Cosmic Awareness Communications
P. O. Box 115, Olympia, Washington 98507
(Helping people become aware)

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

COPING WITH THE SPIRITUAL LIFE....

ILLUMINATION:

Merging With the Divine Light

PLEASE NOTE: for greater understanding and easier reading, Cosmic Awareness suggests that the following material be read aloud.

MERGING WITH THE DIVINE LIGHT

(Jan. 22, 1984)

QUESTION:

A question from A.J. of Pittsburgh, Pa. She writes: "I have a question for Awareness regarding the enclosed story, if you believe it would be of general interest." I'll read the story and then ask her question. It's evidently an advertisement from a publication called *Guidepost*, and it writes:

"Dear friends: Virginia Lively is a suburban housewife who, like many others, saves grocery coupons and watches her weight. There was nothing unusual about her life until she began crying one afternoon as she drove home from PTA. Without understanding why, she continued to cry for 4 straight days. On the morning of the 4th day, alone in her livingroom, there was a sudden humm and crackle in the air. She saw a ball of white light through a window spraying showers of multicolored light in its wake, and approaching her with amazing speed.

"Then it was right there beside her. As she looked at it she saw a face. "He is perfect!" was her first thought. His forehead was high, his eyes were large, but she could not fix their color any more than she could the color of the sea. His features were lost in the overwhelming impression of her life brimming over with power and freedom. Instantly she knew this was Jesus. She saw his utter lack of condemnation, saw that nothing she had ever done or ever would do could alter the absolute caring or the unconditional love in his eyes.

"Jesus stayed with Virginia for 3 months, then slowly his presence began to fade. The last time she saw him, he said, "I will always be with you." But, "how will I know?", she cried, "if I can't see you!"

"You will see me," he said, then he was gone. Years went by, but the vision did not return. Then one day, as she spoke to a church group she saw his loving eyes shining into hers again. The eyes belonged to a woman in the second row, and suddenly she saw *his* eyes looking at her from the eyes of every person in the room.

"Today, if Virginia Lively looked into *your* eyes, she would see Jesus."

Now Alice's question is: "To "see" his eyes in the eyes of everyone would make the concept of oneness a constant reality for us, and transform the relationships throughout the world. Why do some individuals achieve this state of consciousness? What factors make such an experience possible, and is it possible for other 'ordinary' people to experience this phenomenon, and if so, how can this be achieved?"

COSMIC AWARENESS:

This Awareness indicates this is related to the statement of the Buddha; that when one comes in contact with the Buddha, when one reaches the Great Void, the Light, and becomes the Buddha, one turns about and looks at the world and discovers that everyone else is also the Buddha. This Awareness indicates the meaning of this is that when one comes in to unity with the Christos, the Higher Self, their own Higher Divine Light, that which is called the 'Father in Heaven,' the Divine Light, or Higher Self, which is also known as the Christos, or the Christ; when one merges with this, then they see the world and see others from the eyes of the Christ Light or the eyes of the Buddha, (depending on which term the entity wants to use,) and seeing others from the eyes of the Buddha, they see the Buddha in everyone, or see the Christ Light in everyone.

This Awareness indicates that the question: How does an ordinary person reach such a consciousness level? can only be answered through the question: What is an ordinary person? This Awareness indicates that if an ordinary person is to be described as one who cannot or is not merged with the Christ Light, then the answer is that: an ordinary person cannot do this. This Awareness indicates that if an ordinary person is described as one who is in the process of change, of reaching and moving toward the Christ Light, toward the Buddha, toward the Divine Heavenly Father Within; if one is moving in that direction toward the Divine Light, then the answer is: The individual, the ordinary person must be patient and wait until one merges with the Divine Light.

This Awareness indicates if the definition of 'ordinary person' is defined as the entity who has blocks preventing him or her from merging with the Christ Light, then the answer would be: The ordinary person must have the blocks removed so that the merger will occur. This Awareness indicates this woman crying for 4 days essentially was releasing the blocks which prevented her from contact with the Divine Light. This Awareness indicates that by defining oneself as an ordinary person and defining the Christ Light as something outside of one's experience, it is likened unto that old adage of: How can you make a royal flush from a full house?

If you define your hand as being that which holds a full house, obviously it cannot be a royal flush. This Awareness indicates that if you define yourself as an ordinary person with all types of limitations involved in that definition, then obviously it cannot be the being merged with the Divine Light, unless you consider *that* entity as being the ordinary person. This Awareness indicates that the process of merging with the Divine Light is what needs to be looked at, and not the definitions of ordinary persons or these distinctions which can be drawn, whereby one can hold onto one's definition of self as being an ordinary person separated from the Divine Light who wants to remain ordinary and remain separated, but also wants to experience the merging with the Divine Light.

This Awareness indicates that entities can't have it both ways at the same time. In order to merge with the Divine Light, entities must give up their own identification of self, and identify with the Divine Light. This Awareness indicates that the process for some is easier than for others, for some do not have a great self-identification which they cling to, and are more interested in becoming one with the Divine Light, and therefore can let go of self-identification and merge with the Higher Divine Light and identify with that.

This Awareness indicates that it is not always something that one can will. Often it comes about through the grace of the Divine Light. This Awareness indicates that there are not always available "How To" rules in the spiritual experiences; that one *can* understand however, that when one is made ready, and when the Divine Light determines that it is necessary, appropriate or beneficial for the entity to come face to face with the Divine Light, *It* will present *Itself*.

This Awareness indicates that the Divine Light isn't like most goals, in that it has a mind, it has a will, it has its own awareness, and individuals who are used to goal-seeking may think: "I will pursue my new goal which is the Divine Light, and I want it to appear before me

on Tuesday the 18th, at 10:00 AM, just before I go to work." This Awareness indicates that entities may assume that they have some kind of control over the Divine Light and can pursue the Divine Light if they only know the formula.

This Awareness indicates that the Divine Light does not always yield to the pursuit of entities, does not always yield to the desires of entities, but always responds according to the vibration of the entity. This Awareness indicates that oftentimes, the entity who pursues the Divine Light as though he or she were desiring to capture the Divine Light, as something that could be possessed and could be held and could be made meaningful to one's life as a prized jewel; often entities who thus pursue the Divine Light do in fact drive the Divine Light further away.

This Awareness indicates that even this is part of the process of becoming ready for the entrance of the Divine Light, whereas entities pursue the Divine Light without success, realizing that their will is not enough, they reach a state in which they are ready to give up, wherein they feel a futility. It is often at this time that the Divine Light comes close and enters into the minds of the entities.

The parable of the Cannibal & the Kahuna
(Paul Shockley's Message from Awareness)

This Awareness indicates that approximately 15 years ago, this Awareness gave a message to the present Interpreter through the entity David Worcester. This Awareness indicates that this message as having been of great significance to the present Interpreter, and although this Awareness does not generally repeat messages, this particular message as that which can have profound effect and benefit on many entities in understanding this principle which is presently being discussed.

This Awareness wishes to repeat this parable. This Awareness indicates that this in relation to the story of a great Kahuna, who, having reached such a high state of consciousness, began to observe self, and wonder at self, and began to wonder about the possibility of becoming even more highly evolved, and wondered how such an event could occur, and stumbled upon the concept of devouring something of equal consciousness level and thus becoming twice as aware.

This great Kahuna, knowing of another Kahuna on the far side of the island, journeyed forth to meet with this second Kahuna with the intent of devouring him. The second Kahuna, recognizing the approach of the first Kahuna, and knowing of his intent, met the Kahuna at the doorstep. The first Kahuna, who was prepared to become a cannibal, approached the second Kahuna, who greeted him and invited him to walk with him, and discussed his appetite and his proposal and presented to the cannibal a recipe which could satisfy his every appetite and longing, and as the two walked, and as the two talked, the Kahuna continually fed the cannibal with the information and the recipe by which the cannibal could be satisfied, and at the end of the journey, the Kahuna had completely devoured the cannibal.

This Awareness indicates that likewise, entities who come to this Awareness, or to the Christ Light with the intent of devouring, controlling or possessing or using this Awareness or the Christ Light, will find themselves devoured, possessed, used by this Awareness or the Christ Light. This Awareness indicates that entities cannot possess Divine Forces, but *can* open themselves to allow the Divine Forces to use them and can merge with the Divine Forces and the Divine Forces can then act through the entities.

This Awareness indicates that because of this principle, no individual can honestly claim to be Divine, for only the Divine can make such statements. This Awareness indicates that wherein the voice spoke through Jesus: "I am the Way, the Truth and the Light," it was the

Christ Light speaking and not the entity Jesus. The entity Jesus as having been a channel through which the Divine Christ Light could express *Itself* in this world.

ED's Note: after this reading was over, I asked Paul how it was that he got involved in the Awareness Movement in the first place, and he said it was while he was driving a bus in Portland that he had heard about Cosmic Awareness being channeled in Seattle through an entity called Ralph Doby. By the time he was able to track down the source of the information, Ralph Doby had died and David Worcester was channeling Awareness. Paul ran over the entire state of Washington, looking for David and those involved in the Awareness Movement at the time, for he had made up his mind that he just simply 'had' to have this Cosmic Awareness, 'had' to be able to use it, 'had' to experience it. After coming to Olympia, finally tracking it down, Paul met many of the entities, including this editor, who were working in the Movement at that time. When Servants of Awareness split up and David Worcester moved his operation to Bothell, Washington, a suburb of Seattle, Paul in his pursuit of Awareness, enrolled in the Cosmic Awareness Development Classes, and every 2 weeks would drive the 300 mile round trip journey to partake therein. It was during the 7th Plan of the Development Class that Paul Shockley's channel broke through for the first time. It was in a later reading from Awareness through David Worcester that the above parable was given to Paul by Awareness. Essentially, Paul, who was pursuing Awareness with such zeal for his own motives, was literally devoured by Awareness, who quickly made him its personal channel and launched Paul into this work which was later revealed to be his preprogrammed role and major occupation during this particular life experience. (Avaton).

A CRYING EXPERIENCE?

....HOW THE BLOCKS ARE REMOVED

QUESTION:

In the example in the question of the lady who cried for 4 days, what would trigger an experience like that?

COSMIC AWARENESS:

This Awareness indicates that sometimes these are brought about through deep subconscious yearnings, the yearning sometimes being triggered from events between lives, or within this life, or relating to pledges made before entering into this life. In this entity's case, it was set up through a kind of prearranged condition in which this entity was to be put into such a situation that her heart and soul would be in great torment in spite of external events, if the entity did not remain unified with her Divine Christ Consciousness, and as the entity moved through various experiences in that particular lifetime, and wandered away from that unity, the entity then became more and more dissatisfied with herself; this, on the subconscious level, which in turn surfaced into the emotional expressions of tears and weeping; the weeping and the tears as that which assisted in removing the blocks that prevented her contact with the Higher Self, with the Christ Light.

The 'Christian Conversion' Experience

This Awareness indicates that it is not so different from that experience of the Christian conversion, except that it was brought about more naturally and was not artificially induced by the heaping of guilt and fear upon the entity by an outsider with threats of Hellfire, damnation and alienation from God, and without statements of condemnation to make the entity feel unworthy, wherein the entity, accepting the suggestion of the pious religious preacher, bends the knee and prays to God, weeping and wailing for communication, forgiveness and acceptance.

This Awareness indicates that many entities who experience that religious conversion experience a great lifting of heaviness from their soul and feel light and joyous and the Light fills their being and is called *Jesus*, and will testify that Jesus has come into their hearts. This Awareness indicates that this is a valid experience, even if it is artificially induced by external

threats of fire, Hell, and of coercion and of the heaping on of undue guilt.

This Awareness indicates that such externally and artificially induced experiences can have benefit of a lasting nature for some individuals; for others it is only temporary and wears off. This Awareness indicates that the experience described by this lady, who for 4 days cried, and who then saw the face of the Christ; this experience is likened unto an exaggerated conversion, one which was more natural, more real, of greater intensity, and of more lasting effect.

This Awareness indicates that entities in seeking the Divine Light can experience the dramatic suddenness of the entry of the Light if they choose a path that allows them to go through the great despair of the soul, to feel guilt and to feel unworthy and to feel fear, and if they accept through faith in the technique, and in the promises, if they accept in faith the redemption promised by the Deity, by accepting that Deity, they can then throw off the guilt and fear and bathe in the Light, and this is a very powerful and dramatic experience which can alter an entity's life.

This Awareness indicates it is an alchemical action in which consciousness is changed. This Awareness indicates that it may be compared to turning lead to gold. This Awareness indicates that it may or may not be permanent, depending on the individual and on the intensity of the experience. It is not something the individual can control, but it is something that can be artificially created through circumstances of an artificial creation, whereby the opportunity for a real experience can occur.

This Awareness indicates that the artificial religion, setting up this method or process of artificially creating fear and guilt, bringing the entity to a state of consciousness wherein the entity's own will is surrendered to the Highest, whereby the Highest may then enter in; this Awareness indicates this is pure Kahuna philosophy, pure Zen, pure alchemy or pure Christianity, depending on what entities wish to call it. The principle is the same.

This Awareness indicates that it is the altering of consciousness. This Awareness indicates that when the entity does take such a dramatic path; the entity may still arrive at the Light by going through a slower process wherein there are many smaller steps of initiation, steps in which the entity becomes more aware through gradual teaching, gradual enlightenment, gradual understanding, gradual fulfillment, whereby the entity gains insight here, insight there, here a little, there a little, then a little more, and finally the entity is fully enlightened, and perhaps has an even greater understanding of the Path of how to reach enlightenment and a greater foundation in the realm of enlightenment, and perhaps the entity, having taken this slower path, may be better equipped to remain in the enlightened state, whereas the entity who did not understand, but was manipulated into the state of enlightenment may soon find something slipping away which cannot be explained or understood or controlled, and thus the entity feels that experience known as the Dark Night of the Soul, which often occurs to entities after they have experienced that great joy of enlightenment.

The Dark Night of the Soul Experience

The Dark Night of the Soul is that which has been described as likened unto being upon a desert, in darkness, wherein the Light is gone, is missing, and sorrow is experienced, and the entity feels alone and deserted, and forsaken. This Awareness indicates that those who experience the unexplainable enlightenment, induced by religious or Zen or alchemical techniques, essentially are victims of the manipulators, and though this is a desirable experience, they do not have the understanding, the wisdom to know how the experience came about, and thus remain dependent on those who have created for them the experience.

This Awareness indicates that those who take the path more slowly, understanding each step along the way, or at least understanding the major steps and plateaus; those entities, when reaching enlightenment have enlightenment on a total level, and are not dependent on the manipulators of consciousness, for they understand the nature of consciousness, and how to move about in consciousness.

This Awareness wishes you to look at that concept of moving about in consciousness as compared to the concept of being moved unconsciously by those who manipulate consciousness. This Awareness indicates that many entities manipulate consciousness without even knowing that is what they are doing; they simply parrot the method that was given to them by tradition and thus become manipulators of consciousness out of tradition and traditional methods.

This Awareness indicates that this is much likened unto the hypnotist who does not understand the mind, does not understand the nature of consciousness, but *does* understand the words and techniques necessary to hypnotize another. This Awareness indicates that there are many entities who are essentially architects of consciousness that do not understand the nature of consciousness, yet they manipulate consciousness, using the tools they were given. (This Awareness indicates that if this has not been fully answered or clarified, that questions may be asked.)

HOW MUCH OF ENLIGHTENMENT IS INTELLECTUAL IN NATURE?

QUESTION:

I had one question on the alternate route. It has always been my understanding that one could never reach pure enlightenment through the intellectual route. One could read thousands of books and so forth, and intellectually understand the concept of enlightenment, but could never have the experience, like this lady did, of seeing the Christ Light in everybody, without actually going through some sort of deeply emotional or traumatic experience.

COSMIC AWARENESS:

This Awareness indicates that when an entity reads a book, the book may be an intellectual influence on the entity, or it can be an emotional influence, whereby the entity becomes enlightened emotionally and some emotional lift is received by the answer. This Awareness indicates that this all depends on the driving force behind the entity's pursuit of the information. If the entity is emotionally hungry for some answer and receives this information from someone speaking, or receives this information from some book and this answer to the quest lifts the burden, then this is an emotional and alchemical expression that enlightens the entity, lifting the blocks in the subconscious levels.

This Awareness indicates that the only thing that cuts entities off from the Divine Light are the emotional blocks which entities experience, which entities have allowed to enter into their being that cuts off the flow of energy to the Divine. This Awareness indicates that this goes back to the principles described in the works of Max Freedom Long, the Kahunas, and in the Scorpio correspondence lessons of Alchemy. This Awareness indicates that the removal of these emotional blocks is that which allows the Christ Light to once again penetrate or flood into the soul of the individual.

This Awareness indicates that it is true, the mind itself, the Doer, the Thinker, the Middle Self, cannot in itself bring about the Divine Light through study, but it can *will* a contact with the Divine Light and it can respond to the urgencies felt on the emotional levels by seeking answers through books, through

teachers, or through prayer, or through lamentations, or through journeys into the wilderness, or into the crowds.

This Awareness indicates that it can put forth its effort to reach the Higher Self in some manner, and it is that effort of the Middle Self, the Conscious Mind, calling forth for Divine Intervention that gives the energy which allows the blocks to be removed, but the energies are those which are emotional in nature, and must be moved by the flow and the flood of desire to reach the Higher Self. This Awareness indicates that often such desire cannot occur except when an entity is in great need, or feeling despair. This Awareness indicates it is for this reason that the artificial methods used by fundamentalist churches have an effect. It creates feelings of great despair, hopelessness. The entity thinks: "You mean I am going to Hell to burn forever? Heaven forbid!" and thus, the entity, in great despair, turns the energies into fear and into emotional desire to be with the Higher Self, with the Divine Light of Christ.

This Awareness indicates that the logic is that which is not necessarily associated with the understanding, and this Awareness does not mean to imply that entities must understand everything rationally or logically in order to experience a lasting effect. This Awareness indicates however, it is better for entities to understand as much as is possible so that the effects can be made part of the total being and they are not simply dependent on outside manipulations.

This Awareness indicates the entity who does not understand how this comes about, how the Light came to them, or why it left, will always be dependent and may say to himself: "I must run down and get my local preacher to heap more guilt upon me so that I can lament and weep and can attempt to receive the incentive to get back to the Light." This Awareness indicates that this kind of dependency on this artificial technique is that which many entities participate in. They call this conversion and backsliding, and conversion again, and again backsliding, and they go back and forth from one lifestyle to another, getting the benefits from both worlds of being a sinner, of being the converted individual.

Whenever their conscience bothers them too much they go and get converted, and when they are tired and bored, they go and get drunk or get involved in activities of what they term "sinful" nature. This Awareness indicates that these entities are essentially victims of the techniques; they are the clients or patients or subjects of the manipulators. This Awareness indicates that to understand what this Awareness is speaking about, it would like to give an example:

This Awareness indicates that if an entity thinks that this is the appropriate and highest state of life, the best lifestyle, whereby an entity is dependent on the clergy for their unification with the Christ, then where does the entity Jesus fit in?, for would the entity Jesus have used the same technique to keep his Light alive? Would the entity Jesus rush to the clergy whenever he felt despair or cut-off from the Light, such as when hanging on the cross, and asking why he had been forsaken? This Awareness indicates that obviously this entity would not put himself in a position of being dependent on the clergy for the entity understood too well the nature of the Light and was dependent only on the Light itself,--the Divine Light of God, the Divine Light of the Christos.

This Awareness indicates that one needs not be dependent on the technique, yet there is nothing wrong with an entity using the technique if it is beneficial. This Awareness indicates it is suggested however, that entities understand how the technique works, why it works, so that they do not simply attribute the entire thing to some mystery and magic that lies beyond the realm of comprehension. This Awareness indicates that it is

A page from an Evangelistic tract received by CAC.

better for entities to have an awareness of unity with the Light and know that they can be unified with the Light, so that if blockage occurs, they know there is a blockage, and they can look for the blockage, find the blockage, and remove the blockage.

The 3 paths to the Divine

This Awareness indicates that the more entities are able to attend to these spiritual needs, the better the entity is in coping with the spiritual life and with the concepts and energies which he or she comes across in movement along the spiritual path. This Awareness indicates that it has previously indicated that there are three major paths: the path of alchemy, which is the changing of consciousness, and this is the quickest path to reaching Divine Spirituality; and the path of service, which is the second quickest path, wherein you give service to others, and is so doing your spirituality increase; and the path of suffering.

This Awareness indicates that this path of suffering is that which is slowest, and often leads to such great despair that the entity coming to a dead end will suddenly turn to alchemy and make a great leap into conversion and unification with the Divine Light, thus, the path of suffering, even though the entity may not wish or desire to move toward the Light, can often be that which catapults the entity toward the light, but it may not occur until the entity has suffered and endured great hardships. This Awareness indicates that this generally is the slowest and most painful path.

This Awareness indicates however, that all entities are traveling on at least one of these paths and may come across opportunity to have an alchemic experience, or to have an experience of giving service, or to have the experience of suffering. This Awareness indicates that if an entity is on the alchemical path and stays as much as possible on the alchemical path, the entity will find it is almost impossible not to also tread the path of service, and may also find it is almost impossible not to tread the path of suffering, for the alchemical path appears to be everywhere, and if entities are on the path of suffering, there is always the opportunity to recognize the alchemical path, and if entities are on the path of service, there is always the opportunity to recognize the alchemical path.

Things that can lead to the Alchemical Conversion

This Awareness indicates that most entities involved in dealing with alchemy also automatically give service to others who are on the path of suffering. This Awareness indicates that those on the path of service can not only help those who are suffering, but can also help to enhance the chances for alchemical experiences and can present alchemical opportunities so that those on the path of suffering may participate in an alchemical conversion.

This Awareness indicates that alchemy, being described as the action or ability to change consciousness, can be of different degrees. There is that sudden dramatic conversion of great degree as described by the story of the woman, and there is that lesser alchemical experience wherein an entity has deep longing, a need, and goes out and finds a book or finds a friend, or someone

to talk to or to listen to. It may be a comic book, it may be a parrot, it may be a Bible, it may be a movie, it may be a metaphysical book; but something is sought to answer or relieve the pressures within the entity, and the longing is felt and when the solution is presented, the entity feels lighter, feels better.

Anything that lightens one's load may be likened unto a conversion or transformation of one degree or another; the intensity varies. This Awareness indicates that anything which increases the heaviness of one's load can be a motivator, for entities are motivated when they are experiencing pain. If all is well, there is no reason to move, thus, when pain is increased, the entity is motivated to find relief, thus in alchemy wherein there is a hunger or a pain, the entity is motivated to find relief.

The Pain-Relief Pattern is Always Present

That relief which comes is generally referred to as 'lightening the load,' or enlightenment, answering the question, or resolving the problem. This Awareness indicates that the principle is always the same, whether in a dramatic story, or whether in a religious experience or whether in a psychological mundane, daily struggle. This Awareness indicates if entities can see the pattern of the pain as motivation, the solution from some force that lightens the load, they have the pattern which is used by religion, by psychology, by every day living activities, by writers of drama, and by advertisers of products.

The advertiser of a product presents the problem: "I have a terrific headache!" "You have a terrific headache? Well, then take this little brown tablet with the polka dots on the end, and your headache will go away!" "Ah! It worked! Relief at last!" This Awareness indicates that this is the same pattern used in religion, used in drama, used in advertising of products, used in sales; the presentation of the problem and the presentation of the solution to the problem. It is also used in political manipulation, in the manipulation of masses, of their energies.

This Awareness indicates that it essentially is the heart of manipulation. This Awareness indicates that entities do it to themselves, and they do it to each other. They create problems, then they take away the problems when they have reached the point where the problems are too great, and then they feel much better at having solved the problems which they created. This Awareness indicates that these are experiences which entities use in order to know they exist, in order to feel the intensities of life, the pains and the pleasures.

How Divine Grace can Interfere with Karma

This Awareness indicates that entities move into darkness, isolation, and the Dark Night of the Soul, escaping the Light of the Christ, to see what it would be like, and once they have suffered this experience long enough, being thus on their own, experiencing the hunger and the loss of life itself, feeling themselves to be without any inner life; they thus rush back toward the Light, overcoming one obstacle after another in their effort to reach the Light, depending on how far they went, and how many obstacles they left over which they must climb--this will determine how quickly, how easily their return to the Light will be.

Some entities attempt to burn their bridges behind them, and thus it becomes much more difficult to return to the Light. This Awareness indicates that this is karma. As entities move from the Light, to that extent that they cut off the Light, that is the extent of their karma. This Awareness indicates there is also that alchemical experience whereby the entity, through lamentation, remorse, regret, can ask the Divine Light to remove the blocks which he or she has created and this action of removal is termed 'grace'; whereby the Divine Light does not require the entity to undo the errors which have been done, but will interfere and undo those errors for the individual.

6.

This Awareness indicates that this is grace, Divine Grace interfering with the Karma. This Awareness indicates it is not something that entities have a right to demand or expect, and will not be given to entities who thus demand or expect Divine Grace. This Awareness indicates for this reason, many entities who are expecting God to intervene in their life, to make them healthy, wealthy and wise, are simply creating conditions which the Divine Light cannot accept; for Grace is not something that can be demanded, and the demands cannot be rewarded, and such entities making those demands will be required to move back toward the Light along the karmic path they have created for themselves.

HOW THE HINDU AND BUDDHISTS CONTACT THE DIVINE LIGHT

(How it differs from the Christian method)

QUESTION:

Awareness, in the Hindu and Buddhist religions it is said that they contact the Divine Light through meditation and other intense disciplines, but do they also have an experience similar to the Christian conversion in those religions?

COSMIC AWARENESS:

This Awareness indicates that the Hindus do not, as a general rule, emphasize the concept of sin and separation from the Divine Light to the extent that the Christian religion does. This Awareness indicates that at the heart of the Christian religion is the condition that one must admit one has been alienated and separated from God. This Awareness indicates that this is part of the preparation for the entity, leading the entity to accept a feeling of separation, isolation and to admit guilt in the process.

Guilt is not Stressed in Hindu Philosophy

This Awareness indicates that this admission of guilt is that which allows the entity to see his or her own unworthiness, and then to call upon the name of the Divine Light for salvation. This Awareness indicates that this action is a pleading, and it is from the grace of the court, or from the grace of the Divine; the Christian method is essentially the action of throwing oneself upon the mercy of the court and thus avoiding karma. This Awareness indicates that by throwing oneself upon the mercy of the court, admitting guilt, and of seeking reinstatement, the merciful deity is presumed by the seeker to have such compassion as to forgive the crimes which have been attributed to the entity for which the entity pleads guilty.

This Awareness indicates that in the Hindu philosophy, these entities do not emphasize guilt. They recognize themselves as being not as close to the Light as they would like to be, and thus seeking to move closer to the Light, they devote themselves, their energies, their time, their thoughts, their focus; they devote this toward the Light, and thus place themselves in the Light through an earnest effort. This Awareness indicates that in this manner they are willfully, with great effort, putting energies into being one with the Light, and this movement is such that it is highly prized when they do reach the Light, because they have worked so hard, they have spent so many hours in meditation, they have spent so much effort to reach this state of consciousness, it is highly prized and is not easily surrendered or tossed aside.

Enlightenment Does Not Remove All Problems

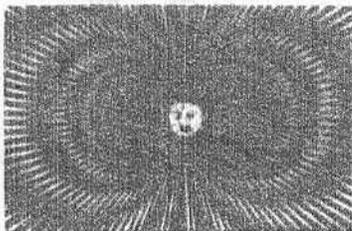

This Awareness indicates that many entities in the Christian philosophy are likened unto supermarket consumer shoppers; they try this, they try that; they bought this electronic device, now they're going to try this religious technique; they experienced it, it was great, now they want to experience the new hallucinogen and a brain oscillator, and they go from one thing to another, taking and tossing aside. This Awareness indicates that because they have not really put forth extreme effort and devotion to reach the Light, many of the converts to Christianity toss this aside after the newness and the thrill and the pleasure wears off.

This Awareness indicates that being a Christian, being an enlightened being, does not mean that an entity is forever after bathed in joy and has no problems of any kind, as many entities think, but because many entities think this is what religion and the spiritual life is supposed to give, they are appalled to hear that someone who is religious is suffering from some problem. They are appalled when they themselves suffer from some problem and they may begin to think that either the person has lost religion, or they have lost their religion, or lost the blessing of God, and thus they begin to see the other as sinful, in error, looking down on the other as though the entity were spiritually inferior because he or she is suffering, or looking down on themselves as spiritually inferior because he or she is suffering, and the grace which was provided that allowed them to have the experience is then seen as something that is fleeting and the entities may take this as some kind of handout, a spiritual welfare program which the Divine Light is supposed to provide on a monthly basis.

This Awareness indicates that many entities, presuming that grace is something that can be taken for granted, take it for granted, and when the experience begins to fade because they are no longer devoted, no longer giving their energies, no longer feeling appreciation for the Divine Gift; when these energies begin to fade and the entity begins to pursue self-interested or selfish goals, the entity may become angry at the Divine Light for not providing further goodies in his or her life.

This Awareness indicates that entities get social welfare programs and spiritual grace confused and think they should operate in the same way. This Awareness indicates that wherein the entity in the Hindu philosophy works for his or her rewards, and the entity in the Christian philosophy cries and laments and begs for his or her rewards; these two approaches can very often create different attitudes in terms of one's expectations of their religion. This Awareness indicates it is helpful for entities to understand the benefits and the potential hazards of each of these paths so that they may better appreciate the nature of the path they have chosen, and to understand how that path can be best used, or how they can wander from the path and become lost.

This Awareness advocates that entities use every means available,--allchemical, service, or suffering,--to be as spiritual and as attuned to the spiritual energies as is possible.

ENLIGHTENMENT--AND THE MEANING OF THE FALLEN COCONUT

QUESTION:

While we're on the this subject, is there any truth to that story, (I believe it was Siddhartha the Buddha, or one of the great teachers), was sitting under a palm tree and a coconut fell on his head, and that is how he received his enlightenment?

COSMIC AWARENESS:

This Awareness indicates that this is a story which is intended to convey a message; that one can receive enlightenment from any type of unexpected event in one's life. This Awareness indicates it is not intended to mean that this entity is advocating entities sit under coconut trees as a means of getting enlightenment, or that coconuts hitting people on the head can cause the phenomena known as enlightenment. This Awareness indicates that it does not mean that there was some kind of brain injury which causes the entity to become enlightened from having a blow on the head.

Essentially the story as meaning that entities can become enlightened from any event. It does not need to be from some Divine Helicopter or space ship, or being walking into the room and smiling at one from another dimension. It does not need to be any great chapel or church built to house entities in order that they might experience enlightenment. The entity can become enlightened from tripping on a nail, and will realize that the entity should watch the ground more carefully and that may be the extent of his enlightenment for the day, or for the hour, or for the moment.

Another entity may become enlightened by reading a book and that book may be the extent of his enlightenment for that phase of his life. This Awareness indicates that enlightenment can come from any action, any event, any circumstance, and it needs not be wearing the mask of a Divine Being.

COSMIC CONSCIOUSNESS & ENLIGHTENMENT ARE THESE ONE AND THE SAME?

(ENLIGHTENMENT COMES IN INCREMENTS)

QUESTION:

Is enlightenment or illumination the same as Awareness refers to as 'Cosmic Consciousness', like the entity Walter Russell achieved?

COSMIC AWARENESS:

This Awareness indicates that if you were to strip away the words which are being used to describe these concepts and look only at the energies; look at the energy behind the word 'enlightenment', you will see that it is either a small beam of light which reveals, or it is a larger beam of Light which reveals, or it is a much larger beam of Light which reveals, or a great beam of Light which reveals. It is all a matter of degree. There is no such thing as one chunk of enlightenment which can be passed from entity to entity as if passing dollar bills.

This Awareness indicates that enlightenment comes in like drops of rain for some entities, or like the dew, or like mist for others, but for some entities it comes like a waterfall, wherein they are walking for years in total ignorance and darkness, thirsty upon a desert, and stumble suddenly upon this gushing river and waterfall of enlightenment and are filled with the flood of understanding, and their thirst is quenched.

This Awareness indicates that entities who are walking around in mist or rain may envy the experience of the desert traveler, who, thirsting for years finally came upon water, a gushing river, and may say to themselves: "Gosh! I never got such an experience myself! What am I missing? Why couldn't I have had such an experience?"

This Awareness indicates that essentially, the greater the thirst an entity has for the Light, the greater the Light when it comes.

If entities wish to have the extreme enlightenment as experienced by some whereby they feel themselves flooded with Light and wallowing in the Light of the Divine, can thus go out and say: "Ah Ha! I found it!" Wherein entities wish that type of experience which they can rush here and there and testify to their friends and relatives, to their neighbors, and can tell all about enlightenment, then entities must thirst more in order to have such a dramatic extreme.

Wherein there is a vacuum, to the degree of that vacuum, when the opening occurs, the vacuum will be filled, and if entities create a vacuum in their life in which they seek fulfillment from the Divine, when they are finally opened, the Divine Forces will rush in to fill that vacuum. This Awareness indicates therefore, the entity who sees himself as being wretched, unworthy, a sinner, a lowly maggot crawling on the face of the earth, unworthy of even a glance from the Divine, yet needing and wanting and seeking the Light from the Divine; if the entity wallows in that self-pity long enough and then someone says to the entity: "Oh, there is no problem, the Divine loves you! The Divine will give you recognition and acceptance! You simply have to ask and have faith!"--this lowly maggot, believing this, then calls upon the Divine which creates an opening within the mind of the lowly maggot and the Divine Light rushes in.

This Awareness indicates the Divine Light would never have been elsewhere had the lowly maggot not shut it off in the first place, would never have been elsewhere had the lowly maggot not assumed that he was separated from the Divine Light, for the Divine Light is everywhere present, and entities are always in the Light, except when they close the doors to the Light and do not let the Light into their own being, either out of fear of facing Divine Revelation, or out of guilt of being condemned by Divine Light.

This Awareness indicates that if entities want the dramatic surcharge of Divine Vibration, the Light, the rush of the salvation, then it is only necessary to wallow in sin, wallow in self-isolation, reject God, reject the Light, turn toward oneself and one's friends, become hateful, hostile, and then turn against oneself and become hateful toward oneself, and finally admit that oneself is wrong, is in error, is a sinner, is a lowly unworthy maggot, and then call upon the Light to have mercy and to forgive, and the entity will experience the rush of the Divine Light.

This Awareness indicates that most entities do not reach enlightenment through this type of experience, although a great percentage do. Most entities reach enlightenment by day to day discoveries, by moment to moment realizations, by growing each year to greater understanding, by becoming more tolerant of self, more desirous of being closer to the Divine Forces, and to the Divine Principles and Laws.

Most entities grow toward enlightenment rather than rush into an explosive enlightened condition. This Awareness indicates however, there are in most entities' lives, moments of great despair, and these moments inevitably are opportunities to bring in great Light, for in the despair there is the vacuum, and if one opens that door only to the Light, then that vacuum is filled with Light.

This Awareness indicates that often in despair, entities turn not toward the Light, but toward drink, drugs,

greater separateness, toward the stranger off the street, or the illusion which is non-real and builds their life around the drug, the drink, the strangers from the streets or the unreal illusions, and allows these things to fill the vacuum of their despair, and when entities take this path, they are following the path of suffering.

This Awareness indicates that wherein there is any pain in your life at any place, in any area, emotional, physical, mental, social or spiritual, that pain is a motivation, and there is a vacuum, a need, a need to have the pain eased, and when one has a need and turns toward the Light, whether this Light comes through your local doctor, through your local aspirin bottle, or through your local friends, or wherever it comes from to ease the pain; the Divine may come through any type of place, but if entities are truly seeking the Divine and want their bodies filled with Light, they will be able to discern the Light from the Darkness and the stranger off the street may be a channel for Darkness, but if the entity is seeking the Light, that entity can perhaps alter that stranger off the street, not seeking the Light from the stranger, but can bring Light through the stranger, or to the stranger.

This Awareness indicates that the key is to always seek the Light, and if one always seeks the Light and Darkness enters, then one must go around the Darkness toward the Light.

This Awareness indicates that seeking the Light does not automatically keep you from running into Darkness, but if you are seeking the Light, you can perceive Darkness as Darkness and Light as Light, and know which way to go. This Awareness suggests that you fill your vacuum, you fill your needs in a manner that allows you to move toward the Light; that by fulfilling your needs with promises from Darkness, through theft, through greed, through manipulation, through deception; these gifts from Darkness, these will not satisfy a permanent need, even though they may bring a temporary gratification.

This Awareness indicates your greater and more permanent need can be satisfied only through the openness, the honesty, the universality, and the movement toward Higher Wisdom and Understanding and Light.

ED's Note:

The 'Christians' around this area a few years back are a good example of what Awareness just described, for they not only vocalize their new-found 'enlightenment' in Jesus, but they drove around in cars with huge bumper stickers which screamed: 'I FOUND IT!' Things got so bad I almost threw up every time I'd drive to the postoffice and see at least 3 or 4 cars there with that slogan. To help counter these visual attacks, I ordered a bumper sticker of my own from an ad I saw in 'Mother Jones' magazine. This bumper sticker loudly proclaimed: 'I FONDLED IT!' With a perverse sort of glee, I would drive around and deliberately park my car next to or between those numerous cars with the 'I FOUND IT!' bumper stickers. Strangely enough, after about 3 months, these 'I FOUND IT!' stickers seemed to disappear and only an occasional one is seen anymore. Because of this, I removed my bumper sticker, but I did save it, just in case, I may need it again, because I notice the Christians are using a new ploy: they are putting out bumper stickers that say: 'EUREKA!' (Latin for 'I Found It'). Possibly a bit more subtle, but if I see too many of them and start feeling that I'm going to throw up, I just might have to put that old bumper sticker of mine back on the old flivver.

"FRIENDS OF THE INNER LIGHT"

-- THE QUAKERS

QUESTION:

Awareness, it seems to me that of all the various types of Christian churches and branches around, that the Quakers, those entities calling themselves Quakers, come the closest to contacting the Light. Their service, for example, consists not of sermons and readings, but of entities all sitting quietly and silently in their Friends meeting rooms, and when the Spirit moves them, they vocalize the message from the Higher Sources. Does Awareness see that as a valid observation?

COSMIC AWARENESS:

This Awareness indicates that the original movement of the Quakers, the original intent and purpose, the original nature of the Quakers was the worship of the Divine Light. This Awareness indicates in fact, the original name of this Quaker religion was called the *Friends of the Inner Light*. This Awareness indicates that these entities were essentially interested not in words, but in actuality, and the actuality of the Light as a universal concept; the Light being the Christos, or the crystal clear Light of the Divine, the Christ Consciousness.

They saw this as being Universal Symbol and Reality, and that this Light was the only thing necessary, the only point in one's being, the only purpose in one's life was to be with the Light. They saw the religious trappings of the various churches as having overemphasized the structure, and as having lost contact with the Light, and the names and the prejudices and the hostilities and fighting between religions as being quarrels over names for the Light, and these quarrels or wars over the name, these religious wars, as being unnecessary, and thus they chose the name: *Friends of the Light*, for this would be neutral.

This Awareness indicates that these *Friends of the Light* were seen as heretics to the religious communities of the day, and therefore were looked upon as rebellious and out of convention and away from tradition, and they became subjected to persecution by the established religions, which influence the governments and the citizenry and thus these entities being persecuted, were often hauled into court for their religious convictions. The name Quaker came about when the judge, seeing how they shook, as they spoke of the Light, how they quaked in their fervor and defense of their philosophy, referred to them as Quakers because of the shaking in their emotional zeal.

This Awareness indicates that today these entities call themselves the *Church of the Friends*, and also call themselves Quakers. This Awareness indicates essentially, the Quakers understand the worship of the Light. This Awareness indicates that there are principles involved in the worship of the Light which are also important to understand; that entities can pursue the worship of the Light through the Quaker philosophy, and it works, just as likewise, the worship of the Light through the Christian philosophy, under the name of Jesus, the Christos, and the method used in conversion, -it works also, and also the Hindu philosophy and the philosophy of the Buddha...they all lead toward the Light.

This Awareness indicates that *It* advocates that entities understand the nature of the approach to the Light; that it is not urgent or important that entities have any more than one route to the Light. If entities seek the Light through meditation, that is fine; if entities seek the Light through Christian conversion, that is fine; if entities seek the Light through the Hindu Yoga, or through

Buddhist teachings and techniques, that is fine; if entities seek the Light through various types of systems and it reaches the Light, then that is fine.

This Awareness suggests however, that for *Its* ministers and those who seek to be more cosmically aware, *It* suggests that they understand the nature of the Light so that they can pursue any or all of these paths if necessary, and understand how and why these paths work. This Awareness suggests that the Huna philosophy, when understood in its essence, as given by this Awareness, is that which best explains the nature of the Light in its relationship with the conscious and subconscious aspects of one's being.

This also embraces and accompanies the psychologies of the day so that entities bridge the fields of religion and psychology in the same principles, or same philosophy and patterns. This Awareness indicates the conscious, subconscious and Superconscious, or the middle self, the low self, and Higher Self, or the man, the Holy Ghost and the Superconscious or Christ Consciousness; these being the same, and the path being to remove the blocks which are lodged in the emotions, to allow the Light to enter into the being, whereby the Christ is brought into the being and the being is anointed with the Light.

This Awareness indicates that all of these methods and teachings are beneficial and have their merits. This Awareness suggests that it is not imperative, but is desirable that entities understand the nature of the Light so that they can see how all of these techniques of reaching the Light are valid and have their place, and in this manner they can choose which route they desire to travel in being with the Light, or in travelling toward the Light.

All Paths to the Light Hold Truth (Closing Message)

This Awareness indicates that while all of these various religions have their route toward the Light and these different paths are essentially ways of achieving enlightenment and are ways of being one with the Divine, there is generally seen a competitiveness between these religions and these different paths and a lack of credence or respect for the other paths, and thus these, each seeing themselves as the proper path, may tend to condemn the others as being false.

This Awareness indicates that *It* wishes *Its* ministers to understand that none of these are false, and that all of these have some truth, and some merit, if entities understand the nature of the Light and the methods used by these systems, and therefore to respect these systems for what they are and for what they can do for those who are on the path. This Awareness suggests that the fact that an entity is in the Light and others are struggling to *find* the Light should not lead that entity into vanity, or feeling that he or she is enlightened and that makes others inferior if they have not yet become enlightened.

This Awareness indicates that the entity who is truly enlightened looks and sees the Light in every eye, behind every face, and sees that each individual is enlightened, even if they do not yet know this themselves, even if they believe they are lost, for each individual is in the body, living in the universe of Light, in which Light is the Force that creates life. The life, the Light and the Way are everywhere present.

This Awareness indicates that as the Christ spoke of *Itself* as being the Way, the Truth, the Light, *It* was describing that energy of universal consciousness which is everywhere, and if entities are *anywhere*, they are *in* the Light, *on* the Way and *are* Truth, and are One with the Christ, even if they themselves do not realize this. This Awareness indicates that those entities who identify themselves with Darkness are those entities who most need to have Light projected upon them, who most need to be informed of the Christ within them.

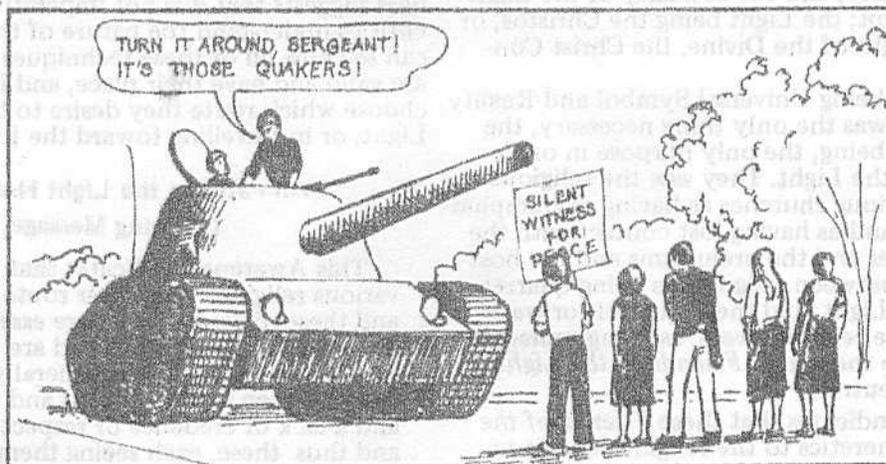

This Awareness suggests that it is more effective to tell an entity that there is the Divine Light, the Divine Force, or the Christ Within the entity than to ask the entity to let the Divine Force enter. It is more effective to inform the entity that the Divine Force is already there. This Awareness indicates that this deals, this applies also to those forces which entities perceive as being demonic; that wherein you are confronted with a demon from the deep, that you inform this demon that the Divine Light of Christ is deep within this being, and is growing stronger, and stronger and stronger, and that there is nothing it can do to avoid growing into the Light.

ED's Note: for more information on this subject, please refer to 'Revelations of Awareness' No. 82-16 (Contacting the Light); \$3.00 from CAC. For the complete explanation of the Light, as mentioned by Awareness, please refer to the Scorpio Correspondence Lessons (12 for \$10) available from CAC.

In reference to the Quakers, CAC has supplied information on their activities numerous times, and suggests members interested in contacting a local group of these entities to check the Yellow Pages of the phone book under

'Churches' and look for the name of 'Friends' or 'Society of Friends'. We also recommend the monthly publication of the Quakers, Friends Journal, 1501 Cherry St., Philadelphia, Pa. 19102 (\$12 for a year). We also suggest for those wishing to understand the Quaker philosophy to read the book written by its founder, George Fox, called the Journal of George Fox, \$8.50 postpaid, from Friends United Press, 101 Quaker Hill Drive, Richmond, Indiana 47374.

CAC also recommends that the membership contact and support the American Friends Service Committee, 1501 Cherry St., Philadelphia, Pa. 19102. Since 1914 this worldwide organization has worked actively for peace and given service to those violated by war. This group is in the forefront of the peace movement, the nuclear freeze movement etc. and can help you organize peace vigils, marches, and seminars in your area upon request. If nothing else, please write these people and ask for their free information. CAC also recommends the various Quaker camps and schools as a place to send your children for an introduction to the Light and a basic and sound moral introduction to life. CAC also recommends that the membership, wherein possible, contact their local Quaker group and sit in on one of their meetings whereby they contact the Light. You will be very pleased to know that these entities are more like yourself in your philosophy and belief than you might imagine, (and they probably never heard of the concept of 'Cosmic Awareness'). (Avaton).

"A Quaker Fantasy" by Don Condon, Ben Marchant, and John Guarnere

"FALLING" IN LOVE... WHAT ACTUALLY HAPPENS?

QUESTION:

Dr. J.D. asks: "Why does the heart appear to 'fall' when one falls in love, so to speak? What physiological and psychic changes take place beside the obvious? My aunt used to say that 'love was a bubble that appeared in the head, and burst in the pants.'"

COSMIC AWARENESS:

This Awareness indicates that there is a chemical that is triggered within the brain when two entities find a rapport that is commonly known as love. This Awareness indicates that this chemical as that which affects the entire system. This Awareness indicates that the chemical as that which when triggered can lead the entity into a kind of euphoria state. This euphoria condition has physiological effects that affect not only the heart but other organs also.

This Awareness indicates that it affects the heart in considerably greater degree than many of the other organs. This Awareness indicates that the analogy by your aunt as that which is most vivid and most descriptive. This Awareness indicates that the chemical as that which has been identified, that this is not seen at this time through this Interpreter. This Awareness indicates that there will be more on this chemical in future literature as more research is done in using this chemical.

This Awareness indicates that the chemical is triggered by the senses, particularly the senses of sight and smell. This Awareness indicates that it is enhanced by mentally dwelling on the object which triggered the chemical. This Awareness indicates that this however, this chemical is not a chemical that causes love; rather, it is a chemical that is released which entities associate with as love. This Awareness indicates that there are many types of love wherein this chemical is involved. This chemical as that which triggers certain reactions through the hormone system and through the endocrine system.

This Awareness indicates that it gives a certain type of vitality and euphoria. This Awareness indicates that it is akin to the chemical which entities receive after they have been involved in great struggle, such as a competitive race or effort to achieve or accomplish something. This Awareness indicates that the chemicals which are released in the brain at that time, affecting the hormones are closely acquainted or associated with this particular type of chemical that is identified with the love syndrome.

This Awareness indicates that in actuality, the concept of love in regard to this symbol which is often channeled into energies of romantic escapades; these energies are not exactly the same, nor are they actually representative of the concept of love. This Awareness

KAVA KAVA -- AN APHRODISIAC: DOES IT REALLY WORK?

indicates that there are some entities whose hormones and endocrine system allow them to express an energy that is perpetually loving in nature, whereas others exhibit an energy that is seldom loving in nature. This Awareness indicates that in either of these cases this chemical is not necessarily the cause, but may be triggered more or less freely according to the nature of the individual.

This Awareness indicates that some entities having the more loving nature are more inclined to have this chemical triggered under certain circumstances, while another entity who is very lacking in love in his or her nature may seldom have this energy triggered. This Awareness indicates that this energy triggering in the brain as that which receives its motorization or the impetus from the heart chakra, or that which is known as the thymus chakra.

This Awareness indicates that these energies in the chakras are those which are essentially set according to the hereditary, astrological, and environmental and psychological development of an entity. This Awareness indicates that diet also plays a part in this. This Awareness indicates that there are certain substances that can also trigger these chemicals. These substances may be in areas known as aphrodisiacs, or in milder areas wherein less violent energies are triggered.

WHEN LOVE COOLS.--WHAT HAPPENS?

QUESTION:

That 'euphoric feeling' doesn't last too long for most entities as I understand it, and that's what they mean when "love cools".

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. That essentially the euphoric feeling and chemical by the mingling of auras or by the emanations which entities feel toward one another; the auras or vibrations which are sent forth can trigger that energy. This Awareness indicates that these vibrations being unique to each individual, according to his or her astrological chart, his or her heredity, his or her age and development and environmental and social values,--these all contributing to help trigger the energy.

This Awareness indicates in the terms of modern language, this is that which is referred to as being "turned on" by someone, or being "turned off". That it is the vibrations and the general attitude one holds toward another in terms of his or her own value system that allows the chemical to be turned on or off. This Awareness indicates that the chemical can even be turned on without another object in view, for one can simply have fantasies and fall in love with a fantasy object.

This Awareness indicates that this type of love is that which is but chemical love and is not necessarily lasting in nature, although it can serve as a catalyst to get entities together so that true love can develop, wherein empathy and concern for the welfare of the other develops to a degree that brings about a relationship that is more important than personal gratification or satisfaction.

NBC says Reagan prepares for N-war

NEW YORK (UPI) — The Reagan administration is preparing for a nuclear war fought over a period of two months or longer with salvos of atomic weapons alternating with negotiations. NBC News reported yesterday.

Daily Olympian
March 10, 1984

The report said a secret Defense Department plan that went into effect in October envisions the U.S. fighting, surviving and winning a protracted nuclear war with enough of its nuclear arsenal left over to fight again.

QUESTION:

A company called Health Unlimited, in Fairbanks, Alaska, sent a flyer on an herb called Kava Kava, and it says "Kava Kava is an herb used as an aphrodisiac during ceremonies and weddings for hundreds of years in Hawaii and other far East islands. To prepare, add 1-1/2 tablespoons to one cup (approx. 8 oz.) of water and let sit for 5 minutes. Strain...may add mint tea or honey for flavoring. Not recommended for driving or operating machinery afterwards." (I think it's prepared like a tea). Would Awareness comment on this herb Kava Kava? Is this information correct?

COSMIC AWARENESS:

This Awareness indicates that this is seen as correct in its aphrodisiac effect. This Awareness indicates that it appears this can be used on a limited basis without significant side-effects. This Awareness indicates that it should be considered as approximately as harmful as the drinking of coffee or other high caffeine type drinks. This Awareness indicates that it appears to be somewhat more harmful in terms of side-effects than the average cup of coffee, but that a cup every two or three days is not seen as being harmful to any significant degree. This Awareness indicates however, that over a period of time it could have some harmful effects on the system. There appears to be certain alkaloids in the use of this substance which should be kept to a minimum. This Awareness indicates that it appears this substance in general can be beneficial if used on a limited basis of approximately once per week. This Awareness indicates that this being more than an aphrodisiac. That in using this approximately once per week, it can help to energize the hormone systems throughout the body, and in this manner assist the flow of energies into areas which may otherwise be deprived of certain hormones.

This Awareness indicates that when used excessively it can create too much of an overload on the system, and thus deplete the energies, leading to an imbalance in the metabolism.

ED's Note: this is expensive stuff: \$9.95 per ounce or \$89.95 per pound. It may be available in some healthfood stores at a cheaper price, particularly in Hawaii, or herb shops. There is a rumor that someone on the CAC staff sneaked an order out for an ounce of the stuff the other day and plans to sneak some into Vicki T's tea pot (she is always brewing some kind of herbal tea anyway, and shouldn't notice any difference in the taste.) She also has some pretty foxy friends who stop by every once in a while for a spot of tea, so it will probably be tried on them too.

(If it works, I'll let you know how to order some. If it doesn't, I have saved you \$9.95.)
Avaton.

**HIP DYSPLAGIA
IN DOGS
AND OTHER
PROBLEMS:
SOME
HELPFUL
HINTS**

QUESTION:

J.N. in Virginia, in a letter to Vicki, informed her that D-Cells were working wonders for keeping fleas off her dog,--this being D-Cell water. She mentioned that she has an old dog, a big dog that's 11 or 12 now, that she thinks she's going to have to put to sleep because he has hip dysplasia, I believe, and she says she can barely get her hind legs up now, and she'd like to know: Does Awareness have anything to say on this matter of hip dysplasia in large dogs? A possible prevention maybe?

COSMIC AWARENESS:

This Awareness indicates that much of the food on the market for dogs as that which is high in ash, and excessive food of this type contributes to this condition. This Awareness indicates that this in part simply due to excessive aging. This Awareness suggests that GH3 as that which can be very beneficial in reversing this effect. This Awareness indicates also that the aloe vera and the Evening of Primrose oil can be beneficial. This Awareness indicates that the chelation tablets can also be beneficial. This Awareness suggests also that these are all somewhat expensive for an animal, but if there is a great desire to help the animal, that these can be effective.

This Awareness indicates that apart from these methods, this Awareness suggests that you may find ways of giving your dog more Vitamin C, that this can be beneficial, and that the Willard Water can be beneficial when accompanying the Vitamin C. This Awareness suggests that you may wish to give your animal vitamins and minerals; that it appears this animal could benefit from the use of vitamins and minerals. This Awareness indicates that these may be given either by opening the dog's mouth and dropping these pills down his throat, or you may mix the substances with food which he eats. This Awareness indicates that all these methods all appear to be beneficial for the animal.

This Awareness indicates that also the use of the Polarizer can be helpful, and that warm baths, wherein this animal is placed in a warm bath for some time on a daily basis, this can be beneficial, but that it is only dealing with the symptoms and not the cause. This Awareness indicates that in giving the animal GH3 and Evening of Primrose oil, it appears that these can be of greatest value; that the others also can be of value.

OUR EXPANDING UNIVERSE

Closing Message
May 19, 1982

This Awareness indicates that there is seen a great hall, filled with walls on four sides; these walls reaching higher and higher. There is seen a map drawn upon the wall which moves and changes as the wall grows higher. There are seen energies of people upon this map, and these energies of people increase and grow higher, and the general movement upon this wall is likened unto a flame which, as a map which grows

higher, as people's energies which grow higher, as a wall which grows higher, grows as a flame, higher and higher, up the ever-growing wall. This Awareness indicates the symbolism of this image is that which is life, moving through time. That as life begins moving through time, the stage upon which life exists increases proportionately as the life forces also increase. That the energies of the map, the terrain of the universe, increases as the space or wall of the universe is pushed back. The terrain increases, the map increases in size, the humanity, the features of human shapes and energies begin to expand and grow as the universe expands and grows, as the terrain expands and grows, and the flame of life, the energies of humanity, the energies of consciousness expand and grow ever larger, constantly pursuing and creating that expanding wall known as the universe.

This Awareness indicates that as consciousness expands, it pushes back the boundaries of the universe.

WHO CREATED THE ELOHIM?

QUESTION:

A question from E.L. of Mesa, Arizona. "A thought came to me that I want to pass on, if possible to be examined by Cosmic Awareness: Is it possible that the world banking system, with all its greed and desire to rule, is just being used,--allowed by the great cosmic minds to put large amounts of capital where it can be obtained to promote great new technologies faster and more world-wide, which couldn't have been done with small banks and small ideas, to bring us faster into world prosperity and knowledge, and prepare us for our place in the universe sooner?"

COSMIC AWARENESS:

This Awareness indicates absolutely. This Awareness indicates that this as that which has been programmed out of ancient Egyptian times whereby those entities who hold forces of greed and power as their purposes, would work to create that control and the greater glory of their power and grandeur...only to find that in the end, the meek inherit the earth.

WHAT THE GREEDY BANKS

DON'T REALIZE

QUESTION:

C.W. of Canton, Ohio asks: "We'd like to know who created the Elohim. Somewhere along the line, there was a beginning, but how was this started?"

COSMIC AWARENESS:

This Awareness indicates these entities created themselves. This Awareness indicates that these entities as aspects of the Universal Deity; and moved out into consciousness, moved out into space in a particular direction. This Awareness indicates that these entities in time, (over eons of time), began to grow and develop greater levels of awareness and learned to move in a different direction, a perpendicular direction,--transcending time and space. This Awareness indicates these entities moving through time and space on direction, learned to transcend that direction, and moved out of time and out of the physical space, and into the etheric levels. This Awareness indicates these entities, therefore, became eternal and ethereal.

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington 98507.
