(Helping people become aware)

After death.... What?

(Part 4)

Paul Shockley
Interpreter

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

PLEASE NOTE: For easier reading and greater understanding, Cosmic Awareness suggests that the following material be read aloud.

COSMIC PHYSICS: AN EXPLANATION

...MOVING UP THE SPINE OF GOD

COSMIC AWARENESS:

Opening Message (July 9, 1982)

This Awareness wishes to continue the discussion relating to the Clear Light, and the movements through the Bardos and transitions known as awakening or death, or sleep, or dreamstates.

This Awareness indicates that as the previous discussion centered around the experience of moving into these different dimensions by an individual, giving the individual's frame of reference in what may be termed a bird's-eye view, this Awareness indicates that this discussion will center more around the concepts associated with that inter-dimensional movement of energies, what may be termed 'cosmic physics', whereby this Awareness views the movements of energies.

This Awareness wishes to explain these movements in a manner that will assist entities in better understanding their own circumstances. This Awareness indicates that wherein the individual moves toward the Clear Light and awakens at the moment of death into the Clear Light, this becoming the experience wherein the entity realizes who, in fact, he or she really is, -total truth, total realization. This Awareness indicates that when the entity in the Clear Light looks back upon the experience of what has occurred, when the entity identifies with that Clear Light, realizing that this superconscious, super-awareness state, is that which is known as God, and when the entity, at one with the Clear Light seeks to understand the universe, the entity may find himself realizing that even as he experienced during his lifetime sleep the image and belief of being an individual, and that even as the entity believing himself to be an individual, moving through time and space during the lifetime sleep which he has just departed, the entity now may realize that he in fact was nothing but a dream in the mind of God, or that which is the Awakened Being, and as a dream, he may reflect back on his dream experiences, and evaluate, from a superconscious level, the behavior and the lessons that may be learned from the dream experiences.

The entity may in fact, if seeking to be more scientific in nature, (if God in fact thinks about being scientific in nature), may wish to evaluate the system by which the entity experienced the dream, or may rather wish to convey to the entity how the system works, and the entity will have it revealed from this Clear Light of God that the entity was a cell, or soul in the body of God, and moved into that which might be termed the spine or spinal column of God, that area of the lower chakra of God, the area associated with Scorpio, the area known as the 8th house, or house of death, -the base of the spine of God, the being exemplified in the statue of Buddha, whereby at the base of the spine the soul of the entity entered into that force, the transition area of the kundalini energies of God, and had its opportunity to ride the

elevator up the spine, through that which entities often describe as a long tunnel after they pass over, moving through this long tunnel toward a light, the entity has the opportunity to exit at any of the chakras, or lesser lights, or to move to the Clear Light.

If the entity moves up the spine of God into the Clear Light at the top of the crown, the entity becomes one with God, and realizes himself sitting in a position similar to the Buddha, holding the universe in his being. This Awareness indicates that the cell of the Buddha, or the soul of the individual having moved into the crown chakra of God, the Clear Light, the Superconscious, the Christ Consciousness, having moved into this Christos, is now bathed in Awareness and the realization of who, in fact, *It really is*, and this cell of the body of God, this soul of the individual cell, is saturated with the knowledge of the Divine.

Being one with the Father, it then may again move back into other portions of the universe, of the body of God, carrying with it the knowledge of the Divine, being Christed, being christened with the crown of creation.

This Awareness indicates that there are entities who have, through great meditation, through many lifetimes of evolverment, there are entities who have experienced this oneness many times, and who in their present physical bodies are well aware of this unity with the Divine, and therefore, conceive themselves to be God in the flesh. This Awareness indicates that for those who do not understand this experience, they are seen as megalomaniacs and insane babbling idiots, or frauds.

This Awareness indicates that true, there are some who are imposters and who are frauds, or who have glimpsed briefly this experience, and then go forth into the world to gloat and brag of that which they have experienced, making the significance more of the experience that had been, than a significance of remaining with the experience. The reflection on the experience becoming more important to them than the actual experience.

This Awareness indicates that the entities who pass over and experience this, out of body, have an opportunity of remaining in that dimension of the Superconscious, Christ Conscious, Buddha Consciousness level, or they may choose to return to the lesser lights, the other chakras in the lower levels of the body of God, of the Universal Mind. This Awareness indicates that in the frame of reference from the Buddha Consciousness, the Clear Light, the Christ Consciousness or the Mind of God, this action of the cell moving from the base of the spine up to the crown chakra, wherein enlightenment is experienced and the enlightenment is a continuous motion; this action is one wherein from the viewpoint of the Buddha, the subconscious or the conscious of the individual, the subconscious of Buddha, which is the conscious mind of the individual

cells or souls,—this subconscious is being saturated with the Clear Light of Buddha's consciousness or what, to the individual, is called Superconscious, so that a parallel may be seen in the human who is meditating and who, in the meditation, saturates the subconsciousness, the DNA, the cells of his or her body, with levels of conscious awareness that these cells, this subconscious becomes more aware, and under the control and responsive to the conscious mind of the meditator.

This Awareness indicates likewise, the Buddha Consciousness, or the Christ Consciousness, or the Universal Consciousness, attempts to bring these cells or souls of individuals into greater light, by saturating them with the Divine Energies and light of *Its* creation, restoring vitality, consciousness and awareness and life to the individual cells and souls.

This Awareness indicates that to see this experience from the mind of God, from the eye of the Buddha, from levels of Christ Consciousness, from experiences of Superconsciousness, to experience this and see this through these levels of experience is not unusual, not uncommon, but to be able to explain this in a rational way is quite difficult.

This Awareness suggests for example, from the mind of God, viewing this as an individual watching the cells within one's body being saturated with the vitality and Clear Light of one's consciousness through meditation; it's a very simple matter and can consciously and rationally be explained to another on a similar peer level of consciousness.

This Awareness suggests however, that you imagine what it would be like for the cell, an individual cell within that entity's body, to try to rationally understand what is going on in this crazy universe in which the cell finds itself among multitudes of other cells, all babbling and moving around in different directions.

This Awareness indicates that the cell, being a reflection through the DNA molecule, being a reflection of the total, should have at its disposal complete understanding, the same as the total, for it is a miniature, and according to your scientific findings, the DNA/RNA molecular structure contains a mirror image of yourself in a microscopic code within each cell of your body. Likewise, you as an individual cell, contain within your reality and your experience, the microscopic or microcosmic reflection of the Divine Being, the Universal Being, or Macrocosmic Being in which you find yourself.

This Awareness indicates that this in itself does not help you to rationally explain what is going on. This Awareness indicates that it can only be grasped intuitively through realization, and the rational mind, while being present and holding structure and knowledge, is but a written recording in a lesser dimension of the experience of the intuitive reality. This Awareness indicates that if one seeks answers only through the rational mind, it would be likened unto expecting the atoms and cells within your body to rationally, using logic, words and such, to figure out where each cell is, what its destiny is, where it is going, and how it can move about and control itself to the best of its ability, and for its purposes, and essentially to become some kind of ruler of the universe or body in which that cell finds itself.

This Awareness indicates obviously, the cells in your body, while containing reflections of yourself, will gain more understanding from the life current

which goes to them from your own life energy, and the realization which you have in your consciousness is dispensed to the cells within your body through what may be called 'insight', for for the cell, 'osmosis'; picking up your conscious thoughts in their subconscious experience. This Awareness indicates that the cells then, of your body, are not rational, but are subconscious in absorbing what you filter or allow to go through, and in absorbing from your consciousness the cells become subconsciously awake, or programmed in different directions.

This Awareness indicates likewise, as individuals from the viewpoint of the cell, or soul within the body of God, the individual cell which is open to receiving insight from God, will absorb energies, directions, guidance,—not in the form of rational lessons, or instructions on a sheet of paper, or even tablets of stone,—but will receive insight through the intuitive faculties in such a manner as to educate the cell or individual as to the will of God. This Awareness indicates that from the viewpoint of the individual cell within this body, for it to attempt to figure out logically the nature of the body it is within, whether it is alive and well, or whether it is simply an inanimate universe, created by accident, having no life anywhere except as found immediately around the individual cell; this effort of the individual cell to rationalize answers of its existence becomes so great as to be essentially meaningless and futile, except when it allows for the intuitive faculties of its being to receive energies from the Divine Light, or consciousness of the Universal Being in which it resides.

This Awareness indicates that as far as the Universal Being is concerned, the Buddha, the Christ Consciousness, the Cosmic Consciousness, the Divine Light of God, or the mystic, meditating in the lotus position; or in any other position....as far as the individual meditator and creator of the cell is concerned, it matters not whether the cell is a believer or an infidel, an atheist, or what. This is only a concern of the cell itself.

The concern of the Divine Light within the entity who is meditating, who is contemplating consciousness, the concern is only to be awakened, more and more awake, more and more alive, more and more vital, more and more wise, more and more capable of understanding. The concern is not to punish those cells which are bad, and reward those cells which are good, but rather the concern is to heal the entire body, the entire universe, so that all cells are shining bright with the Clear Light of Reality, and so that all cells are healthy and well.

Dreams and the Concept of Reflection

This Awareness indicates that the individual cells, having their own free will to accept or reject the healing light and vitality of the individual who is meditating, the individual cells may respond slowly or quickly, or not at all, may die and fade and come back again in new energy and new bodies, with different experiences and different beliefs about the nature of the body or universe in which it lives.

This Awareness indicates there is a tribe of entities on your plane, and in the past this was most common with many primitive societies, whereby these entities have based their entire culture on dreams, and upon awakening, go to each other and share their dreams, wherein if one dreamt he or she violated another, they would go to that other and make amends for the dreamed violation, or wherein, if one saw in a dream certain danger for another, they would go and share that concern and danger so that the other might avoid any repercussions.

This Awareness indicates that these entities understood the concept of reflection, dimensional mirrors, reflection of one Bardo and another. These entities, in actuality were mirroring that which occurs between lives, between dreams, wherein the entities pass over from this dream life into the greater life, or greater dream, the afterlife, and share with each other their concerns for what they did during their dream life on the physical plane, sharing, making amends for violations committed, so that in the next lifetime, or dream segment, they do not carry over continued guilt or unresolved relationships which were based on previous experiences in previous dreams or lifetimes.

This Awareness indicates in other words, entities between lifetimes can absolve karmic debts to one another if they choose, similar to these entities who share their dreams and absolve hostilities and frustrations and violations which occurred during dreams so that they do not carry these same energies back into their future dreams.

This Awareness indicates for a scientist in your plane, in your society, to attempt to understand what occurs after death, what occurs beyond this physical existence, is as difficult in a rational sense as it would be for you in a dream, regardless of how much you dreamed yourself to be a scientist, and how much in your dream you studied, and how much effort you exerted to understand in your dream how to escape from that dream through rational understanding, and to explain, while being in your dream, the nature of the world outside of your dream.

Questions that Plague the Scientists

This Awareness indicates that such is a formidable task, and very few entities can begin, in a rational way, to understand when locked inside a dream, what is occurring outside of that dream, and what is causing that dream, and from whence the dream came, or where the dream is going, or who caused, who created, who brought forth the dream's existence. These questions have plagued your scientists, have plagued all thinking individuals, have plagued all rational beings. These questions do not plague the animals, for they do not think in rational terms. They simply experience one dream after another. They simply move from one experience, one existence to another, from one Bardo to another, from one dimension to another, until they reach that level of becoming rational and asking: "How can this be? Why is this so? Who am I? What am I? Where did I come from? Where am I going? How was I created?"

This Awareness indicates once these questions begin, only intuition can answer. The intuition is that which comes from the realization of the experience of being, and the experience of being is that which is limited only by one's definitions of what it is to be, of what one is being. This Awareness indicates that when one fully understands the unlimited experience of being, the entity's consciousness and existence expands or contracts according to the entity's desire to know more or to focus on less, and as the entity's being expands into an awareness of the Buddha Consciousness, the Divine Body, the Universal Body, the Christ Light, the Body of God; as the individual expands into this realization, it is unnecessary for the entity to rationalize or figure out, "Who am I? Where did I come from? How did I get here?", for the entity simply recognizes, "I am that I am, and all of the parts within me are reflections of myself."

This Awareness indicates that this as an intuitive realization, not a logical realization, and wherein the

entity in awakening back into his dreamlife runs forth to tell his peers: "I have had enlightenment! I understand! I have had an apple drop on my head! I have seen the Light! I know what it is, and I can now tell you!", the entity, the cell within the body of the Buddha, the cell begins explaining to other cells that: "I am that which I am! I have seen the light! I always was, and always will be!" The other cells laugh uproariously, and wander off, asking this scientist to be more specific and rational in his further explanations, and if he can come up with a more clear definition of the universe, the mysteries of existence, the uncertainties of origin, the nature of dreams, the abstract realities of life and death, that they would certainly like to read what he says and evaluate it for its worth.

This Awareness indicates the difficulty of using rational thought to explain experiential life is equivalent to the attempt to use a yardstick to measure quality or value of a particular thing. This Awareness indicates that rational thinking, rational life, as one form of measurement, appropriate to the evaluation of certain experiences of a particular level or dimension; that intuitive measurements are quite different and essential in measuring other experiences and other values. This Awareness indicates that as the yardstick cannot measure the price of an object of value, likewise, the rational mind cannot evaluate the experience of life. It can however, reflect in a graph, or in symbology, that which was glimpsed from the intuitive.

This Awareness suggests this likened unto a yardstick being used to make a graph which measures the values of products sold, so that an evaluation of progress can be made and placed upon paper and seen whereby measurements of quantity are used to symbolize quality measurements and evaluations. This Awareness indicates likewise, the rational mind can be used to symbolize quality experiences, experiences of insight, intuition, and these when placed in symbolic imagery, can be relayed so that the rational mind may make lines and relationships between these symbols, just as one can create a chessboard with various chess pieces upon the chessboard to symbolize a battle which occurred wherein real entities were involved. The real battle as being one experience that can never be explained by the chessboard with its pieces, but which can be symbolized by the chessboard and its pieces.

This Awareness indicates that the rational mind is a reflection, a record, a recording device to play back, to graphically portray through symbology experiences of an intuitive and real level. The battlefield, to the intuitive mind, is the universe itself. To the rational mind, it is the chart hanging on the blackboard, wherein the generals place their divisions, their troops, through symbolic little markings, and make their plans and evaluations and reflections, and seek to understand what is going on and how to make things happen in the way they desire.

This Awareness indicates the chart on the wall can never measure the experience. The rational mind can never understand the experience of life.

"...And he also said, Death will come to you natural and naive, like Death the Rainfall, Death the Snowfall, Death the running in the forest, after a yellow bird."

...Poet unknown

THAT GREAT SLEEP AFTER DEATH

No Instant Genius for that Next Lifetime
(The Law of Cosmic Physics: Like Attracts Like)

QUESTION:

In the prior session, Awareness went into that area of the awakening from the dream. In a lot of books that were supposedly channeled from those various levels, they talk about the great halls of learning, and the great halls of sleep. The great halls of sleep, they claim, are for those entities whose conscious mind has been programmed during that lifetime in such a way that they don't believe in the concept of awakening to the idea that the whole experience had been a dream, and therefore, they're confined in these great halls of sleep, from anywhere from hours to hundreds or perhaps even thousands of years in our lifetime. And I'd like to ask Awareness if this is true, and when those entities finally wake up, are they then able to face the light and realize, at least briefly, who, in fact, they really are?

COSMIC AWARENESS:

This Awareness indicates that depending on how much asleep an entity is depends on how they shall sleep after their experience in the physical. This Awareness indicates entities who are essentially dull, will remain essentially dull in the afterlife. Entities who are essentially bright in terms of mentality, will remain essentially bright in the afterlife. This Awareness indicates that obviously, age and condition and mental disease can affect an entity to make one dull just before passing over, or within years before passing over; this will not necessarily mean that the entity remains dull thereafter, but rather, wherein the entity through lifetimes has never sought to develop thinking capacities or talents, or mental skills or physical attributes and skills, that entity will remain essentially the same in the afterlife.

It is not likely that an entity who does not wish to develop any personal skills or talents in one lifetime will be suddenly gifted for no reason, to be a genius in the next lifetime. This Awareness indicates these skills, talents and gifts are brought about by the efforts of the individual. This Awareness indicates that wherein an individual is programmed to believe that life after death is nothing but a deep sleep, often entities will experience that deep sleep for some time, but it is not a sense of punishment, it is more a fulfillment of their expectations.

This Awareness indicates that likewise, entities who believe they are going to be sent to hell after their passing over, because of their expectation may in fact experience that which they expect for a duration, to satisfy their expectation. This Awareness indicates that this is a natural phenomena of Cosmic Physics in that in these levels, like attracts like. Wherein one believes something to be so in one's consciousness, when one passes over into the subconscious or other conscious super-conscious levels, the energies held in one dimensional consciousness carries over and attracts to it that same reflection from the other dimension of consciousness.

If one consciously accepts a certain belief, when the entity transports that belief into the subconscious, allows that to enter, the subconscious then accepts that belief, even if it were not so. This Awareness indicates therefore, entities may program themselves consciously by believing themselves to be ill, may project into the subconscious

that belief of being ill so that they in fact do become ill, or entities may likewise, recognizing themselves to be ill, may project consciously that they do not allow illness in their body, and if strong enough, may convince the subconscious, and the subconscious may accept that belief and acknowledge that it does not allow illness in the body.

This Awareness indicates likewise, when an entity moves into the Superconscious, or into the Clear Light, or into the afterlife, carrying with the entity certain expectations, beliefs, fears, guilt; the entity automatically draws those reflective expectations to be experienced. This is because of the Cosmic Physics Law that *'Like attracts like, in all levels, except the material polarity levels of magnetism.'* This Awareness indicates that in levels of spirit, of consciousness, of intuitive experience, like attracts like. In levels of material, physical and even rational patterns, opposites attract. Thus, in a rational pattern, good automatically attracts the concept of evil. You can't have one without the other, not if you are being rational, not if you are to remain polarized, materialistic in your thinking.

This Awareness indicates however, in the non-material realms, in the anti-material and spiritual realms, like attracts like. Opposites do not attract each other.

This Awareness indicates that in answer to the question relating to the dream and those entities who are moved into these various experiences, they move into these experiences because their basic spiritual likeness is drawn to that which is similar in nature. This Awareness indicates a good Cosmic Physics rule of thumb would be to say that whatever entities expect in consciousness, shall be provided. This Awareness indicates this not always so on the material levels, but in the spiritual sense, in the intuitive and abstract levels: "as you seek, so you find; as you expect, so you receive."

This Awareness indicates entities passing over, expecting to see Krishna, shall see Krishna. Entities passing over, expecting to see Christ, shall see Christ. Entities passing over, expecting to see Satan, shall see Satan. This Awareness indicates that these expectations are projections of your own consciousness, and the reality of yourself is that you are in fact a cell in the Divine Mind of the Universal Consciousness, and as a cell, you are capable of imagining, expecting and projecting any belief that you wish in your experiences, for whatever can be imagined in the body of God is available to any individual who wishes to imagine and expect that experience.

This Awareness suggests that being miniature creators within the body of God, you are capable of creating many aspects of your life, many experiences, and your choices of these experiences are of a great variety. This Awareness suggests that you may choose experiences of shadows, confusion, illusion, deception, darkness, ignorance, weakness, failure....or you may choose experiences of vitality, clarity, definition, discernment, assertiveness, desire to be alive and awake. These choices of experiences are endless, and limited only by your own chosen conditions, conditioning, and your own limitations, and the limits of your imagination.

This Awareness suggests that you shall find more joy in paths of greater vitality, self-confidence, concepts of success, purposeful activities, and these pursuits will lead to greater enlightenment, and therefore, this Awareness encourages entities along the path of light, but also allows entities the opportunity to learn by experience the paths of deception, darkness, confusion, the paths created by those who would lead to dead-end mountain tops or valleys or imprisonments.

This Awareness suggests that entities beware of who they follow, and follow only that which is the inner light. This Awareness suggests that those who travel the path of the inner light, whether they be priests, gurus, friends, disciples, followers or even your enemies; let these be those who walk beside you and follow the path of light, but do not be deceived by those who attempt to lure you off the path, even though they claim to have the map toward the light.

This Awareness indicates that in following the path of light, you may walk with Buddhists, with Christians, with Catholics, with those of the Moslem religions, with atheists, with all types and all races and all cultures, with entities of all beliefs, with all beings who are also following the path of light, and it matters not whether you carry the flag of one religion or another, of one race or another, of one country or another; it only matters that you follow the path of light toward the crown chakra of God, and move toward that which is the awakened state.

A NEW AWARENESS WHEN YOU AWAKEN FROM THE DREAM OF LIFE

QUESTION:

Awareness, in reviewing and evaluating or judging your life at the point of death, I thought that your judgment was tempered by a greater perspective and wisdom than you would otherwise have extended to yourself.

COSMIC AWARENESS:

This Awareness indicates that entities, upon awakening, awaken to the reality that their life has been but a dream, and therefore it is seen from a more super-objective viewpoint, a greater level of awareness. Entities are capable of seeing themselves for what they have been, as though one looks down upon a role of an actor on a stage after the entity has left the stage, and is reviewing the film or the play, and in such evaluation, having once removed oneself from the role, the entity is more objective about the experience and recognizes the areas where the act could have been better, or might have been made more meaningful and interesting.

HOW ENTRAPMENT OCCURS (HOW TO BECOME A GHOST)

QUESTION:

But the judgments made at this point can still relegate you to various levels of limbo, would they not?

COSMIC AWARENESS:

This Awareness indicates these judgments tend largely to be judgments of the role which one played, if the entity is able to extract himself from that role and cease to identify with the role. This Awareness indicates that wherein entities on passing over, continue to hold onto their own personal role and attachments of life, the attachments of the dream, and

wherein entities cannot release themselves from those materialistic bonds and bondage, from those attachments which held them, which they held to for their security; wherein entities cannot release themselves from those habits and those needs for gratification, from that drink, from that substance; wherein entities cannot release themselves from these attachments, this then becomes the emotional hell or purgatory, or the bonds and bondage, the chains that hold the entity from moving further, and the entity then becomes entrapped by these energies or attachments.

This Awareness indicates that it is this type of energy which brings about those forces known as spirits and ghosts which haunt the saloons, bars or houses wherein they once dwelt and had access to expressing their attachments and habits and needs. This Awareness indicates that these entities are trapped by their own magnetic strands, psychic attachments, attachments to habits, attachments to things, attachments to energies which do not let them go, because they will not let go of their attachments.

The Message of Moby Dick

This Awareness indicates this likened unto the fisherperson who has caught a whale, and refuses to release the line, and therefore is towed by the whale according to the will of the whale, while still thinking he has control of the situation. This Awareness indicates the whale as pulling the entity along the path of destruction, and the entity can be free by letting go of the attachment, but refuses to do so. This Awareness indicates this as the message, the message of Captain Ahab in his quest to master and control Moby Dick.

This Awareness indicates that entities becoming obsessed with certain attachments will be diverted from their path toward the light. This Awareness suggests that the first priority of attachment should be attachment to the Clear Light, for with this as a priority, all other activities and experiences will fall into proper place, as like attracts like.

WHAT AWAITS THE SUICIDE?

QUESTION:

In the prior reading, where Awareness mentioned those entities who violate themselves through suicide, this is the type of suicide that is senseless and has no altruistic motive. I'd like to ask Awareness if this information sent in by B.D. of California, in reference to suicide, is correct.

"I've heard this type of thing before and I don't recall seeing it in the previous information Awareness has given on suicide. Suicide calls forth a penalty of 3,000 to 5,000 years on the dark planet, with the total reenactment of all events and circumstances leading up to, and including the suicide, over and over and over again. When that particular entity has finally committed that exact suicide enough times, then they must spend 2,000 years in service to others who are in similar conditions to theirs to try to prevent that entity from committing suicide. After the penalty of 5,000 to 7,000 years has been served, you can bet that the entity should have the thought of suicide as a last step to be encountered. When finally they come forth upon planet earth, they will usually come forth as an albino, from lack of love and light upon the dark planet."

This is pretty weird stuff. I wonder where she got that information. Would Awareness comment?

COSMIC AWARENESS:

This Awareness indicates that this not accurate. This Awareness indicates that this as being a fusion of two frames of reference which do not mix. This Awareness indicates that time in itself, on the inner plane, outside of this dimension, is of little significance in that it is a rational concept, measured by a yardstick which cannot understand quality or value of an experiential action, and as also the concept of measurement which is being used such as years or inches, as that which varies from dimension to dimension, and a year in another level of consciousness is as meaningless as the measurement of an inch-worth of happiness.

This Awareness indicates that the year in a dream, wherein an entity is dreaming of time passing, dreaming of years passing, this may occur in a matter of moments, in a matter of minutes, in a matter of seconds, and the entity may awaken to discover that he has just fallen asleep for a moment and dreamt that he was experiencing his 6th birthday. This Awareness indicates that these confusions of time carrying over from one dimension to another are such that they simply cannot measure in a realistic sense.

This Awareness indicates however, the message relating to the consequence of suicide is that which was intended to promote the significance of the consequence, so that entities would avoid this action, as a deterrent to prevent entities from doing such. This Awareness indicates that while suicide is a violent expression, suicide is less karmic in nature than is the killing of another; accidental death of oneself, less karmic in nature than negligence and accidental death of another because of one's negligence.

Suicide is that which must be understood on individual levels of reality, whereby the individual who commits suicide, either by a sudden violent self-extermination, or by a prolonged, lingering, lasting suffering, the suicide which entities choose, in choosing their way of exiting, will, in each instance, have its own repercussion, according to its own peculiarities.

This Awareness indicates that wherein an entity commits suicide in a dramatic way, in order to impress someone, and wherein the entity's suicide is designed to bring great attention, to focus the press and publicity upon the entity's life, this is going to have a great difference in its consequences than the entity who is alone, silent, lonely, confused, and lost, and suffering, or feeling great remorse for the loss of another. This Awareness indicates therefore, each action carries its own consequences according to the nature of its action and circumstances.

This Awareness does not judge. The universe does not present strict laws and rules governing suicidal victims, it simply creates Cosmic Physics, the physics of consciousness, wherein consciousness reflects upon its actions and learns from its actions or seeks to avoid seeing reality, and the physics of the universe, the Cosmic Physics, demands that certain realizations follow an act, or that the repercussions, and continued repercussions for the act be experienced.

This Awareness indicates each act determines its own sentence.

ED's Note:

This reading is a continuation of the life-after-death readings, which began with 'Revelations of Awareness' No. 81-27 (On Death & Dying);\$3.00, and continued with No. 83-6 (The After Death Experience);\$3.00; then No. 83-8 (Into the White Light);\$3.00 from C.A.C. More in this series will be forthcoming.

ABOUT THAT SECRET BOLSHEVIK FLEET IN NEW ZEALAND & THE FALKLANDS

QUESTION: July 15, 1983

One of the most controversial and hard to accept concepts put forth by Dr. Beter and confirmed by Awareness is the existence of a secret Bolshevik fleet of battle ships and destroyers and so forth, that are doubles of existing warships, and that these were cached away in the Falkland Islands and in New Zealand. We got quite a few letters from incredulous members on that particular topic.

The other day I happened to notice a small article in the Seattle P.I. newspaper. I'd like to read a little bit of this and ask Awareness if this could possibly be one of these places. The article is entitled: "Boeing's First Plane May be Found in New Zealand."

"A New Zealand cinematographer thinks he knows where Boeing 1 and its twin sister Boeing 2 are, and wants to do a documentary on the search for the historic aircraft. John Ernschaw was in Seattle this week looking for financing for a documentary film on the hunt for the first two airplanes built by William E. Boeing and his partner.

"Ernschaw thinks the hiding place of one or both historic airplanes is a labyrinth of man-made military tunnels under a mountain of basaltic rock in Auckland harbor, New Zealand. There are no existing maps of the tunnels first begun in 1886, and the entire mountain is sealed off with thick concrete and

7. covered with grass, as a park.

... planes were sold in 1918 to a New Zealand flying school in Auckland. They were used to train pilots during World War I. At the end of the war the planes were purchased by the army and stored in tunnels dug by the military into hard basaltic rock for munitions storage."

The article goes on, but is now, in that particular place, "the Catch 22 situation. The New Zealand National Park Service, which now owns the land under which he thinks the Boeing 1 is buried, and the New Zealand Navy, which once operated the tunnels, are willing to let him dig if he promises to produce a professional document."

I'd like to ask Awareness, are they describing the site of one of those secret hiding places Dr. Beter disclosed, or is this place somewhere else in New Zealand?

COSMIC AWARENESS:

This Awareness indicates that this appears to be a site that is different from the one described by Dr. Beter. This Awareness indicates however, that this site is also one which does have some still present military value. This Awareness indicates the base is located near this site. This Awareness indicates the entry into these bases in New Zealand and in the Island of St. George as that which is from beneath the sea and through entrance ways that are inaccessible except from the sea.

This Awareness indicates that these bases, the base in St George area has been restored. That the base in New Zealand is and has remained intact. This Awareness indicates that in regard to potential war in that area of Argentina and the Falkland Islands, there is still some potential for new eruption. This Awareness indicates that the Argentines are working to build up their armaments.* This Awareness indicates however, the British have also built up their armaments in the area and a new war in the area would be much more devastating than the previous war.

This Awareness indicates that it is not an unlikely event, though it is not seen in the immediate future, or in the near future. This Awareness indicates however, that in the event other activities should begin to move in the direction of war in other areas, this area also will be seen as a potential hot spot. This Awareness indicates that the bases in these areas are key to the plans of the Bolshevik forces in the event of nuclear war. This Awareness indicates that it appears however, that nothing is indicated at present to assume this is heating up or in the immediate future.

This Awareness indicates that the time of concern is still in the spring of '84. This Awareness indicates that negotiations occurring between that time and the present may alter events considerably. This Awareness indicates there are also other activities occurring which may alter these potential hazards.

*Ed's Note: In September of this year (1983) Argentina announced it was making a hydrogen bomb, and "it hoped that this bomb would help them negotiate with England over the Falklands."

PREDICTIONS OF THINGS TO COME ?

(July 15, 1983)

QUESTION:

While we're on this subject, a question from Jack Atchmar might be pertinent. He writes: "Cosmic Awareness, on Sunday, July 10, 1983, a female named Kelly, a leader of the West German Greens Party, was on American national TV. She is the best leader of world peace seen on American TV. She said she had spent several days in the US State Department and was shocked to see that they are totally dedicated

Russia, and that when the nuclear missiles are put on West German soil in December, 1983, it will enable the Zionists in D.C. to make a sneak first nuclear strike against Russia whenever the Ahriman Forces give the order.

Ms. Kelly said the only way the Russians can protect themselves is to 'annihilate' Zionist controlled America before December, 1983. She also said that Europe identifies with Russia more than America, and that all Europe knows that the Russians want peace, and that Zionist Bolshevik controlled America wants war. Please tell us if the deployment of American nuclear missiles on West German soil in December, 1983, will force Russia to change her policy and hit America first

COSMIC AWARENESS:

This Awareness indicates that the trouble with responding to questions from the entity Jack Katchma is that the entity quotes others without quoting them directly. This Awareness indicates that these are reinterpretations of their words according to the way he wishes to hear their statements. This Awareness indicates however, that in response to the final question, this Awareness indicates that this appears to be a period of time in the latter part of this year, wherein the intensities and the alternatives begin to surface whereby something will be brought to the attention of the masses in such a manner as to require that they take a stand one way or the other and this will begin creating a stronger and more easily defined line between the Ahriman Forces pressing for war, and the Forces of Light seeking to find ways of peace. *

This Awareness indicates that the dangers to the United States at that time will become much more recognized and pronounced. This Awareness indicates this also as a time in which the planet Pluto moves into Scorpio along with Saturn, and that this can be a great significant time for both Russian and the United States. This Awareness indicates that the period of Pluto in Scorpio as that time in which the environment on the planet earth will become of utmost concern. One could say this will be the time when the chickens come home to roost in so far as the pollution and environmental problems are concerned.

This Awareness indicates that one may expect problems with radiations, with pollution and with environmental problems of such magnitude as to alarm the masses. This Awareness indicates that this is a period spanning approximately a decade of time after which there will be a concerted effort to begin cleaning up the planet. This Awareness indicates that entities may also expect to experience or witness biological warfare during these times, possibly emanating from China, and also great potential for nuclear warfare of some degree is seen. This Awareness indicates that this also may include nuclear accidents in atomic plants.

*ED's Note: this is probably a prediction of that 007 Korean jetliner which was shot down by the Russians in September while on a CIA spying mission. (Ironically 007 is the number assigned to James Bond, the most famous spy in the world). Or is it so ironic as perhaps intentional?

Incidentally, none of the media seems to remember that it was Israel that provided the prototype for that tragedy. Back in Feb., 22, 1973, a pack of 5 Israeli jet fighters intercepted a commercial Libyan airliner, which had strayed slightly off course in its landing approach to Cairo airport in Egypt. The plane was shot down with all its crew and 106 civilian passengers killed. But of course, no one dares speak the truth about Israel these days, lest they find themselves out of business (or off this plane). Avaton.

THE VARIOUS MESSIAHS & PASSION PLAYS

...HOW THE ENTITY KRISHNA FITS INTO THE STORY

(SECRET RITES AND RITUALS ARE EXPLAINED)

QUESTION:

The following question by D.O., of Effingham, Ill., has been sent in by four or five entities in the past, ever since we published information Awareness gave on Krishna, so I'll ask this question, and maybe this will straighten this situation out.

I have been receiving Cosmic Awareness material for over a year, and I think what you say and what you do is great! I *do* have a couple of questions maybe you can find answers for. I have read that Awareness has said that Krishna lived 600 years before the arrival of Jesus, that he had 12 disciples, and he died by hanging. This causes me confusion since many great masters say that Krishna appeared at least 3000 years before Jesus, that he did not have 12 disciples, and that he died by being shot with an arrow, not by hanging. Could Awareness please reveal the *true* life of Krishna?

COSMIC AWARENESS:

This Awareness indicates that the entity Kapila as one who lived approximately 3000 years B.C. in India, and this entity's life as that which was paralleled thereafter by stories, myths of other individuals, including the entity Krishna. This Awareness indicates that there are a number of variations in Indian literature, giving dates which vary as to the life of these individuals. This Awareness indicates however, that essentially, the entity known as Krishna, as also being more mythical than real. This Awareness indicates that the entities are essentially mystics playing out the Passion Play which was presented also by the entity known as Jesus.

This Awareness indicates that these Passion Play expressions are reenacted on various occasions, at different times, in different cultures, under different names, in order to realign the consciousness of a civilization towards its alchemical purpose, growth and spiritual development. This Awareness indicates that Osiris, Zarathustra, Indra, Krishna, Kapila, Mithra, Jesus, and a number of others who were not so well publicized or recognized have moved through the pattern representing the movement of an individual, this being an enactment of the Passion Play which has long been performed in secret rites within the hidden societies that have come down from Atlantis, through Egypt and through the Orient, particularly Tibet and India.

This Awareness indicates this also being paralleled in secret rites within the Masonic order, the Knights Templar, the Eleusian mysteries, and the Druids, and others of similar associations. This Awareness indicates essentially, the secret Passion Play or the action of the initiation involves the movement of the initiate, in this case the one who is to become the Christed One, the movement of the initiate, after having been born, brought into the secret society, and in that society the entity is taken through many trials and testing to determine his or her capability and worth, whether he or she is indeed willing to move into these mysteries and the unknown, and in this movement, eventually the entity finds himself or herself at an altar or a place wherein a sacrifice must be experienced.

This Awareness indicates in the black arts, this is often the sacrifice of a goat, or animal, or even in some instances another human being. This Awareness indicates in the Light or spiritual secret orders, the sacrifice as that which is more of a symbolic action, wherein the entity is sacrificed to the Divine Light of God, gives up his or her own personal self, and is made One with the Divine. This action being such that the entity symbolically is initiated into the Light.

This Awareness indicates that in the Passion Play, this as that which is told, wherein the entity is crucified on the cross or sacrificed, this representing the personal self being sacrificed, and the soul-self, or essential or the etheric and spiritual self being resurrected unto God. This Awareness indicates the cross representing spirit and matter, the vertical post representing the movement toward spirit, the horizontal representing matter, or that which is the material world. This Awareness indicates that being placed on the cross is symbolic of the transformation, or cross-fixation, or transference, or transmutation from a material individual into a spiritual individual.

This Awareness indicates that this story as an allegory of the movements which entities must pass in their spiritual evolution; that this may be explained as the candidate, being a man or woman, moving as an egocentric person, creating miracles of great order, representing the accomplishments of an egocentric individual, finally reaching a level wherein he or she discovers that all of these works are not acceptable to the world, and the world simply will not allow the power and glory to go to the egocentric individual; and the egocentric individual, in order to proceed any higher must die, and the spirit or the etheric spiritual body, in order to proceed above the worldly mundane levels must transcend this ego-death and move toward the resurrection or recreation of a new life in the spiritual dimension, whereby the humility of the ego-death is experienced and suffered, while the spirit moves on to its crowning glory of a higher nature.

This Awareness indicates that essentially, these Passion Plays all follow the same drama, or pattern, but the details are often changed. This Awareness indicates that in many cases, the candidate is born of a virgin, or of a special place, generally of a low and insignificant birth, ascending into glory as a god, this representing the lowly station of any human being, and the capacity to rise into the heights of spiritual attainment. This Awareness indicates that the concept of being called a god, or king, while having thorns placed upon the head is symbolic of mockery of any form of vanity or claims by an individual, for entities in pursuing the spiritual path cannot claim themselves to be kings of anything other than themselves, and of the acceptance of the humility which accompanies any vanity claims.

This Awareness indicates that the claims that the ego makes as to its crowning accomplishments or its station, even though it may claim to be creation of God, the Son of God; even though it may claim to be God Itself, the ego will in its further movement toward spiritual ascension, be required to accept a crown not of glory, but of thorns, before it can move further into its spiritual ascension.

This Awareness indicates that the story, the Passion Play, as that which has been told in various ways in various cultures, in many different centuries and millenata. That this has come down from Atlantis approximately 25,000 B.C., and has evolved and been altered to some extent in different ways. This Awareness indicates that

the Development Classes as given by this Awareness as also following a pattern based on those which were given in Atlantis in this period, and particularly those which were used in the temples of Atlantis. This Awareness indicates that the messages and details and techniques used in these Development Classes as being quite different, but the pattern used as essentially the same.

This Awareness indicates that in the Development Classes, this being 12 classes wherein the first five classes are associated with the senses, and the final seven classes associated with the chakras. This Awareness indicates that these chakras each being opened from the result of each class, and that there comes about that moment during the various classes, wherein the entity's ego is crucified, the entity moves into the Clear Light, and ascends toward a realization of the spiritual experience.

This Awareness indicates that these patterns as that which also corresponds and follows the zodiac pattern. This may be also seen as having its parallel in the life of these mystic teachers and the Passion Play. This Awareness indicates that the movement of these entities in their story form may be seen as also following the zodiac qualities; for example, the sign of Cancer representing the nourishing and message, and comfort and care exhibited by these messiahs; the sign of Leo as representing the glory and wonder which is held for these entities as they demonstrate their accomplishments,-- this as the ego at its height. The sign of Virgo as representing the structure, regimentation, the peer judgment and the unravelling and the fruition and harvesting of their accomplishments.

The sign of Libra representing the judgment, the court, the decision by the society or public as to their accomplishments and works. The sign of Scorpio symbolizing the death of the candidate, the transfiguration or transmutation, the ascension or resurrection; and the sign of Sagittarius as that which represents the philosophical and religious significance of the life which then moves on in its direction.

This Awareness indicates that these symbols as having many different faces. The basic pattern as being essentially the same. This Awareness indicates also, that each age has its own unique version. The Christian age as that of the Piscean age, wherein the fish as being highly symbolic, and the Christ of that age being a fisherman, and a fisher of men; the disciples being symbolic of the 12 signs surrounding the sun/son of God, and the emphasis on washing the feet as symbolic of the Piscean sign, with the priestcraft of Virgo being opposed to the lord of the Piscean age.

This Awareness indicates entities in exploring these symbologies can find many unique characteristics which explain much of the mystery and which also raises many new questions and creates a much greater understanding of the hidden mysteries of Christianity and other religions.

This Awareness indicates the concept of the sacrificial lamb, which was the early symbol for the Christian religion, wherein a lamb was suspended on a cross, rather than a human, the concept being that which was symbolic of the end of the Aries age, that of the slaying of the ram. This Awareness indicates that in the alters and churches of the time, the slaying of the lamb was symbolic of the end of the Aries age. This Awareness indicates that prior to that time, the symbolism was the golden calf, or Taurus, this leading to the slaying of the bull, which is still carried over in Spain, in the Spanish bullfights. This Awareness indicates the Hindus still worshipping the cow or bull as sacred, have failed to recognize the end of the Taurus age,

due to a loss of understanding of how and why the bull or cow ever was made symbolic and sacred; the sacredness of the cow or bull being only because it was representative of the Taurus age, which at one time was considered to be the great force in movement.

This Awareness indicates that prior to the age of Taurus was that of Gemini, wherein the Tigris and Euphrates, and the forces of the Middle East began creating the polarities and pursuits dealing with written records, communications and travels. That prior to this was the mummification and the scarab, which has been changed in astrology to be represented as the crab or the sign of Cancer. The mummification being that which represented the Cancer energies.

This Awareness indicates that the entity Krishna as said to have lived in 600 BC. This Awareness indicates there are also reports and records of this entity as having lived at other times. This Awareness indicates essentially, the entity Kapila as being the one in India who was the originator of much of the information and great teachings which were handed down, and later attributed to Krishna, and many of these scholars, in being loyal to Krishna, when discovering that this information was released earlier from Kapila, attributed Krishna's name to those earlier records.

This Awareness indicates essentially, the entity and stories of Krishna as more symbolic than factual, but there were also many factual experiences relayed by the records of this entity's life.

MORE ON THE COSMIC AWARENESS SPIRITUAL DEVELOPMENT CLASSES

QUESTION:

In reference to the development class mentioned, and the symbolic going into the Clear Light; does the entity doing this, does this guarantee that he will also do this when he passes over for real?

COSMIC AWARENESS:

This Awareness indicates that entities in moving through the development class, depending upon their complete involvement or whether they are moving through these classes with a kind of distracting boredom, this Awareness indicates depending on how they approach these classes, the experience will have an alchemical effect upon the individual and over a period of approximately from 2 to 5 years, but generally approximately 3 years, the individual will experience rapid spiritual growth. This Awareness indicates that this growth will continue thereafter also, but the more rapid development occurs for approximately the next three years after completion of these classes.

This Awareness indicates that essentially, what the classes do is to open up the chakras, trigger off subconscious memories and symbologies within the psyche to assist the entity in expanding awareness. This Awareness indicates that as far as a guarantee that the entity will see the Clear Light after death, this cannot be said as a guarantee. This Awareness indicates however that depending on the individual, it can be said that the classes, if participated in by an individual openly, the classes will speed up an individual's spiritual development as...this Awareness indicates that the individual's development will be speeded up in such a manner that it could otherwise take many lifetimes to achieve such spiritual evolution, this depending largely on the individual's attitude toward these experiences, depending also on the individual's dedication afterwards to continue the spiritual path, depending also on the individual's vitality and length of life, for in a life wherein the individual moves through these classes, the classes have a profound effect on the entity throughout the remainder of his or her life, and enhance the growth movement.

This Awareness indicates that this may be represented by a kind of funnel-shaped geometric design, wherein an individual's growth may be seen to move in a direction becoming somewhat wider as it progresses, but at a particular point wherein the development classes are experienced, the funnel then suddenly changes angles and the movement of the individual's growth becomes much wider, much more enhanced and grows ever broader in a shorter distance. This Awareness indicates that this as a kind of mushrooming effect.

QUESTION:

Awareness, many entities, including myself who went through the development class, particularly that class of Ralph DUBY's, where great secrecy and mystery was maintained, did not fully understand what was happening until months later, if even then. I'd like to ask Awareness, if this lack of understanding of the conscious reasoning mind side of the brain, is necessary to accomplish these things in the development class?

COSMIC AWARENESS:

This Awareness indicates that this is not necessary. This Awareness indicates that the subconscious and soul can grow without conscious understanding of all of these symbologies. This Awareness indicates however, that since the classes were originally given through Ralph DUBY, that they have been revised, and greater explanations have been given within these classes to assist entities in understanding the symbologies. This Awareness indicates that when the entity Ralph DUBY gave these classes, he also gave a 13th class, wherein the symbology of the classes was explained. This Awareness indicates that those symbologies, and that information was withheld from many of the individuals involved in the Organization of Awareness, partially because those in control did not want others to understand the hidden meanings and symbolism of these activities.

This Awareness indicates that in the present classes, the explanations are generally included within the information, as entities move through and experience these symbologies. This Awareness indicates that the purpose of giving this is to assist the conscious mind, so that it also is aware of what is occurring, and the effects which are being experienced. This Awareness indicates that the mystery still remains sufficient so that the subconscious growth and development can occur, and the classes do not simply become a kind of intellectual study so that entities can say to themselves, "Oh, I understand!"

This Awareness indicates that wherein the mind thinks it understands, often the soul ceases to grow and develop, for the need to experience these classes is greater than the need to understand the classes.

THE PROPHET MOHAMMED:

WAS HE ON THE SAME LEVEL AS JESUS?

QUESTION:

In a related question to the Krishna question, H.C. of Palatine, Illinois writes: "I have a question for Awareness. Regarding the prophet Mohammed, Awareness indicated that he was a Christ-level entity. The Koran however, violates the *Law of One* constantly. Would Awareness comment on and clear up this contradiction?"

COSMIC AWARENESS:

This Awareness indicates that likewise, the Bible also violates the *Law of One*. This Awareness indicates that there are many entities who in certain respect are christed, or christened. This Awareness indicates also however, the example of the entity Jesus as being

seen as much more merciful and loving in nature than was the entity Mohammed. This Awareness indicates however, it must also be recognized that Mohammed, in assisting to create the laws for his culture, did acquire a sense of social practicality which was not one of the responsibilities given to Jesus.

This Awareness indicates that the laws of Moses, and the laws of the Hebrews served the purpose of the secular, or state and social order during the time of Jesus, therefore the entity Jesus did not need to deal with these situations. This Awareness indicates the entity could put all of his concern and attention on the aspects of the soul and spiritual evolution. This Awareness indicates the entity Mohammed as not being on the same level as the entity Jesus, but being in a different role, and seen by many of those who were his peers and followers to be a new leader, messiah, or christed one.

This Awareness indicates that *It* did not intend to give the indication that Mohammed and Jesus were equivalent in their approach to life, or their behavior and value systems.

...FUNDAMENTALISM TAKEN TO EXTREMES:

AN EXAMPLE OF ISLAMIC "JUSTICE"

QUESTION:

In reference to Islamic justice, there was an article on religious fundamentalist extremism, published in the Seattle Post Intelligencer recently, written by Shelby Scates. In this article he says: "The International Herald Tribune carried a gruesome religious story out of Iran recently about an attractive young woman sentenced by an Islamic court to 30 lashes for having exposed her body in a swimsuit. It happened in Tehran. The swimming pool was private, but a middle-aged male neighbor chanced to see the young woman. He subsequently complained to one of the Ayatullah Khomeini's judges, that he had been sexually aroused. This caused the woman's sentence. She died after 15 lashes."

I'd like to ask Awareness if this is an isolated case, or is this actually the type of fundamentalism that is going on over there in the Middle East?

COSMIC AWARENESS:

This Awareness indicates that this as an isolated and unique case, but not uncommon. This Awareness indicates that there are similar experiences along other lines, different from this, wherein many entities are suffering from the fanaticism of that religious dogma. This Awareness indicates that the term 'religion' as that which is hardly fitting, in that the dogma as more representative of a regime. This Awareness indicates however, this not too unlike experiences suffered by Christians some two, three or four thousand years ago, and even in more recent times in some areas. This Awareness indicates that this not too unlike the persecutions which occurred in Massachusetts, or which are occasionally occurring in areas of Ireland, or in other countries.

This Awareness indicates that it appears the bloodlust of entities, the violations which entities seek, the extent to which entities will go in violating another in order to justify their own self-righteous position is almost unlimited, and totally lacking in boundary. This Awareness indicates that some entities will use any excuse to justify such zeal, such beastiality, such violence, such behavior, and whereby they can call this righteous or religious, and glory in their pompous self-righteousness and religious vanity at having destroyed another's life and happiness in the name of good,--such entities are the scum of the earth.

This Awareness indicates *It* shall never cease to be appalled at the cruelty which entities can express to one another for some belief, tradition, or system that in itself has little foundation or value in comparison to those Universal Laws.

WHY SEX IS RESTRICTED IN A SOCIETY

(THAT WICKED, WICKED FEMALE BREAST)

QUESTION:

I don't understand this type of thing. We have seen a similar type of mentality expressed even in some of our members who cancelled their membership for trivial little things like an illustration I may have come up with.* A good example of this is, several weeks ago, *Newsweek* magazine put on its cover an artist's rendition, a painting of the upper torso of some female, showing her naked breasts in this painting, and a large number of their readers cancelled their subscription. And this type of thing that happened with this lady being whipped to death; that it doesn't seem like it's too far removed from the mentality of some entities over here who seem to regard the physical body as something filthy or nasty. I'd like to ask Awareness: particularly over there in Islam, do the males actually suppress any natural desire for the females by veiling them and going to these extremes, or do they really appreciate the females, only in secret?

COSMIC AWARENESS:

This Awareness indicates that entities are entities are entities, and each one may be different from another. A general remark about males as that which would not be sufficient to explain the action of this individual male, or how and why he thought and behaved the way he did. This Awareness indicates that the conditionings which are placed upon humanity in regard to this type of action tend more to be brought about for traditional and social purposes than anything spiritual in nature. This Awareness indicates the control of a society, the control of a people, begins with controlling their minds, and if a society can control an entity's mind, it then can control their behavior in the society and can lead them to do and be what the controllers desire.

This Awareness indicates that as the sexual energies are an energy which is subject to control and has a profound effect when controlled, it is one of the strongest tools and topics by which a philosophy can control the minds of entities. This Awareness indicates that in the use of mind control techniques, whereby entities are deprived from food, the entities can be controlled to behave in a certain pattern by allowing them food for certain behavior, or denying them food for other behavior. This Awareness indicates that this method is used particularly in the training of animals, pigeons and other creatures. This Awareness indicates that this method of using food to control entities' behavior as that which has been used many times in many cultures, but that it is limited in its use, in that entities can become violent and desperate, and rebellious in a culture, if the technique is overused; therefore, it is a dangerous tool in controlling a society.

This Awareness indicates that the rationing of water as another similar type of tool which for similar reasons is dangerous to a society if used. This Awareness indicates that the rationing of property as that which has been successfully used as a way to control entities in a society, and has led to the caste systems,

whereby slaves and landowners existed simultaneously in a society. This Awareness indicates that another potential mechanism would be clothing, whereby those who are favored in a society would receive better clothing than others. This Awareness indicates this also is a mechanism of control in some cultures and societies which has been effective.

This Awareness indicates that obviously, the biological urges associated with excrement and the act of urinating: these cannot be easily controlled in a society except for brief periods for purposes of torture, and therefore, this is not a sufficient control to keep entities in line for any particular length of time. This Awareness indicates the one area which is most available as a means of social control, and which in itself does have reasons to be considered as needing control, is that area known as sex.

This Awareness indicates for social reasons, if sex is not controlled to some degree, entities will become too scattered in their expressions, diseases may spread, jealousies and conflicts may come from the passions released, families could be broken apart, and children abandoned, children created without proper parents, the problem being that the society would be stuck with unwanted children; therefore, these social reasons are sufficient to cause entities who are directing a society to wish some kind of control on this behavior.

This Awareness indicates that even as the body functions of relieving oneself in a society have their particular rules, so that entities unlike animals, do move into those private places for these actions, so likewise society expects certain controls on sexual expression, due to the reasons given. This Awareness indicates that even more than this however, societies, by restricting or loosening sexual expression, are able to regulate the control of a people, of a people's minds, so that wherein the mind of an individual is so rigidly obsessed with the possibility and belief in the sin of sex, the individual remains quite self-centered in dealing with his own sense of guilt, his own sense of lust, his own sense of confusion in regard to those energies; and this, creating a self-centeredness with the individual, prevents the individual from better understanding, or concerning himself with social issues, and social concerns outside of his own immediate urges and circumstances.

This Awareness indicates that essentially, the emphasis on extreme restriction of sexual expression, or even of exposing one's face or body, leg or arm to another, the extreme restriction and taboos created by some cultures is generally intended and successful in keeping entities apart from one another, isolated, individualized, self-centered, with a relationship only to those who are their most intimate acquaintances and to the government itself.

This Awareness indicates that wherein an entity is so isolated as to have few contacts outside of one's own immediate associates, the other contact being that which is the priest or leader, or programmer of the entity's consciousness: this type of isolation technique begins with the restrictive rules placed upon an entity, and presented as a religious dogma, so that entities feel isolated, feel themselves inferior to the higher forces, feel themselves to be judgmental of each other, of themselves, fearful of being judged, and lacking in concern for each other's welfare: this Awareness indicates this creates a very highly regimented society.

This Awareness indicates that wherein a society is not so highly regimented, the fabric and controls of the society tend to loosen and break down, so that if taken to extreme the entire society and its leadership can collapse, but if not taken to such an extreme, then freedom and creativity and invention and individuality can be expressed. This Awareness indicates that somewhere inbetween the extreme rigidness, and the extreme slovenness, there is a happy balance.

How Temperatures of Entities Effect their Relationships

This Awareness wishes to point out a kind of parallel to this issue. This Awareness indicates this may be allegorically stated, that temperature is that which determines and designates the differences between the male and female worlds. This Awareness indicates that this as but allegorical. That essentially, to explain this in a more practical way, this Awareness indicates that essentially, the female as being more warm than the male, and in her action of being creative, she must express warmth, and must be warm. In many ways she may be physically and affectionately warmer, and she may even have a higher body temperature during her times of being creative.

This Awareness indicates that the female actually being more creative when warm than when cold. This Awareness indicates the male, on the other hand, is more creative when he is cool, cooler, not so warm, and because of these differences the male seeks out activities and places wherein he can express himself in a cool situation, separated from human warmth, and even in a cooler temperature in order to bring out his creativity. This Awareness indicates the female seeking to find a warm place in order to bring out her creativity. This Awareness indicates wherein the male seeks to become involved in the world of the female, he must somehow learn to become more warm, not only in terms of temperature, but also in terms of affection and closeness and emotional warmth.

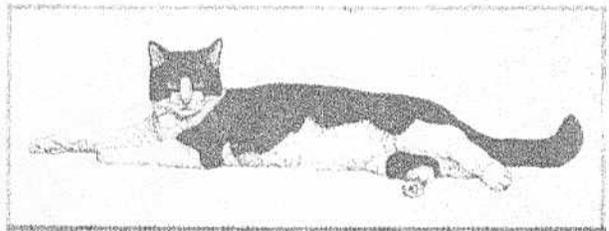

This Awareness indicates that the female, in order to move into the man's world and be creative, must learn how to be more cool, more isolated, more callous or less affectionate, This Awareness indicates therefore, the woman moving into business becomes less feminine in nature, less warm, less affectionate and more rational, mental and business-like, making decisions that are not necessarily gentle or nourishing to another, whereas the man in coming into relationship with the woman's world, cannot remain cold and business-like, but must take on warmth, compassion, understanding and affection in relating to the woman.

This Awareness indicates that wherein a woman wants her man to produce, she cannot expect production while keeping him warm and cozy, but must allow him to have his space to be alone, to be somewhat separate, and to be cool and less affectionate towards her while he is involved in his creative work. Likewise, when the woman is involved in her creative work, the man cannot expect her to remain cold and separate and without attention and affection. This Awareness indicates that therefore, these qualities can be understood and shared and supported by each of the sexes, so that each is more productive and creative, and so that each understands how it can function in the other's world or in their own world, without unnecessary interference.

This Awareness indicates that entities who are having trouble relating to persons of the opposite sex, may be having these difficulties because of not being warm enough, or not being cool enough. That for the female to relate to the male, it is sometimes necessary to allow him to have his individual separate cool expression, and to support that and for the male to enter into a relationship with the female, he cannot expect to impress her with his business know-how, with his egocentric creations, with his aloofness, but must enter into a warm, affectionate, attentive, compassionate relationship.

This Awareness indicates that wherein the male becomes too warm, the female may simply be overwhelmed and want to see some restraint and creativity of masculine nature, whereby the male expresses his own cooler temperature. This Awareness indicates hence entities throw about the slang term: "Keep cool," "Cool down;" "Don't get so hot under the collar", "Don't be so passionate and warm"; these being temperature terms which relate to emotional qualities which need to be recognized and understood as important in relationships between male and female energies.

This Awareness indicates also, the male may feel certain threats when the female enters into his world and is too cold, and too cool, and may seek to "warm up this ice-burg." This Awareness indicates that these energies, when seen in terms of temperatures and relationships based on creative qualities, can be helpful in assisting entities to understand their relationships with others.

ED's Note: Believe it or not, several long-time members of CAC actually cancelled their memberships because of the 'dirty pictures' your perverted old editor has occasionally slipped into this publication to make a point or two. A scathing letter usually accompanied the letter of cancellation. In the stage play and later the movie, "Butterflies Are Free", a self-righteous middle-aged female character was referred to as "that tight-assed matron from Encino," -a term which is also applied by this editor to that mentality that writes me those nasty letters.

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507. U.S.A.
