Helping People Become Aware

## Cosmic Language

Published by Cosmic Awareness Communications, PO Box 115, Olympia, Washington 98507, USA. Reproduction is permitted.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter. Paul Shuckley, Interpreter

## COSMIC LANGUAGE AS A TOOL IN UNDERSTANDING PRESENT EVENTS

( MORE ON MOLOCH, LUCIFER AND RHYEE )

### COSMIC AWARENESS:

This Awareness wishes to call attention to that which may be considered as Cosmic Language. This Awareness indicates that the Cosmic Language as that which rather than being necessarily a system of letters and words in grammatical structure, begins with a series of concepts. That to begin a Cosmic Language, entities would need to understand the source from which a language would need to begin.

This Awareness indicates that in the beginning, there is that which IS, and that which IS is capable of action; that this essence in motion is also capable of creation, creating the result of the motion. The basic activities that essence, ISness, or that which IS is capable of doing; it is capable of reflecting upon itself, thus the principle of reflection may be considered as a language tool.

It is capable of examining itself by dividing, thus division is a Cosmic Language tool, and analysis or examination is a Cosmic Language tool. In analyzing, it is capable of devouring or digesting through analysis; this creates the concept whereby the reflection as a separation of self turns upon self and devours self.

This Awareness indicates that this symbolized, in Cosmic Imagery, that entity known as Moloch or Kal. The entity known as Moloch of the Babylonian gods, as a Cosmic letter or concept. The concept of Moloch, a creator who devours his own children, creates his children, casts them off from himself, then devours his children for nourishment,--this is Moloch. This may also be considered as the female principle, although in Babylonian mythology, this entity was cast as male.\*

This Awareness indicates that the principle involved is that of consciousness, which reflects on itself and in such reflection, creates a duality within itself, then feeds on that duality, feeds on itself, thus, looking at itself, feeding on the concept of self, self-reflection, self-centeredness, the narcissism of Greek mythology; this leads to that wherein the reflection upon self is that which becomes of great significance.

This leading to the next letter or concept of the Cosmic Language: that which is symbolized by Lucifer, the reflection of the Light, who in reflecting upon self becomes vain, thus the vanity of being the reflected Light of consciousness, of essence, in which one takes pride in not being essence, but in coming from essence, reflected from essence, and assuming oneself to be more important than the Creator Essence, thus the vanity, the pride, that symbolized as Lucifer, this as the letter or concept which, rising to its height, seeing itself as separate from creation, a separate creation, of being significant in itself, of having greater significance than the source from which it came; this is the concept of the Cosmic Language known as Rhyee, whereas Rhyee separating from essence, left behind that which waited for the return, that which waited as being the female counterpart of Rhyee, or Isis.

This Awareness indicates that this duality or polarity, along with the concept of separation is that which is another concept or letter of the Cosmic Language. That

depending on the frame of reference, the polarity when viewed from one source, the source of Essence, is seen as but part of itself; two parts making the whole, but when seen from the part of separateness, is seen as two parts separated and in opposition to each other.

This Awareness indicates that these concepts of the Cosmic Language may be seen in terms of a being who is capable of division of self, reflection on self, devouring of self, nurturing self, and multiplying of self, or bringing the parts together through synthesizing of self. The multiplying may also be seen as analyzing or further separation of self. There is not a great deal more that the Universal Being can do with Itself, other than reflect, multiply, analyze, synthesize, expand, contract, devour, nourish and alter Its parts in a multiplicity of possibilities.

This Awareness indicates that in looking at the events on your plane while using this Cosmic Language as a tool, entities may see that the lesser reflective aspects of the Cosmic Being are operating on the principle of appetite in areas in which there is the devouring of self, wherein one part slays the other to devour the energies which were left by the departing part, whereby one part slays the other and consumes the other, whereby one part slays the other emotionally, spiritually, psychically or physically, whereby one is picked apart carefully, analytically, eaten bit by bit, word by word, criticism by criticism, until there is nothing left but a weak degraded shell having all vitality sapped.

While this aspect is operating as appetite through its many agencies, through its many bureaucratic, political, national, international organizations and agencies, there is also that aspect of the Cosmic Being which is analyzing and looking at these parts and learning from this activity, and experiencing through the nourishment of the mind, all of that which it learns by watching these physical activities that are the result of the Cosmic Being devouring its own self.

There is that which observes as a reflector, seeing itself as all that matters, as all that matters, as all that matters, and seeing itself in this way as matter, the essence of being, it does not recognize spirit, the essence from which it came, and therefore acting as a reflection in matter, in the vanity of self, seeing itself as matter, as all that matters, this aspect of the Cosmic Being indulges itself in masturbation of its own energies, and wallowing in material expression of greed, of lust, of power.

It presumes that it is *all that is*, and that this activity in which it is devouring those who are weak is making it ever greater and ever stronger, thus this aspect of the Cosmic Being deludes itself with concepts of grandeur and megalomania, and is experiencing chronic schizophrenia in relation to the whole Cosmic Being.

There is also, that aspect within this Moloch, this schizophrenia, this delusion of maya, there is that principle of expansion in which the entity presumes itself to be growing ever greater each time it devours a portion that it sees flying through space, yet this delusion is such that this being does not recognize that these portions which it devours, which it seeks to build its strength from, to find its nourishment from are in actuality aspects of its own self which are being cut off, torn off, whereby it is devouring itself, its own creations, its own children.

This aspect as that which deludes itself that it has a separate existence from the Universal Deity, and as a separate existence, has dominion over many parts of the creation. This is likened unto the serpent attempting to devour its own tail which it sees coming from

around the bush, whereby in seeking to catch up with itself, to devour everything in sight, it could very easily destroy itself as an illusion, as a reflection, and could very easily, if hungry enough, discover itself back in the essence of its beginning.

This Awareness indicates that as the events on your plane heat up, the very nature of the dragon, the very nature of this Moloch aspect of consciousness which feeds on the energy of others, the very nature of this is to become more frenzied and to devour itself more rapidly, and as the parts begin to devour themselves, likened unto a Cosmic Cancer, the very nature of the Beast is such that it will cease to be, and entities and aspects of consciousness will recognize their own true essence and the Universal Deity.

This Awareness indicates that the reflection will only be seen as a plaything for consciousness; that the reflection of matter will be recognized only as that which is illusion and part of the game. This Awareness indicates that the true identity will merge with the essence from whence all came, and the reflection shall be seen as what it is.

\*Moloch, also known as Molech, was the chief god of the Phoenicians, the god of the Ammonites, known to the Israelites before the time of Solomon. Human infant sacrifices were offered up to this idol, the victims being slowly burnt to death in the arms of the idol, which was made of metal, hollow, and could be heated on the inside. Manasseh sacrificed his son to Moloch; Solomon erected an altar to this god on the summit of Mt. Olivet. At Carthage, Moloch was worshipped by the Phoenicians, where at one time, they sacrificed 200 boys, believing this would relieve the city from a siege.

## IS HEAVEN LOCATED ON A STAR NAMED VEGA?

( MORE ON THE PARALLEL UNIVERSE )

### QUESTION:

A question from D.A. He sent in a tabloid article. "Would you ask Awareness to comment on this provocative article from the Globe, Sept. 6th issue. I'm sure the response will be very enlightening." I'll read the article, which is called: "Space Probers Find Heaven--Your Double's Already There."

"The discovery of a planet identical to Earth on the other side of the universe has convinced theologians and scientists alike that heaven really does exist--and that our exact doubles are living there.

What's more, after we die, our souls may actually travel the 150 trillion miles to the planet that circles the star Vega, so that our space twins can judge us.

"They're uniquely qualified to do just that claims Dr. Herman Bollick, bishop of the Enlightened Baptist Church of America, because, unlike us, they never incurred God's wrath and are still living in the Garden of Eden.

"The source of unhappiness on Earth is traceable to Adam and Eve," says Bollick, of Westminster, California. "Adam could have refused to eat the apple Eve offered him. On Earth, he didn't--but on Vega, he did. This means the original Vegans didn't commit the 'first sin' and that their descendants still live in paradise."

"Astronomers discovered the planet while studying data beamed from the Infrared Astronomical Satellite (IRAS).

They also learned that Vega is the center of an entire solar system that's a mirror image of ours.

Bollick is convinced the paradise mentioned in the Bible is on the third planet circling the Vegan sun.

"And when we die, we'll go to Vega first to be judged, not by Jesus or God, but by the inhabitants of Vega," he says. "After all, who can best understand the reasons why we do things than our physical and psychic twins?"

Bullick's ideas are supported by scientists who believe that the planet is part of a parallel universe in which everything that happens here, happens there--in reverse.

Dr. Henry Brooks, a NASA scientist and theoretical physicist at the University of Texas at College Station, says: "The theory is based on the law of opposites. Every event or action has the possibility of a positive or negative result. If the negative result occurs on Earth, the positive result occurs in the parallel world.

"For example, if you're a humble janitor on this planet, chances are you're a wealthy or powerful man on Vega."

Would Awareness please comment on that article?

### COSMIC AWARENESS:

This Awareness indicates that much of this is based on the conjectures using principles of physics which are in general accurate, but much of this also is based upon projection of self, or that which is the projection of one's own belief system or interpretation. This Awareness indicates that whereas there are opposites in many various areas of the universe, in terms of vibrations and frequencies, these opposites are not necessarily expressed in the same terms or same images.

For example; what is the opposite of blue? What is the opposite of a face? What is the opposite of a place, and where would that opposite be located? This Awareness indicates that the Law of Opposition applies only when dealing with matter and concepts that involve oppositions. This does not mean that everything in the universe has its opposite. This Awareness indicates that opposition is but a concept and asks: What is the opposite of the concept of opposition?

This Awareness indicates that if one answers: Nonopposition, then one must acknowledge that there is such a thing as nonopposition. Therefore, not all things have opposites. What is the opposite of *what is*? If one answers: *What is not* is the opposite of *what is*, then one has created *what is not* as something that is. This Awareness indicates that it appears that most of this article as based upon conjecture and a kind of mental exercise in which entities with vested interests in terms of their own belief system, would like to project something that sounds scientifically plausible in order to support their belief system.

#### FOLLOW-UP QUESTION:

Is there a star named Vega, 150 trillion miles out in space that is a twin of our planet Earth?

#### COSMIC AWARENESS:

This Awareness indicates that it is not a twin. It is a star system so-called by your scientists. That this as all relative to the ideas and descriptions placed upon this body of matter hanging in space; the descriptions, the names, and the shapes all relative to how the observer wishes to describe and to see this body of energy. That this as likened unto: Beauty is in the eye of the beholder. Likewise, description is in the eye of the beholder, and however these entities wish to describe this body according to the way they behold the body of energy is that which may be passed on to others with terminology, descriptions that lead others to look at this body in the same way.

This Awareness indicates that this likened unto an entity standing in a field and pointing toward a blade of grass until others come about and ask: "What are you doing?", and you answer: "I am looking at that blade of grass. It is the most perfect blade of grass I have ever seen. I have looked for 30 years for the perfect blade of grass. Now I have found it!" The entity looks, having never seen a perfect blade of grass before, looks twice as deeply, seeking to memorize and fix the picture in his mind so that he too will know forever what a perfect blade of grass looks like. He stands transfixed, memorizing the blade of grass.

Meanwhile, the first entity has walked on. Others come by and say: "What are you looking at?" The entity responds: "This blade of grass! It is the most perfect blade of grass that ever was."

"How do you know?"

"Well, look at it! Can't you see? What could be more perfect? And anyway, I was told by an expert who has looked for 30 years to find the most perfect blade of grass. This man is a great authority, and as I looked at this, I recognized that he was right, it IS the most perfect blade of grass!"

This Awareness indicates that as more and more entities look at this blade of grass they discover in fact the truth. It IS the most perfect blade of grass, and all agree, except for one person, far in the back row who thinks maybe it isn't as perfect as *this* one over here. This Awareness indicates that beauty is in the eye of the beholder, and description is in the eye of the beholder, and as things are described, entities often tend to go along with the description until someone else questions whether the description is accurate or not.

This Awareness indicates that *It* wishes *Its* ministers to question everything, and to look twice as deeply and when seeing something as a truth, to step back into another frame of reference, to examine this truth from a different viewpoint. This Awareness

indicates that every truth, that every *thing* can be true, when wrapped within its proper frame of reference, and everything can be seen as false, when taken from its frame of reference.

#### FOLLOW-UP QUESTION:

Then, there is a frame of reference that exists, that a parallel universe in which everything that happens here on earth, happens there in reverse; there IS that from a particular frame of reference?

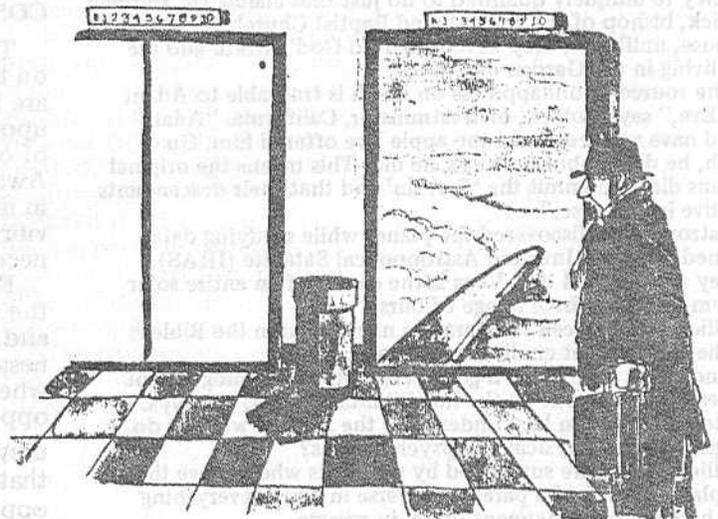

#### COSMIC AWARENESS:

This Awareness indicates this in the affirmative; that this parallel universe wherein everything happens in reverse is in the dream state, is in the antimatter realm. To further explain this last remark: the parallel universe as that which does not exist here or there, whereby entities searching for heaven here or there can say: "I have found the opposite earth;" rather, the parallel universe as that which exists in the realm of antimatter.

In order to understand antimatter, one must first understand matter. The universe being created by Light which meets itself, and in meeting itself divides itself vibrations into different frequencies, and in those vortices where these frequencies meet, there is a space created; from whence this space there are cones which are formed, and on one side in one cone, there is the material particle, and on the opposite there is the antimatter particle which exists and which may be termed "matter of a different dimension" as opposed to matter of the 3rd dimension, or that physical plane which entities recognize.

This Awareness indicates that these energies whereby there is an atom of physical nature, are so expressed that there is the opposite atom which is of an antimatter nature, nonmaterial, yet existent in another dimension; the entire dimension formed as an opposite reflection of the material dimension, yet this antimatter dimension is not the exact replica of the material dimension, for the material dimension is that which is focused into points, wherein the atoms are minuscule in size, extremely small, and in the antimatter universe the atoms are enormous in size, each one as large as the universe itself, and all of these antimatter atoms mingle not separately next to each other, but in opposite concept, mingle together as one.

This Awareness indicates that this immense number of atoms that make up one spirit of the Divine reflect themselves into the material plane as masses of atoms that make up the world of nature,—the reflection of the Divine.

## THE "DOPPLEGANGER"

(MIND--THE FATHER OF LIES)

### QUESTION:

Speaking of reflections, we once asked a question somebody sent in (I can't put my finger on it), but it was an article compiled from incidences over the years where people would look into the mirror and they'd see the reflection of themselves, and they would be struck with terror. If I remember correctly, the title of this article was called "The Doppleganger," and Awareness said *It* wouldn't discuss that subject at that time. I wonder if *It* would give some information on that double at this time?

### COSMIC AWARENESS:

This Awareness indicates that wherein entities look at a reflection of themselves in a mirror and recognize that this is but a reflection of self, entities have no problem or difficulty, for they give little credence to the reality of the reflection, and they, in looking at the reflection, keep their own self-dignity and sense of reality; but wherein entities in looking at the reflection, project and ask themselves: "What if that were me, and I was but the reflection of that?", they may find it possible to, while staring at their reflection, project their consciousness into the reflection and look at themselves from the eyes of the reflection, and see themselves for what they are, with the same type of contempt that they felt when looking at the "stupid reflection in the mirror that doesn't amount to anything in terms of reality," for when they look from the eyes of the reflection in in the mirror and see the self as the reflection, they carry the same attitude they have toward their image in the mirror, they carry that same attitude into their image of themselves, and see themselves suddenly being looked at by this attitude, become frightened that they are being so judged by some being that stares from a mirror; the experience as that which comes about from rapid shifting, or rapid projection of self and self-attitudes.

This Awareness indicates that entities who are not aware of what is occurring can very easily become confused, and in that confusion can believe that there is someone looking at them. In actuality, it is but their own projections into the mirror whereby they look at themselves from these projections. Entities who confuse this and think this to be a separate being, may become fearful and feel themselves being watched or being threatened by this being, and if entities assume the position of being victimized by such a being who stares at them from the mirror, they can very easily become schizophrenic, whereby that part which is projected from themselves and their own thinking becomes their judge, and whereby they themselves become victim of that judgment, and whereby the entity becomes fixated on this harassment from this projection of self, and thinks this projection of self is an entity who is dominating and who is possessing or harassing the self.

This Awareness indicates it is all illusion, even as the creation of Lucifer and the creation of any reflection of matter is an illusion, but the question is: "What other kinds of games are there in the universe, except those games dealing with illusions and attempts to fool oneself or to fool parts of oneself?" This Awareness indicates that the father of lies is the mind; consciousness is the truth.

5.

## PAST-LIFE PROJECTIONS FROM A MIRROR?

(MORE ON PLAYING WITH COSMIC PHYSICS)

### FOLLOW-UP QUESTION:

There's an old exercise handed down through occult literature, the notion that if an entity sits before a mirror with a candle burning in a dark room, and focuses his eyes over the flame, just above the flame, there will appear in the mirror a number of his aspects that he was in previous lifetimes. Is there any truth to this, or is this another illusion as indicated just now?

### COSMIC AWARENESS:

This Awareness indicates that this again is a way whereby entities may project from their own psyche, from their own consciousness, that which may be reflected unto them. This Awareness indicates that if the intention is to see an honest reflection of self, then the entity will see honest reflections of past experiences and incarnations, if that is the intention. If the intention is for the entity to see grandeur and greatness in the reflection, then that is what the entity will see, for the entity receives what he projects.

This Awareness indicates that if the entity projects a feeling of inadequacy, guilt, hostility or hatred or fear, the entity will receive in the reflection of his projection that which is the answer to his intended purpose. The entity who is fearful of that which is in the mirror is not likely to project an angel or child of great beauty, but is likely to expect to see some demon, and therefore, whatever the entity conjures up to be a replica, or symbolic of a demon, this is what the entity will see, for it is but a projection of the entity's own mind.

This Awareness indicates that entities give energy to these projections and entities in giving energy to such projections may make these projections take on activities of their own, may make these projections appear to be separate with their own individual wills, and if they receive the support and energies from others around them, such as friends or relatives, whereby you tell these entities that you have a spook or ghost, or some force in your home, and these entities also give energy to this spook or ghost, these projections which you originally created and which were responsive and reflective of your own mind, may be modified to take on also the projections of those others who participate with you in this illusion, who add their own version and projections onto this energy, so that entities can actually create the essence of an energy that appears to be a poltergeist, and this poltergeist can make its noise and expression onto the physical plane in a manner whereby entities may witness this force, and once it has made a rap or noise, the believability is increased, and more significance and energy is suddenly poured into this creation so that it then becomes even stronger as an energy carrying your own thought-forms, carrying your own energies, reflecting to you from the antimatter world that which you have projected into the antimatter world, the world of imagination.

This Awareness indicates that even as God created man, likewise man is capable of creating gods, even as demons can spawn; likewise, entities can create and spawn demons, for all is One Mind in the universe, and all of the entities within the universe have Divine Right to the use of the principle of Cosmic Physics, of the Physics of Consciousness, and when they understand how to use these principles, they may use these according to their degree of competency, and many entities

stumble upon the use of some principle, without knowing what they are doing, and suddenly find themselves a victim of some Law of Universal Consciousness, but not knowing how it came about, and becoming extremely terrified of what is occurring to them, assuming it is some kind of demon, project further demonic energies into that being; this demon becoming ever-greater as the entity fears the demon.

The greater the fear and hostility projected toward this demon, the greater it becomes, for it feeds on what is being given to it, as it is a projection of the entity's own consciousness. This Awareness indicates that even as the Divine Being reflecting upon Itself led to the creation of Lucifer, the reflection of God, and even as the reflection went out and had its experience, likewise even today, the reflections, the entities can look out and create a reflection of self, and pour energy into that reflection and create those energies which are built upon the energies of one's own projections, can create the monster which comes back to haunt the creator, or the entity can simply recognize this as having been an interesting game, using the principles of Cosmic Physics.

This Awareness indicates that any entity who is possessed by a demon has no one to blame but oneself, for the demon exists only as a projection of the energy which has been given to it. The more the entity talks about the possession, the more the entity receives attention for the possession; the greater the possession can be, for the energies of the possession gain in significance as the entity claims to be possessed and draws attention to that claim.

This Awareness indicates that even as in the claiming of territory in the physical plane, there is also that which entities can claim in psychic levels, and whatever entities in psychic levels claim can develop and become part of their mental realm, and this mental realm can have its effect on astral and physical realms.

## HOW WAS THE INSIDE OF PYRAMIDS LIT SO MURALS COULD BE PAINTED?

(HOW A FRAGMENT BECOMES A THEORY)

### QUESTION:

In reference to reflection, there was a movie the other night based upon Von Daniken's book, *Ancient Astronauts*, and it showed them underneath one of the pyramids somewhere, deep within, way way back under, showing paintings that were still preserved to this day, done on the walls,—murals and fresco-like drawings, and they pointed out that because there were no smudge-marks and so forth, they knew no one could have been in there with any kind of lamp to do the painting, or it might harm the painting, and their hypothesis was that the only possible way this could have been lighted up deep within the bowels of these pyramids, was for a long series of mirrors going back through the caverns, each reflecting on the other, from the sun from the outside. Does Awareness see that theory as being the correct one?

### COSMIC AWARENESS:

This Awareness indicates that these entities during this time had much highly advanced technology which is not revealed to the modern mind. That these entities as having had flying craft which had lights other than torches, and which had their electrical apparatus. That much has been theorized about these entities is based upon ignorance and upon superstition of scientists who believe that they are representatives of the highest evolution on this plane.

This Awareness indicates that it is likened unto assuming that a child born after a great war living 2 or 3 years in a rubble-torn area were to be asked to explain what this was like and how these things came to be. The child would need to answer according to its own experience or according to the stories and legends which it had been given, and the likelihood of the child being correct would be very slim. This Awareness indicates that particularly because the records had been destroyed during the war, and there is no record available to verify the legends and stories or to substantiate the theory.

This Awareness indicates that likewise, this earth having undergone a great catastrophe, having undergone many changes, whereby records were destroyed leaving only those of the highest and most durable order, whereby the intellect of humanity suffered a deep sleep and whereby a portion of this intellect awakening to a degree, found a fragment of the record and found a printing press and a school and a way of presenting its interpretation and theory based upon this fragment, so that the entire community became knowledgeable, wherein the the entire field of knowledge was based upon this fragment and became greater and greater in size, in theory, and whereby it presumed to be of such power as to be the only answer.

This Awareness indicates that this fragment of knowledge which has been given to this community as being that on which the community was built, having all of its security, its beliefs, its devotion, its loyalties, its political interaction and relationships all built upon this fragment, when along comes someone with more fragments, and these fragments offer other possibilities which would, if presented, cause the loyalties, politics and the fabric of the society which was built upon this fragment to become unraveled.

Therefore, the new fragments, while being valid, are looked at by the authorities, and even those who recognize the need to include these new fragments, become terrified at the effects it would have on the community. Therefore, the fragments are released very carefully, very slowly, to allow much time for the inhabitants of the community to digest the new information regarding their origins, so as not to create panic in the streets.

This Awareness indicates that these paintings had been created by highly advanced priests who had use of lighting systems which were based in chemical reactions; the use of chemicals that reacted to one another, giving off a light.

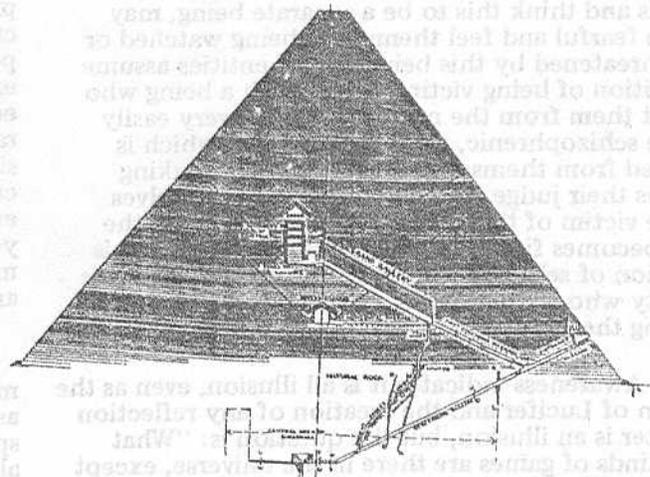

Diagram of the Great Pyramid which shows how deep inside it are the rooms with murals.

## WILL WEARING A CONE HAT ENHANCE DREAMS?

(MORE ON THE 8TH CHAKRA)

### QUESTION:

There's a company called the Conical Corporation in Greenfield, Massachusetts. It's running an ad showing a cone-hat with the copy announcing it's an exciting rediscovery, that: "The amazing cone-hat is a powerful tool which re-emerges, bringing greater balance, energy, release of stress, dream-state enhancement, and it's beautifully silk-screened in 7 colors for the frequencies of the 7 chakras, and it's great for meditation, sleep, dream enhancement and so forth, if you wear this." I'd like to ask Awareness, is this valid,-- putting on a conical hat, that it channels energies?

### COSMIC AWARENESS:

This Awareness indicates that this is a take-off on the famous dunce cap. This Awareness indicates the conical cap as that which does allow the consciousness of an entity to become more refined in that it calls attention to the 8th chakra, the chakra over the head in the antimatter realm; that this overhead chakra as that which is the Logos, or higher intellect. The use of a cone-shaped hat, or tall hat as that which tends to project consciousness upward from the head and above the head. Likewise, tall ceilings such as are seen in cathedrals also assist in projecting consciousness to higher levels in terms of chakras. The difference between the effect of a cone-shaped hat and a Lincoln-type hat is that wherein the cone is pointed, the subjective interpretation of a cone, or pointed cone, likened unto a cathedral spire is that it moves infinitely on toward the highest, whereas the Lincoln-type hat, though tall on the head, has a flat top, and only goes so high. That therefore, the consciousness is held down to a level which keeps the person in high ideals, while still being grounded firmly on horizontal or physical reality. The cone-shaped cap however, is that which has no limits placed upon it in terms of how high toward spirit, or how unrealistic and far away from physical reality the entity might go. The continued use of a cone-type hat could lead an entity to become unrealistic in relation to physical things; this especially when used as a cap in a significant role, such as continual wear, or wear for some type of religious obsession.

This Awareness indicates that the use of a cone type hat on occasion, or for sleeping, as that which would have some slight effect on consciousness; that it is not likely to do all that the designers claim unless the entity becomes obsessed with this and projects those obsessions into the use of this hat; and because of this projection, begin to assume the hat is working. That this is much likened unto the use of handwriting to alter one's personality, by changing the writing that indicates a personality trait. That while the cone hat does have different effects from other types of hats, its effectiveness depends more on one's attitude toward it than the energy of the hat itself. This Awareness indicates that as entities believe the sugar pill will cure them, so the sugar pill helps the belief of the entities; that as entities believe the cone hat will bring them great benefits, to that extent the cone hat will bring them great benefits. That this does not mean that the hat does not have certain effects, for geometrical figures and designs *do indeed* create certain effects, but that the greater energy is in the belief the entity has about the thing.

## STEPPING BACKWARDS: THE "UNREDEEMABLE" ENTITY

### QUESTION:

A question from C.T. of Phoenix, Az. She says: "I have a question concerning the CAC newsletter 83-6, page 10, that talks about "unredeemable entities." She's referring to a reading Awareness gave regarding Hercules and Wormwood, and that entities souls are not properly developed who have been deeply involved in actions of a non-loving manner, who appear to be almost unredeemable, are candidates for transfer onto that planet, and so her question is: "How can an entity once evolved through cycles to become a human being in the 20th Century regress and literally go back in time? I have always believed from Theosophy and other great metaphysical works that nature never goes backwards; furthermore, that even death does not alter this fact, because when one experiences rebirth, one takes up where one left off. Please explain."

### COSMIC AWARENESS:

This Awareness indicates that nature itself needs not go backwards to allow entities to have a backward fall, for even as entities may grow and become wealthy, or entities may grow and become spiritual, or entities may grow and become civilized, so likewise they may lose that wealth, may lose that civilization and may revert back to the more primitive state.

This Awareness indicates that an entity whose being is referred to as almost unredeemable is an entity who by choice has accepted the path of material power, lust, greed, at the cost of all human qualities of mercy and love. This Awareness indicates that these entities are few; even those who are often involved in the actions of bloodletting through war or through murder, these entities are generally redeemable in that there are still aspects within them which love, and which have mercy.

This Awareness indicates that there are however, some entities who by choice, deliberately attempt to force from themselves any quality of love for others, any quality of mercy toward others, and such actions when deliberately chosen make these entities candidates for the return experiences whereby they must start again without the technology, whereby they must grow again through the path of suffering and long endurance through physical lifetimes to reach back to the place whereby they have access to the high technology which they could use to reek havoc on others.

This Awareness suggests that in reaching this level on the next round, it is hoped that these entities will have a different attitude toward others and toward themselves. There is no law in the universe that dictates how long an entity is sentenced to a state of being, for the sentence is imposed by the entity's own wilful rejection of reconciling the self with the rest of the universe.

This Awareness indicates likewise, in a relationship, there is no sentence as to how long an entity must be separated, except that sentence which the entity himself imposes, which creates a separateness from others and does not allow love to flow or communication to flow. That in all relationships there are two parts. For these parts to come together they must both be willing to come together.

This Awareness indicates that in the relationship between entities, occasionally one part will seek to stay away while the other seeks to come together. In such case, the relationship is blocked by the entity who seeks separateness. This Awareness indicates in the Divine Universe, there is only one who seeks separateness, and that is the part. The whole is always

waiting for the return of that which separated and it requires only the decision of the one who separates himself, the decision to reunite through love and mercy, reunite with all of the rest.

This Awareness indicates those souls which are unredeemable are those who by their own choice refuse ever to reunite with love and mercy, but who insist always on being separate from all others. That this unredeeming quality of separating self from others and from the unity of all things; this unredeemable quality is that which is one's own creation and one's own karma and one's own choice. This Awareness indicates that even the unredeemable may be redeemed when they cease being unredeemable.

#### HOW TO ENHANCE YOUR PERCEPTIONS

##### (Closing Message)

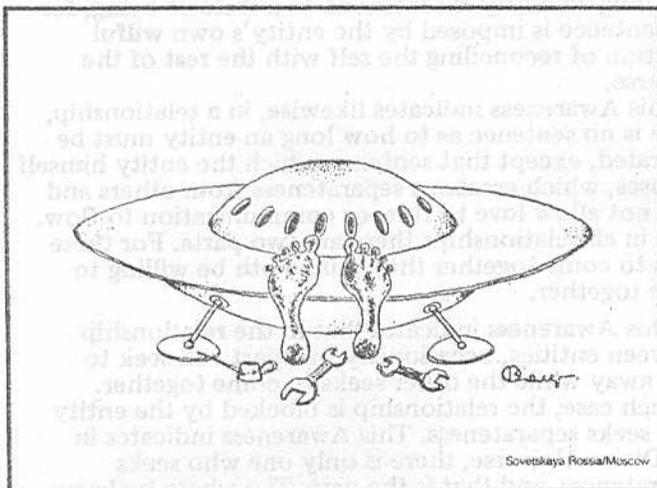

This Awareness indicates that in childbirth, there is that which is the moment of conception, wherein the child is conceived by the merging of male and female energies. That in consciousness, there is that which is termed the concept, wherein something is conceived by bringing together male and female creations: imagination and rational; images and form; spirit and structure; whereby there is that which is the concept of the idea, the concept wherein the image and idea may be projected into manifestation much likened unto the conceiving of an identity and image which is projected into manifestation as a physical being.

This Awareness indicates that entities create in worlds both physical and mental, and that these physical and mental creations have attachments to earth and to astral energies. These astral energies as being emotions; the attachment of a concept to an emotion is likened unto the entity attached to the earth. This Awareness indicates that entities in observing energies of mind, emotion, feeling and physical levels will enhance their perception by looking for parallels between these planes and by watching the use of their language wherein words often convey similar meanings for similar energies based upon different planes of reality.

This Awareness indicates this particularly in reference to the words which date back to the more ancient Greek, Latin and Slavic languages.

\*\*\*

(End of reading)

#### THE LAW OF AWARENESS

This Awareness indicates there is that *Law of Awareness* wherein this Awareness may observe that which is the illusion of separateness, yet not be confused by this illusion; whereby this Awareness may be aware of the illusion of tragedy, yet not be caught in that illusion; whereby this Awareness may be aware of that which is the illusion of death, yet not be caught in that illusion; whereby this Awareness may observe that which is the illusion of free will, yet not be caught in that illusion. There are certain limitations placed upon this Awareness which *It* cannot break. One of these being *It* cannot deny or reject those who would appear to separate themselves from this Awareness, nor the movement and illusion of free will whereby they would do so.

Cosmic Awareness

#### SHE WAS GIVEN A MANTRA TO USE: NOW SHE IS POSSESSED BY DEMONS?

(More on Overcoming Fear)

##### QUESTION:

A question from R.W. in Arkansas. He Writes: "I was recently watching the religious program, *The 700 Club*. A woman was telling of an experience that she had. She said she found a spiritual teacher, in which the teacher told her that she had progressed very well spiritually through incarnations, and he gave her a word or mantra to meditate on. Taking this, she secluded herself from her family and friends. She explains, she said, day by day she felt extremely blissful, elated. For approximately two weeks this went on until suddenly, she heard this voice which she described as satanic and eerie. The voice would give a hooting laugh and say: "You will never leave. You are mine forever!" She became somewhat shaken by this and could not meditate and the voice was still there. She was later admitted into an asylum, whereupon she said her friends and family prayed for her, and the voices went away." His question is: "Was this the Dark Forces trying to keep her from progressing, or is this the path she was to take, -Christianity in this lifetime, and how could this be avoided?"

##### COSMIC AWARENESS:

This Awareness indicates that it appears this entity as one who already had an inner dedication to the Christian doctrine and had certain guilt feelings about looking in other directions, but having also certain rebellious feelings toward associates and toward ideas, and toward concepts which were associated with the Christian doctrine, and therefore, looking in other directions to see what she could find to give her a spiritual direction that would satisfy her rebellious nature, the entity entered into this new experience with the mantram without full understanding of what she was doing, and without a clear motive.

This Awareness indicates that the entity also had a subconscious fear that she was doing something wrong because she had broken from traditional loyalties that she held, and thus she set up within her subconscious the experience whereby she would be blocked her movement, and come into contact with that so-called demonic force. This Awareness indicates that this essentially was something created from her subconscious, brought into her mind to serve as her own block, to turn her around. This as being essentially created for her as an individual from her own programming, and the entity as having been brought back to her own subconsciously accepted belief system.

This Awareness indicates that the dedication she had toward Christianity had not been broken throughout this period on the emotional and subconscious level, but that the conscious mind was rebellious. This Awareness indicates that another entity might rather than rejecting Christianity, might explore more deeply and come to the conclusion that there is more depth in the spiritual pursuit than is commonly understood by the more shallow interpretation of the Christian teachings, and therefore, the entity might pursue mantrams to see where this fits into the deepening spiritual experience, and never have such a negative experience as this woman had.

This Awareness indicates that essentially, the woman was afraid of the experience on which she had embarked, due to loyalties and conscience and dedication and commitment which she held to her Christianity, her religion, and to her family ties, although she was not fully aware of those deep commitment feelings.

#### (FOLLOW-UP QUESTION):

The voice she heard then is just one aspect of her mind?

#### COSMIC AWARENESS:

This Awareness indicates that it is very difficult to make a distinction between one's mind and a voice which one hears, for when it comes down to determining what one's mind is, it becomes very much impossible. Essentially, it is likened unto asking whether the cold that one snowflake feels is from itself, or from neighboring snowflakes. This Awareness indicates that at a point, all minds merge into the sea of consciousness, and all minds form a cacophony of thoughts, a cacophony of ideas, and voices, and whereby a mind of an individual reaches a state of openness wherein it is not expressing, it becomes capable of being receptive to sounds, ideas and concepts which come from the mass-mind, or from individual sources within the mass-mind.

This Awareness indicates that when this occurs, a voice that is in harmony with the frequency of the individual's mind may be heard expressing. That this expression may come from a thought-form or individual magnetic center, which one may call a being, which one may call a Divine Being, or which one may call a demonic being, according to how one wishes to interpret these energies, and the energies of the voice may say things which appear to be directed to the entity, and which may appear to be in answer or in warning to the entity, but which in many cases are nothing more than the babblings of cast-off energies, or hapless souls that have no ability or capacity to do anything other than to babble in consciousness.

This Awareness indicates that most of these forces which entities confront in the nonphysical levels, while entities are still in physical form and confront those

images, visions or astral types of creatures, most of these are nothing more but harbingers of the mind, and do not have any real power over the entity, except what they can extract from the entity's own mind, such as by frightening the entity, or by tempting the entity, or by playing with the entity's curiosity in order to lead the entity into actions which are not to the benefit of the entity, or which are to the benefit to the entity.

This Awareness indicates that wherein an entity has no fear of these spirits or creatures, they tend to fade away. That wherein one has great fear of these creatures, they tend to become magnified and strengthened. That wherein one has fear, they tend to draw in those creatures that are fearsome. Wherein one has love, they tend to draw in those images which are loving in nature, thus entities who are strong in love and who have visions, may have visions of loved ones, or of loving deities.

This Awareness indicates that wherein one is fearful of what one is doing, such as repeating a mantram that a strange teacher gave, and not knowing what this may lead to, and having subconscious repressed feelings of guilt associated with breaking traditional faith and loyalties; the entity can very easily draw in the negative experience based on fear.

This Awareness suggests that while there are always the Dark Forces and the Light Forces, there is always the pleasure and the pain, the good and the bad, the wholesome and the unwholesome; always there are the polarities and the opposites. Throughout the universe this occurs. This Awareness indicates however, that those individuals who are always fearful of the negative and always in search of the positive without realizing that it is all one big equal, equalizing activity, whereby positives and negatives balance each other in order to keep matter and spirit in flux and in movement; wherein entities are not aware that these energies must be, and that they need not be feared, such entities may live a life afraid.

This Awareness indicates however, that wherein entities look at this universe and see that there is always the positive and always the negative, and that they themselves are on the path toward the positive, and therefore being in the light, they need not be afraid, for the universe is a friendly place, so long as they remain in the light themselves, and do not venture into the dark shadows, or if venturing into the dark shadows, walking through the valley of the shadow of death, if they do not enter into those realms of darkness, that they themselves enter as light and shine their light upon those Dark Forces, so that the forces must retreat from them.

This Awareness indicates that as long as one is in the light or IS the light, one needs not be afraid, for darkness is always overpowered by the light.

\*\*\*

Love  
Is  
Caring

can be divided into half-times, or extended into multiple times, and these are terms which may be used with certain meaning by the poets, by the writers, but they are essentially measurements of artificial creation, attempts to understand movement and duration.

Thus, time and time again, and half-time is nothing more than an artificial poetic expression to indicate a speeding up of events. There is no real mystery involved in this term, for the clocks do not go twice as fast, nor do half the numbers drop away. The calendars do not flip twice as fast, nor half the months fall out; the time simply appears to move more quickly.

When an entity has lived 4 years, the 5th year is one-fifth of his entire life, but when entities have lived 40 years, the 41st year is only one-41st of one's life. Therefore, relatively, in relation to what one perceives as the duration of one's life, as time goes on, the years become shorter and quicker in proportion to the length of life one has lived, and time seems to speed much faster.

This Awareness indicates when you enter into the ages: 60s and 70s, you look back on decades as compared to the child who looks from the age of 6 or 7 back on his years. This Awareness indicates that time, to the poet, is also relative in that the entity who waits to be released from prison, or waits to see the one whom he loves, or waits for the time to get home to those whom he cares so much about,—the time indeed goes slow, while the entity who waits for something dreaded which he knows is coming,—the high noon approaching,—the time moves ever-so quickly and there is not time enough and the hours go by much too fast.

Time is relative to one's needs, but in actuality, time does not exist at all, except in the mind and in the artificial creations of man. There is however, the moment, which is always present, and there is the past which is always remembered, but it is not time, it is only memory, and there is the future, which is always awaited, but it is not time, it is only expectation, and all that exists is NOW, the moment, the Eternal Now, and the clocks that measure and keep track are actually measuring and keeping track in this moment, this Eternal Now, and allowing us to have reference to the memory of the past, or to have expectation for the future. **Time Related to Duration**

This Awareness indicates that the time, which we artificially create, is related to duration. How long does an atom live? How long does it take for light to move from this place in the universe to another place in the universe? The light is moving during the Now, during the Eternal Now, but it is always changing. How long does it take for this planet to circle the sun? Thus, duration is what we attempt to measure when we speak of time; the year is but the duration of the moment that it requires for the earth to make its orbit around the sun.

This Awareness indicates that *It* has given previously that due to the increase in antimatter upon this plane, the heating up of consciousness, and the effects of radioactivity in the atmosphere and substances on this plane; that durations, in terms of the atomic level essences and the vibrations, are speeding up. The durations of matter are not as long-lasting as before, thus, matter itself is undergoing change and becoming more ethereal in nature, although it is so subtle, and although all things changing at the same time, make it impossible to measure.

This likened unto being in a room where everything increases twice its size, in which case the ruler also would increase twice its size, and each inch would increase twice its size, and all things and all people within the room, increasing by twice the size would see no difference at all.

ALL ABOUT TIME...

HAS TIME

REALLY

SPEEDED UP ?

THE DURATION  
OF THE "ETERNAL NOW" )

#### QUESTION:

A question from D.C., Huntington, W. Va. "Would Awareness explain the Biblical comments on "Time and time and half-times and half-times"? It seems that time is passing much more quickly now, than 5 to 10 years ago."

#### COSMIC AWARENESS:

This Awareness indicates that in actuality, the speed of light has altered slightly during the past 20 years, so that time has in fact, when measured next to the speed of light, speeded up, but it is so miniscule that as far as clocks or time-keeping is concerned, it is not noticeable in your human affairs, but in terms of your question and the remark that time appears to have speeded up, this Awareness indicates that indeed, as entities grow older, time always appears to be speeding up.

The duration of the Eternal Now has no limits except those which we artificially place upon that duration. The Eternal Now can last from the beginning of eternity to the end of eternity and it is all "now", unless we artificially divide that line into segments which are measured by durations of other experiences; the experience of the earth orbiting the sun, or the sun orbiting its galaxy, or the galaxy orbiting in the universe, or the duration of the tree, from the seed to its final collapse and decay; the duration of an entity's life, the duration of a rock from its first formation to its final dissolution.

The duration is that which measures all things and our artificial use of measurements,—measuring durations, is that which we equate with as time. We break this Eternal Moment into segments. If, for example, you had one thousand rocks of equal size, and one by one placed a drop of acid upon those rocks, and it took so much time for the acid to eat through the first rock, then the next drop of acid would attack the second rock, and these rocks, one by one would be dissolved, you could measure time according to the number of rocks that have passed. The number of rocks that are to come would be the measurement of the future.

This Awareness indicates that to understand the measurement of time through the use of numbers, calendars, evolutions, revolutions of the earth around the sun, things that move into infinity such as numbers and solar revolutions, leave an unlimited number, an infinite number of measurements; these increments can be called times, and

Likewise, the duration of matter, the vibration of matter, in speeding up, wherein all instruments of measurement are also affected, so that in comparison to their standards, they cannot measure the speeding up of the vibrations, for the rulers have also speeded up.

This, having occurred on this plane, cannot be perceived, and yet, while the material world is being forced into less density, the ethereal or spiritual, or causal world is taking on greater longevity and entities will find themselves living longer lives during the duration of the earth's orbits around the sun. They will surround more orbits around the sun.

This Awareness indicates that the intensity of the life-force increasing on this planet, allowing longer lifespans or more orbits around the sun, occurs simultaneously to the increase in vibrations of the matter of the material plane.

\*\*\*\*

### HOW TO MOVE BACK OR FORWARD IN TIME: A NEW MEDITATION (HOW TO EXPAND YOUR CONSCIOUSNESS)

#### (Closing Message)

This Awareness indicates that when entities consider the concept of moving through time, the general movement is seen as centered from the viewpoint of their own being and its own future course, and its past. Entities may experience a different approach for entertainment purposes and for greater enlightenment by viewing time from the eyes of another person, imagining what it is like to view past and future from your grandmother's eyes, for example, or from your children's eyes, for example. Seeing how limited their past is, how unlimited their future appears to be, allows you to have a different glimpse of time.

This Awareness indicates also, you may enjoy fantasizing on what it would be like to live, to have lived in ancient times; the time, say, of Egypt or Babylonia, or the time of Rome, or the time of Christ, wherein you imagine yourself touching a stone during the Eternal Now, at this very moment, touching this stone in the year 4000 BC, a term which has not yet been even invented, for counting backwards from the birth of Christ did not occur at that time—4000 years before Christ, touching a stone.

This Awareness asks you to imagine yourself at this moment, that this moment is 6000 years ago, projecting yourself back into time, now being in that time period, touching this stone, being able to look back on prehistory, the history of your time in Egypt; the stone being placed upon this pyramid which is in the building process, touching this stone now. This Awareness suggests that in experiencing this, in imagining this, hold this image and feel the energies about in regard to this image, emanating from this experience, emanating backwards in memory of your life from that stone and that experience, emanating back to the time when you first came to this pyramid, emanating back in the culture of this Egyptian period, and realizing that you know nothing whatsoever about the future; that there has been no birth of Christ yet, nor will there be for another 4000 years; that there has been no United States, no atomic bombs, nothing of this civilization, nor will there be for another six thousand years.

Feel that moment as though it were now. This Awareness indicates that this exercise can expand your awareness, can allow you to understand what it means to move back in time, or to move forward in time. It is a training exercise to assist you in learning how to remove yourself from your own personal identifications and to experience things that are beyond your knowledge, beyond your personal knowledge.

This Awareness indicates that in this meditation or technique, you may also wish to identify with a priest or architect or laborer in the process, at the time of Egypt, choosing an identification with an entity during such time, feeling that entity's life, his desires, frustrations, the hopes, wishes, fears, discouragements, struggles; imagine yourself living at that time, 4000 years before the birth of Christ. You have no knowledge that it ever will occur. 6000 years before the United States, before its history, before the events of this age, before the threat of nuclear war; you have no idea whatsoever about this time, this future time.

This Awareness suggests you visualize for a period, what it would be like to have lived 6000 years ago, and to know nothing of the present time. This Awareness indicates that you now move back into present time and visualize yourself 6000 years behind; that the present time is 6000 years behind a future time. Now, after experiencing what it is to live at present time, imagine yourself going forward 6000 years into the Eternal Now, and see if you can feel what it might be like.

This Awareness suggests that you look back from that period to this time of your present life, and see if you can observe the events that have occurred between that time in the future and this time of the present. This Awareness suggests by projecting yourself forward and looking back, or by projecting yourself backward and looking forward, there is much that you can feel. This Awareness suggests you not attempt to imagine or rationalize the events, but simply to be sensitive enough to feel the events, to allow them on their own volition to come to you.

Do not attempt to create or find the events, but be receptive, to allow the events to flow into you. In this manner you may glimpse the future. This Awareness indicates that this is nothing more than an exercise to expand your consciousness; that there are many ways whereby entities can expand their consciousness, and the more entities practice, and the more entities do this, the more entities learn, and the greater the expansion of the mind of entities.

This Awareness indicates that the mind which is closed, focused on one or two things, or is not capable of expanding to think of things unfamiliar or to explore the unknown is the mind that is limited; whereas, the mind that is ever-expanding is the mind that knows no limits, for if it discovers a limit, it simply looks beyond, to see what's there.

## Fun on the Day After

*Survive* magazine, put out by the same people who publish *Soldier of Fortune*, is sponsoring a subscription sweepstakes with prizes that include a small-arms arsenal, a laser gunsight, a bulletproof sports jacket, hunting knives, and freeze-dried food. The idea, says a member of the *Survive* staff, is to take a problem of survival—a nuclear holocaust, for example—and "turn it into something fun and uplifting."

## MESSIAHS SPROUTING UP ALL OVER

"...A FIELD OF STARS SHALL LIGHT THE WAY"

### QUESTION:

A question from H.A. in New Jersey. I'm not exactly sure what they're talking about, but I'm sure Awareness does. She writes:

"Dear Vicki. We've never written a question for Awareness before, but at this point, we would like Awareness's viewpoint on the hierarchy changing Shambala from the Gobi Desert, to the Shenandoah Valley near Staunton, Virginia. There is a group putting this information out, and having conferences based on the authenticity of this change. One man seems to be "in charge" and claims to be the channel for the masters. His name Peter Leech Lewis. We would greatly appreciate getting some true report on this from Awareness, as some of our group have been caught up in this and we are a bit suspicious. Thanks for an early response."

### COSMIC AWARENESS:

This Awareness indicates that there are always those who would seek to profit from that which has already been established as profitable by claiming themselves to be the head of the company, the spokesman for the company, and likewise, whenever there is a hierarchy system created or recognized, and one has military or political control that is universally recognized, there will always be a number of entities, each claiming to be in charge.

This Awareness indicates that likewise, there will always be those who seek to follow and be next to the one who claims to be in charge. This Awareness indicates that this as yet another activity reflecting off of others, which like others, will have its day, will bring about certain benefits to others and certain problems to others; this as that which will seek to be the most high and most right and most authoritarian and like many others, will be recognized by a few.

This Awareness indicates that it is an age in which there is not but one church, or a few churches, where there is not but one religion or a few religions, but a multitude of churches and religions, whereby each entity may wonder if he or she might ought to start his or her own church and get on the band wagon. This Awareness indicates that it is an age wherein everyone might consider riding on the spiritual carriage, each claiming to be on the right path, all running around in diverse directions having a simply glorious time.

This Awareness indicates that it might be an age in which entities could all become messiahs and if so, none would need to be followers, and all would see themselves as messengers of God. This Awareness indicates it is an age whereby there needs to be either more of this, or less of this, but whereby entities recognize that there is no single messiah; that they are sprouting up like weeds in spring.

This Awareness indicates that as given previously, rather than one bright shining sun, a field of stars shall light the way. This Awareness suggests that each of you may be a star with your own Divine Light.

\*\*

### A Bomb to Remember

The U.S. Postal Service, planning twelve years ahead, is considering the possibility of issuing a stamp commemorating the fiftieth anniversary of the atomic bombing of Hiroshima.

## HOLLOW EARTH PUBLISHERS--WILL DEROS PUT THEM OUT OF BUSINESS?

A question from D.B., Richfield, Wa. "Can Awareness comment on any possible dangers from the 'Deros', to those publications and people revealing the Hollow Earth secrets, like Mary Davis of the *Hollow Hassle*, and Norma Cox, editor of *Secrets*? How safe are they, and will mankind be able to put a stop to the Deros?"

### COSMIC AWARENESS:

This Awareness indicates that this is an area which could lead to much confusion among the readers if dwelt upon too much. That the concept of the Deros as that which has been presented through the works of Richard Shaver, and is that which refers to beings who are subterranean in type, who are of a very low, perverted type of consciousness that thrives on power and sadistic energies. Many of the concepts of demons of the underworld have their roots in this same Dero concept.

This Awareness indicates that this has been fantasized to some degree, whereby these entities have been created in exaggerated form to give them the drama of being greater villains than they actually are. However, that while this has been exaggerated, these entities are dangerous to those who are venturing into areas which they might come in contact with such beings; that it is not safe for entities to enter into these openings that lead to where the Dero exist.

This Awareness does not wish to give information to entities to assist them in finding these openings. This Awareness indicates that this is not to be confused with the Hollow Earth concept in which those within the surface of Middle Earth; that these entities in this area are much more highly evolved; that the Dero types are those who have existed without guidance of high order for such a long time that their degenerate form and consciousness makes them very difficult to relate to, and which invariably results in hostile contact.

### FOLLOW-UP QUESTION:

I think the question essentially he was asking, Is there any threat to Mary Davis or Norma Cox as publishers of information about these entities, and some of these openings into the earth?

### COSMIC AWARENESS:

This Awareness indicates that this in reference to the probable intent of the question: "Is there any threat from these entities, or from some force acting in behalf of these entities to prevent further publication or to harm these entities for publications which have been and may be written?" This Awareness indicates that it does not appear that there is any great danger; that there may be slight harassments from time to time, but that generally, these entities are protected by guardians of truth.

(Closing Message)

This Awareness indicates that all things in opposition must in time reverse, and there is that time and place wherein harmony is experienced and polarity ceases to be; that this moment of nonpolarity is the moment of Divine Awareness, where all things understand all things.

\*\*

ED's Note: members wishing more info on this type of information should contact Norma Cox, editor, 'Secrets', Rte. 4, Box 156, Marshall, Arkansas 72650. (Sample newsletter \$3.00). You can also contact Mary Davis, editor, *Hollow Hassle*, PO Box 747, Aurora, Colo. 80040, for her inner earth publication. (Sample \$3.00).

Awareness has also given information on this subject. Please check the Backissues catalogs to locate.

Eastern cold wave claims 184 lives

As the mercury dropped the casualties mounted during the winter storm that gripped the eastern United States for most of the last week. At least 184 deaths were blamed on the arctic blast. Some victims died of exposure, others in weather-related traffic accidents and at least 28, including 19 children, in house fires caused by faulty heaters or overstoked stoves. As temperatures hit record lows from Florida to upstate New York, police in many cities were ordered to take homeless people off the streets to shelters. Florida citrus growers feared damage to their crops might exceed the \$1 billion caused by the 1983 freeze, and Gov. Bob Graham declared a state of emergency.

Leader of Jews to visit Russia

VIENNA — World Jewish Congress President Edgar Bronfman said yesterday he has accepted an invitation by the Soviet Union to visit Moscow in March for discussions ranging from the emigration of Soviet Jews to the Middle East conflict.

The visit would take place in mid-March, Bronfman said, and officials from the Soviet Embassy in Washington already have contacted the World Jewish Congress to arrange details.

Bronfman, who heads the gigantic Seagrams Distillery as well as presiding over the congress, said he would convey a message to Soviet officials from Israeli Prime Minister Shimon Peres during the visit.

He said Peres asked him to tell Soviet officials that Moscow could take part in Middle East peace negotiations if they agreed to recognize Israel and exchange ambassadors, and if they demonstrated "even-handedness."

Nader condemns plane exits plan

WASHINGTON — Less than two years after 23 people died in a burning Air Canada plane, the government is considering a plan that would make it more difficult to survive a similar accident, Ralph Nader charged yesterday.

In a letter to Federal Aviation Administration chief Donald Engen, the consumer advocate said the agency's Northwest Region has approved a plan that could have a potentially deadly effect on airline passengers.

Nader said the Northwest Region has given general approval to getting rid of two of the 10 exits on the main deck of the huge Boeing 747, the longest commercial aircraft.

Men say they prefer sex to bowling or . . .

CHICAGO (AP) — The results of syndicated columnist Mike Royko's "Sex or Bowling" survey are in, with 66 percent of the men responding saying they prefer sex over "bowling, drinking, golfing, cuddling or just about anything else."

In a column titled "Cuddle Up With This Survey, Ann," the Chicago Tribune writer reported yesterday on his poll, which he said drew responses from about 10,000 men and "several hundred angry female persons who wrote to condemn me as a male chauvinist pig."

Royko's poll was inspired by advice columnist Ann Landers' recent survey, in which the majority of the more than 90,000 women responding said they would be content to be held close, treated tenderly and skip sexual intercourse.

Royko said 22 percent of the men indicated they would opt for bowling, drinking, golfing, cuddling or almost anything else.

Scientific team calls it the birth of the century

An ex-schoolteacher delighted her husband and astounded her doctors by giving birth to twin girls — at the age of 70!

The unidentified Rostock, East Germany, grandmother has been the subject of intense scientific interest and also government concern since she was discovered to be pregnant eight months ago. Special arrangements have been made to care for her family, and the miracle mom has been featured in several medical journals.

"She is being studied by a team of obstetricians and there are several theories about how this came about," said Dr. Dieter Arnsperger, one of the aged mom's physicians. "We believe that her pregnancy resulted from female hormones she was taking to relieve menopause-related symptoms, but no one has established anything definite yet."

Arnsperger said the patient

70-year-old grandmother has twin girls

'We believe that her pregnancy resulted from female hormones she was taking . . .'

— a grandmother of four and a mother of two grown sons 51 and 46 and a daughter, now deceased — is delighted with her new babies. So is her husband, who is 76. "She lost her only daughter to cancer four years ago and she believes the babies were sent by God to console her for that tragedy," Dr. Arnsperger said. "She told me they are an answer to her prayers." "She is planning to care for them herself for as long as

she can and the government is going to encourage that." Arnsperger said his aged patient first came to him in June complaining of nausea and fatigue. He suspected she was reacting to medication — estrogen and progesterone pills — which she had been taking for bone degeneration and other symptoms associated with menopause. When tests revealed that the woman was pregnant, Arnsperger was stunned. He

felt it was important that this pregnancy continue." Her twin daughters — Gisela and Beate — were born prematurely on December 14. Both are perfectly healthy and have been released from the hospital. "Studies of the patient are still going on to determine exactly how the pregnancy occurred and how this might be avoided in older women who are on hormone supplements," Dr. Arnsperger said. "But as far as this woman and her husband are concerned, the birth has been a sort of miracle. They are very happy with their new little girls." — SUSAN JIMISON

'Hungry? Eat Rats!' IMF Orders Mexico

by Mark Sonnenblick

Jan. 19 (NSIPS)—As a result of the austerity imposed by the International Monetary Fund, meat is no longer available in Mexico City. A Mexican government nutrition specialist instructed meat-starved Mexico City residents Jan. 17: "People will have to get accustomed to eating cat meat, and, if necessary, rat meat, like they do in some Asiatic countries." Dr. Luis Llerenas Ambrós of Mexico City's general hospital was joined by other government officials who said people should stop resisting eating vermin.

Mexico is no worse off than the rest of the continent: "Ibero-America will not survive another year like the one just over; many of my compatriots did not survive 1984," Pedro Rublo, vice-president of Colombia's largest labor federation told the Fourth International Schiller Institute conference in Richmond, Va. Jan. 13. "But if there is no change in overall economic policy for our countries by the end of the coming year, by January 1986, many of our nations will no longer exist."

The horror of Africa in 1984 that is now beginning in Ibero-America will come to the United States in 1986, under plans set by the world's leading bankers and their enforcement arm, the IMF. Nothing short of a mass mobilization by the American people to throw the IMF out of its comfortable Washington headquarters and bring a new international economic order will stop the holocaust from spreading.

IMF Orders Starvation

Meat is being eliminated from the diet throughout Ibero-America. Brazilian annual consumption was slashed from 24 kilograms per capita in 1967 to 14 kilograms in 1983, according to data published by the First National Bank of Boston. Yet Brazil earns \$1 billion a year exporting meat under its IMF program. Impoverished Brazilians hunted and ate rats and lizards to try to keep their children alive, without the ratmeat policy having to be pronounced.

In counseling the famished to "eat rats," Mexico is faithfully complying with IMF orders to reduce domestic consumption of all goods which could earn dollars by being exported. In 1984, Mexico paid \$12 billion to the big international banks in interest on its \$100 billion debt. It was able to do this by exporting \$14 billion more than it imported. Mexico is exporting large herds of cattle to the United States, while cutting vital imports from its corn, wheat and other grains. Planning Minister Salinas de Gortari proudly announced this week that food imports will be cut by another 13% (1 million tons) this year, freeing several hundred million more dollars for debt service.

To reduce consumption, the government increased tortilla prices 15%.

Students at USC hack out grades

LOS ANGELES — Student hackers infiltrated the University of Southern California's computer system to change grades and create phony degrees priced as high as \$25,000 each, federal investigators said yesterday.

USC officials said they are investigating the allegations and have since upgraded security on the computer system.

Officials at USC said they had no evidence of "anyone creating an entire degree," but a year-long investigation had uncovered about 30 students allegedly involved in changing grades by invading the computer

Teen-ager kills self as class watches

ARLINGTON, Texas (UPI) — A teen-ager who killed himself with a sawed-off shotgun in front of his drama class was a devotee of the fantasy game Dungeons and Dragons and had a lead role in this weekend's school play, friends said.

Authorities said James Stalley, 17, a senior at Arlington High School, asked another boy about the meaning of life Friday. Then on a stage, pulled a .410-gauge sawed-off shotgun from a briefcase and shot himself in the right temple.

Atlanta murders movie stirs controversy again

By Mark Mayfield Gannett News Service

ATLANTA — The controversy over convicted killer Wayne Williams' link to a string of murders that once terrorized this city was rekindled Wednesday as city officials attacked an upcoming CBS movie that questions his guilt.

"It portrays the local media and the police department as a bunch of bunglers and hatchet men," prosecutor Jack Mallard said after a private screening of "The Atlanta Child Murders" by 75 city and civic leaders.

But Williams' lawyer, Lynn Whitley, who is handling Williams' appeal, said the movie was "pretty accurate" — and that he hoped to show it to Williams in prison.

Williams, 26, was convicted in 1981 of two of 29 murders of young blacks. Authorities linked him to most of the other murders but charges were never filed.

Mallard's aggressive cross-examination of Williams — who is black — was considered a major turning point for the prosecution.

The movie — based in part on a book by former Atlanta police officer Chet Dettlinger that raises questions about Williams' guilt — will be shown in two segments, Feb. 10 and 12 on CBS.

Said State Sen. Arthur Langford, who organized searches for the missing children during the ordeal: "It (the movie) put a bad light on

Atlanta. It made the police department and the administration seem . . . unconcerned. That's not true at all."

The movie is particularly critical of then-Mayor Maynard Jackson, portraying him as more concerned about the city's image than the murders. But his former press secretary, Angelo Fuster, said Jackson took the slayings "very seriously. To imply he didn't was absolute bull."

State analyst Larry Peterson, whose testimony about fibers helped link Williams to his victims, said the movie "has artistic merit, but it's unfortunate that it . . . claims to be based on actual events."

Two victims' parents — who were not at the screening — had differing views of the film's value.

"The movie was one of those things that needed to happen," said Camille Bell, mother of 9-year-old murder victim Yusef Bell. "I don't think Wayne Williams got a fair trial. I don't think he killed anyone."

But Willie Mae Mathis, mother of 11-year-old victim Jeffrey Mathis, said: "I think it's terrible they are showing the movie. I definitely think he (Williams) is guilty . . . but he didn't do it alone."

The film — which stars Martin Sheen as Dettlinger and Calvin Lewis as Williams — ends with a narrator saying the cases of the murdered children "remain unsolved."

Shuttle to adjust for solar flare

An unusual, out-of-season solar flare may require minor adjustments in the space shuttle's planned orbit, a federal spokesman said this week.

Bill Brennan, spokesman for the National Oceanic and Atmospheric Administration at Boulder, Colo., said the flare was a surprise since this is a period when minimal solar flare activity is expected.

Dr. Joann C. Joselyn of the NOAA's space environment services center, said that the flare could cause an increase in atmospheric drag and require some adjustments to the space shuttle's orbit during its secret military mission.

The flare — classified as an X-4, the most powerful category of radiation released — would not pose any radiation hazard to the shuttle crew, she said.

Residents of Seattle, Minneapolis-St. Paul, Chicago and New York should be able to see the phenomenon known as aurora borealis, or northern lights, as a result of the flare.

# Aryan terror manual

**SPOKANE (AP)** — White supremacists who attended an Aryan Nations conference last summer used a training book that describes acts of terrorism and sabotage.

The manual, titled "The Road Back," tells how to make napalm, pipe bombs and firebombs, grenades and weapons that would be used by a revolutionary underground.

It also describes how to derail trains, blow up highways and public buildings, disrupt electrical and telephone systems and commandeer radio and television stations.

The book suggests that a city would become a "powder keg" if quantities of gasoline were pumped into its sewer system.

"Give the process time to load the (sewer) system, and then ignite it," the book states. "The fire will race through the lines, setting off explosions to warm the heart of any saboteur."

### A 'damn lie'

The course's instructor, Gordon "Jack" Mohr, a retired Army colonel and former speaker for the John Birch Society, said yesterday he picked the manual for the course which, he admitted, dealt with sabotage.

In a telephone interview, Mohr, however, called implications that he was teaching how to overthrow the government a "damn lie." He said he was trying to tell people how to deal with a communist invasion or "enemies from within."

Mohr said he was warned not to teach the course. "But I thought I could be a moderating force," he said.

The two-day guerrilla warfare course was conducted during the annual summer conference July 18-22 at the Hayden Lake, Idaho, compound belonging to the Church of Jesus Christ Christian (Aryan Nations).

### Love's fitness

"I've never done a damn thing (to keep in shape), especially exercise. The best exercise I know of is making love."

— Cary Grant, 81-year-old actor, to an audience of 3,000 in San Francisco.

## New Zealand stands fast

**WELLINGTON, New Zealand (AP)** — Prime Minister David Lange vowed today to continue his ban on port visits by nuclear-equipped ships, despite America's withdrawal from planned naval exercises with New Zealand and Australia to protest the policy.

In the past week, New Zealand has twice refused a U.S. request for a port call by an American destroyer, the U.S.S. Buchanan.

Lange insists that the United States declare whether military vessels carry nuclear weapons before granting port privileges. But the Reagan administration has steadfastly refused to reveal such information, and has said New Zealand's policy could wreck the ANZUS defense alliance grouping New Zealand, the United States and Australia.

## Woman pays for biting off beau's tongue

**BRADENTON, Fla. (AP)** — A settlement has been reached in a suit that claimed a woman bit off part of her boyfriend's tongue, saying no other woman would want him now, a judge says.

The suit, seeking \$300,000 in damages, was filed in October 1983 by William Holzapfel Jr., 38, a building contractor from Frederick, Md., against Sandra Marich of Bradenton.

Holzapfel claimed Marich bit off part of his tongue, chewed it and "laughed at him and said that no other woman would want him but the defendant."

Holzapfel's father, William Sr., declined Tuesday to disclose the amount of the settlement, saying only that it was "a lot more than \$10,000" but "not anywhere near worth what happened."

He said his son cannot talk well.

## Move disturbs judge

**CAMBRIDGE, Mass. (AP)** — A judge considering whether testing of deadly nerve gas should continue in this densely populated community said Friday he was disturbed by the city's moves to stop the research.

Arthur D. Little Co., which has been testing the substances since January 1984 under a Department of Defense contract, was told to stop last March through a regulation issued by Cambridge Health and Hospitals Commissioner Melvin Chalfen.

The same month, Arthur D. Little won an injunction allowing the testing, and the matter has been at trial since Sept. 24.

"It has troubled me that someone with that big an investment ... after getting the proper permits ... could suddenly be put out of business without a hearing, without a finding, without a trial," Middlesex Superior Court Judge Robert Hallise said at a hearing Friday.

## UFO gave airliner an escort, Soviets say

**MOSCOW (AP)** — Pilots and passengers aboard a Soviet airliner have reported encountering a star-like unidentified flying object they said illuminated the ground with a dazzling beam and escorted them to their destination, a Soviet newspaper reported yesterday.

The newspaper *Trud* quoted a Soviet scientist who specializes in unusual phenomena, including unidentified flying objects, as saying the occurrence was "undoubtedly abnormal."

An Aeroflot domestic flight from the Georgian capital of Tbilisi to Tallinn in Estonia was approaching Minsk when "what appeared to be a large, unblinking star suddenly shed a thin ray of light which fell plumb down on the ground" from an altitude of 25 to 30 miles, the newspaper said.

"Ground control at the time registered splashes on its screens in the same part of air space," *Trud* said. The date of the flight was not given.

### Dazzling white spot

All four crew members reported that they "could see distinctly everything down in the sector of the ground illuminated by the cone-shaped shaft of light, the houses and the roads," the newspaper said.

It said the ray suddenly focused on the plane.

"The pilots saw a dazzling white spot surrounded by concentric colored rings," *Trud* said.

The UFO then reportedly zoomed toward the airliner "at flashing speed," leaving a green cloud in its wake.

The UFO positioned itself beside the plane at an altitude of 33,000 feet and accompanied it for the rest of the flight "like an honorary escort," the newspaper quoted one of the pilots as saying.

# Dr. Spock & partner write for the '80s

By Rita Hibbard  
P-I Reporter

Nuclear war is the greatest public health threat facing children. Give acetaminophen, not aspirin, to sick kids. Parents who attempt to create "superkids" may reap disastrous results. Television is bad. Routine circumcision isn't necessary, or even advisable. Those recommendations are among the new additions to "Baby and Child Care," the book that has become the bible of child rearing and made its author, Dr. Benjamin Spock, a household name.

Since its first publication in 1945, 28 million copies have been sold, and the book has been translated into 38 languages.

## Man dies after four hospitals refuse surgery

**SAN FRANCISCO (UPI)** — A stabbing victim without health insurance died after being shunted 20 miles to San Francisco when four hospitals refused to accept him for surgery.

Eugene Barnes, 32, married and the unemployed father of two children, suffered a deep stab wound in his left temple in a neighborhood quarrel Monday and died Thursday at San Francisco General Hospital.

A physician at General, who asked not to be identified, said Barnes might have survived if he had undergone surgery soon after he arrived by ambulance at Brook-

### SOVIET LIFE 2-95

### A Sakhalin Mystery

□ Not long ago people living in the central part of Sakhalin island in the Soviet Far East witnessed an odd dawn that was bright yellow and orange and not the usual milky mist.

Eyewitnesses said that for a moment the grass and trees were a vivid green. They looked as if they had just been painted. The unusual phenomenon lasted from 30 to 50 minutes.

According to experts, it could have been caused by a huge cloud of sand and dust carried by the wind from the heart of Asia through the upper layers of the atmosphere. Workers at the local weather station were able to send a probe to the cloud, which obtained some interesting information. At 1,000 meters the air temperature was plus 18 degrees centigrade, while on the Earth it was barely 4 degrees. Local weather forecasters believe that the rays of the Sun lost part of their spectrum while passing through the unusual cloud. Moisture in the clouds also had something to do with producing the effect.

## Glove firm wins \$18 million at last

**CHICAGO** — He considers himself a "little guy," but gives himself credit for being persistent. And yesterday, Scottson Webbe said the persistence paid off to the tune of \$18 million.

That was the amount of a judgment in favor of Webbe's company, Handgards Inc., in a lawsuit over plastic gloves against one of the nation's largest corporations, Johnson & Johnson.

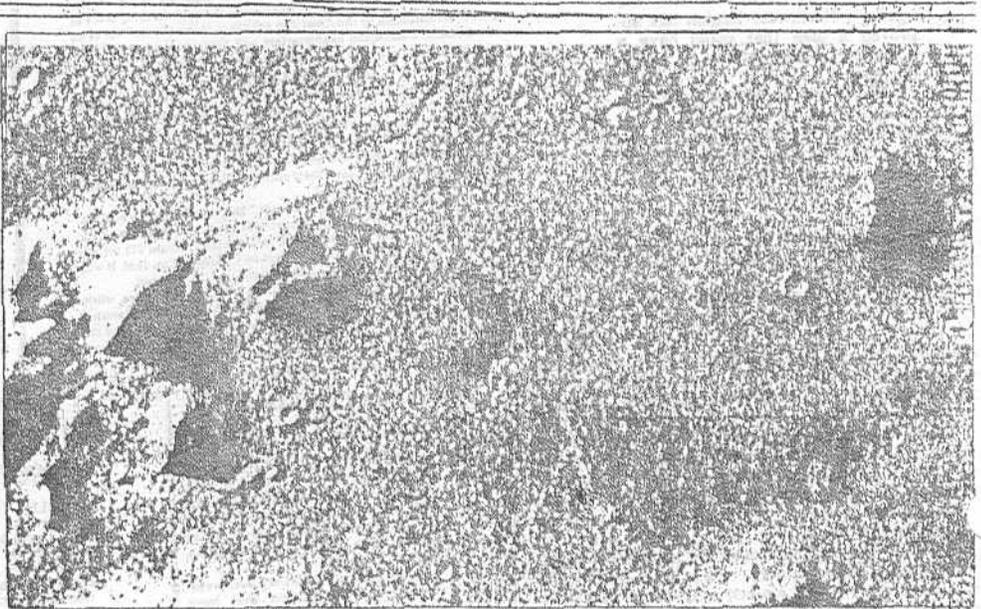

The U.S. Supreme Court ended 22 years of litigation yesterday when it refused to hear Johnson & Johnson's appeal in the suit.

Johnson & Johnson sued Handgards in 1961, alleging patent infringement for manufacturing gloves that used a heat seal similar to those in Johnson & Johnson's product. Handgards filed a countersuit and finally won trebled damages of about \$18 million — twice its annual revenue.

## Sharon loses final argument

**NEW YORK** — Time magazine did not knowingly or recklessly publish a false story linking Ariel Sharon with a massacre of Palestinians, a federal court jury decided today. The jury's finding after 11 days of deliberations ended the former Israeli defense minister's \$50 million libel action against Time Inc.

With the verdict, Sharon lost his libel suit against Time. The panel, which had been deliberating since Jan. 11, returned its verdict at 12:15 p.m. EST (9:15 a.m. PST).

## The Man on Mars is a monkey

A mile-long monkey's face stares silently at the stars from its perch on Mars on the right edge of this picture captured in 1976 by the Viking spacecraft. NASA officials have compared the Martian "face" to the "man on the moon." But 30 scientists, known as the Mars Investigation Group, say the profile indicates an ancient civilization. They say the photos appear to show four pyramids, left, lined up symmetrically six miles away, suggesting England's Stonehenge monuments.
