Helping People Become Aware

## The COSMIC MAN & the COSMIC WOMAN

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

## WHAT IS THE "TRUE" MAN OR WOMAN?

### QUESTION:

W.M.C. of New York City would like to ask Awareness, "What is the definition of a true man or true woman?"

### COSMIC AWARENESS:

This Awareness indicates that this according to the one who would define the term; that the term as having many different levels of meaning. The word "true" means that which fits the specifications desired or intended. The word "man" as that which has many different meanings.

In its original meaning, the word "man" is intended to refer to the conscious mind; that this became associated with the human being because it operated from the level of a conscious mind.

The word "woman" as being derived from the adjective description of the "womb-man", or the human with the womb. This Awareness indicates that the general classification of humans as referred to as man, or mankind. There are more specific uses of the word 'man' to designate the male sex, or to designate a particular age of male sex, or to designate a particular quality of behavior in the male sex. That likewise, these terms apply to the woman, to designate a particular age, or a particular quality of behavior. These terms also relate to psychological maturity and emotional maturity.

This Awareness indicates that a "true man" or a "true woman" can also have certain implication according to their fidelity, or referring to their integrity; this may also apply to the physical shape and symmetry of the bodies. This term or the phrases may also relate to their social status within their group; that this may also relate to their spiritual level of growth and development; that this may also relate to their veracity as a witness to events; that this may also relate to their honesty in dealings with others. This may also relate to their capacity for clear expression or their capacity for clearly defining; that this may even refer to their capability of balancing themselves: physically, mentally, emotionally, or spiritually.

This Awareness indicates that the word "true", of course, as relative, coming under the *Law of Relativity*, --being relative to the standards which one desires an entity to meet. For example, an entity who is among a group of thieves or robbers, wishing that the new candidate for the group to be tested to see if the candidate is true to their standards, may subject the candidate to certain types of tests. which would indicate the entity as being a true thief, a true robber; one who is true in his dealings with the group of thieves and robbers.

This Awareness indicates for another level, the true man or woman in a group of honest citizens, may be the entity who follows the morals and customs of the citizens and their concept of honesty; the term as being completely relative to what is intended by the entity who would define, or attempt to define, the term.

This Awareness indicates from the Awareness level of definition, a true man or woman is one who is on course, moving toward higher levels of awareness, expanding the consciousness and awareness levels of actions, of concepts, of feeling, of emotion, of sensitivities, following the laws which this Awareness has given: The *Law of Love*, the *Law of Unity*, and the other Laws which lift the entity into higher levels of awareness and bring about an integrity, an integration with the universal energies and forces of harmony, peace, love and co-creation with the Divine forces.

This Awareness indicates briefly, the true man or woman would be those who give up their separate will, the will to be separate, and surrender themselves to the spiritual or Universal will, the will of God.

## WHAT IS THE "COSMIC MAN"?

### (FOLLOW- UP QUESTION):

Occasionally in esoteric literature, the term "cosmic" man occurs. Would Awareness define or explain the "cosmic" man, if there's any difference?

### COSMIC AWARENESS:

This Awareness indicates that the word 'man' in esoteric levels can be substituted with clearer understanding of its meaning by using the word "mind". The cosmic man is the cosmic mind. The word man and mind are the same word in Sanskrit; that these words refer to the cosmic consciousness or that consciousness which recognizes the universal in all things, that the universe or the totality, the wholly, is that which is the basis, the foundation for any action taken.

This Awareness indicates essentially, the action which is whole, wholesome or holy, the action which is universal, the idea which is whole, wholesome or holy, the idea which is universal,--these are those which are used as a basis from which the entity acts or thinks; and the idea of action which is less than whole, which is separated, which is built on competition and separateness, which is focussed on not

the concept of integrating and bring differences together, but built on the idea of winning while another loses, winning at the expense of someone else,—these are the separateness and fragmented or schizophrenic concepts and ideas and actions which are of the non-cosmic level, the portioned or particle, or the fragmented consciousness levels.

This Awareness indicates that a cosmic mind is not one which must, at all times, perceive every action which is occurring throughout the universe, is not one which must, at all times, in every portion of the universe know what is occurring in every other portion of the universe. The cosmic mind is one which attunes itself to the totality, to the unity of all things, to the wholesome, wholly, or complete gestalt of a situation, rather than a separate, fragmented portion which is separate and not attuned to one part. The entity who seeks to be outstanding, or “standing out” from all else, this entity feeling that as a motive, may tend to separate from the gestalt, and this becomes less than cosmic man or cosmic mind.

#### The Fall of Man Caused by Lucifer & Rhyee

This Awareness indicates that the legend of Lucifer and the Rhyee presented a concept of a portion of consciousness which separated; and that separation created further separations which, in turn, created further separations; and each separation needing the satisfaction of being more significant than that which it separated from,—this creating all types of particles, all types of fragments, all types of separateness which, in turn, needed to prove itself superior to the other. That this has led to the violence, tragedy, and the suffering which entities have long experienced.

This Awareness indicates this also has been part of an action which has created the individuality of entities, the recognition of individuals' creative powers, and has allowed misuse of these powers and the repercussion for such misuse, and was allowed in order that entities might learn to become equal to the gods in the creature use of power; but to learn how to use that power wisely, rather than to increase personal significance. This Awareness indicates that the misuse of the power has created tragedy and has led to karmic repercussions upon those who have misused the power; that the entities, in turn, to unleash the karmic bonds upon themselves, must learn to use their power wisely for the good of others.

This Awareness indicates that when the entities separate themselves for purposes of self-significance, this is the action symbolized by the fall of angels, the fall of man; and when the entities seek to reassemble their being with that divine force, the divine creative energies of the universe, the universal and creative laws,—when entities seek to unify themselves with their creator, then they begin reassembling the parts which were separated, and finding ways to reconcile the polarities of ‘yes’ and ‘no’, of accept and reject, of all of the opposites, until the entity feels together and at one with the universal forces or the Cosmic Mind. When this occurs, the entity has become a

3. cosmic man or a cosmic woman, depending on which term the entity chooses to apply to the physical shape of the body or its qualities.

This Awareness indicates that essentially, the entity becomes a cosmic being or cosmic mind and the attunement to the oneness or wholeness of all things is that which unifies the entity with the cosmic mind, regardless of whether the entity is thinking about grapes, foxes, sheep, pillows, pizzas or whatever. It matters not that the entity thinks about fragmented things, so long as the entity is basically unified with the concept of totality and wholesome, or wholly, or complete life with the universe and all things.

#### The Fragmentation of an Entity

This Awareness indicates it matters not if the entity chooses one thing over another. Whether the entity chooses to accept or appreciate the mushroom pizza over the cheese pizza does not mean that the entity has a kind of competitive attitude toward these pizzas, or that the entity has just fragmented himself. This Awareness indicates that the entity may choose this person over that person for the job which he or she wishes done. The entity may choose to marry this person and not that person. Therefore, the entity may be selective and still not be fragmented. The entity may prefer the daylight to the nighttime, or may prefer nighttime to the daytime,—this does not mean the entity is fragmented. The fragmentation comes about when the entity feels separate from the totality, from the universal being. That the entity may feel fragmented and separate from the club which he or she once belonged to, but can no longer accept, or the entity may feel fragmented because the club rejected their membership; that this kind of fragmentation does not diminish the entity's cosmic beingness; that it all is but a state of mind. Wherein the entity can accept differences, divergencies, and even competition in one's life, and still feel at one with the universe and still feel at one with the divine forces, the entity is still within the will of God, within the will of the universe, as this is the situation. And the entity gives up personal will to the will of the divine and seeks, in his willingness to follow Divine Law, to reconcile differences wherever possible, even if it requires that the entity make a stand which is set apart and different in order that the opposing force must reckon with him, so that a resolution can come about.

#### How to Spot the Fragmented Entity

This Awareness indicates as long as the action is such that the motive is to reconcile differences and bring about a unity of all things, the entity is a servant of the universal mind. That the entity who disregards the universal mind and says, “I do not care what unifies and brings peace, I only care to get what I can, while I can, regardless of what others may say.” This entity puts himself as the center of the will of his mind, and does not center his mind on the universal mind, or the mind which would have all things unified and in harmony, but has his

mind separate from that harmonious universal mind, and says, "I don't care about the concept of harmony, I enjoy seeing others suffer at my caprice or whim. I want to win and really 'stick-it' to the other person before they 'stick-it' to me."

This Awareness indicates that these entities, with their weapons and swords, in competition, seeking to win at the expense of others, separate themselves from the concept of harmony and unity, and do not work for unity, do not fight for unity, but fight for self.

This Awareness indicates there are different levels of this action, and an entity can align oneself with those who are of a similar nature, or the entity can seek followers to align themselves with him, so that he can prove himself to be the center of power at the expense of others, or so that he can center himself around some power which does not care about the universal harmony of life, but cares only to unify all of life around this particular power.

This Awareness indicates this becomes a cultural group or gang-type of fragmentation that is separated from the universal will; and this gang, this culture, this group may create all types of havoc for others in order to attempt to gain control over the masses in hopes of getting more and more power to center around themselves that they may become likened unto demigods. That these entities seek the harmony within their own ranks and ask, "Do not rock the boat. Do not disobey. Obey the rules, and all will be harmonious," but the motives of these entities may be not to follow universal laws, not to follow the *Law of Love, the Law of Harmony, the co-creative laws, the will of the creative and supreme being*; but may require that all followers treat the leader of the group, the culture, as though the leader were that supreme being, so that the harmony, obedience and worship and adoration goes to that particular personality or group or figurehead, or even the concept which is ruling over the culture.

This Awareness indicates that this as the more common way whereby fragments grow and develop crystallized patterns and energizings to build up civilizations and structures which, in turn, can be used by the fragmented power to attack, to violate, to destroy other fragments, or even to compete with the universal laws and those who would follow the *Divine, universal laws which govern the universe*, by creating their own laws and by attempting to overpower or circumvent and ignore the universal laws.

#### Zits on the Body of God

This Awareness indicates that many such fragments rely on strength and power, and begin creating violence based on such power to intimidate and to draw in greater and greater followers; that no matter how powerful such fragmented forces may become, these forces are likened unto pimples on the universal body, and must in time give way; for there are always other forces and powers which will overcome these pimples of power.

This Awareness indicates that the divine, universal

entities can throw some of these laws out of balance temporarily, the scales will eventually move back into harmony and balance. The Alien Force may rock the boat, but the rocking eventually will cease and peace will come; that the separateness is that which rocks the boat; that the unity is that which brings forth harmony.

This Awareness suggests that *It*, also, has *Its* agents, which enter into the structure of the Alien Force, and these agents, called Wanderers, rock the boat for the Alien Force. These agents mirror the techniques of the Alien Force to some degree, and may create separateness within the structure which the Alien Force has set up, which the Alien Force wishes to maintain in harmonious efforts, and these entities may set up a structure that mirrors, but opposes, the structure of the Alien Force,—may set up a situation that is in opposition and in conflict to certain forces which are set up by the Alien Force.

This Awareness indicates that the difference between these operations is that the Alien Force seeks to set up its polarities in order to gain control for itself over the lives of others, and cares not for universal harmony, but only seeks to center the universal energies around itself; whereas the agents for this Awareness, the Wanderers, the angels, the servants, or whatever term entities wish to use on themselves, these entities who serve to balance the universal forces, may set up a mirroring action similar to that of the Alien Force, creating a conflict and a polarity; but the purpose of that polarity is not to center energies around oneself, but to mirror that Alien Force which seeks to center energies around itself in such a manner that the mirroring process dissolves the power of that centering action of the Alien Force. That once this is dissolved, a reconciliation may occur; and those who work for this Awareness are after that occurrence of reconciliation, rather than winning a battle over the Alien Force. But those who work for the Alien Force are after the power and self-significance which would come from winning a battle over others.

#### Conflict Resolution without Compromise

This Awareness indicates that you may check yourself to see in any conflict, whether you are seeking to win without regard for the feelings of others, at the expense of others, seeking to win your point of view, or to win a better position; while allowing the other to end up in a lesser position, or to have his or her point of view destroyed or ridiculed, while yours is inflated and proudly hailed. If this is what you are after, then you are following the pattern, the behavior of the Alien Force. But if your intentions are to find some solution where all involved can be satisfied,—not necessarily a compromise, though this may be in order, but a clarity which allows all involved to have greater understanding and reach a kind of rapport and mutual harmony from that understanding.

This Awareness indicates that the resolution of conflict does not necessarily imply that entities must compromise. How does one compromise in

a three-way conflict where one wishes to kill a third party, and the other does not wish to be killed, and the other party does not wish that entity to be killed either? If the one who would kill the other states that, "I want you to compromise with me; and if you won't let me kill this entity, at least let me half-kill the entity."

If one believes that compromise is the solution to conflicts, this entity might then say, "Yes, I understand your point of view. I can't agree that you should kill this entity, but I can see that if we are to get along at all, we are going to have to compromise. Therefore, I must allow you to half-kill the entity." Obviously, this is not a good method for finding the solutions to conflict, particularly in every case, although it may be satisfactory in some cases.

This Awareness indicates that the solution must take into account the understanding of a situation; and the conflict may need to increase in order to bring about that understanding. For example, one entity says, "I must kill this person in order to have my peace of mind," while the other entity says, "No, I can't let you kill that person, because I could have no peace of mind if I allowed this." The entities may then continue in their conflict and argument; the argument may increase; it may reach a state where the one who wishes to kill the third entity becomes infuriated and desperate and extremely violent; that the one who would prevent this from happening may also find it necessary to become just as extreme, or to use some other tactic; and the conflict may intensify. The intensification may result in a point wherein the action is reconciled between these entities. It may *not* reach such a point,—the one who wishes to kill the other may, in fact, succeed and may, in fact, kill *both* entities.

This Awareness indicates however, that the proper action is to attempt to find a way of reconciling,—not compromising,—but reconciling the differences; and wherein one is clear in the motives, seeking reconciliation, the entity may find that with this clarity of motive, that the intensification of conflict is not necessary. The entity may find it is necessary. The motive of seeking reconciliation will determine within the situation what action or what approach is most necessary and most appropriate, depending on the personalities involved.

This Awareness indicates that the entity seeking reconciliation will be acting according to divine will, regardless of what occurs. The entity may, in fact, find himself resorting to some form of violence in order to bring about the reconciliation. The entity may need to strike the other person in order to disarm the other person and to preserve the life of the third person; that it is the motive which is of importance, the intent which is of importance,—the intent being to reconcile; not to leave a victim, but to allow all parties involved to be winners as much as is possible.

This Awareness indicates that the entity who would be channeling the negative or Alien Forces is the one who wishes to win, regardless of what it

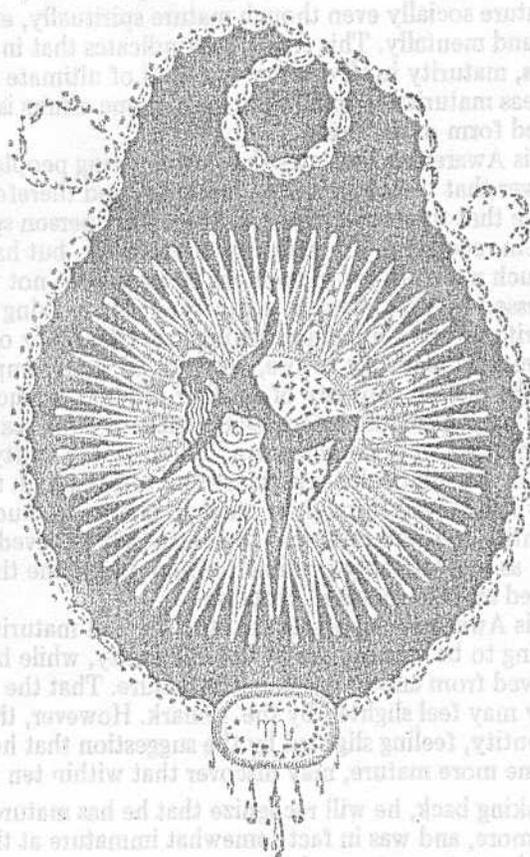

does to any other. This entity does not care for the welfare of the others, as much as for his or her own personal welfare. The entity who channels levels of Cosmic Awareness or Universal Mind, this entity seeks to allow all involved to benefit as much as is possible, and is concerned about the welfare of others even more than one's own welfare.

This does not mean the entity must sacrifice and martyr himself in order to make others happy. It does not mean that the entity must be concerned enough about the welfare of others that he would rather lose, if necessary; that he would rather lose something, if necessary, and come out on the losing end, rather than to win and have others as losers.

This Awareness indicates that when *It* speaks of winning and losing of the cosmic mind, *It* is not referring to the great loss,—such as the loss of life, or the great winning, so much as *It* means that the entity concerned about the welfare of others above self would tend to keep as much as possible a balance of welfare for all involved, including the self; but if that is not possible, then the entity would be willing to give up the self-benefits that others may benefit more,—this as the expression of the *Law of Love*.

This Awareness indicates that the self-centered entity who would seek to assist others, up to a point, but in a showdown would favor himself rather than others, and would harm the others in order to benefit: this entity as channeling the Alien Force during that particular circumstance. (This however, does not mean that the entity is always a channel for the Alien Force.)

\*\*\*\*\*

## WHAT ARE THE QUALITIES OF THE MATURE ADULT ?

### QUESTION:

A question from J.M., Ridgecrest, Calif. In the psychic reading given for me by Sam Millar, It mentioned that in some ways I ought to grow up. What does Cosmic Awareness suggest are the qualities of a mature adult?

### COSMIC AWARENESS:

This Awareness indicates that essentially, an entity as expressing maturity when the entity takes responsibility for oneself and his or her actions. This Awareness indicates the entity as expressing even more maturity when the entity can not only take responsibility for oneself and one's actions, but can also take responsibility for the actions of others and assist them.

This Awareness indicates that wherein an entity can take responsibility for others and can assist them, this as being an action which can also lead to even greater maturity, in that the degree of assistance or the degree of responsibility whereby one assists another is relative, and in direct proportion to, the maturity role.

This Awareness suggests that maturity is not simply a matter of age, nor is it a matter of arrival, wherein one arrives at maturity. Maturity rather, being likened unto that of a fruit which develops to its full potential to become the essence of its being. This Awareness indicates that wherein an entity can achieve its full potential and attune itself to the essence of its being, the entity may be said to be mature.

This Awareness indicates there are various ways whereby things or entities may mature in one sense while remaining immature in another sense; that one may mature spiritually while being immature emotionally, or visa versa; one may be mature emotionally while being immature spiritually. One may be immature mentally while being mature both emotionally and spiritually. One may also be immature socially even though mature spiritually, emotionally, and mentally. This Awareness indicates that in other words, maturity in all dealings is a kind of ultimate maturity, whereas maturity in some dealings or some affairs is a more limited form of maturity.

This Awareness indicates that often young people suddenly discover that their bodies have matured, and therefore they assume that they are mature. That another person speaking to them recognizes the maturity of the body, but having had such maturity for himself for so long, does not feel impressed by that physical maturity; or recognizing the maturity of one's mind and having experienced or observed such mental maturity before, may not be highly impressed with the mental maturity of another. Therefore, such an entity may speak of the emotional maturity and state that 'in some ways you are immature.' Whereas, the entity hearing this, sees all of the experience and effort which the entity has moved through in order to mature as much as the entity has, and feels that the entity has achieved as much as was humanly possible for him during the time allotted and has matured properly.

This Awareness indicates that this level of maturity seeming to be appropriate to the one entity, while being observed from another as being immature. That the one entity may feel slighted by the remark. However, the first entity, feeling slighted by the suggestion that he need become more mature, may discover that within ten years in looking back, he will recognize that he has matured even more, and was in fact somewhat immature at the time the statement was given.

This Awareness indicates that likewise, the entity giving a statement to another may also have areas within his being which are not fully mature. This Awareness indicates the mature entity may or may not accept such statements as being valid, or may not give such statements to others, depending on the degree of maturity or how this is interpreted. This Awareness suggests that you may interpret that statement in the following manner, if you wish to receive an accurate understanding of what transpired. The entity Sam Millar as concerned about giving the proper direction in the reading of the cards and the suggestions to you, and having to pick words which would have the most effect in giving the understanding of the situation, so that you would learn the most possible from what you requested; and the entity, using these particular words, because his level of maturity has led this entity into feeling that in general this was the particular or proper wording for the situation. This Awareness indicates that you, in turn, hearing these words, interpret and hear something slightly different from what was intended, and look immediately at levels of yourself which you consider as possibly not being mature, and feel a little concerned at having these pointed out and wonder how you might mature more quickly.

This Awareness indicates that whatever significance you put on this particular statement, does in some way reflect your own level of maturity. This Awareness suggests also, that you might consider that this was but a statement to lead you to look closer toward yourself and that you not need to concern yourself with the statement, but rather to examine yourself to see if there are areas which you have overlooked which can be discerned more clearly for your benefit.

This Awareness indicates that this then, leads you to the present question: What is the nature of maturity? This Awareness indicates the mind which has examined the self and has looked at the concept involved in an experience and recognized the weakness one may express or hold, while also looking to strengthen oneself and to overcome any weaknesses involved; all of this questioning, observing, and looking objectively, is a process of maturing.

This Awareness indicates that the more one examines oneself,--not to defend or to overpower others, but to discover one's nature and to balance one's energies with that which is around in one's environment,--all of this objective looking is that which develops maturity, nourishes the growth and development of one's being. This Awareness indicates you are one who is quite mature in many ways.

### FOLLOW-UP QUESTION:

Awareness, I have an area of a kind of inner torment that I think relates to this, in that there are various spontaneous actions that I do. I will regret them and then feel something in my solar plexus or stomach as it responds to this; and it seems to reflect immaturity or some kind of problem, and it takes ages to de-energize and dissipate this.

### COSMIC AWARENESS:

This Awareness asks you: Who has told you that you were not allowed to have immaturity within your being? This Awareness indicates there are no cosmic laws, there are no universal laws which forbid immaturity. This Awareness indicates there is no law which forbids entities to become tired and to need rest, there are no laws which forbid entities to be immature, there are no laws which forbid entities to develop one aspect of their being while neglecting another part of their being. This Awareness suggests this as all a matter of choice.

This Awareness suggests that wherein you discover that there is a portion of yourself which is not suitable to you and causes trouble or causes you problems, then you may examine that portion to see if there is some way to improve the mechanism, to improve that portion, so that it is more suitable to you. That wherein you find a portion of yourself which offends others, you may wish to examine that portion to find a way whereby it becomes less offensive, or non-offensive, or pleasing to others.

This Awareness indicates all of this is matter of choice, according to your own self-awareness, according to your own discernment of who in fact you really are, and in discovering the various parts of yourself, the mannerisms and the behavioral patters of your being. This Awareness indicates that as you discover these, improve upon yourself according to the image which you desire, you may call yourself mature, or more mature. However, this does not guarantee that others will consider this as a mature thing to do. This does not guarantee that others will not think of you as immature. This Awareness indicates all that is open to you is to discern for yourself how you can live your life to the best of your ability in being what you really want to be. This Awareness suggests from that point of view, concepts of maturity and immaturity have very little value, for they are but opinion about the evaluation level of an entity. The evaluation of an entity as having little real substance in terms of what the entity's purpose and intention and self-acceptance is all about.

This Awareness suggests that essentially, concepts of maturity and immaturity are but relative forms of grading the achievement level of oneself or another. And this Awareness suggests that when this is completed and the grading process is looked at, you may put aside the report cards and get back to your lessons.

**FOLLOW-UP QUESTION:**

So the physical distress and gut feeling is the reaction to the self-grading process?

**COSMIC AWARENESS:**

This in the affirmative.

**FOLLOW-UP QUESTION:**

The book, *Your Inner Child of the Past*, written some time ago, goes into this subject in depth, if I recall correctly--where it explains how there's always the little boy and the adolescent and the mature man and the old man in all males, for example, and a women should be aware of this when she marries them. Does Awareness recommend this book?

**COSMIC AWARENESS:**

Very highly. This Awareness has recommended this book previously. This Awareness suggests that you keep this book in stock for entities who wish to better understand themselves.

This Awareness indicates there have been quite a number of other entities who have gleaned information from this book from which to base therapies and other writings. This Awareness indicates that this book still stands as an original and classic statement; that there are others who have restated the principles of this book, yet this book as still timely in its message.

\*\*\*\*

ED's Note: This book, "Your Inner Child of the Past," by W. Hugh Missildine, MD, is published by Pocket Books, New York, N.Y., and is available in many bookstores. CAC keeps a paperback edition in stock for the membership. Please see book catalog.

**THE TUNGUSTA RIVER**

**EXPLOSION**

**--WHAT REALLY HAPPENED THERE ?**

ED's Note: there are many stories these days about the famous and mysterious explosion that occurred in 1908 in the Tungusta River area of Russia. Numerous articles speculate that this immense explosion was caused by a meteor or some kind of cosmic activity, some have even speculated that it was some type of atomic bomb, even though the atomic age did not arrive until 40 years later. Due to the interest in this phenomenon, we are reprinting a reading that was given in August, 1976, and printed in an early 'Revelations of Awareness' newsletter, which has been out of print and unavailable for many years, wherein Awareness solves the mystery once and for all.

**QUESTION:**

According to *Newsweek* magazine, on June 30th, 1908, a giant cylindrical object blazed across the skies of central Siberia. It exploded over the uninhabited Stony Tungasta River region with a brilliance several times that of the sun, a pillar of fire visible for hundreds of miles, scorching the forests, deafening distant herdsmen and causing intense heat waves for 40 miles or more. A mushroom cloud followed the fire-ball and a "black rain" poured debris over hundreds of square miles. Expeditions to the scene 20 years later found a forest of charred and broken trees, but no crater to indicate a meteorite. Scientists have advanced numerous theories, from an explosion of a gaseous comet to an atomic bomb built before our present nuclear age.

But in a book just out called, *The Fire Came By--the Riddle of the Great Siberian Explosion*, by journalists John Baxter and Thomas Atkins, comes the most astonishing explanation: the explosion was caused by a nuclear-powered spacecraft from another planet that blew up while attempting to make an emergency landing on Earth.

Will Awareness please tell us the truth about what exactly did happen and how it came about?

**COSMIC AWARENESS:**

This Awareness indicates the latter information as that which is correct. This Awareness suggests that the spacecraft as having contained large amounts of fuel, this not being of a nuclear nature as is presently known on this plane. This Awareness indicates that the spacecraft as having reversed its polarities in an attempt to avoid crashing, yet the momentum of its movement as being so great that the craft crashed before the polarities could be completely reversed. The action of having reversed polarities colliding with the polarities upon the earth and moving toward an explosion was such that a chain reaction was set off, much likened unto the atomic and nuclear explosions known upon your plane.

### How UFO Entities Move Through Dimensions

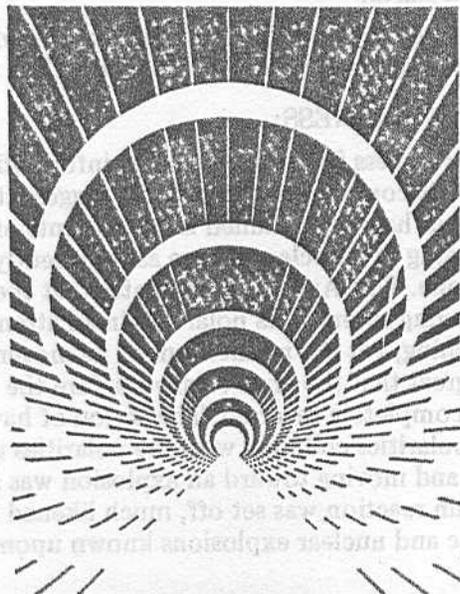

This Awareness indicates that entities from these other lands, other areas of space, do often move into the third dimension upon your plane and are seen; the nature of this action as not so much a movement from outer space, as a movement from outer dimensions.

This Awareness suggests that entities may eventually begin to understand the nature of vibration. The vibration of light as seen by the human eye being that of the forty-ninth octave, that the infra-red octave being the forty-eighth octave and ultra-violet being the fiftieth octave; that entities from these other dimensions can traverse from octave to octave, can move through the barriers between the infra-red spectrum and into the spectrum visible by the human eye, or can move on into the ultra-violet spectrum. That some entities even more advanced, can move into those vibratory rates that far exceed the levels of light and move into levels of radio waves and mind and gravity waves, or can move into lower vibrations of heat, energy, sound and the physical matter.

### How Earth Entities Appear to UFO Beings

This Awareness indicates that the universe as entities understand it may be likened unto watching a fish in an aquarium, whereby the entity observing the fish can ask the question, "Is the fish aware of my presence out here, and if so, does the fish suppose me to be a supernatural being and does the fish wonder how I can live out of water?" This Awareness indicates that entities upon the physical plane, viewed from another dimension, are seen in a similar manner as being likened unto fish in an aquarium who cannot seem to move out of the water of air and into the water of spirit, and these fish being limited by the need to remain on the earth in the air breathing that which is called oxygen; these entities upon this plane appear to many of the entities of these other dimensions as being 'stuck' in their habitat.

This Awareness indicates that even beyond these entities, the macrobiologic animals and creatures and animals that swim through space, that swim through the world of ideas and concepts, that swim through

8.

the vibrations, breaking the barriers between octaves; even these beings can be observed by others who look upon these as fish in an aquarium. That there is no actual hierarchy system involved in this, there are simply forms who have adapted to certain environmental behavior and lifestyle and systems and no single form is actually higher than another, except in the mind that would perceive this. That the jellyfish, the starfish, or any creature; the ant, the plant, the serpent, the human being or the macrobiologic creatures which swim in space and move in these other dimensions, and those other races from other planets of humanoid shapes, all of these and the angels,--all of these creatures are One with this Awareness, and each is held as sacred by this Awareness, and none is seen as inferior to any other, nor unworthy of being what it is.

This Awareness indicates that the mysteries of this plane relating to those experiences and events such as Charles Fort wrote about and spent a lifetime collecting,--the oddities of science,--these mysteries can be understood easily when entities begin realizing the true nature of the universe, of consciousness; that all forms are but frozen images and there is a total Being called the "Universe" and in that Being are many, many mansions and many creatures, and all your dreams cannot begin to perceive all that "is", for there are continual new creations even as there is a continuing imagination present.

### MARTIN LUTHER KING'S MESSAGE

#### QUESTION:

E.J. has a question. "Please explain the meaning of Martin Luther King's phrase: "I have been to the mountain top, and was allowed to look over and see that we as a people will get to the promised land." Was that only a fundamentalist phrase, something the church people needed to hear at that time, or was it something else?"

#### COSMIC AWARENESS:

This Awareness indicates that this as a poetic way of stating: "I have seen the future, or I have looked over the horizon and see that we will in time reach our purpose and our goals and our destiny." This Awareness indicates that this purpose, the goals and destiny, being that which is implied as freedom, and as equality, and as appropriate development so as to be a viable and respected group of citizens. This in reference to citizens of humanity, rather than simply citizens of a nation.

"There are a thousand hacking at the branches of evil to one who is striking at its root."

Henry David Thoreau

## HOW A HEAVY PAST-LIFE EXPERIENCE CAN CREATE PROBLEMS IN THIS LIFETIME

### ED's Note:

Some years back, a mutual friend confided in Vicki that over the years she had vaginal bleeding, not connected to the menstrual cycle, serious bleeding that numerous doctors could find no physical cause for. Before this particular trance session, she had called Vicki again and mentioned she was again having the problem. Throughout the trance session, Vicki was worrying about her friend, and apparently Awareness picked up on it. No questions were asked about this problem, but the solution came in the following Closing Message from that particular session. Although this is deeply personal in nature, it indicates how past life experiences can affect an entity in present lifetime.

ED's Note: although we never read about it in the press or see it on television, etc., rape and other violations of women by American troops during World War II was a lot more common, particularly in Europe, than we want to hear about. The image being promoted all these years was that of the brave Americans, risking their lives to liberate captured towns and cities from the Germans; these Americans all representing those noble Christian values, which according to the propaganda, brought Germany to its knees and somehow made that war and slaughter a virtuous and honorable event. Neither being true as history is only now revealing. In many cases, rape and pillage was the reward the troops were given for having won a battle or "liberated" a village. If caught in the act, American Negro soldiers were usually jailed and eventually executed; few white soldiers were ever arrested. According to the media, it was always the wicked Russians who raped all the women. Viewed from a perspective of 40 years, historians now concede that it was the Russians, not the Americans, who had won the war in Europe, that Germany would have surrendered to them even if America had never entered the war; that the Hollywood image of Gregory Peck and others bravely bombing the German cities and hastening the end of the war was primarily a lot of hype. As it turned out, all those bombings essentially did was to waste tens of thousands of civilian lives, mostly women, children and old people; that the German factories and the war machinery were rebuilt as fast as they were hit, and at the end of the war were still in almost full production. Essentially, according to the historians today, Germany lost the war when it made the mistake, like Napoleon, of invading Russia, for it was in Russia that millions of German troops were killed and it was the Russian juggernaut charging into Germany that caused the surrender.

### COSMIC AWARENESS:

This Awareness indicates that in regards to the entity A.L., that much of her present problem is related to a past-life experience whereby she was deeply violated. This Entity as having been a nun in a convent, this in Northern Italy, that the nunnery was attacked by American troops, that this entity was one who was deeply violated by a group of American troops, who were of a most savage nature. This Awareness indicates the entity's memory of this violation is such that it will assist in the healing of her body. This Awareness suggests that the entity in hearing this message will, through deep meditation or dreams, recall this experience, and the recollection will release her of the karmic carryover from that period. This Awareness indicates this experience went beyond physical rape, into murderous violations to a sadistic torturous death.

### (FOLLOW-UP QUESTION):

This occurred in World War Two?

### COSMIC AWARENESS:

This in the affirmative.

\*\*\*

### WHAT TO DO ABOUT GRAY HAIR

(Excerpt from a personal reading)

#### QUESTION:

What can be done to restore color to gray hair?

#### COSMIC AWARENESS:

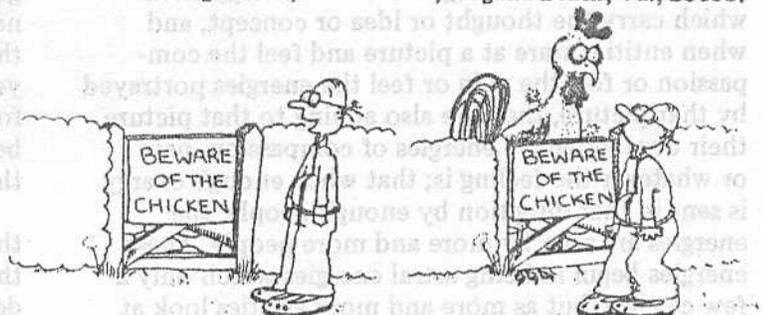

This Awareness indicates this as related unto an imbalance of AIR in the tridosha. This Awareness suggests the use of Vitamin A, particularly through carrots and fresh vegetables can provide Vitamin A. That the use of Vitamin E as very beneficial, particularly in regards to taking the tablets and also in using Vitamin E oil, that this also may be applied directly to the hair and scalp approximately one time a week; that this may be applied as wheat germ oil. This Awareness indicates that carrot juice and cucumber juice mixed together as beneficial; this being a drink of one to two glasses daily. That the stimulation of the scalp through massage as that which is beneficial. This Awareness indicates that the nature of concern and mental anxiety

However, like the debacle of Vietnam, there are those in power who are dedicated to perpetuating the myth that wars in which Americans participate in are somehow noble and virtuous as the saints go marching in; and for those thousands of unquestioning youths who came home in boxes, these fat old men who engineer these murders ever and always find new ways to perpetuate the lie that "no American boy has ever died in vain."

How long, oh lord, how long?  
(Avaton)

coupled with certain deficiencies in your diet, (this relating unto the action of the anxiety requiring certain potassium which did deplete the body); that you use the Vitamin E, the cucumber and carrot juice, this and daily massaging your head.

ED's Note: In the past, Cosmic Awareness gave many formulas and remedies through the channel of Edgar Cayce. Many of these are still formulated and marketed, including an excellent remedy for graying hair. For free catalog and details, please write: Tom Johnson, The Heritage Store, PO Box 444, Virginia Beach, Va., 23458.

## THE MYSTERY OF THE WEeping STATUES AND CRYING PAINTINGS

(MORE ON THE PARALLEL UNIVERSE)

### QUESTION:

A question from V.K. of San Francisco:

"Would Awareness please explain what causes holy pictures of Christ's mother and even statues of the Blessed Mother and Christ to weep at times? No scientific reason can be found for the phenomenon. Is this the work of God via external powers as on the day of Pentecost, or is it the work of poltergeists? I might mention in particular an icon known as Our Lady of Perpetual Help, which weeps at times and leaves its mark. Is this the work of God, what is the message intended? If it is the work of poltergeists, what is their motives? Such phenomenon certainly seems to encourage faith in God. Thank you very much."

### COSMIC AWARENESS:

This Awareness indicates the parallel universe or planes on occasion and under certain circumstances do overlap and do intermingle; that it is possible for a group of entities to manifest from an invisible realm something into the visible realm. That likewise, there are entities who can look into an empty room and see spirits walking around; that often these spirits use the same doors, the same steps, the same passageways as are used by entities of this plane. In the same way entities looking with great energy at a painting are capable of projecting energy to that painting and giving it a kind of energized vitality, this energy or vitality given to that painting will carry whatever is implied in the focusing action. This is likened unto wherein an entity projects a thought into a stone, and sends this stone to another, if the thought is of healing, the one receiving the stone will receive the healing energies from the one who thought the healing energies into the stone.

This Awareness indicates that the mind creates thought forms, or energy screens or energy fields which carry the thought or idea or concept, and when entities stare at a picture and feel the compassion or feel the pain or feel the energies portrayed by that picture, they are also adding to that picture their own reflective energies of compassion, pain or whatever the feeling is; that when enough energy is sent in that direction by enough people, the energies are seen by more and more people. These energies begin as being astral energies which only a few can see, but as more and more entities look at this, the energies which are added by these additional

looks, creates a greater viscosity of energy until these energies appear more easily to those who don't normally see into the other realms, and in some cases these energies can become physical. This Awareness suggests if this is not clear, that further questions may be asked regarding this.

### CAN ONE TOUCH THE MADONNA AND BE HEALED?

#### (FOLLOW-UP QUESTION):

Well, this phenomenon often carries with it what people seem to believe is a healing capability, like when touching a statue of the Madonna that is crying,--I believe I have read stories that entities have been healed by touching things like that. Is this then primarily the suggestive force, that the entity is in actuality healing himself from this?

#### COSMIC AWARENESS:

This Awareness indicates that entities who approach this kind of painting with the expectation of benevolent energies, whereby entities approach a painting of this nature, or a statue, believing that this is a favorable or benign or goddess or deity, wherein entities have this attitude toward such a deity, then they are opening themselves for benign energies to be returned, and in this manner the suggestive force is that they receive, or very often receive a healing on some level. That where a total stranger to such a statue to be told that this is a demonic creature, and whereby you stand before this statue you will be cursed for all times to suffer most horrid types of experiences, that stranger upon coming to such a statue (if the stranger believes the story), might find that this was of indeed a horrible experience, and might have experiences following which would be considered as curses.

This Awareness indicates that what you look for is what you find, in many levels of reality,--this not in every case,--this particularly in cases of mind or belief levels. That naturally, if an entity moves into a closet where there is no treasure of gold, but is looking there for gold, the entity will not find this, this being on a practical level, but in the realm of beliefs and suggestion, as ye seek, so ye find; as you sow, so you reap,--what you look for, you tend to discover. This being in realms of belief, and the ramifications of those beliefs have their influence upon entities.

This Awareness indicates that in the example of the entity who is told that a benign being is evil, the entity may upon looking at that benign being, decide that the message given was not true, the entity may sense the benign feeling from that image,

picture, statue or whatever, and instead may decide that the person who told him this statue, picture, or benign being was evil, was in fact telling him a falsehood. In such a case, the entity could receive benign energies from that statue, picture or benign entity in spite of the message which was given.

Wherein the entity accepts a falsehood about a benign being and in fact believes this to be an evil being, the entity then receives what he expects from that being; this as being the basis for black and white magic, the power of suggestion as being one of the most powerful forces in the universe, that this particularly in terms of suggestions which are believed. This Awareness asks entities to be cautious about suggestions and about what they believe. This Awareness suggests also that you be aware of suggestions and beliefs, for they can be powerful tools for good.

#### WHAT ABOUT BLEEDING STATUES ?

#### (FOLLOW-UP QUESTION):

Awareness, is it the suggestive force then that accounts for some of these icons or statues that we read about in the newspapers and tabloids that become sort of shrines? I'm thinking specifically of statues and paintings of the entity Jesus which seem to bear stigmata periodically, and when analyzed in laboratories, they announce that it is indeed blood that has been coming from these statues or pictures. Is it the suggestive force of the people who view this that actually create genuine blood appearing in such instances?

#### COSMIC AWARENESS:

This Awareness indicates that in some instances this is correct, along with entities from the inner plane who are also adding energies to this. That in some instances, this is outright fraud, wherein there are porous veins that run through these statues which allow the blood to seep through in certain places; this likewise in various icons and pictures; that these being simply to fool the masses.

#### (FOLLOW-UP QUESTION):

But there have been *authentic* cases as Awareness indicated, would that...

#### COSMIC AWARENESS:

This in the affirmative; this also in relation to levitation, that there have been entities who levitate, but there have also been entities who use trickery and who in fact are fraudulent in their expression as of levitating.

"Self-scrutiny is not treason.  
Self-examination is not disloyalty."

Cardinal Cushing

#### THE ARCHETYPAL LAW

The Archetypal Law is that Law which is the prototype for the echoing reflections of other Laws.

The Law of Archetypes as that which serves as the skeleton or framework for other laws.

The first Archetypal Law as the Law of One, The second as the Law of Two, the third as the Law of Three.

This apparent division as never-ending, so long as the Law of Description is in effect.

Concepts and personalities, numbers, shapes, forms, situations that serve as patterns for others to follow are archetypes, even as the pyramid was an archetype for the hierarchy systems, and the zodiac shall be the archetype for the new world order.

Cosmic Awareness

#### HOW TO OVERCOME INSOMNIA

( HOW TO RESET THE BIOLOGICAL CLOCK )

#### QUESTION:

Does Awareness have any suggestion on how I can overcome insomnia?

#### COSMIC AWARENESS:

This Awareness suggests that you stay up each night two hours longer than the night before, until you have reached the time when you desire to go to bed and fall asleep. For example, if you cannot get to sleep before 2:00 AM, this Awareness suggests that you stay up until 4:00 AM the first day, then 6:00 AM the second day, then 8:00 AM the third day, 10:00 AM the fourth day, 12 noon the fifth day, 2:00 PM the sixth day, 4:00 PM the seventh day, 6:00 PM the eighth day, 8:00 PM the ninth day and 10:00 PM the tenth day; and if that is the time you wish to fall asleep, then from that day forward use that time as your bedtime. This Awareness indicates that essentially, this is how you may set your biological clock for the time you wish to fall asleep.

## WERE THE VISIONS OF JOSEPH SMITH, FOUNDER OF MORMONISM, TRUE?

(WHAT IS THE "TRUE CHURCH")

### QUESTION:

In reference to the Church of the Latter Day Saints, please inform us if the story of Joseph Smith, the founder of the Mormon faith, is true; and what is the "true church?"

### COSMIC AWARENESS:

This Awareness indicates the story of Joseph Smith as true for him; that there are certain elements which were fantasied within his own consciousness through the experience of certain beings which could not have been seen by other witnesses if such witnesses had been present during those periods. This Awareness suggests that in essence, however, the story as being true when looked at from the level of spiritual experience rather than from the materialistic, scientific, factual point of view. This Awareness indicates that you must understand the worth 'truth' is relative to the particular viewpoint of the viewer. That which is viewed from the materialistic level will not see certain experiences and truths that the mystic sees, and the mystic will not necessarily recognize the truth of the materialistic scientist who thinks he sees a truth. This Awareness indicates that truth is relative and in terms of the 'true church' this too is relative. The true church, if there is such a thing, must reside within the consciousness of the entity; that the true church is that aspect within your own psyche which is capable of seeing what "is" in any moment without having an opinion about what "is", but simply looking and being aware during each moment.

*The angel Moroni delivering the golden plates of the Book of Mormon to Joseph Smith on September 22, 1827.*

This Awareness indicates all words are lies; all forms are lies; all structures are lies, and when you can look beyond these things and see what "is" you may begin to understand what is truth; yet the word 'truth' itself is a lie, for truth changes from moment to moment; therefore, once you have discovered a truth, you have also discovered a lie; therefore, you need not concern yourself with truth or falsity, but only concern yourself with what is happening.

This Awareness suggests that in becoming aware of that which is occurring, which is constantly changing, which 'is' regardless of all opinions about *what it 'is'*; as you become aware you learn to discern rather than to judge. That discernment can see what 'is' and in that discernment you need not judge whether it is true or false, for you have discerned what 'is'.

This Awareness suggests: How can you have an opinion about anything when you are confronted with *what is*, --a fact!

### THAT BRIEF CANDLE OF LIFE

(Ralph Duby, Interpreter)

It is indicated that your lives are but a brief flicker, that your lives are but a flame that lasts but for a moment between two dark nights; that the first dark night is that night of your birth, that the second dark night is the night of your passing over; that your lives are but brief; that your concerns are many; that your problems are many; that you must now reflect as to the brevity of that flicker, to the brevity of that flame which appears but for a moment between those two dark nights; that the dedication that you make to this Awareness is that dedication which looks to great life that is beyond the brief flicker which is your lives, to that great Light which is this Awareness; that those who meditate have seen this Light; that if you concentrate your mind on that brief flicker, if your concentration and your attention is on that brief flame, that brief candle, that you are looking at a gnat when an elephant stands near you and that elephant is beyond size and beyond dimension; that your concern with gnats is that concern wherein the flicker is considered more than that brief candle which is your lives; that entities on this plane must meditate on that greater Light and not on this brief candle.
