Paul Shockley,
Interpreter

LIVING TOGETHER IN PEACE....(Continued)

the role of WOMAN

PLEASE NOTE: For easier reading and greater understanding, Cosmic Awareness suggests that the following material be read aloud.

"Frailty, thy name is woman." (William Shakespeare)

HOW TO TAME THE BEAST

(Opening Message, June 9, 1983)

COSMIC AWARENESS:

This Awareness indicates that this reading as being that which is concerned with male/female relationships. This Awareness indicates that this may be entitled: *The Role of Woman.*

This Awareness indicates that the nature of the female, and the nature of the male as being of some difference, wherein the female of the human species being generally smaller and weaker in physical construction than the male, is put automatically into a particular role, whereby through that physical structure she is left to play that role according to her own individuality.

This Awareness indicates that likewise the male, having his peculiar or particular structure, is of a nature whereby that structure creates automatically a physical role for him. This Awareness indicates this is basic and has nothing to do with social trends or social behavior or custom of a society. This Awareness indicates that a male body is constructed for heavier physical work, whereas a female body is constructed for more endurance and for lighter work; this Awareness indicates these facts tend to influence the roles which the entities will play as individuals.

This Awareness indicates that in a general sense, the male being larger and stronger, and the female being smaller and physically weaker, must relate by different rules, and no amount of call for equality will alter this reality. This Awareness indicates that the difference in the rules need not be accentuated or exaggerated beyond their natural proportions however. This Awareness indicates that because of the difference in the physical strength, it is irrational for the female of the species to attempt to win her ways by using masculine techniques.

This Awareness indicates that it is irrational, for example, for a female in coming across an aggressive male, twice her size or larger, as exemplified in the fantasy, "King Kong"; it is absurd and irrational for her to assume she could overpower this entity through physical methods. This Awareness indicates that therefore, as a general rule, not necessarily applying in every instance or every circumstance, the entity can best deal with the relationship not by attempting to be the aggressive partner, but by attempting to be more receptive to that large creature in a way whereby that receptivity pulls from that beast the violence and potential destructive force, pulls that out of the beast and allows the curiosity and interest to come through and to be directed with attention toward that receptive female being.

This Awareness indicates this is the exemplification of the role of the archetypal female, in relation to the archetypal beast known as the male,--the King Kong of the species. This Awareness indicates that in understanding this, men and women, (particularly women), will better understand the way whereby they can have the most influence, most effect over the male of the species. This Awareness indicates that to antagonize the beast, to attempt to do battle with the beast would be absurd, yet there are many who do just this.

This Awareness indicates that when this occurs, the beast in man, being and having the strength that it has, sees this threatening little energy as something which is likened unto a spoiled child, or a nuisance, and can simply, if it chooses, crush the daylights out of it. This Awareness indicates that many such actions occur, wherein the men beat their wives due to this conflict between the male and female.

This Awareness indicates that it behooves the female to better understand her role in taming the beast, for the female in a family is the one who holds the power. This Awareness indicates that the greater power over the family is not in the one who has the strength, but in the one who *controls* the one who has the strength. This Awareness indicates that the role of the female is to control that force within the male which holds the strength, and she controls that force not through the use of masculine directives, commands, or insistence; but through the use of love, compassion, a willingness to listen, a receptivity to the male's energies, whether she agrees with them or not.

This Awareness indicates that this King Kong creature within each man, this beast which needs to be tamed, this beast is that which has the capacity to destroy, to devour, to utterly devastate villages, cities or nations, yet this beast within man also can be tamed by woman. The force that is the most powerful force in the universe, operating through woman, who is master of this force; this as the force of love, which is not a force that is projective in nature, whereby the male is attacked by love, but rather is a force which waits, which opens, which allows, which allows the penetration of the male entry, which allows the penetration of the male's energy and expression; whereby the male tells her of all of his troubles, of all of his feelings, of all of his experiences which have led him to be what he is, and she waits and she listens and she absorbs and hears these stories.

And as he tells these stories, and expresses this information about himself, giving her his feelings, giving to her all that is inside his soul, allowing her to receive and to do what she will with what is within him; he becomes her prisoner of love. This Awareness indicates he makes himself vulnerable to her; that inner part of him which is

his inner self is without covering, is without shield, and he gives himself openly to her; and she, taking this information, is able, if she chooses, to hurt him, to harm him, even to destroy him, to drive him to drink or to suicide, or she takes this information and uses this to encourage him, to understand him, to help him to become more than he is, to get him to see that he is capable of climbing to great heights, and even though there are forces which would attack him, which would cause him to fall; still, there remains with him the love of this entity, the understanding which this entity has received from his sharing of those inner feelings.

This Awareness indicates that this entity, woman, is one who can raise man to be more than he ever imagined himself to be capable of ever being. This Awareness indicates that woman is the key. Through her receptivity, through being open, through being willing to listen, and to share her insights only when the man is willing to open himself to hear her insights. This Awareness indicates that it is not for the woman to insist that the man listen, for the male is of a different species, a different type of thought order, and the male cannot easily put himself into a receptive position when being attacked by a woman.

Therefore, it is much more efficient for the woman to express herself when the man wishes to hear, is open to feedback, is willing to listen, is sensitive to her feelings. This Awareness indicates that this does not mean that the woman under pressure, wherein she herself cannot keep from expressing her own urgencies; this does not mean that she is not permitted or allowed to scream in her fear of the beast, for that screaming may be a great reflection of the beast to itself, so that it becomes aware of its own power to frighten, and the need to be more gentle.

This Awareness indicates that the role of woman is to remind man of her frailties and to seek from man his protection, and to give to man the feeling, the inspiration, and the position of being one who is important to her. This Awareness indicates in this manner, the woman controls the man and controls the relationship, and the only role of the man is to provide the woman with the protection and the sustenance and the needs which she requires to fulfill her role toward man, and this Awareness indicates that these mutual roles compliment each other, whereby the male then, in his urgings, his passions, his aggressive certainties, his specializations, his absolute self-assurance; finds himself willing to let go, relax, and simply move into passive appreciation of this creature before him known as woman.

This Awareness indicates that wherein the woman has that need for self-expression, wherein the woman seeks to assert certain energies within herself for creative purposes, or for social purposes, and the beast grabs her possessively, holds her, will not let her express herself or move from here to there, captures her with physical force; this woman then must understand that if she wishes to continue the relationship with this beast known as man, she must train the man, even as a mother trains the child, to have faith in her, to trust her, to become aware that she will not run away, will not leave him simply because he removes his grasp upon her.

This Awareness indicates that those women who misuse love, who take love and capture men, or capture their treasures, or capture their energies,

This Awareness indicates that as the woman weans this child in the beast so that he lets go of his grasp upon her, she is then free to come or go, and may, if she chooses, break his trust, be disloyal to him, move into relationships with others; either outwardly, openly and spitefully, or with great deception and secretive activities. This Awareness indicates that having this choice, the woman has the control over the relationship in the sense that she can break his trust, or strengthen his trust and faith in her.

This Awareness indicates you may ask: "But what of the unfaithful man?" This Awareness indicates that down through the ages, the tradition of the human species has allowed the man more freedom to wander around, and has been very demanding on the female. This Awareness indicates that this too as that which needs to be considered and looked at carefully, in view of the woman's role. This Awareness indicates that wherein the beast becomes dissatisfied with the woman, it generally is the result of a feeling within the beast of some kind of inadequacy, wherein he must prove himself to be a man, to have control of his life, to have power.

Woman as a Soul-Catcher

This Awareness indicates that wherein the woman strips the man of his sense of personal dignity, wherein she leads him to feel he is an inept creature,--not mature, not developed properly...he feels himself inadequate, and will look elsewhere for that female who will make him feel more worthy of being called a man. This Awareness indicates that wherein she, being aware of her great power over this beast, wherein she recognizes that all he needs is to feel himself as being worthy of her and worthy of being called a man, she realizes also that she has the ability to give him that assurance that he is worthy and that she is devoted, and in this manner, she prevents the entity from developing the wandering eye, or from desiring to look elsewhere to prove himself a man.

This Awareness indicates that the woman holds the power in the relationship of man and woman, and wherein woman understands the use of this power, she can keep the relationship, mold the relationship or destroy the relationship. This Awareness indicates the only recourse for man is to learn how to become vulnerable and sensitive and willing to surrender his own bestial instincts to the energies of love.

This Awareness indicates that some men must lose their loves. Some men lose their loves in order to discover true love. Some men lose their loves and lose their lives in pursuit of that which cannot be. This Awareness indicates that all men must learn to let the beast rest and to become more sensitive to the energies of love which are the forces controlled by woman.

or capture their hearts, simply for their own personal use, for the power they have over their minds, their hearts, their treasures, the possessions; those women who use their love to capture these beasts, are likened unto the black magicians who hypnotize animals, and in so doing, create for themselves a karmic afterlife in which they are long bound to those animals which they have hypnotized and cannot be freed from those animals until they have released the spell which they cast upon those animals.

This Awareness indicates that likewise, the females who have seduced men for their own uses, who have used love without sharing that love; those females who use their feminine attributes to reach out and grab and catch and hold and cling and suck the life from the male, such as occurs with the scorpion, wherein the female scorpion devours her lover; those females who use this energy in this manner, the energy of love to possess and extract the energies of another for their own personal gain, these entities are likened unto the black magicians, and will, likened unto these black magicians, be bound as servants to these males, whether one or more, until the energies are again balanced and the male is freed from woman, and whereby the relationship can be equal and sharing in love.

Another Cause of Homosexuality

This Awareness indicates that there are today many relationships whereby the male and female are karmically brought together because of feminine entrapment during a previous lifetime, whereby the male is caught by the seductive juices of the female who attaches herself to his soul and has not freed the man from this obsession, whereby he seeks relationship with her once again in this lifetime in order that he may extract his soul from her.

He may believe that he is seeking a close relationship with her, but in actuality may in fact be seeking to extract a portion of himself which was taken in a previous lifetime. This Awareness indicates that this also, whereby entities attach themselves to each other's souls in one life through sexual relationships or intimacies of misuse of love, this also has bearing on many of the homosexual incidents whereby two entities, possibly having been male and female in one lifetime, reincarnate into the next lifetime as the same sex, come together and discover that they have some karmic needs which must be clarified or balanced, and may find that this, not fully understood, or not understanding how to extract themselves or balance this karmic relationship, may find themselves in a homosexual encounter.

The Influence of 'Mama'

This Awareness indicates that there are many relationships today wherein the male is hostile toward his female mate and part of this hostility may be due to either encounters from a previous lifetime, or to aberrations of the present lifetime whereby the male is transferring his hostility and fear of woman from one lifetime, or from one creature in this lifetime, to his mate. Many men, carrying from childhood the fear of mother and her disapproval, along with the great expectations of mother and what she wanted from them, meet their wives with these childhood fears and uncertainties and project upon their wives or mates the image of their mother, that which they loved in their mother, which they depended upon in their mother, which they expect out of womankind, and also project upon these gentle creatures the fear of displeasing and the fear

of being criticized by these creatures in the way that "mama" did, of the guilt which "mama" used to make the entity behave, whereby the entity was caused to feel guilty for making "mama" cry, or the punishment which "mama" could find to inflict through various means, such as the threat to tell "daddy", which creates for the entity the fear of authority and the feeling of paranoia which over periods of time can increase greatly.

The use of threats, the use of guilt and the tongue lashings which berate the male into making him feel that he is less than a worm in comparison to the other males of the universe, this relationship which the male has with his mother is that which is carried over into his relationships with his mate and with other women. The woman who understands this, who understands that the male wishes her to be his mother, to be his conscience and to be his lover, and to nourish him and nurse him when he is in need; the woman who understands this, understands also that there will be those moments wherein the beast, this male, will act like a spoiled child, and will need the discipline which the mother can give.

Thus, the female again holds the power. Wherein she realizes the power she holds, she can use this wisely, or misuse this power. She can establish her own control over this male through the use of communication, sharing, her ability to give or deny favors, give or deny service, and her ability to nourish or deny nourishment, whether of a physical, emotional, or psychic nature.

Castrating the Male

This Awareness indicates that she even has the ability to give herself or deny herself in terms of her presence, for she may also leave, or may remain, according to her choice.

This Awareness indicates that having these options, she holds the power and is able to influence, even as a mother can influence the child; but wherein this entity chooses to use threats, chooses to use the force of guilt, causing the entity to feel unworthy, inept, not of any maturity, causes the entity to feel that his immature behavior is less than a worm in comparison to other males; wherein she compares him to his father in heaven, or his father on earth, or to her father, or to others who are more capable; the entity feels emasculated and lowly and unworthy and guilty, and she has essentially dethroned him and castrated him, and therefore, she has the power to toss him aside and leave him, if she so chooses.

The male, knowing this, can be greatly humbled and desire, even as a small child desires, to get back into the good graces of his mother or his mate and may do whatever is reasonable, so long as he does not lose his further dignity, to get back to the good graces of his mate. This Awareness indicates that the female, like any good mother in raising her child and taming the beast within, must eventually wean the man so that he is no longer dependent on her for everything, so that he learns how to pick up his own clothes, clean up his own mess, go out and make his mark in the world, take care of himself without leaning on her for emotional security or for physical security, and whereby she provides for him a home whereby he may return at any time that he needs to return, or whereby she allows him to pursue his purpose, his career, and to explore the world according to his own level of responsibility, so long as he remains tame, and the beast does not go wild again.

This Awareness indicates just as a mother trains her child, she must be aware of his outside activities: where he goes, what he is doing...but rather than spying on the child, the mother creates an air of trust whereby the child tells the mother everything that occurs, and whereby the mother is never threatening to the child, for if she became threatening to the child, the child would no longer confide in her or tell her of those activities that occur when she is not there.

Man's Only Hope

This Awareness indicates that in building trust, the mother must always be open to hear what the child says, and then must help the child to evaluate and to understand the situations in which the child has adventured. This Awareness indicates that likewise, the female must always create a trust in the relationship whereby she trusts the man, not because he is high and noble, but because she has created a setting which allows him to be open and unafraid of her, and willing to share with her his experiences and to tell her of these experiences.

This Awareness indicates that deception occurs only when an entity feels threatened at getting caught or being seen. Wherein there is no threat, wherein there is only the openness to discuss, then deception is not necessary and open discussions occur. This Awareness indicates the role of woman is such that she holds the power over men. That the only hope of man in this relationship is to tune himself into that force, --that force,--that force which fills the universe, and to learn how to use that force, that force which women hold and can use as masters: --that force of love.

And whereby man attunes himself to the force of love which fills the universe, man then can be freed from his entrapment in matter, in mother, and can be One with the Creator, which is the force of love; and female energy, in this sense, will have brought back man from his adventure, to his source, to his home, to his domain where, together, she and he rule as One with God.

This Awareness suggests that this as the conclusion of this reading, that the Interpreter be brought from trance.

'Frigid,' eh! All right, old boy, for that remark, there goes September, too!

IS COSMIC AWARENESS ANTI-AMERICAN?

(WHAT IF C.A.C. WERE MOVED TO RUSSIA?)

(Opening Message)

COSMIC AWARENESS: Jan. 21, 1984

This Awareness indicates that entities who have been reading the messages from this Awareness for a considerable length of time might tend to assume that this Awareness was expressing information that is essentially pro-Russian, for It has given much information in regard to activities of the United States, particularly in reference to the First-Strike option and similar types of military intrigue, political intrigue, that for some entities might sound like this Awareness was speaking in favor of the Russians as opposed to the United States.

This Awareness indicates that It wishes to clarify this issue and to present a better understanding of the reasons why this Awareness addresses the faults or errors of the United States in its foreign policy but does not focus as much on the errors of Russia in its foreign policy or in its internal system of control over its people. This Awareness indicates that because the Interpreter is located in the United States, and most of the members of the Cosmic Awareness Communications are located within the United States, it follows that any influence this Awareness might have through this Interpreter would also be an influence affecting entities within the United States.

This Awareness indicates that it would do little good for this Awareness to point out the errors in someone else's family to those within a particular family in hopes of creating better understanding and better relationships between the two families. This Awareness indicates for example, if this Awareness were to enter into the home of the Hatfields and begin discussing the faults of the McCoys so that the Hatfields simply had more ammunition in their arsenal for becoming more angry or more critical of the McCoys; all this would do is to polarize the conflict even further.

This Awareness indicates however, if this Awareness entered into the household of the Hatfields and began to discuss the errors in the war-planning of the Hatfields, and how this could lead to great harm to not only their enemy, but to themselves and others, and that this is foolish to continue; the influence on the Hatfields would be aimed toward themselves and their own behavior and would not be aimed in a manner that would polarize and increase greater hostilities.

This Awareness indicates that were this Awareness and this Interpreter and the CAC operation to be transported to Russia and to have the opportunity to give readings of this nature, which in fact it probably would not have such an opportunity; but if it were possible, then the tone of these messages would be aimed more toward the Russians, attempting to talk them into a deeper understanding of the errors in their approach toward international crisis and toward the curtailments of freedoms within that country.

This Awareness indicates that in the Soviet Union there is much less political freedom, therefore, readings such as this would be highly unlikely, would be much more difficult, and this Awareness indicates that it is deeply appreciated that there is the opportunity in this environment, in this nation of the United States, that freedom of speech has been made possible, that freedom of religion, and freedom of assembly are still possible, and for these, this Awareness wishes to suggest that entities always hold these in high

value and to appreciate these freedoms and the Constitution which allows these freedoms, and any support from any areas of government which continue to allow these freedoms, for entities in Russia would dearly love these freedoms.

This Awareness indicates that if this operation were transported to Russia, this Awareness would need to communicate through *Its* Interpreters in a totally different way, according to the environment there so as to be able to have any expression that would not be censored by the government. This Awareness indicates that *It* is fully aware that there are many wonderful freedoms in this country of the United States and wishes entities to not forget these benefits that are part of the privilege of being members of such a society.

This Awareness indicates that because entities in the United States *do* have the opportunities to speak out, it is even more imperative that they speak not only for their own interests, but for the interests of entities in other countries who do not have that freedom. Too many Russian citizens would not be allowed to criticize their government and could be imprisoned for such. This Awareness indicates that entities in this country should not hesitate if they so desire, to write to the Russians and express their indignation or criticism toward any activities which they feel are wrong or denying the citizens of Russia from their rights.

This Awareness indicates that wherein an entity within a country cannot criticize its own government, but wherein outsiders, citizens of the world can write to those leaders and suggest giving their people more freedom, more political freedom; this can be of great benefit to those entities within the country who cannot speak for themselves.

This Awareness indicates that *It* has previously noted that the people of the United States have greater political freedom but are economically oppressed, whereas those in Russia often have greater economic equality, although the standard of living may be lower than that of the United States, they have greater economic equality and rights, but have fewer political rights. This Awareness indicates that this as the way these two governments function; that the Russians are much more serious in their concern and focus on the government itself as being the system or the mechanism by which the citizen can be served.

This Awareness indicates that the United States and the approach given in the Constitution as that which focuses on the individual and attempts to present rights of the individual so that the individual has the greatest opportunities possible within a society to develop whatever can be developed from his or her potential. This Awareness indicates that this is the theory, even if not the practice, for in many practical cases the individual has few opportunities to develop and is a victim of society just as in any other system which does not offer such opportunities in its charter.

This Awareness indicates however *It does* wish to clarify that *It* is not any more pro-Russian than *It* is pro-American; that in fact, *It* is pro-human if *It* must be labeled (any label) at all. *It* is pro-life, and *It* is opposed to tragedy, sorrow and suffering. This Awareness indicates that *It* is not pro-Communist, *It* is not pro-Capitalist; *It* is for that which gives the greatest good for all involved. This Awareness indicates *It* is not for that which gives the greatest good only for the few elite, or only for the greatest number at the expense of the few. *It* is in favor of that which gives the greatest good for *all* involved.

ARE THERE ANY PAUL SHOCKLEY TYPE TRANCE MEDIUMS IN EUROPE & RUSSIA? (MORE ON HOW AWARENESS EXPRESSES ITSELF)

QUESTION:

Awareness, through the entity Ralph Duby some years ago, the Awareness indicated that *It* was speaking through other channels in other countries, at least 5 in Europe and one in Russia I believe. Is there in fact at this time this type of channeling as is done through the Interpreter Paul Shockley being carried out in any other country than the United States?

COSMIC AWARENESS:

This Awareness indicates that *It* works through different entities in different ways; that through the Interpreters of Russia, *It* will work through an entity in a manner whereby the entity presents poetry, or song, or dance, or decisions of a level which reach out and encompass human rights. *It* may speak through the mind of the politician in Russia, through the party member or party leader, or through the artist or through the teacher.

This Awareness indicates that at present there are many entities in Russia who are channeling this Awareness without necessarily calling their channels 'Channels for Cosmic Awareness'; they are simply open to the Universal Mind and expressing the energy of the Universal Mind in the way that they are best suited for such expression. This Awareness indicates likewise, there are many others in various parts of the world who are channeling from the Universal Mind; that more and more entities are becoming open channels for the Universal Mind; that very few use the technique or method of moving into a trance state and allowing their mouths to speak for this Awareness; most express themselves, express the energies from the Universal Mind through those skills and talents which they have developed, either as politicians, as business persons, as artists, speaker, musician or dancer, or in some other field of endeavor.

This Awareness indicates that *It* truly wishes that entities would not confuse this particular way of communicating upon this plane with being the only type of expression that this Awareness conveys on this plane. This Awareness indicates that there are a great number of psychic channels in the United States and Canada, and many appearing in Europe and others in India and in the Orient, and also in Russia, and many of these psychic channels do channel from this Awareness to one degree or another; sometimes very clearly; in other cases only slightly, and perhaps allow other energies to be channeled.

This Awareness indicates that there is no way to describe what particular area this Awareness channels through for *It* channels through anyone who is open to the concept of love, universal harmony and the attitudes conveyed in the Universal Laws which this Awareness has given. This Awareness indicates that wherein entities have a feeling for these Laws, the Universal Mind can channel energies through them.

This Awareness indicates that *It* wishes entities

How the Dark Force is Coming into Light

to understand however, that anytime an entity becomes a channel for good, a channel for Universal Mind, for concepts of unity, harmony and love, a channel for Light upon this plane; the Dark Forces will attempt to do whatever can be done to hinder that Light, and the Dark Forces will find any area of weakness in that entity's life or in the energies surrounding that entity, and attempt to use those areas of weakness to get to the entity, to stop the channeling.

This Awareness indicates that the entity who remains focused upon the Light and who deals with the weaknesses not in a way that condemns the weaknesses, but in a way that strengthens the area to heal the weakness; that entity, in continuing to hold to the Light will defeat any efforts of the Dark Force, and will grow stronger as the Light grows stronger also.

This Awareness indicates that the process of increasing the power of the Light upon this plane is the process that is causing the Dark Forces to be spread more thinly and to have more effort in covering those areas or attacking the Light. This Awareness indicates can you imagine Dark attempting to overpower Light, which keeps increasing, and is popping up everywhere at an alarming rate, and the Dark Force continuing to put out the Light? This Awareness indicates that after a while it becomes impossible for the Dark Force to exist,

le alone put out any Light other than to express itself as Light which has been placed upon it, for as the Light increases, the Darkness surely will be brought into the Light, and the Light will cause the Darkness to fade and itself shall become enlightened.

This Awareness indicates that there are those who say that Darkness rules the world, but there is that Light which overpowers the Darkness, and in all things Light continues ever and always in the universe and reaches even the darkest areas. This Awareness indicates that those who seek to hide in the Darkness can only survive by feeding off of the Light of others, and thus must come to the Light for their sustenance,--so how is it possible that entities can say that Darkness rules this universe, when those Dark Forces must feed off of the Light of others?

This Awareness indicates that essentially, Light will reach the Darkness, regardless of where it may be.

HOW MAGNETIC ENERGY HEALS THE BODY

Is The Polarizer only a Placebo?)

QUESTION:

(Jan. 22, 1984)

We received an unsolicited letter from a lady who is not a member of CAC, and it mentioned several things I'd like to ask Awareness about. I'll read part of the letter. She writes:

"Our friend, L.B. has for a year, since October, 1982, let us and myself, lay under her Polarizer, which I have done quite a bit. I could hardly hear. I now have good hearing. I had lost at least just one-half of the use of my hands and could not use a regular pen. I now can even hold a needle.

"I have bursitis and arthritis in my spine and shoulders and knees and feet. I also fell often. I seldom fall now and it has helped my spine and knees. I believe your Polarizer used daily would help me further. My husband, on September 30, 1983, had a seizure, a heart attack and stroke all in about 10 minutes. We thought him dead. We took him to the Grand Junction VA Hospital and he was in intensive care for 3 days. He was 67 then, now he's 68. The doctors sent him home, not able to be left over 5 minutes alone.

"He was very confused and got lost in his own house. He had trouble talking and thinking. His moving was very slow. He has only been laying under your Polarizer since late August of '83. He can now carry on a conversation with some people. He has shown improvement so much, his doctors have all agreed he is remarkably better, and they are anxious to see and follow his progress. My doctor also is aware of my use of your Polarizer. We are enclosing a check for \$100, and as soon as you notify us a Polarizer is ready for shipment, we will send you the balance."

And she goes on. Now, my question is: all these various things that she believes the Polarizer is helping her in; is this indeed actually the Polarizer helping in fixing these physical problems, or is it acting as a placebo? Awareness has mentioned many things the Polarizer is good for in the healing area, but I don't recall these were discussed.

COSMIC AWARENESS:

This Awareness indicates that to some degree, any type of effort one puts forth to heal oneself does have a suggestive force which can be helpful; if it gives any hope for healing at all, then it will have some slight effect, depending upon the strength of the hope. This Awareness indicates however, that

that of a placebo. This Awareness indicates that the magnetic field set up as that which affects the aura and as that which allows for the polarization of the energy field around the body in such a manner as to assist the body in its own recuperative powers.

This Awareness indicates that contrary to what many people would suspect, the greater magnetism, the higher gauss does not necessarily mean that the machine is better as a polarizer. This Awareness indicates the body aura tends to reject or fight against heavy magnetic currents whereas it yields more readily to the gentle subtle magnetic field, thus the weaker field tends to have a greater effect on the aura, whereas the stronger field may have a greater effect on the physical body itself, but in this type of healing the Polarizer works on the aura, which in turn affects the physical body.

This Awareness indicates that this may be compared to the principles of homeopathic medicine in which the weaker the substance, the stronger it is as a homeopathic medicine; for the homeopathic medicine works on the electrical body, the aura, the magnetic field around the body, rather than on the physical/chemical body. This Awareness indicates that a homeopathic medicine is made by reducing a substance, reducing it by dissolving the substance in water, then reducing that even further by dissolving it in more water, and continually working with the substance until the desired strength of the weakening of the substance has occurred.

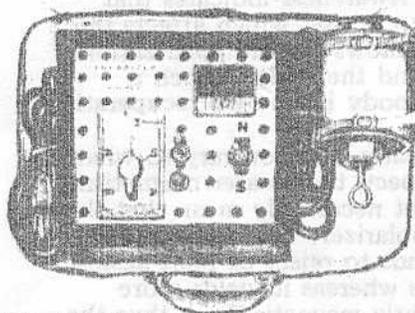

When this vibration of this substance is then implanted in the body through tablet or drops or injection, the homeopathic medicine essentially has practically no substance of the original quality in it and is essentially considered as pure; this if in water would be likened unto pure water, yet there is that refined amount, miniscule portions, enough to set up a vibratory field around the drop of water which when ingested within the system, merges quickly with the aura and spreads, giving the aura its own medicine or the field which is necessary for the aura to act in accordance with the purpose of the medicine.

This Awareness indicates this is much likened unto the Bach Flower remedy also, wherein the dew drop is taken from the flower and is reduced down by adding distilled water so that any essence of the flower which is in the water would be almost immeasurable, yet the Bach Flower remedy, by being reduced in this manner when given to an entity, sets

up a vibration in the electromagnetic aura of the entity which in turn affects the attitudes, which in turn affects the physical body.

This Awareness indicates that likewise, the Polarizer as that which has its effect, not through the strength of magnetism, but through the vibrations on the aura, and the weak magnetic pulsation as that which is most easily accepted by the aura. This Awareness indicates that this is obviously opposed to the orthodox concepts of magnetism and of what one would suspect is good for an entity, helping to heal, then more should be better.

This Awareness indicates that obviously this concept has its limits; that if one takes an aspirin to rid oneself of a headache, taking a full bottle of aspirin would not make one feel elated or euphoric or extra-good. This Awareness indicates that likewise, an excessive magnetic field, particularly when in square to another magnetic field, two magnetic fields at a 90 degree angle, with high gauss, has been known to kill entities. This Awareness indicates that it is not the intensity or power of the magnetic field that is the key to the healing process. It is the acceptability by the aura of the magnetic field that allows the aura to be influenced by that magnetic field and the aura itself is that which affects the physical body to bring about the desired results.

THE POLARIZER
AS A
RADIONICS DEVICE

QUESTION:

Awareness, we've got a new member back East that ordered one of those Polarizers, and he wrote and told us that we're doing a disservice to the membership. He claims he's an electrical engineer, and the Polarizer is a fake and it does not work, and both Sam and myself have written him, and he was refunded for the machine and told to ship it back, and he never did, but I'd like to ask if there's any validity to his argument. He claims the pulsating aspect of the Polarizer, (I believe that was his argument) that it doesn't do any good, that a common magnet, if it does anything at all, would be just as efficient, and far cheaper.*

*ED's Note: the entity referred to in this question is a new member in Toledo, Ohio, who ordered a Polarizer, and then started telling other CAC members in his area that we had ripped him off, that Sam's Polarizer was a fraud, cheaply made, and couldn't possibly do anyone any good except maybe as a suggestive force. He ranted and whined behind our backs for several weeks, telling other members how CAC had defrauded him and that he was going to report us to the authorities etc. Vicki patiently wrote these entities back, telling them to tell him all he had to do was write directly to us or Sam if he had any complaints or to just ship it back for a refund. Evidently they passed this info on to this person, for shortly thereafter, CAC received a letter from the entity. It seems he had placed a compass 3 feet away from the magnet and it didn't move it even one degree, proof to him that the Polarizer was a colossal fraud perpetuated by Sam Millar and that CAC and those who purchased one were all being 'conned'. He likened the Polarizer to something a kid in a Science Fair Project might put together. (He also mentioned that he was manufacturing magnetic devices for a lot less that would do much more, and suggested that CAC would be wiser to sell his permanent magnet polarizers.) His letter threatened Sam with charges of 'mail fraud'

8. etc. and that he would make sure that CAC members would be informed of Sam's cosmic con game. He also stated that if CAC refunded his money he would ship the Polarizer back within a week with no further hassles. It was a very intemperate letter to say the least. Both CAC and Sam patiently answered his letters, suggesting he read the books on magnetism available and what Awareness has said about the difference in permanent and pulsating magnets and their effects on the human aura--a part of an entity that must first be healed before the human body can be healed etc. We also told him he was a rude person in his delivery and was making all kinds of judgments without checking out the facts. We told him to simply return the Polarizer and enclosed a refund check in full, less freight charges. That was 3 months ago. He never did return the Polarizer as he promised, but Vicki said the check cleared several months ago. She has written him several times asking why the Polarizer has not been shipped, and if he decided to keep it, we would like to have payment for it. To date the entity has ignored her letters, keeping the Polarizer and the \$495 refund. Being a new member, the entity does not understand that CAC is often in a tight financial situation and that \$495 could make the difference between the membership getting a mailing every 2 weeks or not getting a mailing every 2 weeks. We often are operating that close to the wire. As to all his charges, all we can say is that Sam's Polarizers have worked well for us here. When I sprained an ankle, the pain and swelling disappeared so fast my doctor was astounded. I also use it to cure my insomnia. We also use it during all Paul's monthly trances here and he is able to remain in trance sometimes over 3 hours, wherein before the limit was one hour. Also we have many letters from members stating the benefits they have received from their Polarizer (the above being but one example, this from a non-member). CAC is not in the Polarizer business, but makes these available as a courtesy to the membership per instructions from Awareness. The Polarizer is a product of Sam's Church of the Infinity and is used in healing. He also tithes 20% of the sales of these instruments to CAC

This trouble-maker, by the way, is the same entity who raised all the hell about the illustrations used by CAC as mentioned in No. 44-4. This same person started harassing Paul by phone, ranting for hours on end over these matters, keeping Paul from important projects he is working on. He also demanded an immediate personal reading from Paul, going over the heads of CAC and dozens of members who have been waiting in line for months for a reading. To get the entity off his back, Paul relented and gave the reading. In addition to this entity's personal vendetta against yours truly, the editor, and mailing out phony and slanderous 'petitions', his latest claims that Sam and CAC has 'ripped him off', defrauded him etc. is a rather strange song to be singing, for HE is the one who was refunded for the Polarizer; HE is the one still using the Polarizer; and HE is the one went back on his word. He claims to have his own 'spiritual' organization there in Toledo and his subjects are 'watching CAC like a hawk'. Okay. We simply suspect the Alien Force has merely found another vulnerable entity and is again trying to disrupt the energies of CAC and the Awareness messages. We hope you magicians out there will direct some Light to Toledo to help this unfortunate entity change his attitude. And let's pray his dualistic mind never comes across the D-Cell. Thanks. (Avaton).

COSMIC AWARENESS:

This Awareness indicates that a regular magnet as that which can be beneficial. This Awareness indicates that the pulsating effect as that which allows the aura to be moved, to be stirred. This Awareness indicates this vibration set up by the pulsation as that which has an effect on the aura in the sense of a shaking or of a breaking up of static energies in the aura. This Awareness indicates that this in itself allows the frequencies of the magnetic field to penetrate the aura more effectively.

This Awareness indicates however, that the small magnets can be beneficial also, and that entities who cannot afford the cost of the Polarizer should find the small magnets as being quite helpful and a reasonably good substitute, although these are not quite as efficient in affecting the aura. This Awareness indicates that there are areas in the field of magnetism which many of the experts in electronics are not aware of. This Awareness suggests that the field of radionics as that which is approaching a greater understanding of these more subtle energies; that there are entities working with the concepts of radionics and principles involved in radionics which are not understood by the electronic industry, yet these have been proven and are used even by government agencies; that the basic

principle in radionics is that which the electronics industry has not fully grasped and does not even yet understand.

More on Radionics & Psionics

This Awareness indicates that the basic principle in radionics being that which this Awareness has previously described, relating to fields of energy that are not measured electronically, but which deal with the frequency of the individual in subtle levels, a kind of vibratory frequency, which, when communicated with by frequencies of a sympathetic nature, can convey messages, or can have an influence on the consciousness of the entity itself, whether this frequency comes from actual contact with the entity or from contact with a part of the entity, such as a hank of hair or fingernails, saliva, or a blood sample, or a picture of the entity, or the signature of the entity.

The field of radionics also encompasses areas which are termed now as psionics, wherein with but a very slight current of energy and coils, healing devices can be made which affect the aura, but which in time affect the human body. This Awareness indicates that there are entities who have already built some of these devices, and have proven these effective in healing; many of these devices being simple to build and operate, working with extremely subtle energies.

This Awareness indicates that many of these devices must be used secretly because the FDA considers them to be fraudulent, as the principles of radionics are not understood in the more conventional levels of electronics. This Awareness indicates that entities seeking to understand these various things should keep their minds open in order to learn what they can for wherein entities fail to keep their minds open, obviously they close off any further learning.

This Awareness indicates that this is what occurred in connection with the field of radionics approximately 30 or 40 years ago; the electronic engineers and scientists made a quick assumption that the principles of the entity Abrahams, and Ruthdown, and Hieronymus* and other entities in this type of radionics experimental research were in error, and therefore they labeled this as fraudulent and as being unscientific, and without further investigation, turned their back on this research, but the research went on outside the field of orthodox science until it reached such a state that orthodox science is now being forced to recognize that something there is real.

* Phonetic spellings

Boiling the Brain with Psionic Weapons

This Awareness indicates the Russians have investigated these areas in great depth, in great detail, and have perfected various types of radionics devices. This Awareness indicates that it could be said that the next war is more likely to be a psionics war than a nuclear war, for these psionics weapons have been developed to such a degree that they can actually boil people's brains, if such were to be implemented, cook a city, melt a tank, or melt an entire infantry.

This Awareness indicates that these psionics devices are not something which orthodox science can ignore much longer. This Awareness indicates likewise, those activities, energies, inventions associated with or using principles similar to psionics and radionics, are at a state whereby they will soon be recognized as having some validity. This Awareness indicates there was a time when scientists rejected concepts of vitamins. It has only been in a recent period of time that vitamins have been considered acceptable as a scientific concept for bettering one's health.

This Awareness indicates that essentially, science which one likes to perceive as being in the forefront of discovery, often is lagging and waiting for others, for individuals, for inventors, for the explorers who

discover, research, invent, create new ideas and concepts, and often science is the first to criticize and the last to accept as valid the ideas of these pioneers. This Awareness indicates that at other times, science is at the cutting edge of discovery.

This Awareness indicates that essentially, there are areas regarding the Polarizer which are not easily understood. Even the entity Sam Millar, who has put this together, working with principles from research done by others; this entity does not fully realize the implications and the connection between this instrument and radionics. This Awareness indicates the entity Sam Millar does not believe radionics as having any validity, and would consider this a fraud, and yet the machine which he has created, the device which he has created actually operates best with a weaker field and thus, is to be categorized as an instrument bordering on, or utilizing one of the principles of radionics, for it affects the aura rather than having a direct effect on the physical body.

For more information on magnetism and the Sam Millar Polarizer, please refer to 'Revelations of Awareness No. 80-2 (\$3.00); 80-8 (\$3.00); 80-9 (\$3.00); 80-24 (\$1.00); 81-6 (\$3.00); 81-23 (\$3.00); 82-16 (\$3.00 from CAC.) Sam Millar is still manufacturing Polarizers for the CAC membership. Write to CAC for prices and other information if interested.

WILL THE D-CELL PURIFY POLLUTED STREAMS?

QUESTION:

A question from D.C., of Sunnyvale, Calif. "I do a fair amount of backpacking in California's Sierra mountains, and within the last two or three years there has been a problem of Giardiasis (I believe) in the stream water. It is caused by Gierdia Lemlie, a protozoa. I would like to know if the D or S-Cells are effective against Gierdia?"

COSMIC AWARENESS:

This Awareness indicates that it appears this can be effective to some degree, but not entirely. This Awareness indicates that this water should be boiled and may also be filtered. This Awareness indicates that the use of the S Cell or D Cell in relation to this as that which can assist in reducing this approximately to one-half its potency. The effect not being sufficient enough to rely entirely on either the D Cell or S Cell. This Awareness suggests that a filtering device as that which appears to be the solution. That following this, the S Cell and D Cell could be added also.

"Uncommonly absorbing."

—Newsweek

The Single Integrated Operating Plan (S.I.O.P.) is so secret it has its own security classification. Here, documented for the first time and based on high-level interviews and personal research, are the sobering, startling facts concerning America's preparations for a nuclear war. A hair-raising book about an aspect of U.S. war planning that so far has escaped popular attention.

MANY NEW HEALTH PRODUCTS
NOW AVAILABLE & MORE COMING!

(Closing Message)
July 15, 1983

COSMIC AWARENESS:

This Awareness indicates that in the last few months there have been a series of new products made available for entities. This Awareness mentioned Evening of Primrose oil and its effect on hypertension by reducing cholesterol and triglycerides from the system. This Awareness indicates that this substance works very quickly in this manner and has no side-effects.

This Awareness indicates that there is also a substance which similarly cleans the blood of triglycerides and cholesterol, this being known as Butcher's Broom. This Awareness indicates that this as an herbal substance which also has no side-effects when taken as indicated in reasonable amounts. This Awareness indicates that the combination of amino acids for losing weight and for building muscles, along with those products mentioned this evening in this reading.

This Awareness indicates that the use of linseed oil to cleanse the bloodstream and reduce risk of heart attack; this linseed oil as that which serves as a kind of flushing oil to bring about a cleansing of the general system, removing toxins and removing cholesterol and triglycerides and other substances. This use of linseed oil as that which while beneficial, must be used with caution. This Awareness indicates that linseed oil as that which becomes rancid very quickly, and when rancid can be more hazardous than helpful.

This Awareness indicates that upon opening linseed oil, it should be kept refrigerated and used within approximately not more than two weeks from the time it is opened. This Awareness indicates that entities may also use linseed oil capsules and in this way not be concerned about it turning rancid. This Awareness indicates that there is also that substance goloxilyde which is a homeopathic substance that is administered through injection into a muscle, and which when entering into the system, burns away the toxins throughout the body, passing from cell to cell.

The homeopathic tincture, which in effect is of a higher temperature (chemical temperature) than the poisons, and thus crystallizes and burns the poisons from the system. This Awareness indicates that this substance having been developed in the 1930s and used during the 40's and 50's on approximately 19,000 cases, by 4000 different doctors, has been used effectively in treating many different types of degenerative diseases and the effectiveness as that which was of approximately 80% depending upon the case and the diseases.

This Awareness indicates that this being approximately 80% benefit. This Awareness indicates that for information regarding this, and of the Butcher's Broom and of the amino acids and of a new product Ana Asian, the developer of GH3, this product being GH4, which includes a substance to clean the arteries; this information on many of these and other new products available can be found through the Goodship. That this as having ordered many of these new products recently, and as making these available to entities.

This Awareness indicates that the products described in other sections of this reading also appear to be of great benefit to entities and this Awareness suggests that those who are suffering from obesity or from poor circulation, or from other types of illnesses may now have new tools at their disposal to help bring about relief. This Awareness indicates that this appears to be just the beginning

10. of a new opening for products from other cultures.

This Awareness indicates that Brazil is seen as a kind of bread-basket for new healing techniques and herbs and substances. This Awareness indicates that from Brazil there will be many new products upon the market that can have great healing benefits. This Awareness indicates the Taheebo tea, and the use of Stevia, the natural sweetener which is healing to the pancreas, therefore healing to diabetics and hypoglycemics; these are but two of the products from Brazil that have recently been introduced into this country and which will begin to have greater and greater effect on the health of individuals.

This Awareness indicates that as this country is saturated by new health products, its entire medical control will be altered, and in that release from these medical controls, whereby free enterprise is allowed to play a part, and to spread these healing substances, this can also spread throughout the world. This Awareness indicates that there appears to be on the horizon, a new type of healing force, a movement that becomes so pronounced, so helpful, so clear, so recognizable, that entities will flock to these healing substances and techniques, and the control of the medical profession with its dependency on pharmaceutical treatment of symptoms and pain, rather than treatment of cause, will appear to be archaic in comparison to the effects that come from these new healing energies.

The Goodship was established by the Aquarian Church of Universal Service upon instructions by Awareness. Send them \$1.00 and request their catalog, which is filled with hundreds of herbal remedies and other goodies to keep you healthy. The address:

The Goodship
PO Box 12072
Portland, Oregon, 97212

THE NEW CHRISTIAN RIGHT.....
IS IT A THREAT TO OUR FREEDOM?

QUESTION:

A question from W.E., St. Paul, Minnesota.
"Recently there was an article published in the St. Paul Dispatch entitled, "Fundamentalists Infiltrate Politics, Authors Say". The article is based on a book written by Floe Conway and Jim Seagalman called *Holy Terror*. The authors speak out against what they term "a fundamentalist war on American freedoms." They state that the new Christian Right is using propaganda, half-truths and outright lies to manipulate the nation into an atmosphere of terror and captivity.

They say that with the new Christian Right the issue is power, not piety, and they point out how the Reagan Administration has appointed many of these hard line Christians to governmental posts, such as positions in the Dept. of Health and Social Services, The Adolescent Pregnancy Council; and James Watt has appointed a member of his Pentacostal congregation in Colorado as director of the Bureau of Indian Education.

Conway and Seagalman also point out that the new Christian Right has extended its influence and power into foreign countries, especially Guatemala. Rios Montt, the new 'born again' ruler of Guatemala has been to the United States to visit with such fundamentalists as Pat Robertson, Billy Graham, Jerry Falwell, and even presidential aide Edward Meese. Montt is supposedly receiving funds from Robertson's '700 Club' instead of United States aid.

The authors state emphatically that a fundamentalist takeover of any government would mean that religious and perhaps political freedoms would be immediately abolished. To paraphrase from the book, the authors predict: "We cannot live as machines surrendered to Christ and computers, nor can the United States long endure as a fundamentalist nation. If the leaders of the Fundamentalist Right really cared about this country they would read history with an open eye and consider their goals and methods in the light of other tragic reactions in this country. They would also realize that totalism is not triumph."

In view of the information from the book *Holy Terror* and this newspaper article, I would like to ask Awareness *Its* views on this development: the moralistic and seemingly blatant meddling the new Christian Right is enforcing on our federal bureaucracy and in the internal affairs of foreign countries. Shouldn't other countries be allowed to develop in their own way without the fundamentalists imposing their dogmatic restrictions in the name of Christ? Does Awareness see these events as a natural progression in this planet's evolution, or are our freedoms and means of expression being imposed upon? Could Awareness comment? Thank you."

COSMIC AWARENESS:

This Awareness indicates that this is indeed an accurate description of certain energies in motion. This Awareness indicates however, that entities must also be aware that any large organization which has a particular vested interest in the affairs of a society may also have its efforts and ways of entering into politics of that society and influencing it. This Awareness indicates that this in other words, is not unusual except in that the Christians have not been so active in the past and so out-front about their activity in the past.

This Awareness indicates that if entities look carefully they will see also that the various groups, the various religious and ethnic and national and racial groups, and groups with their own particular interests such as the homosexual groups; these also would and do wherein possible attempt to influence the politics of this or any other nation wherein they feel there is an opening and opportunity for such influence. This Awareness indicates that the phenomena in the present Christian movement is that it has gained so much momentum through the television and the large income, and is able to voice itself so actively over television and in this manner have its effect on the masses and on the leaders, whereas those other groups which do not have the exposure or the funds may not be quite so vocal, nor have the same public exposure.

This Awareness indicates that nevertheless, the Catholics, the Episcopalians, the Jews and also even those who are of Eastern religious affiliations: the Moslems, the Hindus and Buddhists; they also have some influence in the affairs of this country. This Awareness indicates that it is worthy of being looked at, worthy of being concerned about, but this Awareness indicates that unless it becomes a strong and more powerful movement than it is at present, it is not likely to be strong enough to seriously cause this nation to fall.

This Awareness indicates that there are others who have greater moderation in their views, greater tolerance, there are even those among the Christian organizations who are not as intolerant as some of these and who would not wish to see the nation's Constitution eroded by fanaticism based upon a particular religious viewpoint. This Awareness indicates it is more likely that the efforts of these entities will simply result in a backlash in which the freedoms will

be demanded by the masses, and in which the people will recognize that religious fanaticism is not the answer and that there must be room for freedom of choice and thought in a society that is offering freedom to its people.

This Awareness indicates that it is important for entities to keep an eye on this movement and any other which would exclude the rights of others.

HOW TO FIND YOUR SOUL NAME

QUESTION: (May 6, 1981)

A question from A.F. of Issaquah, Wa., "Is it beneficial for entities on a spiritual path to seek to find their soul names? Some friends of mine recently told me that if you find your soul name in meditation and use it in your life, it enables your soul energies to be drawn to you." And she wonders if Awareness has ever given a method of doing this, or would.

COSMIC AWARENESS:

This Awareness indicates that this can be beneficial. This Awareness indicates that the most appropriate method of finding this name is not to sit and think and try to guess, but rather the best method is to meditate carefully upon your own energies. Look at your life not in terms of all the events that have occurred, or problems which you are involved in, nor the circumstances of your life, but rather take a quick look at the long body, from childhood to present time, seeing yourself as a child, moving along to the present; not in terms of the activities, but in terms of the feelings which you have experienced throughout these growing years.

This Awareness indicates that once you have glanced at this, seeing yourself growing from a small child into an adult, this Awareness suggests then, that you repeat this, stripping away all events and circumstances even further by imagining yourself growing from childhood to adult in one spot, not moving, not stepping away from that spot. See yourself as a tiny baby on the floor; this tiny baby growing somewhat larger, now on its hands and knees, now standing and able to toddle, now a small schoolchild, now growing larger, now a teenager, now in the early stages of adulthood, now growing into adulthood and taking on present experiences and features. This Awareness suggests you visualize this occurring all in one spot over a period of approximately 3 or 4 minutes.

That you now tune in to this entity as the baby, then the small child, visualizing yourself inside the body of the baby, of the small child, of the ten-year old, of the teenager, of the twenty-year old, and so forth, up to your present age. This Awareness asks that now you meditate carefully on the energies which you feel, stripping away all identifications of all activities and circumstances of your life, setting these aside as inconsequential to your soul, and looking rather at the energies deep within yourself which you have experienced in this growing-up process. This Awareness suggests then that you look for a kind of energy that designates who or what you are inside; that you focus until you find this energy. This may take several minutes of deep meditation.

This Awareness suggests that these meditations not seek to find letters or names for this energy; but rather to find the energy that identifies you. Once this energy is found, reduce this down as if on a screen before you, so that you can look at it at a slight distance, as though

you were looking at a word. This Awareness indicates the energy begins to take on qualities that seem to have a kind of message or seem to be calling out for a name.

This Awareness suggests you not make an effort to name the energy, but rather keep looking at this energy, which is hazy and without form. But as you continue staring at this energy, you may begin to get a feeling of darkness or light, or a combination of roundness or sharpness or a leading force. This Awareness suggests there may be the feeling of a valley or a mountain, there may be the feeling of a sharp turn here, or a dip here; that you focus on these various movements within that energy. Soon these movements, you may notice, are in the shape of letters that are very slowly coming into focus. Perhaps one letter, perhaps two, perhaps all come together.

This Awareness indicates for some, the letters may not show, but there may be a sound; the sound or a tone emanating from the energy, and you wish to identify or speak that sound. This Awareness indicates that it may be that you will find your mouth seeking to put the energy into vocal shape: an 'ohh' sound; an 'uhh' sound, an 'umm' sound, or some other combination. That whatever sound your vocal chords wish to make in order to reflect that energy which you are observing, let this occur.

This Awareness suggests that wherein there is any question or potential doubt or uncertainty about any part of the sound which describes the energy, or any letter which is not clear; this Awareness suggests that you go over and over the energy sounds or letters until that part which has created the question in your mind, which is less certain; until that part transmutes and changes or undergoes some form of alteration and becomes clear.

This Awareness indicates *It* will give an example in reference to how the name 'Avaton' was seen. This Awareness indicates that the energies were tuned in to; there appeared to be a mountain. This Awareness indicates there was also a valley. This Awareness indicates there still was another mountain,--not so tall. This Awareness indicates that then there was a blocking action, and an opening. This Awareness indicates then there was a blur which was not seen. The energies were looked at more carefully. The first mountain was sharp, with a peak; this having a sound,--"Ah". This Awareness indicates the valley was seen,--this as a "V". The second mountain was smaller,--an "a". The block was that of the 't',--a sharp explosive energy. The opening was that which was round, as an 'o'. This Awareness indicates that the last letter was not seen clearly. This Awareness indicates that the word appeared to be Avator, or Avatar; yet this word did not seem quite right. It did not fit the energy which was felt. This Awareness indicates that *It* repeated again and again the name 'Avatar, Avatar, Avatar, Avaterre; none of these appeared proper. Then, after several repetitions, the 'n' suddenly popped into view, and the name 'Avaton' became very clear. The energies felt accurate according to the energy field that had been present.

ED's Note: when I was born, I was given an initial 'A' by my mother, which did not stand for anything and I never used it except as an initial. Years later a psychic told me that if I would use my true soul name during this lifetime I could triple my energy and output, among other things. I was discussing this with Paul one night between trance sessions and he said he would try to locate the name for me. (Between sessions he is still very 'up' and extremely psychic). He laid down on the couch, touched his 'third eye' chakra

like he does when he goes under, and began searching the energies. It took about 15 minutes, but the name 'Avaton' came out and I began using that. Indeed I found there was much more energy and, I learned later, much more protection from alien and negative forces and vibrations. This reading was the first confirmation I had that Awareness had actually located the soul name. Paul says it takes a lot of time and energy to do this type of thing, so before you ask that question in a Personal Reading, be advised it may take much of the time of that reading searching out those energies, and you may not have the time to get all your questions answered. As a general rule, if Awareness sees a need to disclose a particular entity's soul name, it will probably do so. However, if the motive is more of an ego thing to make a significance over, it probably will decline. Before asking Awareness, make sure you have tried the meditation method above conscientiously. (Avaton)

TELEPORTATION ?

QUESTION:

A question from L.A., Austin, Texas. "The other day there was an intriguing documentary about Ed Lee Skalnin, a 100 pound man who could mysteriously move very large objects weighing up to 30 tons, using little or no tools. No one ever saw how he did it, yet he supposedly stated that anyone could do it if they knew how. Has Awareness ever commented on, or been asked about this man's mysterious powers? I don't think *It* has.

COSMIC AWARENESS:

This Awareness indicates that this as in the affirmative. That this in relation to a question regarding the movement of a large castle from one place to another in a very short time. This Awareness indicates that this appears to have been in Florida.*

This Awareness indicates that this entity as one who understood the laws of teleportation of mind, who had programmed his consciousness in a different way of seeing reality. This Awareness indicates that this relates to the message given in the previous reading regarding the need for a higher language of cosmic concepts, a higher language of consciousness, whereby the mind is made able to think with a different language of concepts;

This Awareness indicates that there will be more entities of this type developing these abilities and that there could have been this development earlier, except for the belief that it was not possible. This Awareness indicates that when entities begin to explore the unthinkable, the impossible, and consider the impossible as possibly possible, they then begin to open their minds to accept new programming, new ways of thinking, and to activate areas of the consciousness that have been previously dormant.

*We had asked this question several years back, but at that time Awareness stated it would not reveal the secret of how this entity built a huge castle of stone blocks without the use of equipment of any kind. (This was never published). The reference Awareness made in the above reading regarding the concept of a higher language in consciousness, this information can be found in 'Revelations of Awareness' No. 83-17 (Wrong Answers); \$3.00 from CAC.
