Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

( Helping people become aware )

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

THE  
AFTER-DEATH  
EXPERIENCE  
( Part 3 )

INTO  
THE  
WHITE  
LIGHT

Paul Shockley  
Interpreter

PLEASE NOTE: for easier reading and greater understanding, Cosmic Awareness suggests that the following material be read aloud.

MOST ENTITIES WOULD SURRENDER PRINCIPLES RATHER THAN FACE DEATH

## THE FEAR OF DEATH

### How it affects entities

#### QUESTION:

Is the Illuminati's power essentially derived from mankind's belief that death is "the end of the road", and that one's existence ends with death? If people become aware that death is simply a switching of frequencies of consciousness, would the power of the Dark Forces collapse? Was this the main point that Jesus was trying to get across with his resurrection,--that there is no death?

#### COSMIC AWARENESS:

This Awareness indicates that this as in a large degree accurate. This Awareness indicates that the power is dependent to a great degree on the use of fear, and the promotion of security to entities who obey and follow certain behavioral patterns out of fear of disobedience and the consequences thereof. This Awareness indicates that as previously given, approximately 95 to 97% of all entities are controlled to a great extent, to approximately 90 to 95% of their behavior, by those fears associated with death. This Awareness indicates that most entities do not believe that they spend that much concern in regard to the fear of death, but this Awareness includes in that fear of death, the fear of being deprived from those things which entities desire for their comfort which are, to this Awareness, seen as one shield against the danger of encroaching death.

The fear of being deprived of one's self-esteem or social esteem, the image one or others may hold in regard to an entity; this as another layer or shield against the fear of encroaching death. The fear of being deprived of basic necessities; such as the biological needs, this as another shield. The fear of being deprived of one's future assets, developments, freedom to express and create a better life; this being another of the shields, and so forth, to the basic fear of being violated physically if one does not comply with those forces which would make demands by use of the fear of death.

This Awareness indicates that essentially, all entities or most entities, do not respond to behavior based upon readjustment to whatever demands may be made of them if any of these shields are threatened. This Awareness indicates that entities, for example, may not wish to lose their job, which is an outer shield against the insecurity of death, but still, that outer shield may be so significant to the entity, that rather than lose his job he would compromise his principles and go along with orders that he did not believe in, in terms of his own soul values.

This Awareness indicates that this as a form of manipulation of an entity's soul toward that which is opposed to his beliefs and ethics, simply because the entity has a fear of death which the entity may not wish to face, even to the degree of losing his job. This Awareness indicates that others may be willing to give up their job in order to abide by their principles, while refusing to give up their basic needs for their principles. Such an entity for example, as one who would, under dire conditions, steal or rob from others in order to satisfy the basic needs of biological nature, such as the need for food.

This Awareness indicates that still others might be capable of withstanding such temptations, but might fail at the thought of physical violation, and under torture or threat of death might yield their principles in order to save their hides. This Awareness indicates that this occurs occasionally in times of war, wherein entities turn against their own fellow associates or country in order to preserve themselves. This Awareness indicates that essentially 95 to 97% of entities have such a strong fear of death that somewhere along the way they will crack when threatened by that experience, so that they will give up their basic principles rather than give up their life for their principles.

#### WHEN IS IT OKAY TO STEAL?

This Awareness is not giving this information to condemn entities, but rather wishes entities to be aware of this fact, and to be able to look at themselves and ask themselves: "What principles do I hold so dear that I would be willing to give up my life in order to preserve such principles?" This Awareness indicates that if an entity, for example, would rather die than to steal a loaf of bread, this Awareness would consider this entity as being somewhat feeble-minded or insane. This Awareness suggests that the degree of violation as that which must be kept in perspective to the degree of consequence, and that *It* does not consider emergency theft as being something which should be worthy of death.

This Awareness indicates that in some nations, even today, an entity may have a hand chopped off for stealing a loaf of bread. This Awareness indicates that this as a greater violation; that a loaf of bread or any other item of greater value could not ever pay for the cost of one's hand. This Awareness indicates that therefore, justice is not always found in the absolute principle that states that: 'An entity shall not steal', unless it is qualified by certain other modifications such as: 'Thou shalt not steal unless it is an absolute necessity, and there is no other way for you to survive, you have tried everything possible and no one will help you, and if you steal just this once, then plan to return it...'...this Awareness indicates that there can be continuous qualifications depending on the particular circumstance, and the entity being sensitive to these various degrees, could in fact be totally justified in the necessity to steal a loaf of bread, for example, but still the entity may need to suffer the consequences for that theft, and the consequences, depending on the social code, not the spiritual code, is that which may be the greater punishment for the entity.

This Awareness indicates that as far as the spiritual code is concerned, there may be no punishment whatsoever, depending on the motives and situation, but so far as the social code is concerned the entity may lose his hand, in which case the social code is out of balance with the Universal Principles, yet is still functioning, and whether right or wrong, is still a threat to the entity's life and well-being. This Awareness indicates that therefore, an entity in considering these various degrees of livelihood and necessities must consider that there is a difference in terms of social justice and spiritual justice.

This Awareness indicates that in many instances, the social justice will reward an entity for an action which in a spiritual justice court would not be seen as worthy of reward, but perhaps of punishment. This Awareness indicates for example, an entity may be rewarded in a social situation for slaughtering other beings because that is what his job calls for, and those in power want him to do so. This does *not* relieve the entity of the spiritual justice which will be extracted in order to balance the spiritual karma.

#### (Closing Message)

This Awareness indicates that entities in using the brain to think with, must by now realize that while the brain seeks absolutes, it seldom is allowed to have its absolutes, for everything is relative, everything is a matter of degree, and frames of reference alter truths and realities, and that which entities would like to see as being unalterable and absolute, are often altered and changed by time, by experience, or by circumstances.

### WHY FEAR DEATH WHEN THE POLLS SHOW MOST ENTITIES BELIEVE IN THE HEREAFTER?

#### QUESTION:

In the last message, Awareness indicated that roughly 90 some percent of entities had a fear of death. I clipped an article from the paper yesterday about a Gallup poll that was taken, which is called the 'most comprehensive survey on beliefs about the afterlife that has ever been undertaken'. This poll indicates that 67% of those polled said they believed in some kind of afterlife, and that higher education didn't weaken the belief. It said college-educated Americans are more likely to hold such a belief than those with a high school education or less.

It also indicated 18 year olds are just as likely to believe in life after death as people over 50. It also indicated that those who believe in an afterlife were asked to choose from among 24 descriptions of life after death. Two out of three in the survey said it will be "peaceful", 54% said they believed they would be in the presence of God, and 42% expected to be with friends, relatives and spouses. 5% said it would be boring. 71% of those surveyed said they believed in heaven, 53% in hell. Rural and Southern Protestants, which were more likely than urban dwellers and Roman Catholics to believe in eternal damnation: Overall 61% of Protestants and 48% of Catholics expressed a belief in hell. Poorer respondents were more likely to believe in both heaven and hell the poll said.

The poll also found nearly 1 in 4, including 21% of Protestants, and 25% of Catholics who said they believe in reincarnation. In general, the Gallup organization said women were more likely than men to believe in an afterlife by 5 to 10 percentage points. In other results they indicated that half the men, and 43% of the women in the survey said they believe life exists on other planets. Only 32% of physicians surveyed said they believed in life after death: 24% in heaven, and 15% in hell. Only 16% of scientists expressed belief in life after death: 8% in heaven and 4% in hell. But 35% of scientists told pollsters they believe there is life on other worlds.

Now, my question is: if 95% of the entities are fearful of death, and this poll indicates they believe in a life after death, is this fear of death the fear of the unknown, or is it the fear that they're going to hell, or is it something other than this?

#### COSMIC AWARENESS:

This Awareness indicates it is essentially the fear of change, of such sudden change, and loss of that which one is identified with. This Awareness indicates that no entity who believes in a peaceful and happy life after death actually fears that peaceful and happy life. They would in fact, if given the opportunity to visit that afterlife and still have the right to return to this present life; most of those entities would like that opportunity. This Awareness indicates however, that it's the fatality or finality of losing all that one holds dear in *this* life which is the greater disturbance to entities.

This Awareness indicates that even the fear of hell in an afterlife is not so compelling as the fear of losing what one holds in terms of one's associates, one's identifications, one's struggle to excel, or to reach some purposeful goal in this life. This Awareness indicates that it is a natural phenomena that as an entity invests in something, that investment becomes more and more meaningful to the entity, so that the entity may gradually lose himself in his investment. This Awareness indicates that as one invests one's energy into something, that entity becomes so identified with the investment that it is difficult and painful to extract oneself from the investment.

This Awareness indicates this is clearly seen in relationships wherein an entity invests in another, continues to give of himself or herself to that other, in hopes of reaching some kind of mutual agreement that brings about a balance and harmonious relationship. This Awareness indicates that as the entity pours more and more of his or her energy into the other entity, the expectation, hope and emotional attachments grows greater and greater, and the prospect of losing that other entity becomes more and more threatening and fearful, and the actual loss becomes more and more painful, to the degree that the entity has invested in that person.

This Awareness indicates that this often is termed love, wherein one pours energy into another, and is not willing to release that energy and not able to release that energy without great suffering. This Awareness indicates that likewise, wherein one pours energy into one's life, investing in one's experiences in the physical world, going through various hardships and struggles to achieve certain things, or to make certain contacts, or to arrange certain experiences; the more the entity struggles in the physical life, the more the entity invests in the physical life, the more the entity does not want to lose that physical life.

This Awareness indicates it is this fear of giving up the known which is even greater than the fear of facing the unknown, or what might occur after death. This fear of giving up the known is that which is generally the greater deterrent to entities leaving this plane. This Awareness indicates that wherein entities have no longer any desire to hold onto that which is known as life, then they pursue a death wish and have little concern about the after-life or what may follow.

### HOW AN ENERGY BECOMES A SOUL ( Does Monka really exist? )

#### QUESTION:

A.P. has a question: "Is there really an entity named Monka who monitors certain people, and communicates from a high mountain on Mars, as some people have said, or is this a hoax?"

#### COSMIC AWARENESS:

This Awareness indicates that this appears to be what may be termed an interdimensional entity, an entity from another dimension which receives its energies from the energizing processes of individuals in this dimension, and others. This Awareness indicates that these creations of individuals such as Monka, and Saint Twinkle, are such that they become as strong and as meaningful as is projected upon them from those who are aware of their existence and purpose, and their purpose and nature is determined by the projections which entities place upon them.

This Awareness indicates this likened unto the peaceful and wrathful deities as described in the *Tibetan Book of the Dead*, whereby they are projections of one's own consciousness. This Awareness indicates that then in this instance, the entity known as Monka as having a kind of identification and existence that develops and feeds off of the energies of those who recognize his existence. This Awareness indicates this also occurs as a process for other entities in their existence, that any entity who exists must either find that existence in reflection from others around who project and recognize the entity's existence, or the entity must focus on himself, or herself, to reassure the self of its existence.

This Awareness indicates that wherein an entity is alone, in order to continue existing, the entity must become self-centered, self-conscious, and reassuring of the self, that it exists. This Awareness

indicates that wherein the entity is in the vicinity of others, the entity finds ways of assuring itself, feeding its existence, recognizing its existence by the attention which others give.

This Awareness indicates that in a physical world, the existence is not so fragile as in other more etheric levels. That wherein an entity in an etheric level exists, it must have continued recognition of its existence until it is capable of recognizing its own existence. This Awareness indicates that this may be equated to the development of soul, that wherein an energy develops strongly enough to recognize its own existence, it becomes then a soul. That prior to such self-realization, the energy is dependent on recognition from any source available, and therefore, seeks attention, seeks gratification, seeks experience, and seeks to be assured of its existence.

This Awareness indicates that Monka essentially, may be referred to as an entity, in that it has its own identity, its own sense of individuality, and is recognized by others as a creation. This Awareness indicates however, Monka as being an individual who monitors and judges the behavior of entities on earth; this as but an imaginary creation, and not yet being finalized in the actual behavior of this energy.

This Awareness wishes to clarify certain areas which may seem confusing in regard to this. This Awareness indicates that every entity is an energy, and every energy is an entity. That energies and entities are essentially the same. That the greater the magnetic center of an energy, the greater identification of self the energy has, the greater the entity or energy center may be, and the individuality of that energy or entity then becomes more permanent. That wherein there is little magnetic center holding the energy or entity together, then the individuality is less permanent.

This Awareness indicates this in part as what is meant by losing one's soul. The soul essentially being the magnetic center of an energy field.

#### ...CATAPULT TO HEAVEN?

#### THE ATOMIC ACCELERATOR CHAIR (ALCHEMICAL EVOLUTION ON ETHERIC LEVELS)

#### QUESTION:

Speaking of Monka, we receive a publication called *News from the Mountaintop; The Monka Retreat and Universal Mother Mary's Garden* in Grass Valley, California, and information has been channeled up until this year by an entity named Samuel George Partridge, who died this year, and in the recent issue he has communicated through the channel of Winfield Brownell, and I'd like to read briefly a little excerpt, and ask Awareness what he's talking about here. He talks about his passing over, and he says:

"After that period I had a time with our beloved brother Lanto, who assisted me in travelling in my etheric or finer body to the Royal Teutons. There he helped me to sit in the atomic accelerator chair which was a terrific assistance to my ascension, and it is being carried on. It is not completed as yet, but it will be shortly. This of course will be the most wonderful blessing of my existence, because when you move into the ascension, you do not need to reembody. You are free from the wheel of birth and rebirth. I will have had this blessing and more. I am so grateful."

Would Awareness explain what the atomic accelerator chair is which this entity referred to?

...Cosmic Awareness takes us through the death experience (from a state of being)

The Pearly Gate Express

**COSMIC AWARENESS:**

This Awareness indicates that this essentially as an etheric concept, created and being energized on the inner plane, whereby this entity in accepting this concept can be assisted in creating higher frequency, or more subtle frequencies and refinements of the etheric body. This Awareness indicates that this essentially might be explained as a kind of etheric ultrasonic device, whereby vibrations are speeded into higher frequencies. This Awareness indicates that it will however, require that entities using such, be willing to allow certain dross and lower energies to fall from them, to surrender and leave behind certain identifications.

This Awareness indicates that essentially this might be termed an etheric form of alchemical evolution. This Awareness suggests entities on this plane need not concern themselves with this, as it is not available on this physical plane. This Awareness indicates that the physical plane having other forms of alchemical evolutionary devices or programs which can assist entities in speeding up their evolution. This Awareness indicates that the Development Classes as that which serves on this plane as one such alchemical action. That there are also the biofeedback types of mechanisms which are beneficial. That the Polarizer is beneficial. That certain dietary vitamins, supplements and foods are beneficial. That in some cases, entities benefit in an alchemical sense, from the use of certain substances such as drugs, or drink or herbs, or from fasting or from meditating, or even from certain experiences and relationships.

This Awareness indicates however, the atomic chair referred to in this reading, as that which exists only in an etheric level at this time.

**ED's Note:**

This editor has a Polarizer by his bed, the magnet suspended from the ceiling so that the entire bed is covered by the magnetism emanating from above. A phenomenon noticed recently when a timer was attached to the Polarizer, allowing it to switch on and off at various hours, was that in addition to zonking me quickly out, into a deep sleep, the feeling when awakening is that my entire etheric body is tingling, and I feel I am not all 'there' yet, but part of me is spread out above. This is a very strange feeling, that I am not entirely in my body but spread out up there somewhere. When I reach down and switch off the Polarizer, I can start to feel my etheric body coming back together almost immediately. After lying there for about 5 minutes the feeling is that it has all definitely returned from wherever it was. I had intended to ask Awareness sometime about this. Since it just indicated in the above reading that the Polarizer creates an alchemical effect, I am now curious as to what exactly is going on. Other members who own Polarizers and have had a similar experience, or others worth mentioning, are welcome to write CAC and share this information with others. (Those interested in purchasing a Polarizer can obtain information from CAC on how to obtain one). Avaton.

**METHODS OF MOVING INTO THE WHITE LIGHT  
(..WALLOWING IN BLISS AND JOY GETS BORING)**

**QUESTION:**

Awareness, the description of what the atomic accelerator chair effected sounds very much like what would happen if you went just into the White Light. Is there a difference?

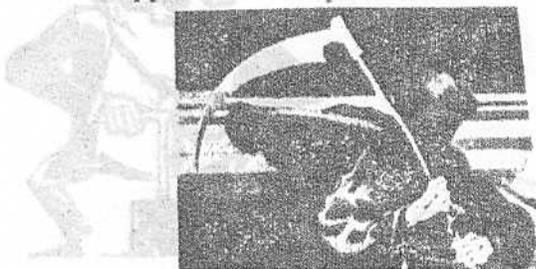

**COSMIC AWARENESS:**

This Awareness indicates that the action as essentially the same. That entities, in order to accept certain experiences, often like to have their experiences in ways which are familiar or unique, and therefore, rather than simply moving in a physical body into the White Light, entities may choose to have a special mechanism designed as a kind of new technology which is more acceptable to their personal belief patterns or consciousness attitudes, and therefore they prefer to have a special vehicle for moving them into the White Light.

This Awareness indicates that this entity as one who has a special fondness for new inventions and therefore, this was created for him to accommodate his personal needs, and allow him to have the feeling that he was being given a particular route to the White Light which was unique and new, even in that inner dimension. This Awareness indicates that on all levels, entities like to have their toys and their games, and enjoy having something that is unique, new, exclusive, or different from anything they have previously experienced.

This Awareness indicates that this is however, quite acceptable to this Awareness, although it may have sounded as though this Awareness was belittling the behavior of entities. This Awareness indicates this is not so. This Awareness indicates that without the variety of these special creations, continued existence as moving into the White Light, existing in the White Light, or any other activity without games or toys, would find entities experiencing a sense of eternal bliss and boredom. This Awareness indicates that therefore, the bliss is often intermittently disrupted so that entities can become somewhat lost, and find their way back, or create games of hide and seek, hiding from the Clear Light, and then seeking the Clear Light, having toys which allow them to flee from the light, or which allow them to approach the light, moving up and down the evolutionary scale, becoming lost, hidden from one another, and from the light, and attempting to find each other, and lead each other back to the light, and attempting to flee from those who would lead one to the light.

This Awareness indicates that these are the games, and the toys available for these games are myriad, and multitudinous. This Awareness indicates that without these games and toys, entities would simply wallow in the Clear Light of bliss and eternal joy and would not appreciate the experience.

DOES THIS ACCELERATOR CHAIR CIRCUMVENT THE BARDO TRIP?

#### QUESTION:

I have one question relating to this, and then I will turn over the tape. Awareness, wouldn't this device, this atomic accelerator chair, and similar devices, sort of violate the normal entity's trip through the Bardos? The challenge of seeing these lesser lights and not going into them and escaping those wrathful deities, and so forth....would not this circumvent the normal trip through the Bardos?

#### COSMIC AWARENESS:

This Awareness indicates that entities may circumvent those normal trips into the Bardos anyway, if they simply choose to move into the Clear Light and refuse to enter into those lesser lights.

This Awareness indicates that the action of having a chair to make the journey is nothing more than a luxury, unnecessary for such a journey, but wherein an entity believes the chair will help; this is likened unto an entity who believes the cane will help him walk better. It becomes a crutch, but the crutch is in reality unnecessary, except as a kind of security blanket for the entity's psyche, so that the entity feels more confidence in making the journey.

This Awareness indicates that even as one may climb the mountain on foot, and another may drive in a chariot, so one entity may move to the Clear Light in consciousness and another may rise in an atomic accelerator.

#### THE ACTION OF THE STATE OF DEATH

...Cosmic Awareness takes us through the death experience. (More on Betaendorphin)

#### QUESTION:

In a recent *Time* magazine article, entitled "Going gently into that goodnight,--A doctor studies patient's recollection of dying", there is mention of an interesting thing I'd like to read briefly, from this man named Sabom who did research similar to Kubler-Ross. He says, "What astonished Sabom, was a uniformity of the patients' accounts of the after-death experience. All recalled a sense of timelessness, an awareness of their own deaths, and a strong sense of reality. "It was realer than here!", said one man. Patients remembered an absence of physical pain, a feeling of tranquility, and even delight. "That was the most beautiful instant in the whole world when I came out of that body", said one. Sabom could discern no religious or other differences between patients who had near-death experiences and those who did not. The two groups contained roughly equal numbers of atheists and frequent church goers, college grads and high-school dropouts. Even prior awareness of the existence of near-death experience did not predispose patients to have them, nor did race, occupation or sex, though curiously women who had near-death experiences were more likely to recall seeing their loved ones.

"What was a serious scientist to make of such findings? Could the recollections be nothing more than dreams or hallucinations induced perhaps by drugs, lack of oxygen, or brain seizures? Could they have been triggered by Betaendorphin, the body's naturally occurring opiate, which biologist/author Lewis Thomas has suggested may be released at the moment of death to 'ensure that dying is a painless and considerably pleasant experience'."

Would Awareness comment on that?

#### COSMIC AWARENESS:

This Awareness indicates that the experiences, while accompanied by this secretion of this substance at the moment of death, the experiences are not caused by this secretion. This Awareness indicates essentially, the action of moving into a state of death is not too unlike the action of waking up from a sleep. This Awareness asks you as this time to open your mind and accompany this Awareness as *It* describes a scene, a typical scene of an entity who is passing through this experience.

This Awareness asks you to imagine yourself lying on a bed or table. There may be persons around you. This may or may not be in a hospital. This Awareness suggests that you visualize yourself as being inside of your body, feeling certain pains and unpleasantness, tightness, and yet certain energies within yourself create a vagueness so that you are not quite conscious of everyone's presence around you. You recognize who you are, and that you are sick and in danger, and you recall all of your personal identifications as to your childhood experiences up through to your present experience, as to certain actions that you have left uncompleted, certain debts or trespasses that you would like to clear up before leaving this scene, and feelings of attachments to certain energies and entities whom you love.

You may feel the ring on your finger, the clothing about your body. You may feel persons nearby speaking,

saying things about you, or to you, expressing concern, emotion, or discussing your condition. This as occurring in a kind of dreamlike fashion, whereby you are half awake and half asleep, similar to an experience of sodium pentothal, or an experience of high fever, or an experience of intense pain, whereby you are not capable of being objective in your thinking, but are, rather, subjectively experiencing in a kind of dreamlike or nightmarish experience. There may be hallucinations whereby you see entities' faces, familiar or unfamiliar to you.

This Awareness indicates that as the experiences begin to accelerate, and you move more and more out of touch with the exterior world, and more and more into the disidentification with the body and its pains, you begin to move out of the body as a kind of ascension, whereby it becomes likened unto exiting from a dream, into a real body, not the dream body which lies there in agony, whereby in your real body there is no pain, there is no sorrow; there is a feeling of great youth and vitality and bliss and peace, and in this real body, you look about, and look back upon the scene in that room where entities are gathered around your broken body, your dream body, and entities are either weeping or concerned, and feel loss, or anxiety, and you look at this experience of these entities in a manner in which you have many times before looked back on dreams when you awaken, and in your awakening, in looking back upon the dream, recognize that you have left certain parts of the dream unfinished, certain obligations and duties, responsibilities and goals and purposes that you had during that dream were not completed or fulfilled, and as a result of those feelings, you decide that although you know what is out here in this real world, you wish to go back to sleep and enter that dream, and complete your purposes and satisfy the necessities of the complexity of that dream.

Therefore, you move back into the deep sleep, into the physical body and when you awaken, find yourself wide awake in a painful body which has been damaged and hurt, and your loved ones are present. You then discuss your experience, and looking at the experience from this broken body, you can't help but wonder if that was the dream, and this was the reality; yet it seemed so vivid and so real that you must conclude that it was somehow a glimpse into another dimension.

This Awareness indicates that were you to move on and not return to that dream, you would find yourself in another dimension, and the sun would be shining from somewhere, and as you move toward that awakening, letting go of the dream of yourself in that broken body, and those entities gathered around you, as you look at them and say farewell to that dream, and turn your eyes in the other direction toward that which is the light which emanates from somewhere, you then find yourself moving into that which is likened unto a great awakening into the day, into the superconscious reality of who, in fact, you really are.

This Awareness indicates that once you have experienced this realization of who, in fact, you really are, and when you have basked in the light of reality sufficiently to bathe your soul, to cleanse your soul from all of the dross and confusion and uncertainty as to your identity, then you may find yourself looking from the light out into the shadows, toward the lesser lights, and may find yourself moving back into other dimensions, other Bardos, other realms, other lifetimes, and other dreams.

## THE "AWAKENING" IN THE PASSING OVER TO WHO, IN FACT, YOU REALLY ARE

...( GETTING STONED ON THE INNER PLANES )

### QUESTION:

I'd like to ask Awareness if this experience would apply to someone like my mother, who passed over a month or so ago, who had a very strong picture in her mind of exactly what her so-called Spirit Land was going to be like, having been a spiritualist most of her life, and having read many of the books relating to the Spirit Land?

### COSMIC AWARENESS:

This Awareness indicates that entities tend to first move toward the White Light. This Awareness indicates this in the sense of awakening to reality. That wherein an entity in sleep awakens into reality, the entity becoming awake.....This Awareness suggests that you visualize yourself as one who has been dreaming, and who awakens into the light of day, or the conscious world, but imagine that you are one who is blind and deaf, and upon awakening you do not see or hear anything in the external world, you simply become conscious of who you are. This Awareness indicates that this is a kind of parallel of what may better be an analogy of the awakening in the passing over.

This Awareness indicates that while you awaken from your sleep into a conscious world, the images which you see are still images within your consciousness, in that you are blind, and the sounds which you hear are sounds which you imagine or experience within yourself, and these sounds and sights have nothing to do with the external world outside of yourself, but are in fact mirroring your consciousness itself. This Awareness indicates that the entity, in falling asleep, goes into sleep actions and may experience images and energies, and upon awakening, again awakens into a consciousness and realization of who, in fact, the entity is.

This Awareness indicates that in a similar way, when passing over the entity moves into the White Light, realizing a superconscious experience, wherein the entity becomes *super-aware* of who, in fact, he or she really is, and the entity knows that he or she has awakened to the moment of truth, out of the dream of physical existence which was composed of many days of lesser dreams and awakenings, and into the ultra-awakened state of realization of who, in fact, you are.

This Awareness indicates that this entity, upon awakening to this level, becomes one who is one with God at that moment, and wherein one can stand that reality of who he or she is, and can remain in that light, seeing the reality of oneself, that entity becomes illuminated in the Clear Light. This Awareness indicates that not all entities can take that much clarity, can accept seeing themselves completely. Many entities awaken partially after the passing over just as in your physical life many entities upon awakening in the morning, awaken only partially, and after long periods of time, may rouse themselves a little more, and with great effort, may awaken still further, but being as it is so difficult to remain awake, the entity may simply find some pacifier, or something which will occupy his attention and allow him to fall back asleep.

This Awareness indicates that likewise, entities passing over may not wish to move toward the light, may shun the light like a child saying, "I don't want to wake up yet. Let me sleep!", and even though no longer able to recapture the dream which has just been experienced, the entity may seek to find another dream, seek to find some other way of becoming involved in pacifying the urge to remain unaware of who, in fact, one really is. The entity may find drugs, drink, or other forms of stupification, hallucinations and playthings, even in the inner planes, whereby the entity may remain in limbo, or in certain states of imagination, projecting and receiving energies of lesser lights.

#### HOW TO TRANSCEND THOUSANDS OF FUTURE LIFETIMES

This Awareness indicates that it has been said that the entity who, upon passing over, turns toward the light and with every ounce of being, with every element of purpose available, with all of one's might, if that entity claws and scratches and moves toward the Clear Light at the moment of passing over, rather than moving toward lesser lights, that entity, in moving toward the Clear Light, and allowing all of that reality, awakening totally in the Clear Light, that entity transcends the evolution that would ordinarily take thousands of lifetimes to achieve.

#### INTO THE WHITE LIGHT,

#### ---THE FINAL JUDGMENT

...(The Pearly Gates--the streets of gold etc.)

#### QUESTION:

In order to do that, at that point, it would take tremendous willpower, wouldn't it?

#### COSMIC AWARENESS:

This Awareness indicates it would take the willingness and desire to move into the light. This Awareness indicates that it would take an awareness and a sense of priority. That the discussion of willpower, tremendous willpower, as being more symbolic. That if it required that much willpower, it should still be accomplished if entities can possibly do so. This Awareness indicates that essentially however, it does not require that much willpower, but what generally occurs in the passing over, is that entities, particularly having been programmed with feelings of guilt, will seek not to become aware of their total life and experiences, will shun the light of reality, will refuse to see what they have done, and rather, will move away from the Clear Light toward one of the more dim lights, toward the lesser lights, and there will experience either some form of pleasant indulgence or will experience punishment, according to their own belief in the need to be punished for their errors.

This Awareness indicates these lesser lights may be equated to that which is Hades, or hell, or may be equated to those levels which are paradise or heavens, depending on what the entity expects from these lesser lights. This Awareness indicates that beyond heaven is the Clear Light. Beyond heaven there are worlds which are indescribable in terms of images, for the images are essentially invisible, and energies only exist. This

Awareness indicates that in regions of limbo, in regions of purgatory, and regions of Hades and hell, these are vivid, filled with images, filled with detail and graphic, explicit experiences and emotions.

This Awareness indicates that these areas in consciousness are in those areas of the lesser lights and are also created and projected by the entity's own judgment of self, and the entity's own belief that he or she needs to be punished or rewarded. Those entities awakening from their dream of life, evaluating their experience, evaluating themselves in their experience, may judge themselves harshly, and may deem themselves worthy of punishment, according to their beliefs or according to the graphic images which they begin to believe, as they see and project and create the appropriate reaction to their sense of guilt; or these entities, in awakening from their life, feeling they have done well, may project in those lesser lights, expectations of rewards, and may look for the pearly gates and streets of gold and loving faces of friends long departed, and may in fact see these images and find these experiences.

This Awareness indicates that these realms are experiences in consciousness, and like the dream of life on earth, these dreams of life in hell, or life in heaven, or life in purgatory, or life in limbo; these dreams are also available for entities to gratify their own deeds according to their growth, potential, and that which serves to pacify their conscience, reassure them of their values and of their existence. This Awareness indicates that these levels also are Bardos and dreamstates of other realities, other mansions.

This Awareness indicates the only experience that is not of a dream, is that of the Clear Light. That this may only be glimpsed briefly while entities are in the physical body, through meditation and certain unusual experiences of cosmic insight, wherein entities awaken momentarily into superconscious experiences, or whereby entities glimpse this briefly in their imagination, or in releasing identification with self, and experiencing to a slight degree, the Clear Light.

#### SUICIDE AND THE MOMENT OF DEATH

This Awareness indicates the moment of death as that which provides the unique and great opportunity of becoming totally awake. This Awareness indicates however, wherein an entity who would, in seeking the Clear Light, seek out death purposefully to experience that Clear Light in the sense of suicide, that entity, in recognizing at the moment of death that he or she has violated the will of the Divine, as having wrenched himself from the dream of life, disrupting the timing of that dream, disrupting the energies of that dream, the entity upon awakening and having the Clear Light of Reality shining upon him, will tend to move toward the Clear Light, but rather will tend to experience a sense of guilt and a sense of remorse, and a sense of wrong-doing, and will tend to turn backward toward the life-dream, the dream of physical life; and in that turning backward, the entity will experience a loss of the reality which he sought in the act of suicide, for the Clear Light, while still present, will not be as merciful to the entity in that it reveals all, and hides nothing from the entity, and the entity recognizes his error, and dreads to face the Clear Light.

## THE SHOCK OF AN UNTIMELY DEATH

This Awareness indicates therefore, it is not proper that entities prematurely seek the Clear Light, but rather, upon the experience of passing over, that timing is the moment wherein you will yourself to be one with the Clear Light. This Awareness indicates that in the event that an entity, through accident or through violation, is propelled into the passing over before the natural timing, that entity often experiences a great shock, and the shock is such that it may disrupt certain natural evolutionary patterns.

This Awareness indicates that the killing of each other is especially violative, in that it disrupts the purposes and path of another's movement, so that prematurely the entity is awakened into the passing over. This Awareness indicates this as similar to the experience of the soldier, who at 4:AM is suddenly tossed out of bed by the sergeant and told to wake up and get dressed, it's time to move out. This Awareness indicates that in the evolution of the entity's body and the emotions, the entity suffers a severe shock and though the entity can rally and adjust out of necessity, it does not create for the entity a sense of harmony and balance, but creates anxieties and frustrations, and as this occurs repeatedly it can be especially damaging to an entity, wherein an entity is constantly and consistently violated when the entity sleeps, whereby the entity is awakened from sleep and programmed by forces, the entity may become quite apprehensive of going to sleep and may sleep restlessly.

Likewise, an entity who has been violated physically in one life or another, especially if repeated, that entity may become apprehensive about going to life, moving into life-dream experiences, and may not live well, being somewhat vaguely apprehensive that something is going to shake him from his life-dream. This Awareness indicates that this essentially is the great violation to others.

This Awareness indicates that as the entity is allowed to live his or her life freely, and as the entity in harmony sleeps out his life-dream without being abruptly awakened the entity in awakening feels a sense of great rest and great vigor for future activities. The entity does not feel anxieties, and therefore the entity can move into future experiences calmly, harmoniously, and with a flow of the appropriate energies.

This Awareness indicates that the parallels between life on earth and life in dreams are that which are very close. This Awareness indicates that it may be said that dreams were given to entities so that they might understand their lives. Even as there are a multitude of dreams within an entity's life, so likewise, there are a multitude of lives within an entity's existence.

This Awareness indicates that your lives are but a great experience of sound and fury, of boredom and delight, of images and gratifications, of fears and expectations, of apprehension and hopes, surrounded by friends and images, including dreams and sleeps, and followed by a great awakening from your dream of life.

\*\*\*\*\*

### EDITOR'S NOTE:

This reading is a continuation of the life-after-death readings, which began with 'Revelations of Awareness' No. 81-27 (On Death & Dying); \$3.00 and continued with No. 83-6; \$3.00 from C.A.C. More in this series will be forthcoming.

## ALL IS VANITY

### NUCLEAR FIRST-STRIKE AGAINST RUSSIA PLANNED FOR JUNE 18TH IS POSTPONED

(April 21, 1988)

#### QUESTION:

Does Awareness have any information of any urgency that *It* would have the membership be aware of that we would include in our next mailing?

#### COSMIC AWARENESS:

This Awareness indicates that *It* wishes to comment on the previous statement in regard to the June 18th date. This Awareness indicates that this appears to have been shelved, due to difficulties associated with the launching of a satellite which did not accomplish its purposes. This in part the reason. This Awareness indicates that it *does* appear that energies are at a kind of pacified level. There can be that which comes about at a later time to upset these energies. This Awareness indicates this is not seen as immediate and that there is no particular urgency at this time. This in terms of global, national, or social.

This Awareness indicates that individuals may have their own particular urgencies and situations.

#### QUESTION: (Excerpt from following reading)

Awareness, the satellite that didn't go into the correct trajectory recently, which Awareness indicated has postponed the first-strike against Russia that was scheduled for June....Did the Russians have anything to do with that, or was this just a malfunction, or a miscalculation on the part of the Americans?

#### COSMIC AWARENESS:

This Awareness indicates it appears that the Russians played a part in causing this to malfunction. This Awareness indicates that there is a possibility of another launch before the June 18th date. That should this then be successful, there could yet be a problem regarding that date. This Awareness indicates however, that this appears highly unlikely.

This Awareness indicates that much of the activity among these war planners is likened unto a kind of game plan, whereby they are not highly concerned about actually creating the first strike. Although this is a goal, they are also gathering data and information each time this fails. Each time they prepare, it is likened unto another game plan; whereby the information gathered from such is stored and added to the military knowledge, the warehouse or storehouse of information, which they consider to be highly valuable for future planning.

Thus, they do not see these actions as failures, and they do not intend to launch an action which would fail. Thus, they are willing and quite satisfied to scrap a plan if it appears to be inadequate. This Awareness indicates however, that they also are looking for an opportunity to consolidate their power, and see the Skoptsis as a definite threat to that consolidation.

ED's Note: This no doubt relates to the space shuttle Challenger, which was launched in April of this year with the Track 12 Data Relay Satellite (TDRS) which did not go into the correct orbit. There were a few stories in the press the following day or two stating that the Pentagon thought they could get this satellite into the correct orbit by use of the retro-rockets in the device. However, since there has been no subsequent release by the Pentagon, to my knowledge, we can assume the satellite never did get into the correct orbit where it could be used to help launch the nuclear first-strike against Russia which the Pentagon had planned this June 18th. (Avaton)

#### THE SCENARIO OF THE SCHEME OF THE INTERNATIONAL BANKERS

#### QUESTION:

Audrey Patrick had in a recent *SPIRAL Mobius*, an interesting theory. I'd like to read this and ask Awareness to comment. It concerns the bankers:

"Some experts believe that the world needs a new agency to help debtor countries." She quoted this from the 'Debt Bomb Threat' in *TIME Magazine*, January 10th, 1983. She says: "Notice what has been going on? It reads like a Socialist Robin Hood story. The big bankers and the U.S. government have, in effect, taken money from the working people in the United States and transferred it to the less developed countries and Communist Bloc nations.

"In the same way that the progressive income tax was devised by Karl Marx, to take from the middle class, not the very rich (they have their banks, foundations, and multiplicity of tax shelters), and give the money to the poor through social programs, so the money of the citizens of the rich U.S. has been diverted to the less developed countries. It is the same scam, but on a larger scale.

Unfortunately, the poor often do not benefit, and are worse off than before, but one noticeable difference between national and international programs of wealth transfer, is that now, the International Bankers are getting uneasy. It is they who are hurting. Or are they? What we are witnessing could be one of the cleverest ploys of the century! The International Bankers and their banks, are sitting on the gold and silver supplies of several countries. They have much in tangible assets, enough to offer the world a gold or silver-backed monetary system, a new one, that operates on the basis of Electronic-Funds-Transfer.

Could it be, that the large banks have planned to let their paper assets dwindle in order to secretly participate in a Global 2000 or Brandt Commission type of asset transfer to the Third World countries, as well as the less developed Communist ones?

Because in effect, this is what is happening. If so, it would need to be done without the knowledge of the American people, since they would likely oppose it, particularly in light of our current high unemployment rate. Why haven't any of the economic newsletters picked up on the idea that the current economic depression may have been planned to implement world Socialism?

Although the Third World countries are heavily in debt to the bankers to the extent that they need to borrow increasing amounts of money to simply pay off the interest on their loans, the large International Banks are now in a position whereby they can direct the direction of outflow of money. Less developed countries are in servitude to them, and the industrial nations are also increasingly under their control.

"Was this planned to lead to world-wide Socialism under the control of the International Bankers?"

#### COSMIC AWARENESS:

This Awareness indicates that this as a very clear analysis of the activities involved in this scenario. This Awareness indicates that the outcome may be called Socialism. It may also be called Totalitarianism, or by other names. This Awareness indicates that essentially, its intention is to elevate those who are in control of the world's wealth, in terms of the gold and precious metals, and in terms of real estate holdings, and other valuables; to elevate those of the upper class, while bringing down those of the middle and lower class into levels of poverty and dependency, whereby the appearance of the collapse is to give the impression of being out of control, accidental, and the result of mistakes.

This Awareness indicates however, that these activities are orchestrated from higher levels, and there are very few mistakes involved; although many entities in lower levels of the activities are not aware of the plan and perceive this as a series of blunders, often blaming themselves for such. This Awareness indicates that whether this will in actuality lead to a world totalitarian system of the Ahriman Forces, or whether this will fail in its collapse, will depend on many factors which are not yet clarified.

This Awareness indicates that there is at this time little that individuals receiving these messages can do in terms of altering the course of events. This Awareness indicates that it is best not to become overly worried or concerned in regard to what to do, for these things will be worked out in other levels, according to the needs of humanity. This Awareness indicates as previously mentioned, it may be necessary for entities to experience the yoke of world totalitarianism for a time in order to understand that yoke, and to throw off its burden.

This Awareness indicates that if entities do somehow wake up to this prior to the experience, it will diminish the problems involved in the experience. This Awareness indicates that there is that which is a slow and steady awakening of the mass-mind to look at those who are orchestrating these affairs. This Awareness indicates that also, there are those forces which are of considerable power, who are also desiring to thwart the plan, as the plan would not include them as beneficiary parties.

This Awareness indicates that it is too early to understand or to give further information on this plan at this time; this in relation to its outcome and the implementation of its designs.

\*\*\*

ED's Note: *SPIRAL MOBIUS*, 347 North Union St., Kennett Square, Pa. 19348. \$25 a year subscription; \$3.00 for sample copy. C.A.C. continues to recommend this revealing publication, particularly now that Dr. Beter has discontinued his Audio Tape information.

THE COMING 10-TO-1 CURRENCY  
CONVERSION AND WHAT YOU CAN  
DO ABOUT IT NOW TO SAVE MONEY

QUESTION:

B.M.J. of Santa Barbara, Cal., sent in a copy of an economic newsletter, dated March, 1983, and he asked if I'd read this to Awareness and ask if this is valid. This subject was explored a year ago and the event didn't occur then.

"The ten-to-one Currency Exchange by May 15th? I haven't said much about the coming currency call-in during the last few months, simply because I had nothing new to report to you. However, within the last 2 weeks, I have been contacted by one of my subscribers, who, after a lengthy telephone conversation, revealed information which I believe can be accurate. I hesitated to tell you the following, but you are paying for information, and I feel that if I have some information on this subject I should at least present it to you, so here it is:

According to my subscriber's source (a CIA agent), the United States has spent over two hundred million dollars in computers and manpower in the last couple of years to prepare for our currency exchange, and it is a combined effort of the Treasury Department, the Internal Revenue Service, and the Central Intelligence Agency. According to her source, the target date for the call-in is between Feb. 15th and May 15th, but more than likely it will be closer to May 15th, after the April 15th income tax deadline.

She emphatically states that it will be a ten to one exchange. Now, I can't place any guarantee on the above information, although from the bits and pieces I've been receiving over the last several months, I believe that it can certainly be true, therefore, I now recommend that you go all-out in securing ordinary clad coins, not just a few jars full, but thousands of dollars worth. As I stated before, there is no way you can lose. Coins can never be called in, exchanged or devalued.

First of all, it would be impossible to remind over a hundred and seventy five billion coins, coins which took the government over 15 years to mint, nor could they devalue the coins by the amount of the exchange. If they were to devalue the coins on the ten-to-one basis, it would now mean that 1000 pennies would equal a new dollar, instead of one hundred pennies. If you had to get change for your new dollar, the clerk of a store would have to give you 40 quarters, or its equivalent, instead of 4 quarters. One simple transaction would clean out the cash register and put a hole in your pocket.

The U.S. Government will have no choice but to increase the value of the coins by the amount of the exchange. During a 10-to-1 exchange, the value of your coins will increase by 10 times. For example, a loaf of bread currently cost \$1.00. A ten-to-one exchange takes place, and you get ten cents for your old green dollar. After the exchange, that same loaf of bread will cost you ten new cents, so you break even; but if you had \$1.00 in coins, you would now be able to purchase 10 loaves of bread. You actually increased your purchasing power by 10 times.

After the exchange, a \$20 grocery bill can be paid with two new dollars, or just 8 of your hoarded quarters."

I'd like to ask Awareness if *It* sees this information as valid, and the timing correct this time?

COSMIC AWARENESS:

This Awareness indicates that the evaluation in regard to a coming exchange of currency as indicated at the 10-to-1 ratio is that which appears to be accurate and planned with great amounts of energy having been expended for this purpose. This Awareness indicates that in regard to the timing of this event, it appears that the information given to this entity was not based upon accuracy. This Awareness indicates however, that it appears the event for the exchange as that which is considered, and is.... This Awareness indicates that it appears the timing as that which is intended to occur... this as an unspecified...the decision is not finalized as to the exact timing.

This Awareness indicates that it does appear there is some strong chance that this may occur within the time indicated, but that those involved are also flexible in terms of dealing with these energies at a later time. This Awareness suggests that entities prepare themselves for such an event, which could occur at any time. It appears this will occur within this present administration if this is seen as being beneficial in relation to all of the economic trends and tendencies that are presently occurring.

This Awareness indicates that the great benefit to the administration in doing this exchange in the near future, lies in that it then has the option of repeating the scenario of the past, allowing a gradual and continued inflation, which gives the illusion of growth and prosperity in the nation. This also allows the banks to have their apparent stability and growth. This also allows for a great savings in the printing costs, and allows for the realignment of the currency with the gold standard at the current price.

This Awareness indicates that this will give the currency greater strength and stability. That they may then also make arrangements with foreign countries in regard to debts owed this country, whereby certain reevaluation may occur that will help to bail out those foreign countries in terms of their debts. This Awareness indicates that it will offer an opportunity for many types of juggling to occur so that values may be altered in many levels without the public fully understanding what is occurring.

This Awareness indicates that it also will bring the figures used in dealing with large amounts of money down to a level which is more easily monitored, controlled, and used in programming, and for purposes of bookkeeping will save much labor. This Awareness indicates that it does appear there is a strong possibility that within a short period, this will occur. This Awareness does not see this as certain, in the period between the present and May 15th, although *It* does see that this can be implemented suddenly, and unexpectedly.

This Awareness indicates that it appears a likely time will be near the first part of May, or during the first week of May. This Awareness indicates however, that this is not seen as certain. This Awareness indicates that it does appear this will be implemented within the next few months, well before the elections for President, so that the economy will be well on the road to apparent recovery whenever the elections roll around. This Awareness indicates that once this has been implemented, then the realignment with gold backing and the sense of stability and growth will be emphasized, giving the public the feeling that the country is now once again strong economically.

This Awareness indicates that this as part of a plan to restrengthen the economy of the United States; that economy having been deliberately weakened during that period wherein the forces were seeking to tear down the fabric of the United States in order to allow for Communistic takeover. This Awareness indicates that as this has *already occurred*, with the Bolshevik takeover of this government, they now wish to stabilize this country, to meet the threat of the Skoptsis, and to bring about a greater period of growth and development.

This Awareness indicates that once this program has been implemented, the government then will be able to pour money into the economy and start the rapid buildup and growth of the economy again, by turning on the presses and creating more money for more projects and more national debt.

#### QUESTION:

Awareness, how can the government issue new money, even partially backed by gold, if there's no gold in Fort Knox anymore?

#### COSMIC AWARENESS:

This Awareness indicates that so long as entities do not know there is no gold, this can occur. That the gold window may be closed, so that the gold is not released, but whereby the money can be tied to the value of gold. This Awareness indicates also, this plan would allow for the government to purchase gold by printing money, and to use that money to restock its depleted piles.

This Awareness indicates however, that this is not seen as a probable action, for it appears rather, that the gold as that which is owned by the Federal Reserve Bank, and that this is to be sufficient for the purposes.

**ED's Note:** In light of the above information, wise entities will start rat-holing the coins they find in their pockets at the end of each day, if not already doing so. It appears the scheme to devalue our currency and call in the paper money could occur at any time now, making this a major opportunity for entities to make a windfall profit on common coins. For more information on how this will work, please contact SPIRAL FEEDBACK, Box 80323, Lincoln, Nebr., 68501. (\$20 for a year's subscription, 24 issues); send \$4.00 and ask for their special 40 page double-issue dated March 23, 1983, which goes into this subject of storing coins at great length. There is also information on the cancer hoax, Zionist conquests, abortion, the Reich accumulator and many other subjects. CAC continues to recommend this very informative SPIRAL publication.

**PS:** this editor does not see how one could lose on this deal. If the 10 to 1 recall does come about, you have increased the value of each coin you hold by 10. A dime will literally buy a loaf of bread. If the recall for some reason never happens, you still have the coins stashed away and can use them at your local store, gas station etc. Come on, you gamblers, let's go for it! (Avaton).

## ....MORE ON LEE MICHAELS' ADVENTURES: PROBLEMS THAT CAN OCCUR WHEN ONE LEAVES THE PATH AND ALLOWS SPIRITS TO MISUSE THEIR CHANNEL

(April, 21, 1983)

#### QUESTION:

A question from Jack Katchmar in Detroit: "Cosmic Awareness, I talked to Lee Michaels on March 20th, 1983, and he said he was in an auto accident (laid up for the past 9 months), and since he left Detroit in June, 1982, all of the people he had trained for Cosmic Awareness trance work had either been killed or driven insane. I cannot understand why God's Light Forces on the Inner Planes cannot give us God Light Workers here on earth better protection."

That's Jack's question. My question added to this is: Is this related to the Ahriman Forces and so forth,—this information about Lee and his channels? What exactly is the connection there?

#### COSMIC AWARENESS:

This Awareness indicates that this entity Lee Michaels as having allowed and encouraged every form of spirit to communicate through his channels. This Awareness indicates that many of these spirits were of a very demented nature. That there were some from the lower Bardos; there were some who were of detrimental qualities in terms of the spiritual values. This Awareness indicates that this entity, failing to recognize the seriousness of his charge, allowed anything and everything to enter and to come through the mediums with whom he worked, and through his own channel.

This Awareness indicates that this as likened unto a fun game for him, and that it was these energies which have had an effect on those involved, and on this entity, to cause a disturbance and to prevent this entity from the charge or purpose for which he had embarked.\* This Awareness indicates that it is not appropriate nor profitable to misuse the psychic forces, to misuse a channeling, for the vibration involved in the channeling is likened unto a frequency, and even when that frequency calls itself spiritual, calls itself by a name, it cannot function on the frequency other than its own vibration, thus, wherein there are low negative motives, or frequencies and spirits involved, regardless of what they call themselves, they still are of the same vibration.

A rose is a rose is a rose. A demented spirit, under any name is still a demented spirit. This Awareness indicates that in order to channel the Higher Forces, the Forces of Higher Frequency, one must take certain precautions. One must have certain motives. One must prepare for the Higher Frequency, and anyone who does less is simply inviting trouble. This Awareness indicates that these energies shall be active within this entity's life until he closes the door, and learns that which is to be learned from the experience.

This Awareness indicates that these Forces of Ahriman are not to be played with haphazardly. This Awareness indicates that likewise, entities should avoid challenging the Forces of Ahriman; should, rather than challenge these forces, wrap these forces in White Light, for in the wrapping of Ahriman Forces in White Light,

( Closing Message )

it neutralizes their capacity to do harm. This Awareness indicates that efforts to cooperate or be a tool of these forces, to use the forces for your own benefit, will be profitable only until these forces have you trapped, then, they will use you, and then you will suffer.

This Awareness indicates likewise, efforts to challenge and fight such Forces of Ahriman, leveling hostility, anger and psychic energies against such forces, exhibiting hatred toward such forces, this also will lead to problems for you. That enlightened Forces can best deal with the Forces of Ahriman, not by seeking to destroy or harm these forces, but rather by wrapping these forces in White Light, visualizing these forces being covered by Resonating-Electromagnetic-Energy, which enlightens them, which brings them close to this Awareness.

This Awareness indicates that when you wrap a Dark Force in White Light, any effort by that Dark Force to send out a negative energy will strike that White Light and reflect back upon that force. It cannot send forth its negative energy when it is wrapped in White Light. This Awareness indicates you wrap an entity in White Light to protect those whom you love, and you wrap an enemy in White Light to protect those whom you love. This Awareness suggests you love your enemy, and wrap your enemy in White Light.

This Awareness indicates that to wrap an entity in White Light, whether friend or foe, requires only that you visualize the Light being wrapped around the entity in all directions, spread around in a kind of sphere, a protective sphere that lightens the entire being, so that no dark shadows remain, and so that the Light is fixed and cannot dissolve. This Awareness indicates that this is done mentally, and is effective, even though it may not be a tangible action.

This Awareness indicates that once you have mentally wrapped the entity in White Light, a physical action should follow to ground the image, thus, the Kahuna Prayer, wherein you blow up through extended hands, or the clapping of your hands, or snapping of fingers, or any action of a physical nature to ground the image. This Awareness indicates the entity Alexander Thompson Jr. often slapped both sides of his head after an enlightened imagery, or after seeing psychically some vision. This Awareness indicates that this action as a form of grounding to stabilize that image, or to carry forth the image into a reality.

\*\*\*

ED's Note: For more information on Lee Michaels and his address to the universe, please refer to 'Revelations of Awareness' No. 82-10 (The Eve of Destruction) \$4.00 from C.A.C. For information on how Lee Michaels blew this important opportunity and a warning from Awareness of things to come for this entity, please refer to 'Revelations of Awareness' No. 82-18 (How You Can Help Prevent Nuclear Holocaust) \$3.00 from C.A.C. Also, please refer to 'Revelations of Awareness' No. 82-20 (\$3.00) wherein Awareness addresses the membership in regards to Lee Michaels, how he had left the path, and that he was not a channel for Awareness, even though Lee and others are still saying that he is. Although no one here at CAC is surprised at the unfortunate situation Lee has brought down upon himself and his channels, we would like the membership to send Light and Love to this entity so that he will be healed from these problems and become the instrument for Awareness in the coming times that Awareness has planned for this entity. (Avaton).

This Awareness indicates that there is at this time, a kind of static transitional period wherein a calmness is present between active movements. This Awareness indicates that changes of great importance are seen in the future, changes of great importance are seen in the past; the present, in comparison, appears to be static.

This Awareness indicates that *It* wishes to give entities a meditation which you can do at any time, or throughout your day. This Awareness asks you to look at the past, and look at the future, --where you have been, and where you are going,--and see these as having been, or going to be, states of being. Looking back you see that you have been in a state of being, that this or that has been your experience. Looking forward you see that you are going to be this or that.

This Awareness indicates that in the present, this Awareness suggests you look at the present as always being in a state of transition between past and future, between where you have been and where you are going. This Awareness suggests that in looking at the movement you make through a room, as a transition from one room to another, the movement you make through a day as a transition from yesterday to tomorrow, the movement you make in any action you take as being a transition between what was, and what will be: this attention to your present transition stage, or activity, is that which will make you more aware of yourself in the moment. That you may meditate on this even as you eat, whereby you move your fork to your mouth, seeing this as a transition from the food on the plate, to the food in your mouth.

You may see every action as a transition between other states of being. This Awareness suggests that by thinking of these activities as states, the past as being a state, the future as being a state of being, that the present as being a transition and an action; you become more focused on the present. Your magnetism increases, your self-awareness increases, your awareness of the present time increases. You become more alert and conscious of yourself, and the past, seen as a memory, and the future seen as a future memory, with your present experience as that which is the reality.

This Awareness suggests this meditation, if done consistently for even 10 minutes, will have profound effects upon your view of yourself, and your world. This Awareness indicates that most entities focus on their past and on the future, and fail considerably to look at themselves in the present. This Awareness indicates by thinking of the present time as a transition between those important times of the past and of the future, it allows you not only to have both the past and future as part of your experience, but also, to be in the present, totally.

\*\*\*
