bring in others who are of similar draining type of time-consuming energy, or who attempt to pull you out from your stated purposes into other activities, or whereby this entity creates a dependency on you and makes you feel responsible for them, and begins to build and build greater and greater dependency,-- this can be a way whereby these entities, using your friends, your acquaintances, your weak links, can get to you and divert your energies and purposes.

HOW DARK FORCES INFILTRATE LIGHT GROUPS

This Awareness indicates another way is to bring in entities who *appear* to be strong and of a helpful nature, whereby they offer to help you do what you wish to do. These magnificent helpers often enter under the pretense of, (and often these are true intentions) of coming into your sphere of activity to assist you, and to make things easier for you; but as time progresses, you discover that they are simply requiring more and more of your time for themselves, and the help which they give requires your continual attention, or continual recorrecting, and you find that rather than helping you, you are spending your time helping them to do something which you could have done yourself, much easier.

This Awareness indicates that *this* is a very common way whereby these Ahriman forces can block the actions of Light Workers. This Awareness indicates that wherein this occurs, and these entities who appear to be there to help you, wherein this begins to take shape and you recognize these entities are draining your energy rather than assisting, you may begin to create certain organizational screening actions to assure that anyone who wishes to help must abide by certain structure, certain organizational activities, such as leaving personal problems at the door, while being involved in the business activities.

You may need to create rules according to the specific situation, or you may be able to create rules for your life in reference to your friends; that anyone who wishes to be your friend or to work with you must be out front, honest, and clear in communications and business affairs. This Awareness indicates that also, you may discover that these entities who wish to help you

may come in as helpers, and simply want to take over and push you aside, so that they can run your operation as they would like to see it run.

This Awareness indicates there is a common trick used by certain subversive forces whereby an entity will be sent by these forces to offer assistance to an organization, and the assistance which is offered sounds great and is welcomed, and the entity will create a problem, such as perhaps would lead to criminal charges for those involved in the operation, or problems which would affect the operation's legal standing, or the entity may move into an organization as an assistant, and actually be nothing other than a spy to determine what the organization is doing wrong, or the entity may come into an organization with the intended purpose of creating dissention among the membership, or among the staff, or between the leaders of the organization in order to tear the organization apart.

This Awareness indicates that these are favorite actions motivated by these Ahriman forces to disrupt Light groups and Light Workers from their purposes. This Awareness indicates that when entities understand this, they may find it necessary to become very protective of their sphere, their activities, their purposes, their directions, their organizations, and the staff which works with them may remain small and clear, and yet be much more effective than a large staff which is confused, muddled, torn in different directions, or without proper cohesive and co-creative direction.

*ED's Note: That's C.A.C.

This Awareness indicates that the third step, in summary, is to keep your action clear, your purposes clear, and your area of activity well defined, so that outsiders and outside energies cannot disrupt your purposes and direction.

This Awareness indicates that the next, the fourth step in avoiding harassment and problems from the Ahriman energies is to keep your health, your attitudes, your emotions, your faith, your self-confidence; keep these strong, and this may require that you alter your diet, use certain gems, stones, vibrative forces, rituals, meditations, or create fields around your place of business. This may require various types of protective influences of a type that assists in your health, in your emotional stability, in your psychological confidence, faith in your work and purposes, and support from those who can be relied upon.

This Awareness indicates that this fourth action as that which essentially requires that you keep yourself healthy and clear as an individual, and keep the energies strong, and the vibrations at a high level. This Awareness indicates that gems can be helpful, vitamins and minerals can be helpful, certain Bachflower types can help entities stabilize their emotions. Certain books and music can create higher vibratory attitudes and feelings, certain types of movies can be inspiring, certain types of books and individuals can be inspiring. All of these things which inspire an entity to excel and do well, and do things for self and others that are constructive in nature, all of these actions which improves one's life and activities and living condition,--this is all healthy and helpful in overcoming Ahriman forces. That wherein entities are living in unpleasant conditions, wherein there is dirt, drudgery and confusion, the Ahriman forces have greater opportunities to enter. Wherein the home is clean, the entity is clean, the mind is clean, and wherein the movements of values, cultural expressions and energies are clear and clean, of high quality, the Ahriman forces have much greater difficulty in creating disruptions.

This Awareness indicates however, that this alone will not prevent the Ahriman forces, for there are many entities who have high classical tastes, whose domestic home is absolutely spotless, clean and beautiful, whose cultural interests are excellent and of refined qualities, yet these entities can be perfect agents for the Ahriman forces. This Awareness indicates that it requires more than mere stage setting to keep these forces away.

The purpose and direction of an entity to move on the path of Light is the most essential of these four.

HOW THOUGHT FORMS AID THE ALIEN FORCE

This Awareness wishes at this time to conclude this portion by expressing still another degree of understanding of this message. This Awareness indicates that It has described the movement of these Ahriman forces in this dimension which entities reside, the tangible dimension. It has also described the movement of these Ahriman forces as may occur whereby these forces move through different dimensions in the electromagnetic scale. It wishes entities now to understand that these Ahriman forces do not necessarily have the appearance of persons, or individuals. These forces may operate through individuals or persons of material type, or of interdimensional type, but these forces may also simply operate as energies containing thoughts and ideas which have been cast off and left dangling in the electromagnetic field which can be picked up and used, or which entities may tune in to and experience as their own thought.

This Awareness indicates thought forms are much like fruit lying around in the invisible realms which entities may pick and choose and eat or devour in their consciousness, and some of these thought forms are poisonous in nature. Some of these thought forms are inspiring, and healthy in nature. The poison apple of Snow White, or the poisonous apple which Eve gave to Adam: these may easily be understood as allegories for thought forms, or the fruit of consciousness which entities may pick, may devour, if they are not selective and discerning as to what they allow in their consciousness.

This Awareness suggests that these poisonous thoughts, poisonous thought forms, may be recognized as Ahriman forces and weapons which are prevalent throughout the realm of consciousness within the biosphere computer, the computer made of thought forms, energy fields, ideas, which surround the planet earth. This thought form field is not simply lying there with an innocent purpose. It is a storage place for all good and all harmful thoughts. Everything that has occurred is registered in that energy field, and can combine, or be combined, just as atoms can combine to form molecules, and molecules can combine to form creations of a tangible reality. Likewise these thought forms can be combined to form ideas, concepts, and these ideas and concepts can be combined to form circumstances which may be played out on the physical plane, creating that which is good, or that which is harmful.

These Ahriman forces are always anxious to promote the poisonous thought form, the poisonous idea, the poisonous circumstance. This Awareness suggests that entities therefore must be selective and discerning as to what they allow to occur in their consciousness, in their lives and as to what they express, for these expressions move into the envelope of thought forms which surrounds the planet earth, and this creates the grab-bag from which others create circumstances for you and each other to experience.

This Awareness indicates that essentially, the Ahriman forces are forces which have attached themselves to those thought forms which are of a negative nature, or to put it

another way, the Ahriman thought forms attach themselves to entities and used them as their agents. The Ahriman thought forms, essentially are those thought forms which do harm to others, particularly wherein they seek power over others, or at the expense of others.

This Awareness indicates that if there are any questions at this time; these may be asked, or that these may be held for another session.

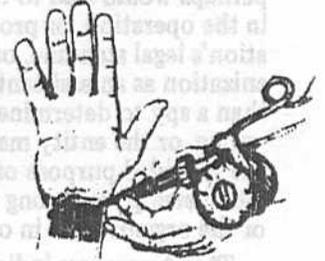

QUESTIONER: Yes. We'd like to hold it for another session.

The Web of Conspiracy.....

the Forces of AHRIMAN

(Part 4) NIGHT MUST FALL

(Opening Message, C.A.C. General Reading No. 4)

November 10, 1982

COSMIC AWARENESS:

This Awareness indicates that in continuation of the information previously given in regard to the Ahriman forces, this Awareness wishes at this time to relate this information to that which is currently occurring, or that which may be considered as current events, events which are either in action, or as potential in the near future. This Awareness indicates that on the movement of Saturn into Scorpio, which will occur near the end of November, 1982, this energy as that which will have a profound effect upon the international banking system and the monetary system. This as that which will remain in the sign of Scorpio for approximately two years and some months, except for a brief period in the spring and summer of 1983.

This Awareness indicates that during the time wherein the energies of Saturn are emanating through the sign of Scorpio, this energy as that which shall assist in triggering changes in the world's economic programs, and methods, and systems, particularly in reference to the banking systems. This Awareness indicates that near the end of Saturn's sojourn in Scorpio, Pluto will also move into that sign of Scorpio. This Awareness indicates it is when this occurs, that the energies of the new changes will be felt and will be brought into the social systems of all countries, so that these changes in the monetary policies are effected as will be brought about in such a manner as to never again be the same.

This Awareness indicates that this appears to relate to the computerized banking system, which will, from the time of 1984 forward, have its strong effect upon the economies of the nations of the world, This Awareness indicates that whether this serves as beneficial to the masses, or as something which will require subserviency and loss of freedoms by the masses, subserviency to the banks and the system; this will be determined in part by entities' vigilance and attention, and the other aspects of society and how these freedoms which entities cherish are protected during the changes which will occur.

This Awareness indicates that essentially, however, in terms of present events, it appears to be approximately 60% probable that the economy will survive through the early portion of 1983 without the complete collapse of the banking system, and this may also continue through the summer. This Awareness indicates however, that this leaves approximately 40% possibility that the collapse will come before this period has passed.

This Awareness indicates it is not clear at this time whether these forces can keep the collapse from occurring when there are also forces which are manipulating these energies to bring this about. This Awareness indicates the timing as that which has not been set. This Awareness indicates that it appears however, at this time, that there is approximately 60% possibility or probability that the so-called collapse of the banking system will not occur until some time after the fall of '83. This Awareness indicates that this being rather a slim margin of probability, will also indicate that there will be some banks which will close before this time, while others may continue strong, after that period.

This Awareness indicates that the collapsing of the banking system as that which will be in part contributing to the change in the money system, whereby the new money will be introduced and the new money introduction will eventually lead to that Electronic-Funds-Transfer System which will have its effect of creating a more restrictive banking system, keeping tabs on the currency flow and uses of currency by individuals within the society.

This Awareness indicates that It cannot be more precise at this time in terms of the timing of events because there are many factors which are in conflict in reference to this event, and these factors have not yet been set into motion in a manner which will indicate the correct timing of these events. There is always the possibility of influences which will alter the events. This Awareness wishes only to indicate the potential for this to occur within the coming months, within the coming year.

This Awareness indicates that any questions or areas which need further attention in regard to this may be brought up at this time.

QUESTIONER: Well, Vikki had some questions in regard to the Ahriman energies. Is that appropriate at this time?

COSMIC AWARENESS: This in the affirmative.

HOW GOOD AND BAD KARMA EFFECTS THE FORCES OF AHRIMAN TODAY

QUESTION:

In relation to the energies that the Ahriman energies feed off of, it seems rather untidy and unprofessional to be leaving crude residue behind as we leave the physical plane. Is there anything we humans can do to clean up, and/or dissolve the emotional bodies and debris, so that these energies have less to feed off of?

COSMIC AWARENESS:

This Awareness indicates this occurs best when entities cease to create karma, although the cessation of karma is that which is highly unlikely. This Awareness indicates that most actions are creating either good or negative karma. This Awareness is not concerned about the good karma which is being created. This Awareness is concerned however, about the negative karma which entities create, for this is that which lingers and feeds these forces.

This Awareness indicates that wherein entities create negative karma, wherein harm is done to others, and harm also is done to oneself, this kind of energy as that which lingers and serves as poison for others who may tap into that energy, and this Awareness indicates that karma of a negative energy can snowball, just as karma of a positive type can also snowball. This Awareness indicates that wherein the negative karma increases in proportion over the positive karma, the tendency is for the negative karma to begin snowballing more and more, and more easily entrapping entities into greater negative karma.

This Awareness indicates that when *It* speaks of karma, *It* also is speaking of the energy, thought forms or residue which is left for others to clean up, or to take on and continue emanating. This Awareness indicates therefore, the more Light Workers there are, and the more these entities stay alive and hold the Light and do good things, the greater the chances of overpowering the negative karma, so that this begins diminishing, and the Light Forces, or good karma of the earth begins to have its chance to snowball, and overtake the negative karma.

QUESTION:

Would there be some kind of meditation where we could see the negative energies sort of drying up or something, that might be effective?

COSMIC AWARENESS:

This Awareness indicates this of course, always. That visualization is a powerful force, for the universe is created from imagination, and imagination is enhanced by visualization. This Awareness indicates that those who have received these messages previously may well understand the value of visualizing the Light increasing and overpowering the darkness.

SPREADING VIOLENCE IN U.S. TODAY CAUSED BY AHRIMAN FORCES

...MORE THINGS THE LIGHT WORKER CAN DO

QUESTION:

Awareness, in the papers and in the media there's everywhere you turn, violence of a very heavy nature cropping up everywhere. It's happening among professional people, even religious people, pastors, lawyers, school teachers, professors, even little children, who suddenly will strike out and kill somebody in their family or in their immediate area for no apparent reason, and people who have been law-abiding and so forth all their life, and probably, it is these Ahriman forces that are gaining access to these entities. In this area, is there anything the Light Worker might look for, certain signposts or something that might indicate an entity is a potential channel for these negative energies and could do something violent. If so, what could one do for this entity before something violent like this occurs?

COSMIC AWARENESS:

This Awareness indicates that *It* does not wish to indicate that Light Workers should go out searching for trouble-makers in order to defuse these trouble-makers. This Awareness suggests rather, that Light Workers hold their own vigil, hold the Light in their own lives, and emanate the Light as an example for others near them, for others around them, and in this action of being an example, wherein the opportunity comes to serve others, to assist others in attuning themselves in some way to Love, Light, Mercy, and qualities of goodness, that the Light Worker emanate this energy to serve as example, or to help others to improve their lives.

This Awareness indicates that it also may be recalled for those who have heard of the experiments, or may be mentioned to those who have not heard of this, that there are benefits whereby entities who sit in states of meditation; even a few entities within an area, meditating, bringing in the Light, may have a powerful effect in the area of reducing crime. This Awareness indicates that this has been proven effective. That entities...this appears to have been used in transcendental type meditation, and other types of meditation, also prayer; that these actions of attuning to the spiritual energies, attunement to the Light, does have its effect on defusing the power of these Ahriman forces.

This Awareness indicates that even as this is so, in terms of meditating and attuning to the Light, likewise, the opposite also can be valid. That wherein an entity focuses on, and concentrates on, and meditates on the forces of darkness, violence, conflict; this focus on these energies of Ahriman help to bring in those energies into an area, and can help to cause entities who are vulnerable to these forces to serve as channels for such energies, and create violence. This Awareness indicates that those who thrive on watching violence, are actually helping to promote that violence by energizing the violence. This Awareness indicates that those who do not energize the violence are not giving energy to that violence. That those who energize peace, are helping to promote peace and reconciliation.

This Awareness indicates that the strange phenomena which is occurring at this time, is in that most entities prefer to look at violence as observers and do not enjoy the idea of promoting peace. This Awareness indicates there are many entities who are looking for violence, are entertained by violence, just as in the old days of the Roman colosseum. This Awareness indicates that the movies and those books, and expressions and activities which promote entertainment through observation of violence are contributing greatly to these Ahriman forces.

AVOID VIDEO GAMES

This Awareness indicates even the video games as contributing to these forces, particularly those games as which include the violence aspect. This Awareness indicates that the entities who do not feed their energies into this kind of activity are denying their energies from these forces, and this Awareness suggests that this as beneficial to the forces of good. This Awareness indicates that even more beneficial however, is that entity whose energies are being promoted or given to the promotion of concepts of reconciliation, peace and harmony in one's life, in one's relationships, and in one's society.

This Awareness indicates that wherein these actions of social responsibility are being expressed, this can be most helpful in spreading the Light in a society, and helping to defuse the Ahriman forces. This Awareness indicates also, the meditation techniques, particularly meditation being valuable when entities can expand their consciousness to include an entire area, seeing a city or community in peace, seeing the entities within the community experiencing harmony, for this type of meditation can help to defuse those thought forms from the area which would otherwise create violence, or discordant energies.

This Awareness reminds entities of the power of thought through mental imaging. This Awareness reminds entities that within the atom there are those sub-particles which are responsive to the mind, whereby the mind itself affects these sub-particles, and in so affecting the sub-particles, have their effect over the atom itself, and in affecting the atom, have their effect over matter itself.

This Awareness indicates that recent scientific studies have revealed that many of the experiments scientists conduct in regard to sub-atomic particles cannot be measured scientifically, because the mind of the scientist affects the outcome of the experiment.

THE SCENARIO FOR AHRIMAN-

THE ANTICHRIST: IS THE BIBLE CORRECT?

QUESTION:

I have a tract put out regarding the Antichrist by, (I think it's a fundamentalist outfit), and they have researched the Bible, and they have written down the description of this entity, and this possible scenario, and I'd like to read a little of this to Awareness and ask if this is a pretty good scenario of what is planned when this entity appears. They say:

"The Antichrist will be a super deceiver and an imitator of Christ. He will be religious at the start. As Christ desired unity among his followers, even so will Antichrist bring about a federation of churches and denominations, but omitting the name, and denying the blood and virgin birth of Jesus.

"As Christ will have a bride, so will Antichrist. As Christ had power to heal the sick, raise the dead, and over all the elements of nature to do miracles, so will Antichrist *seemingly* have power to do so. He will be a great orator and shall speak great swelling words and shall think to change times and laws, and they shall be given into his hand. He will be a clever politician. He shall come in peaceably and obtain the kingdom by flatteries, propaganda. He shall promise to end wars and bloodshed with a permanent peace and prosperity to all nations which he shall be able to accomplish for a short while, in so much that many thousands, including the Jew, will declare that of a truth, the millennium has surely come.

"He will be a commercial wizard, and will have undisputed control over all the world's finances: silver, gold and pleasant things as mentioned in Daniel. He will be a military genius. He will have absolute control of a marvelously equipped international army, and 'shall destroy wonderfully' and who is able to make war with man. He shall be a successful ruler. The first of his reign shall be marked with such prosperity until all men will gladly surrender to him, but will eventually fade into

the worst class of slaves, or peons the world has ever heard anything about."

Would Awareness indicate whether that scenario is correct, or make any changes in that?

COSMIC AWARENESS:

This Awareness indicates that this essentially may be seen as relatively accurate. This Awareness indicates essentially that this Antichrist, or that which this Awareness has been referring to as Ahriman, is the materialism which has gradually, over periods of time, begun to assert itself in the consciousness of humanity in a manner whereby it becomes more and more a part of the control factor over consciousness. This Awareness indicates in one sense, material science may be seen as the Antichrist, whereby the materialistic scientific approach as that which fits the category of all of those qualities just mentioned in regard to the Antichrist.

This Awareness suggests entities reread that description and think in terms of the materialistic sciences. This Awareness indicates however, that the concept of materialistic sciences is not complete in terms of the potential of an Antichrist, for the fully evolved Antichrist may actually take form as a figurehead over this materialistic attitude exemplified by sciences and by the rational approach to existence. The figurehead may be a single entity, or may be a group of entities. This figurehead may even be a non-entity, who has power and force through a concept which influences entities into the use of these materialistic forces for domination over the masses.

WHAT EXACTLY IS THE ANTICHRIST?

This Awareness indicates however, the probability is that there will emerge a single entity who has the capacity to represent to the masses all of that materialism and all of that scientific knowledge based upon materialism which will allow that entity to exemplify that which has been described as the Antichrist. This Awareness indicates that this is not absolute. This Awareness wishes you to understand that the Antichrist is not an entity that is in existence,

A drawing of Ahriman, the Anti-Christ as seen in meditation by Paul Shockley and two other entities

waiting in the wings of a theatre to enter upon the stage to play an appointed role. The Antichrist rather, is a concept which gains its energy from the forces which are built around, and leading that concept; the forces of materialism in this case, which are leading and building to a peak. When the energies are right, someone may appear to use those energies and to exemplify that which is referred to as the Antichrist. This Awareness indicates that at present however, the energies are still building, and the Antichrist is but an energy field which these materialistic energies are reaching toward. Whenever this becomes ripe and in full fruition, an entity may appear to materialize this concept as a person.

This Awareness indicates that there are always persons who will appear to take on energies which have been in process, which are in motion, which build to certain formations. This Awareness indicates that entities essentially are creating the Antichrist by their worship of matter.

QUESTION:

Awareness, the Interpreter, some time back, drew a crude drawing of an entity who he referred to as the Antichrist that he had seen in meditation, and indicated other entities had seen a similar entity, and we published this illustration in the *Gathering Storm* information. Who was that entity?

COSMIC AWARENESS:

This Awareness indicates that this as an image of that force known as Ahriman. As this force is moving into the manifestation stage, the energy as not yet fully material in nature. The energy as that which is in a slow process of materializing. This Awareness indicates this entity, or energy, as that which is in existence on other planes and can be seen when entities are in those other planes, but the entity does not exist as a firm, solid, three-dimensional being on this plane at this time for any permanent duration.

This Awareness indicates the entity can, however, appear in brief periods on the physical plane as a three-dimensional energy. That this power and force of this entity Ahriman as that which grows stronger as entities become more and more enraptured with materialism and power over others. Whereby this entity gains energy from those who worship materialism, this entity grows stronger.

QUESTION:

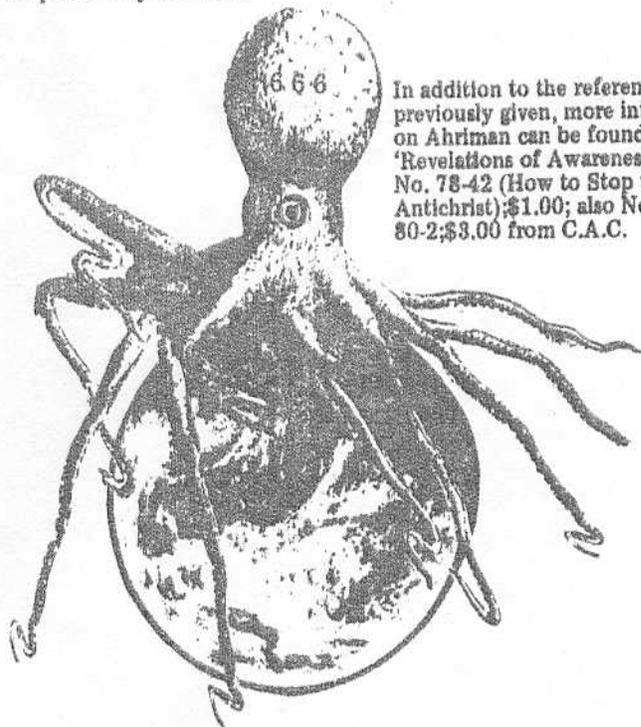

Is there any more information we need to have in reference to the Ahriman entity/energies for publication?

COSMIC AWARENESS:

This Awareness wishes to remind entities to refer back to the information given previously, particularly in reference to that which was released in regard to the *Gathering Storm*, and to the UFO information, that *Web of Conspiracy*. * This Awareness indicates that this series on Ahriman as that which may be seen as a continuation of those readings. This Awareness indicates also that this ties in with the information released in regard to the Electronic-Funds-Transfer System as described in these earlier readings.

* The *Gathering Storm* (Revelations of Awareness No. 79-1):\$4.00; 79-18 (The *Web of Conspiracy*, Part 1):\$3.00; 79-25 (Part 2: The Secret of the UFOs):\$4.00 from C.A.C.

Emphasis is by the editor

In addition to the references previously given, more info on Ahriman can be found in 'Revelations of Awareness' No. 78-42 (How to Stop the Antichrist);\$1.00; also No. 80-2;\$3.00 from C.A.C.

"The gods make mad those whom they would destroy"....

REVELATIONS OF AWARENESS is a cosmic newsletter published periodically by Cosmic Awareness Communications, (A non-profit organization), PO Box 115, Olympia, Wa., 98507. Membership is welcome as there is much work to do before peace and sanity come to this plane.
