ISSUE NO. 258

(Helping people become aware)

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything. Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

LIFE AFTER

DEATH

(Part 5)

SACH KAHN--THE AREA BEYOND HEAVEN

QUESTION:

In the last session, Awareness made reference to "beyond heaven" wherein which there are invisible energies. Could Awareness give a little more information on that, please, and indicate whether entities go there and return, or does the average entity ever go there?

COSMIC AWARENESS:

This Awareness indicates that this as that area which is known as Sach Kahn. This Awareness indicates that this also as that which is essentially nameless as pure essence, or a state of beingness or blissfulness, which is not so much a place at all, but rather as a state of being all. This Awareness indicates that Sach Kahn, as it is called by many, is a state of consciousness, a place in consciousness wherein entities may eventually go when they have been given the direction and path and are able to follow the sound currents and the currents and energies of light and vibration of that which is the Clear Light.

Sach Kahn essentially is that of the Clear Light. This Awareness indicates that heaven as being a state in the Cosmic Being which corresponds essentially, to the upper three chakras of an individual experiencing meditation. Heaven being a state of consciousness wherein the chakras of God, the Universal Being emanate energies of a nature which provides images, music, bliss and joy, and praise for the pineal, or identity of the Creator. This Awareness indicates Sach Kahn as a state of being, likened unto a chakra or halo over the crown, above the head of the Deity.

Sach Kahn as likened unto the place where the Deity moves to find spiritual bliss. This Awareness indicates that all entities have the opportunity to move to these areas in the consciousness of the Deity. This Awareness indicates that in reference to the present message, entities may also keep in mind that the Deity being discussed is the Universal Consciousness, and the individual cell within that Universal Consciousness is the individual soul or being, inside the body of that Universal Deity.

This Awareness indicates that in looking out with your tools of learning: your eyes, your ears, your sense of touch; in looking out at your world, at your universe as a cell, or soul in the body of the Deity, you are limited as to what your senses can reveal, even as the cell in your body is limited as to its capacity to understand and know the nature of your self, even as it is limited in its capacity to understand, and look out from its position and know its relative place in your body, even as it's limited in its capacity to understand the nature of the fluids circulating in the space of your body, even in its incapacity to understand and realize the nature of your organs and nerves, and the energy fields which are out there in your body; likewise, you, in looking out in space at the universe, are limited by the restrictive sense systems which you have: eyes that only see one octave of vibration, ears that hear only a small portion of the sounds, tactile centers, nerves and extensions which only reach a certain distance from your brain. You are limited in your ability and range as to understanding of the universe and the energies which surround you. You look out and see the lights of the sky, and these seem close enough to touch. These seem far away and remote.

This Awareness indicates that these lights, these stars are nerve centers of the Universal Being, and are attached through certain energy fields to you, as a cell in the body of that being.

This Awareness indicates that you do not see the currents of plasma, akasha and ether in its various forms, moving through space, carrying with it life forces which transmute, which devour, which create throughout the Universal Body of this being. You see through your telescopes, through your machines and instruments, more than you can see with your eyes, more than you can hear with your ears, yet these are still limited and still inadequate in understanding and grasping the reality that you are a cell on an organ, within the body of a being.

This Awareness indicates that as it is above, so it is below, but all of the senses and the extensions of these senses which are the fruit of the tree of knowledge, and your rational mind, all of these are only tools to assist in understanding, just as the cell in your body may develop sensitivities which allow it to discover something more, to reach out and touch someone, to reach out and feel something new. The cell evolves, entities evolve, civilizations evolve and grow and extend their levels of awareness, yet still they are limited, even though they have extended and doubled or tripled, quadrupled their understanding.

This Awareness indicates that the 'knowledge explosion' which is occurring on your plane, is, to this Awareness, to the body of the universe, likened unto a cell in the body which has been stimulated to life, which has been restored to vitality, which has lit up somewhat. This Awareness indicates that it is a magnificent experience for the cell, and for these vibrational fields connected to, and in relationship with the cell. It is a magnificent experience for those atoms and those individuals within the cell. This Awareness indicates that it is a movement that is echoed and repeated many times within the body of the universe, yet it is always valued greatly, even as an orchestral concert values each note as it lights up and plays its part.

This Awareness indicates that these movements of energies, collectively and individually, growing into light, are to the Universal Being, activities of the music of the spheres, wherein the sound is struck, the vibration appears, light is experienced, and the concert continues. This Awareness indicates that entities seeking to reach Sach Kahn, may follow the sound currents and the currents of light, and move with these currents to these energy fields.

This Awareness indicates that this as something which needs further discussion, but which at this time is not available. This Awareness indicates that this as available through other sources, and may be made available in part through this channel at a later time.

QUESTION:

At one time, in describing *Itself*, Awareness indicated something to the effect that 'It was next to that which did not speak'. Was *It* referring to the state of Sach Kahn, just indicated?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative.

THE PASSING OVER EXPERIENCE...
HOW ENTITIES ARE ASSISTED

QUESTION:

There was a few more questions relating to the subject of the other day of the afterlife experience in the spirit world. Somebody sent a copy of a recent *Enquirer* story called, "Mae West's Spirit Speaks to Pals Through Psychic", and there's something a little interesting here other than the usual psychic stories. I'll read a little of this. It says: "Speaking through psychic Clarisa Burhart, the actress who died in November, 1980, told four friends how she's trying to communicate to them, how a heavenly organization that is called the 'Crossover Club' has helped her to adjust, and how she'll soon be helping others there herself.

It goes on and on, this article, and towards the end it says, "Mae West is telling me, there is a place in the Beyond called the Crossover Club, and it is helping her to adjust to this new dimension. There are a lot of people at this club who were in show business, and soon she herself will start assisting in this club, greeting some of those who will be joining her on the Other Side. The actress has also tried to contact friends in their dreams, Burnhart said. And the reporter interrupted and said, "Mae has appeared in my dreams many many times, and very vividly." And another person added, "And in mine as well. In my dreams she is at her loveliest, appearing young and vibrant."

This is the first time I've heard reference to a Crossover Club. Could Awareness expand a little bit on that, please?

"Come up and see me some time"....

THE CROSS-OVER CLUB:
THAT GREAT NIGHT CLUB IN THE SKY

COSMIC AWARENESS:

This Awareness indicates this appears to be an action initiated by entities who.... This Awareness indicates that this action of assisting entities in the passing over is quite common on the 'other side', that the title 'Crossover Club' as that which is relatively new, and as being a kind of unique activity initiated by entities as indicated,--in a certain group. This Awareness indicates essentially, the passing over, whereby those on the other side assist entities who recently pass over, is a natural action, of a kind of social activity or occupation from that so-called 'other side'.

This Awareness indicates that this is not too unlike having nurses and doctors, mothers, sisters, brothers and friends assisting entities when they come into this side, wherein they are born as babies, and are assisted by those helpers, to grow and adjust to this third-dimensional material world. This Awareness indicates that likewise, in passing over into the next plane, there are also those energies in what may be termed the lesser lights, wherein entities are assisted by their loved ones, friends, familiar faces, or new contacts.

Moving into the Clear Light

This Awareness indicates that the individual action of passing over and moving into the Clear Light as that which occurs at the moment of death. This action is in itself not accompanied by other entities. This Awareness indicates however, the action following such may find the entity coming in contact with others. This Awareness indicates that many entities experiencing a passing over, and coming directly into contact with other friends and loved ones who have already previously passed over, such messages are often correct in that the entity is moving not directly toward the Clear Light, but into lesser dimensions.

This Awareness indicates those entities who move directly into the Clear Light at the moment of death will not necessarily see other faces or other entities until after the Clear Light experience. This Awareness indicates in other instances, entities may witness memories and may see faces of entities in the afterlife, who have been with them previously, but have passed over, and these entities may tarry for a period with their loved ones before moving on to other dimensions or realms in the afterlife.

This Awareness indicates also that entities should recognize and understand that the passing over experience is not always that of a single action, wherein the entire being moves to a particular place. This Awareness indicates there is that which is known as the astral shell, whereby an entity's astral body, or shell, may remain in a particular area and move through its experiences, while the entity's more higher, more subtle bodies,--the etheric bodies,--move into the Clear Light.

This Awareness indicates that these bodies as having different directions, not always being totally integrated after the passing over. This Awareness indicates essentially, the astral body is associated with the emotional energies of the entity, the etheric and causal body is associated with the entity's spirit, or that which is the Higher Mind. This Awareness indicates the mental and etheric bodies as being of a finer nature than the astral emotional body.

Astral Body Energies

This Awareness indicates that in the passing over of the astral body, many of the energies of the astral body are often used to feed plants, and the plants absorbing those energies of the astral body become healthier. This Awareness indicates that the feeling, or more subtle energies, the higher spirited energies of spontaneity may be used to help give animals their sense of individuality, their personalities. In this manner, certain energies of a person may end up in an animal for a period of time, while helping the animal to develop a higher direction than would otherwise have been experienced.

This Awareness indicates that these energies often serve as a kind of personality for the animal. This Awareness indicates that these are essentially subdivisions of the astral energies of an entity, and in part, energies from the mental body of an entity at the time of passing over, wherein these energies are released or dropped, at least for a temporary period, while the etheric body moves on toward the Clear Light. This Awareness indicates that at the time wherein the entity, having basked and bathed in the Clear Light, as the essence, or etheric body, when and if the entity begins a movement to

return, these vibrations and astral energies which have been discarded may be again drawn back to the entity as he or she approaches rebirth on the physical plane.

HOW LONG DOES IT TAKE TO PASS OVER?

(IT DEPENDS ON YOUR IDENTIFICATIONS)

QUESTION:

Awareness referred several times to the Clear Light at the moment of death. The Clear Light actually is at the end of the trip through the Bardos, is it not, that takes approximately 40 some days?

COSMIC AWARENESS:

This Awareness indicates that for different entities it is a different experience. This Awareness indicates that for some entities, the action appears at the end of the tunnel, or the end of the movement into that crossing over, and this can be quite rapid, or shortly after the passing over experience, this depending on the identification of the individual's soul and interests. This Awareness indicates that by identification, *It* refers to the quality of acceptance, or what the entity most identifies himself or herself with.

This Awareness indicates that if the entity identifies with friends on the physical plane, the entity will cling to those friends and those energies of the physical plane until this is no longer possible. This Awareness indicates that when this is no longer possible, the entity then may cling to that which is next most important, and in some instances, this may be those who have passed over previously, such as a mother or father, in which case the entity may then be drawn toward their mother or father who has passed over, and will see these parents waiting for them.

This Awareness indicates for still others, the entities may be most identified with concepts of warriors, concepts of vice, drugs, lust, or of various kinds of appetite and emotional energies, and dependencies. This Awareness indicates when this occurs, the entities may move into areas wherein there are grotesque energies and forces which draw them in to their expectations and identifications.

This Awareness indicates that wherein there is an energy within the individual which is most highly identified with the Clear Light, with the Christ Consciousness, with the Buddha Consciousness, or that which is the Christos, the Divine Light, by whatever name entities choose to call this; wherein this is the priority identification, and the entity chooses to move toward this light, then the entity in passing over will move more quickly toward this light and will forego opportunities to linger in the lesser realms, and various images.

THE TRIP TO THE LESSER LIGHTS....

(More on the astral shell)

QUESTION:

Those entities that don't make it to the White Light, but are detoured off because of heavy identifications with lust and drugs and alcohol and so forth; do these entities stay on these lower astral levels until these identifications are burned off, or do they reincarnate right back into the earth plane?

COSMIC AWARENESS:

This Awareness indicates that all entities in passing over, to one degree or another will witness the Clear Light, but many entities will not be willing to approach this light, but rather will turn from the light, and then begin seeing the lesser lights. This Awareness indicates that these entities, in turning from the light and moving toward the lesser lights, avoiding that which is the truth, the Clear Light, the Christos; these entities, fearing that Light which would reveal themselves to themselves, instead turn toward those areas of comfort to them, whereby they seek their old patterns, old friends, old habits, and old appetites. This Awareness indicates that they may even seek their old miseries, and wherein they enter into these lesser realms, such as the Bardos of that plane of limbo, or those actions of hanging around and haunting those places of low vibration, such as taverns and dens of drug use and so forth; these spirits, in hanging around those areas as astral shells, and the energies involved in such, may linger in those areas for what appears to be an endless time, waiting to be satisfied.

This Awareness indicates that often, those spirits seeking drugs, alcohol, food or some other physical gratification which is not available to them as a spirit, will attempt to enter into the body of one who is loosened from his shell, from his physical body, by the spirits of alcohol or drugs, and will seek to enter into that entity in order to partake of the effect of the food, liquor or drug. This Awareness indicates in this manner, the spirit or astral shell of an entity, has certain of its energies' appetites gratified for the moment.

This Awareness indicates that it is in this way that in some instances, the lower astral shell bodies of departed spirits may enter into and possess individuals, causing them to have multiple personalities, or schizophrenia, or the action of being possessed. This Awareness indicates this may occur not as a strong and dramatic action, but may occur temporarily, quite briefly, or wherein the entity appears to be somewhat altered in personality by the use of drugs or alcohol or such, and whereby the entity still being himself, knowing his name, acts quite different than when not under the influence.

This Awareness indicates it is not so much that the spirit drives out the entity, but more that the spirit influences and shares or involves itself in the participation of the substance, the alcohol, drugs or whatever. This Awareness indicates that this essentially is in most cases, the astral energies of the departed, whereas in most cases, the etheric bodies, if developed, will rise to higher levels. This Awareness indicates that it also must be understood that many entities who pass over, have not fully developed their etheric bodies. Some have not even developed much of a mental body. Most entities however, have developed an astral shell, an emotional body, and these emotional bodies, or astral shells, can often be quite troublesome to those who are experiencing the invasion or effects from these astral entities. This Awareness indicates this because the shells do not operate from reasonable behavior patterns guided by mental or spiritual insight, but rather are guided by appetite and emotion.

This Awareness indicates that wherein an entity is more highly evolved, the astral shells generally also are more highly evolved, as a result of having been associated with a highly evolved mental body, and

highly evolved etheric, or spiritual body. This Awareness indicates that when an entity's etheric and mental bodies are highly evolved, the emotions generally are more refined also, and the astral shells then are not of such mischievous nature. This Awareness indicates that wherein entities are highly evolved, their three bodies may be integrated so that the emotional shell, or astral shell follows with the mental body, and the etheric body, and the entity ascends totally into the Clear Light without leaving behind discarded shells.

This Awareness indicates the ultimate development would occur when the physical body itself also is brought along, so that it is not discarded as a shell, but rather is transmuted and brought along with the three more subtle bodies, into the Clear Light: this as a transformation from physical, into a Light Ascension body. This as being quite rare, particularly in the Western world. This being somewhat more common in areas of India and Tibet.

ASCENDING WITH THE PHYSICAL BODY (More on Babaji and apparitions)

QUESTION:

Those entities who do ascend with their physical body, are they capable of coming back to earth at will, as an entity?

COSMIC AWARENESS:

This Awareness indicages that this as even more rare, but as a possibility. This Awareness indicates the entity Babaji, as described by your Paramahansa Yogananda, as one of these who is capable of reappearing at will. This Awareness indicates there are also others. That these are not commonly known by name or reputation on this plane. This Awareness indicates that there are also those energies which can reappear not in the physical, but in astral levels, or astral shells, to create apparitions which are seen of those who have passed over, and these apparitions may be recognized as anything from a saint to a monstrous being, depending on their own nature and who is judging what is being seen.

This Awareness indicates that in the fictionalized story of Macbeth, wherein he saw apparitions of those who he had killed, this as characteristic of what would be commonly recognized as seeing the astral shell of an entity who had been killed; this as known as a ghost in common terminology. This Awareness indicates that of course, not all ghosts pass over from being killed. This Awareness indicates that *It* is not so much referring to this type of apparition, but rather those entities who have passed over carrying with them the etheric body, the mental body and the astral body, and ascending into higher vibrations on the other side, may also have the capacity to return and serve as an apparition to give guidance and assistance to those in the physical plane.

This Awareness indicates this has occurred in various times in history. This as having been reported during the first world war by soldiers wherein there were apparitions guiding them. This also as having occurred in the second world war. This Awareness indicates that such also occurs occasionally wherein an entity passes over and members of the family may be visited by an apparition of that entity. This Awareness indicates that these apparitions often are in an action of giving a message of one sort or another, in order to help those who are still felt to be in need of assistance from the entity who is appearing as an apparition.

This Awareness indicates that there also are those forces in passing over who return to haunt those whom they have grudges against, or wish to harm, or wish to in some way or another influence by their presence from the inner or astral plane, as a haunting of the entity in the physical plane. This Awareness indicates there have been occasions wherein an entity who has been violated and sent to the astral or inner plane, may return as an astral body to haunt the murderer, or the entity who has caused this event, and also there have been instances wherein such ghosts are capable of bringing about a justice from the third dimension, whereby the violator is caught for the crime which was committed.

This Awareness indicates this often is not so much by direct interference, or direct apparition, but more often occurs wherein the astral shell of an entity leads the investigators into the right direction in order to unravel the mystery and find the entity who has created this crime.

The Grandfather Clock Phenomena

QUESTION:

Does the phenomenon of grandfather clocks that stop when their owners die have anything to do with portions of that entity's consciousness leaving the physical dimension?

COSMIC AWARENESS:

This Awareness indicates that this as a possibility, whereby the entity's consciousness could effect the clock through a kind of identification process. In actuality, any object which one identifies with greatly will contain vibrations of that entity. In this sense, an entity's automobile will pick up the vibrations of its owner, and may have a certain kind of essence, or etheric body of its own, besides its physical body. This as likened unto projecting thoughts into a stone, wherein the stone then holds certain concepts which may be read by another at a different time, to psychically pick up where the stone had been, or what the circumstances were surrounding the stone's owner.

This Awareness indicates that this energy being projected from an entity into an inanimate object is associated with that phenomena of a clock stopping at the time an entity, the owner, dies. This Awareness indicates that this is also somewhat highly exaggerated, in that often a clock stops simply because the owner, having died, does not wind the clock, and others neglect or forget because of the traumatic event which has occurred, and therefore the clock, having stopped, may not even be noticed until after the trauma and excitement is over, then the rumor or significance of the clock no longer running becomes mentioned, and the story spreads that the old man's clock stopped short at the time he died.

This Awareness indicates that much of this is more naturally explained than in a phenomena of mystery. This Awareness indicates however, it is also in some cases, the fact that a particular mechanism will not function as well for others as it does for one particular person. This is because that entity has certain psychic agreement with the instrument, and when this is disrupted, it does not function as well.

This Awareness indicates that this is why some entities can operate a machine, while others cannot. This being because the one entity, having such an attunement to the machine, can feel every slight reaction in the machine, and know exactly what to do. This attunement of energies is in part associated with the passing of psychic forces into the instrument or machine.

This Awareness reminds entities of a previous reading in which this Awareness spoke of the neutrino as being the link between mind and energy and mass. This Awareness indicates that the neutrino as that which allows entities to have certain influence on physical matter with their minds.

THE MOVIE

"POLTERGEIST"

HOW FACTUAL

ARE SUCH EVENTS?

QUESTION:

In reference to astral shells and earthbound spirits, Steven Spielberg has put together a movie called *Poltergeist* which is breaking some records, which is his version of what a ghost story should be. There's some interesting occurrences in this movie that I'd like to ask Awareness if these strange things actually do happen. Mainly it concerns a little girl in a family who is communicated to by spirits through the TV set, once the set is off, and they are drawn to her light, and because these entities are not aware they have passed over in most of the cases, they are drawn to the light of this entity who lives in this house. These spirits come from a graveyard which the house has been built over in the story. Now the thing that's interesting is that they are able to open up a small area between the dimensions in the

closet, the room of this entity, and somehow draw her in, and she becomes trapped between these dimensions. The story revolves mainly on the attempts of the parents, through the help of various psychics, to get into this interdimensional area and withdraw their daughter, and during this time they are telling their daughter not to look at the white light which has appeared, because they are afraid she will be gone forever if she does. Of course they manage to finally extract the child through a rather ingenious mechanism of creating an opening into the dimensions. Also, Spielberg has put in a rather interesting 'Dark Force', which one of the mediums in the story refers to as the 'Beast', which is a combined energy of the lower astral that is there to keep the parents from extracting the daughter.

I'd like to ask Awareness, if much of this which Steven Spielberg has put into this movie is actually possible?

COSMIC AWARENESS:

This Awareness indicates that this as being highly exaggerated, and under the physical laws of present consciousness levels, this as being next to impossible at this time, because the consciousness, as entities now are, creates separations between the physical and astral levels, so that barriers are strong and so that the actions exemplified in this movie would not occur in normal conditions, even of the most extreme nature.

This Awareness indicates however, it is "possible", and such events have occurred on this plane, under special and abnormal conditions, whereby entities have been taken from the physical plane and transported, body and all, out of the physical plane. This Awareness indicates that such events require that an entity be totally open, open to receive these energies, that an entity be prepared by communicating and becoming obsessed and controlled by these energies, that an entity be sought by those energies, and that the energies involved be extremely powerful and strong, and that other conditions of a physical nature also be present.

This Awareness indicates that this physical energy would be something on the order of a powerful vortex of energies, such as is noticed in the Bermuda Triangle area, or also in other areas. This Awareness indicates that the graphic pictures and images portrayed in this film as being more imaginative than real, more for special effects than as would in any actual occurrence be found. This Awareness indicates that wherein an entity were to be moved into another dimension, it would occur quickly and without the apparent wind blowing and gravity pulls, and violent forces and images involved. This Awareness indicates rather, it would be more likened unto a shifting of dimensions, such as has been portrayed in certain films associated with the Bermuda Triangle, wherein a negative of the positive begins to occur, and the entity suddenly is elsewhere.

This Awareness wishes to refer entities to a movie of Peter Weir from Australia, known as *Picnic at Hanging Rock*. This movie as exemplifying a true story of entities who disappeared and moved into another dimension, in a situation that was not related to poltergeists, or alien energies, but of natural phenomena of an unusual nature.

OCCASIONS WHEN ENTITIES ARE PULLED
INTO ANOTHER DIMENSION

(More on Invisibility)

QUESTION:

In those rare instances Awareness mentioned whereby an entity is pulled into another dimension; would Awareness indicate for what purpose this usually occurs?

COSMIC AWARENESS:

This Awareness wishes to remind entities of the information given in the book, *The Philadelphia Experiment*, and of how entities were transformed into another dimension through the use of certain scientific tools. This Awareness indicates this as affecting the atomic polarities, whereby the atoms are influenced to be reversed in their polarities. This Awareness indicates that the purpose in this instance was to determine the possibility of making a battleship disappear. This Awareness indicates that the crew also involved. This Awareness indicates this purpose being directed and guided from the standpoint of research and military potential.

This Awareness indicates that in other instances of similar phenomena, the purposes may be from energies of the individual seeking to escape from this plane, or may be from energies of another dimension seeking to bring the entity from the physical plane into that dimension. This Awareness indicates that often there is no purpose involved, but only a series of circumstances which amount to a kind of destiny which occurs, and entities may have a purpose of one type or another, but find that their purposes are unfulfilled because of some strange phenomena that is occurring to them.

This Awareness indicates that the purpose of such is that which cannot always be the same, anymore than asking what is the purpose of the death transition, for each case will be different. This Awareness indicates that there are doors between dimensions, ways of entering and exiting from these dimensions, and the purposes for moving from one to another are of individual nature, and the way in which entities move from one to another are not always the same.

ED's Note: For more information on the 'Philadelphia Experiment,' please refer to 'Revelations of Awareness,' 80-9 (Project Invisibility); \$3.00 from CAC.

INVISIBILITY AND ANTI-MATTER

QUESTION:

In the book, *The Philadelphia Experiment*, the author claimed that most of these sailors who became invisible and manifested back later, got violently sick, many died, and a lot of them went plum insane. Is this true?

COSMIC AWARENESS:

This Awareness indicates that this as in the affirmative. This Awareness indicates the author also spoke of one entity who walked through a wall, in front of his family and was never seen again. This Awareness indicates that essentially this action as having been the result of experiments in which the atomic particles were reversed,

so that antimatter was created. This Awareness indicates this rather known as 'negative matter'--this being a better term; that negative matter as more.... This Awareness wishes to explain this as the polarities of each part of the atom being altered from negative to positive, or positive to negative, depending on their case, depending on their polarity. This Awareness indicates that when these are altered in this manner, the image becomes reversed, and is made invisible to those of this plane, but while on the other side, the entities are capable of seeing themselves and each other so long as they are all reversed in their polarities of their atoms.

This Awareness indicates that antimatter as described by this Awareness in terms of spirit, is that which is nonpolarized, whereby the energies that do not have polarity reside between the polarized parts of the atoms, whether these are of a positive matter or of a negative matter. This Awareness indicates essentially, the astral plane may be thought of as negative matter, and the physical plane as positive matter. That the higher planes, the more etheric planes as being less matter, and that matter itself as being polarized, and spirit as having little or no polarity. The higher and less the matter, the less polarity is involved.

This Awareness indicates that the astral plane and the lower planes as having certain amounts of matter, but as being reversed from the physical plane matter. The physical plane as having the greater polarity. This Awareness indicates this essentially being in reference to the mass or gravity, or density of the polarity and matter.

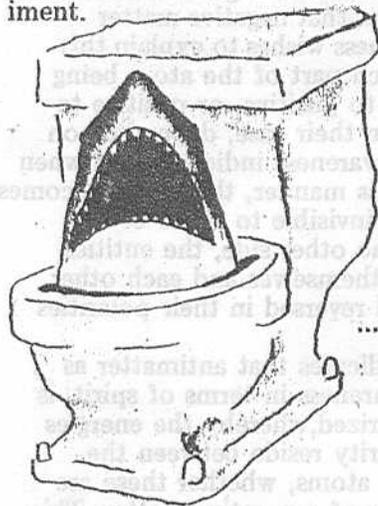

QUESTION:

In reference to the invisibility created through magnetism as indicated in the *Philadelphia Experiment*, Dr. Beter recently claimed that the Bolsheviks have perfected the stealth bomber, which they intend to use as a nuclear first-strike against Russia this fall, and they have used this technique of the Philadelphia Experiment to make these planes invisible. I'd like to ask Awareness, if this is so, will the entities flying these also become sick or go crazy as these sailors did under similar circumstances, and thus defeat the purpose of this particular project?

COSMIC AWARENESS:

This Awareness indicates that in reference to these planes, these are to be pilotless planes, that they would be guided strictly by computer. This Awareness indicates however, in reference to your question, that this may apply to ships which use this system, and that the individuals in the ships are affected somewhat by the invisibility shield. This Awareness indicates however, the new system used in this action is such as to create a shield around the ship rather than to actually make the ship itself invisible. The shield creates a light force around the ship which does not allow for sight to penetrate in order to see the ship. This Awareness indicates entities upon the ship can see themselves and can see the ship. They are essentially surrounded by that invisibility shield of the negative polarity.

This Awareness indicates that these entities who have worked on this project have essentially overcome the problems experienced in the Philadelphia Experiment.

HOW MOVIES
ALTER
CONSCIOUSNESS

...Why more sharks attack
entities after 'Jaws'

QUESTION:

In reference to present consciousness having strong barriers between dimensions; after the movie *Jaws* was viewed by the masses who saw it, it seemed to be a phenomenon that more shark attacks seemed to follow. In a similar vein, is it possible that the interdimensional boundaries will be less solid if enough people view this movie *The Poltergeist*?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that in all of the freedom of thought and freedom of expression, a certain responsibility may also be recognized. The responsibility which occurs along with giving entities freedom of thought requires that the entities also be made aware of the dangers of free thought. This Awareness indicates that as the movie *Exorcist* was released, the phenomena of possessions increased, wherein entities were possessed by forces, and this largely was the result of the power of suggestion brought on by the movie.

This Awareness indicates that in many cases, the publicity of a phenomena is significant only because a movie was released which gave publicity to the phenomena, and thereafter the reports of similar phenomena become worthy of publicity. This Awareness indicates in reference to *Jaws*, and the shark attacks, the publicity given to this as that which increased largely because of the movie. This Awareness indicates however, there also tends to be a breakdown in....This Awareness indicates this appears to be in relation to the power of thought and suggestion upon the mass mind. This being similar to that of an entity's conscious thought having its influence upon his subconscious.

This Awareness indicates that the increase in shark attacks was in part due to the mass consciousness being forced to energize these phenomena. This Awareness indicates that even sharks do have their ties with the mass-mind, and respond to vibrations which are instilled into that biosphere computer which surrounds the planet earth, wherein thoughts of the mass-mind are collected, and wherein sharks being programmed by the mass-mind to be dangerous and violent, as the mass-mind perceives them to be, the sharks will be inclined and influenced somewhat by this energy, to partake of the signals or images contained in the mass-mind and act out the story.

8. This Awareness indicates that likewise, the more realistic and convincing a movie is, the more powerful its suggestion on the minds of entities. This Awareness suggests that you may experience and hear reports of poltergeists in various places around the country being more and more active, this in part as a result of the movie and its effect on the mass-mind, or collective unconsciousness of humans, and also in part the result of greater publicity being given to these phenomena.

EDISON'S TALK-TO-THE-DEAD MACHINE

QUESTION:

There's an article in the recent *Parade* magazine called the "Talk to the Dead Machine". It says that "Thomas Alva Edison, one of the greatest inventors in history, gave serious thought to creating a machine for communicating with the dead. 'I have been thinking for some time of a machine which could be operated by personalities who have passed on to another existence or sphere,' he told *Scientific American* magazine in 1920. 'I believe that if we are to make any real progress in psychic investigation, we must do it with scientific apparatus and in a scientific manner.' While he was vague about the form his device would take, Edison did offer that it would be 'in the nature of a valve'. Once perfected and operational, the machine would greatly magnify messages or impulses from the afterworld he said, 'so as to give us whatever form of record we desire, for the purpose of investigation.' Edison had described his notions about a talk-to-the-dead device in an earlier interview with *American Magazine*, wherein he said, 'I hope to be able to finish it before very many months pass.' He never did of course."

I'd like to ask Awareness, if such a device is possible, and if so, has it or will it be invented.

COSMIC AWARENESS:

This Awareness indicates that the device was completed by this entity, but that it has been kept secret, and is held by certain forces which do not wish the device to be released. This Awareness indicates however, there are also other systems similar in nature, yet also others which are different in nature. This Awareness indicates there are certain systems whereby tape recorders are used in a particular way to receive messages from the dead. This Awareness indicates that this appears to have been publicized several years ago, as being in an areas in Norway or Sweden. This Awareness indicates that also, the Ouija board and other similar instruments can be used for communication with the dead.

This Awareness indicates that the tape recording device as that which was of a rather unique nature, in that it was able to pick up voices. This Awareness indicates that the device of Thomas Edison was more on the order of a signal, rather than actual voices, and the signal as that which required a code and interpretation. This Awareness indicates that this not too unlike the Ouija board, yet more of a cross between the principles involved in a Ouija board, and that involved in a more refined instrument such as a tape recorder. This instrument using the valve as that which gave a

signal which then could be interpreted as 'yes' or 'no', or as being of some other message.

This Awareness indicates that a pendulum is also capable of communicating with the dead, wherein entities are so inclined. This Awareness wishes however, to warn entities that this is not for amateurs who do not understand the kinds of forces which may be involved, and how to determine these forces, or to distinguish the energies, and to assure yourself you are not becoming involved with forces you cannot handle. This Awareness suggests that entities may be aware of these things and also be most cautious as to becoming involved in these areas, not to become involved until you are fully aware of your actions, and any repercussions they may have.

QUESTION:

Along this same line, there was an article in a recent *Frontiers of Science* magazine called "Phone Link to the Dead". I'd like to read this and ask Awareness if this device is valid. "Mary Baker Eddy, founder of the Christian Science Church is said to have been buried with a telephone. She believed that she would be able to report to her followers about the afterworld. Eddy has been silent so far, but Grant Meek of North Carolina may have found a way to communicate with her after all. Meek has a new invention which he claims allows you to communicate with people who have died. Spirit-Comm resembles an early model radio set. At a recent press meeting at Washington D.C.'s National Press Club, Meek unveiled thick copies of the designs for the machine. He also played a tape purporting to be the voice of Dr. George Mueller over the Spirit-Comm. Mueller was an American physicist who died in 1967. According to a reporter at the briefing, the voice sounded garbled and robotic. The only intelligible words were: "Oh, wonderful! Send me a couple of carrots and a nice head of lettuce!" Meek does not plan to patent the machine, nor to make a profit from its sale."

Would Awareness comment on that machine?

COSMIC AWARENESS:

This Awareness indicates that this appears to have some potential, similar to that of the tape recording device. This Awareness indicates that this requires a kind of psychic energy to be assisting in these machines. This Awareness indicates that even the tape recording device as that which requires a psychic energy along with the use of the tape recorder. This Awareness indicates that in all of these mechanisms, this element of the psychic energy, or neutrino, as that which is of much significance. That to create a machine without use of the psychic energy of a medium, or entity serving as a kind of mediator; this does not appear to be a clear possibility.

This Awareness indicates that this at least not at present time. This Awareness indicates that the possibility as that which exists wherein entities learn to use the neutrino as a carrier of energy from plane to plane through mechanical or physical laws and means. This Awareness indicates that this as likened unto learning to use the neutrino as entities have learned to use the copper or aluminum wire for transferring messages from place to place.

DOES KING TUT'S CURSE REALLY EXIST? MORE ON ASTRAL SHELLS AS GUARDS

QUESTION:

One final question related to the subject this evening is also from the *Frontiers of Science* magazine, and the article is entitled: "Tut Still Cursing", and it says:

"The legendary curse of the Egyptian boy-king Tut-an-akh-amen may still be at work, at least that's what attorney Michael Hebill argued in behalf of his client, a San Francisco policeman who guarded the golden funeral mask of Tut-an-akh-amen during its exhibit two years ago. The Policeman, George E Labrache, suffered a stroke after guarding the mask. He sued for \$18,000 in disability pay for 8 months of recuperation.

"His claim was rejected because his stroke was not considered work-related. Labrache's attorney wrote a 15 page brief in which he argued that the strain of 25 years on the police force was an important factor to consider. He also argued that the famous curse was another possible cause. He listed the deaths, supposedly caused by the curse of 25 people who excavated Tut-an-akh-amen's tomb in 1923. Hebill wrote, "The Egyptians believed in a curse on all who should disturb the dead. Mr. Labrache has suffered a stroke after having positioned himself directly in front of the golden mask which had covered the remains of the god-king.

"Was he another victim of the curse?"

I'd like to ask Awareness, if indeed there is a 'curse of King Tut', is it an example of these astral shells that are coming back, as indicated previously?

COSMIC AWARENESS:

This Awareness indicates that this as in the affirmative, except that the entity who suffered the stroke was not a victim of this so-called curse. This Awareness indicates that this stroke as simply that which would have occurred to the entity, even if he were simply guarding a rose bush. This Awareness indicates this as associated with the stress of his job and other effects on his life. This Awareness indicates that the only possible connection seen with this particular aspect is that the entity himself may have had certain subconscious fears of the curse, and in this manner may have through his own subjectivity become associated with the suggestion in a kind of subjective acceptance, or what might be termed, 'succumbed' to the suggestion of a curse being placed upon him.

This Awareness indicates however, this does not appear to be a significant energizing factor of the stroke which the entity suffered. It appears rather,

that this is a publicity argument, and an argument to assist the attorney in attempting to extract money which does not appear to be of any legal significance, for it could not be proven. This Awareness indicates however, that the attorney, if dramatic enough and convincing enough, could possibly sway a jury to accept the concept and therefore, the attorney as using this argument in order to extract money if possible.

This Awareness indicates in terms of astral shells as guards for the entity King Tut's tomb, these astral shells as having their purpose defined at the time they were placed there, and as being active in carrying out their duties to prevent disturbance of the tomb. This Awareness indicates that the thousands of years whereby the tomb was undisturbed as that which is indicative of how long an astral shell can stand, and remain in a particular state of consciousness, in a kind of limbo existence. This Awareness indicates that there is no pain, there is no desire, there is not hunger; there is only waiting, and these entities, in waiting, wait for that disturbance which they were programmed to prevent.

This Awareness indicates that the Egyptians understood the use of astral shells of entities to serve as guards. This Awareness indicates that these shells have their programming and can lead entities to, or away from certain places, and can also cause great disturbances to individuals if they desire. This Awareness indicates that the phenomena is associated with that described by Max Freedom Long in his book, *Secret Science Behind Miracles*, and the *Huna Code of Religion*. This Awareness indicates this in reference to the times wherein he described how the Kahunas would go up close to the prison camps wherein Japanese prisoners were held captive during World War II, and would begin whispering and hypnotizing the prisoner who was near death. The Kahuna then, through that hypnosis, capturing the astral shell of the prisoner at the time of death, and thereafter using that astral shell for purposes of doing his magic, and his errands.

This Awareness indicates that these Kahunas as using these astral shells similar to those actions of the Egyptians in their tombs, whereby the astral shells were set to guard these. This Awareness wishes to warn entities involved in any kind of excavation of graves, that they may encounter such astral shells and energies, and that in so doing entities should be quite careful to understand and know how to protect themselves from these energies. This Awareness indicates that in recognizing the potential existence of an astral shell in a grave, or near a graveyard or grave, it is necessary that entities avoid any form of violation, for the astral shell takes his territory seriously. As one would consider one's home to one's own, so likewise the astral shell considers his or her area to be hers.

This Awareness indicates that to communicate with these astral shells, as making friends, and assuring them that you mean no harm, this can be beneficial in some instances, depending on the nature of the astral shell. This Awareness indicates however, that even as there are many different types of persons on your plane, some who are responsive to clear honest communication, some who are demented in nature and violent, and very unfriendly; so likewise, astral shells have a great variety of types. That it could very well be that the astral shell you seek to communicate with is a demented character,

and one who is of a vicious nature. This Awareness suggests that for this reason, entities may be better off to leave well enough alone.

WHY MAGIC HISTORICALLY COMES AND GOES

This Awareness wishes at this time to bring up another topic associated with this phenomena. This Awareness indicates that down through history there have been those periods of time wherein the supernatural and that which is known as magic, did have its place and was used. This Awareness indicates that during the time of Egypt, during the time of ancient Israel, during the time of King Arthur, during the Middle Ages and the Dark Ages, there were those entities who were known as magicians, who were known as wise men, who had certain powers, who could work miracles and do things which were supernatural in their effects.

This Awareness indicates that there also were those times wherein none of these things occurred, whereby phenomena of an unusual nature was considered to be nothing but rumor or hallucination or false reports, or simply fraud. This Awareness indicates that anything which did not fit into the normal established view of natural science was considered to be superstition or fallacy. This Awareness indicates that a book, *Fads and Fallacy*, written in the '50s, was an example of the regimentation of thought away from anything other than the scientific rational view of the world, wherein anything unusual was not to be allowed.

This Awareness indicates that it is important to understand that these times wherein magic flourished, and times wherein science drove magic out, that these variations were in part brought on as reflections of the kind of consciousness and attitudes available. This Awareness indicates that wherein entities are conditioned to believe that no thing occurs which is not magic in nature, then magic flourishes, and unusual and miraculous occurrences can be experienced. This Awareness indicates that wherein entities' minds are conditioned to believe that no thing occurs that is not of a clear rational and scientific nature, then indeed the phenomena such as levitation or apparitions or other miraculous healings and such, do not tend to occur, except in freak conditions.

The Influence of the Hippy Movement to Magic

This Awareness indicates that the Western world, particularly in the United States and Europe, during the past 50 years, and at least up to the time of the introduction of hallucinogens such as LSD and marijuana, and the hippie movement which broke up the pattern of the fixed rational view of life, the Western world during that time as having moved more and more into a kind of static reality that had no room for magic. This Awareness indicates that there was little opportunity for entities to lay their hands on others and heal them, or to learn to do things which required mind over matter. The only areas wherein any form of magic remained was in religious areas, and there it was regimented and contained so carefully under such strict rules that it seldom was allowed in any area except to regiment the minds of others through certain experiences of an emotional transformation or of similar personal experiences which could not be explained rationally, but which assisted in keeping entities involved in the church.

This Awareness indicates that the more recent changes which have occurred since the mid 60's as that which is bringing about a resurgence of magic, the intuitive energies, those associated with the creative

forces of consciousness. This is being assisted by certain movies and literature which begins to tear down the fixed and certain rules and static view of the universe, so that entities begin to stretch their imagination and lose their sense of programmed reality, into an expanded view of reality that accepts the possibility as being a potential reality.

Rational and Intuitive Minds Must Merge

This Awareness indicates essentially, the rational mind as having been relieved of much of its power over the individual, and the intuitive and subjective mind being given greater place in the individual's life. This Awareness indicates that music as having been instrumental* in assisting this transition. This Awareness indicates that the danger at present, is that the rational mind may become somewhat atrophied if it is not given its proper place in the times to come. That the rational mind needs also to be recognized for its value, for life cannot simply be experienced by the bobbing head, and rocking to music, and looking for magic

*Ed's Note: Cosmic pun?

This Awareness indicates the rational mind needs to be an assistant to the subjective mind. That these are a pair which function best when working together. This Awareness indicates that children who do not have the opportunity to develop their rational mind at an early age, and whose musical, artistic and subjective aspects are given excessive development, such children often do not develop their rational mind, even at a later time, unless particular effort and emphasis is put on that action. This Awareness indicates however, that at approximately the age of 8, 9, or 10, this appears to be the time when the rational mind can best be developed, and given its initial encouragement through the study of math and language and other similar rational skills

This Awareness indicates that entities are becoming capable of believing in the possibility of afterlife, of reincarnation, of flying saucers, of Loch Ness monsters, of apparitions, ghosts, of levitations, of healings of a miraculous nature, and many other phenomena which in the 1950's would have been seen as an absolute indication that an entity had gone loony. This Awareness indicates that the views of the universe in the 1950's being of such a static certainty, now appear to be somewhat absurd. This Awareness indicates that had those of the 50's been able to project and glimpse the consciousness at present, wherein masses of entities are consulting their horoscopes, are attending movies about ghosts, poltergeists, about extraterrestrials, about flying saucers, in a manner that gives a kind of credence to the possibility, rather than as a mere entertainment of fictional delight, those entities of the 50's would be quite shocked.

This Awareness indicates that the Uri Geller phenomena, and others of a similar nature have opened up great possibilities for others to follow, and for more magic to occur which cannot easily be explained. This Awareness indicates that this as a result of allowing the subjective intuitive energies of a psychic nature to have greater expression and to allow the rational mind to either be relegated as a kind of recording, explaining, judging critic of events rather than as being the leader and creator of events.

This Awareness indicates that those skills given during younger years can also be of great significance to the entity as he or she develops and grows, whereby these skills can be augmented. This Awareness suggests a truly balanced person will have opportunities for both sides of the brain to be developed, whereby the entity not only learns math and writing at a young age, but also has opportunities for play, music, dance, art and other subjective types of expression.

This Awareness indicates that the phenomena associated with changing consciousness is that which does not occur simultaneously in all cultures. There are cultures in other areas of the world which are still deeply involved in rational development, and away from artistic pursuits, while there are also other cultures which are highly evolved in subjective and artistic pursuits, but which have been laggard in the development of any rational method or skills. This Awareness suggests that those areas which can develop these simultaneously, or in a kind of alternate balancing action, these which develop both the rational and artistic skills, as those which are most effective in raising the consciousness levels of the masses.

This Awareness indicates that this likened unto objective artist, as opposed to subjective artistry, wherein an entity objectively learns the qualities and techniques for creating better arts, this being a blend of rational and subjective, or intuitive expression. This Awareness indicates that those entities whose subjective expressions come from within, but have no training, no skills, no methods, no logic and no rational direction, may simply express themselves, but may have little value to society in terms of what that expression means.

This Awareness indicates there are many entities in this culture whose greatest expression is scribbled on a wall in chalk, which simply expresses their frustration toward some individual or cause, and the entity is incapable of expressing anything much more profound than a four-letter word. This Awareness indicates that there are many entities suffering from this form of subjective over-expression and lacking in any form of objective and rational development. This Awareness indicates that it is essential in developing healthy individuals, that both the rational training and the subjective training be balanced.

This Awareness indicates there are some entities who have had their rational minds developed to such a high degree that they are like walking computers, but they have no sensitivity or feeling in regard to the welfare of others, and are simply able to evaluate what feelings are, and what relationships are, only in terms of words and ideas, and not in terms of actual experience. This Awareness indicates this as an example of the entity whose rational mind is over-developed, and whose subjective intuitive mind is atrophied.

This Awareness indicates a balance is essential.

ED's Note: For more information on astral shells as guards, please refer to 'Revelations of Awareness' No. 79-12 (All About Mummies); \$2.00; for more information about astral shells in general, ghosts, etc., please refer to No. 80-10 (The Amityville Horror); \$3.00; also 80-34; \$3.00; for more information on astral forces and how to keep them out of your life, please refer to No. 79-13 (Psychic Vampirism); \$2.00 from C.A.C.

For more information on the after-death experience, please refer to 'Revelations of Awareness' No. 78-47 (Working with the Terminally Ill); \$2.00; 81-27 (On Death & Dying); \$3.00; 83-6 (The After Death Experience); \$3.00; 83-8 (Into the White Light); \$3.00; 81-20 (After Death--What?); \$3.00 from C.A.C.

HOW THE EVOLUTION OF ENTITIES WORKS AFTER ONE PASSES OVER (The Lords of Consciousness)

QUESTION:

A question from R.E.E. "The works of the Rosicrucian mystic-seer Max Heindel indicate along with the Theosophists that there is an evolution and objective of man beyond merely obtaining liberation from compulsory reincarnation or service to humanity, and in some instances this is given as eventually becoming a star with an evolving humanity within its force-field and planets, or a planetary spirit, wherein the entity's consciousness permeates the entire solar system and so forth. Is such an evolution true? And if so, has it any necessity or value for most people now on earth in the New Age as we gradually return to etheric realms?"

COSMIC AWARENESS:

This Awareness indicates that all bodies in the universe do have their own consciousness. This Awareness indicates that the center of consciousness is in symbolic terms, often referred to as the Lord of the body. The Lord of one's particular consciousness may be of the higher vibratory rate, of a lesser vibratory rate, or of the lower vibratory rate. The vibratory rate having a wide range in almost all forms of bodies organic in nature.

This Awareness indicates that the lords of these bodies being proportionate to the body's vitality or life, and wherein a body is greatly alive and vital, the Lord of that body is also greatly alive and vital on many frequencies and levels, having high and low frequencies. This Awareness indicates that an entity may be involved in the universe as an amoeba and may have a very tiny body with a very tiny lord ruling it. This Awareness indicates that the entity may be much larger and may still have a limited amount of consciousness and a low vibratory lord ruling it.

This Awareness indicates for example, a rock or hill may not have a very high level of consciousness, but may be large in size. This Awareness indicates that therefore, size is not the determiner of the evolutionary level of a consciousness, or the lord ruling that consciousness. This Awareness indicates however, that even a large dead planet may have some vitality and some life in it, and even a small, very much alive planet may have a much greater vitality and lord governing it.

This Awareness indicates that wherein entities move through actions of evolution, they do have that ability to disidentify with their physical body, whether amoeba or human or planetary, as they discard the body and move on. This Awareness indicates that as has been shown through Kirlian photography, a leaf being torn in two may leave the pattern in the aura of the leaf to be photographed. This Awareness indicates that pattern which is photographed, remaining intact, although the physical leaf has been torn away, is that which reflects the etheric, or essence of the leaf's vitality.

This Awareness indicates that likewise, even if a planet has been totally destroyed, the lord of that planet, the life force of that planet, may continue, or may move from that place to another. This Awareness indicates that similarly, an entity discarding a body does not necessarily need to maintain the

12. shape or image which he or she held while in that body, but may move on to take on other shapes and enter into other forms.

Some Can Return as Animals

This Awareness indicates that through the efforts of entities to progress into higher realms, entities may move on into these experiences beyond human levels. Others, through identification with animalistic qualities may find themselves, or may find portions of themselves entering into the animals, or other forms of lower life. This Awareness indicates that many entities living today in activities which are animalistic or bestial in nature, such as becoming involved in bloodlust, may find themselves in the bodies of those animals which are deeply involved in killing for their food, such as the lion or tiger or other animals.

This Awareness indicates that still other entities who find themselves experiencing animalistic qualities may simply return in human form with yet more animalistic appearance. This Awareness indicates that in this manner, entities by their efforts and identifications, tend to draw to them that which they most closely represent as they move into different forms of expression. This Awareness indicates those entities who are moving into higher states of evolution, more spiritual expression, those entities do tend to move from the present body into those which are more highly refined, more beautiful, or which may move into expressions of light, expressions of human form which are less dense, more highly intelligent, more sensitive etc., or may move completely out of the human form and into other dimensions, in forms more angelic in appearance, or more etheric in nature.

This Awareness indicates also that energies of an entity can divide after passing over, so that portions turn to plants, animals, or even insects, while other portions move on into higher expression.

QUESTION:

Is the entity whose portions are going into areas such as insects and so forth, aware that this is going on? Or is this just certain energies that need to be burned off through expression?

COSMIC AWARENESS:

This Awareness indicates that for example, an entity with a strong appetite for flesh may, at passing over, recognize this as an aspect which cannot be carried further if the entity is to move toward light, and therefore, the entity may discard this appetite which then floats about until it comes in contact with some creature which finds the appetite or energy compatible with its own, and is then strengthened by that energy.

This Awareness indicates this is one of the facets which has given rise to certain tribal beliefs that if one kills one's enemy, one can have that enemy's strength. This Awareness indicates that often such entities did in fact gain strength and determination and power from their enemies when those energies were discarded at the time the enemy was killed.

This Awareness indicates that wherein an entity has had strong appetite for alcohol or such, and the entity passes over, if the entity does not discard such appetite, the entity may become earthbound, hanging around in taverns and places where others drink, and seek to identify, popping into another's consciousness in an effort to enjoy the drink. This Awareness indicates however, if the entity does manage to discard that appetite, the entity may move on toward the light and simply allow the appetite to be disgorged, discharged, and to fall where it may.

This Awareness indicates that appetite quality, floating like a kind of magnetic center, seeking its home, may then enter into the consciousness of an entity who, up to that time, has not had any great need for alcohol, but if the entity is open to receiving such appetite, this appetite may then enter into the entity and become part of his own driving force to have more alcohol.

This Awareness indicates that thought-forms of this nature, or what may be termed discarded appetites and energy fields of entities, do tend to float about in consciousness, seeking to find that which they can attach themselves to and feed upon. This Awareness indicates that these may be likened unto parasites, seeking to find certain vibrations compatible to their own, which will allow them to maintain their own individuality, even though it is not a complete individual other than as an energy of appetite.

How Ideas & Inventions Come 'Out of the Blue'

This Awareness indicates that when an entity, on the other hand, is seeking not to be open to drink or to other forms of less valuable experience, but is seeking certain kinds of concepts, ideas, or experiences of a high vibratory nature, this entity then tends to draw in those floating thought-forms or energy fields which are compatible to the level in which that entity operates. It is for this reason that an entity involved in creative work or in invention, or in business, may find that the answers to his needs simply comes from out of nowhere, and the entity becomes suddenly aware of the entire answer, invention or creative expression.

This Awareness indicates these thought-forms of high and low value are ever present throughout the biosphere, or that biocomputer which holds the memory and thoughts which have been discarded by entities through living and dying upon this plane. That these thought-forms may dissipate if not fed, but never totally disappear, and it is only necessary that an entity focus on such a thought-form and hold that focus long enough, and that thought-form will be fed and will grow, and will come to that entity.

This Awareness indicates it is for this reason that entities in seeking to discover what occurred in past history, prewritten history, may focus on energies of the ancient times, and in that focus, these energies and thought forms no matter how small they may now be, begin to experience the vibration of that focus, and will grow and grow and grow as they approach the consciousness which is focusing on them.

How the Bio-Computer Works

This Awareness indicates that essentially, the biosphere computer, or biocomputer which holds all these memories, all these thought-forms, should be better explained in order for entities to better understand the nature of this phenomena. This Awareness indicates that it is much like taking a page of information and seeing that page moving back on a screen, getting smaller, smaller, smaller and smaller, until it appears to disappear, until it seems to disappear in the texture of the screen.

This Awareness indicates that if one can imagine this occurring whereby the energy, because of time movement, dissipates in the past, or dissipates and becomes smaller and smaller, disappearing from view of present time, but whereby looking at that point or calling up mentally for that energy or that page, whereby the entity in mentally seeking that page can focus and hold that focus, then the page begins to reappear on the screen eventually, although it may have gone quite far and become quite small.

13. Eventually, the page begins to appear as a small dot and gets closer, closer and closer. The entity begins to feel these energies represented on the page, and then the page appears close enough for the entity to read such. This Awareness indicates that it is similar to what has just been described, except that it is not necessarily a printed page that the entity is looking at. The entity may simply seek to recall an event, and all events fade away into time, becoming smaller and smaller as they move farther and farther back in time, so that the event which is to be recalled must be focused on longer and more steadily the farther away it is, in order to bring it back to present time.

This Awareness indicates however, once it is brought up to present time, into the presence of consciousness, and then again released, it will begin its journey back into the bottomless pit of consciousness, disappearing on the screen, but if you desire to bring it up again, you may find it much closer the second time than it was the first, because not so much time has elapsed that it would need to go as far away as it did the first time.

This Awareness indicates that all things which occur to entities in their living experiences fade away into consciousness in this manner, and those things which are recalled may be brought up into consciousness, and some may be held by continuous recollection so that they do not fade, so that they remain with the entity.

This Awareness indicates also that one entity may have an idea, and an experience which the entity then lets go into consciousness, and another entity in another place, may be focusing on the same problem and may pick up on the idea which the first entity discarded temporarily or permanently, and may build upon that idea, believing it to be his own idea. This Awareness indicates in this manner, often inventions appear in different places at the same time, whereas the inventions being the same kind.

This Awareness indicates that likewise, actions from the future tend to be moving toward the present, and entities who peer steadily, and who focus long enough, with enough intensity toward the future, tend to become capable of glimpsing these energies and improving or assisting themselves to see what is coming. This Awareness indicates it is somewhat more difficult to remember the future than to remember the past, particularly wherein the future energies are not moving in clear direction, but are influenced and may alter by the many cross-currents and purposes of others.

This Awareness indicates that most entities do not attempt to affect the past, therefore the past is often easier to recall, whereas entities often attempt to affect the future, therefore creating some difficulty in reading the future events because of the many interferences with the movement of energies.

This Awareness indicates that if there is any question in relation to this, that this may be asked.

QUESTION:

Is this essentially what they mean when they read the akashic records?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative.
