Cosmic Awareness Communications

P. O. Box 115, Olympia, Washington 98507

( Helping people become aware )

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

## DOES GOD REALLY CARE?

### QUESTION:

A question from M.B. in Florida. It was in a form of a rather long letter to Vicki. I think the main question is in the last paragraph, but in order to get to that I probably should read the letter, because she goes on about this, she lays her thoughts out. So I'll read the letter and Awareness can make any comments that seem appropriate. She writes:

"Dear Vicki. I must apologize. I *did* want a reading from Awareness, but I cannot afford it at this time. I *do* have questions for you to ask, and I would like to share some of my feelings with you. It seems every time the 'Revelations' come in the mail it is exactly what I need. Being raised traditionally I am acquainted with the Bible and the teachings of the Master Jesus. However, I have come to understand the greater truth behind his words.

"I have been very confused though for some time. My husband believes the words are absolutely literal, and that's it! I understand a little differently. Somehow I feel at times, maybe he is much more aware and in tune than I am for he really believes, and when he asks for God or the Holy Spirit, or Jesus's help, he gets it,--sometimes instantly; where with me, I love God to learn step by step by step,--and even then I'm not too sure.

"I sometimes think religion or God is the greatest hoax ever conceived. I call it God, for that is what I'm comfortable with, but I really wonder, does God really care? All this information about the Negative Forces, the Devil, Satan or whatever....if all things come from God and are good, why so much emphasis on the negatives? Why can't we say, like the Master Jesus, when tempted by Satan: "What have I to do with you?"

"If God really cared, why couldn't he increase the Light, knowledge, understanding of those who profess to be his ministers, teachers, chosen ones and so forth? Awareness says truth cannot be stopped. What is truth? It may be one thing for me and something else for another. The only truth I know right now is I am here, and I am confused, and there is something much greater than I that I love, that I have always called God, but I am beginning to wonder about that.

"My concepts are changing as is my understanding. The Bible states pure religion is this: love God with all your heart. (I do.) Love your neighbors as yourself. (I do.) Perhaps I really don't love myself. And give good gifts to man. I always have and will probably continue doing so. As Awareness stated in the last newsletter, I am in a state of transition. I feel there is something I am supposed to do, yet I cannot seem to get in touch with it.

"I have had many readings from friends and associates who have told me this, but I don't know. I have believed many things. I have lived my life by faith, but now I *have* to know. My question: Does God really care? Why so much emphasis on the negative? If, as I have believed, we are here to grow mentally and spiritually, to become One with all that is, -- to

become God, why is this so difficult, when I really want to so very much? If we are the Light of the world, why is it so difficult to *be* the Light of the world?"

HOW THE MIND IS STRUCTURED  
..WHY WE DO WHAT WE DO

### COSMIC AWARENESS:

This Awareness indicates that this searching, the questioning and the examination as that which is the endless chatter of the mind. This Awareness indicates that it is the nature of the mind to examine itself, to examine and focus first this way, then that. This Awareness indicates that to fully understand the answer to this question, one must step back from the mind itself and must look at the cosmos from whence came the structuring of the mind.

This Awareness indicates that in the plasma, that which is called God, there is that expression and that force that is ever-pervading and ever-present, and in that *It* encompasses everything, *It* cares for each part as much as *It* cares for the whole. This Awareness indicates that this is the Universal God. That the names are only necessary/ for the recording device known as mind.

This Awareness indicates that in reality, these energies are but vibrations, and the vibrations are but recorded in words such as "God". This Awareness indicates that these vibrations being recorded then register on the structures which are containers for the recordings, which then become the physical apparatus that holds these recordings,--these in your language being the brains, or being the thoughts, or being the language.

This Awareness indicates that whether one speaks of the Divine Forces through a particular religious structure, or through a totally different religious structure, matters only in terms of the way one wishes to structure his or her own mind, or in the way one wishes to structure the minds of others. This Awareness indicates that in presenting a philosophical structure, a religious dogma, an idea, a myth, or a story, any type of parable, any type of history, any type of structure or image that is presented to the mind assists in forming the structure that makes up the future behavior and thinking and the patterning of the mind and its ramifications. Thus, entities are influenced and controlled by their religious beliefs, their philosophies, their images, and these concepts that are accepted by their thinking patterns. The structures that are presented on the screen of their mind form the patterns which direct and which influence their future behavior and their expressions in society and in relation to others.

The Languages of Consciousness

This Awareness indicates that wherein one's mind is structured in such a manner as to have all of the answers required presented in a clear and concise language, such as the language of Christianity; ( This Awareness is now referring to Cosmic languages dealing with consciousness rather than tongues); this Awareness

...that the language of Christianity in a cosmic sense is a language which has certain nuances, meanings and images, is presented in a manner that is somewhat unique to itself, yet which has interconnections and interrelations with other languages of other philosophical backgrounds.

#### The Languages of Consciousness

The languages of Mithraism, Buddhism, and Mohammedism, and the languages of Zoroastrianism, and of the ancient Egyptians: these all are likened unto languages of consciousness, and while they evolve from one another, just as your spoken language evolves from one another, they may be held as the sacred tongue, and may cause entities to feel that those who do not speak the sacred tongue are heathens.

This Awareness indicates that likewise in your speech, there are those who have considered those who could not speak the language of their own country to be less than civilized. This Awareness indicates that the argument that one language is right and the other is wrong is equivalent to arguing over which religion is proper and which religion is wrong. This Awareness indicates that each is a different language for the same thing, but as in languages there are some tongues which are more tolerant, and some tongues which are sharper, and some tongues which are bitter, some tongues which are more soothing.

This Awareness indicates likewise, in religions there are those which are intolerant, those which are sharp and bitter, those which are living and caring. This Awareness indicates that these are part of the language of consciousness, the efforts of mind to describe the forces which lie behind all words. This Awareness indicates that you, being somewhat more open, are experiencing that state of reality in which you are confused by seeing the structures of mind breaking down, the structures that have been held sacred to your thinking being torn, the structures that are so easily accepted by your husband or by others being questioned by yourself.

This Awareness indicates that what is occurring is the same type of problem that one might expect in learning a new language. That whereby you begin to think in English and German at the same time, or perhaps even getting some Spanish mixed in once in awhile, you may begin to feel that you are just not keeping it together, while your husband, who speaks perfect English, has no problem at all. This Awareness indicates that what is occurring here is that you are becoming multilingual in the sense of having greater concept of the consciousness in the universal sense, so that you are attuning to the energies, rather than simply the definitions as supplied by the various religious languages.

This Awareness indicates that you should expect some confusion and uncertainties, and you may expect that while you are learning new languages, learning new religious tongues, that there will be times when you feel ineffective. This Awareness indicates that what *It* is attempting to present to entities is not an alternative to a language which they have been taught, but rather a language of concepts that encompasses all that they have been given before, but which encompasses more, to allow entities to better understand the next dimension that lies beyond the polarized dimension of duality thinking.

This Awareness indicates that as entities begin to more and more accept the concept of reconciling

they will also begin to move more and more into the recognition of the forces that lie behind the terms, that lie behind the words, that lie behind the thought the forces that are movable by words, movable by thoughts, movable by concepts.

This Awareness indicates that when entities become aware of these forces in consciousness, the universal forces, and realize that they are there for the taking, they are there for your use; when entities realize these forces are everywhere present and can be used either for good or for ill, then entities may wish to work with the tools of language: the concepts, the ideas which direct and use these forces.

This Awareness suggests that *Its* followers use these forces for good, and therefore *It* presents to *Its* followers only those concepts, those tools, those ideas which would lead to activities and constructions in consciousness that are good. This Awareness indicates that in presenting the Cosmic Laws, in presenting concepts that expand consciousness into looking into other areas away from the sharp crystallized patterns of the past language of Christianity or of Buddhism or of any of the many various tongues of the past which have in the many classic ways attempted to present tools for man to understand the workings of the Universal Mind and to use the Universal Mind; this Awareness indicates that in helping to break away from the confines of the structured tongues of the past, this Awareness is hoping that entities can formulate new concepts and new ideas, new language, new symbols, new images, new myths which will allow them to have less extreme of polarity and greater reconciliation.

This Awareness indicates that it is the tampering with the polarity that led to the fall of the angels, and in reconciling the extremes this shall bring about the return to the Godhead. This Awareness indicates that if you are seeking more answers to your prayers, and you see that the prayers of those who hold the sacred tongues of the past are gaining answers to their prayers, this Awareness indicates that you may either wish to return and use the symbols and language of your past to get your prayers answered, or you may recognize that this indication is to teach you that your language skills, your visualization skills, your imagery skills still need perfecting in the new language you are learning.

This Awareness indicates for convenience, *It* will refer to this as the metaphysical language of Cosmic Awareness, and that this language which you are learning as that which requires that you understand the principles of formulating a language, of formulating a pattern, that you understand the principles of how the mind creates and how the mind functions, and how one can form and mold the mind so that it functions more effectively and is more capable of creating through its new language and its new tongue.

This Awareness indicates that the structuring of the new tongue, the new language of consciousness, is the structure of the new mind, of the New Being, and this comes about through the interpreters and translators and through your own translations, of reading what is meant behind the words of the great teachers. This Awareness indicates that as you look behind these words, you are discovering meanings, and as you look at these meanings and the energies, you will discover patterns, and as you look at these patterns you will see how to apply them.

used to create new structures that are unique in the mind, and which give greater power to the mind so that it can create through the proper images and words that which the other tongue was incapable of creating.

This Awareness indicates that this is a tedious language to learn. It is the language of consciousness, and allows entities to understand what is expressed in the energies of consciousness. It interprets out of words of the third dimensional duality languages into images of the fourth dimensional reconciling energies, this language interpreting these images, translates them back into the proper words which allow others to retrace and see those same images and energies in a manner that gives control of these energies to those who are responsible and able to properly use the energies.

This Awareness indicates that the interpretation between words and experience, or the words describing the reality, these terms and energies that are to be interpreted by this new metaphysical language of concepts, of ideas and images, this is that language which will free entities from the confines of matter and which will allow entities to recognize that the consciousness is the creator of matter, and that through the proper thoughts and words describing these energies, entities can create in the material plane that which reconciles the great divisions that have occurred from the extremes of polarities.

This Awareness indicates that if entities could but for a moment, (all entities upon this plane), imagine seeing God and Lucifer, God and Ahriman, sitting down at a conference table and telling each other: "Why don't we stop this haranguing and simply enjoy ourselves in this vast great universe?", this Awareness indicates that if entities could visualize this even for a moment, it would have a profound effect on the polarities in reconciling the extremes, in diminishing hatred.

This Awareness indicates that the image however, would be repugnant to those who seek to keep the polarities in action, for the belief in the structured polarities, the dualities of mind are more important to some entities than life itself. This Awareness indicates that it is changing, even though entities may be discouraged and may wonder whether anything at all is happening, it IS changing. It is changing as entities become more aware of the forces that lie behind the words, of the concepts that can be used as tools for directing the force that lies everywhere.

#### How to Get Free of Matter

This Awareness indicates that one who has been conditioned to believe that gravity exists in his or her own life, cannot overcome the effects of gravity in his or her own life, until the entities overcomes first the conditioning that led to that belief. This Awareness wishes to present a hypothesis: Just suppose, just suppose that it is only your mind, your beliefs, your attachments that keeps you from levitating and floating away from your place.

This Awareness indicates that as the mind progresses and learns more about itself, and unravels its conditionings and those things which it has been told it must accept and must believe, as the mind unloosens the hypnotic messages that have been placed upon it, entities then shall have their souls freed from the confines of matter.

This Awareness indicates that, why is it that if one entity can walk on water, other cannot? This Awareness indicates that it is only because others are not allowed to, for this would be an infringement upon the authority of the other who had first demonstrated this action. This Awareness indicates that wherein there have been those who have levitated or who have healed the sick, there have often also been those who point the accusing finger at these entities and labeled them as agents of the Devil.

This Awareness indicates that this in part as resulting from the language that was used as a symbolism for mind, wherein the Christ symbol as that which was appropriate in the language, and wherein entities seeing this language could interpret this in a way whereby they could be one with the Christ, or see the Christ as representing them, or see themselves as one with the Father, -this action whereby the entity identifies with the Christ, seeing himself as one with the Father, this as a way of interpreting and understanding this language.

This Awareness indicates this as the proper way of understanding this language. This Awareness indicates the language however, was turned and twisted to create for the individuals the feeling that they were separate from God, separate from the Christ, and must always be struggling and working to come back to that place of acceptance. This Awareness indicates that this action of separating, making the Christ exclusive rather than symbolic of the individual, this is that action which accented the polarizing effect in this language.

This Awareness indicates that it did however, allow for levels of growth in that it created a pattern and a language of symbols that allowed for those who follow such path or teachings to begin seeing more meaning behind the simplistic bones of the story, seeing more flesh of reality behind the skeleton and bare essentials of the story. This Awareness indicates therefore, the Christian religion as well as the other religious tongues or symbols, have served as languages to bring entities to greater understanding of the workings of mind in consciousness, and of the realization they they indeed have the ability to use their minds to mold consciousness into matter, or manifestation.

FREE AT LAST

This Awareness indicates all of these images associated with growing older, from the time the child first enters into the physical body, and then the counting of these years so that entities can measure how they stack up next to Uncle Ben or Aunt Mary, so that they can see whether or not they are getting their grey hair on time, or whether they are maintaining their youth better than someone else; all of these measurements as part of the conditioning of the thinking process of the language of thought which this Awareness wishes entities to overcome.

This Awareness indicates that the new language of new concepts, new ideas, new ways of thinking as that which can allow entities to have unlimited possibilities, immortality and the use of the universe for their playground. This Awareness indicates that it is only a matter of learning to think along different lines from those which you have been crystallized into accepting as the only realities.

### DOC WILLARD'S MAGIC WATER

(MORE ON D-CELLS, S-CELLS, DISTILLED WATER)

... For Fever, Cancer, Menstrual Problems etc.

(Dec. 6, 1981)

#### QUESTION:

Ever since the television program *60 Minutes* discussed 'Willard Water' (which is supposed to be a magic water, invented by Doc Willard,--they've had several programs on this)--a number of CAC entities have asked us to question Awareness on this; and we shall do so now with a question on this from Jack Katchmar, who asks: "Does Willard's Magic Water really work? Cosmic Awareness, the attached article in the *Detroit News*, November 2, 1981, says that "One ounce of Doc Willard's Magic Water, mixed with one gallon of distilled water will cure almost anything, including arthritis, psoriasis, emphysema, bursitis, headaches, ulcers, colitis, and a host of other ills."

In the late 1930's Doc John Willard, a professor Emeritus at the South Dakota School of Mines, developed a compound to clean Pullman cars, an industrial cleaner. (This sounds like DMSO Katchmar adds). When students used it for a laundry, their acne cleared up, so Doc Willard said he "had the good sense to follow the clues the good lord gave to him." Doc Willard is 75 today, and the whole world is interested in his magic water. Doc Willard says his ingredients are silicate, calcium chloride, epsom salts, castor oil treated with sulfuric acid, and powdered lignite coal--the major additive that he believes alters the molecular structure of water."

Cosmic Awareness, please tell us if this Doc Willard water really works as so many people claim, and if so, would the one ounce of Willard Water be more effective if mixed with one gallon of D Cell water, than distilled water, and is there anything else we should know about this Willard Water at this time?"

#### COSMIC AWARENESS:

This Awareness indicates that this as being effective in the treatment of many problems; the effect being that which allows for certain cleansing actions within the system, this drawing toxins to it and allowing these to be washed away through the system. This Awareness indicates that many of the body's ills are in fact caused

### WHY NOT TO CELEBRATE BIRTHDAYS

#### QUESTION:

We got a letter from T.H. It's not a question, but he mentions something I would like to ask Awareness about. He writes (it's a letter to Vicki):

"For years, Mrs. H and I were guided by a spirit group we called the MIKI,--Masters/Indians/Kahunas/Ideens. We talked to the MIKI quite often. They would impress their thoughts upon Mrs. H., answering as a rule, questions I would ask. She never wanted to be a channel, but was the next thing to it.

"Well, what started me off on this was, we were told a number of years ago not to celebrate birthdays as such, because this programmed us to grow old. Instead, we were told to consider these annual events as celebrations if we chose, as "Start" days,--the number of annual cycles we had been in this present incarnation."

The letter goes on, but that was the part I wanted to ask Awareness to comment on, the non-birthday.

#### COSMIC AWARENESS:

This Awareness indicates that this is an excellent example of what this Awareness was earlier addressing in regard to learning a new language of thought. Rather than thinking in terms of growing older, one simply thinks in terms of the number of cycles one has been present in this place. This Awareness indicates that in creating this type of thought pattern in the mind it eliminates the conditioning that results when entities count how old they are getting and see this in relation to how old Uncle Ben is, and how old Aunt Mary is, and "when I am that old, I wonder if I'll have that bump on my nose too, and will my hair be grey also?"

by obstructions within the bloodstream, within the cells, or between the cells, and within the organs, and the use of cleansing substances such as fasting (under proper conditions), or such as the use of S Cell and D Cell water, and also the use of distilled water, or the use of other cleansing substances such as psyllium seeds and bentonite clay mixtures; these and many other forms of cleansing substances are beneficial.

This Awareness indicates that this particular substance is beneficial, and also convenient and easy to use. This Awareness indicates that it can be mixed with the S Cell and D Cell water, and can be of much benefit when used in this manner. This Awareness indicates that the use with the S Cell and D Cell as that which should be combined with the distilled water so that the S Cell or D Cell is put into distilled water along with the Willard Water.

ED's Note: Willard Water is pretty expensive stuff. You must buy gallons of it in order to get the per ounce price down. However, since a drop or two in a gallon of water is all that is required, we suggest you try it by the ounce size flask. Here's where to get it:

CAW Industries, Inc.  
5001 Sturgis Road  
Rapid City, South Dakota 57701 (for large quantities)

The Goodship  
PO Box 12072  
Portland, Oregon 97212  
(Send \$1 for huge catalog of items).

James L. Moran  
1603 Lucretia Suite 900  
Los Angeles, Calif. 90026

For ounce-size flasks  
If you wish to buy and  
sell it on a multi-level type  
marketing plan.

Also suggested along this same line is the "Colon Health Book"--a very informative little book that shows how to clean out your plumbing and help extend your life while enjoying good health. (Awareness has indicated that the death process begins in the colon). Available from: E. Orville Nevers

160 Parkside Ave., No. 5-J  
Brooklyn, New York 11226

(Price: \$4.95 (includes postage))

#### Will D-Cell or S-Cell Water Kill You?

This Awareness wishes to comment on the use of S Cell and D Cell water, as there have been some misunderstanding by some entities who have written in, in relation to concerns about the D Cell or S Cell being hazardous to health. This Awareness indicates that these waters may be used in sufficient quantity for some liquid that an entity might consume in one day, and there will be little or no side-effect,--particularly with the D Cells. That the S Cell should be used in a more limited nature, limiting it to not more than one quart daily, or preferably less, except when the user is using this for therapeutic purposes. This Awareness suggests that therapeutic purposes being during times of emotional stress or physical stress, or during times of fever. This Awareness indicates that in such times as menstrual cycles or during periods of low vitality, wherein an entity becomes susceptible to colds and such influences, then the S Cell is appropriate. This Awareness also indicates that for such conditions as cancer, leukemia and similar disorders; blood or sugar levels; this S Cell water can be beneficial. That it be limited to approximately 1 quart daily,--or two glasses to four glasses daily as being sufficient.

This Awareness indicates however, that some entities have been concerned that S Cell water could kill them. This Awareness indicates that you could drink two gallons daily and it would not be fatal. It would perhaps cause you to come down with a tremendous cold or elimination cycle which could be unpleasant. This Awareness indicates that likewise, the D Cell can be used as much as one gallon daily without side-effects of colds, except wherein an entity is not yet used to using the D Cell. This Awareness indicates that in the event that one who is using the D Cell and drinks much water, and feels an elimination cycle occurring, wherein the nose becomes runny and the appearance of a cold occurs, then the entity is triggering off the elimination cycle and may wish to slow down the use of this D Cell, and regulate the elimination so that it is not so sudden and unpleasant. This Awareness indicates that *It* did not in any previous readings intend to convey that the use of these waters needed to be highly prescribed for fear of fatalities; this is not the case.

This Awareness indicates that according to the side-effect one may feel from using these waters in terms of the intensity of the elimination which often is triggered when entities begin using these waters; this is that which is the concern. This Awareness indicates however, that the S Cell water should not be used simply for everyday use, but rather should be limited to approximately one or two glasses daily; and in the event of greater need, up to one quart. This Awareness indicates that in the event of leukemia or cancer, this water may be used up to one gallon daily. This Awareness indicates that these substances contain that known as interferon, and can be beneficial in strengthening the immunity system; but they also cool the body and help to eliminate mucus, which in turn can cause an entity to come down with what appears to be a cold.

#### CAN D AND S-CELL WATERS BE MIXED?

##### QUESTION:

Many entities have written us asking if the D and S Cell can be mixed together for daily drinking water.

##### COSMIC AWARENESS:

This Awareness indicates this in the affirmative; that the S Cell should be kept in smaller proportion, such as approximately one part to four parts D Cell.

#### THE NEW PYRAMID S-CELL & HOW KIRLIAN PHOTOGRAPHS DEPICT ITS ENERGY VIBRATIONS

##### QUESTION:

Joe Dun Sloan has recently come out with a pyramid S Cell, which is approximately a ten gallon size, and he implies that experiments should be done with this for healing, and I'd like to ask Awareness, since this is a new type of cell, if *It* would suggest this pyramid cell should be used for healing as a cell, rather than just for the drinking water?

##### COSMIC AWARENESS:

This Awareness indicates that it is more effective when wet. This Awareness indicates that the pyramid

shape of the object as that which carries certain negative ions which in turn are of benefit as healing forces. That the S or D Cell substances generated from the use of this in water as that which also are of benefit, being even more beneficial than the pyramid. This Awareness indicates that for members of *Cosmic Awareness Communications* who are curious about the S Cell and D Cell in comparison to pyramid energy, this Awareness suggests that the color photographs by the All-Rays Pyramids, Ltd. organization, that this color photograph should be made available to the membership for a small fee covering the costs and handling of this photograph. This Awareness indicates this as an 8-1/2 by 11 picture showing a drop of S Cell water, a drop of D Cell water, and a drop of pyramid water, with the Kirlian photography, showing in color the auras emitted by each of these drops.

This Awareness indicates that the D Cell water droplet having an aura approximately twice as large and three times as bright as the pyramid droplet, the S Cell as being of similar size, but with other colors in the aura. This Awareness indicates that these pictures as being rather convincing evidence for those entities who do not notice the more subtle differences when tasting the waters.

This Awareness indicates that these pictures may be duplicated for this purpose through the color xerox machines and although not quite as high quality as the original pictures, this may be one way whereby members could enjoy this evidence.

ED's Note: CAC is not in business to satisfy the skeptics or those, as Awareness just indicated, would "enjoy this evidence". We simply suggest you try these cells yourself and see whether they work for you or not. The Kirlian photos, however, are quite interesting and these may be obtained by sending \$7.00 to All-Rays Pyramids, Ltd., 5502-250th St., Aldergrove, B.C., Canada VOX1A0. (CAC is not fooling around with any colored xerox machines just to satisfy the curiosity of the skeptic. Besides, there is none in Olympia to our knowledge. The government confiscated them because they could duplicate paper money so well only an expert could tell it was fake). Avaton.

## THE DO'S AND DON'TS OF DISTILLED WATER USE

### QUESTION:

While we're on the subject of water, a question from LK of Granger Ind. "Has the Awareness ever advised the merits of distilled water over natural water? I have read that our bodies can't assimilate the minerals from spring water, and that they collect in the joints, causing arthritis. I have also read that distilled water is lifeless, since it is heated too much in the distilling process. Which view is correct?"

### COSMIC AWARENESS:

This Awareness indicates that it is beneficial to occasionally go for a period of time using distilled water. This allows the various minerals and toxins within the body to be flushed away. This Awareness indicates that the distilled water tends to draw to it certain minerals which are within the body, and to take those out. This Awareness indicates the distilled water also tends to draw those beneficial minerals and vitamins to it; therefore, continued use of this substance is that which is not recommended, unless the entity is certain of making up for those vitamins and minerals lost by use of extra supplements.

This Awareness indicates that the use of water which has not been distilled as that which is always questionable, yet is necessary. This Awareness suggests that you know what you are drinking by having your water checked, or by finding out from your city about the contents and purity of the water. This Awareness indicates that the hard minerals of the supposed inorganic type, which are less easily assimilated than those which come from plants and foods,--these are considered to be by many entities as detrimental. This Awareness indicates that it must be realized however, that these metals and minerals within the soil which enter into the water are in fact organic. That the life force is within even base metal to some degree; and though these are not as easily absorbed by the body, they still have some value. This Awareness indicates that they can however, be hindered in their absorption, or can be brought into the body too quickly to be useful and thus build up in various areas.

### How to Detect Metals in Your Body

This Awareness indicates that you can often tell whether you have certain metals in your body, either by the hair analysis which is available through the Goodship or through your doctor, or you may discover this in a less efficient manner by looking into the reflection of your eye, and wherein you find discolorations,--such as reddish or brown flecks, or dark flecks in the iris,--this as often an indication of metallic build-up within your system, particularly iron.

This Awareness indicates that other metals such as aluminum are more difficult to see in the eyeball, and the hair analysis as that which can reveal the content of these. This Awareness indicates that these metals often create much difficulty for your system; particularly those metals such as aluminum, cadmium and lead, which can create quite a number of difficult problems. This Awareness indicates also mercury as being another metal which is often problem-causing; these may cause problems in health to such a degree that all of one's efforts are of little value until these metals are removed from the system.

### How to Remove Metals from Your System (Benefits of Chelation Treatments)

This Awareness indicates that a good doctor discovering these metals in the system can use several means by which to remove these metals. This Awareness indicates in many instances, the use of certain vitamins and minerals as supplements may remove the metals; in other instances, it is necessary to use the chelation treatment, whereby EDTA and other substances are put into the bloodstream and allowed to circulate throughout the system, so that this chelation (which means bonding) substance bonds itself to the metals and draws them from the tissue and takes them out of the system. This Awareness indicates that this chelation treatment as also used for treatment of hardening of the arteries, whereby calcium and sodium are removed from the arteries so that the arteries become free to expand or contract with the blood, allowing these arteries to become more youthful, and the blood to circulate throughout the system into those areas which may have been deprived of blood and oxygen.

This Awareness indicates that in earlier times, chelation treatments were somewhat hazardous and dangerous. This Awareness indicates that these treatments have more recently been perfected to a greater degree, whereby the balance and effects are less chancy than before. This Awareness indicates that the amounts used in the chelation formula has been decreased, and

the treatments have been expanded to include vitamins and mineral supplements which accompany the treatments, so as to counter any effects which might have previously been difficult.

This Awareness indicates there is an excellent book available expressing this treatment, this called *Chelation Therapy*\*. This Awareness indicates there are several other books explaining the technique also. This Awareness indicates that the use of chelation therapy, or the use of vitamins and minerals to remove metals from the system as that which can be of much benefit to an entity who has this problem. This Awareness suggests the first concern is to discover whether these metals and minerals are actually the cause of your problems. This can be accomplished through the use of hair analysis and blood tests, checking the blood for its purity, for its effects on the organs and the circulation through the system.

\*CAC does not stock this book but we have heard it is available in most healthfood stores.

#### Which Vitamins & Minerals,--Organic or Inorganic?

This Awareness indicates that the use of vitamins and minerals which have been derived from more living or organic sources such as plants and sea products; these vitamins and minerals are easier for the body to absorb than those which are mined from the earth. This Awareness indicates however, that this as not so serious a concern as to become fanatical about the avoidance of those minerals which come from mines. This Awareness indicates these often are quite beneficial; the body simply absorbs these more slowly. This Awareness suggests that it is the minerals which are not conducive to good health, or which are absorbed to excessive degree and lodged in certain areas, that are the cause for concern.

#### High Blood Pressure, Heart Disease, Angina, Aging Are All Helped by Chelation

This Awareness suggests that sodium as that which is generally in excess in the human body. That although calcium is of great need to the system, when it is combined with high use of sodium and fatty diet, the calcium can begin to build up in the walls of the arteries, making them hard, like pipes, so that they lose their flexibility. This Awareness indicates that once this occurs,--the arteries no longer able to expand,--then on the inside walls of these arteries, as fats and other obstructions begin to build up, the channel for blood becomes diminished and the flow is hindered, causing higher blood pressure and causing a lack of oxygen to flow to those various areas of the body, so that the entity becomes easily winded, or unable to receive oxygen sufficiently, and so that the blood pressure is excessive; these two effects creating various types of problems, ranging from heart disease, angina, to kidney malfunction, to poor thought processes, to a lack of oxygen in the brain, to more rapid aging, and to the deadening of one's cells and the feelings of one's senses.

This Awareness indicates that with the chelation treatment and other forms of cleaning the system, the cells,--the flow of blood into the cells and tissues of the body increases and enhances its cleansing effect, so that the skin becomes more pliable, wrinkles begin to fade somewhat, and the general tone, outside the body as well as inside, shows more vitality. This Awareness indicates also, that the stiffness from arthritis or blockages as that which diminishes.

#### Chelation & Brittle Bones

This Awareness indicates that the chelation therapy can also assist in slowing down the brittle effects of aging in terms of the bones. That as entities age, often the bones become more brittle and break more easily; in some instances, the bones begin to automatically deteriorate and fall apart. This Awareness indicates the chelation treatment as that which can hinder and slow down or reverse this tendency for those entities who have the problem of bones being too brittle. Wherein these are broken or become easily broken, the chelation treatments as that which can be of much benefit in reversing this.

#### Chelation & Diabetes, Heart Attacks, Low Blood Pressure etc.

This Awareness indicates that this also can be beneficial in countering diseases that come from poor circulation such as diabetes, and angina, heart trouble. This Awareness indicates that entities who have had heart attacks, or who are subject to such may find that they gain greater strength and energy, their hearts become stronger, the blood pressure drops to a more normal degree; or in some instances wherein entities have low blood pressure, the blood pressure will rise to normal. This Awareness indicates that these chelation treatments also are beneficial in connection with such illnesses as leukemia and cancer, as the greater flow of blood to these tissues helps to create a healing effect through the vitality that develops through better circulation.

#### SOD & Other Chelating Substances Available

This Awareness indicates that other than chelation, there are also certain substances now on the market without prescription which, though they work less quickly and less efficiently, are nevertheless beneficial in that they, over a period of time, offer similar relief. This Awareness indicates that in particular, this as calcium pangamate, or pangamic acid, and that which is called SOD, or SuperOxide Dismutase. This Awareness indicates that these substances help to trigger the hormone system and serve as triggers to certain enzymes and also carry oxygen through the bloodstream in greater degree, to help cleanse the bloodstream.

### WHAT ON THE F.A.R.M.?

Why it's the Farm Animal Reform Movement--a national, non-profit, educational organization formed in the nation's capital to counter the growing abuses of the farm animal industry.

We are the feisty folks who brought you:

- The national media campaign opposing the production of veal and other abuses
- The national Burger King boycott
- Picketing of rabbit breeders
- The "Farm Animal Industry March"

and we are just getting started

#### WHICH SIDE ARE YOU ON?

Mail the coupon below, with the proper remittance, to

**FARM ANIMAL REFORM MOVEMENT, INC.**

Address \_\_\_\_\_

Other Anti-Aging Herbs: Garlic, Gota Kola, Goldenseal

This Awareness indicates there also is that which is known as L-Tryptophane. This Awareness indicates that this substance also carries oxygen to the brain and serves in this manner to be beneficial. This Awareness indicates there is also a substance DMG being advertised in some tabloids as being a new discovery to prevent aging. This Awareness indicates that this as but another name or brand for essentially the same substance as SuperOxide Dismutase. This Awareness indicates that this SuperOxide Dismutase as available from health food stores and from many vitamin stores.

This Awareness indicates also, that gota kola as that which is beneficial in taking oxygen to the brain and in cleansing the bloodstream. This Awareness indicates also ginseng as that which serves in a similar way. This Awareness indicates that garlic and onions are beneficial in helping to cleanse the bloodstream, and also to reduce cholesterol levels and also to help support the immunity system in efforts of removing toxic wastes. This Awareness indicates that garlic as especially beneficial in destroying parasites within the system. This Awareness indicates that goldenseal also can be beneficial in dealing with harmful bacteria which may enter the system.

### HOW OFTEN SHOULD ENTITIES TAKE SOD, VITAMINS & MINERALS ETC?

(HARDENING OF ARTERIES BEGIN AT BIRTH)

#### QUESTION:

Awareness, many entities in the membership have written in to ask about this substance abbreviated SOD just mentioned. I'd like to ask specifically if entities should include this along with their daily vitamins and minerals when they reach a certain age, or should they wait until there's indications of blood problems or heart problems?

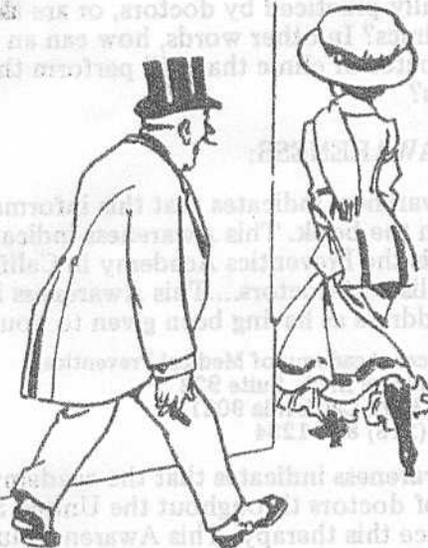

#### COSMIC AWARENESS:

This Awareness indicates that from the time an entity is born, the arteries begin to clog to some degree, regardless of what the diet may be. That certain diets cause this to occur more rapidly. That certain entities have larger arteries and veins and therefore, are able to survive longer with poor diets, or high fat diets, without the effects that other entities having similar veins would experience at an earlier date. This Awareness indicates however, that the use of SuperOxide Dismutase as that which is beneficial for all entities of all ages. This Awareness suggests also the use of selenium as that which is of benefit to all entities: this affecting the hormone system and the enzymes within the body also.

#### Don't Use Vitamins & Minerals Continuously

This Awareness suggests that entities should take their vitamins, supplements and minerals, not on a continuous daily basis, but rather to have a certain time wherein a break occurs. This Awareness indicates that even as the body can become immune to toxins such as arsenic and other poisons, the body also can become immune to vitamins.--building up a tolerance against the use of vitamins. This Awareness suggests therefore, that entities may benefit more by taking vitamins 50% of the time, or 75%, such as three weeks of use, and one week without. This Awareness indicates that the time-off the vitamins should depend on the condition, or need by the person for the vitamins.

This Awareness indicates that some entities appear to have little or no need for vitamins, whereas others may find themselves unable to have much energy without their daily vitamins. This Awareness indicates that these entities should then take vitamins for approximately three weeks on, and one week off, unless otherwise indicated by their doctor, and if needed for special treatment. This Awareness indicates that the continuous use of vitamins over a period of three months, even with the one week off during each month, as that which generally is sufficient to bring the body up to its requirements, wherein a vitamin deficiency has been prevalent prior to the three-month use of that vitamin.

How to Use GH3

This Awareness indicates that also, it should be mentioned that in reference to those entities using GH3, that this substance should be used with certain times of non-use. This Awareness suggests that it should not be used on a continuous basis, day after day, week after week, month after month. This Awareness suggests rather, that it be used approximately 50% of the time for those entities of 40 or under, and that it may be used approximately two-thirds of the time for those entities 40 and older. This Awareness indicates for example, an entity 40 or younger might use this for 7 days, then have 7 days without its use. An entity of approximately 40 or over, may use this for two weeks on and one week off. This Awareness indicates that this not intended as a precise prescription, but rather to indicate that as an entity ages, the use may increase; but that the entities not use this on a continuous, unbreaking pattern.

This Awareness indicates that by going off of the use of this substance for a period, it allows the body to have time to re-acustom itself to any excess which may have occurred from the use, or to absorb any excess of this substance. This Awareness indicates it also allows other chemicals within the body to rebalance themselves, rather than being under continuous effect from this substance. This Awareness indicates that it also allows any negative effects of the substance to be diminished while the body re-adjusts itself. This Awareness suggests that it also prevents the substance from losing its effectiveness in the body, because of body tolerance factors being altered. This Awareness indicates that this use of GH3 and other vitamins and minerals, whereby the

period of time wherein these are not used, as that which is suggested in all therapies or personal programs, unless otherwise indicated by your doctor.

## WHERE TO GET CHELATION TREATMENTS

### QUESTION:

Awareness, when the information on chelation is published, it will probably bring a lot of inquiries from the members as to where they can locate doctors that do this. Is this information in the book listed, or is this generally practiced by doctors, or are there specific clinics? In other words, how can an entity locate a doctor or clinic that will perform these treatments?

### COSMIC AWARENESS:

This Awareness indicates that this information IS available in the book. This Awareness indicates that also there is the Preventics Academy in California which has lists of doctors...This Awareness indicates that this address as having been given to your secretary.\*

\*American Academy of Medical Preventics,  
8383 Wilshire Blvd., Suite 922  
Beverly Hills, California 90211  
Phone: (213) 878-1234

This Awareness indicates that the academy does have lists of doctors throughout the United States who practice this therapy. This Awareness indicates that the practice of chelation by these doctors as that which has caused much controversy among the medical profession. As it is relatively new, many entities do not fully understand it. There have been some disastrous occurrences in the early days of chelation, whereby experiments were conducted and entities were not fully aware of how to proceed. This Awareness indicates that this however has been refined in recent times, and the controversy may still remain among many doctors who are still relating to what they know from ten years back in regard to this.

This Awareness indicates that there are doctors throughout the country now using this therapy and healing many entities who would otherwise have been dead by now, or who would have had other problems of a serious degree. This Awareness indicates that the Interpreter as having been taking these treatments since September of this year. This Awareness indicates that this entity as having witnessed many other patients who have taken these treatments; one who would have had his leg amputated. According to all of the various medical advice from the Mayo Clinic and other places, the leg would have to be amputated. This Awareness indicates the entity now as walking without pain in that leg.

This Awareness indicates another entity who would have needed by-pass surgery as now being able to go for long walks and hikes without difficulty. This Awareness indicates that one entity who could barely walk up a flight of stairs is now taking hikes up the Rogue River. This Awareness indicates that there are a great number of entities who have had blood problems, heart problems, circulation problems, cancer and leukemia problems. One young boy of 14 having leukemia as having been cured by these treatments within a two-week period. This Awareness indicates

From Playboy

"The hell of it is, she's the prettiest gal in town."

that these cures as that which are in part the cause of much of the controversy surrounding this treatment; that many doctors are afraid that this will put them out of business.

\$200,000 to Die of Cancer--\$2000 to Live by Chelation

This Awareness indicates that wherein a cancer patient must spend approximately anywhere from fifty thousand to two hundred thousand dollars to die from cancer, and wherein the chelation treatments are between two and five thousand dollars for treatments; then obviously, those entities who make their living and their fortunes, and their car payments and their house payments and their office payments from that money that comes from cancer patients who are dying at tremendous expense; obviously these entities will be somewhat biased in their attitudes toward chelation treatments.

### HOW TO CHOOSE A DOCTOR:

To Some Doctors you are a Customer, not a Patient

This Awareness indicates that there are still individual doctors, and there are also the collective doctors, some representing the financial interests of the doctors, and some representing themselves; this Awareness indicates that some of these individuals have their own standard of values; Some put the patient first. Others consider the patient to be simply a customer, and that the customer eventually will die anyway; therefore, the purpose not being so much to heal as to make as much as is possible from the customer.

This Awareness indicates that it is important for entities seeking medical help to know who you are dealing with, to ask questions of your doctor, not to take vague answers, and not to assume that because the doctor appears confident that he is always as sure and accurate as he may appear. This Awareness suggests also that any doctor who tells you it is hopeless, should be considered as a hopeless doctor, and therefore you should check for one who says "Yes, we can see whatever is possible to do, and yes, I think we can do something for you."

This Awareness indicates that rather than allowing a leg to be amputated, or some surgery to be performed by a doctor whose specialty is in performing surgery, it is much wiser to check around for the doctor whose specialty is in *avoiding* surgery by treating the symptom from another frame of reference, or by treating the cause of the symptom. This Awareness indicates, of course, there are some situations where only surgery can solve the problem.

This Awareness indicates that *It* is not intending to indict every doctor as being unethical. Many doctors who are incompetent are not unethical; they simply don't realize what they are, or are not doing. This Awareness indicates many doctors are simply ignorant of information, techniques and ways of healing that other doctors are aware of. This Awareness indicates that therefore, it is important for entities to go from doctor to doctor, until you find that one who you trust and who is competent and who appears to know what he or she is doing, and who can explain it to you to your satisfaction.

This Awareness suggests also, that if a doctor resists your asking questions, that it is an indication the doctor does not fully know how to answer your question, or is impatient with you. This Awareness indicates that doctors who do not have patience, should not have you for a patient.

#### THE DIRECTIONAL NON-FORCE TECHNIQUE IN CHIROPRACTORY

#### (Closing Message)

This Awareness indicates that there is one other area along this line which this Awareness wishes to have included with these messages on healing. This Awareness indicates this in reference to the Directional Non-Force Technique. This is a system developed by a chiropractor named Von Rumpf. This Awareness indicates that this entity as alive and well in California. This Awareness indicates that this entity as one who was commonly referred to by the readings of Edgar Cayce; that the Edgar Cayce readings often referred entities to this chiropractor. This entity now approximately 80 some years old, and as having trained others in this technique.

This Awareness indicates the technique as that which does not pop bones or set the joints, but rather as that which affects the muscles which, in turn, pull the bones back into place. This Awareness indicates that this Directional Non-Force Technique works on the nerve flow, which in turns allows the muscles to move into their proper alignment, and thus pull the skeleton and bones into its proper alignment.

This Awareness indicates that treatments of this technique can give relief for most chiropractic problems within approximately four or five treatments. This Awareness indicates that this as accomplished through the mere touching of certain areas of the body by the chiropractor; that many of the chiropractors are trained in this technique, but that not all practitioners are chiropractic.

This Awareness indicates that these entities are trained directly by this entity Von Rumpf, and that the vitality which one experiences after a treatment from this type of technique as that which is testimony to the effectiveness. This Awareness indicates that it will be experienced in such a degree that entities receiving such treatment will realize that even though the practitioner did not crack any bones or set any joints, the vitality and the general feeling of well-being is enhanced greatly, just from the action of the touching of different muscles.

This Awareness indicates that the address for contacting Von Rumpf as that which will be provided with this reading, and that entities wishing to know the addresses of practitioners in their area, may write to this entity, enclosing a self-addressed stamped envelope, and a small donation for his time in answering. This Awareness indicates that this entity then can send the address to you for those in your area who have been trained in this technique. (This Awareness suggests the Interpreter now be brought from trance).

Dr. Richard Von Rumpf  
18 W. Padre  
Santa Barbara, California 93105

"Has it occurred to you that we all had the same doctor?"

#### ED's Note:

In relation to chelation treatments, we have personally witnessed the difference a few of these treatments made in the Interpreter, Paul Shockley, over a period of a few months. For a long time, during his long lawsuit, he was under terrific stress and several times almost had what appeared to be heart attacks, loss of breath, heavy sweating etc. He finally went to a homeopathic doctor in Portland who started him on chelation treatments. Within a short time, Paul looked years younger, could trot up the long steep hill from the cottage where he does the CAC trance readings almost as rapidly as can our hound Siegfried. We feel those treatments may have just saved Paul's life, he was in such bad shape a few years back. (He never did complete the full chelation treatments because his vitality was restored and he could not afford any more of them. However, if we find he is backsliding in his diet and starts to look the way he did 2 years back, we are going to make sure he resumes the treatments.)

Also, we have received several letters from members who have taken the chelation therapy. All claim to feel much younger and full of vitality. A few weeks ago, in fact, our good friend Reverend T.J. Puza of Florida drove up in a mobile motor home, having come all the

way from Florida, stopping along the way at many New Age type groups. He is a networker of long standing and was here three years ago doing the same thing. Anyway, he told us that the reason he had not taken the trip for the past 2 years was that he had had a heart attack that nearly killed him. Also the doctors took out a vital organ or two and said he must take it easy for the rest of his life and not move around much etc. Well, he heard from a friend about chelation, found a doctor who did this, and started taking the treatments. Like Paul, he did not take the full treatment which takes about a year, but did take it for several months. 'ol T.J. looks about 20 years younger to me and appeared much spryer than I had seen him. (He had been at the York Convention in 1977 when the Unified States of Awareness was formed). Avaton.

#### THE LAW OF DIVINE PROCLAMATION (Opening Message, July 15, 1983)

This Awareness indicates there is seen the *Law of Divine Proclamation*. This Awareness indicates the *Law of Divine Proclamation* states that the ability of an individual to express, speak or proclaim in behalf of the Divine Forces is in direct proportion to the ability of the individual to *cease* expression, speech or proclamation in behalf of self.

This Awareness indicates that when one learns to express, speak or proclaim as a Divine Being, and to avoid expression, speaking and proclaiming as a self-centered being, at such time the entity becomes the master of the language of the Divine.

ED's Note: this is a new Cosmic Law. Please copy and put with your booklet, 'The Cosmic Laws of Cosmic Awareness'.

#### THE CHRISTENING OF MOTHER EARTH (Opening Message, Aug. 10, 1979)

This Awareness indicates that the development of the individual human body moves through many stages as it brings forth the human form. This Awareness indicates this movement through these various stages of evolution occurring to the egg as it begins to develop into the fetus, and eventually is expelled from the Garden of Eden onto this earth plane of Terrestria; this movement is also symbolic of the movement of energies from Celestria through the division, the separation of Rhyee and Isis and into the realms of Light and darkness, and into Terrestria by the human race.

This Awareness indicates that on a microcosm scale, the moment of conception may be equated to the bliss of Celestria; on the macrocosmic level, the separation of Rhyee from Isis, or the male principle from the female principle, may be recognized as the after-climax of this blissful conception; that the separation of polarities of light and darkness, the divisions of the waters of heaven, this as the symbolic creation of Hades as an opposition or separation from Celestria; and the general development of the various evolution of matter, spirit in movement, through these realms of light and darkness, the interacting juices, nutrients, sustenance of the Universal Womb, bringing forth that which is the physical body known as Terrestria,--this can be seen reflected in every physical birth of each entity on the physical plane.

This Awareness suggests that the movement from Celestria, the divisions occurring between Celestria and the rebellion of the angels, the separation of the forces of light and darkness and the movement down through time into present time whereby the physical earth as reaching a level of being transformed, transmuted, whereby the forces of darkness and the forces of Light have reconciled and the Light as being over-

powering of the darkness: this may be equated to the christening of the physical earth in its development as a baby from the Universal Womb, a child of creation; that this christening of the earth, which has occurred and is occurring in this year of 1979, is that which is a particularly special time in terms of universal cycles: this as the beginning of one degree in the Aquarian Age,--this christening as being worthy of the attention of all those present.

## Nuclear Nightmares

### WHAT ABOUT THE CHILDREN?

by Glenn W. Hawkes

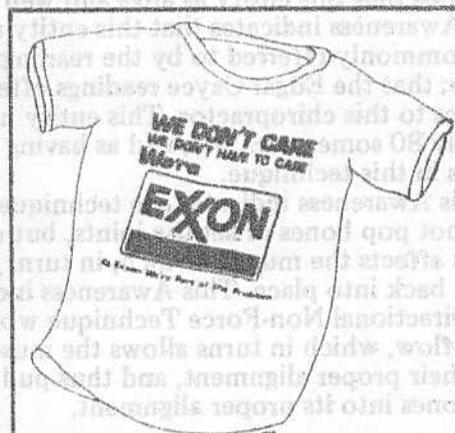

Parents and Teachers for Social Responsibility, Box 517, Mooretown, VT 05660. Free, but donations are appreciated.

Parents and Teachers for Social Responsibility has issued this booklet to inspire antinuclear protest by appealing to our sense of love and responsibility. But it does not merely provoke a sentimental response. Instead, *What About the Children?* gives readers a personalized approach to important questions about the nuclear threat, and offers suggestions about what we can do to eliminate it.

In an attractive, easy-to-read format, Glenn Hawkes first lays out the "reasoning" behind the arms race and the dangers of militarization. "The arms race is like two kids standing in a room full of gasoline up to their knees. Both are collecting matches and thinking that the more matches they collect, the more secure they will be," he writes.

"Even the term 'arms race' is misleading," Hawkes points out. "It implies that the side with the most weapons will be a winner."

There will be only losers in a nuclear war, of course. And *What About the Children?* demonstrates that our only protection is prevention. The author proffers strategies to fight the nuclear buildup. This booklet will appeal particularly to those motivated by a sense of moral responsibility rather than by political affinities.

Blue and red design on white shirt.
